THE 2001 YEARBOOK IS ASSEMBLED

We do not claim to have produced a flawless book. We have tried, with what few resources we had, to give you a few memories. And while we are sorry at falling short of the standards we set ourselves, we know that each one of us carries a picture of Williams in his or her heart. And that cannot be replaced.

Christine Fletcher ’02, Abid Shah ’02, Jason Davis ’05
New Unified Science Center dedicated

World-renowned scientists participate in week-long activities

In the darkened Wege Auditorium, Charles “Chip” Lovett, a professor of chemistry, ignited an array of flaming, foaming, smoking and exploding chemistry displays to formally dedicate the new Unified Science Center on Saturday, Sept. 23.

“This is a transforming event for Williams College,” said Morton Owen Schapiro, president of the College, who served as master of ceremonies for the dedication. “The science center is a result of the faculty’s vision. It is the single largest construction project in Williams history.”

The dedication took place on the same weekend as Convocation, and for the week-long celebration, each science department invited a world-renowned scientist to give a lecture. Speakers included astronomer Jocelyn Burnell, who discovered pulsars; Edward Tufte, a leader in the field of information design; psychologist George Miller, who studies the limits of human memory; and Nobel Prize-winning chemist Thomas Cech, who has done extensive research in RNA. Other speakers were computer scientist Donald Knuth, physicist Daniel Kleppner ’53 and geologist William B. F. Ryan ’61.

At Convocation, after Schapiro gave opening remarks, biologist Rita Colwell, director of the National Science Foundation, delivered the keynote address. Her speech focused on the importance of merging disciplines, as she stressed her perspective that “how everything [science and humanities] comes together” is the most interesting part of science. Through her research, particularly on the spread of cholera, she has “seen the power of meeting other disciplines more than halfway.”

The $47 million Science Center is a unified complex of 185,000 square feet of existing space with a 120,000 square foot addition. It includes the integration of the three Thompson Laboratories and the new 80,000 square foot Morley Science Laboratories.

Also, the six former departmental science libraries have been consolidated into the new Nan and Howard B. Schow ’50 Science Library. In addition to the new buildings, renovations have been made to the entire original chemistry building and to several spaces in the Biology and Physics buildings, Bronfman Science Center and Clark Hall.

This project was needed for several reasons. Along with bringing older spaces up to code, the renovations address parts of the current facilities that have not been improved upon for more than 50 years in some cases. The new complex adds more research space for the growing number of faculty and students participating in scientific research. And for the first time in the College’s recent history, the Science Center provides a unified library for the explosive growth of scientific information.

“Two hundred years ago, we were the leader in science,” said Lovett, the chairman of the science building committee. “This building is really a reaffirmation of Williams being a leader in science education.”

One of the key features of the Science Center is that it creates literal bridges between previously separate science buildings and adds spaces for students and faculty to gather and share their work. “With its focus on student-faculty interaction, interdisciplinary activity and sharing of resources, Williams College is an established leader in undergraduate science education,” wrote Lovett in a letter introducing the Science Center lectures. “Our new Science Center has been designed to optimize these activities and promises to continue Williams’ tradition of setting the standard of excellence in the teaching of science at the undergraduate level.”

The project began nearly a decade ago after the Chemistry Student Advisory Committee recommended improvements on the outdated chemistry labs. From this start, the project “took on a life of its own,” and expanded to include the Schow Science Library and the Morley Science Laboratories, said Peter Wege ’71, who represented the Board of Trustees at the dedication.

“The mandate from the trustees was to use the resources of the College safely, but to make sure it is state of the art as well,” said Wege. To fund the $47 million complex, the College raised $23 million in donations and issued $24 million in bonds.

Throughout its development, the science center has received considerable attention from other academic institutions.

“I think that it is a model for the outside world,” said Harry C. Payne, former president of the College, who noted that many other college and university presidents contacted him about the complex. This project was conceived and developed under Payne’s tenure as president of the College.

Over 45 companies participated in the planning, design and construction of the Science Center. At the dedication ceremony, Phillip Wilde ’78, a design partner at Zimmer Gunsul Frasca Partnership, represented the groups and thanked all of the many people involved in completing the project.

“This building, this facility, is a testament to what can happen when you have some good ideas and have a lot of cooperation and hard work from lots of groups of people,” Lovett said.

“I am sure you can imagine how exciting this new building is going to be for all the students who come here,” he added.

The Committee on Undergraduate Life (CUL) approved a proposal in early February to decrease the maximum lottery housing group size from eight to four. This proposal, which was met with significant opposition from students, was only one of many changes CUL planned to enact to try to foster a greater sense of community spirit at Williams.

The proposal was originally slated to be in effect for this spring's housing draw. However, at the Feb. 12 Housing Committee (HC) meeting, Tom McEvoy, Director of Housing, postponed its implementation. Although nothing has officially changed from what the CUL voted on last week, McEvoy indicated that he thought the CUL would vote to postpone the proposal until next year.

"CUL still supports this proposal but is retrenching from the idea of putting it through this year," McEvoy said.

McEvoy explained to HC that CUL was only making a recommendation to Nancy Roseman, Dean of the College, who charged the committee with the task of reevaluating residential life as part of President Morton Owen Schapiro's strategic planning efforts. He said that the CUL is not able to change College policy on its own - the decision ultimately rests with the administration.

McEvoy acknowledged that a strong student reaction to the proposal contributed to the CUL's decision to reconsider it for this year, but he told HC, "we ask that students think about the bigger picture."

McEvoy also told HC that the change in housing draw numbers to four is part of a more comprehensive restructuring of residential life and that it makes more sense to implement them together, saying, "CUL recognizes that it [the change from eight to four] doesn't make sense on its own."

CUL held five residential meetings in November where students met in Mission Park, Mark Hopkins, Spencer, Dodd and Currier to discuss changes students would like to see in the housing system, the level of activity on campus and campus governance.

The recent proposal addresses concerns discussed at those meetings, such as the lack of community on campus and the lack of interaction between houses. Decreasing the size of housing picks from eight to four was brought up in those meetings, gaining support at the Mark Hopkins, Spencer and Currier meetings, but it was met with mixed feelings at Dodd, where students were concerned about the decrease heightening stress associated with the housing draw.

The goal of the proposal is to foster a stronger sense of community and increase interaction between students who would not otherwise have the opportunity to interact.

According to McEvoy, "The key to the proposal is to allow students an opportunity to learn from others outside the class, and being a residential college, the house system seems to me to be an ideal opportunity to foster that. " The suggested proposal is intended to prevent the domination of houses by large groups, which leads to houses getting stamped with a certain identity.

By allowing students to pick in with groups of four, CUL believes it is still recognizing that students want to affiliate with their friends and is not preventing them from doing this. However, CUL's intended effect of creating smaller groups would be greater interaction between houses, a decrease in the forming of mini-cultures within the houses and decreasing the sense of fragmentation between social groups that emerges following freshman year.

At HC's meeting on Feb. 5, the group issued a statement, drafted by Jonathon Pahl '03 and Nishant Nayyar '02, which read: "With the passage of this statement, we the Housing Committee, comprised of the presidents who represent all the residents of Williams College, strongly reject CUL's proposal to reduce the group size for room draw from eight to four. We invite CUL to discuss our disagreements."

HC members were upset that they were not consulted before the decision was made.

Members of College Council (CC) met the proposal with both strong support and opposition when CUL attended the Feb. 7 CC meeting to respond to concerns. At the meeting, members of CUL stated their grounds for supporting the proposal, while CC members were given the chance to ask questions and state their opinions.

Matt Atwood '01, member of CUL, said that he supported the proposal because it would be a way to bridge the class year divides, racial divides and the non-athlete/athlete divide because no one wants to take the blame for not hanging out with other people. Some students who supported the proposal expressed sentiments that they wished they had taken advantage of the diversity at Williams and gotten to know more people, and other students believed that the uncomfortable learning experience would prove to be very valuable and much more like real life.

Men’s, women’s tennis sweep NCAA titles

There was women’s tennis at Williams College before Julie Greenwood ’96, women’s tennis head coach, arrived as a first year student in the fall of 1992. However, Greenwood has now taken the Williams women’s tennis team to heights previously not seen before. Greenwood won the NCAA doubles title in 1994 and 1996 and played for the NCAA team title in 1994. As the coach of the Ephs she has guided her team to two NCAA title matches in the last three years and won this year’s title over last year’s champion on that team’s home courts. Greenwood’s record at Williams now stands at 59-11 (.843). This is the seventh NCAA team title overall won by Williams and the first women’s title since 1983 when swimming won its second in a row.

With the 6-3 win over Trinity, Greenwood’s Ephs finished the season with a 19-1 record and won their last 14 matches in a row. The Ephs took a 2-1 lead into the singles portion of the match, having won at two and three doubles. Kate Troy ’04 won her match at number five singles in straight sets to put the Ephs up 3-1. Trinity crept back to trail 3-2 when Lindsay Baldwin beat the Ephs’ Tracy Cheung ’03 in straight sets. The fourth Eph win came at number two, where Caroline Wasserman ’03 won in straight sets. The score went to 4-3 Williams when Trinity’s Lizzie Yasser downed the Ephs’ Selma Kikic ’02 at number one.

Julie Mallory ’04 put the title in the Ephs’ hands when she came back from a one set deficit to prevail over Trinity’s Laura Cumming. Ironically, Mallory’s sister, Becky, teamed up with Greenwood to win the 1994 NCAA Doubles title.

Summing it all up, an ebullient Greenwood said, “ever since Williams has been coming to the NCAAs (1994), we’ve wanted this title — I could not be prouder of these girls and I am really happy to be a part of this.”

UC-Santa Cruz opened the 2001 Men’s Tennis NCAA Div. III championship match against Williams by winning the doubles point handily. The Banana Slugs won at number one 8-2 and number three 8-3 to take a 1-0 lead into singles play. That doubles point would be the only point UC Santa Cruz would get in the match.

Dave Johnson’s Ephs exploded to win four singles matches in straight sets to claim their second NCAA title in three years and avenge an earlier season loss to UC Santa Cruz (4-3) in California. “Our kids are just tough in singles play,” said Johnson. “We knew Santa Cruz plays good doubles, but we also knew how tough we are in singles.”

Williams lost the 1998 NCAA title match 4-2 to UC Santa Cruz at home so this win over a program that has won four titles and played in 10 championship matches was particularly rewarding for the Ephs. “The chance to do this doesn’t come around often,” said Eph head coach Dave Johnson. “I’m pretty overwhelmed right now.”

A win by Daniel Murray at six singles over Carlos Gonzalez tied the match and the Ephs took the lead for good when ’02 Josh Lefkowitz beat Derek Fitzpatrick at number one. The Ephs got the third point with a win at number three singles by Andrew Murray over Danny Kim. The fourth and decisive point was recorded by Toby Reigeluth ’04 who downed Peter Gladkin. Reigeluth was up a set, but trailing in the second set 4-1 before he ran off four straight games to take a 5-4 lead. Both Reigeluth and Gladkin held serve over the next three games before Reigeluth prevailed in the tie-breaker.

The win extended the Eph win streak to 12 in a row and gives them a final record of 14-5. Johnson now has a record of 161-34 (.826) in 14 years at Williams and has won the 1999 and 2001 NCAA men’s tennis titles. Williams College has now won eight NCAA Div. III team titles overall, including the 1999 and 2001 men’s tennis titles.

Students create ArtStation

At 2 p.m. on a Sunday, just at the hour when “SpringMessing@ArtStation” was set to open its doors to the public, Pete Jones ’01 was sweeping the entrance to the building that once housed the Travel Store. Since Winter Study, seven seniors have taken over two of the abandoned buildings at the end of Spring Street—from the Travel Store, and now the gas station. In the type of urban renewal project that could only be possible in a rural New England collegiate setting, these seven artists of Artstation have turned the corner of Spring and Latham into a different kind of artistic space in a region already brimming with visual arts.

My question to Jones was simple: how do you know that what you’re sweeping out the door isn’t art? After all, scraps of cutouts from magazines were laid out in a box on the floor, the wall to my left featured a piece of tissue paper hanging from a string, and small trinkets that seemed to be relics from the pockets of visitors were to be found in various corners of the room.

Artstation, as the website (www.art-station.org) tells us, has a mission: “Through the use of found and discarded materials (along with vacant lots and to-be-demolished buildings), we aim to reduce and reverse waste, using art-making as a means of recycling.”

“That’s a brilliant question,” said Jones, a note of sarcasm in his voice, “highlighting the major problems we have here.” At that point, a loud, sawing noise reverberated through the house. Jones kept sweeping.

In the room at the top of the stairs, I found Ed Rossier ’01 and Tim Campbell ’01 pounding pieces of wood into the wall. The various colors and shapes and sizes of the fragments formed an elaborate sea of contrasts; it brought to mind an imagined skeleton of a living house. “That’s this all about?” I asked. “Here — pound this into the wall,” said Rossier.

Across the hall, wood was stowed away in a far less organized fashion, yet only the absence of students made me suspect it to be a storage space and not a work-in-progress, or a completed project that I was too naïve to understand.

Upstairs revealed more contrasts. Josh Frankel ’02 had an impressive series of etchings and silkscreens on display, in the traditional, art-on-the-wall manner. Above, a string of paper airplanes burst through the ceiling, pointing the way to a work by Dan Auerbach ’01 in which bunches of wire from the ceiling were unwound and spread out in the center of the room.

The evenly-spaced, multicolored wire strands formed a gentle rainbow, contrasting in their gentle descent with the aggressive clump from which they emerged, pounding its way through the ceiling. Paper airplanes lay around the perimeter of the floor. The work used the building effectively, bringing the viewer into the room and signaling activity beyond the seen limits of the space.

Outside in the hall, Lisa Brodsky ’01 displayed a series of delicate drawings, seemingly abstract but grounded in familiar shapes and illuminated by the light from a window. Perhaps the strangest oddities of all were the two blank walls in the bathroom, framing an unadorned toilet. After the adventures outside, one wouldn’t expect to find such things in the bathroom, of all places.

When I wandered back downstairs, I was somehow mistaken for an artist, and people kept asking me to participate in their activities. Jones had written a computer program that ran the “Exquisite Corpses” game that was popular among Surrealists of the 1920s: two or more artists each draw their own art on the screen, with the others taking their turn without seeing what the previous artists have done.

The end result is a collage of styles that would otherwise be impossible. Jones says that he “was trying to create something that would allow people to interact with each other in an unusual way.” Little kids and college students all seemed to have fun with this piece, and it was nice to watch the images projected onto (of course) some discarded doors.

After playing with Jones’s program, Rossier convinced me to take part in his mosaic project. We set up a curtain and made our own Exquisite Corpse, chalkling the wall in patterns that would later be covered with glass, ceramic and other trash-turned-artistic material.

Rossier suggested that we portray the place in which we each spent spring break; he and I were on one side of the curtain, while Julia Hyde ’01 (an accomplished artist herself) went to the other. After we were finished, I suggested that I was somewhat out of my league and apologized for my vastly inferior work. “No way,” said Rossier, “My section doesn’t have a traffic cop yet in it.”

Artstation seems like a theoretical idea that somehow made its way into the real world. The artists can do anything they want in these two buildings, since the spaces were going to be demolished either way. “I like the fact that I know it’s not going to last,” says Brodsky. “There’s no wasting time on making things feel precious or inviolable.”

This temporary quality has allowed for experiments. Perhaps the most memorable was the “awning project”: after constructing a giant awning out of scrap metal and suspending it over the doorway, it collapsed under the weight of two feet of snow.

For most of the semester, it sat next to the entrance walkway, first proclaiming itself (on a crude sign) a “failure,” which changed to “failure leads to learning” (sometimes). I passed this sign most days on my walk home, and I can’t help wondering if Brodsky had it in mind when she suggested that “people work out their relationships through artwork.”

Across the street, in the former gas station, Abi Griffith ’01 had attached molds of sock puppets onto a rusty old spring mattress, a funny set of inhabitants to find in their neighborhood. Inside the office part of the gas station, a group of students were making puppets. “The College needs more spaces like this,” said Amir Wyne ’03. “Williams can get very intense — sometimes people fall into rutts and lose their creativity, and this is a great way of fostering it.”

“This noise is staying,” he continued.

Back in the former travel store, Jacob and Shirah Coran Kraus were drawing on the walls. While his four-and-a-half-year-old sister made a “secret drawing” in the corner, Jacob, 8, drew a cliff diver near the door. Sigma Coran, the college Rabbi and mother of the two children, caught wind of what was going on. “Jacob, are you writing on the wall?” Jacob turned, trying to look innocent, as his mother continued, “That’s so...allowed!”

You can go online to examine the theoretical considerations behind Artstation, and the artists themselves would be happy to sit down and talk to you. But Coran sees a different importance in this space: “It has a sort of unfinished quality to it, which for me as an adult is uncomfortable, but for the children it’s great, because they feel like part of the environment.”

Jacob interrupted her, pointing to a dangling piece of candy. “Can we bob for lifesavers?”

“No,” said Coran, “I think that’s a piece of art.”

Schapiro inducted as College president

Former economics professor returns as 16th president

The formal induction of Morton Owen Schapiro as Williams College's 16th president took place on Saturday, Oct. 21 in a ceremony held in Chapin Hall. Schapiro, who had been in office since July 1, was officially greeted by members of the Williams community and received his symbolic key and copy of the charter from Carl W. Vogt '38, president of the College emeritus. The keynote speaker was William G. Bowen, president of The Andrew W. Mellon Foundation and former president of Princeton University.

After Richard E. Spalding, chaplain to the College, delivered the invocation, Robert L. Bahr '67 welcomed Schapiro. Speaking on behalf of the Williams Society of Alumni, the oldest such society in North America, Bahr said that Williams “could not have a better leader and spokesman.”

Thomas A. Kohut, professor of history and dean of the faculty, represented the faculty, welcoming Schapiro and his “lack of stuffiness and pretension,” his willingness to “make this wealthy and privileged institution not an ivory tower,” but a place where students from across the nation and around the world can come to learn.

Raymond F. Henze III '74, speaking on behalf of the Board of Trustees, praised Schapiro’s “passion for teaching and commitment to higher education.”

But it was Christine M. DeMasi Naughton, assistant to the chair of the department of economics, who seemed to sum up people’s feelings best. She expressed her sadness in having seen Schapiro and his family leave for the University of Southern California in 1991. The words she spoke at the ceremony reflected how many felt when the Schapiro family returned this summer: “Welcome home, Morty and Mimi.”

Following the greetings from the community, Bowen, father of Karen Bowen '86, delivered the keynote address. His speech, entitled “The Two Faces of Wealth,” focused on opulence and its role in higher learning.

Following Bowen’s speech, Henze stepped up to the podium again to recognize Vogt’s contribution to the College during his one-year interim term. Vogt “led us with uncommon wisdom and warmth,” Henze said, telling the former president that all of the College “will be forever in your debt.” The crowd responded enthusiastically, rising to its feet to give Vogt a standing ovation. Vogt then officially handed over the presidency to Schapiro in the symbolic form of a key and a copy of the school’s charter.

Schapiro then made a few comments, thanking the greeters and attendees and speaking of the significance of his new position. He spoke, as Bowen did, of the few college-age students in liberal arts colleges - fewer than 100,000 students of 15 million at college right now. Schapiro then talked about the importance of calling into question the meaning of the liberal arts college, reaffirming the need for the “golden standard” that Williams and its counterparts set. But he added that “with privilege comes responsibility,” the responsibility to make this education available to all social strata. “If we don’t recreate undergraduate education and redefine excellence, who will?” asked Schapiro. “Let history one day know that our community had the courage to seize the moment.”

The ceremony concluded with the singing of “The Mountains” and a benediction by Rabbi Sigma Coran, associate chaplain. The induction was followed by a reception in Lansing-Chapman rink.

“Keep your Soul”

“I do know how to pay attention, how to fall down into the grass, how to kneel down in the grass, how to be idle and blessed, how to stroll through the fields, which is what I have been doing all day. Tell me, what else should I have done? Doesn’t everything die at last, and too soon? Tell me, what is it you plan to do with your one wild and precious life?” ~Mary Oliver

Congratulations, Katie. What will YOU do with YOUR one wild and precious Life?

We Love You, Mom and Dad
You can’t get to the top
Riding the lift.

Live every day for all that it’s worth...
Love like you’ve never been hurt...
Dance as if no one is watching...

Your brother, Seth and I are so very proud of you.
And “this is only the beginning said the Dragon.”
Love, Mama
Heather A. Hatcher

Congratulations to Heather Adora

Love,

To Julia and all her classmates on the Women’s Rugby Team

Congratulations!

We will miss watching your games

Margaret and Dan Cianfarini

Dear Vicki

We Love You
Congrats!

Dad, Di, Val, Ted, David, Mikey A.

We knew you could do it! We’re proud of you!
Congratulations from all of your family.

Mom, Dad, Heather, Colin, Heidi, Alec, Chip, and Spliut
Congratulations Robyn - our fast tracking girl.

Love Mom, Dad, Jeff, Daniel and Draper

Congratulations, Joe

With love from Mom, Dad, Pete, and Tug

Congratulations our dear Luciano!

We are so proud of everything you do. We wish you a future that is as bright and full of hope as your dreams.

We love you!
Mom and Dad

Congratulations! We’re with you all the way!
Go, Sully, Go!!
We have been blessed to witness the balance, determination and joy
You have brought to the places you’ve been…

And await with great confidence and enthusiasm
As you discover the places you’ll go.

Jacob,

all our love always,

Dad, Mom, Asher and Ben

---

To our very special Tori, we want to say how tremendously proud we are of you and your accomplishments. You have always had the ability to set goals for yourself and realize them to their fullest. Please continue to dream and to excel in your pursuit of those dreams and goals and they, in turn, will continue to make your life so enjoyable and rewarding.

We know a bright future awaits you, and you deserve it.

We love you very much. Dad, Mom, Chris, and Amber.

Robert J. Adamo

Take with you the knowledge that you have acquired, the beauty that has surrounded you, and the friendships that you have made during the past four years. Treasure these things always and renew them often. Congratulations on all of your achievements. We are so proud of you. We love you.

Mom and Dad
Lauren, John and Elizabeth

Congratulations and Good Fortune to the CLASS OF 2001
Rebecca Sanborn

To my daughter,

For all those times you stood by me; For all the truths you made me see; For all the joy you brought my life; For all the wrongs that you made right; For every dream you made come true; For all the love I found in you.

~Celine Dion

I am so proud of you! Your insights and knowledge continue to amaze me. Your perception allows you to see what needs to be done. Greater yet, is your willingness to seek change and take a stand. Continue to dream deep and reach high. I am blessed to be your mother! Love, Mom

“What lies before us, and what lies behind us, are tiny compared to what lies within us.”

~Ralph Waldo Emerson

Great Job and Congratulations! Love, Dad

FOR THE GIRLS OF LAMBERT HOUSE

Shekinah, Jessica, Joanne, Erin, Ellie, Victoria, Sam, and Johanna

CARPE DIEM AND ENJOY LIFE!

Fondly, Patti and Frank Kolodny
Dear Erin Moria,

“This is the day the Lord has made. Let us rejoice in it and be glad.”

~Psalm 118:24

WE LOVE OUR Phi Beta Kappa IRISH-ITALIAN! GOD BLESS YOU!

Mom, Dad, Laurence, and Grandma

To Peter and
all your
wonderful
2001 friends

We are very
proud of you!

Love,
Dad, Mum,
Molly, and
Patrick

AN OLD IRISH PRAYER
TAKE TIME TO WORK...
IT IS THE PRICE OF SUCCESS.
TAKE TIME TO THINK...
IT IS THE SOURCE OF POWER.
TAKE TIME TO PLAY...
IT IS THE SECRET OF PERPETUAL YOUTH.
TAKE TIME TO READ...
IT IS THE FOUNDATION OF WISDOM.
TAKE TIME TO BE FRIENDLY...
IT IS THE ROAD TO HAPPINESS.
TAKE TIME TO DREAM...
IT IS HITCHING YOUR WAGON TO A STAR.
TAKE TIME TO LOVE AND BE LOVED...
IT IS THE PRIVILEGE OF THE GODS.
TAKE TIME TO LOOK AROUND...
THE DAY IS TOO SHORT TO BE SELFISH.
TAKE TIME TO LAUGH...
IT IS THE MUSIC OF THE SOUL.
CLOSING

Four years in the Purple Valley flew by, and when graduation came you thought it was all over. Yet you still get mail from Uncle Eph. Fear not: this publication is not a solicitation - we leave that to the alumni office.

A few days ago, Matt Fenn from Jostens and Caren Orlick Korin from DaVor Photography met us, the Gul staff, in the Snack Bar. Sitting at that round table, First Congregational Church visible through the windows, I let the über-competent Jason Davis ‘05 and Chrissy Fletcher ‘02 talk. People walked by, some waved, some smiled. There were two items on the agenda: the 2002 yearbook, and salvaging the 2001 yearbook. I hope we are not judged too harshly for this endeavor.

The Snack Bar is cozier than the Gul Office in Baxter Basement. There are rumors flying about: some say Baxter will be torn down, to make way for, as the Record puts it, a ‘world class student center.’ The question: will the Snack Bar remain?

It is half past twelve. The Snack Bar is closing up. Chairs are being overturned, seats resting on tabletops, legs pointing in the air. People are filing out. It is time to go.

Abid Shah ‘02

October 2001

We would like to thank the following people and organizations for their help and support, without which the production of this book would have been severely hindered...

The Williams Record
Dick Quinn and Sports Information
The Class of 2001 and their parents, for their patience
Matt Fenn and Jostens
Caren Orlick Korin and DaVor
Rich Kelly and the Activities Office
All of our advertisers
All the previous Gul staffs, of years gone by.

To you all we owe a debt of gratitude.
