Dedicated in loving memory to Henry Lo and Jamie Neal
It is entirely impossible to describe the essence of an individual in a few short words — especially someone who was as multifaceted and vibrant as Henry — but I think I've figured out how to articulate what it was about him that I appreciated — and miss about him — the most.

Henry was easily one of the most opinionated people I've ever met. Not necessarily in an argumentative way — though engaging him in a debate about something he felt passionately about could often lead to hours of conversation — but in the sense that he seemed to truly value the process of obtaining all the information necessary to form his own carefully crafted opinions about each and every person or thing he encountered and would put a great deal of effort into doing so. I remember Henry assuming the role of a spectator more often than a participant during those first, incredibly awkward introductory conversations that took place in our common room as everyone trickled in on the first day of freshman year, and realize now that it wasn't because he was shy — as Henry was anything but — but rather because he was quietly and consciously taking in everything that everyone was saying in order to learn as much about his entrymates as he could. Spending time with Henry over the next two years, I always felt like he was entirely present in our interactions and genuinely interested in everything I had to say, and am certain that this dynamic was not unique to our relationship. Henry's social network at Williams was remarkably broad and diverse, and I think this was due primarily to the deliberation and care that he took when forming relationships with people based solely on his own experiences and opinions of them rather than anyone else's. I think this is what made him such an exceptional and unforgettable friend, and hope that he may have inspired others to treat their own relationships with as much care as he did.

Henry also had strong opinions about his future — though these opinions were much more susceptible to change from one day to the next. Whether he was expressing his desire to become a clothing designer, a mixed martial artist, the owner of a vineyard or a member of the Peace Corps, he did so with the same degree of conviction and confidence every time. In doing so, Henry was conveying his conception of the absolute limitlessness of the future, which is another part of Henry that we should all strive to embody in moving forward from Williams.

Henry — you are loved and missed and will always be a part of the Class of 2011.

Many knew Jamie as a ball of energy. No matter how much fun you were having doing something she always seemed to be having much more.

I got to know Jamie because she lived beneath me in Mills-Dennett 1. During my freshman year, I tore my ACL and was incapable of climbing the monstrous Mission Hill. During that time, I would play the piano and was constantly playing pool with Jamie. She was definitely my confidante and most dependable friend freshman year. I remember her David Beckham poster that she used to constantly comment on, the overflow of snacks in her room and her passion for basketball.

She was also having trouble with her knee and was not able to play very much. I think we bonded over our inabilities to play basketball. We were two washed-up basketball players who had blown out their knees doing something they loved. But we were each other’s crutch in that difficult point in our freshman year.

When I think of Jamie, I think of her huge smile, her bright eyes and her quiet intelligence. She never flaunted her brilliance, but when she spoke about something she really made me reflect on how insightful she was.

Many also knew her as a teammate, and some knew her as a classmate. She was never shy, and many got to know her name faster than she knew theirs. That is how vibrant her personality was. Once you met her, you would never forget her. She really had a spirit within her that I’d never encountered ever before.

There is a saying that you never know what you have until it is gone. That saying resonates with me strongly these days, knowing that I will never be blessed by Jamie’s presence again. I’ll miss you Jamie. We all will.

The *Gulielmensian* has a rich history at Williams College as the annual record for students of their time at the college. Since 1853, the *Gul* has documented the innumerable facets of Williams students’ lives, including academics, student activities, and social life. The purple bubble presents Williams students with a distinctive environment in which to learn, laugh, and live, and the *Gul* is an attempt to represent the manifold aspects of such a unique experience. The yearbook is a cursory glance at the life we have all created at Williams and offers a retrospective of the community we have each built at the college.

The 2011 *Gulielmensian* encompasses a choice offering of the students’ experiences at Williams and continues a century-old tradition of recording the stories of those who have, however temporarily, made Williams their home. This yearbook by no means purports to relate the experiences of each student, but it does offer a snapshot of the incomparable times we have all shared. For despite all our differences, we each embody Williams in our own way.

Though for many the *Gul* marks the conclusion of a significant four-year phase in their lives, it is not the end of a story but the beginning. Within these pages are the faces of future writers, teachers, scientists, CEOs, and inspirations. The experiences we have each created at Williams do not leave our conscious as we prepare to leave the familiarity of the Berkshires. Indeed, they will remain a part of the fabric of our lives for years to come. The *Gul* only contains within it a few threads, a few stories, a few photographs of the Williams experience, but it is nonetheless a significant narrative of our four years in the purple bubble.

A PRESIDENT'S WELCOME

Adam Falk, a was inducted as the 17th president of the College during the combined Convocation/Induction ceremony.

MARCH OF THE GRADUATES

Students from the Class of 2011, including graduates of the Center for Developmental Economics and the College's art history graduate program, paraded from the entryway by West along Route 2 before making their way to Chapin for the Convocation/Induction ceremony.
On October 8, President Falk announced the arrival of Mountain Day, canceling classes for students to celebrate the day. Whether students climbed Stony Ledge or Stone Hill, they were still treated to the sweet serenades of a cappella groups and the deliciousness of apple cider and cider donuts.
ON TOP OF THE WORLD

After an all-school picnic, students climbed to the top of Stony Ledge to partake in the recently formalized tradition of Mountain Day. After last year's chilly Siberian Mountain Day, students, faculty, and even the "First Family" were greeted with clear skies and a breathtaking view of the surrounding Berkshires.
homecoming

Students, alumni, parents, and even faculty decked out in purple and gold to show their school pride during the Homecoming game. The Ephs went on to win the game against Wesleyan.

The Ephs storm the field after a decisive 45-7 victory against the Wesleyan Cardinals. With the team's impressive offensive and defensive play during the game, Williams ensured at least co-ownership of the 2010 NESCAC championship.
