The post office address of the College is Williamstown, Massachusetts 01267. The telephone number is (413) 597-3131.

Correspondence concerning matters of general interest to the College should be addressed to the President.

Other inquiries should be addressed to the officers named below:

- **Academic and student affairs**
- **Admission of students**
- **Alumni matters**
- **Business matters**
- **Catalogs and brochures**
- **Financial aid**
- **Graduate study in art history**
- **Graduate study in policy economics**
- **Transcripts and records**

---

The corporate name of the College is The President and Trustees of Williams College.

Williams College is accredited by the New England Association of Schools and Colleges.

---

Published by Williams College, Hopkins Hall, 880 Main Street, Williamstown, Massachusetts, 01267.

This bulletin contains information that was complete and accurate at the time of publication. Williams College reserves the right, however, to make from time to time such changes in its operations, programs, and activities as the trustees, faculty, and officers consider appropriate.

--Barbara Casey, Editor
Williams College is dedicated to building a diverse and inclusive community in which members of all backgrounds can live, learn and thrive. In compliance with state and federal law, Williams does not discriminate in admission, employment, or administration of its programs and activities on the basis of race, color, sex, national origin, religion, age, disability, marital status, sexual orientation, gender identity or expression, ancestry, or military service.

The following person has been designated to handle inquiries concerning the College’s non-discrimination policies: Dean of the College, Williams College, Williamstown, MA (413) 597-4171.
The chartering of Williams College in 1793 was an act of faith and certainly an act surpassing the modest intentions of Colonel Ephraim Williams, for whom the college is named.

Colonel Williams had not intended to found a college. Enroute with his regiment of Massachusetts militia to join the battle with the French and Indians at Lake George, the Colonel had turned long enough in Albany to write his last will and testament on one of the hills overlooking the Hudson. He remembered the founding and support of a free school in West Township, where for some years he had commanded a detachment of militia at Fort Massachusetts, farthest outpost of the province. The will stipulated that West Township should be given to the state, and that the funds from it would be kept within Massachusetts and that the name of the township must be changed to Williamstown, if the free school was to be established at all.

On September 8, 1755, Colonel Williams was killed at the Battle of Lake George. On October 10, 1755, a delegation of citizens from West, or as it was then called, Williamstown, petitioned the General Court to accept the funds designated for the free school and to establish a college. The college was named after the Colonel. The act provided for the creation of a Board of Trustees, a body which would be responsible for the management of the college. The trustees were to consist of 12 members, 6 elected by the freeholders and 6 elected by the burgesses of West. The trustees were to have the power to appoint a president and other officers, to hire a teacher, and to have the power to purchase land for the college.

In 1793, the trustees of the college purchased land in Williamstown from the state and began the construction of a new college building. The building was completed in 1796 and is now known as the Old Main. The first classes were held in the fall of 1796, and the college admitted its first students. The college was initially coeducational, but it became a men's college in 1901.

The college continued to grow and expand over the years, adding new buildings and programs. In 1805, the trustees appointed the first president of the college, Professor Enoch C. P. Allen. He served as president until 1820, during which time the college's curriculum was expanded and a number of new programs were added. In 1821, the college's name was changed to Williams College.

The college has a long history of providing educational opportunities to a diverse range of students. It has been a leader in the development of coeducation and has been at the forefront of educational innovation. The college has a strong commitment to social justice and has been an advocate for change on many fronts. It has been a leader in the development of programs to support students from underrepresented backgrounds and has been a leader in the development of programs to support students from diverse communities. Today, Williams College is a leader in the development of programs to support students from underrepresented backgrounds and has been a leader in the development of programs to support students from diverse communities. Today, Williams College is a leader in the development of programs to support students from underrepresented backgrounds and has been a leader in the development of programs to support students from diverse communities.
percentage of students who identified themselves as members of one or more American minority group or were overseas citizens rose to 40 percent, of faculty to 22 percent.

At the same time, programming and structures were introduced to student residential life and major projects were completed to enhance greatly the College's student center, its facilities for theatre and dance, its office and teaching spaces for faculty, and its libraries.

**MISSION AND PURPOSES**

Williams seeks to provide the finest possible liberal arts education by nurturing in students the academic and civic virtues, and their related traits of character. Civic virtues include commitment to engage both the broad public realm and community life, and the skills to do so effectively. These virtues, in turn, have associated traits of character. For example, free inquiry requires open-mindedness, and commitment to community draws on concern for others.

We are committed to our central endeavor of academic excellence in a community that is learning together, comprising students, faculty, and staff, and draws on the engagement of alumni and parents. We recruit students from among the most able in the country and abroad and select them for the academic and personal attributes they can contribute to the educational enterprise, inside and outside the classroom. Our faculty is a highly talented group of teachers, scholars, and artists committed deeply to the education of our students and to involving them in efforts to expand human knowledge and understanding through original research, thought, and artistic expression. Dedicated staff enable this teaching and learning to take place at the highest possible level, as do the involvement and support of our extraordinarily loyal parents and alumni.

No one can pretend to more than guess at what students now entering college will be called upon to comprehend in the decades ahead. No training in fixed techniques, no finite knowledge now at hand, no rigid formula can solve problems whose shape we cannot yet define. The most versatile, the most durable, in an ultimate sense, the most practical knowledge and intellectual resources that can be of value are the openness, the creativity, flexibility, and power of education in the liberal arts.

Toward that end we extend a curriculum that offers wide opportunities for learning, ensures close attention of faculty to students but also encourages students to cross disciplines independently, and reflects the complexity and diversity of the world. We seek to do this in an atmosphere that nurtures the simple joy of learning as a lifelong habit and commitment.

We place great emphasis on the learning that takes place in the creation of a functioning community; in the day-to-day life of the College; in the residence halls, expression through the arts, debates on political issues, leadership in campus governance, exploration of personal identity, pursuit of spiritual and religious impulses, the challenge of athletics, and direct engagement with human needs, nearby and far away.

To serve well our students and the world, Williams embraces core values such as welcoming and supporting in the College community people from all segments of our increasingly diverse society and ensuring that College operations are environmentally sustainable.

From this holistic immersion students learn more than they will ever know. Such is the testimony of countless graduates—that their Williams experience has equipped them to live fuller, more effective lives. Ultimately, the College's greatest merit as we see it consists of this: the contributions our alumni make in their professions, their communities, and their personal lives.

Therefore, we ask all our students to understand that an education at Williams should not be regarded as a privilege destined to create further privilege, but as a privilege that creates opportunities to serve society at large, and imposes the responsibility to do so.

At the same time, being itself privileged by its history and circumstances, Williams understands its own responsibility to contribute by thought and example to the world of higher education.

The above description arises on its surface from public statements made by Williams presidents and others associated with the College, from which it borrows, and at a deeper level from the felt experience of students, faculty, staff, alumni, and parents of many decades. It was approved by vote of the Board of Trustees on April 14, 2007.

**COURSES OF INSTRUCTION 2016-2017**

**COURSE NUMBERING SYSTEM**

Courses designated by a single number are semester courses. Year courses are designated by an odd number and an even number joined by a hyphen: the work of the two semesters constitutes an integral, indivisible whole.

Courses numbered 1000 and below are designed to introduce students to the world of higher education, course 19 with grades of C- or better, pass four Winter Study Projects, fulfill the four-part distribution requirement, complete all requirements for the major including an average of C minus or higher, and complete the physical education requirement. A student may not repeat a course for which credit has been awarded.

COURSE NUMBERING SYSTEM

Courses designated by a single number are semester courses. Year courses are designated by an odd number and an even number joined by a hyphen: the work of the two semesters constitutes an integral, indivisible whole.

Courses numbered 1000 and below are designed to introduce students to the world of higher education, course 19 with grades of C- or better, pass four Winter Study Projects, fulfill the four-part distribution requirement, complete all requirements for the major including an average of C minus or higher, and complete the physical education requirement. A student may not repeat a course for which credit has been awarded.

To be eligible for the Bachelor of Arts degree a student must pass 32 courses (at least 29 of which must be regularly graded A–C); including 19 with grades of C- or better, pass four Winter Study Projects, complete the four-part distribution requirement, complete all requirements for the major including an average of C minus or higher, and complete the physical education requirement. A student may not repeat a course for which credit has been awarded.

**REGISTRATION REMINDERS**

On-campus students must register online with PeopleSoft.

**TEACHING SPACE**

Visiting or adjunct, part-time fall semester

Teaching spaces for faculty, and its libraries. College's student center, its facilities for theatre and dance, its office and teaching spaces for faculty, and its libraries.

**On leave spring semester**

percentage of students who identified themselves as members of one or more American minority group or were overseas citizens rose to 40 percent, of faculty to 22 percent.

First-year students may take no more than one course with the same course prefix, nor more than one in any department during the full year.

Sophomores may take no more than two courses with the same course prefix, nor more than three in one department, in a semester.

Sophomores may take no more than three courses with the same course prefix, nor more than four in one department during the full year.

A student may take no more than a total of five courses with the same course prefix, nor more than eight in one department, during the first two years.

Any exception to the above early concentration rule may be requested by a petition to the Committee on Academic Standing (C.A.S.) filed at the time of registration.

An incoming junior must declare a major by filing a "Major Declaration Form" during preregistration. A current junior or senior may change or add a major by filing "Major Declaration Form" subject to the approval of the C.A.S.

Declaration of two majors is subject to the approval of the C.A.S. Contract majors are ineligible for a second major.

Students wishing to undertake an independent study must submit a petition to the C.A.S. before the end of drop/add in which the student plans to take the independent study.

Forms for any of the above requests may be obtained at the Registrar's Office or at the website.

When choosing a course cross-listed in two or more subjects, students should specify which designation they wish to have recorded—at the time the course is taken.

Courses normally meet three times a week in fifty-minute periods, twice a week in seventy-five-minute periods, or once a week for 150 minutes as indicated within the course description. The days of the week that courses have class meetings are abbreviated as follows: M for Monday, T for Tuesday, W for Wednesday, Th for Thursday, F for Friday.

Toward that end we extend a curriculum that offers wide opportunities for learning, ensures close attention of faculty to students but also encourages students to cross disciplines independently, and reflects the complexity and diversity of the world. We seek to do this in an atmosphere that nurtures the simple joy of learning as a lifelong habit and commitment.

We place great emphasis on the learning that takes place in the creation of a functioning community; in the day-to-day life of the College; in the residence halls, expression through the arts, debates on political issues, leadership in campus governance, exploration of personal identity, pursuit of spiritual and religious impulses, the challenge of athletics, and direct engagement with human needs, nearby and far away.

To serve well our students and the world, Williams embraces core values such as welcoming and supporting in the College community people from all segments of our increasingly diverse society and ensuring that College operations are environmentally sustainable.

From this holistic immersion students learn more than they will ever know. Such is the testimony of countless graduates—that their Williams experience has equipped them to live fuller, more effective lives. Ultimately, the College's greatest merit as we see it consists of this: the contributions our alumni make in their professions, their communities, and their personal lives.

Therefore, we ask all our students to understand that an education at Williams should not be regarded as a privilege destined to create further privilege, but as a privilege that creates opportunities to serve society at large, and imposes the responsibility to do so.

At the same time, being itself privileged by its history and circumstances, Williams understands its own responsibility to contribute by thought and example to the world of higher education.

The above description arises on its surface from public statements made by Williams presidents and others associated with the College, from which it borrows, and at a deeper level from the felt experience of students, faculty, staff, alumni, and parents of many decades. It was approved by vote of the Board of Trustees on April 14, 2007.

**REQUIREMENTS FOR THE BACHELORS OF ARTS DEGREE**

**Academic Requirement**

To be eligible for the Bachelor of Arts degree a student must pass 32 courses (at least 29 of which must be regularly graded A–C); including 19 with grades of C- or better, pass four Winter Study Projects, fulfill the four-part distribution requirement, complete all requirements for the major including an average of C minus or higher, and complete the physical education requirement. A student may not repeat a course for which credit has been awarded.

**Distribution Requirement**

The distribution requirement falls into four parts. Please note that courses used to fulfill these requirements must be regularly graded.

1) **DIVISIONAL REQUIREMENT**—designed to ensure that in their course of study students at Williams take one uniquely diverse distribution of courses across the full range of the curriculum.

For the purposes of the requirement, courses are grouped into three divisions: Division I, Languages and the Arts; Division II, Social Studies; and Division III, Science and Mathematics. A full listing of the subjects in each division appears on the following page.
Students must complete at least three graded semester courses in each division. Two in each division must be completed by the end of the sophomore year. No more than two of the courses used to satisfy the requirement may have the same course prefix. The courses must be taken at Williams or at programs under the direction of Williams College Faculty. Courses that fulfill the distribution requirement in Division I are designed to help students become better able to respond to the arts sensitively and intelligently by learning the language, whether verbal, visual, or musical, of a significant field of artistic expression. Students learn how to develop the capacity for critical discussion, to increase awareness of the esthetic and moral issues raised by works of art, and to grow in self-awareness and creativity.

Courses which fulfill the Division II requirement consider the institutions and social structures that human beings have created, whether knowingly or unknowingly, and which in turn markedly affect their lives. These courses are intended to help the students recognize, analyze, and evaluate these human structures in order that they may better understand themselves and the social world in which they live.

Courses which fulfill the Division III requirement are intended to provide some of the factual and methodological knowledge needed to be an informed citizen in a world deeply influenced by scientific thought and technological accomplishment, and to cultivate skill in exact and quantitative reasoning.

Courses with the following designations receive divisional distribution credit as indicated:

**DIVISION I. Languages and the Arts**
- Arabic (except 111, 206, 207, 215, 230, 231, 232, 234, 243, 280, 281, 303, 305, 310, 311, 332, 408, 409, 410, 480, 491)
- Art History
- Art Studio
- Asian Studies 103, 274
- Chinese (except CHIN 223)
- Classics
- Comparative Literature
- Critical Languages
- Dance
- English
- EXPR 245, 420
- French
- German
- Greek
- INTR 252
- Italian
- Japanese (except JAPN 217, 218, 321, 486T)
- Latin
- Literary Studies
- Maritime Studies 231
- Music
- Russian
- Spanish
- Theatre

**DIVISION II. Social Studies**
- Africana Studies
- American Studies
- Anthropology
- Asian Studies (except 103, 274)
- Chinese 223
- Cognitive Science
- Economics
- Environmental Studies 101
- Experimental Studies—EXPR (except 245, 420)
- Global Studies
- History
- History of Science (except HSCI 224)
- Interdisciplinary Studies—INTR (except INTR 160, 223)
- Japanese 217, 218, 321, 486T
- Jewish Studies
- Justice and Law
- Latina/o Studies
- Maritime Studies 351, 352
- Philosophy
- Political Economy
- Political Science
- Psychology (except PSYC 212, 312, 315, 316, 317T, 318)
- Public Health (except PHLH 201, 402)
- Religion
- Science and Technology Studies
- Sociological Studies
- Women’s, Gender and Sexuality Studies

**DIVISION III. Science and Mathematics**
- Astronomy
- Astrophysics
- Biochemistry and Molecular Biology
- Biology
- Chemistry
- Computer Science
- Environmental Studies 102
- Geosciences
- History of Science 224
- INTR 160, 223
- Maritime Studies 104, 211, 311
- Mathematics
- Neuroscience
- Physics
- Psychology 212, 312, 315, 316, 317T, 318
- Statistics

Please note: Any Environmental Studies course that is also cross-listed with another subject carries distribution credit of that subject. Other Environmental Studies courses may fulfill distribution requirements as indicated under individual course listings.

Williams-Exeter Programme at Oxford University tutorial courses (WIOX) may be used toward fulfilling the divisional distribution requirement; a student may earn a maximum of three distribution requirements, with no more than one from each division, for the year. All tutorial courses in the Williams-Exeter Programme at Oxford University (WIOX) meet the Williams College ‘W’ designation, except for those in studio arts, mathematics, and the sciences. Courses at the Williams-Mystic Program may also be used toward fulfilling the distribution requirement as appropriate.

2) THE EXPLORING DIVERSITY INITIATIVE—Williams College is committed to creating and maintaining a curriculum, faculty, and student body that reflects and explores a diverse, globalized world and the multi-cultural character of the United States. Courses designated “(D)” in the College Bulletin are a part of the College’s Exploring Diversity Initiative (EDI); they represent our dedication to study groups, cultures, and societies as they interact with, and challenge, each other. Through such courses, students and faculty also consider the multiple approaches that engage these issues. Rather than simply focus on the study of specific peoples, cultures, or regions of the world, in the past or present, however, courses fulfilling the requirement actively promote a self-conscious and critical engagement with diversity. They urge students to consider the operations of difference in the world and provide them with the tools to do so. The ultimate aim of the requirement is to lay the groundwork for a life-long engagement with the diverse cultures, societies, and histories of the United States and the rest of the world.

Courses that comprise the Exploring Diversity Initiative may fall under a variety of categories, including (but not limited to) the following:

- **Comparative Study of Cultures and Societies.** These courses focus on the differences and similarities between cultures and societies, and/or on the ways in which cultures, peoples, and societies have interacted and responded to one another in the past.
- **Empathetic Understanding.** These courses explore diverse human feelings, thoughts, and actions by recreating the social, political, cultural, and historical context of a group in order to imagine why within that context, those beliefs, experiences, and actions of the group emerged.
- **Power and Privilege.** These courses link issues of diversity to economic and political power relations, investigating how cultural interaction is influenced by various structures, institutions, or practices that enable, maintain, or mitigate inequality among different groups.
- **Critical Theorization.** These courses focus on ways scholars theorize the possibilities of cross-cultural understanding and interaction; they investigate the ways that disciplines of knowledge both constitute “difference” and are reconfigured by the study of diversity-related questions.

All students are required to complete ONE course that is part of the Exploring Diversity Initiative. Although this course, which may be counted toward the divisional distribution requirement, may be completed any semester before graduation, students are urged to complete the course by the end of the sophomore year.

Students wishing to fulfill the EDI requirement via the completion of study away must submit the completed EDI form and their essay after their return proposing EDI credit for a course or independent study project/research they pursued while away. The essay will require students to intellectually describe how they believe their study away course or independent study project/research met one or more of the goals of the Exploring Diversity Initiative. Although this course, which may be counted toward the divisional distribution requirement, may be completed any semester before graduation, students are urged to complete the course by the end of the sophomore year.

Students wishing to fulfill the EDI requirement via the completion of study away must submit the completed EDI form and their essay after their return proposing EDI credit for a course or independent study project/research they pursued while away. The essay will require students to intellectually describe how they believe their study away course or independent study project/research met one or more of the goals of the Exploring Diversity Initiative; the essay will be considered by the Director of the Exploring Diversity Initiative working in concert with the Committee on Academic Standing. The essay will either be accepted or rejected for EDI credit. There is no appeal process, and all decisions are final.

3) QUANTITATIVE/FORMAL REASONING REQUIREMENT is intended to help students become adept at reasoning mathematically and abstractly. The ability to apply a formal method to reach conclusions, to use numbers comfortably, and to employ the research tools necessary to analyze data is essential in an increasingly analytical society. Therefore, all students must pass a Quantitative/Formal Reasoning (QFR) course—those marked with a “(Q).” Students requiring extra assistance (as assessed during First Days) are normally placed into Mathematics 100/101/102, which is to be taken before fulfilling the QFR requirement. The hallmarks of a QFR course are the representation of facts in a language of mathematical symbols and the use of formal rules to obtain a determinate answer. Primary evaluation in these courses is based on multistep mathematical, statistical, or logical inference (as opposed to descriptive answers).
4) WRITING REQUIREMENT—All students are required to take two writing-intensive courses: one by the end of sophomore year, and one by the end of the junior year. Students will benefit most from the writing-intensive courses by taking them early in their college careers, and are therefore strongly encouraged to complete the requirement by the end of the sophomore year.

The goal of the writing-intensive course requirement is to improve student writing proficiency across disciplines. Students in these courses should expect to receive guidance on style, argumentation, and other significant aspects of writing, as well as evaluation and criticism of their writing throughout the semester. This may be achieved through a variety of approaches: brief assignments spaced over the semester, sequenced assignments leading to a longer final paper, etc. Writing-intensive courses may also include multiple drafts, conferences, peer review, or class discussions designed to improve writing skills. A course with a single long paper due at the end of the semester, but with no required or structured means of addressing writing issues, would not be considered writing intensive.

Writing-intensive courses require a minimum of 20 pages of writing and have a maximum enrollment of 19 to allow the instructor to devote appropriate attention to writing over the course of the semester.

All tutorial courses in the Williams-Exeter Programme at Oxford University (WIOX) meet the Williams College ‘W’ designation, except for those in the studio arts, mathematics, and the sciences.

Major Requirement

The Major Requirement is designed to assure that all Williams undergraduates will have the experience of disciplined and cumulative study, carried on over an extended period of time, in some important field of intellectual inquiry. Juniors are required to declare a major and the selection is normally made at the time of registration in the spring of the sophomore year. Majors are offered in the following fields:

- American Studies
- Anthropology
- Arabic Studies
- Art
- Asian Studies
- Astronomy
- Astrophysics
- Biology
- Chemistry
- Chinese
- Classics (Greek, Latin)
- Comparative Literature
- Computer Science
- Economics
- English
- Environmental Policy
- Environmental Science
- Environmental Studies
- French
- Geosciences
- German
- History
- Japanese
- Mathematics
- Music
- Philosophy
- Physics
- Political Economy
- Political Science
- Psychology
- Religion
- Russian
- Sociology
- Spanish
- Statistics
- Theatre
- Women’s, Gender and Sexuality Studies

GENERAL STRUCTURE OF MAJORS

1) A student ordinarily must elect at least nine semester courses in his or her major field. A major may also require an additional course and/or one Winter Study Project during the junior or senior year. A student may also fulfill the minimum requirements for a major by taking eight semester courses in the major field and two semester courses, approved by a major advisor, in associated fields. In interdepartmental majors, such as Political Economy, a larger number of courses may be required.

2) A prescribed sequence of courses, supplemented by parallel courses, and including a major seminar, is required in some major fields. Other majors ask the student to plan a sequence of elective courses, including advanced work building on elementary courses in the field, and ending in a one- or two-semester faculty-organized course or project in the senior year. All majors provide a system of counseling to help students plan programs reflecting individual interests as well as disciplined and cumulative patterns of inquiry. Course work in most major programs require prerequisite courses in related areas. A full description of the detailed structure of each major is found under the heading of that major.

CONTRACT MAJOR

Students who wish to undertake the coherent study of an interdisciplinary subject not covered by a regularly offered major may propose to be contract majors. Procedures for arranging a contract major and for honors work in such a major are described in the section, “Courses of Instruction.” Students interested in this option should begin consulting with the Dean’s Office and with potential faculty advisors early in the sophomore year. A student completing a contract major may not do so in conjunction with a second major. For further details, click here

TWO MAJORS

A student may complete two majors with the permission of both majors and the Committee on Academic Standing. Although a student may be granted permission to use a course from one major to fulfill a particular requirement in the other, the student nevertheless must take the minimum number of courses in each field without counting any course twice. A student may be a candidate for Honors in either or both of the majors, but a course for Honors in one major may not be used for an Honors course in the other.

Physical Education Requirement

The Physical Education requirement provides students the opportunity of establishing and maintaining a general level of fitness and well-being; of developing abilities in a wide variety of activities; of discovering and extending their own physical capabilities; and of developing skills in activities with survival implications, such as swimming.

A swim test is required of all first-year students at the start of the academic year. Students who fail to complete the test must pass a basic swim course given in the Physical Education program during the first quarter of the year.

Students must complete four quarters of physical education by the end of the sophomore year. Students must enroll in at least two different activities in fulfilling the requirement.

Participation in an intercollegiate, junior varsity or club sport is equivalent to two activity each year, split season sports will earn one credit for each half of the year (crew, golf, tennis, rugby, ultimate, etc). A maximum of three credits may be attained while participating in sports with the exception of a two sport athlete who can fulfill the physical education requirement by totaling four units in two sports. The remaining units must come from the physical education activity program.

Residence Requirement

Students who begin college at Williams must spend a minimum of six semesters in residence at Williams. Students transferring to Williams from other institutions must spend a minimum of four semesters in residence at Williams, and those entering as sophomores are expected to spend six semesters in residence. Students are considered to be in residence if they are taking a program of study under the direction of the Williams College Faculty. Students must be in residence for both semesters of the final year.

ADDITIONAL CURRICULAR OPPORTUNITIES

Advanced Placement and International Baccalaureate

At the discretion of the appropriate departments or programs, students presenting satisfactory scores on Advanced Placement tests or International Baccalaureate higher level examinations may be placed in advanced courses not regularly open to them and/or may receive course credit toward the major or concentration. Therefore, if granted, this credit may be used as a prerequisite or in partial fulfillment of the major or concentration requirements. AP and IB credit, however, may not be used to reduce the normal course load of any semester, to make up a deficiency incurred at Williams, or to satisfy the Distribution Requirement.

Degree Credit Based on A-Level Examination Grades

Upon petition from the student, the Committee on Academic Standing may award two course credits toward the Williams degree for each grade of A or B awarded on an A-Level Examination in a liberal arts discipline. These credits may be used to accelerate graduation but may not be used to lower the course load during a semester in residence.

Normally, the student must have completed at least one full year of study at Williams and have met minimum academic standards before the CAS would consider the petition. The petition must include certification that all degree requirements, including a major, can be fulfilled if the credit is awarded.

Certificate in Foreign Languages

Certificates are awarded in Arabic, French, German, Russian and Spanish. The certificate confirms a particular degree of proficieny, cultural literacy and experience with the language in the context of the student’s college education. Seven or eight credits are required, depending on the language. Please see the individual programs for details and specific requirements.

Combined Program in Liberal Arts and Engineering

The 3-2 program enables a qualified student to combine a liberal arts education at Williams with undergraduate professional training in engineering. The student studies at Williams for 3 years, completing 24 courses and 3 Winter Study Projects. He or she then transfers to The Franklin Square School of Engineering and Applied Science at Columbia University for 2 years of engineering courses. Upon successful completion of this 5-year program, the student receives a Bachelor of Arts degree from Williams and a Bachelor of Science degree from Columbia.

During their 3 years at Williams, 3-2 students must complete all of the normal requirements for a Williams degree, including a major and the
distribution requirements. Students majoring in the sciences should consult with their department chair to see if any of the courses taken at Columbia can count toward their Williams major. Only students who have taken the prerequisite courses, who have at least a 3.30 grade point average in scientific subjects and overall will be recommended by their major department and approved by the Committee on Academic Standing for this program. The 3-2 program has an extensive list of prerequisite mathematics and science courses, so it is necessary to plan course selections at Williams carefully. The Pre-Engineering section of the Physics Department website includes a list of Williams courses recommended to prospective engineers as well as a link to the list of prerequisites on the Columbia website.

The Physics Department has a popular alternative to the 3-2 program is to complete the Williams B.A. in the usual 4 years, majoring in one of the sciences, and then go directly to a graduate program in engineering. Please see the section of this catalog titled “Preparation for Graduate and Professional Study.” Also, prospective engineers at Williams have the opportunity to take undergraduate engineering courses at other institutions through various exchange programs. For information about these opportunities, please see the section titled “Exchange Programs.”

The pre-engineering advisor, Professor Jefferson Strait, will be happy to assist students interested in any of the options leading to engineering careers. More information about pre-engineering can be found in the Physics Department section of the College website.

Co-ordinate Programs Offering Concentrations
In addition to majoring in a field, a student may choose to concentrate elective courses on a single topic or area. Normally, a student declares a concentration at the time of registration in the spring of the sophomore year. Concentrations are offered in the following programs:

- Africana Studies
- Biochemistry and Molecular Biology
- Cognitive Science
- Environmental Studies
- Global Studies
- Jewish Studies
- Justice and Law
- Latin/o Studies
- Leadership Studies
- Maritime Studies
- Neuroscience
- Public Health
- Science and Technology Studies

Descriptions of these programs appear under the appropriate heading in this publication. If the co-ordinate program courses are directly related to the major, a student may be allowed to reduce the number of courses required to complete the major.

Co-ordinate Programs
A number of programs do not offer concentrations formally, but do provide students with the opportunity to work in areas that cut across departmental and program lines. These are: Bioinformatics, Genomics, and Proteomics; Film and Media Studies; History of Science; Materials Science Studies; and Performance Studies. They are listed in this publication in alphabetical order. These programs provide guidance only and do not appear on transcripts.

Cross-Enrollment Programs
A limited number of students may register at Bennington College or Massachusetts College of Liberal Arts for courses not offered by Williams. Interested students should contact the Registrar’s Office about arrangements.

Experiential Education at Williams
Experiential education, involving “learning by doing” outside the classroom, has been a relatively understated but successful part of the Williams curriculum for a number of years. In addition to the use of traditional laboratory work in the natural sciences and studio work in art, faculty have been challenging students to become engaged more personally in the Williams curriculum. Through field work, research, or community work on special projects or through placement with community organizations, courses which include experiential learning provide students with opportunities to encounter firsthand the issues that they read and study about, requiring them to apply academic learning to nonacademic settings and challenging them to use their experiences in those settings to think more critically and deeply about what they are studying. Courses involving experiential education as defined above range from fully integrated off-campus programs such as the Williams-Mystic Maritime Studies Program and the Williams in Africa Policy in Action Program to courses involving a small field research project. The amount and nature of the experiential component(s) varies according to the philosophy of the academic judgment of the instructor.

A range of non-credit experiential education opportunities is also available to interested students. Community service, community work-study jobs., internships, research, special initiatives all provide students the chance to “learn by doing” outside the classroom. Information on each of these opportunities is provided below.

Community Service:
Opportunities to apply creative energy and initiative abound in community organizations in the Williams College area. Service ranges widely with options such as tutoring in local schools, building homes with Habitat for Humanity, neighborhood organizing, and trail clearing and river cleanup work. For more information, go to the Center for Learning in Action website at learning-in-action.williams.edu/opportunities.

Internships and Research Opportunities:
A wide variety of summer internship opportunities are available to interested students through the Career Center, the Center for Environmental Studies (CES), the Zilkha Center, the Williams Outing Club and the Center for Learning in Action. Research opportunities are also available through individual departments. More information about each of these opportunities is available online.

Museum Associates:
The Museum Associates Program of the Williams College Museum of Art provides students an opportunity to broaden their knowledge of art and art history through serving in the field of museum education, and to develop valuable communication and public speaking skills while working with the public. The only academic requirement is the completion of ArTh 101-102. Applications are accepted every spring. For more information, contact Sarah Mergeron, WCMOA Museum Manager.

For more information about experiential education and community engagement at Williams College, visit the Center for Learning in Action website at: http://learning-in-action.williams.edu/

Honsors Program
Williams awards the degree with honors to those students who have demonstrated imagination, initiative, and intellectual independence within the major. The Honors Program requires completion of a co-ordinate program courses and constitutes a clearly interrelated pattern of study, whether in the form of a thesis, specialization within the major, or interdisciplinary study with courses from other programs or departments. At least one of the courses must be in addition to the minimum number required for the major; one may be a Winter Study Project. A student who is completing two majors may be a candidate for honors in either or both of the majors, but a course for honors in one major may not be used as an honors course in the other. Some programs also award honors for their concentrations.

Individual departments and programs describe specific criteria, procedures, and patterns of study for honors in the “Courses of Instruction” section. Students should consult with their departments on their honors options prior to the senior year. Before the student has registered for the last of the required course units, the department or program determines whether the student is admitted to honors candidacy. The degree is awarded with Honors or Highest Honors at the end of the senior year if, in the judgment of the department, its criteria of excellence have been met.

Independent Study
When a particularly able student wishes to study a subject not covered by the normal offerings of the College, arrangements may be made to undertake courses of independent study under faculty supervision. Such arrangements are made with the appropriate department at the time of registration.

Study Away from Williams
The College encourages students to think about the option of study away as they begin the process of considering major fields and course requirements during sophomore year. All students in good standing with no deficiencies, including financial aid recipients, may study away on approved programs during all or part of their junior year. Credit earned on the Williams-Mystic Program and the Williams-Exeter Program at Oxford are considered Williams College credits and the grades will be applied toward the GPA. Students participating on all other approved programs will receive credit and their GPA will not be impacted. Students wishing to study away for any portion of their junior year must request approval in March of their sophomore year by submitting a petition to the Office of International Education and Study Away, including a supporting essay by the student.

Students are responsible for reading all information provided on the International Education and Study Away website (https://study-away.williams.edu/), including peer program evaluations. All students who are interested in study away for any portion of their junior year should attend one of the general information meetings that the Director of International Education and Study Away offers in the fall semester prior. After attending an information session, students are required to schedule an appointment to meet with the Director. Program approval is required from the chair of the student’s major department, the Director of International Education and Study Away, and the Committee on Academic Standing.

When a student decides to accept an offer of admission from a program, he or she must notify Office of International Education and Study Away directly. The Committee on Academic Standing will grant formal approval with a letter specifying how many credits a student must earn to equal a semester or year of credit at Williams. Students need to complete the Pre-Departure Web Form to allow all required materials, and meet all the guidelines provided prior to departure. Upon return to Williams, students must complete a program evaluation in order to receive academic credit toward the Williams degree.

The Williams Tutorial Program
The Tutorial Program offers Williams students a distinctive opportunity to take a heightened form of responsibility for their own intellectual development. No courses are required to take a tutorial, but only student with the appropriate qualifications and interests is invited to do so. Tutorials at the 100/200 level are designed primarily for first-year students and may only be taken if they are usually given enrollment preference for such courses, though interested juniors and seniors are also welcome. Tutorials at the 300/400 level are designed primarily for juniors and seniors (and, often, for majors in the discipline); first-year students and sophomores are welcome to apply, but are urged to consult the instructor before registering.

Tutorials place much greater weight than do regular courses—or even small seminars—on student participation. They aim to teach students how to
develop and present arguments; listen carefully, and then refine their positions in the context of a challenging discussion; and respond quickly and cogently to critiques of their work. Tutorials place particular emphasis on developing analytical skills, writing abilities, and the talents of engaging in rigorous conversation and oral debate.

The ways in which particular tutorials are conducted vary across the disciplines, but here is a description of how most tutorials at Williams are conducted. Tutorials are instructor-led, and usually limited to ten students. At the start of the term, the instructor divides the students into pairs. Each pair meets weekly with the instructor for roughly one hour. Many tutorial courses begin and end the term with a group seminar, and in a few departments, instructors hold weekly group meetings of all the tutorial students to make assignments and to be better informed to facilitate the students’ independent work. But the heart of every tutorial course is the weekly meeting of the two students with the instructor.

At these weekly meetings, one student delivers a prepared essay or presentation (e.g., a first paper, a later draft, or a final draft of a problem set, a report on laboratory exercises, etc.) pertaining to the assignment for that week, while the other student—and then the instructor—offer a critique. In the following week, students switch roles. Typically, students write five or six essays (usually 7 pages) during the term, and offer five or six critiques of their partners’ work.

Since the program’s inception in 1988, students have ranked tutorials among the most demanding—and rewarding—courses they have taken at Williams. While not designed to be more difficult than other courses, tutorials are nonetheless challenging, with frequent writing assignments and the expectation that students will be well prepared to participate actively and effectively in weekly discussions. At the same time, students have consistently placed tutorials among the most enriching and consequential courses they have taken. They have appreciated the close attention to their writing and argumentation skills; the opportunity to be held accountable, in a detailed way, for the extended implications of their ideas; the chance to develop their oral presence; and the opportunity to engage in debate, to present their own ideas, and to hear others. Tutorials build between teachers and students, and students with each other. Many students have formed important advising and mentoring relationships with their tutorial teachers.

More information: Students pre-register for tutorials as they would for any other course (but should first check the description for prerequisites and to see if permission of the instructor is required). Because of limited enrollments and the special logistical arrangements involved in organizing tutorials, students who do not drop tutorial after the first scheduled day of organizational meetings each semester. It is therefore important that students determine, before the start of the term, their interest in and commitment to the course. If they are uncertain whether they wish to take the tutorial, they should consult with the instructor.

More information: Students may obtain detailed information about particular tutorials from the course descriptions and the instructors. (All tutorials have a T after the course number.) For general information, advice, or suggestions about the program, please contact the Bojana Mladenovic, Tutorial Program Director.

Williams-Exeter Programme at Oxford University
Williams offers a year-long programme of study at Oxford University in cooperation with Exeter College, Oxford. Based at Ephraim Williams House, Williams’ study center at Oxford, the Programme is designed to offer the fullest possible integration of the students into the intellectual and social life of one of the world’s great universities, and to provide students with an introduction to the Oxford tutorial system and the Oxford three-term calendar is followed.

Interested students should consult the Office of International Education and Study Away.

Williams-Mystic Maritime Studies Program
The William-Mystic Maritime Studies program offers students a unique opportunity to explore the ocean, to travel the Atlantic, Pacific and Gulf Coasts, and to undertake original research into maritime humanities and sciences. A term at Williams-Mystic satisfies both a semester's credit and one winter study requirement, as well as intensive writing course credit. Four Williams courses are offered as an integrated, multidisciplinary curriculum in the semester-long program at Mystic Seaport, in Mystic, Connecticut: Maritime History, Literature of the Sea, Marine Policy, and either Marine Ecology or Oceanography (see the American Maritime Studies section in this catalog). Williams College faculty members teach all four courses, in an effort to provide meaningful integration between them.

During the fall semester students go aboard a tall ship, a field seminar along the Pacific Coast, and a Louisiana field seminar, all of which are cross-disciplinary and inter-disciplinary exercises. Students live in historic, cooperative, coed houses at Mystic Seaport, the world’s largest living maritime museum, and have full access to world-class maritime collections, a maritime library, well-equipped laboratory, and diverse coastal habitats (where field research can be undertaken in a wide variety of environments, ranging from tidepools and salt marshes to sandy beaches at sea). Students also participate in maritime skills under professional instruction, with choices such as blacksmithing, climbing aloft and setting square sails, music of the sea, or small boat handling and sailing.

Williams-Mystic seeks candidates who are willing to try new things and work in a challenging academic environment. No sailing experience necessary, and all majors are welcome—a typical semester at Williams-Mystic is represented by 12 to 14 different majors spanning the sciences and humanities. Sophomore, junior or senior standing; interested candidates should contact Williams-Mystic at admissions@williamsmystic.org, call (860-572-5359), or visit the website (www.williams.edu/williamsmystic). College students may study away for full year and also attend the Williams-Mystic program for a semester in the sophomore, junior or senior year.

ACADEMIC STANDARDS AND REGULATIONS

Attendance
In order to give students a larger share of responsibility for their own education, Williams College does not administer a general system of required classroom attendance. The College expects students to make full use of their educational opportunities by regular class attendance and to assume the academic risks incurred by absences.

Although no formal system of class attendance is maintained by the College, attendance at and active participation in classes are expected of students. Students who fail to meet these standards may be warned by the instructor and notice sent to the Dean that continued absence could result in their being dropped from the course. Attendance is required at all parts of the Winter Study Program, and a course cannot be dropped after the designated course change period. Students who do not attend the first class meeting in a semester course or Winter Study Project may be required to withdraw by the instructor. Attendance is required at all parts of the Winter Study Program, and a course cannot be dropped after the designated course change period. Students who do not attend the first class meeting in a semester course or Winter Study Project may be required to withdraw by the instructor. Attendance is required at all parts of the Winter Study Program, and a course cannot be dropped after the designated course change period.

Registration for fall and spring semesters and for the Winter Study Program takes place at designated periods during the academic year. There may be a $5 per day late fee for any registration changes accepted after the announced deadlines, including the subject designation for cross-listed courses.

New students register online in early summer; soon after arrival at Williams, they meet with their assigned Academic Advisors to discuss the curriculum and their course selections. All course changes for new students are made after these meetings. During the first two years of study, students are limited in the number of courses they may take in one department or subject each semester as follows:

a) First-year students may take no more than one course with the same course prefix, nor more than two courses with the same course prefix, nor more than three in one department, in a semester.

b) Sophomores may take no more than two courses with the same course prefix, nor more than three in one department, in a semester.

c) Sophomores may take no more than three courses with the same course prefix, nor more than four in one department, during the full year.

d) A student may take no more than a total of five courses with the same course prefix, nor more than eight in one department, during the first two years.

e) Any exception to the above early concentration rule may be requested by a petition (goldenrod) to the Committee on Academic Standing (C.A.S.) filed at the time of registration.

Course Change Period
Course changes may be made during a designated period at the beginning of each semester. No course changes may be made after that period except with the approval of the Committee on Academic Standing, after consultation with the appropriate department and the Director of Psychological Counseling Services.

Registration for fall and spring semesters and for the Winter Study Program takes place at designated periods during the academic year. There may be a $5 per day late fee for any registration changes accepted after the announced deadlines, including the subject designation for cross-listed courses.

Students may take up to 3 courses on a pass-fail basis (but no more than one per semester). Students may designate a course pass-fail at any point after drop/add up to the tenth week of the semester. Once a course has been designated pass-fail, however, this designation cannot be changed. Students may receive a “P” in a pass-fail course will be recorded as an “E” on students’ records and will count toward the GPA, but a “P” will not.

Courses taken pass-fail cannot subsequently be used to fulfill distributional requirements (divisional, W, G, and EDI). No course counting toward a major, certificate, or concentration can be taken pass-fail unless this course is the
first one taken toward that credential. (In rare circumstances, chairs of programs or departments may grant exceptions to this rule.) Students may designate a fifth course as one of their pass-fail options, similarly by the thirteenth week of the semester. Courses taken pass-fail as part of a four-course load or as a fifth course to make up a course deficiency will count toward graduation; courses taken pass-fail as an extra course will not count toward graduation.

Students may have the option of designating any of their courses not eligible for the pass/fail option.

Fifth Course Option
Except in the case of the unbalanced course program described above, a student may, by the end of drop/add, enroll in a fifth course that must be designated as an extra graded course. An extra course may be dropped any time up to the sixth week of the semester. If a student chooses to continue in the course and the course pass/fail is not required for the pass/fail option, be, or she must decide by the tenth week whether to complete the course on an A–E graded basis or change the course to pass/fail. An extra course graded "Pass" may not be used to fulfill distribution or major, concentration, or certificate requirements of or to make up a deficiency incurred in a prior term, but not to accelerate graduation. The grade received will be included in the calculation of the student’s cumulative grade-point average.

Winter Study Projects
Students must pass a Winter Study Project in each of their four years. Winter Study Projects, Pass, and Perfunctory Pass will be taken as a course in the major for which the A–E grading system applies. A transcript of a student’s cumulative academic record is available from the Registrar’s Office upon written request. Transcripts will not be issued for students who are in financial arrears. Provisions relating to student records, access to them, and safeguards on their use are in the Student Handbook.

First-Year Student Warnings
In the middle of each semester, instructors report to the Registrar those first-year students whose grades at that time are unsatisfactory. The students must be given notice of deficiencies and an opportunity to present satisfactory explanations to a dean before they are permitted to make up the deficiencies. If a student is absent from a final examination, a make-up examination may be given only with the permission of a dean and at a time determined by the instructor. No extensions will be granted beyond the examination period or better in each course in the major taken in the first two years of residence after it has become evident that he or she is either unable or unwilling to maintain reasonable standards of academic achievement. At the end of each term, the Committee on Academic Standing reviews all academic records that fail to meet the following minimum academic requirements:

1) in the case of a first-semester failure of a year-long language course, obtain a grade of at least C minus in the work of the second semester of that course. The failure for the first semester will, however, remain on the student’s record and will be included in the cumulative grade point average.

A deficiency must normally be made up before the start of the following academic year. In no case may a deficiency incurred in the spring semester, no later than the following fall semester. A student may, in consultation with the Dean’s Office, petition the Committee on Academic Standing for an alternate plan.

Separation for Low Scholarship
It is the policy of Williams College not to permit a student to remain in residence after it has become evident that he or she is either unable or unwilling to maintain reasonable standards of academic achievement. At the end of each term, the Committee on Academic Standing reviews all academic records that fail to meet the following minimum academic requirements:

1) obtain a grade of at least C minus in the work of the second semester of that course. The failure for the first semester will, however, remain on the student’s record and will be included in the cumulative grade point average.

A deficiency must normally be made up before the start of the following academic year. In no case may a deficiency incurred in the spring semester, no later than the following fall semester. A student may, in consultation with the Dean’s Office, petition the Committee on Academic Standing for an alternate plan.

Students who are required to resign from the College for academic reasons are normally not permitted to return for at least one year from the date of their resignation. A student who has been required to resign from the College may petition the Committee on Academic Standing through the Dean for reinstatement on the condition that all deficiencies must be made up and a letter submitted to the Committee that offers convincing evidence that the student is ready and able to complete work toward a degree in Williams without further interruption.

Students who resign, students must vacate their rooms promptly. Financial aid students must also see the Director of Financial Aid before leaving to discuss loan repayment and renewal of aid in the event of readmission. A student who fails to meet minimum academic standards in his or her final semester at Williams may be required by the Committee on Academic Standing to meet them by earning grades of at least C minus elsewhere before the B.A. will be awarded. If such work is required, it must be completed within three years and stipulated otherwise, and the courses must be approved in advance by the Registrar.

Withdrawal from the College in Good Standing
Students may request personal leaves of absence from a dean and, if granted, withdraw from the College. Such time away, often as a period of reassessment and self-evaluation, can prove to be beneficial educationally. A withdrawal in good standing may be granted for not less than one semester and not more than three years. Students who withdraw in good standing are readmitted with the approval of the Dean’s Office and are expected to complete the degree without further interruption.

Students may request permission from a dean to withdraw at any time. If a student is granted a personal leave of absence before the semester begins, but before the end of the drop/add period, the transcript will list the date of withdrawal as the day before the term began. If a personal leave is granted after the end of the drop/add period, but before the end of the eighth week of the semester, the transcript may list the date of withdrawal as the day before the semester begins. No withdrawals will count toward the maximum of eight allowed to complete the degree. If a personal withdrawal is allowed after the eighth week of the semester, the transcript will list the date of withdrawal and the courses in progress, each with a W; the semester will normally count toward the maximum of eight allowed to complete the degree and the student will incur deficiencies that must be made up before returning to the College.

Refunds
Payment refund or credit in the event of withdrawal can be found online: http://web.williams.edu/admin/registrar/geninfo/expenses.pdf.

Eligibility for and Completion of Majors
To be eligible for any major, students must have received grades of C minus or better in each course in the major taken in the first two years of college and Honors or Pass on any Winter Study Project taken in the major department. Students may request permission (or program chairs may look at grades behind pass-fail courses.) A senior may enter a major only upon the approval of the department or program chair and the Committee on Academic Standing.

All Winter Study courses in the major must be taken on an A–E graded basis, unless a course is the first in the major; in that case, it can be taken pass-fail. (In rare instances, and only with the permission of the relevant chair, students may be allowed to count a second pass-fail course for the major.) In addition to passing at least one major course, a major must have a grade of a C minus or better in the Winter Study Project, the student must maintain an average in the major of 1.67 or higher. Seniors who have an average below 1.67 in the field major normally will not be allowed to graduate. A student who achieves a grade of C minus in the first semester of a required major course may be dropped from the College at mid-year. A student who falls below these standards may continue in the major only with the approval of the Committee on Academic Standing.

A senior major exercise is not required by every department or program but is by some. All departments or programs requiring such an exercise specify it as such in the description of their majors in the "Courses of Instruction"
section, and all students in those departments or programs must complete the exercise satisfactorily.

Eligibility for Extracurricular Activities
A student is eligible to represent the College in any athletic, dramatic, literary, or musical event and be in the student government, or other organization as a member, substitute, or officer, unless he or she is declared ineligible:

1) by the Dean;
2) by vote of the Discipline Committee; or
3) by vote of the Committee on Academic Standing because of a violation of the Honor Code.

The Student Honor Committee may recommend to the Dean loss of eligibility as a penalty for a violation of the Honor Code.

Dean’s List
All students who attain a semester average of 3.50 or higher in a program of four or more courses taken on an A-E graded basis are placed on the Dean’s List for that semester. (Note: students with three courses taken on an A-E graded basis and one pass-fail course are not eligible for the Dean’s List).

Phi Beta Kappa Society
Students of the highest academic standing are eligible for election to membership in the Phi Beta Kappa Society in accordance with the following rules:

1) The requirements for election to membership shall be a grade point average of 3.3 and Honors or Pass in all required Winter Study Projects. There shall be two elections of new members for each class, at the end of the junior and senior years.
2) At the end of the junior year, all students in the highest five percent of the class, ranked by cumulative grade point average, shall be eligible for election to membership in provided they have met the requirements and have completed all courses to be considered candidates for the B.A. degree in the following year. A student who leaves Williams at the end of the junior year to attend graduate school may be elected under the above procedures.
3) At the end of the senior year, all students not yet elected and in the highest 12.5 per cent of the class, ranked by cumulative grade point average, shall be eligible for election provided they have met the requirements.
4) Students shall be eligible for election only if they have been students at Williams College for at least two years.
5) Honorary members may be elected from distinguished alumni of at least twenty years’ standing. No more than one such member shall be elected each year.
6) Any student who shall have gained his or her rank by unfair means or who in the judgment of the Dean of the College is not of good moral character is ineligible to election.
7) The name of a member elect shall be entered on the roll only after he or she has accepted the election and has paid to the Treasurer the regular entrance fee.
8) Any undergraduate member who withdraws from the College before graduation or who falls short of the minimum Phi Beta Kappa scholastic standing may, upon a two-thirds vote of the members present at the annual meeting, be deprived of membership in the society.
9) Any undergraduate member who is expelled from the College shall be deprived of membership in the Society.
10) While connected with Williams College as professor, associate professor or assistant professor, or an officer of administration, any graduate of Williams College who is a member of another chapter of Phi Beta Kappa shall be considered a regular member of the Williams chapter.
11) While connected with Williams College as professor, associate professor or assistant professor, or an officer of administration, any member of another chapter of Phi Beta Kappa shall have all the privileges of the Williams chapter, including holding office and voting. While connected with Williams College, an officer of instruction or administration who is a member of another chapter shall have all the privileges of the Williams chapter, except holding office and voting. Awards of Degrees
By vote of the Trustees, the degree of Bachelor of Arts is conferred at Commencement upon students who have completed the requirements as to courses and grades to the satisfaction of the Faculty. The right to a degree may, however, be forfeited by misconduct at any time prior to the conferring of the degree. No degree in absentia will be conferred except by special vote of the Trustees on petition presented to the Dean. Diplomas will not be authorized for students who have not paid College charges or have not returned all books belonging to the library.

Graduation with Distinction
The Faculty will recommend to the Trustees that the degree of Bachelor of Arts with distinction be conferred upon those members of the graduating class who have passed all Winter Study Projects and obtained a four-year average in the top:

- 35% of the graduating class — Bachelor of Arts cum laude or higher
- 15% of the graduating class — Bachelor of Arts magna cum laude or higher
- 2% of the graduating class — Bachelor of Arts summa cum laude

ACADEMIC HONESTY
All students are expected to be familiar with the Williams College Honor Code and to reaffirm their commitment to the Statement of Academic Honesty by signing an Honor Code pledge at the beginning of each academic year. The Honor Code covers all aspects of academic honesty, including the writing of papers and laboratory reports as well as all quizzes, hour tests, and examinations. For a self-directed citation tutorial, please see The Eph Survival Guide at: http://web.williams.edu/wp-etc/acad-resources/survival_guide/. For a complete description of honor and discipline procedures, please see: http://sites.williams.edu/honor-system/

Statement of Academic Honesty
As an institution fundamentally concerned with the free exchange of ideas, Williams College has always depended on the academic integrity of each of its members. In the spirit of this free exchange, the students and faculty of Williams recognize the necessity and accept the responsibility for academic honesty.

A student who enrolls at the College thereby agrees to respect and acknowledge the research and ideas of others in his or her work and to abide by those regulations governing work stipulated by the instructor. Any student who breaks these regulations, misrepresents his or her own work, or collaborates in the misrepresentation of another’s work, has committed a serious violation of this agreement.

Students and faculty are to report violations and alleged violations of this agreement promptly. All reports are to be submitted to the Student Honor Committee, consisting of the eight student members of the joint Faculty–Student Honor System–Discipline Committee. This committee is responsible for determining the guilt or innocence of the accused person or persons and for recommending to the Dean appropriate punishments. Several faculty members sit with the Student Honor Committee in an advisory capacity.

A quorum of three–quarters shall be required for the Committee to meet. A vote of guilty by at least three–quarters of those present is necessary for conviction. A recommendation for dismissal must be made by unanimous vote of those present and shall be carried out only with the assent of both the Dean and the President of the College.

Any amendments to this statement must be made through a student referendum in which two–thirds of those voting support the amendment. These alterations must be ratified by the faculty.

Adopted 1971
Guidelines
Instructors are encouraged to submit to the Honor Committee a written statement defining how the Statement of Academic Honesty applies to their courses or laboratories and to explain such guidelines to their students. Instructors may set any type of final examination or hour test, ranging from closed–book, alternate–seating classroom exercises to open–book, “take–home” examinations or papers, and any requirements for laboratory exercises. Some instructors encourage cooperation among students but others do not. If a student is unsure how the Honor Code applies in a particular situation, it is ultimately the student’s responsibility to find out from his or her professor, or from a member of the Honor Committee, how the Honor Code applies in that situation. All members of the honor system can last for as long as both the students and the faculty work together to create a true academic community.

In all written material, including ungraded assignments and drafts, students are expected to avoid the possibility of even unintentional plagiarism by acknowledging the sources of their work. Careful observance of accepted standards of reference and attribution is required. The basic rules are summarized below. Students are further advised to consult a recognized style manual to learn how to acknowledge sources correctly. While academic honesty does not demand a footnote on statements of common fact, it does require that a student provide clear footnotes or other appropriate documentation and give credit in the bibliography to ideas, interpretations, and facts that particular sources have contributed to the student’s final work.

The basic rules of attribution require that:

1. A direct quotation (whether a single word or a phrase, sentence, paragraph, or series of paragraphs) must always be identified by quotation marks, by indenting and single spacing, or by reduced type size of the quoted material, and a note must be used to state the exact source.
2. A paraphrase of the work of another must be acknowledged as such by a note stating the source.
3. Indebtedness to the specific ideas of others, or the summarizing of several pages, even though expressed in different words, must be acknowledged by a note stating the source.
4. In every instance, the use of another student’s laboratory reports, computer programs, or other material must be acknowledged by a note.
5. Even the use of a student’s own previous or concurrent work must be acknowledged; thus, a student must obtain the prior permission of all instructors concerned before submitting substantially all or part of the same paper in more than one course.

Note: Attempts to gain academic advantage by misleading a professor are violations of the Honor Code. For example, if a student claims to have handed in an assignment, that work must actually have been submitted.

EXPENSES
Within the limits of available funds, Williams endeavors to offer its educational opportunities to all who qualify for admission. Income from its endowment and annual contributions from its alumni and friends have enabled Williams to keep its tuition at about half the actual cost per student to the College.

Payment of Term Bills
College bills for one–half of all tuition and fees are available online to students (and other authorized payers) twice a year (in mid–July and mid–December) for payment by August 15 and January 15; a fee of $250 may be charged if
payment is received after these dates. Term bills must be paid before the semester’s classes begin or the student may not be permitted to enroll in classes or remain in residence at the College. Billing statements for accounts with outstanding balances or current activity will be issued online monthly and are due upon receipt.

All outstanding balances must be paid to the Bursar, and all books and materials must be returned to the Library, before the student is entitled to a degree or a transcript.

**College Bills**

College charges for tuition, room, board, and fees for the academic year 2016–2017 are as follows:

- **Tuition**: $51,490
- **Board**: 6,760
- **Room**: 9,360
- **Activities and Residential House Fees**: 300

<table>
<thead>
<tr>
<th>Estimated cost</th>
<th>exclusive of travel expenses</th>
</tr>
</thead>
<tbody>
<tr>
<td>$800</td>
<td>$2,300</td>
</tr>
<tr>
<td>Clothing, Laundry, Recreation</td>
<td>approximately 1,500</td>
</tr>
</tbody>
</table>

The student’s term bill and a “return payment fee” of $30.00 will be assessed. The College reserves the right to require that payment be made in the form of cash, cashier check or money order.

Some students with bills still unpaid at the start of the semester who have not made satisfactory arrangements with the Bursar are subject to a $250 late fee and may not be permitted to enroll in classes, register a vehicle, participate in the housing lottery/room draw, or remain in residence at the College. Furthermore, if arrangements for payment after the start of the semester are approved by the Bursar and the expected payments are not made on time, these students are subject to these same restrictions.

If efforts by the Bursar’s Office to collect the monies owed are unsuccessful, the account could be placed with a collection agency, and if the delinquency persists, the College’s experience with the account may be reported to a national credit bureau. It is the policy of the College to pass on to the debtor all reasonable costs associated with collection of the debt through a collection agency. If at any time the student believes information concerning payment delinquency is inaccurate, they should notify the College c/o Bursar’s Office, P O Box 406, Williamstown, MA 01267.

There are several loan options available to parents through outside sources. These include the Federal PLUS Loan program and the MassPlan Loan through the Massachusetts Educational Financing Authority (MEFA). Information on these loans can be found in the Guide to Financing Your Williams College and www.meфа.org.

Williams also offers an installment payment plan, administered by Tuition Management Systems whereby the charges for each term are paid in five equal installments (July through November for fall term and December through April for spring term), with no interest charges. There is also a 4-month plan available (August through November for fall term and January through April for spring term). There are no income restrictions. Monthly payments will be the total cost (or adjusted yearly credit) divided by 5 or 4 months. There is an enrollment fee per term for this program. Information on the payment plan can be obtained by contacting Tuition Management Systems at 800-208-5804 or service@afford.com.

**Refund Policy**

Federal regulations require that all educational institutions disclose their refund policy to all prospective students. In accordance with that regulation, below is the Williams College Refund Policy for the 2016–2017 academic year.

*Housing and miscellaneous fees are not pro-rated after the start of classes. Coverage under the College’s student health insurance plan will continue for the length of the plan (August 15, 2016–August 14, 2017).

For students receiving Title IV federal funds, repayment of federal funds on a pro-rata basis will be determined up to the 60% point of the semester per federal regulation. Please note that withdrawal late in the semester could result in a balance owed to the College for federal aid that must be returned to the government.

Repayment is first made to federal programs in the following order: Unsubsidized Federal Direct Stafford Loan, Subsidized Federal Direct Stafford Loan, Federal Perkins Loan, Federal Direct PLUS Loan, Federal Pell Grant, Federal SEOG, Federal ACG, National Smart, Federal SSIG, Robert Byrd Scholarship. Any remaining credit balance reimburses other sources in the following order: Williams scholarship, other scholarships, other parent loan programs and family. Specific examples are available on request.

The College offers, through GradGuard, a Tuition Refund Plan which supplements the Williams College Refund Policy in certain circumstances. For more information contact GradGuard directly at 888-541-4843, customerservice@gradguard.com, or online at https://gradguard.com/tuition-insurance/partners/refCode=williams/tracking_code=co.williams.

The College will issue a 1098-T form at the end of each calendar year for the American Opportunity and Lifetime Learning tax credits. The 1098-T should not be used to calculate the amount of scholarship and grant aid that is taxable. These forms will be mailed by January 31 to the student at the permanent address on file.
ENDOWED SCHOLARSHIPS AND TUTORIALS

Distinctive Undergraduate Scholarships

Williams College, through the Office of Financial Aid, administers over three hundred endowed scholarships, all of which are based on demonstrated need. Students who apply for financial assistance are automatically considered for these and other endowed scholarships. No separate application is required. Limited space prohibits the complete listing of these, but some deserve special mention because of their distinctive or important features:

BRONFMAN FAMILY FUND—Established in 1990 as part of the Third Century Campaign for international programs. The family’s support provides financial aid both for students coming to Williams from foreign countries and for U.S. students depending on their resources. The primary preference is to be given to students from Ireland.

CLASS OF 1936 MEMORIAL SCHOLARSHIP—Established in 1986 by members of the Class of 1936 and their families and friends as their 50th Reunion gift to the College. Preference is given to descendants of members of the Class of 1936.

CLASS OF 1957 SCHOLARSHIP—Established in 1982 by the Class of 1957 as its 25th Reunion gift to the College. This award honors several Juniors and Seniors each year who have successfully combined campus leadership with academic achievement.

POLLY AND WILLARD D. DICKERSON ’40 SCHOLARSHIP—Established in 1990 by members of the Class of 1940 on the occasion of their 50th Reunion in honor of Willard D. Dickerson ’40, Executive Director of Development Emeritus, and his wife Polly. For 32 years from their home in Williamstown the Dickersons cared for the College, the Class, and its members with great concern, affection, and pride. Awarded to young men and women of promise.

THE N. JANES R. AND PETER D. KIERNAN ’44 SCHOLARSHIP—Established in 1989 by Fleet Financial Group in memory of Peter D. Kiernan ’44, former chairman and CEO of Fleet/NoStar Financial Group, Inc. The scholarship was further endowed by Peter D. Kiernan III 75, and his wife Eaddo, in memory of his father and in honor of his mother, Mary Agnes R. Kiernan. Seven scholarships are awarded annually, with preference given first to Fleet employees and their children or to residents of regions served by Fleet Financial Group (notably New England, New York, and New Jersey). A secondary preference is to be given to students from Ireland.

JOHN W. LASELL SCHOLARSHIP—Established in 1952 by five members of the Lasell family in memory of John W. Lasell of the Class of 1920. Preference is given first to students of Whitinsville, then to other Massachusetts residents.

HERBERT H. LEHMANN SCHOLARSHIP—Established in 1964 by Mrs. Lehman as a memorial to her husband, a former New York Governor and U.S. Senator, who graduated from Williams in 1899. Fifteen to twenty upperclass students are selected each year on the basis of service to both the Williams and wider community.

MORRIS AND GLADYS LEWY SCHOLARSHIP—Established in 1983 by Morris and Gladys Lewy, parents and grandparents to two Williams graduates. Preference is given to these awardees as a memorial to pre-medical students.

JOHN J. LOUIS, JR. ’47 SCHOLARSHIP—Established in 1976 by the late John J. Louis, Jr., former Trustee of Williams, for general scholarship purposes. Preference is given to students from Illinois.

RALPH PERKINS ’09 SCHOLARSHIP—Established in 1960 by the family of Ralph Perkins, a member of the class of 1909. Preference in this award is to be given to students from Ohio.

FREDERICK H. ROBINSON ’16 MEMORIAL SCHOLARSHIP—Established in 1927 by the late Mrs. Dorothy S. Robinson in memory of her husband, a member of the Class of 1920. Preference in this award is to be given to students who demonstrate interest in music.

SPENCER FAMILY SCHOLARSHIP—Established at Williams in 1991 by Mrs. Harriette Spencer, a former Trustee of the College, in honor of her husband’s (Edson W. Spencer ’48) 65th birthday and her great affection and respect for Williams College. Preference in this award is to be given to students of Native American, African–American, Latino, or Asian–American descent.

C. V. STARR SCHOLARSHIP—Established in 1981 by the C. V. Starr Foundation with preference to be given to international students.

FRANCIS SCOTIE SCHOLARSHIP—Established in 1921–22 by Frank Lynne Stetson, Class of 1887. Preference in these awards is to be given to students from northern New York.

JACOB C. STONE SCHOLARSHIP—Established in 1928 by Jacob C. Stone, a member of the Class of 1914, a Trustee of Williams, and a native of North Adams, Massachusetts. Preference in this award is to be given to students from Berkshire County.

Alumni Funded Tutorials

Tutorials bring a professor and two students together in weekly sessions that epitomize President James A. Garfield’s (Class of 1856) legendary statement: “The ideal college is Mark Hopkins on one end of the log and a student on the other.” Typically, two professors who have been teaching on demo students about arguments, about arriving at and defending a position, and about responding on the spot to questions, criticisms, and suggestions. They also promote critical reading, the writing of succinct analyses, and oral defense. The College recognizes the Classes of 1953, 1954, and 1979 with deepest appreciation for supporting tutorials with their generous 25th and 50th Reunion gifts. Williams is also pleased to recognize the following individuals and families who have created generous endowments to support tutorials, many in honor of their 25th and 50th Reunions: Hugh Garmenti 1954, David A. Gray 1954, Robert L. Guyett 1958, The Hunter Family, John D. Mabie 1954, and John H. Simpson 1979, The Testa Family.

PREPARATION FOR GRADUATE AND PROFESSIONAL STUDY

Although the principle function of Williams is to provide a broad and solid liberal education that will retain the value no matter what the vocation a student may pursue, the College recognizes that no fundamental conflict exists between a liberal education and preparation for a professional career; on the contrary, a foundation of liberal studies increases professional competence. To that end, Williams offers a portfolio preparation program of study so as to provide as much educational breadth and enrichment as circumstances permit. A student should also give serious consideration to post-college plans early in the college career.

Each departmental major provides the foundation for graduate study in the corresponding field. Students should consult the departmental programs listed under “Courses of Instruction” for requirements, and for special advice regarding preparation for graduate study. Students should also consult with the Academic Advisor, Ed Epping, can help the student narrow the search of programs that would best match the student’s needs. The specific requirements of all art and architecture schools offering Master of Arts and/or Master of Fine Arts is available from the College Art Association (CAA).

The College Art Association (CAA) has written: “Admission to (graduate) programs should be based on the nature, extent, and quality of undergraduate preparation, including courses in art history and other academic subjects. Quality of studio preparation can best be judged on the basis of careful evaluation of work done at the undergraduate level; therefore, a portfolio review (usually represented by slides) is regarded as an absolute necessity in the admission process.”

While many institutions consider the BFA to be the standard qualifying degree, the fact that the applicant has attended a BA– or BS–granting institution does not necessarily rule out acceptance in most MFA programs. Whatever the undergraduate degree, most entering graduate students tend not to be completely prepared in one or more of the areas cited above and will require remedial make-up work...

Some institutions use the MA degree as a qualifying prerequisite for final acceptance into MFA candidacy, allowing the student to apply the earned credits toward the higher degree.

Students are advised to take into consideration not only current minimum requirements but also recommended courses.

Business Administration

Williams offers no special course in preparation for a business career for graduate study in business administration. The qualities which are important to successful business people are as well developed by liberal education as they can be sought elsewhere. An ability to reason and to express oneself logically and clearly in written and oral exposition; a good understanding of the physical and social environment in which business operates; a solid background in quantitative skills; and an appreciation of the ethical dimensions of a problem. A portfolio of achievements and/or an MA or MFA program is recommended for most liberal arts graduates.

Although there is no particular major at Williams that is designated as preparation for the business world, students interested in futures in business are encouraged to undertake a broad educational program in the arts, humanities, and sciences. It is important that one gets involved in extra-curricular activities that provide leadership position, and pursuing relevant summer internships is critical.

Students interested in graduate work in business administration should consult with the Pre-MBA Advisor, Robin Meyer, at the Career Center.

Engineering

Many Williams graduates enjoy productive careers in engineering, applied science, or technical management. Successful engineers need to be able to communicate their knowledge in a way that is both precise and general. They should understand and the social dimensions of a problem. A prospective engineer should major in one of the sciences (usually physics, chemistry, computer science, or mathematics), while pursuing a broad liberal arts education at Williams. Most often he or she will complete a Williams B.A. in the usual four years and then go to an engineering school for professional training leading to a master’s degree or doctorate in engineering. While it may be necessary to make up a
few undergraduate engineering courses, the opportunities at Williams to participate in scientific research and the breadth of a liberal arts education prepare Williams graduates to succeed in engineering graduate study and in their careers.

The “Pre–Engineering” webpage can be found in the Physics Department section of the College website. It contains a list of Williams courses recommended to prospective engineers. Students interested in engineering also have the opportunity to complete the coursework at other institutions. Williams maintains exchange programs with California Institute of Technology, Thayer School of Engineering at Dartmouth College, and Rensselaer Polytechnic Institute. Williams students can arrange to study at one of these engineering universities during the junior year. Please see the “Exchange Programs” section of this catalog for more information. The 3–2 program offers an opportunity to study engineering at the undergraduate level at Columbia. Please see the “Combined Program in Engineering” section for information.

Pre–engineering advisor, Professor Jefferson Strait, will be happy to help plan course selections and to discuss the possible paths to a career in engineering. Many more details about pre–engineering.

Law

Williams graduates regularly proceed directly to law schools on the strength of their liberal arts education. As a rule, law schools do not require particular pre–law curriculum for undergraduates. Consequently, liberal arts students who desire admission to law schools can prepare for the law school in a wide variety of ways. The more a student can do to enhance his or her undergraduate record, the better. The College has a very active on–campus educational recruiting program that includes regular visits from the leading law schools from around the country. Please see the WCC calendar for notice of these visits. Michelle Shaw ’95, at the Career Center. Also, on a regular basis, law schools conduct interviews on the Williams campus.

Students intending to study law should consult with the Pre–Law Advisor, Michelle Shaw, in the Career Center. Also, on a regular basis, law schools from around the country will visit Williams to provide information and to answer questions from potential applicants. Check the WCC calendar for notice of these visits.

Religious Study

There is no particular path through the Williams curriculum designed or recommended for students intending to prepare for a career as a religious professional, enroll in a seminary or pursue theological education. Undergraduate study in many fields within the liberal arts curriculum can be useful to the prospective minister, priest, rabbi, imam, or teacher of religion. Students interested in beginning the preparation for an academic career in teaching or scholarship should give serious consideration to concentrated undergraduate study in the field, in consultation with faculty advisors in the Department of Religion.

Students interested in teaching at independent elementary– or secondary–level schools should plan to complete the major in education as an undergraduate while at Williams. Those interested in teaching at the elementary or secondary level should plan to complete the major in education as an undergraduate while at Williams. The Education Department has a very active on–campus educational recruiting program that includes regular visits from the leading law schools from around the country. Please see the WCC calendar for notice of these visits. Michelle Shaw ’95, at the Career Center. Also, on a regular basis, law schools conduct interviews on the Williams campus.

GRADUATE PROGRAMS AT WILLIAMS

Master of Arts in Policy Economics

The Center for Development Economics (CDE), which opened at Williams College in 1960, offers an intensive one-year program designed to lead to the degree of Master of Arts in Policy Economics. The program is specifically designed for economists from developing countries who have already embarked on professional careers in the public sector. The curriculum requires courses in development economics, macroeconomics, microeconomics, and econometrics. CDE fellows choose among other courses in lecture, seminar, and tutorial formats. Course electives for 2016-2017 include the following: developing country macroeconomics II; financial development and regulation; taxation; international finance; and safety nets; and micro–simulation for policy analysis. Williams undergraduates who satisfy course prerequisites, with the consent of the individual instructor, are encouraged to take courses at the CDE. Admission to the master’s degree program is highly selective, with several hundred applicants each year for approximately 30 places. Candidates normally have a B.A. or B.Sc. degree with above average grades in economics or a related field, two or more years of relevant work experience, and an effective command of spoken and written English. CDE fellows are often nominated for the program by public agencies from which they will be on leave. More information is available on the CDE website, cde.williams.edu. All communications relating to the degree of Master of Arts in Policy Economics should be addressed to the CDE, Assistant Director, 1065 Main Street, Williams College, Williamstown, MA 01267, or e-mail cde@williams.edu.

Master of Arts in the History of Art

In cooperation with the Sterling and Francine Clark Art Institute, Williams College offers a two–year course of study leading to the degree of Master of Arts in the History of Art. The program is open to undergraduates with an interest in history of art, to students who wish to pursue a second major of students a thorough professional preparation for careers in the visual arts, including schools and museums, and to enable them to pursue further research whether independently or at institutions offering higher graduate study. Candidates normally have a B.A. or B.Sc. degree, but the program is highly selective, with several hundred applicants each year for approximately 30 places. Candidates normally have a B.A. or B.Sc. degree with above average grades in economics or a related field, two or more years of relevant work experience, and an effective command of spoken and written English. CDE fellows are often nominated for the program by public agencies from which they will be on leave. More information is available on the CDE website, cde.williams.edu. All communications relating to the degree of Master of Arts in Policy Economics should be addressed to the CDE, Assistant Director, 1065 Main Street, Williams College, Williamstown, MA 01267, or e-mail cde@williams.edu.

Pre–College and College Teaching/Research

A central qualification for careers in teaching at any level is proficiency in a major. Students interested in college teaching and research should prepare themselves at Williams for graduate work in the subject of their choice. Those interested in teaching at the undergraduate level should plan to obtain state certification. A series of courses and seminars are offered in the Department of Education to help students gain experience and prepare for graduate school admission. In certain fields, upwards of twelve courses are listed as prerequisites. The general requirements for many programs are outlined in “Choosing First Year Courses,” but each student considering advanced study in health fields should meet with the Health Professions Advisor early in the college career to ensure that planned coursework will satisfy admissions requirements.

Jane Cary, the Health Professions Advisor, will be happy to discuss goals and specific steps that might help a student realize them. Detailed information is available at the Health Professions website (http://careers.williams.edu/grad-school/pre-health/).

Teaching After Williams

There are many options for teaching after Williams, including independent and public school teaching. Many states now offer streamlined programs to certify public school teachers, and many states offer a wide range of options for acquiring certification while you teach.

Students interested in teaching may want to consider participating in the Program in Teaching at Williams which is designed to enable undergraduates to gain teaching experience and to consider graduate school options. The program involves working with experienced teachers and provides teaching experience in local schools. There are many opportunities to do teaching internships and study education as an undergraduate while at Williams.

Students interested in college teaching should consult with the chairs of the departments in which they are interested in teaching at the elementary and secondary level should consult with the Director of the Program in Teaching. Additional advice for both of these options is also available at the Career Center.

PRIZES AND AWARDS

George Olmsted Jr., Class of 1924 Prizes
Awards for excellence in teaching to four secondary school teachers nominated by members of the senior class.

**Prizes in Special Studies**

**JOHN SABIN ADRIANCE 1862 PRIZE IN CHEMISTRY.** From a fund given by John Sabin Adriance, 1882, a cash prize is given to the student who has maintained the highest rank in all courses offered by the department of chemistry.

**ROBERT G. BARROW MEMORIAL PRIZE FOR MUSIC COMPOSITION.** Established in 1989 in memory of Robert Barrow, professor of music at Williams 1939–1976, to be awarded to a qualified music student on the basis of his/her accomplishment in music composition at Williams College and on promise as a composer.

**OLGA R. BEAVER MEMORIAL PRIZE IN MATHEMATICS.** From a fund established in 2013 by a group of friends and family in memory of Olille Beaver, former chair of the department of mathematics, to be awarded to a senior who has made extraordinary contributions to the mathematics and/or statistics community.

**ERASTUS C. BENEDICT 1821 PRIZES.** From a sum of money given by Erastus C. Benedict, 1821, once an instructor in the College, first and second cash prizes are awarded for excellence in biology, French, German, Latin, Greek, and mathematics.

**RUSSELL H. BOSTERT THESIS PRIZE IN HISTORY.** A cash prize established in 1990 by Roger L. Headrick 1958 in honor of Professor Bostert, Stanfield Professor of History, on the occasion of his retirement after forty–two years as a member of the Williams faculty, and awarded to an Honors student for the best thesis in American History, with special consideration to inter–American relations or Sino–American relations.

**ERNEST BROWN AFRICAN ARTS PRIZE.** In appreciation of Ernest Brown’s steadfast and inspired service to Africana Studies as a Professor, as Director of the Zambezi Marimba Band and as Co-Director of Kusika, this cash prize is given to a senior whose work has shown unusual brilliance, imagination, and industry in the performing arts, especially the music of Africa.

**KENNETH L. BROWN 1947 PRIZE IN AMERICAN STUDIES.** From a fund established by his parents in memory of Kenneth L. Brown, 1947, a cash prize is awarded annually to a senior majoring in American Studies.

**NATHAN BROWN PRIZE IN HISTORY.** In honor of Nathan Brown, a professor of history at Williams, the prize is awarded annually to a senior who has demonstrated the highest excellence in English.

**JEAN DONATI STUDENT EMPLOYEE AWARD IN MUSIC.** Established in 1993 by Mrs. L. Carrington Goodrich to honor her son, Professor Frank C. Goodrich, 1945. An award in Chemistry given each year to a student (or students), chosen by the chemistry faculty who demonstrated excellence in chemistry research. This award supports travel to professional meetings where the student may present his or her research.

**WILLIAM C. GRANT, JR. PRIZE IN BIOLOGY.** A cash award to recognize graduating biology major who has demonstrated the highest excellence and greatest insights in integrating different fields within the biological sciences.

**LAWRENCE S. GRAVER PRIZE IN THEATRE.** A cash prize to a junior or senior showing great potential in the performing arts as exemplified through excellent performance in the arts.

**FREDERICK C. HAGEDORN, JR. 1971 PREMEDICAL PRIZE.** From a fund created in 1971 by friends and the family of Frederick C. Hagedorn, Jr., 1971, in his memory, a cash prize is awarded to a premedical student entering the second year of the program of medicine at Williams College.
experience reflects outstanding community service involvement with Berkshire County.

WILLIAM W. KLEINHALDER PRIZE FOR EXCELLENCE IN MUSIC. Established in 1991 in memory of William Kleinhalder, 1950, as an annual prize for excellence by a student in the department of Music.

ROBERT M. KOZELKA PRIZE IN STATISTICS. In 2000, the new Department of Mathematics and Statistics established the annual Kozelka Prize in Statistics to recognize outstanding scholarship in this field. The prize honors the former chair and statistician, Robert M. Kozelka, who was widely recognized for his applications of statistics in the social sciences, especially anthropology.

WILLIAM W. KLEINHALDER PRIZE IN POLITICAL SCIENCE. From a fund established in 1987 by the political science department in memory of Professor Richard W. Krouse (1975–1986), awarded annually to a junior or senior who has done distinguished work in Political Science and who best exemplifies the intellectual and humane qualities that characterized the life of Professor Krouse.

JACK LARNED 1942 INTERNATIONAL MANAGEMENT PRIZES. In memory of Jack Larned, 1942, two annual prizes are awarded for student research in international management; one for undergraduate studies and the other for graduate students at the Center for Development Economics. Selections are made by the faculty members who teach architecture, shows the greatest achievement and promise in economic development and related fields.

LINEN SENIOR PRIZES IN ASIAN STUDIES. Three prizes to graduating seniors who achieve distinction and show outstanding promise. One prize to an Asian Studies major; one prize each to any senior, whether a major in the Department of Asian Studies or not, who has taken Chinese language and Japanese language during her/his Williams career.

LINEN SENIOR THESIS PRIZE IN ASIAN STUDIES. Prize to a graduating senior who has written an English thesis. The prize is awarded to one major in the Department of Asian Studies, but also open to non–majors who write a highest honors thesis, with a substantial focus on Asia, supervised by a member of the Asian Studies faculty.

H. GANSE LITTLE PRIZE IN RELIGION. Established in 1997 by former students to honor Professor Little, who taught in the religion department at Williams from 1963–1997, to be awarded to a senior major for excellence in the study of religion.

EDWARD GOULD SHUMWAY 1871 PRIZE IN ENGLISH. In memory of Edward Gould Shumway, 1871, a fund has been established by his daughter, Mrs. Margaret Shumway Boyer, and endowed by the family and friends in memory of Shirley Stanton, who served the college community through the music department and the Conference Office. Awarded to that graduating senior who has written and defended an Honors thesis in the field of transnational or non–Western History. The Prize will be awarded periodically in years when senior Honors students in History have written a thesis of exceptional merit in these fields. The Prize is in honor of former President Sawyer, who foresaw and commitment to the College and to the Department of History led to the first expansion of the Department’s offerings outside the fields of U.S. and European history.

SCHIEFFLEY AWARD. This award, in the name of Lewis and Andrew J. W. Schieffley (the first director of the Center for Environmental Studies) is given in recognition of outstanding environmental leadership.

ROBERT C. L. SCOTT PRIZE FOR GRADUATE STUDY in Economics. A cash prize from a fund established by former students of Professor Robert C. L. Scott to honor his years of service to Williams and awarded to a senior Honors students in history who is planning to attend graduate school in the field of American or European history.

JAMES F. SKINNER PRIZE IN CHEMISTRY. Established in 1988 by the family of James F. Skinner and Dr. Margaret F. Skinner, 1972, Professor of Chemistry 1966–1988, in memory of his dedicated service to his students, Williams College, the chemistry department, and the community. A cash prize is awarded annually to a member of the graduating class who has been accepted for the first year of graduate study in chemistry, and shows outstanding promise for both teaching and scholarship.

THEODORE CLARKE SMITH BOOK PRIZE in AMERICAN HISTORY. In honor of Theodore Clarke Smith, distinguished historian and teacher of history at Williams College, 1903–1938 and 1943–1944, the department of history awards a book to the first–year student or sophomore who writes the best essay in a course in American History.

HOWARD P. STABLER PRIZE IN PHYSICS. Awarded to the student who has demonstrated the initiative, creativity, perseverance, and achievement, especially in a senior thesis. The award is named for Professor Emeritus Howard Stabler. It was established in gratitude for Professor Stabler’s excellent direction of so many honors theses in Physics over the years.

D. LAZLO G. VERSENYI MEMORIAL PRIZE. In memory of Laszlo G. Versenyi, Mark Hopkins Professor of Intellectual and Moral Philosophy, who taught at Williams from 1921–1948, to be awarded to one student selected by the chairman of the philosophy department as the outstanding philosophy student for the year.

The award is open to juniors, sophomores, or first year students, whether majors in the Department of Asian Studies or not. It consists of round–trip transportation to Japan, plus up to $1,000 to cover costs associated with an approved seminar or conference, or to conduct an approved independent research project.

CARL VAN DUYNE PRIZE IN ECONOMICS. Established in 1983 by family, colleagues, friends, and the Philip H. Seaman Fund in memory of Carl Van Duyne, Associate Professor of Economics at Williams who died in 1983. Selection made by the economics department faculty from among juniors who are economics or political economy majors who have exhibited “not only a technical mastery, but also the inquisitive mind and motivation of a true scholar.” This prize provides a “stipend for the senior year as well as another for the first year of graduate school if the recipient goes on to do graduate work in economics.” In addition, a Van Duyne Scholar receives a stipend if he is able to devote the summer before the senior year to full–time research in Economics.

LASZLO G. VERSENYI MEMORIAL PRIZE. In memory of Laszlo G. Versenyi, Mark Hopkins Professor of Intellectual and Moral Philosophy, who taught at Williams from 1921–1948, to be awarded to one student selected by the chairman of the philosophy department as the outstanding philosophy student for the year. Students write a thesis of exceptional merit in these fields. The prize, in recognition of Professor Versenyi’s brilliant abilities in those languages.
undergraduate in the field of Africana Studies.

The Michael Davitt Bell Prize. This prize, established by Michael Davitt Bell, who is a professor of economics and chairman of the English department, recognizes the best essay on a topic in American literature. The essay can be a Senior Honors Thesis or any other outstanding American literature essay submitted by a Williams student.

The Henry Rutgers Conger Memorial Literary Prize. From a fund established by members of the class of 1889, in memory of their classmate, Henry Rutgers Conger, a cash prize is awarded annually for the best contribution of prose or poetry submitted to a literary magazine published by the undergraduates of the College, as judged by a committee from the department of English.

The James Dunbar Student Life Prizes. A cash prize, established by bequest from Philip R. Dunbar, Class of 1900, for a significant written work, published or unpublished, on any aspect of student life focused on any local, national or global issues affecting college or university students.

The Arthur H. Graves Prize. From a fund established by the family of Arthur H. Graves, Class of 1883, in memory of their father, a cash prize is awarded each year for the best six essays prepared by seniors on subjects assigned by the following departments: art, economics, history, philosophy, political science, religion. The fund also provides a cash award or awards for the best report or reports during a student's senior year in the social sciences or economics.

C. David Harris Jr. 1963 Book Prize in Political Science. In memory of C. David Harris Jr., 1963, who died during his college career, a book is awarded annually to the Political Science major who writes the best paper on a topic of political philosophy or empirical political science. The prize was donated by his classmates through the Williams College Social Council, of which David was a member, and the winner is selected by the political science department.

Richard Lathers 1877 Essay Prize in Government. From a fund given by Richard Lathers, 1877, a prize given to the senior who writes the best essay of not less than one thousand words on the duty or relation of citizens to the government.

The Ursula Prescott Essay Prize in Political Science. Established in 1999 from a bequest to the Political Science Department given by Ursula Prescott, a Williamsstown resident who had taught many political science classes in her retirement, a cash prize is awarded to the senior who writes the best essay on a topic in political philosophy or empirical political science. The prize was donated by his classmates through the Williams College Social Council, of which David was a member, and the winner is selected by the political science department.

The Sterling A. Brown, 1922, Citizenship Prize. Initially established in 1922 as the first bequest by a Williams graduate to bequested for the benefit of the undergraduates of the College in the field of Africana Studies, this prize honors Sterling A. Brown, Class of 1922, retired Professor of English at Howard University. Awarded to the graduating senior whose class position reflects outstanding leadership and involvement in campus affairs, academic achievement, and communication of new ideas, with preference to be given to members of the Black Student Union.

The William Bradford Turner 1914 Prize in History. From the income of a fund given by the family of William Bradford Turner, 1914, who was killed in action in France in September, 1918, a cash prize is awarded for the best essay on a topic in American, European, or international history.

The Benjamin B. Wainwright 1920 Prize in English. From a bequest of Benjamin B. Wainwright, 1920, a cash prize for the best short story submitted by a student who is a junior or senior, and majoring in English.

The David A. Wells Prize in Political Economy. From the bequest of David A. Wells, 1847, a prize is awarded for an essay upon a subject in political economy. Competition is limited to seniors and to graduates of not more than three years standing. The successful essay may be printed and circulated by the College.

The Charles R. Alberti 1919 Award. Established in 1994 by gifts from his son and grandson, Charles R. Alberti ’50 and C. Christopher Alberti ’75, an annual cash prize for a student body who has significantly enhanced the sense of community on campus and who has the potential for doing so in wider communities in the future.

The Erland A. Brown, 1922, Citizennship Prize. Initially established in 1974 by three members of the Class of 1974 and carried on by the Afro-American Studies Program, this prize honors Erland A. Brown, Class of 1922, retired Professor of English at Howard University. Awarded to the graduating senior who has demonstrated personal and ethical integrity and sound judgment in the exercise of leadership and involvement in campus affairs, academic achievement, and communication of new ideas, with preference to be given to members of the Black Student Union.

The Charles R. Alberti 1919 Award. Established in 1994 by gifts from his son and grandson, Charles R. Alberti ’50 and C. Christopher Alberti ’75, an annual cash prize for a student body who has significantly enhanced the sense of community on campus and who has the potential for doing so in wider communities in the future.

The Erland A. Brown, 1922, Citizenship Prize. Initially established in 1974 by three members of the Class of 1974 and carried on by the Afro-American Studies Program, this prize honors Erland A. Brown, Class of 1922, retired Professor of English at Howard University. Awarded to the graduating senior who has demonstrated personal and ethical integrity and sound judgment in the exercise of leadership and involvement in campus affairs, academic achievement, and communication of new ideas, with preference to be given to members of the Black Student Union.

The James C. Kellogg III 1937 Award. The award is to be given annually to a Williams student who has made a significant contribution to the development of Multiculturalism and building community as a Williams College Community Builder.

The William Williams Multicultural Center Student of the Year Award. Given to the graduating senior who, in his/her four years at Williams, personified the tenets and ideals of Multiculturalism and through his/her activism worked towards its realization.

The DEWEY PRIZE. A cash prize, founded by Francis Henshaw Dewey, 1840, is awarded to the member of the graduating class who presents the most creditable oration in point of composition and delivery at the commencement exercises.

The Serpentine Prizes. From a fund established by the family of Mr. and Mrs. John C. Regenstein, in appreciation of Karl Weston’s, 1896, great service to Williams College as teacher and as Director of the Lawrence Art Museum, a book prize is awarded to the undergraduates of the College, as judged by a committee from the Interfraternity Council of 1931 in memory of their fellow member, Allan Livingston Grosvenor. Awarded annually to the junior who has best demonstrated concern for the college community and beyond through exemplary service and who has served with the utmost integrity and reliability. The committee of award consists of the chairman and the secretary of the College Council and three other members selected by the Council.

The James C. Rogerson Cup and Medal. Presented by Mrs. James C. Rogerson and the class of 1892 in memory of Mr. Rogerson, a member of that class. The cup, a permanent possession of the College, is awarded annually for one year by the President of the College to an alumnus or to a senior for service and loyalty to the College and for distinction in any field of endeavor; a bronze medal is awarded for permanent possession of the recipient.

The Francis E. Bowker, Jr. Swimming Prize. A cup given by the late Francis E. Bowker, Jr., 1908, on which is engraved the name of the first–year student of the men’s swimming team who exhibited high qualities of sportsmanship that exemplify the traditions of women’s tennis at Williams College.

The Bourne–Chaffee Women’s Tennis Award. Presented in 1978 by the Alumnae Association, the award is given to the senior who has exhibited loyalty to the team, determination, perseverance under adversity, and hard working dedication to reach the maximum of her potential as a tennis player.

The Williams College Multicultural Center Student of the Year. Given to the graduating senior who, in his/her four years at Williams, personified the tenets and ideals of Multiculturalism and through his/her activism worked towards its realization.

The Rhetorical Prizes

The Shriram Multicultural Center Student of the Year. Given to the graduating senior who demonstrates outstanding leadership in developing Multiculturalism and building community as a Williams College Community Builder.

The Shriram College Multicultural Center Student of the Years. Given to the graduating senior who, in his/her four years at Williams, personified the tenets and ideals of Multiculturalism and through his/her activism worked towards its realization.

The Academic Prizes

The Franciscus C. Grose Prize. Established 1965 by the family of the late Francis E. Bowker, Jr., 1908, on which is engraved the name of the first–year student of the men’s swimming team who exhibited high qualities of sportsmanship that exemplify the traditions of women’s tennis at Williams College.

The Bierce Track Prize. Awarded annually to the female track athlete who has exhibited loyalty to the team, determination, perseverance under adversity, and hard working dedication to reach the maximum of her potential as a tennis player.

The Academic Prizes

The J. Edwin Bullock Wrestling Trophy. Presented in 1960 by his fellow coaches and awarded annually to that varsity wrestler who because of his superior performance, courage, and loyalty has been of credit to his college and community.

W. Marriott Canby 1891 Athletic Scholarship Prize. A cash prize established by W. Marriott Canby, 1891, and awarded at
ROBERT B. MUIR MEN’S SWIMMING TROPHY. Presented in 1960 by Mr. and Mrs. George S. Dively, parents of Michael A. Dively, 1961. Awarded annually to the outstanding male varsity swimmer on the basis of performance, leadership, and sportsmanship.

ROBERT B. MUIR WOMEN’S SWIMMING TROPHY. Presented in 1977 by Peggy and Sam Maples, 1944, a former Williams College swimmer. Awarded annually to the outstanding women varsity swimmer on the basis of performance, leadership, and sportsmanship.

FRANKLIN F. OLMSTED MEMORIAL AWARD. Given in 1963 by Mrs. Franklin F. Olmsted in memory of her husband, 1914, who was a member of the first Williams cross country team. Awarded annually to the member of the varsity cross country team on the basis of character, perseverance, and sportsmanship.

ANTHONY PLANSKY AWARD. Given in 1953 by George M. Steinbrenner III, 1952, and awarded annually to the best varsity track athlete on the basis of performance, leadership, and sportsmanship.

LEONARD S. PRINCE MEMORIAL SWIMMING PRIZE. In memory of Leonard Sidney Prince, 1914, donated by his father, S. S. Prince. Presented to the outstanding first-year student or sophomore woman member of the swimming team who best exemplifies the qualities of leadership, performance, and sportswomanship.

PURPLE KEY TROPHIES. Two trophies for the senior man and senior woman letter–winners who best exemplify leadership, team spirit, ability, and character. Chosen by the Director of Athletics, president of the Purple Key, two members of the Athletic Department, and one faculty member chosen by the Purple Key.

MICHAEL E. RA KOV MEMORIAL AWARD. Presented in 1957 by the members of Alpha Delta Phi, to be awarded annually to the member of the varsity football team who, in the opinion of his coaches, is the most improved, and who possesses superior qualities of leadership, aggressiveness, and determination.

ROBERT B. MUIR MEMORIAL TROPHY. Presented by Mr. Paul B. Richardson of Belmont, on which is recorded each year the name of the male swimmer or diver who wins the greatest number of points in dual collegiate meets during the swimming season.

DOUGLAS D. ROCKWOOD TENNIS CUP. In memory of Lieutenant Richard Burton Rockwood, 1916, who was killed in action in France, his mother, Mrs. R. L. Rockwood, has given a fund to provide a cup to be awarded annually to the winner of the singles in the fall tennis tournament.

DONALD E. ESPOSITO MEMORIAL AWARD. Presented in 1960 by his former teammates in memory of Captain Charles D. Salmon, USAF, former Little All–American guard and captain of the 1951 Williams College football team, killed in the service of his country. Awarded to that member of the varsity football squad who has made the most significant contribution to the varsity football team in his sophomore or first year of eligibility. Presented by the team of 1951 in the sincere hope that it will serve to inspire the recipients in the years to follow to seek the same supreme goal to which Charles D. Salmon contributed.

SCRIBNER MEMORIAL TENNIS TROPHY. Presented in 1954 by his friends in memory of Frederick M. Scribner, Jr., 1949, killed in action in Korea on February 20, 1953, this trophy is awarded annually to the member of the men’s varsity tennis team who best combines sportsmanship, team spirit, and character.

EDWARD S. SHAW 1962 MEMORIAL SQUASH AWARD. Awarded to that member of the Varsity Squash team who best exemplifies the ideals for which Coach Shaw stood during his years behind the bench. Presented as a tribute to the memory of Coach Shaw, to inspire the recipients in the years to follow to seek the same supreme goal to which William E. Simon sought to instill in his son, a former member of the Williams College Tennis Team.

CAROL GIRARD SIMON SPORTSMANSHIP AWARD. Given in the name of Carol Girard Simon to a student athlete who has shown the most improvement as voted by her teammates.

KATE HOGAN 27TH ANNIVERSARY OF WOMEN IN ATHLETICS AWARD. First established on the 25th Anniversary of Williams’ Athletics at Williams College and renamed in memory of Kate Hogan, 1987, a participant with Williams and ski racing.

DR. I. S. DRIBBEN 1924 AWARD. Awarded annually as a tribute to two Williams College golf coaches, Richard Barron and Roy Coff. Awarded on the basis of dedication, sportsmanship, and perseverance.

TORRENCE M. HUNT ‘44 Tennis AWARD. Awarded to the player of the season as voted by the Squash Letter Award Winners.

OSWALD TOWER AWARD. A plaque in honor of the contribution of Oswald Tower, 1907, to basketball, as editor of the Basketball Rules for forty–four years and as a bachelor. Presented in 1960 by former Williams players to the most valuable player of the men’s varsity in the opinion of the coaches and managers.

KATE HOGAN 27TH ANNIVERSARY OF WOMEN IN ATHLETICS AWARD. Presented in 1957 by the members of Alpha Delta Phi, to be awarded annually to the member of the women’s tennis team who best combines sportsmanship, team spirit, and character.

EDWARD S. SHAW 1962 MEMORIAL SQUASH AWARD. Awarded to that member of the Varsity Squash team who best exemplifies the ideals for which Coach Shaw stood during his years behind the bench. Presented as a tribute to the memory of Coach Shaw, to inspire the recipients in the years to follow to seek the same supreme goal to which William E. Simon sought to instill in his son, a former member of the Williams College Tennis Team.

ROBERT B. MUIR MEMORIAL TROPHY. Presented in 1960 by Mr. and Mrs. George S. Dively, parents of Michael A. Dively, 1961. Awarded annually to the outstanding male varsity swimmer on the basis of performance, leadership, and sportsmanship.

ROBERT B. MUIR WOMEN’S SWIMMING TROPHY. Presented in 1977 by Peggy and Sam Maples, 1944, a former Williams College swimmer. Awarded annually to the outstanding woman varsity swimmer on the basis of performance, leadership, and sportsmanship.

FRANKLIN F. OLMSTED MEMORIAL AWARD. Given in 1963 by Mrs. Franklin F. Olmsted in memory of her husband, 1914, who was a member of the first Williams cross country team. Awarded annually to the member of the varsity cross country team on the basis of character, perseverance, and sportsmanship.

ANTHONY PLANSKY AWARD. Given in 1953 by George M. Steinbrenner III, 1952, and awarded annually to the best varsity track athlete on the basis of performance, leadership, and sportsmanship.

LEONARD S. PRINCE MEMORIAL SWIMMING PRIZE. In memory of Leonard Sidney Prince, 1914, donated by his father, S. S. Prince. Presented to the outstanding first-year student or sophomore woman member of the swimming team who best exemplifies the qualities of leadership, performance, and sportswomanship.

PURPLE KEY TROPHIES. Two trophies for the senior man and senior woman letter–winners who best exemplify leadership, team spirit, ability, and character. Chosen by the Director of Athletics, president of the Purple Key, two members of the Athletic Department, and one faculty member chosen by the Purple Key.

MICHAEL E. RAKOV MEMORIAL AWARD. Presented in 1957 by the members of Alpha Delta Phi, to be awarded annually to the member of the varsity football team who, in the opinion of his coaches, is the most improved, and who possesses superior qualities of leadership, aggressiveness, and determination.

ROBERT B. MUIR MEMORIAL TROPHY. Presented by Mr. Paul B. Richardson of Belmont, on which is recorded each year the name of the male swimmer or diver who wins the greatest number of points in dual collegiate meets during the swimming season.

DOUGLAS D. ROCKWOOD TENNIS CUP. In memory of Lieutenant Richard Burton Rockwood, 1916, who was killed in action in France, his mother, Mrs. R. L. Rockwood, has given a fund to provide a cup to be awarded annually to the winner of the singles in the fall tennis tournament.

DONALD E. ESPOSITO MEMORIAL AWARD. Presented in 1960 by his former teammates in memory of Captain Charles D. Salmon, USAF, former Little All–American guard and captain of the 1951 Williams College football team, killed in the service of his country. Awarded to that member of the varsity football squad who has made the most significant contribution to the varsity football team in his sophomore or first year of eligibility. Presented by the team of 1951 in the sincere hope that it will serve to inspire the recipients in the years to follow to seek the same supreme goal to which Charles D. Salmon contributed.

SCRIBNER MEMORIAL TENNIS TROPHY. Presented in 1954 by his friends in memory of Frederick M. Scribner, Jr., 1949, killed in action in Korea on February 20, 1953, this trophy is awarded annually to the member of the men’s varsity tennis team who best combines sportsmanship, team spirit, and character.

EDWARD S. SHAW 1962 MEMORIAL SQUASH AWARD. Awarded to that member of the Varsity Squash team who best exemplifies the ideals for which Coach Shaw stood during his years behind the bench. Presented as a tribute to the memory of Coach Shaw, to inspire the recipients in the years to follow to seek the same supreme goal to which William E. Simon sought to instill in his son, a former member of the Williams College Tennis Team.

CAROL GIRARD SIMON SPORTSMANSHIP AWARD. Given in the name of Carol Girard Simon to a student athlete who has shown the most improvement as voted by her teammates.

KATE HOGAN 27TH ANNIVERSARY OF WOMEN IN ATHLETICS AWARD. Presented in 1957 by the members of Alpha Delta Phi, to be awarded annually to the member of the women’s tennis team who best combines sportsmanship, team spirit, and character.

EDWARD S. SHAW 1962 MEMORIAL SQUASH AWARD. Awarded to that member of the Varsity Squash team who best exemplifies the ideals for which Coach Shaw stood during his years behind the bench. Presented as a tribute to the memory of Coach Shaw, to inspire the recipients in the years to follow to seek the same supreme goal to which William E. Simon sought to instill in his son, a former member of the Williams College Tennis Team.

CAROL GIRARD SIMON SPORTSMANSHIP AWARD. Given in the name of Carol Girard Simon to a student athlete who has shown the most improvement as voted by her teammates.
LACROSSE AWARD. Presented in 1959 by the Williams College Alumni Association of Maryland as a permanent trophy on which is inscribed the name of the outstanding men’s varsity lacrosse player. ROBERT B. WILSON ’76 MEMORIAL TROPHY (Most Improved Player), The purpose of this award is to honor that member of the men’s intercollegiate hockey program who, in the opinion of the athletic director and coach, has shown the most improvement over the course of the season, while displaying “teamwork, hustle, spirit, and friendship.” YOUNG–JAY HOCKEY TROPHY. Presented by George C. Young, 1938, and John C. Jay, 1938. For a member of the Williams varsity hockey team notable for loyalty and enthusiasm to the game of hockey: courage, self-control, and modesty; perseverance under discouraging circumstances; and a sense of fair play towards his teammates and his opponents.

Fellowships Awarded by Williams College
Faculty Selection Committees examine candidates for the awards listed below. Application must be made through the Dean’s Office or appropriate department.

ALLEN MARTIN FELLOWSHIP. Established by Allen Martin, himself a Carroll A. Wilson Fellow, this fellowship helps to support a Williams graduate studying at Worcester College, Oxford for a term of two years. Applicants are not restricted by major or other interest and may pursue undergraduate or graduate degrees at Worcester.

ROBERT B. WILSON ’76 CLASS OF 1929, FELLOWSHIP. This summer fellowship, established in 2014, shall be used to enable undergraduate students to pursue opportunities for personal growth fostering independence, creativity, and development of special interest, whether or not it is connected to academically coursework.

JOHN EDMUND MOODY 1921 FELLOWSHIP. Established in 1927 by Mr. John Moody in memory of his son, Class of 1921. To enable a graduate of Williams College to purchase studies at the University at Oxford for two years following graduation. The recipient is chosen from those who have majored in Greek, Latin, English, history, political science, philosophy, religion, or economics. The basis of award is general intellectual ability as shown in the major field and reputation for character, need of assistance, and promises of original and creative work.

COLIN AND LILLI ROCHE, 1993, STUDENT RESEARCH PROGRAM. Established in 2016 to provide funding to support student, driven academic experiences outside of, and complementary to, the traditional classroom that culminate in academic credit.

RUCHMAN STUDENT FELLOWSHIPS. Established in 1993 by Allan B. Ruchman ’75 and Mark C. Ruchman ’71, this fellowship provides a research stipend to support independent summer research and travel abroad for sophomores and juniors. The recipient make a start on a career in journalism, here broadly defined to connected to academic coursework.

THE 2006 AND 2009 INTERNATIONAL SERVICE FELLOWSHIP. The fellowship fund was established in 2011 by parents of recent alumni to provide summer fellowships for undergraduate students’ international service-learning projects.

RUSSELL H. BOSTERT FELLOWSHIP. A summer fellowship to support student summer travel and research with preference awarded to students in Division II, with a preference to History majors. Application is through the Fellowships Office.

WHITING FELLOWSHIP. Established in 1961, this two-year fellowship is offered to a member or members of the graduating class who produce the most creative and distinguished work of original scholarship and personal interest in journalism during the summer.

GREEK. Established in 1929, by bequest of Mrs. Abby S. L. Selden in memory of her father, Charles Bridgen Lansing, 1829. Awarded either at the Commencement or at commencement of any academic study but is meant to foster travel and learning that lead to an enhancement of international understanding.

Teaching Fellowships, Hong Kong and Guangzhou
Established in 2010 by Arthur Frederick Stocker 1934 in memory of his grandson, Mr. and Mrs. George J. Mead. Mr. Mead expressed in his will an intention “that this gift shall be used to improve the quality of leadership and service in all branches of government, whether Federal, State, or municipal, by encouraging young people of reliability, good sense and high purpose to enter with adequate preparation those fields of politics and constitutional government upon which may rest the destinies of the nation.”

A portion of this gift constitutes a Scholarship Fund that directly assists promising students with inadequate means who are specializing in political science. A portion, designated “the remaining portion, or Special Fund, is primarily intended to finance a summer internship program in government involving selected sophomores and juniors.

Teaching Fellowships, Hong Kong and Guanzzhou
UNITED KINGDOM, CHINA, HONG KONG AND GUANGZHOU UNIVERSITY OF HONG KONG. Begun in 1961, this two–year fellowship is offered to a member of the graduating class for teaching English and possibly other subjects at United College, one of
three sister colleges comprising the Chinese University of Hong Kong. The appointee, known as a Teaching Fellow or Tutor, also studies Chinese (Mandarin or Cantonese) and selected aspects of Chinese culture. Students are chosen by a selection committee, chaired by Professor Crane. Interested students should contact Professor Crane for application forms. Deadline November 30th.
AFRICANA STUDIES (DIV II)
Chair: Associate Professor JAMES A. MANIGAULT-BRYANT

GENERAL PROGRAM DESCRIPTION
The Africana Studies Program is an interdisciplinary concentration offering students an in-depth understanding of the history, politics, religion, and culture of peoples of African descent, especially in the Americas. We use music, dance, literature, the arts, and scholarly works to explore the origins of this field of study in the fulcrum of African American and Caribbean movements of resistance, a trans-national program, intellectually influenced by scholars from W. E. B. Du Bois to the present, Africana Studies encourages students to study abroad, and offers travel Winter Study courses designed to expose students to experiential learning settings outside of the classroom.

CONCENTRATION IN AFRICANA STUDIES
Candidates for a concentration in Africana Studies must complete at least five courses listed as Africana courses [note: many Africana courses are cross-listed with departmental offerings; all these are considered Africana Studies courses and can be used to count both for the concentration and for the departmental major of which they are a part]. Two of these five courses are required courses that every concentrator takes. They are the introductory course, AFR 200, normally taken in the sophomore and junior years, but open to all students; and an Africana Senior seminar, normally taken in the senior year, but also open to others at the Professor's discretion. Additional courses may be taken either with our core Africana faculty or with faculty and visiting professors affiliated with the program. However, at least one of these three additional courses must be listed as "Core Electives" which are each designated in the descriptions below as a "Primary Crosslisting". We also encourage students to take at least one course in a program/department other than Africana Studies and consider an experiential learning winter study session. Concentrators are expected to meet with the Chair and/or an Africana core faculty member to plan their concentration.

AFRICANA STUDIES AND OTHER PROGRAMS
Students concentrating in Africana Studies are encouraged to pursue concentrations in American Studies, Environmental Studies, Latino/a Studies, Performance Studies, and Women's, Gender and Sexuality Studies. Many of the courses counted for these concentrations may also earn credit toward the Africana Studies concentration.

REQUIREMENTS

African Studies courses required for the concentration:
AFR 200 Introduction to Africana Studies and one of the following two AFR 400-level Senior Seminar capstone courses (not all 400-level courses meet the requirement for the concentration):
AFR 405(F) Africana Studies and the Disciplines
AFR 440(S) Performing Blackness

One core elective:
AFR 156/COMP 156/AMST 156/ENGL 223 Thirteen Ways of Looking at Jazz
AFR 193/HIST 193 Black Power Abroad: Decolonization in Africa, the Caribbean and Europe
AFR 200 Introduction to Africana Studies
AFR 205 She Speaks in Color: Examining the 'Color Complex' in Toni Morrison's Writings
AFR 207/PSCI 212 Hip Hop and Political Theory
AFR 208/AMST 208/REL 262 Time and Blackness
AFR 211/ENVI 211/SOC 211/AMST 211 Race and the Environment
AFR 213/WGSS 213 Race, Gender, and the Alien Body: Octavia Butler’s Science Fiction
MUS225/AFR225 Musics of the Caribbean
AFR 221/REL 263 Giving God a Backbeat: Rap Music, Religion, and Spirituality
AFR 248/HIST 248 The Caribbean: From Slavery to Independence
AFR 299/PSCI 233/REL 261 Rastafari: Dread, Politics, Agency
AFR 300/AMST 300/SOC 306 Lessons of 'The Game': The Wire and Stereotyping
AFR 302 Complexion Complexities: Colorism in Literature, Lyrics, and Everyday Life
AFR 305/REL 315/SOC 305/AMST 305 The Sociology of Black Religious Experience
AFR 310/REL 310/WGSS 310/AMST 309 Womanist/Black Feminist Thought
AFR 311/REL 311 Black Ministerial Imaginations: Griots, Athletes, and Maestros
AFR 314/AMST 314/COMP 321/ENGL 314 Groovin' the Written Word: The Role of Music in African American Literature
AFR 315/AMST 315 Blackness 2.0: Race, Film and New Technologies
AFR 316/REL 265/AMST 316 Sacred Cinema: Black Religion and the Movies

AFR 317/COMP 319/DANC 317/ENGL 317/THEA 317/AMST 317 Black Performances: African American Performance at Home and Abroad
AFR 319/SOC 319/AMST 319 Ethnographic Approaches to Africana Studies
AFR 320/AMST 320/WGSS 320 Dangerous Bodies: Black Womanhood, Sexuality & Popular Culture
AFR 321 Trending Black: Race and Social Media in the 21st Century
AFR 322/AMST 323/ARTH 223/COMP 322/ENGL 356 Comic Lives: Graphic Novels & Dangerous Histories of the African Diaspora
AFR 327/COMP 268/ENGL 307/WGSS 268 Caribbean Women Writers
AFR 329/GBST 329 Digital Caribbean
AFR 333/AMST 333/LEAD 333 Diaspora Seminar
AFR 340 AMST 340/GBST 340 REL 340 Africana Diasporic Religions in the Americas and the Caribbean
AFR 360/PSCI 370/PHIL 360/LEAD 360 The Political Thought of Frantz Fanon
AFR 405 Africana Studies and the Disciplines
AFR 440 Performing Blackness
AFR 476/HIST 476 Black Radicalism
AFR 497 Independent Study: Africana Studies
AFR 498 Independent Study: Africana Studies

Two additional electives (a total of three required for the concentration):
Most electives are included below. However, students should check with the program chair to see if other courses not listed here might count as electives toward the concentration.

HONORS PROGRAM IN AFRICANA STUDIES
A student wishing to earn honors must complete an "Honors Dossier" during the Winter Study term and Spring semester of their Senior Year. This Dossier is comprised of three linked essays. Students may begin the project with the three essays written for Africana Studies courses and consider an experiential learning winter study session. Concentrators are expected to meet with the Chair and/or an Africana core faculty member to plan their concentration.

AFRICANA STUDIES ELECTIVES

AFR 104 Travel Narratives and African History (W) Crosslistings: HIST 104/AFR 104
In a way, all historical thinking and writing deals with travel accounts given that, as many scholars have noted, the past can be likened to a foreign country and the historian can be viewed as a traveler in foreign places. Narratively, we will explore European travel narratives—narratives about the actual physical visits of writers to distant lands—call for careful and critical analysis because they can be seductive, and they can shape the ways we think about the present—and the past—and distant lands and cultures. This course discusses Arab, Indian, European, African and African American travel narratives about various regions of Africa since the 14th century. We will mine the travel accounts for descriptions of local contexts. We will also explore what travel writing says about the author’s perceptions of self, home, and “other.” Ultimately, we will investigate the authors’ biases and how the narratives influence both our perception of Africa and the writing of African history. This course is highly interdisciplinary and draws heavily on literary, anthropological, geographical, and historical methodologies.

Class Format: Seminar
Requirements/Evaluation: evaluation will be based on class participation, oral reports, 1-2 short papers and a research paper
Prerequisites: first-year or sophomore standing; juniors or seniors with permission of instructor
Enrollment Preferences: first-year students, and then sophomores who have not previously taken a 100-level seminar
Enrollment Limit: 15
Expected Class Size: 19
Distributional Requirements:
Division 2
Writing Intensive
Other Attributes:
GBST African Studies Electives
HIST Group A Electives - Africa
Not Offered Academic Year 2017 SEM
AFR 105(F) Materials, Meanings, and Messages in the Arts of Africa (D) Crosslistings: ARTH 104/AFR 105
This course introduces students to the wealth, power, and diversity of expressive forms that have characterized the arts of Africa and its Diaspora from prehistory to the present. Pulling extensively from the collections at the Williams College Museum of Art and other campus resources, students will not only experience firsthand the wide array of objects that have been produced within this vast geography, but will also come to recognize how multiple senses including sight, sound, smell, and touch play a key role in understanding how these objects work within their respective contexts. As tools of political control, social protest, divine manifestation, and spiritual intervention, these objects and their associated performances also challenge what we might typically consider art in the Western tradition and as such these students will be pushed to think beyond such terms in their examinations of these rich creative traditions. This course fulfills EDI requirements through its exploration of the different concepts of art in African and Western traditions, and its focus on renovating historical biases and assumptions about these objects that position them as ‘primitive’ or ‘exotic’ constructs. 

Class Format: lecture
Requirements/Evaluation: three 2-page response papers, class journal, midterm exam and final exam
Prerequisites: none
Enrollment Preferences: lottery
Expected Class Size: 15
Distribution Notes: meets Division 1 requirement if registration is under ARTH; meets Division 2 requirement if registration is under AFR
Distributional Requirements: Division 1
Exploring Diversity

AFR 113 Musics of Africa (D) Crosslistings: MUS 120/AFR 113
This course introduces a selection of musical cultures from the geographical breadth of Africa. Following an introductory exploration of the fundamental aesthetic and social parameters governing African musical practice, we will engage in a series of case studies considering a diverse array of musical practices and related social and political issues. Specific countries include Ghana, Zimbabwe, Ethiopia, Algeria and the Democratic Republic of Congo. This course samples a wide range of musical practices from the Ghanaian dance craze, azonto, to Ethiopian liturgical change, to Shona mbira music in Zimbabwe. Performance analysis and critical reading and listing assignments are combined with a number of hands-on workshops and musical exercises.

Class Format: lecture
Requirements/Evaluation: grade based on two 4- to 6-page papers, two tests, one performance project, a final paper, and class participation
Extra Info: may not be taken on a pass/fail basis
Prerequisites: no prerequisites: prior musical background is not essential for this class
Enrollment Preferences: current or prospective Music majors and Africana Studies concentrators
Enrollment Limit: 30
Expected Class Size: 25
Dept. Notes: MUS World Music/Ethnomusicology
Distribution Notes: meets Division 1 requirement if registration is under MUS; meets Division 2 requirement if registration is under AFR
Distributional Requirements: Division 1

AFR 120(F) Science Fiction of the African Diaspora (D) (W) Crosslistings: ENGL 120/AFR 120

Publishers, authors, academics, and critics often assume that science fiction and fantasy readers are all or mostly white, an assumption driven, perhaps, by the scarcity of black writers inside the genre—the science-fiction-creative-writing classes I teach at Williams, for example, are depressingly undiverse. And for a long time, among academic science-fiction writers, Samuel R. Delany and Octavia Butler represented pretty much the entire deal. The last fifteen years, however, have witnessed the emergence of a number of black science fiction and fantasy authors from the Americas and Africa. In this course we will read a sample of this fiction, paying particular attention to these questions: In what new ways (if any) do these authors use or imply themes of social hierarchy or race? In what ways (if any) do the standard science-fiction devices of imagined futures, interplanetary colonization, or contact with alien life allow black writers to use metaphorical vocabulary to talk about their own experience? In what ways (if any) are they constrained by readers’ expectations, while white writers are not? This is a discussion-based class. Assignments will include a creative writing, imitative or parodic writing, and of course that old stand-by, interpretive essays assigned on texts. We will be reading well-versed classics by Charles Chesnutt, Paulina Hopkins, Amos Tutuila, W.E.B. DuBois, George Schuyler, Delany, and Butler, but also newer works by Pam Noles, Nalo Hopkinson, NK Jemisin, Tananarive Due, Steven Barnes, Nisi Shawl, Sofia Samatar, Kuni Ibara Salaam, and Nnedi Okorafor, among others. This course fulfills the EDI requirement, as it engages questions of power and privilege, and the coded representation of racial or ethnic otherness. Any story that involves the clash of sentient species, for example, or a nostalgic or disruptive reinterpretation of the social hierarchies of the past, partakes implicitly of this coded language.

Class Format: seminar
Requirements/Evaluation: evaluation will be based on substantial, weekly writing assignments of graduated length totaling 20 pages over the course of the semester and active participation in classroom discussion
Extra Info: may not be taken on a pass/fail basis
Prerequisites: none
Enrollment Preferences: first-year students who have not taken or placed out of a 100-level English course
Enrollment Limit: 19
Expected Class Size: 19

AFR 129(F) Twentieth-Century Black Poets (D) (W) Crosslistings: ENGL 129/AFR 129

From Langston Hughes to contemporary poets such as Angela Jackson and Claudia Rankine, African American poets have been preoccupied with the relations of poetry to other traditions. Vernacular speech, English poetry, jazz and other musical forms, folk humor, and African mythology have all been seen as essential sources for black poetry. This course will survey major poets such as Hughes, James Weldon Johnson, Countee Cullen, Robert Hayden, Gwendolyn Brooks, Amin Baraka, Jackson, and Yusef Komunyakaa, reading their poems and their essays and interviews about poetic craft. We will ask how black poetry has been defined and whether there is a single black poetic tradition or several.

Class Format: seminar
Requirements/Evaluation: several short papers, a 15-page final paper
Extra Info: may not be taken on a pass/fail basis
Prerequisites: none

Fall 2016
SEM Section: 01 MWF 11:00 AM 12:15 PM Instructor: David Smith

This introductory seminar investigates the relationship between three major schools of thought in contemporary Africana social and political philosophy, namely the African, Afro-American, and Afro-Caribbean intellectual traditions. We will discuss a range of thinkers including Aimé Césaire, Amin Davis, Édouard Glissant, Lewis R. Gordon, Kwame Gyekye, Paget Henry, bell hooks, Charles W. Mills, Nkiru Nzewu, Lucius Outlaw, Oyèrónke Oyewùmi, Tommie Shelby, and Sylvia Wynter. A primary goal of the course is to provide students with the intellectual resources to decipher problems central to philosophical discourse and to allow students an opportunity to apply what they learn to critical issues in current geopolitics. This seminar is part of the Exploring Diversity initiative, and as such we shall investigate—via these thinkers—discourse and to allow students an opportunity to apply what they learn to critical issues in current geopolitics. This seminar is part of the Exploring Diversity Initiative, and as such we shall investigate—via these thinkers—mentioned—comparative philosophical analyses, critical theorization, and the plurality of global thinking in contemporary social and political philosophy.

Class Format: seminar
Requirements/Evaluation: evaluation will be based on attendance and participation, two 4- to 7-page essays, and one 10-page final paper
Extra Info: not available for the fifth course option
Prerequisites: none; open to all
Enrollment Preferences: first- and second-year students

SEM

AFR 152(F) A Composer's History of Jazz (D) (W)
Crosslistings: MUS 152/AFR 152
This course will provide a chronological survey of jazz composers as focused through the lense of selected compositions, beginning with the pre-jazz era and continuing through the present day. Students will be required to do assigned listening and read related criticism and biographical material. In addition, students will write several responsive papers summarizing these listening and reading experiences. Each student will also write a biographical paper about a composer (or composer/arranger) of her choice, and participate in a collaborative presentation at the end of the semester on a composition or set of compositions from a list of possibilities provided by the instructor. Midterm and final examinations will focus on analytical aural skills developed during the semester, both in terms of formal analysis and composer identification. Composers whose work will be covered may include: Scott Joplin, J. P. Johnson, Jelly Roll Morton, George Gershwin, Fletcher Henderson, Duke Ellington, Mary Lou Williams, Benny Carter, Ernie Wilkins, Quincy Jones, Gil Evans, Frank Foster, John Lewis, Dave Brubeck, Oliver Nelson, Art Tatum, Carlos Jobim, Hermeto Pascoal, Eddie Palmieri, Thad Jones, Thelonious Monk, John Coltrane, Carlos Jobim, Hermeto Pascoal, Eddie Palmieri, Thad Jones, Thelonious Monk, John Coltrane, Charles Mingus, Joc Pastorious, Wayne Shorter, Joe Zawinul, Yusef Lateef, Bill Evans, Maria Schneider, Billy Childs, and others.

Readings will represent the perspectives of musicians, audiences and critics, as well as an examination of who they were and what agendas and prevailing societal attitudes may have shaped their reactions to the music. Comparisons between the experiences of composers and their listeners in different eras will provide additional perspective.

As an EDI offering, the course materials will be designed not only to expose the student to the music, but also to provide an examination of the relationship between jazz composers and the historical and cultural worlds in which they created their Art. Readings will include the perspective of musicians, audiences and critics, as well as an examination of who they were and what agendas and prevailing societal attitudes may have shaped their reactions to the music. Comparisons between the experiences of composers and their listeners in different eras will provide additional perspective.

Class Format: lecture
Requirements/Evaluation: short response papers based on reading and listening, midterm and final exams; and a research paper on the career of a composer of the student's choice
Extra Info: may not be taken on a pass/fail basis
Prerequisites: none
Enrollment Preferences: Music Majors and then Jazz Ensemble members

AFR 156 Thirteen Ways of Looking at Jazz (D) (W)
Crosslistings: AFR 156/COMP 156/AMST 156/ENGL 223
Taking its title from Thirteen Ways of Looking at a Blackbird,* which interprets the blackbird in different ways, this course similarly explores a more complex, multi-layered perspective on jazz, from jazz and American democracy to jazz in visual art. Accordingly, the course introduces students to several genres, including historical documents, cultural criticism, music, literature, film, photography and art. The course does not draw on a musicological method but rather a socio-cultural analysis of the concept, music and its effect—so students are not required to have any prior musical knowledge or ability. In this writing intensive course, students will write and revise short close analyses of multiple types of media, ultimately honing their writing skills on one form of media for a polished, original analysis that weds their increased critical thinking skills. This EDI course explores the musical expressions of the culturally diverse peoples of African descent in the New World, as well as the myriad ways in which representations of jazz signify on institutional power, reaffirm dominant U.S. and/or European hierarchies of race, gender, class, and signal inequality in order to contest it.

Class Format: lecture
Requirements/Evaluation: evaluation will be based upon class participation, 1 quiz, several 2-page response essays, one 3-page essay, one 5-page essay, one oral presentation/performance with 3-page critical report, totaling approximately 20 pages of work
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

AFR 164(S) Slavery in the United States (W)
Crosslistings: HIST 164/AFR 164/AMST 165
Slavery and Freedom rose as concomitant ideologies—simultaneously and interrelat-ed—critical to the development of the American colonies and United States. Few areas of American social, political, and economic history have been more active and exciting in recent years than the study of this relationship. This seminar introduces students to the most important aspects of American slavery, beginning with an examination of the international slave trade and focuses the development of the "peculiar institution" to its demise with the Civil War.

Class Format: seminar
Requirements/Evaluation: building on several preliminary essays, each student will complete a research project which leads to a final research paper
Extra Info: in addition to reading key books in the field, students will engage in primary source research using the College library's extensive holdings of microfilm and local records dealing with slavery
Prerequisites: first-year or sophomore standing; juniors or seniors with permission of instructor
Enrollment Preferences: first-year students, and then sophomores who have not previously taken a 100-level seminar
Enrollment Limit: 15-19

AFR 166(S) Politics and Prose: Invisible Man in Historical Context (D) (W)
Crosslistings: HIST 166/AFR 166/AMST 166
"I am an invisible man." So begins Ralph Ellison's treatise on black life in the U.S. in the middle of the 20th century. Ellison's Invisible Man appeared in 1952, won the National Book Award, and secured a prominent place in the canons of both American and African American arts and letters. Often studied for its literary crafting and for the ways it echoes the work of classic American writers, Invisible Man iterates the black past as it affects its protagonist. This course brings readings in black sociology, anthropology, law, literature, political science, education, folk-life, and music to bear on its examination of the novel and its historical themes, including debates among black ideologues and leaders; links between culture and protest; processes of black migration, urbanization, and community development.

Class Format: seminar
Requirements/Evaluation: class participation and 5 papers
Extra Info: may not be taken on a pass/fail basis

AFR 167 Let Freedom Ring? African Americans and Emancipation (W)
Crosslistings: HIST 167/AMST 167
This course will examine African Americans' transition from slavery to freedom. In the years that encompassed the Civil War and immediately after, most African Americans changed from being legal property, able to be bought, sold, mortgaged, rented out, and leveraged into U.S. citizens, with the Constitutional right to vote. This course examines this transition. How did it come about? To what extent were African Americans able to exercise their rights that the constitution guaranteed? How did Emancipation shape African American family relations, culture and democracy? This is a research seminar. We will examine work of historians and discuss the contradictions and nuances of emancipation. Readings will include monographs, scholarly articles and heavy dose of primary sources, as much as possible written by African Americans themselves. Assignments include an original research paper on an aspect of Emancipation. We will devote considerable time throughout the semester to finding primary and secondary sources and on the writing process.

Class Format: seminar
Requirements/Evaluation: research paper, short writing assignments, class participation
Prerequisites: first-year or sophomore standing; juniors or seniors with permission of instructor
Enrollment Preferences: first-year students, and then sophomores who have not previously taken a 100-level seminar

AFR 193 Black Power Abroad: Decolonization in Africa, the Caribbean and Europe (D) (W)
Crosslistings: AFR 193/HIST 193

Obama’s recent successful bid for the Presidency has reminded Americans of the strong links between African-Americans and Africans of the international dimensions of the struggle for racial justice. This struggle has its roots in the post-World War II transformation of the world associated with the decolonization struggles led by individuals like C.L.R. James, Aimé Césaire, Kwame Nkrumah, Franz Fanon and Nelson Mandela. This course will examine this movement, focusing on activists in the Caribbean and Africa, the new ideas and cultural movements they inspired (Pan-Africanism, Negritude, and Socialism), their organizational activities in London and Paris, and their success in breaking free of European imperialism only to be confronted with American and Russian Cold War rivalry. By comparing and contrasting different experiences of independence—in the Caribbeanin independent Ghana, and in anti-apartheid South Africa—this course will grapple with the ways in which racism, political power, and cultural difference affected relations between Blacks, mulattoes, whites, and Indians in these countries as they fought for independence. The comparative and transatlantic scope of this course, combined with its focus on race relations, power, and privilege helps it meet the requirements of the Exploring Diversity Initiative.

Class Format: discussion

Requirements/Evaluation: evaluation will be based on class participation, oral reports, 1 short paper, and a 10- to 12-page research paper
Prerequisites: first-year or sophomore standing; juniors or seniors with permission of instructor

AFR 200(F,S) Introduction to Africana Studies

This course introduces students to the content and contours of Africana Studies as a vibrant field of knowledge. Through exploration of the genealogy, disciplinary diversity, and evolution of the field, we will examine the depth and range of experiences of African-descended peoples throughout the Americas, the Caribbean, Europe, and Africa. We will also give some attention to how members of the Diaspora remember and encounter Africa, as well as their diverse responses to the history of enslavement, colonization, apartheid, racism, and globalization. Through materials that embrace both historical and contemporary perspectives, we seek to help students develop critical frameworks for understanding African diasporic experience while simultaneously illuminating disjunctures and challenges for the field. This course features two pedagogical strategies: 1) a rotational, interdisciplinary approach that includes the expertise, methods, and specializations of African faculty; and 2) the incorporation of aesthetic materials—film, photography, music, dance, performance, and artwork—to enhance student ability to draw ongoing connections between visual and textual sources covered in the course. Close textual analysis, vibrant debate, and engaging discourse are expected.

Class Format: lecture/discussion

AFR 201(F) African Dance and Percussion
Crosslistings: DANC 201/AFR 201/MUS 220

This course focuses on selected dance and music forms from the African continent for example, Kpanlogo from Ghana, Lamban from Guinea, Senegal and Mali or Bira from Zimbabwe. We will examine their origins (people, history and cultures) and influence beyond geographic perimeter to more fully understand the function of these forms in contemporary times. Students will study movement and percussion and are evaluated on the quality of progress with the selected forms throughout the semester. Forms may not be the same every semester.

This course can be taken for academic and/or PE credit

Class Format: studio/lecture/discussion

Requirements/Evaluation: participation in assignments that include research and performance projects and short papers; students enrolled for PE credit only are not required to do short paper or research assignments; all students must participate in all performance projects

Prerequisites: DANC 100 or permission of instructor
Enrollment Preferences: students who have taken Dance 100 or advanced placement

Enrollment Limit: 25

AFR 202 Public Speaking: Traditions and Practice
Crosslistings: AFR 202/THEA 209

Effective oral communication skills are necessary for any student, regardless of major or area of concentration. This course is designed to give students an introduction into the fundamentals of oral communication. We will discuss the critical role of both speakers and listeners within the transactional process of communication. Together we will explore African American oratorical traditions through viewing, listening to, and reading speeches from notable figures such as F. Douglass, Fannie Lou Hamer, Martin Luther King, Jr. and many others.

With an emphasis placed on Aristotelian and African American rhetorical methods of persuasion, evidence-based research, and organization, students will gain a better understanding of what it means to be an ethical and responsible communicator. Students will give three formal speech presentations with a focus on informative and persuasive elements. Through discussions, lectures, activities, readings, and speech presentations, students will develop meaningful skills to effectively communicate in the public setting.

Class Format: seminar

AFR 203(F) Modern African History (D)
Crosslistings: HIST 203/AFR 203

This course surveys the history of 19th and 20th century Africa. The first section of the course focuses on the European conquest of Africa and the dynamics of colonial rule—especially its socio-economic and cultural consequences. The second section looks at how the rising tide of African nationalism, in the form of labor strikes and guerrilla wars, ushered out colonialism. The third section examines the postcolonial states, focusing on the politics of development, recent civil wars in countries like Rwanda and Liberia, and the growing AIDS epidemics. The last section surveys the history of Apartheid in South Africa up to 1994. Course materials include fiction, poetry, memoirs, videos, newspaper articles, and outstanding recent scholarship. The course is structured around discussions. This EDI course explores the experiences and expressions of the culturally diverse peoples of Africa in the New World (and the Old), as well as the myriad ways in which they confront, negotiate, and at times challenge dominant U.S. and/or European hierarchies of race, culture, gender and class.

AFR 211(S) Race and the Environment (D)
Crosslistings: AFR 211/ENVI 211/SOC 211/AMST 211
In contemporary societies, race remains an enduring impediment to the achievement of equality. Generally understood as a socially meaningful way of classifying human bodies hierarchically, race manifests itself in a number of areas, including personal experience, economic production and distribution, and political organization. In this course, we will explore how race emerges in local and global environmental issues, like pollution and climate change. We will begin with a review of some of the landmark texts in Environmental Studies that address "environmental racism," like Robert Bullard's *Dying of the Light* (1987), and Henrietta Lacks, the African American woman from whom the immortal cell line (HeLa) used for medical research derives. This tutorial will plotting industrial sites. After outlining some of the core issues raised in this tutorial, we will turn to cultural productions—like literature, film, and music—to understand how people of color respond to environmental injustice and imagine the natural world.

Class Format: lecture/discussion
Requirements/Evaluation: evaluation will be based on class participation, 2-3 short papers (5-7 pages), and a self-scheduled final

LEC Section: 01 TR 09:55 AM 11:10 AM Instructor: James Manigault-Bryant

AFR 212 Jazz Theory and Improvisation I
Crosslistings: MUS 104/AFR 212
The theory and application of basic techniques in jazz improvisation and performance styles, including blues forms, swing, bebop, modal based composition, Afro-Cuban, etc. Appropriate for students with skill on their instrument and some basic theoretical knowledge. Knowledge of all key signatures, major/minor keys and modes, intervals, triads and basic seventh chords and their functions within keys. Students should be able to play and demonstrate these concepts on their instruments—competence on an instrument is essential (vocalists and drummers will be encouraged to study the piano). Pianists and guitarists should be able to sight read chords on a jazz lead sheet.

Class Format: alternates between lecture style exposition of theoretical topics and a master class where students will perform and be evaluated on assigned repertoire.
Requirements/Evaluation: evaluation will be based on weekly assignments, (e.g., harmonic analysis and exercises in transcription and transcription), a midterm, a transcription project and the end of semester concert, as well as improvement as measured in weekly class performance.

Extra Info: may not be taken on a pass/fail basis

this course will have aural skills labs with MUS 104a; students considering taking this course should consult the lab times shown below and plan their schedules accordingly.

Prerequisites: MUS 103 and/or permission of instructor; musical literacy required as per above description; private study on student's individual instruction strongly encouraged
Enrollment Preferences: prospective Music majors, then Jazz Ensemble members, then Music majors

AFR 213 Race, Gender, and the Alien Body: Octavia Butler's Science Fiction (W)
Crosslistings: AFR 213/WGSS 213
Science fiction is a genre well known for its ability to envision new realities, and Octavia E. Butler (1947-2006) is among the most highly regarded science fiction writers. Butler's uncanny ability to imagine the future to merge those ruminations with her experiences as an African American woman provide powerful commentary on—and often disrupt—modern understandings of identity and embodiment. We will explore questions such as: What role does 'gender' play in Butler's fiction? How does Butler's treatment of the 'alien' cause us to reconsider what it means to be human? How does Butler incorporate 'race' and the concept of 'other' into her fiction, and how do these techniques help us situate contemporary discussions of a post-race society?

We will examine the relationship between Butler's visions for the future and what her narratives of future worlds invariably suggest about the present. We will read key texts including the best-selling text *Kindred* (1979), the haunting dystopian novel *Parable of the Sower* (1994), the popular vampire text *Fledgling* (2005), and the collection *Bloodchild* and *Other Stories* (1996). We will also explore contemporary engagement with Butler's work including the relationship between the main character from her book *Dawn* (1987), and Henrietta Lacks, the African American woman from whom the immortal cell line (HeLa) used for medical research derives. This tutorial will engage Octavia Butler's work broadly, and with particular attention to how the concepts 'race', 'gender', 'alien' and 'body' are interrogated in her writings.

Class Format: tutorial
Requirements/Evaluation: attendance, paired weekly reflection/response papers, a 5- to 7-page creative writing assignment, and a final essay of 10 pages
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: none
Enrollment Preferences: students with interests and/or prior coursework in Africana Studies and Women's, Gender, and Sexuality Studies
Expected Class Size: 10

AFR 214 Jazz Theory and Improvisation II
Crosslistings: MUS 204/AFR 214
A continuation of Music 203, this course builds upon theoretical knowledge, performance and aural skills developed previously. Students will deal with more complex theoretical and performance issues, such as modal interchange and minor key harmony, use of symmetric scales, commonly-used...
reharmonizations of the blues and "I Got Rhythm" chord progressions, and Coltrane's "Three Tonic" harmonic system.

Class Format: the format is two weekly meetings, alternating between theory and performance sessions, and including a final recital.

Requirements/Evaluation: two transcription projects and two original compositions, as well as a midterm and final exams, and participation in a recital at the end of the semester.

Prerequisites: MUS 203 or permission of instructor.

Enrollment Preferences: Music majors and Jazz Ensemble members.

Enrollment Limit: 12

Expected Class Size: 5-8

Distribution Notes: meets Division 1 requirement if registration is under MUS; meets Division 2 requirement if registration is under AFR

AFR 217 Race(ing) Sports: Issues, Themes and Representations of Black Athletes

Crosslistings: AFR 217/AMST 217/SOC 217/ENGL 215

Althea Gibson to the Williams Sisters. Julius (Dr. J) Irving to Michael Jordan. Jesse Owens to Tommie Smith and John Carlos. Throughout the 20th century, black athletes have broken through Jim Crow restraint, challenged racial stereotypes, and taken their sport to new heights of achievement. In this course, students will explore a range of black athletes in the 20th century, paying particular attention to the attitudes, stereotypes and experiences they endured. In addition, this course will prompt students to analyze the representation, perception, and commodification of black athletes in popular media forms. Students will trace trends, shifts and themes in representations of blackness across different sports and historical periods. Topics under study may include resistance against and affirmation of athletes as role models, racial slurs in sports broadcasting, common themes in commercialized images of the black male athlete, and distinctions in media coverage based on race and gender. Texts will include everything from critical essays and sociological studies to commercials and documentary films. In their final projects, students may put their newfound knowledge to the test by exploring their campus or hometown to investigate the role that race plays on their own playing field.

Class Format: lecture/discussion

Requirements/Evaluation: evaluation will be based upon class participation, short weekly reading and/or listening assignments, one 5-page paper, final group project.

Prerequisites: none; open to all

Enrollment Limit: 25

Expected Class Size: 20

Distribution Notes: meets Division 1 requirement if registration is under ENGL; meets Division 2 requirement if registration is under AFR, AMST or SOC

AFR 220(S) Introduction to African American Literature (W)

Crosslistings: ENGL 220/AMST 220/AFR 220

What does it mean, socially, culturally, historically, personally, and spiritually, to be African American? No single, simple answer suffices, but African American literature as a genre is defined by its ongoing engagement with this complex question. This course will examine a series of texts that in various ways epitomize the fraught literary grappling with the entailments of American blackness.

Readings will include texts by Frederick Douglass, Booker T. Washington, Zora Neale Hurston, Langston Hughes, Richard Wright, Ralph Ellison, Amiri Baraka, Toni Morrison, and Ishmael Reed.

Class Format: seminar

Requirements/Evaluation: writing assignments for the course will total 20 pages, distributed over 4 papers.

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option.

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Language exam, or a score of 6 or 7 on the Higher Level IB English exam, or permission of instructor.

Enrollment Preferences: first- and second-year students and English majors who have yet to take a Gateway course.

AFR 221(S) Giving God a Backbeat: Rap Music, Religion & Spirituality

Crosslistings: AFR 221/REL 263

On the surface, religion and rap music may seem as if they have little in common. Yet, like other Black musical traditions such as spirituals or the blues, rap is rooted in African American religious traditions. In this course, we will explore the ways in which rap music intersects with the sacred and secular worlds. Through an examination of Black religious traditions, lyrics, music videos, and digital media, we will unearth what Anthony Pinn calls the "spiritual and religious sensibilities" of rap music. Grounded in culture-centered criticism, we will investigate the rhetoric of rap and religion through the theoretical ideas of Black Liberation Theology and hip-hop feminism.

Class Format: seminar

Requirements/Evaluation: students will be evaluated on their class participation, response papers, quizzes, and a final class group project.

Prerequisites: none

Enrollment Limit: 25

AFR 223 Politics of Performance/Performing Politics in Contemporary Africa (D) (W)

Crosslistings: MUS 222/AFR 223

Using select examples from throughout Africa, this course highlights genres, artists, and works that engage with social and ideological change. Students will explore critical listening and performance analysis, while also considering the social contexts that render these performances meaningful and provocative. Topics include: challenges to mass mediated stereotypes of African populations, the social and economic impact of cultural tourism, music as a form of social critique, changing attitudes toward women and the LGBTQ community, music and global aid organizations, issues of migration and displacement, and the changing roles of traditional musical occupations. Popular genres—among them Afrobeat, kwaito, soukous, rai, mbalax, Churngurenga music, and a variety of rap and hip-hop styles—are discussed alongside numerous traditional and ceremonial genres, national/political anthems, and concert pieces. Active participation in class discussion is an important component of this course.

Class Format: lecture/discussion

Requirements/Evaluation: based on in-class preparation and participation, bi-weekly short writing assignments, a midterm paper and a final project.

Extra Info: may not be taken on a pass/fail basis

Prerequisites: none

Enrollment Preferences: sophomores, juniors, or seniors who are current or prospective Music majors, as well as current and prospective Africana Studies and Latina/o Studies concentrators.

Enrollment Limit: 15

AFR 225(S) Musics of the Caribbean (D)

Crosslistings: MUS 225/AFR 225

From witty and politically charged calypso to soulful bachatahs, from folkloric displays that advertise a country’s cultural diversity to ritual performances that facilitate communication with the spirit world, the music of the Caribbean is astonishingly diverse, both sonically and in its social application. This course serves as an introduction to a wide spectrum of Caribbean music in its broader social and historical context. Through engaging with audio and video source materials, readings, performance exercises and workshops, students will learn to identify distinguishing features associated with particular countries and regions, while also exploring the sounds and musical structures that are shared between them. Featured genres include reggae, steel pan, calypso, zouk, Maroon music from Suriname and Jam, soca and chutney, salsas, merengue and jumbie from Haitian Vodu and Cuban Santeria religions. Interlaced with discussion of musical genres and innovative musicians are a number of central questions about the social role of music within the region: How has slavery and colonial enterprise shaped the musical landscape of the Caribbean? How do the realms of sacred and secular performance relate to each other? What role does tourism and global circulation play in influencing musical tastes and practices? Finally, how do music and dance interconnect? This course satisfies the EDI requirement, with a particular focus on the comparative study...
of cultures and societies and critical engagement with issues of power and privilege.

**Class Format:** lecture

**AFR 227(S) Introduction to Post Colonial Studies (D) (W)**

Crosslistings: ENGL 227/COMP 287/AFR 227

This course asks: What does the term "postcolonialism" mean? Is it a historical notion or an ideological term? When exactly does the 'postcolonial' begin? What are the theoretical and political implications of using such an umbrella term to designate the ensemble of writings and artworks by those subjects whose identities and histories have been shaped by the colonial encounter? We will situate the "postcolonial" historically, aesthetically, and conceptually across multiple time periods, geographic regions. We will read such authors as Rudyard Kipling, Salman Rushdie, Tsitsi Dangaremba, Chinua Achebe, and Jamaica Kincaid and work with such theorists as Frantz Fanon, Edward Said, Stuart Hall, Homi Bhabha, and Gayatri Spivak. The course will contribute to the College's Exploring Diversity Initiative by examining cultural difference and distributions of power across the world during the colonial, postcolonial, and globalized eras.

**Class Format:** seminar

**Requirements/Evaluation:** evaluation through participation in discussion and a class blog, and approximately 20 pages of writing distributed over four papers

**AFR 229 European Imperialism and Decolonization (D)**

Crosslistings: HIST 229/AFR 229

This course surveys European imperialism in the nineteenth and early-twentieth centuries, paying special attention to important case studies such as British India, the Scramble for Africa, and the break-up of the Ottoman Empire following World War I. Issues to be explored include imperialism and its relationship to Christianity, gender, racism, and economic profit. In the second half of the course, we will examine some of the most dramatic cases of decolonization, including Gandhi and Nehru’s independence movement in India, Ho Chi Minh’s victory at Dien Bien Phu, and the torturous struggle for independence in Lumumba’s Congo. As a transatlantic and transpacific course focusing on race relations, power and privilege, this course fulfills the EDI requirement.

**Class Format:** lecture/discussion

**Requirements/Evaluation:** evaluation will be based on a midterm, a final exam, a 10-page research paper, and class participation

**AFR 238 Gender, Sexuality, and Global HIV/AIDS (D)**

Crosslistings: WGS 230/AFR 230

The global pandemic of HIV/AIDS is now entering into its fourth decade. Throughout this history sexuality, gender and race and inequality have played a central role in the spread of the virus, and its apparent entrenchment in certain communities. This class will use a gendered, interdisciplinary perspective to investigate the pandemic's social, economic and political causes, impact, and conundrums—the problems it poses for scholarship, activism, public policy, and public health. Issues discussed will include the role of transaction sex and economic structures in both susceptibility to HIV and vulnerability to its impact; stigma and its challenges for HIV prevention, testing and treatment uptake; the role of positive youth in the next stages of the pandemic; and the evolving expressions of biopower in the global AIDS response. The class will look at examples of successful policies and activism as well as the failures, corruption and complacency that have characterized the global pandemic. There will be a particular geographical focus on experiences in the U.S. and sub-Saharan Africa. The class is an EDI course because of its focus on diversity and difference, as they shape the different ways that the HI virus plays out on the bodies of people in different global locations, and its discussion of the ways that global and local contexts of colonialism, patriarchy, and heteronormativity have inevitably shaped relationships between policy makers, researchers, activists, and those living with HIV and ultimately the content of their policies and interventions.

**Class Format:** seminar

**Requirements/Evaluation:** two short papers and a research paper; class participation will form part of the grade

**AFR 237 Islam in the United States: From Black Muslims to the War on Terror (D)**

Crosslistings: REL 237/AMST 237/AFR 237

Malcolm X is likely the most prominent and influential Muslim figure in the history of the United States. His fundamental themes in the history of Islam in America: conflict between Muslims over what is "authentic" or "orthodox" Islam; and the ways that American history, politics, and culture determine the contours of "American Islam". This course will explore these two themes through an array of topics in the history of American Islam. In so doing, we will examine the complex relation between religion, politics, and culture in the United States. Beginning with the story of Malcolm X, the Nation of Islam, and other African-American Muslim movements, we will try to understand: What made Islam so appealing to millions of African-Americans throughout the 20th century? And were these genuinely "religious" and "Islamic" movements, or just racial/political "black nationalist" movements in the guise of religion? What counts as legitimately "Islamic", and who gets to decide? We will then move into the latter half of the 20th century and the post-9/11 debates over authentic Islam. What happened to American Muslim communities and organizations after the waves of post-1965 immigration from Muslim countries? How have debates about Muslim identity shifted over time, from being configured in terms of black separatism, to transnational/diasporic identity, to the attempts at articulating an indigenous "American-Muslim" identity? How do national narratives around 9/11 and the "War on Terror" impacted these debates over identity, and "true Islam"? And how have these debates intersected with gender, racial, and ethnic politics?

Throughout the course, we will be studying historical and anthropological material, autobiographies, novels, documentaries, films, and social media. The course offers critical thinking about diversity by challenging assumptions of who Muslims are, what being American means, and what Islam is. It also focuses on the complex interaction of different dimensions of diversity, from religion to race, ethnicity, nationality, culture, gender, language, and age.

**AFR 240 Introduction to the Music of Duke Ellington**

Crosslistings: MUS 251/AFR 240

---

**Not Offered Academic Year 2017**
This course will survey the career and compositional style of Edward Kennedy "Duke" Ellington (1899-1974). Students will learn to listen to and analyze his music, examining the career of an Ellingtonian, as well as development of aural analysis skills, in terms of form, style, orchestration, and the ability to identify the individual sounds of key Ellingtonian soloists. Ellington's importance as a key figure in American cultural history, and relationships between his music and parallel stylistic developments and influences from both within and outside of the jazz tradition will be discussed.

Class Format: lecture
Requirements/Evaluation: weekly listening and reading assignments, one biographical paper examining the career of an Ellingtonian, as well as participation in a group presentation to the class and exams on one of Ellington's extended works; mid-term and final exams will also be given
Extra Info: may not be taken on a pass/fail basis
Prerequisites: ability to read music notation
Enrollment Preferences: Jazz ensemble members and Music majors
Enrollment Limit: 19

AFR 242(F) Introduction to the Music of John Coltrane
Crosslistings: MUS 252/AFR 242

This course offers the serious music student an opportunity to study the unique body of work produced by saxophonist and composer John Coltrane (1926-1967). The course traces the evolution of Coltrane’s compositional and performance styles in the context of the musical and cultural environment in which they developed. Emphasis placed on Coltrane’s musical style, representing a unique synthesis of influences, including jazz, world, and European Classical music and spirituality. Substantial reading assignments, including a biography and related criticism, as well as detailed score analysis and study, are required.

Class Format: lecture
Requirements/Evaluation: evaluation based on in-class participation and preparation, quizzes on assigned readings, midterm, final examinations and a final paper
Extra Info: evaluation partially based on participation in an in-class group analysis presentation, and a final paper involving musical analysis of a Coltrane composition or recorded performance
Prerequisites: MUS 103 and/or 203 strongly recommended; musical literacy sufficient to deal with the material and/or permission of instructor
Enrollment Preferences: musically literate students and Music majors

AFR 256(S) Politics of Africa
Crosslistings: PSCI 243/AFR 256

This course provides an introduction to the politics of contemporary Africa, emphasizing the diversity of African politics. It seeks to challenge the widespread image of African politics as universally and inexplicably lawless, violent, and anarchic. We begin by examining the colonization of Africa, nationalist movements, and patterns of rule in the first 30 years of independence. From there, we analyze the causes, achievements and limitations of the recent wave of political liberalization across Africa. We then consider patterns of economic development in Africa. Finally, we examine China’s growing expansion into Africa and ask whether this is a new colonialism.

Class Format: lecture/discussion
Requirements/Evaluation: class discussion, four short papers and final exam
Prerequisites: none
Enrollment Preferences: sophomores, Political Science majors and Africana Studies concentrators
Enrollment Limit: 35
Expected Class Size: 30

AFR 257(F) Social Justice Traditions: 1960s to #BLM
Crosslistings: AMST 256/AFR 257

We live in a time of renewed social justice activism, as people from all walks of life confront economic inequality, police violence, discrimination against transgender individuals, and other forms of oppression. This course is designed to clarify where recent initiatives like Black Lives Matter and Occupy Wall Street came from, and to evaluate how they might shape American life in the near future. Movements have histories, as today’s activists draw on the “freedom dreams,” tactics, and styles of rhetoric crafted by their predecessors, while making use of new technologies, such as Twitter, and evolving understandings of “justice.” Taking a historical approach, we will begin by studying the civil rights, Black Power, anti-war, counter-culture, and feminist initiatives of the 1960s. We will then explore how progressive and radical activists adjusted their theories and strategies as the country became more conservative in the 1970s and 1980s. Making use of movement documents, documentary films, and scholarly accounts, we will study the development of LGBTQ, ecological, and economic justice initiatives up to the present day. Throughout, we will seek to understand how movements in the United States are shaped by global events and how activists balance their political work with other desires and commitments.

Class Format: seminar
Requirements/Evaluation: attendance and class participation; four page reading response papers; discussion of films via GLOW forums; and a final 7-8 page analytical essay
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Enrollment Preferences: first years, sophomores, and American Studies majors
Enrollment Limit: 35
Expected Class Size: 25
Distributional Requirements:
Division 2
Other Attributes:
AFR 258 The Rhetoric(s) of Black Religious Traditions
Crosslistings: AFR 258/REL 258
This course will introduce students to the rich religious expressions of Black Americans through their rhetorical traditions. We will begin with a survey of rhetorical productions like sermons, music, and other forms of public address in the historical literatures on Black religions. Our review will yield some of the primary themes of Black religious experiences—the injustices of modern racism, the significance of liberation, and continued meaning of Africa as a homeland. We will then investigate how secular processes like commodification alter rhetorical practices.
Class Format: lecture
Requirements/Evaluation: evaluation in this course will be based upon class participation, response papers, one 8-page paper, and a formal group presentation

AFR 259(S) Bilad al-Sudan and Beyond: Arts of the Afro-Islamic World (D)
Crosslistings: ARTH 259/AFR 259/ARAB 259
From the Swahili stone houses of East Africa to the massive earth and timber mosques of the Sahel, the story of Islam in Africa is one of cultural and spiritual hybridity expressed through material form. In this course, students will explore how artistic forms and traditions in Africa have functioned as vehicles of access and integration for Islam, enabling it to assimilate itself with numerous African contexts towards becoming the dominant religious force on the continent. In addition, students will investigate how the forms, functions, and meaning of Afro-Islamic objects across the continent reflect not just one African Islam, but many different iterations, each shaped by the specific frameworks of its cultural context. The contemporary component of the course will examine how modernity in the form of globalization, technology, and Westernization has affected Afro-Islamic artistic traditions, and how these shifts reflect larger evolutions within understandings of Islam in Africa in the contemporary period. This course fulfills EDI requirements through its exploration of the cross-cultural strategies used by Islam to interact with, respond to, and manifest itself within established African expressive traditions.
Class Format: lecture
Requirements/Evaluation: three reading response papers (2 pages each), class journal, a mid-term exam, and a final exam
Prerequisites: none, although an introductory course in art history or Islamic studies would be useful
Enrollment Preferences: if the course is oversubscribed, preference will be given to students who have declared a major in Art History or Africana Studies
Enrollment Limit: 25

AFR 267(F) "Ain't I a Woman?": An Introduction to Black Women's Writing in America (D) (W)
Crosslistings: ENGL 267/WGSS 267/AFR 267/AMST 267
This Gateway course offers a survey of African American women's writing from the nineteenth century to the present day with an equal emphasis on primary literary texts and feminist criticism. We will trace the development of a black woman/feminist tradition across various genres and disciplines, beginning with the work of abolitionists such as Frances Ellen Watkins Harper and Sojourner Truth and working our way through key texts of the Harlem Renaissance, the civil rights movement, and post-60s Black Feminist writing. Our discussions will focus on the black feminist tradition's engagement with race, gender, class, and sexuality as intersecting axes of difference. Writers that we will read include: Zora Neale Hurston, Toni Morrison, Suzan-Lori Parks, bell hooks, Audre Lorde, Hortense Spillers, Kimberlé Williams Crenshaw. This course fulfills the EDI requirement by examining the intersection of different minoritizing processes in the experiences and writing of African American women in the US.
Class Format: seminar
Requirements/Evaluation: 3 short response papers (approx. 4 pages each) and one final 7-8-page paper; in-class presentations, participation in class discussions
Extra Info: may not be taken on a pass/fail basis
Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam
Enrollment Preferences: sophomores and first-year students who have not yet taken an ENGL Gateway course
Enrollment Limit: 19
Expected Class Size: 19
Distribution Notes: meets Division 1 requirement if registration is under ENGL; meets Division 2 requirement if registration is under AFR, AMST or WGSS

AFR 276(S) African American Law, Race, and Narrative (D) (W)
Crosslistings: ENGL 268/AFR 268/AMST 268
This course examines how American and African American writers engaged with legal definitions of race, personhood, and citizenship in the nineteenth and twentieth centuries. The key junctures in the formation of these narratives were the Declaration of Independence, the Fugitive Slave Act, Dred Scott v. Sandford in the ante-bellum period, Ferguson v Plessy in the late nineteenth century and Brown v Board of Education in the mid-twentieth century. Authors we will read include: Frederick Douglass, Herman Melville, Martin Delany, Mark Twain, Charles Chesnutt, Jean Toomer, Bebe Moore Campbell, Ntozake Shange, and Natasha Tretheway. As a course that focuses on the legal and literary constructions of race in the US, this course fulfills the EDI requirement.

AFR 280 African American History: An Introduction (D)
Crosslistings: HIST 280/AFR 280
This course provides a survey of African American History from the earliest importation of Africans to North America through the present day. Our readings and discussions will take up the development, expansion, and organization of slavery, the coming and meaning of freedom, and the political and cultural landscapes of African Americans over time. We will discuss slavery, freedom, civil rights, and racial ideologies. Finally, we will examine the post Civil Rights era, the changing meaning of the designation “African American” in light of global migrations, and African American political
power in the 21st century. Our readings, which will include both primary and secondary sources, will help us to interrogate American history and gain an understanding and overview of African American history. The course will be primarily discussion based. Given its focus on the workings of racial ideology and the development of slavery and other forms of unfree labor in the U.S. economic system, this course fulfills the criteria of the Exploring Diversity Initiative.

Class Format: lecture/discussion
Requirements/Evaluation: evaluation will be based on three short papers, a take-home final exam, and performance in in-class discussions and assignments
Prerequisites: none; open to all
Enrollment Limit: 40
Expected Class Size: 20-30
Distributional Requirements: Division 2

AFR 281(F) African-American History, 1619-1865 (D)
Crosslistings: HIST 281/AFR 281
This course provides an introduction to the history of African Americans in United States during the colonial, early republic, and antebellum eras. The course demonstrates how economically, culturally, and politically, African Americans shaped and were shaped by the historical landscape of the nation. The experience of enslavement necessarily dominates this history, and it is the contours and nuances of slavery—and the development of racial classifications—that give this course its focus. But with a attention centered on African Americans, the course also explores African cultural influences, the significance of gender, the lives of free blacks, and the cultural and intellectual significance of the abolitionist movement. The course closes on the themes of the transition from the war between the states, and on the meaning of freedom and emancipation. Our readings will include primary sources and secondary literature. Class meetings will combine lecture and discussion. Informed participation in class discussion is essential. This EDI course explores the experiences and expressions of the culturally diverse peoples of African descent in the New World (and the Old), as well as the myriad ways in which they confront, negotiate, and at times challenge dominant U.S. and/or European hierarchies of race, culture, gender and class.

Class Format: lecture/discussion
Requirements/Evaluation: evaluation will be based on short papers, a midterm exam, a final exam, brief in-class writing assignments, and class participation
Prerequisites: none
Enrollment Limit: 40
Expected Class Size: 20-25

AFR 282 African-American History From Reconstruction to the Present (D)
Crosslistings: HIST 282/AFR 282
This course introduces students to the significant issues that shaped African-Americans' historical experiences from Reconstruction to the end of the twentieth century: the changing meanings of freedom, equality, and rights; the intersections of ideology and activism; the links among local, regional, and national organizations; the political culture of black institutional and organizational life; the struggle against Jim Crow and for human and civil rights; migration and urbanization; and resistance and protest. This course is great for those interested in contemporary African-American poetry. It will introduce you to a wide range of voices and perspectives, and encourage you to think critically about the role of poetry in culture and society.

Class Format: lecture/discussion
Requirements/Evaluation: evaluation will be based on class participation, three papers
Prerequisites: none; open to all

AFR 299 Rastafari: Dread, Politics, Agency
Crosslistings: AFR 299/PSCI 233/REL 261
The emergence of Rastafari in the twentieth century marked a distinct phase in the theory and practice of political agency. From its heretical roots in Jamaica, Garveyism, Ethiopianism, and Pan-Africanism, Rastafari has evolved from a Caribbean theological movement to an international political actor. This course investigates the political theory of Rastafari in order to develop intellectual resources for theorizing the concept of agency in contemporary Africana thought and political theory. We will analyze texts and audio-visual works on the political economy of late colonial Jamaica, core Rastafari thinking, political theology, the role of reggae music, the notion of agency, and the influence of Rastafari on global politics.

Class Format: lecture/discussion
Requirements/Evaluation: attendance and participation, weekly reading response papers, two short essays, and a group lyric and politics final project
Extra Info: may not be taken on a pass/fail basis
Prerequisites: none; open to all

AFR 300 Lessons of 'The Game': The Wire and African American Culture
Crosslistings: AFR 300/AMST 300/SOC 306
The critically acclaimed television program, The Wire, ran for five seasons on Home Box Office (HBO) between 2002 and 2008. Set in “inner city” Baltimore, the program addressed a wide array of topics, including, but not limited to, the urban drug trade, the war on drugs, government, local city politics, labor unions, education, and the newspaper industry. Though a work of “fiction,” sociologist William Julius Wilson has called the show an important and instructive portrayal of the “deep inequality in inner-city America.” By contrast, some scholars and critics have decried the emergence of The Wire and indeed, courses like this one, as examples of mainstream America’s fascination with and acceptance of African American drug use, criminal tendencies, and corruption. In this course, we will not deconstruct The Wire per se, but use select episodes from the series to explore key issues in Africana Studies, ranging from political geography to a history of Baltimore and the “War on Drugs.” Students should have some familiarity with the show.

AFR 301 Experimental African American Poetry
Crosslistings: AMST 307/COMP 311/AFR 301/ENGL 327
Contemporary African American poets in various cities and towns across the nation—from New York City to Los Angeles, from Berkeley to Durham, N.C.—are currently producing a vibrant and thriving body of formally experimental work, yet this poetry is largely unknown to readers both within and outside the academy. This formally innovative poetry defamiliarizes what we normally expect of “black writing” and pushes us to question our assumptions and presuppositions about black identity, “identity politics,” the avant-garde (for example, is it implicitly raced?), formalism, socially “relevant” writing, the (false) dichotomy of form versus content, the black “community,” digital poetic, and other issues of race and aesthetics. We will examine the writings of living poets, who range widely in age, and those of their avant-garde predecessors in the twentieth century. We will also be making links between this poetry and African American music and visual art.

Class Format: seminar
Requirements/Evaluation: two papers (6-8 pp., 8-10 pp.), short response papers, oral presentation, and class participation
Prerequisites: none, though at least one previous literature course preferred
Enrollment Preferences: American Studies majors

AFR 305 The Sociology of Black Religious Experience

Crosslistings: AFR 305/REL 315/SOC 305/AMST 305

The United House of Prayer For All People. The Nation of Islam. New Birth Missionary Baptist Church. The African-American Buddhist Retreat at Spirit Rock Meditation Center. While each of these groups reflects a different spiritual tradition, all are examples of the rich religious expressions of Black Americans. This course will introduce students to the landscape of Black religious practices in the United States. We will begin with a historical survey of the literature on Black religions. Our review will yield some of the primary themes of the Black religious experience—the injustices of modern racism, the significance of liberation, and continued meaning of Africa as a homeland. We will then investigate how secular processes like industrialization, commodification, and the modern media, alter understandings of the sacred in Black experience.

Class Format: seminar/discussion
Requirements/Evaluation: evaluation will be based upon class participation, 2-3 short papers, and a final research paper
Prerequisites: Africana Studies concentrators and Anthropology/Sociology majors
Enrollment Limit: 15
Expected Class Size: 10
Dept. Notes: this course DOES NOT fulfill the body of theory seminar requirement for Religion majors; this course will count as an elective towards the major in Religion
Distributional Requirements: Division 2

AFR 306 Queer of Color Critique: Race, Sex and Urban Life (D)

Crosslistings: WGSS 306/AMST 306/AFR 306/LATS 306/COMP 304

This seminar is an introduction to queer of color critique, a field of scholarship that seeks to intervene in the predominantly white canon of queer studies. We will examine the history of this line of critique, beginning with Black and Chicana feminisms and extending into present day issues and activism highlighting intersectionality, exploring how and why QOCC became a necessary intervention into the then still emerging field of queer studies. Our texts include scholarly works as well as science fiction novels, plays, films, diaries, and graphic novels. Methodologically, we draw on many fields of study, including anthropology, literary studies, feminist studies, and ethnic studies. We focus primarily but by no means exclusively on US contexts, paying particular attention to the role that urban environments have served for queer communities of color. Topics include: feminisms of color, inter-racial desire and fetishization, orientalism and colonial fantasy, black queer science fiction, transgender subjectivities, and the political economy of sexual desire. A key feature of this course will also be the inclusion of numerous and diverse authors to appear on Skype or in person to answer questions about their work as we read it in class.

Class Format: discussion/lecture
Requirements/Evaluation: mid-term essay, choice of final exam essay or 8-10 page research paper, responses to performance/special events

AFR 307 Contemporary Short Stories from North Africa: Fast Cars, Movies, Money, Love and War
Crosslistings: RLFR 309/AFR 307
Today the countries of North Africa are experiencing rapid social change. Rap music can be heard spilling out of windows while television sets broadcast a call to prayer. In the market place, those selling their goods compete to be heard over the ringing of cell-phones. Old and new exist side by side, albeit sometimes very uncomfortably. During the past decade, literature has emerged in both French and Arabic examining the effects of globalization: unequal modernization, unemployment, cultural change and cultural resistance. In this course, we will read short stories that address these issues as well as analyze films, sociological texts and Moroccan, Algerian and Tunisian newspapers on the web in order to explore contemporary transformations of life in North Africa. Readings by Maissa Bey, Abdelfattah Kilito, Zeina Tabi, Mohamed Zafaf, Ahmed Bouzflour, Soumaya Zahi and Abdelhak Serhane among others. Conducted in French.
Class Format: lecture/discussion
Requirements/Evaluation: active class participation, reading journal, two short papers, an oral presentation and a final paper
Prerequisites: RLFR 201, 202 or 203 or permission of instructor
Enrollment Preferences: French majors and those with compelling justification for admission

AFR 309 Scriptures and Race
Crosslistings: REL 309/AFR 309/LATS 309
This course focuses on the relationships between constructions of race in the post-1492 American world and “Christian scriptures.” The big questions of the course examine the ways religious thought interacts with the making of, interpretation, and transformation of sacred texts. Both scriptures and race are conceptual constellations of human social imagination, and yet their conceptualization has often been enfolded in the hopes and traumas of everyday life in the Americas. How and why did these two terms come to have any relationship to each other? How and why do peoples engage “scripts”? In what ways have “scripts” informed how peoples imagine themselves, their communities, and their relationship to religious and racial “others”? How did “scripts” and “race” inform each other in modern colonialisms and imperialisms? In this course, we will examine the ways that scriptures have been employed in order to understand and develop notions of race, and we will examine how ideas about and lived experiences of race have informed the concept of scriptures as well as practices of scriptural interpretation.
Class Format: lecture/discussion
Requirements/Evaluation: evaluation based upon participation, short writing exercises, a 5- to 8-page take-home midterm essay, and a 10- to 15-page final essay
Prerequisites: none

AFR 310 Womanist/Black Feminist Thought
Crosslistings: AFR 310/REL 310/WGSS 310/AMST 309
This course explores the genealogy and development of black feminist and womanist thought. We will investigate the expansion of womanist thought from a theologically dominated discourse to a broader category of critical reflection associated more commonly with black feminism, analyze the relationship between womanism and black feminism, and review the historical interventions of black feminism. As critical reflections upon western norms of patriarchy, heterosexism, and racism, womanism and black feminism begin with the assumption that the experiences of women of color—particularly black women—are significant standpoints in modern western society. Through the examination of interdisciplinary and methodological diversity within these fields, students will be introduced to key figures including Alice Walker, Zora Neale Hurston, and Aimé Césaire. Conducted in English.
Class Format: lecture/discussion
Requirements/Evaluation: evaluation will be based on class participation, three short response papers, and the completion of an original research paper or project

AFR 312 Francographic Islands (D)
Crosslistings: RLFR 312/COMP 312/AFR 312
Utopia, paradise, shipwreck, abandonment, exile, death. Man's fascination and obsession with the island as place of discovery, beauty and imprisonment stretches across the centuries. In this class, we will read French literary and imagined islands alongside islands constructed by Francophone Caribbean, Indian Ocean and non-Western writers in France. What does the island symbolize in individual, community, national, and imperial imaginations? And how does the island become an agent in discussions of gender, race, modernity and history? Readings will include works by Paul Gauguin, Pierre Loti, Aimé Césaire, Michel Tournier, Ananda Devi, Maryse Condé, Patrick Chamoiseau and Edouard Glissant. Conducted in French.
Class Format: seminar
Requirements/Evaluation: active class participation, weekly response papers, midterm essay and final essay
Prerequisites: credit to RLFR 201 who have taken a literature course in RLFR at Williams, or permission of instructor
Enrollment Preferences: French majors and certificate candidates, Comparative Literature majors, and Africana Studies concentrators
Enrollment Limit: 20
Expected Class Size: 15
AFR 313 A History of an African City
Crosslistings: HIST 307/AFR 313/ENVI 306

The city of Nairobi was founded solely to serve the needs of white colonials and settlers. Fifty years later—in the 1960s—it had become dominated by Africans and is now, in the 21st Century, a major global city with over 4 million people. This course will trace the history of Nairobi from the 19th century to the present. We will focus on the city's political and economic development, its racial conflicts, as well as the daily experience of various groups of city dwellers. We will also look at the growth of the city's physical infrastructure—its transportation, housing, trade, and labor networks. Students will also get a chance to read about the various artistic movements in Nairobi, focusing especially on music, theater, and street performances.

Class Format: lecture
Requirements/Evaluation: two 7-page papers and one 12- to 15-page paper
Prerequisites: none
Enrollment Preferences: seniors; History majors
Enrollment Limit: 25
Expected Class Size: 25

AFR 314(F) Groovin' the Written Word: The Role of Music in African American Literature
Crosslistings: AFR 314/AMST 314/COMP 321/ENGL 314

In an interview with Paul Gilroy, Toni Morrison once said, "Music provides a key to the whole medley of Afro-American artistic practices." Morrison is not the only one who believes that music speaks to numerous aspects of the African American experience. From Sterling Brown and Zora Neale Hurston to John Edgar Wideman and Suzan Lori-Parks, many African American authors have drawn on music to take political stands, shape creative aesthetics, and articulate black identity. In this course, students will explore the work of these authors and more, investigating music's ability to represent and critique African American culture in their literature. Texts will cover a range of literary forms including poetry, plays, short stories and novels alongside theoretical and critical essays. Students will discuss such key issues as assimilation into mainstream culture, authenticity claims on black music, and music used as a tool for protest. Additionally, class assignments will include musical examples in spirituals/gospel, blues, jazz, and rock/rythym and blues. While this class requires students to practice and develop literary and performance analysis skills, students are not required to have technical musical knowledge.

Class Format: lecture/discussion
Requirements/Evaluation: evaluation will be based upon class participation, short weekly reading responses and/or listening assignments, one 3-page paper, one 6- to 8-page paper comparing two works, one in-class spoken word performance with 2-page report, final presentation
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none; open to all
Enrollment Limit: 20
Expected Class Size: 15
Distribution Notes: meets Division 2 requirement if registration is under AFR or AMST; meets Division 1 requirement if registration is under COMP or ENGL

AFR 315 Blackness 2.0: Race, Film and New Technologies
Crosslistings: AFR 315/AMST 315

Media theorists have raised three key questions regarding representations of race (or the lack thereof) within contemporary media forms: (1) Is race a liability in the 21st century where utopian forecasts suggest a race-free or "post-race" future? (2) Is there more to new media and race than assumptions about a "digital divide"? (3) Are race distinctions truly eliminated with digital technologies? In this course, we will respond to these questions by investigating the nuanced ways that race becomes constructed in popular media forms. Although we will largely focus on representations of blackness in modern film, we will also explore the implications of "new" media and technologies upon the categories of race, gender, and sexuality. We will, for example, consider how avatar-based social and entertainment media become viable forums for conceptualizing race, and whether or not these formats are somehow "better" spaces in which racialized "bodies" can exist. Additional discussion topics may include: how racial discourses in the "real world" are (or are not) reshaped and redefined in the virtual world;blogosphere politics; social networking; gaming and the virtual world; activism on the web; and fandom in the twitter era.

Class Format: seminar/discussion
Requirements/Evaluation: evaluation based on class participation, maintenance & update of a personal blog (including weekly reading-related posts), & the design of a final, original multimedia project explicitly connected to race & new media/race & new technologies
Extra Info: may not be taken on a pass/fail basis
Prerequisites: none; open to all
Enrollment Limit: 15
Expected Class Size: 10

AFR 316 Black Migrations: African American Performance at Home and Abroad
Crosslistings: AFR 317/COMP 319/DANC 317/ENGL 317/THEA 317/A

In this course, students will investigate, critique and define the concepts of migration and diaspora with primary attention to the experiences of African Americans in the United States and Europe. Drawing on a broad definition of performance, students will explore everything from writing and painting to spoken word dance to inquire how performance reflects, critiques and negotiates migratory experiences in the African diaspora. For example, how did musician Sidney Bechet's migration from New Orleans to Chicago to London influence the "early jazz era"? How did Katherine Dunham's dance performances in Germany help her shape a new black dance aesthetic? Why did writer James Baldwin go all the way to Switzerland to write his first novel on black, religious culture in Harlem? What drove actor/singer Paul Robeson to Russia, and why did he revoke his passport in response to his speeches abroad? These questions will lead students to investigate multiple migrations in the African diasporic experience and aid our exploration of the reasons for migration throughout history and geography. In addition to critical discussions and written analysis, students will explore these topics through their own individual and group performances in class. No prior performance experience is necessary.

Class Format: seminar/discussion
Requirements/Evaluation: evaluation based upon class participation, in-class student performances, several 2-page performance response papers, one 10- to 12-page research paper, a final performance with a 3-page report
Extra Info: may not be taken on a pass/fail basis

Class Format:

ethnography.

Ethnography is the systematic study and recording of human cultures. It involves the collection and analysis of information from multiple sources, including (but not limited to) first-person accounts, life histories, interviews, observations, and autobiographical materials. Within Africana Studies, ethnographic approaches have been utilized to reflect complex narratives of black experience throughout the Diaspora. This seminar is a critical introduction to the theory, method, and practice of ethnography in Africana studies. We will explore a variety of cultures and settings, and discuss the practical, methodological, and ethical issues related to ethnography. Three broad questions will dominate our discussions: 1) What are the theoretical, practical, and stylistic tools needed to fashion compelling ethnographies that get to the heart of what it means to document Africana experience? 2) What are the ethical and political implications of representing Africana perspectives in fieldwork studies? 3) What are the strengths and limitations of ethnography as a research method in Africana studies? Each student will utilize the materials covered in the course to research and write his or her own ethnography.

Requirements/Evaluation:

Evaluation will be based on class participation, weekly response papers, a 5- to 7-page critical book review, and the construction of a mini-ethnography. Extra Info:

one 6- to 8-page essay, and a final project (producing a graphic short story with Comic Life).

AFR 320 Dangerous Bodies: Black Womanhood, Sexuality & Popular Culture

Crosslistings: AFR 320/AMST 320/WGSS 320

Whether presented as maternal saints, divas, video vixens, or bitches, black female celebrities navigates a tumultuous terrain in popular culture. This course considers the ways that black female celebrities such as Oprah, Rihanna, Nicki Minaj, Beyoncé, Janet Jackson, and Michelle Obama negotiate womanhood and sexuality, and the popular landscapes through which we witness that negotiation. It also engages contemporary black feminist scholarship, which most frequently presents the presentation of black female bodies in popular media forms as exploitive. We will review historical stereotypes of black women in popular media forms, discuss the history of the “politics of respectability” within black culture, engage black feminist responses to these types, and examine theoretical approaches to assess social constructions of womanhood and sexuality. We will also consider provocative questions relevant to discussions of contemporary black sexual politics: Should we view these women as feminists? Are they merely representatives of cultural commodification and control of black women’s bodies? Do these women best exemplify the reiteration of problematic stereotypes? Are they positive models for demonstrating female empowerment, agency, or “fierceness?” This course explores the two-dimensional representation of black female figures in popular culture, and in so doing, troubles contemporary considerations of black womanhood and sexuality.

Class Format: seminar

Requirements/Evaluation: evaluation will be based on attendance/participation, short response papers, and a midterm and final portfolio.

AFR 321(F) Trending Black: Race & Social Media in the 21st Century

The 21st Century ushered in new and exciting ways for people to communicate digitally. With the creation of social media outlets like Facebook, Twitter, Instagram, and more recently Vine, connecting with the world is literally one click, or selfie away. Though much of the attention around social media is focused on people with race and educational privilege, people of color have created their own spaces to curate, articulate, and produce culture. Through the methods of rhetorical criticism, critical discourse analysis, cultural criticism and ethnography, we will investigate the ways Africana cultures, specifically in the United States, utilize social media to shape community and influence popular culture. This course will give students hands-on experience analyzing various texts, and a deeper understanding of rhetorical methodologies.

Class Format: seminar

Requirements/Evaluation: evaluation will be based upon class participation, weekly response papers, a 5- to 7-page critical book review, and the construction of a mini-ethnography.

AFR 323 Comic Lives: Graphic Novels & Dangerous Histories of the African Diaspora

Crosslistings: AFR 323/AMST 323/ARTH 223/COMP 322/ENGL 356

This course explores how the graphic novel has been an effective, provocative and at times controversial medium for representing racialized histories. Drawing on graphic novels such as Jeremy Love’s Bayou and Ho Che King’s A Comic Biography, this course illustrates and critiques multiple ways the graphic novel commingles word and image to create more sensory access into ethnic trauma, challenges and interventions in critical moments of resistance throughout history. Students will participate analyzing graphic novels and comic strips, with the help of critical essays, reviews and film; the chosen texts will center on Africana cultures, prompting students to consider how the graphic novel may act as a useful alternate history for marginalized peoples. During the course, students will keep a journal with images, themes and reflections and will use Comic Life software and leads to create their own graphic short stories based on historical and/or autobiographical narratives.

Class Format: seminar

Requirements/Evaluation: evaluation will be based upon class participation, weekly written responses, student-led facilitation, one 3-page graphic analysis, one 6- to 8-page essay, and a final project (producing a graphic short story with Comic Life).

Extra Info: may not be taken on a pass/fail basis, not available for the fifth course option

AFR 325 Television, Social Media, and Black Women "Unscripted"
Class Crosslistings: AFR 325/WGSS 325
Nene Leaks, Shonda Rhimes, Oprah Winfrey, Kerry Washington and now Lavern Cox and Melissa Harris-Perry have become common household names. Whether from the television shows they star in, the TV shows they have Sizzed or the social media presence they have developed—these women continue to influence and shape popular culture. In this course we will situate Black women as creators and contributors to popular culture as a whole, but specifically through television (scripted and "unscripted") and social media. We will begin by covering the history of Black women in television. This historical approach will then lead us to examine selected TV episodes, and investigate social media pages of Black actresses, television producers, and the fans of these shows. The aim of this course is to analyze the ways in which Black women continually shift the popular culture paradigm and how they serve as key players determining what is indeed popular.

Class Format: seminar
Requirements/Evaluation: evaluation in this course will be based upon class participation, response papers, one 10 page paper, and a formal class presentation
Prerequisites: none
Enrollment Preferences: first, second, third, and fourth year students. If over enrolled, preference will be given to third and fourth year students

AFR 326(S) Gender, Race, and the Power of Personal Aesthetics (D)
Class Crosslistings: LATS 313/AMST 313/WGSS 313/AFR 326
This course focuses on the politics of personal style among women of color in an era of viral video clips, the 24-hour news cycle, and e-commerce sites dedicated to the dermatological concerns of "minority" females. With a comparative, transnational lens in which gender, sexuality, ethno-racial identity, and class inform standards of beauty, we will examine a variety of materials including commercial websites, histories, personal narratives, ethnographies, sociological case studies, and feminist theory. Departing from the assumption that personal aesthetics are intimately tied to issues of power and privilege, we will engage the following questions: What are the everyday functions of personal style among women of color? Is it feasible to assert that an easily identifiable "African American," "Latina," "Arab American" or "Asian American" female aesthetic exists? What role do transnational media play in the development and circulation of popular aesthetic forms? How might the belief in personal style as activist strategy challenge traditional understandings of feminist political activity?

Class Format: seminar
Requirements/Evaluation: participation, one student-led discussion period, two written essays of 5-7 pages, final take-home exam
Extra Info: may not be taken on a pass/fail basis

AFR 327(F) Caribbean Women Writers
Class Crosslistings: AFR 327/WGSS 268/ENGL 307/COMP 268
This course is designed to explore the issues and themes commonly found in literatures of the Caribbean written by women. We will consider prose and poetry published in English in the twentieth and early twenty-first centuries, reading the texts from several different angles - including colonialism, globalization, and migration - with feminism as the overarching/organizing theme of the course. In addition to the general literary study of author, genre and discourse, our methodology will include strategies of close reading, contextualization, and a range of interdisciplinary critical approaches utilized to assess the significance and role of Caribbean women's writings as part of national and women's literatures and to explore questions of identity formation and/or disintegration, gender and social status, and ethnicity. We will be examining the well-known "forerunners" of the genre - possibly writers such as Paule Marshall, Jamaica Kincaid, Jean Rhy, and Lorna Goodison - although not necessarily their most famous texts. We will also read works from relative newcomers - possibly Sadie Smith, Edwidge Danticat, and Patricia Powell - to determine how they continue old trends while blazing new trails.

Class Format: seminar
Requirements/Evaluation: evaluation will be based on class participation, 2-3 short papers (5-7 pages), and a 10-page final paper or project
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none
Enrollment Preferences: Africana Studies concentrators

AFR 328 Revolt and Revelation in 20th-Century Americas (D)
Class Crosslistings: LATS 328/AFR 328/AMST 329/REL 223
Writing in 1971, Dominicans and Peruvian theologian Gustavo Gutierrez asked "Is the Church fulfilling a purely religious role when by its silence or friendly relationships it lends legitimacy to dictatorial and oppressive government?" Such a question encapsulates the sometimes agonistic and other times deeply intertwined relationships between religious institutions, religious thought, and movements for political transformation in the 20th century Americas. This course examines those forms of "God-talk" broadly termed "liberation theologies" that critiqued and challenged social relationships of class, colonization, race, culture, gender, sexuality, (dis)ability, and ecology. These theologies were borne out of and in turn deeply shaped struggles against oppressive regimes and structures in the Americas, and as such we will focus on some specific theological writings—such as those of Gutierrez—and their relationship to distinct social movements and struggles over land, economy, and political power, especially in Brazil, El Salvador, Mexico, Peru, and the United States of America between 1960-2000. This EDI course examines issues of social and institutional power relations that influence particular religious formations as well as the way religious formations respond to and structure social and institutional power relations

Class Format: lecture/discussion
Requirements/Evaluation: this course will be mostly discussion, with grading based upon participation, short writing exercises, a 5- to 8-page take-home midterm exam, and a 8- to 12-page final exam
Prerequisites: none
Enrollment Preferences: majors and concentrators

AFR 329(S) The Digital Caribbean
Class Crosslistings: AFR 329/GBST 329
In its rhizomatic structure and development, the internet is analogous to Caribbean culture: born out of disparate pieces and peoples; always already predicated on an elsewhere as home or authority; always already working to ignore geography and physical space. In this course we explore these questions framed by Caribbean Studies, will be our primary focus, community: In what ways do online spaces that claim (or are claimed by) the Caribbean struggle, together or individually, to articulate a cohesive culture? Archival history and voice: Does the ephemerality of online life and the economics of access endanger or enable what we may call the Caribbean subject? Identity and representation: What indeed comprises "the Caribbean subject"? How do questions of authenticity get deployed in crucial moments of tension involving diasporic subjects, particularly in the sped-up world of digital production. These questions, framed by Caribbean Studies, will be our primary focus, but they will be articulated with questions and theories from new digital media studies about knowledge production and circulation, digital boundaries and the democracy of access and usage.

Class Format: seminar
Requirements/Evaluation: evaluation will be based on class participation, bi-weekly blog posts and comments, and a 10-page final paper or project

AFR 330(S) Modern Folklore: Postcolonial Dance and Music in Africa
Crosslistings: DANC 330/MUS 330/AFR 330
"Folklore is a mixture of traditions, poems, songs, dances and legends of the people. It can be no other than the reflection of the life of the country and if that country develops, there is no reason why the folklore which is the living expression, should not develop as well. Modern folklore in present Africa is as authentic as the Africa of old."—Keita Fodeba, founding Artistic Director of Les Ballet African, Guinea, West Africa. This course will involve intensive dance and musical practice that is rooted in traditional and contemporary forms from the African continent and the Diaspora. We will examine the international impact of countries who achieved independence from Europe in the late 1950’s-1990s such as Les Ballets Africain, National Dance Company of Senegal, Bembeya Jazz, Ghana Dance Ensemble, and the national dance and music companies of Zimbabwe, Jamaica, and Cuba. Our study will include the impact of artists such as James Brown, Miriam Makeba, Michael Jackson, and Youssou N'Dour, as well as Hip Hop culture and the emergence of new forms of music and dance or modern folklore.
Class Format: studio
Requirements/Evaluation: student progress with music and dance material taught, quality of assigned short papers, quality of research and performance midterm and final paper
Prerequisites: Any of the following courses offer students preparation or experience DANC 100, 201, 202; MUS 111, 117, 120, 211, 222, 233; AFR 193, 200, 223, experience in a campus-based dance or music ensemble or permission of the instructors
Enrollment Preferences: students who have taken DANC 201, 202 or any of the courses listed in the prerequisites

AFR 334(S) Radical Theories of Political Struggle: Anti-Black Racism and the Obama Administration
Crosslistings: INTR 334/AFR 334/PSCI 346
This seminar reviews how anti-black racist theories have influenced the Obama Administration’s policies and mobilizations; and the influence and impact such theories—expressed in and as activism—have on the racial justice programs and civil rights policies of the Obama Administration. Legal theory, "Afro-pessimism," black feminist/queer theory are forms of radical thought shaping political discourse and influencing new advocacy formations (e.g. the Black Women’s Blue Print and #BlackLivesMatter); these new democracy advocates have in turn shaped the public rhetoric and political initiatives of a black presidency as it grapples with multiculturalism and racial animus.
Class Format: seminar
Requirements/Evaluation: 1 research paper (50%); 2 presentations with summaries (40%); active engagement in class discussions (10%)
Expected Class Size: 15
Distributional Requirements: Division 2

AFR 335(S) When Harlem was in Vogue (D)
Crosslistings: ENGL 334/AFR 335/AMST 344
This course will examine the aesthetics and politics of the first modern African American cultural movement, known today as the Harlem Renaissance. In our readings of key literary texts by authors such as Alain Locke, Jesse Fausett, Zora Neale Hurston, Eric Walrond, Langston Hughes, Claude McKay, Nella Larsen, and Jean Toomer, we will discuss both the national and global contexts of so-called "New Negro Writing." Furthermore, we will trace the heated debates between Harlem’s leading intellectuals and artists on the definitions of Black art, the themes and language most appropriate to “race literature” (as well as those seen as least appropriate to it), the responsibilities of the Black artist and his or her position vis-a-vis American and world literature. This course fulfills the EDI requirement by examining the relationship between race and canon-making in the early twentieth century.
Class Format: seminar
Requirements/Evaluation: 3 response papers (4-5, 5-6 and 6-7 pages) during the course of the semester; students will also prepare in-class presentations and participate in discussion
Enrollment Limit: 20
Expected Class Size: 15
Distribution Notes: meets Division 1 requirement if registration is under ENGL; meets Division 2 requirement if registration is under AFR
Distributional Requirements: Division 1
Other Attributes: ENGL Literary Histories C

AFR 336(F,S) Blackness, Theater, Theatricality (D)
Crosslistings: ENGL 316/AFR 336
Representations of African American life have pervaded the various genres and tiers of American culture, embodying a carnival of competing attitudes and perspectives. Many oddities and ironies result from this curious history. For example, African Americans as theatrical figures enter American consciousness via the minstrel stage, while white entertainers wearing burnt cork lampooned Negroes to amuse white audiences. Eventually, black performers created their own versions of minstrelsy, black playwrights created dramas more sympathetic to black life, and representations of black life proliferated in every noteworthy medium. This course will consider how attitudes about blackness have informed or deformed theatrical representations of African American life. It will examine major texts by African American writers, considering both their social importance and their aesthetic experiments and innovations. It will range from politically oriented works of social realism such as Theodore Ward’s Big White Fog and Lorraine Hansberry’s A Raisin in the Sun to expressionistic protest works like Amiri Baraka’s Dutchman and Slave Ship and Ntozake Shange’s For Colored Girls who Have Considered Suicide/When the Rainbow is Enuf. Alongside these, we will also consider a variety of comic traditions, ranging from minstrelsy to Spike Lee’s film Bamboozled and characters created by comedians such as Jackie “Moms” Mabley and Richard Pryor. And how should we assess Porgy, a play by the white writer Dubose Heyward, which evolved into America’s greatest opera, Porgy and Bess? This course will be an ongoing inquiry into the riotous theatricality of American blackness.
Class Format: seminar
Requirements/Evaluation: journal, a 15-page final paper
Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam
Enrollment Limit: 20
Expected Class Size: 15

AFR 338T Garveyism (W)

Crosslistings: AFR 338/PSCI 338/LEAD 338

This course explores the life, work, political thought, and activism associated with the Jamaican Pan-Africanist Marcus Mosiah Garvey and the transnational movement—Garveyism—that Garvey ushered into the modern world. We will investigate the founding of Garveyism on the island of Jamaica, the evolution of Garveyism during the early twentieth century across the Americas and in Africa, Garveyism in Europe in the mid-twentieth century, and the contemporary branches of the Garvey movement in our own late modern times. The implications of Garvey's conflict with W. E. B. Du Bois and the subsequent cleavages on political thought and allegiances among their respective adherents will be addressed, along with various other core issues including: the relationship between race, nation, and empire; transnationalism; the meaning of power; notions of leadership; the limitations of understanding Garveyism by the phrase "Back-to-Africa"; the moral philosophy of respect, reproduction, and redemption; prophetic political theory; Pan-Africanism; the impact of Garveyism on political theological movements such as the Nation of Islam and Rastafari; women in the Garvey movement; and Garveyite strategies for forging models of political solidarity in dark times.

AFR 340(S) African Diaspora Religions in the Americas and the Caribbean

Crosslistings: AFR 340/GBST 340/REL 340

Over the last century, historians, social scientists, and religionists have labored to discover the meaning of African dispersal beyond the African continent and its accompanying spiritual lineages. What did it mean to move from the African continent (as opposed to the Australian continent, for example)? What theories of encounter sufficiently adjudicate the synthetic religious cultures of African descended persons in North America, South America, and the Caribbean? What are the cross-disciplinary methodologies that scholars utilize to understand African religious cultures in the Western hemisphere? Firstly, this course will consider a brief historiography of Africana Religious Studies. The background and perform the second and primary objective of the course: privileging knowledge, place, and performance as central lenses for thematizing and exploring West and Central African religious traditions housed in the Americas. We will cover diverse African diasporic religious traditions including Congo, Dagara, Kuma, New Orleans Voodoo, Spiritual Baptist, and Vodou). We will also explore other African diasporic religious sensibilities that transgress regional and institutional boundaries.

Class Format: seminar

Requirements/Evaluation: evaluation will be based on class participation, discussion leadership, two scholarly journal entries, and a final seminar paper of 18-20 pages (which will require working in stages on a proposal, an 8-page draft, and a 15-page draft)

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: none

AFR 341(S) Caste, Race, Hierarchy (D)

Crosslistings: ANTH 341/AFR 341/ASST 341/GBST 341

Caste in India looms large in global social thought as a kind of benchmark against which hierarchical social systems across the world are measured. This prominence has much to do with British colonialism, but it also has a deeper and different history: the Buddha compared caste to Greek slavery, early modern Jesuits related it to the system of European estates, and since the nineteenth century, anti-caste radicals from Dalit, or “untouchable,” backgrounds have drawn a sustained comparison between the forms of oppression they face and those with which African Americans contend in the United States. Reciprocally, thinkers from W.E.B. DuBois to Toni Morrison have deployed the category of caste in their writings on race. What can the study of caste in postcolonial South Asia contribute to global debates over the persistence of “traditional” forms of social hierarchy? What are the stakes of bringing caste and race into the same conversation, and what are the implications of refusing to do so? In this seminar we will acquire a thorough grounding in the anthropological literature on caste and then investigate the politics of the caste-race comparison over the last hundred years.

Assignments include weekly postings of 1-page critical response papers and either a research paper or an interview-based, ethnographic final project examining “caste” in one’s own community. In its engagement with hierarchy in our various communities, and in its critical theorization of the commensurability (or not) of distinctive systems of inequality, the course fulfills the EDI requirement.

Class Format: seminar

Requirements/Evaluation: weekly postings of 1-page critical response papers and research paper or ethnographic final project

AFR 342(S) Racial Capitalism

Crosslistings: AMST 440/AFR 342

This class will interrogate the ways in which capitalist economies have “always and everywhere” relied upon forms of racial domination and exclusion. Although the United States will be in the foreground, the subject requires an international perspective by its very nature. We will consider the ways in which the violent expropriation of land from the indigenous peoples of the Americas, paired with chattel slavery and other coercive forms of labor, made possible the rise of a capitalist world economy centered in Europe during the early modern period. We will then explore ways racial divisions have undermined the potential for unified movements of poor and working people to challenge the prerogatives of wealthy citizens, and served to excuse imperial violence waged in the name of the subject. Ideas about gender and sexuality always undergird racial imaginaries, so we will study, for instance, the ways rhetoric about “welfare queens” has impacted public assistance programs, and claims about the embodiment of Asian women play a role in the international division of labor. We will also be attentive to the means -from interracial unionism to national liberation struggles-by which subjects of racial capitalism have resisted its dehumanizing effects. This is a reading intensive course that will challenge students to synthesize historical knowledge with concepts drawn from scholars working in the traditions of Marxst, decolonial, and materialist feminist thought, including: Angela Davis, Cedric Robinson, Anibal Quijano, Chandra Mohanty, David Roediger, Stuart Hall, Ruth Wilson Gilmore, and Silvia Federici

Class Format: seminar

Requirements/Evaluation: attendance and participation; a written mid-term exam; one in-class presentation; research paper proposal; 12-16 page research paper

AFR 343(T) Representations of Racial-Sexual Violence from Enslavement to Emancipation (D) (W)

Crosslistings: INTR 343/WGSS 343/AFR 343/AMST 343

This tutorial examines representations of and resistance to racial-sexual violence from enslavement to post-emancipation and contemporary culture in
the United States. Texts include: legal articles; historical analyses such as D’Emilio et al., Intimate Matters; Hartman, Scenes of Subjection; Smith, Killers of the Dream; McGuire, At the Dark End of the Street; and films such as Griffith, Birth of a Nation; Micheaux, Within Our Gates; Germa, Bush Mama. The primary focus is on black life, vulnerability to violence and mobilization for freedom during antebellum, postbellum/Reconstruction years of the 19th century; and 20th century convict prison lease system, Jim Crow segregation, mass incarceration.

Class Format: tutorial
Requirements/Evaluation: weekly primary and response papers

AFR 344(F) The City and the Globe (D)
Crosslistings: ENGL 344/COMP 342/AFR 344
This course will introduce the ways literary and filmic representation can tell us about the new and shifting forms of human life that arise in the fluctuating cityscapes of the contemporary world. Working with short stories, novels, and film, this course journeys through depictions of urban life in developing cities across the globe. Our readings take us to literary and cinematic versions of the Caribbean, Asian, South American, and African city. We will read texts by such authors as Italo Calvino, Chimamanda Adichie, Vikram Chandra, Teju Cole, Earl Lovelace, and Roberto Bolaño, and view films such as Chungking Express and City of God. Our secondary and theoretical texts will include writing by Walter Benjamin, Mike Davis, Saskia Sassen, and Achille Mbembe. The course will contribute to the College's Exploring Diversity Initiative by comparing cultural and societal urban contexts from a global perspective.

Class Format: seminar
Requirements/Evaluation: participation in discussion and a class blog, and approximately 20 pages of writing distributed over three papers
Extra Info: may not be taken on a pass/fail basis
Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam
Enrollment Preferences: English majors
Enrollment Limit: 25

AFR 346 History of Modern Brazil (D)
Crosslistings: HIST 245/AFR 346
Brazil has been "the country of the future" far longer than it has been an independent nation. Soon after Europeans descended on its shores, Brazil was hailed as a land of resources so rich and diverse that they would inevitably produce great wealth and global power for its inhabitants. Although this has often lent a booster-ish quality to its descriptions of the country, it has also brought about discourses that suggest Brazil's potential, it also underlies the country's failure to live up to that promise. Being an external "country of the future" must be as much a troubling as a cheering designation. This course will examine the modern history of that country of the future by taking up major themes from independence to the present. Beginning with what was the Latin American standards an easy transition from colony to independent empire, we will analyze the hierarchies that have characterized Brazilian society and their relation to the political and economic evolution of the Brazilian nation-state. The course will give particular attention to the themes of race, gender, and citizenship; national culture and modernity; and democracy and authoritarianism in social and political relations. Combining cultural, political, and social analyses, this course fulfills the Exploring Diversity Initiative requirement by examining a range of written texts and other sources to understand these and other themes in the lives of Brazilians of different social identities and political standings since Independence.

Class Format: lecture/discussion
Requirements/Evaluation: evaluation will be based on class participation, two short papers, and a final exam

AFR 350 Organizing Resistance: Black Activism, Then and Now (D)
This African course will be an experiential learning class designed both to study and to develop a 21st-century activism. It will analyze how effective organizers in the Black world today. Our study component will focus on important past organizations and movements—Fannie Lou Hamer and the organizing of the Mississippi Freedom Summer and "Freedom Democrats" challenge to the Democratic Party. This Student Non-Violent Coordinating Committee, the National Welfare Rights Organization, the Poor People's Budget, The Free Breakfast Program of the Black Panther Party—each with an eye towards understanding how they actually organized and determined their successes and failures. The activism component of the class will take place in Field and/or Albany—with immigrant rights group, prison rights organizations, educational entities—and we will take a Spring break activism trip (for one of our two weeks off), either to Ferguson, Missouri, or to Florida to continue work on those both within and outside of Europe to challenge the coloniality of the world order. This Africana Studies course is an EDI course focusing on the experiences and expressions of the culturally diverse peoples of African descent in the United States, as well as the myriad ways in which they confront, negotiate, and at times challenge dominant U.S. hierarchies of race, culture, gender, and class.

Crosslistings: ENGL 358/COMP 358/AFR 358
This course will consider literature that depicts the circulation of peoples and commodities (and often people as commodities) across the world's oceans in the 19th and 20th centuries. We will consider such issues as the microcosm of the ship, the slave trade and the Middle Passage, indentured servitude and the Indian Ocean, the ocean as a space of flux and transformation, and figures such as the maroon, the castaway, the lascar, and the pirate. We will read texts by Herman Melville, Claude McKay, Derek Walcott, Kamau Brathwaite, and Amitav Ghosh. Secondary and theoretical texts will include works by Paul Gilroy, C.L.R. James, Édouard Glissant, and Khal Torabully. The course will contribute to the College's Exploring Diversity Initiative by exploring cultural encounters and transformations in the transnational, transnational space of the world ocean.

Class Format: seminar
Requirements/Evaluation: participation in discussion and in a class blog, and 20 pages of writing distributed over three papers

AFR 360 The Political Thought of Frantz Fanon (W)
Crosslistings: AFR 360/PHIL 370/PHIL 360/LEAD 600
Marginalized psychiatrist, philosopher, and revolutionary Frantz Fanon was among the leading critical theorists and Africana thinkers of the twentieth century. Fanon ushered in the decolonial turn in critical theory, a move calling on those both within and outside of Europe to challenge the coloniality of the world order and to forge a new vision of politics in the postcolonial period. This course is an advanced seminar devoted to a comprehensive examination of Fanon's political thought. We will begin with an analysis of primary texts by Fanon and end by considering how Fanon has been interpreted by his contemporaries as well as activists and critical theorists writing today.

Class Format: seminar
A study of the history of the American South from 1877 to the present. Social, political and economic trends will be examined in some detail: the role of the "Redeemers" following the end of Reconstruction; tenancy, sharecropping, and the rise of agrarian radicalism; Southern Progressivism; the coming of racial segregation and the destruction of the Jim Crow system during the years of the Civil Rights movement; Southern politics during the depression and post-World War II years.

**Class Format:** discussion

**Course Title:** AFR 369(T)(S) African Art and the Western Museum (D) (W)

**Crosslistings:** ARTH 308/AFR 369

Provides a focused study of the issues associated with the exhibition of African objects within Western institutions from the formative period of the 19th century to the modern era. Covering topics ranging from early collection and display methodologies to exhibition-based practice in the contemporary digital era, this tutorial will provide an opportunity for robust discussion about the interactions that have occurred between the arts of Africa and the Western museum over the lengthy history of their engagement. Students will investigate the nature of the cross-cultural dialogues taking place and the politics of display at work in regional museum spaces that display African art towards fleshing out how exhibitions function through the strategic organization and display of objects. In other words, students will explore how the dialogues created between objects and individuals often speak to the voices and agendas that collide, collaborate, and even compete with each other within the environment of the museum. This tutorial fulfills EDIT requirements through its exploration of issues of so-called 'authentic' representation, cultural capital, rights of seeing, the politics of representation, and the meaning of art as it applies to African artifacts displayed within the context of a Western art museum.

**Class Format:** tutorial

**Requirements/Evaluation:** field trips to area museums, bi-monthly response papers (5 pages), bi-monthly peer response papers (2 pages)

AFR 370 Displaying, Collecting and Preserving the Other: Museums and French Imperialism

Crosslistings: RLFR 370/AFR 370/COMP 370

This course will explore relationships between culture and imperialism in France by exploring how the colonial “Other” has been conceived, displayed and collected in French museums, world’s fairs and galleries from the 19th century to the present. Through readings in museum history and theory, we will explore the imperial histories of the Louvre and the Musée de l’Homme, the role of Parisian World’s Fairs in ordering the colonial world, French colonial photography and the creation a body of consumable subjects, and the discourse of collection and preservation in French colonial architecture. Drawing on museum theory, we will also critically examine contemporary Parisian museums such as the Musée du Quai Branly, the Institut du Monde Arabe and the Cité nationale de l’histoire de l’immigration. In addition to readings and discussion, the class will engage in a semester-long project to design a new museum of French history and identity. The group will present all aspects of their museum including location, design, exhibit concept, narrative, and more. This course will be conducted in English. For students seeking RLFR credit, select readings will be in French, and written work will be in French.

Class Format: seminar

Requirements/Evaluation: active class participation, response papers, 2 short essays and a final group project

Prerequisites: for students taking the course as RLFR: RLFR 201 or above, or permission of instructor; for students taking the course as COMP or AFR: no prerequisites

AFR 375 History of American Childhood (D)

Crosslistings: HIST 375/AFR 375

Over the course of American history both the experience of childhood and our understandings of childhood have changed radically. Children have been bought and sold as slaves, hanged as convicted witches, and purchased, enslaved themselves. A century ago many children were sent “out to work” at ages that our society now defines as too young even to be left alone in the house. Common experiences of modern middle-class American childhood—summer camp, secondary school, and organized youth sports teams—are recent additions to American life. Through reading works of history and autobiographies we will explore American childhood and what attitudes toward specific groups of children reveals about American society. This course is an EDL course (though it is open to all), which explicitly studies expanding children that differ by race and class. In addition, we will interrogate the category of childhood and debate its universality and usefulness. Does the experience of childhood help to “unify” diverse groups of people?

Class Format: lecture/discussion

Requirements/Evaluation: students will be required to write three papers and be expected to contribute actively to class discussion

Prerequisites: none; open to first-year students with instructor’s permission

AFR 379(S) Black Women in the United States (D)

Crosslistings: HIST 379/AFR 379/GWSS 379

As slaves and free women, activists, domesticists, artists and writers, African Americans have played exciting and often unexpected roles in U.S. political, social, and cultural history. In this course we will examine black women’s lives from the earliest importation of slaves from Africa and the Caribbean through to woman suffrage, the Civil War, freedom, Jim Crow, the Civil Rights movements, and up to the present day. Consistent themes we will explore are the significance of gender in African American history and the changing roles and public perceptions of black women both inside and outside the black community. We will read and discuss a combination of primary and secondary sources; we will also consider music, art, and literature, as well as more standard “historical” texts. This course meets the requirements of the Exploring Diversity Initiative in that it focuses on empathetic understanding, power and privilege, especially in relation to class, gender, and race within a U.S. context.

Class Format: discussion

Requirements/Evaluation: evaluation will be based on student participation, the quality of oral presentation

AFR 381(F) From Civil Rights to Black Power (D)

Crosslistings: HIST 381/AFR 381

Focusing on African Americans’ demands for the rights and responsibilities of citizenship, and placing their perspectives at the center, this course explores the themes of the black freedom movement as it transpired in the second half of the twentieth century in the United States. The course follows a chronological format that is grounded in post-World War II internationalism and domestic Jim Crow, covers the civil rights and the black power movements of the 1950s, 60s and 70s, and then moves toward current issues in black politics. The topics examined include the strategies and organizing principles of legal challenges, direct action protest, black power activism, coalition building, and public intellectual engagement. The class also assesses the intersection between ideology/activism, culture/politics, and local/regional/national perspectives. Finally, the course uses the black freedom movement as a window onto other political initiatives of the era.

Class Format: lecture/discussion; second weekly meeting will split into two discussion sections

Requirements/Evaluation: willingness to manage an intensive reading schedule and for their intellectual engagement in class discussions; evaluation will be based on class participation, two short papers, and a take home final

Extra Info: course contains primary, secondary, and documentary sources, including a weekly film

Prerequisites: none; some background (e.g. previous coursework) in 20th century U.S. history, American studies, American politics, or Africana studies is recommended

AFR 390 Transforming the New World and the Old: The Haitian and French Revolutions (D)

Crosslistings: HIST 390/AFR 390

This course focuses on the radical transformative power of the Haitian and French Revolutions, the ways in which they challenged the hierarchies of the New World—of racism, and slavery—and of the Old World—of monarchy, aristocracy, the Church, and even of the bourgeoisie—with long-lasting effect. It will show how the two revolutions were intricately interrelated—even though historians of the French Revolution have usually neglected the Haitian Revolution and downplayed its centrality—and how they initiated a century of Revolution on both sides of the Atlantic. Given the incomplete and unfinished character of both Revolutions, and the fact that the issues they attempted to address live on today, this class will make a conscious attempt to show the continuing relevance of these Revolutions to 21st century movements for
change. This Africana Studies course meets the EDI requirement because it explores the experiences and expressions of the culturally diverse peoples of African descent in the New World, as well as the myriad ways in which they confronted, negotiated, and challenged the dominant U.S. and European hierarchies of race, culture, gender, and class.

Class Format: seminar
Requirements/Evaluation: short paper (8-10 pages), research paper (15 pages), final exam and class participation

AFR 406 Crafting Research: Methods in African Studies

Any student of Africana Studies swiftly recognizes there is a limitless breadth to what constitutes “Africana experience” and that there are diverse means through which it is experienced. For example, while some scholars utilize a more historical approach to chronicle Africana experience, others study the black body via performance to unearth nuanced meanings of Africana experience. This capstone seminar will explore a variety of methods and techniques that have emerged with the advent of dynamic new media and digital technologies. Some of the methodologies we will engage include: historical research; digital archiving; quantitative data analysis; ethnographic and qualitative analysis; critical textual analysis; reading the body as art and text; blogging and digital publishing; and evaluating films as text. Serving as a practicum, the course will provide a foundation in a variety of methods as well as hands-on learning. Students will have the opportunity to craft a final research project that is best explored through one or more of the methods we examine.

Class Format: seminar
Requirements/Evaluation: evaluation will be based on class participation, response papers, and a final research project
Crosslistings: AMST 427/AFR 427

The very term "mixture" implies that two or more distinct substances have been brought together. Distinctions of race and religion are social fictions; yet, the lived ramifications of these social fictions involve tense struggles over the boundaries of racial and religious communities. These boundaries are not just ideas but also practices. In the history of the Americas, mixed racial and religious identities and experiences have more often been the result of violent clashes than romantic encounters. Still, the romanticization of the New World as a geography that makes such mixtures possible reaches back to the earliest days of Spanish conquest in the Americas. This course critically reconsiders varying ways that racial and religious mixtures have been imagined, defined, challenged, negotiated, and survived under imaginative and legal rubrics of mestizaje, creolization, transculturation, passing, syncretism, religious hybridity, and mixed race studies. Focusing on how different peoples have critically theorized and made meaning about and out of racial and religious differences and interconnections, this EDI course investigates the ways that knowledge about mixture and difference have been critically constructed and transformed.

Class Format: Seminar
Requirements/Evaluation: Evaluation based on participation, presentations, annotated bibliography, short writing assignments, writing workshop participation, and a 20- to 25-page research paper
Prerequisites: None

AFR 419 Going to Ground: Considering Earth in the Arts of Africa (D) (W)
Crosslistings: ARTH 419/AFR 419/ENVI 419

Drawing its inspiration from the landmark exhibition  Earth Matters: Land as Material and Metaphor in the Arts of Africa (National Museum of African Art, 2013), this seminar explores how earth has been conceptualized and integrated into African artistic thought as material, metaphor, geography, environment, and intervention, and how this interpretive flexibility has allowed it to become a symbol of power and presence in African art-making from prehistory to the present. The seminar will also focus on the ways in which earth has been used in contemporary art towards addressing the growing problems of pollution, unsustainable development, and the widespread depletion of earth-based natural resources in Africa. Over the course of this seminar, students will develop a knowledge base of earth-related issues that have been addressed in African artistic production, and engage with various cross-disciplinary methodologies to critically analyze the conceptual and aesthetic strategies deployed in these works. Students will also have the opportunity to interact with specialists from diverse disciplines and fields towards fleshing out their knowledge base. This course fulfills EDI requirements through its exploration of the effects of globalization and modernization on the African natural environment, and its engagement with diverse cultural legacies, socio-political systems, and economic realities on the continent as contributors to art-making strategies deployed by contemporary African environmental artists. Students will also explore the ways in which African artists have transformed the various conditions and situations of their contexts as individuals defined by gender, sexual orientation, religious affiliation, etc. as well as members of distinctive cultures and communities.

Class Format: Seminar
Requirements/Evaluation: 2-page reading response papers, 2-page paper proposal, and final paper (15 pages) with presentation
Extra Info: May not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: Some coursework in ARTH and/or AFR would be useful
Enrollment Preferences: Seniors and majors
Enrollment Limit: 15
Expected Class Size: 19
Distributional Requirements: Division 2
Not offered Academic Year 2017

AFR 427 Racial and Religious Mixture (D) (W)
Crosslistings: HIST 427/AFR 427

The very term "mixture" implies that two or more distinct substances have been brought together. Distinctions of race and religion are social fictions; yet, the lived ramifications of these social fictions involve tense struggles over the boundaries of racial and religious communities. These boundaries are not just ideas but also practices. In the history of the Americas, mixed racial and religious identities and experiences have more often been the result of violent clashes than romantic encounters. Still, the romanticization of the New World as a geography that makes such mixtures possible reaches back to the earliest days of Spanish conquest in the Americas. This course critically reconsiders varying ways that racial and religious mixtures have been imagined, defined, challenged, negotiated, and survived under imaginative and legal rubrics of mestizaje, creolization, transculturation, passing, syncretism, religious hybridity, and mixed race studies. Focusing on how different peoples have critically theorized and made meaning about and out of racial and religious differences and interconnections, this EDI course investigates the ways that knowledge about mixture and difference have been critically constructed and transformed.

Class Format: Seminar
Requirements/Evaluation: Evaluation based on participation, presentations, annotated bibliography, short writing assignments, writing workshop participation, and a 20- to 25-page research paper
Prerequisites: None
Enrollment Preferences: Seniors, concentrators, majors, those with prior relevant coursework

AFR 440(S) Performing Blackness

In modern parlance and scholarship, blackness is understood not as a biological but a socially constructed phenomenon. This course extends common perceptions by working from the foundational concept that blackness is not only social construction but also performance and lived experience. Using the lens of performance on racial identity foregrounds the active and shifting nature of race in contrast to the potentially passive, static construction of construction. But what is this term performance that is now so widely used as to be an anathema? In this course, we explore performance broadly as entertainment, representation, social function, and lived experience. By the end of the course, students will analyze multiple performance types from theatrical and dance performance to performance of race in everyday life. They will also study and practice at least four core black performance studies methodologies: oral interpretation of literature, ethnography, written performance analysis, and embodied performance (i.e., movement, music and/or theatre). In this way, students will begin to understand performance as both subject matter and method. The course will be structured around discussions, written responses, and performance exercises that help students analyze and practice each methodology. At the end of the semester, students will create final creative research projects that articulate key theories of black performance studies and draw on at least one of the featured performance methodologies. While preference is given to Africana Studies concentrators, students are not required to have prior performance experience.

Class Format: Seminar
Requirements/Evaluation: Evaluation will be based on class participation, performance exercises, response papers, and a final creative research project
Extra Info: May not be taken on a pass/fail basis; not available for the fifth course option

Expanding Diversity

AFR 443 Race and Ethnicity in Latin America (D)
Crosslistings: HIST 443/AFR 443

Race and ethnicity have been central to the formation of national identities in Latin America, as well as to the creation of transnational networks that include Latin Americans. This seminar will critically examine familiar characterizations of Brazil and other countries as “racial democracies” and look at the historical roots and political impact of both “positive” and “negative” stereotypes of race relations in the region.

To do this we will explore the rise and decline of slavery, the changing constructions of indigenous and Afro-Latin American identities at national and transnational levels, and to the emergence of new Black Movements and other racial and ethnic activism in Colombia, Guatemala, Brazil, and elsewhere.

Class Format: Seminar
Requirements/Evaluation: Evaluation will be based on class participation, one short paper, and a substantial (20-25 page) research paper
Enrollment Preferences: History majors and Latino/a Studies concentrators

AFR 444 The Black Republic—Haiti in History and Imagination (D)
Crosslistings: AFR 444/HIST 444
This senior Africana capstone course/History seminar explores the central role of Haiti in the American and the transnational pan-African imaginations. As home to the world's only successful slave rebellion, Haiti has been a role model of tremendous importance, stimulating slave rebellions in America and throughout the Caribbean, playing an instrumental role in the liberation of SoA America from the Spaniards, and inspiring decolonization movements in Africa and the Caribbean in the 20th century. Not surprisingly, it has had tumultuous relations with both its colonial occupier, France, and its most powerful neighbor, the United States. From isolation and sanctions, to occupation and U.S. supported dictatorship, this seminar traces the historical suffering endured by Haiti at the hands of western historians, the vivid images Haitians evoke in the American imagination—from boat people and carriers of Aids, to practitioners of voodoo and creators of a uniquely African-Caribbean art—and the role of the French and American governments in the recent coup against President Jean-Bertrand Aristide. Film, dance, literature, music, history, anthropology and religion will be explored in this interdisciplinary course, with an eye towards helping students produce an original work of their own at the final project. By examining Haiti's fraught racial relations—particularly between Haitian blacks and mulattoes—and her early and unique black power movement—noirisme—this class fulfills the requirements of the Exploring Diversity Initiative.
Class Format: seminar
Requirements/Evaluation: evaluation to be based on student participation, a short paper, and the completion of an original research paper or project
Extra Info: all projects will have some written component, but may include a dance performance, spoken word, fieldwork etc.

AFR 456F Civil War and Reconstruction
Crosslistings: HIST 456/AFR 456/AMST 456
An examination of one of the most turbulent periods in American history, with special emphasis on the changing status of Afro-Americans during the era. During the war years, we will study both the war itself and homefront conditions: military, naval, political, economic, and especially social aspects will be examined in some detail. Our study of Reconstruction will concentrate on the evolution of federal policy toward the Southern states and the workings out of that policy in the South, particularly as it relates to the freedmen.
Class Format: seminar
Requirements/Evaluation: evaluation based on class participation and a substantial research paper based at least in part on primary source materials
Enrollment Limit: 15

AFR 459 Jim Crow: American Apartheid (D)
Crosslistings: HIST 459/AFR 459
Between 1865 and 1967, African-Americans developed and deployed a set of practices that sanctioned racial discrimination. Jim Crow—as this American system of apartheid was called—is one of the least studied aspects of U. S. History. This course explores the law, cultural, economic, and political aspects of Jim Crow; the dynamics of racialized power; and the roles of media and history in sustaining racial inequality. Informed by how segregation operated to construct and sustain differences, it qualifies as an Exploring Diversity Initiative course by linking the issue of diversity to the issue of power relations, investigating how American racial disparities despite constitutional guarantees, and considering how the legacy of racial discrimination affects current domestic issues like public education, affirmative action, and the persistence of poverty. In addition to covering race theory in historical context, the course suggests that current scientific ideas about race—that there are no consequential biological differences among humans—is a recent discovery. Finally, the course examines the discrete development of black communities, institutions, politics, and racial destiny.
Class Format: seminar
Requirements/Evaluation: evaluation will be based on class participation and two shorter assignments leading up to a longer research paper
Enrollment Preferences: junior and senior History majors

AFR 476 Black Radicalism (D)
Crosslistings: HIST 476/AFR 476
Amandal! Black Power! Venceremos! A Luta Continua! Ever since the end of slavery—brought about by the Haitian Revolution, slave rebellions, maroons, Quilombos, Civil War and various other means of resistance—transatlantic people of African descent have demanded radical change in the organization of modern societies. Their struggles and ideas have changed the ways we think and study—through the formation of Africana/African-American/Black-Studies—and the ways in which we express ideas—through the creation of rich traditions of music, dance, theater, poetry, carnivals, sculpture, and art that have acted as global conduits of cultures of resistance. In this Senior Seminar, we will study the most tumultuous period of Black radicalism in the 1960’s, focusing on the Black Panther Party, the League of Revolutionary Black Workers, the Third World Women's Alliance/Angela Davis, the Black Workers, the Third World Women's Alliance/Angela Davis, and African and black power movements—noirisme —this class fulfills the requirements of the Exploring Diversity Initiative.
Class Format: seminar
Requirements/Evaluation: evaluation to be based on student participation, a take-home mid-term paper, and the completion of an original research paper or project; all projects will have some written component, but may include a dance performance, spoken word, fieldwork etc.

AFR 482T Fictions of African-American History (W)
Crosslistings: HIST 482/AFR 482
This course examines the form and function of African-American narratives with particular attention to written texts pertaining to the enslavement and freedom of African Americans during the nineteenth and early twentieth century. We will explore the role of books, writing, and reading in the African American South, where the acts of reading and writing had been illegal throughout the Colonial and Antebellum Era. In the course, we will read both historical and fictional narratives that raise explicitly the problem of writing African-American history.
In the first part of the course, we will discuss selected texts (fiction, narrative, and historiography) from the antebellum era in order to schematize the literature of slavery. In the second half of the course, we will take up the discourse of freedom that followed the Emancipation Proclamation. Readings will include works by Booker T. Washington, James Weldon Johnson, Charles Chesnutt, Harriet Wilson, Paul Laurence Dunbar, Sutton Griggs. In addition, we will read historiography on African American slavery, freedom, andurbanization.
Class Format: tutorial
Requirements/Evaluation: weekly paper or critique
Extra Info: may not be taken on a pass/fail basis
Prerequisites: none
Enrollment Preferences: History majors and Africana Studies concentrators
Enrollment Limit: 10
Expected Class Size: 10

Writing Intensive
Other Attributes: AMST Arts in Context Electives
AMST Comp Studies in Race, Ethnicity, Diaspora
AFR 483T Freedom in Africa (W)

This course examines the ideas of major figures in the progressive tradition of African political thought. This emancipatory tradition emerged in societies shaped by racial, cultural, and economic exploitation, forcing both African men and women to address questions of identity and political action. Most members of this tradition also considered the ways in which uneven power relations within African communities shaped the personal and political landscapes. The Africans we will examine in this course drew on resources as varied as Pan-Africanism, Nationalism, Classical Liberalism, Social Democracy, Marxism, Black Consciousness, Negritude and Gender theory, yet each participated, at least implicitly, in a common African intellectual project: the meaning of Africa and of being African.

Class Format: tutorial; students will meet with the instructor in pairs for an hour each week; a student either will write & present orally a 5- to 7-page essay on the assigned readings or be responsible for offering an oral critique of their partner's work each week.

Requirements/Evaluation: evaluation will be based on the quality of the biweekly presentations and oral critiques, the regular attendance and participation in class, and the final project: the meaning of Africa and of being African.

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option.

AMERICAN STUDIES (DIV II)

Chair: Professor MARK REINHARDT

Professors: L. JOHNSON, M. REINHARDT, M. RÜA, D. L. SMITH, Associate professors: L. VING, Assistant Professor: D. KIEL, Senior Lecturer: C. CLEGHORN, Affiliated Faculty: Associate Professor: M. E. CEPEDA, Assistant Professors: R. BRAGGS, N. HOWE.

GENERAL PROGRAM DESCRIPTION

The American Studies Program, an eleven-course major, uses interdisciplinary approaches to develop students' understanding of the complexity of the culture(s) usually labeled "American." Examining history, literature, visual media, performance, and other forms of expression, we explore the processes of cultural definition as contested by diverse individuals and groups. We ask new questions about aspects of American life long taken for granted; we also use American culture as a laboratory for testing classic and contemporary theories about how cultures work.

NON-MAJORS, FIRST-YEAR STUDENTS, AND SOPHOMORES

American: the Nation and Its Discontents, our introductory course, is open to non-majors including first-year students, who are especially encouraged to take the class. All elective courses are open to students who meet the requirements or prerequisites specified in the course description. American Studies 301, the junior seminar, and those courses that count as our senior seminar are open to non-majors with permission of the instructor.

COURSES AND COURSE NUMBERING

American Studies offers courses at all levels. Our 100-level electives, which give preference to first-year students, explore a substantive topic in-depth without seeking to introduce the field as a whole. Our introductory course, AMST 101, explores power and imagination, struggle and social change in American culture but also introduces the interdisciplinary approach and diverse cultural artifacts, genres, and media that distinguish American Studies as a form of inquiry. Both this course and our occasional 200-level electives cover the major topic at all levels, including first-year. The intermediate electives at the 300-level are offered primarily for juniors and seniors, although, when space and instructor policy permits, they are open to sophomores. All majors are required to take AMST 301, the junior seminar, which teaches students how to employ theories and methods central to the field. The 400-level courses designated as senior seminars are designed for senior majors, though open to others with suitable preparation.

THE MAJOR

Required Courses

American Studies 101, America: the Nation and Its Discontents

American Studies 301, Junior Seminar

One 400-level course designated Senior Seminar

Elective courses:

Eight courses: five should be chosen from one of the specializations listed below, the other three chosen from among any of the electives listed, but students must draw their remaining courses from two of the other specializations. Students are also required to take at least one course covering pre-1900 American history or culture; this need not be an additional course, but can be one of the eight electives.

THE DEGREE WITH HONORS IN AMERICAN STUDIES

Candidates for honors in American Studies will undertake a substantial, yearlong, independent project during their senior year. Applicants should have a consistent record of high achievement in courses taken for the major, and normally will have done work in the field of study of their proposed thesis. Students who wish to write or produce an honors project should consult with a prospective faculty advisor in their junior year. Formal application to pursue honors should be made by the time of spring registration in the junior year. Students must submit a brief preliminary proposal describing the proposed project to the Chair of the American Studies Program at this time. Final admission to the honors thesis program will depend on the AMST advisory committee's assessment of the qualifications of the student and the merits and feasibility of the project (including the availability of relevant faculty advisors). If the proposal is approved, the student will be permitted to register for AMST 491, W30, and AMST 492 the following year. The completed project is due in mid-April. Each student will present a short oral presentation of his or her thesis at the end of spring semester. Honors Theses count as one of the eleven courses required for the major.

ADVISING

All majors will be assigned a faculty advisor. Majors must meet with their advisor during the first week of classes during the fall semester and at the time of the spring semester registration period in order to have their courses and plans for the American Studies major approved. All such arrangements must be approved by the American Studies Advisory Committee.

AMERICAN STUDIES AND OTHER PROGRAMS

Students majoring in American Studies are encouraged to consider pursuing concentrations in Africana Studies, Environmental Studies, Latin/o Studies, Performance Studies, and Women's, Gender and Sexuality Studies. Many of the courses counted for those concentrations may also earn credit toward the American Studies major.

STUDY AWAY FROM WILLIAMS

We encourage students to pursue cross-cultural comparative studies. A major in American Studies can be combined with study away from Williams for a semester or a year if plans are made carefully. Many courses that will be approved for College credit may also count toward the American Studies major if their subject matter is American culture. Much of the required curriculum of the Williams at Mystic Program also counts toward the major. Students planning to be away in the junior year should have taken American Studies 101 before they leave; those who can take the Junior Seminar before they go away are strongly encouraged to do so. Students should consult as early as possible with the chair or their advisor about their plans for fulfilling the requirements of the major.

SPECIALIZATION FIELDS

To provide focus for work in the major, each student will choose one of the specialization fields listed below and record this choice when registering for the major. This commitment may be revised, in consultation with the chair. At least five electives will be taken from among those designated to support a specialization field. In extraordinary cases, students who wish to do so may be permitted to design their own specialization field. All such arrangements must be approved by the American Studies Advisory Committee.

ARTS IN CONTEXT

This specialization is for students interested in American arts, literature, and media. Its approaches are interdisciplinary: it trains students to examine cultural artifacts with attention to aesthetic form and to the contexts—
Students may check with the program chair to see if other courses not listed here might count as electives.

COMPARATIVE STUDIES IN RACE, ETHNICITY, AND DIASPORA

This interdisciplinary specialization examines the role of race, ethnicity, and diasporic movements in the construction of American identities. Students explore how experiences and concepts of race and ethnicity are transformed through the processes of diaspora and immigration. These courses may encompass a broad spectrum of fields such as history, literature, religion, politics, anthropology, gender studies, media and the performing arts, among others. NOTE: Concentrators in this area are required to take a combination of courses that will allow them to comparatively assess the experiences of at least two ethno-racial groups in the Americas.

AMST 102(S) Artists Respond to Dangerous Times (D)

This introductory studio art course focuses on how contemporary time-based art can address the critical issues of our historical moment. We will look at ways in which language, performance, and the moving image can be used to reckon with the forces that historical events and conditions press upon us as citizens, art makers, and living beings, and think about art-making as a dialogical social force that has the potential to press back. Students will develop their own video, performance, or written work in this vein. The course will give special consideration to particular forms of artist-made film and video: the essay film, activist/grassroots/social media, and performance-based and narrative media that reflect on historical events and the ongoing present. We will look at a variety of work, including: Fionna Banner, Catherine Bigelow, Waaaw B, Nao Bustamante, Paul Chan, Adam Curtis, Jean-Luc Godard, Danny Glover, Dara Greenwald, Sharon Hayes, Spike Lee, Zoe Leonard, Chris Marker, Alain Resnais, Anna Deavere Smith, Lisa Steele, Agnes Varda, The Yez Men, Haskell Wexler, and collections including ACT UP, Pink Blouque, TVTV, and Occupy Wall Street. Readings will include works by Margaret Atwood, Jerome Bruner, Judith Butler, Gregg Bordowitz, Joan Didion, George Lipsitz, Chantal Mouffe, Paul Virilio, David Foster Wallace, among others.

Class Format: studio
Requirements/Evaluation: students will produce three short videos, essayistic or fictional non-academic written works, or action/performance works; evaluation will be based primarily on these works and class participation
Prerequisites: none
Enrollment Preferences: first-year and sophomore students
Enrollment Limit: 12
Expected Class Size: 12
Materials/Lab Fee: lab fee TBD will be added to the student's term bill
Distribution Notes: meets Division 2 requirement if registration is under AMST, meets Division 1 requirement if registration is under ARTS

AMST 105(F) American Girlhoods (D) (W)

The image of the girl has captivated North American writers, commentators, artists, and creators of popular culture for at least the last two centuries. What metaphors, styles of writing, ideas of “manners and morals” does literature about girls explore? What larger cultural and aesthetic concerns are girls made to represent? And how is girlhood articulated alongside and/or intertwined with other identities and identifications, such as race, ethnicity, class, and sexuality? These are some of the issues we will explore in this course. We will read works by such authors as Emily Dickinson, Louisa May Alcott, Harriet Jacobs, Henry James, Gwendolyn Brooks, Toni Morrison, and Monique Truong, as well as discuss such popular phenomena as Barbie and the American Girl Doll Company, Girl Scouts, and Riot Grrrls.

This course meets the requirements of the Exploring Diversity Initiative in that it focuses on empathetic understanding, power and privilege, especially in relation to class, gender, sexuality, race and ethnicity within a U.S. context.

Class Format: seminar
Requirements/Evaluation: several short papers totaling at least 20 pages; active class participation; participation in other short writing assignments
Extra Info: may not be taken on a pass/fail basis
Prerequisites: none
Enrollment Preferences: first-year students who have not taken or placed out of a 100-level ENGL course; WGSS majors
Enrollment Limit: 19
Expected Class Size: 19
Distributional Notes: meets Division 1 requirement if registration is under ENGL; meets Division 2 requirement if registration is under AMST or WGSS

AMST 106(T) Thinking of Coming of Age in the City: Growing up and Growing Older in Communities of Color (D) (W)
Crosslistings: ENGL 106/AMST 106
This tutorial examines urban life in communities of color through the lens of aging. We will focus on the political and economic dimensions of cities that have deeply affected the daily collective lives of certain populations from childhood to old age. This EDI tutorial foregrounds the significance of age, as it crosses over race, class, and gender, in explorations of urban inequality.

Class Format: tutorial
Requirements/Evaluation: five to six 5-page papers, five to six 2-page responses, oral presentations of papers; discussion
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none
Enrollment Preferences: first- and second-year students considering an American Studies major or Latina/o Studies concentration
Enrollment Limit: 10
Expected Class Size: 10
Distributional Requirements: Division 2
Expected Class Size: 15
Distributional Requirements: Division 2
Spring 2017
SEM Section: 01  Cancelled

AMST 107(H) Introduction to Native American and Indigenous Studies (D)
Crosslistings: AMST 107/HIST 107/ANTH 107
This course provides an interdisciplinary introduction to the growing field of Native American and Indigenous Studies (NAIS). We will primarily focus on surveying historical and contemporary Indigenous issues in the United States, but we will occasionally draw upon parallels from settler states around the world. We will critically engage a wide variety of source materials, including historical documents, legal texts, films, essays, novels, and photographs. The course will explore Indigenous social and political experiences, histories of settler colonialism, constructions of Indigenous status and identity, intellectual histories, artistic production, gender and sexuality, decolonization, and self-governance. This course will highlight the intellectual breadth of Indigenous studies, introducing the field's key paradigms, theories, and methods. Because it focuses on cross-cultural interaction and power relations, this course satisfies the Exploring Diversity Initiative (EDI) requirement.

Class Format: seminar
Requirements/Evaluation: three essays (approximately 7 pages each) and class participation
Extra Info: may not be taken on a pass/fail basis
Prerequisites: none

AMST 120(F) Science Fiction of the African Diaspora (D) (W)
Crosslistings: ENGL 109/AMST 120/AFR 120
Publishers, authors, academics, and critics often assume that science fiction and fantasy readers are all or mostly white, an assumption driven, perhaps, by the scarcity of black writers in the genre—the science-fiction creative-writing classes I teach at Williams, for example, are depressingly undiverse. And for a long time, among professional science-fiction writers, Samuel R. Delany and Octavia Butler represented pretty much the entire deal. The last fifteen years, however, have witnessed the emergence of a number of black science fiction and fantasy authors from the Americas and Africa. In this course we will read a sample of this fiction, paying particular attention to these questions: In what new ways (if any) do these authors use or imply themes of racial or ethnic otherness. Any story that involves the clash of sentient species, for example, or a nostalgic or disruptive reinterpretation of the social hierarchies of the past, partakes implicitly of this coded language.

Class Format: seminar
Requirements/Evaluation: evaluation will be based on substantial, weekly writing assignments of graduated length totaling 20 pages over the course of the semester and active participation in classroom discussion
Extra Info: may not be taken on a pass/fail basis
Prerequisites: none
Enrollment Preferences: first-year students who have not taken or placed out of a 100-level course
Enrollment Limit: 19
Expected Class Size: 19

AMST 128(F) Reading Asian American Literature (W)
Crosslistings: AMST 128/ENGL 128/COMP 128
Though the category and term “Asian American” came about as a result of political struggle in the 1960s, what we now call Asian American writing in English began in the nineteenth century and has played a significant role in every American literary “movement” from Modernism, realism, protest literature to various avant-gardes, the graphic novel, and digital poetics. This writing-intensive course closely reads a sampling of texts in a variety of genres and styles—produced by writers from various Asian American ethnic groups—from the late nineteenth century to the present and contextualizes them historically, both domestically and globally. We will examine the material, cultural, political, and psychic intersections of larger structural forces with individual writers and texts. Along the way, we will interrogate the notion of “Asian American”—its contradictions, heterogeneous nature, and our assumptions—and its relation to the idea of “American.” Some questions we will ask: How do Asian American writers link to other English-language texts in the Asian diaspora? How does the ethnic or racial Other function in these texts? Does the Other function at all?

Class Format: seminar
Requirements/Evaluation: six 2-3 pp. papers, participation (attendance, discussion, GLOW posts), and a final project (the final project is 7-9 pages: either a creative project or an analytical paper)
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none
Enrollment Preferences: prospective AMST or ENGL majors
Enrollment Limit: 15
Expected Class Size: 15
Distribution Notes: meets Division 2 requirement if registration is under AMST; meets Division 1 requirement if registration is under COMP or ENGL

AMST 132 Contemporary Africana Social and Political Philosophy (D)
Crosslistings: AFR 132/PSCI 132/AMST 132
This introductory seminar investigates the relationship between three major schools of thought in contemporary Africana social and political philosophy, namely the African, Afro-American, and Afro-Caribbean intellectual traditions. We will discuss a range of thinkers including Aimé Césaire, Angela Y. Davis, Edouard Glissant, Lewis R. Gordon, Kwame Gyekye, Paget Henry, bell hooks, Charles W. Mills, Nkrumah, Lucius Outlaw, Oyèrónké Oyewumi, Tommie Shelby, and Sylvia Wynter. A primary goal of the course is to provide students with the intellectual resources to decipher problems central to philosophical discourse and to allow students an opportunity to apply what they learn to critical issues in current geopolitics. This seminar is part of the Exploring Diversity Initiative, and as such we shall investigate—via the authors mentioned—comparative philosophical analyses, critical theorization, and the plurality of global thinking in contemporary social and political philosophy.

Class Format: seminar
Requirements/Evaluation: evaluation will be based on attendance and participation, two 5- to 7-page essays, and one 10-page final paper
Extra Info: not available for the fifth course option
Prerequisites: none; open to all
Enrollment Preferences: first- and second-year students

the history of leadership from the colonial era to the Civil War through the study of consequential individuals whose actions shaped seminal moments in American history. As often as possible, the course will analyze rival leaders to understand the many different forms of leadership that existed throughout American history and how historical contexts affected individual decisions. The course opens with Powhatan, whose Native American empire spanned the East Coast of North America, and John Smith, who confronted this Indian emperor and tried England's first toehold in the New World, and it ends with Abraham Lincoln, who tried to keep together a nation that Jefferson Davis aimed to destroy. In between, the course will explore colonial leaders like John Winthrop, the first governor of the Massachusetts Bay Colony; African American leaders like Gabriel Prosser, who led a slave rebellion, and Richard Allen, a free black abolitionist; presidents like George Washington and Thomas Jefferson; First ladies like Abigail Adams and Dolley Madison; advocates for women's rights like Elizabeth Cady Stanton and Susan B. Anthony; and others. Providing a survey of early American history through the study of these individuals, students will have a deeper appreciation of how historical processes shaped leaders—and how leaders have shaped history.

Class Format: seminar

AMST 158 From Pocahontas to Crazy Horse: Representations of Native Americans in Popular Culture (W)

Crosslistings: HIST 156/AMST 158

In this class, we will explore a variety of media to interrogate depictions of Native peoples in the United States. By examining popular representations of iconic Native Americans (Pocahontas, Squanto, Sacagawea, and Crazy Horse, among others) in film, children's literature, websites, statuary and portraiture, and alongside scholarly interpretations of their lives, we can parse the creation and evolution of stereotypes about Native peoples and consider the cultural work that such imagery performs. For instance, why is it important to some people to imagine that Pocahontas lived happily ever after with John Smith, or that Squanto gave us the first Thanksgiving? Such national myths are based on kernels of historical reality, but they also elide important details and oversimplify the lives of both Native and European protagonists. By learning more about the complex Native individuals behind the stereotypes, we will face our assumptions, identify the cultural work these images perform, and question why certain portrayals of Native peoples continue to thrive. We will also interrogate other timely and recognizable images such as sports mascots and fictional characters to contemplate the ways that myths about Native pasts (and the stereotypes they engender) continue to affect real people living in this country today.

Class Format: seminar

Requirements/Evaluation: brief response papers (1 page each), short papers (3-5 pages each), and a final paper (of approximately 10 pages); particular attention paid to developing students' drafting and revising processes as well as improving argumentation and style

AMST 165(S) Slavery in the United States (W)

Crosslistings: HIST 164/AMST 165

Slavery and freedom rose as concomitant ideologies—simultaneously and interrelated—critical to the development of the American colonies and United States. Few areas of American social, political, and economic history have been more engaging and exciting in recent years than the study of this relationship. This seminar introduces students to the most important aspects of American slavery, beginning with an examination of the international slave trade and traces the development of the "peculiar institution" to its demise with the Civil War.

AMST 166(S) Politics and Prose: Invisible Man in Historical Context (D) (W)

Crosslistings: HIST 166/AFR 166/AMST 166
"I am an invisible man." So begins Ralph Ellison's treatise on black life in the U.S. in the middle of the 20th century. Ellison's book Invisible Man appeared in 1952, won the National Book Award, and secured a prominent place in the canons of both American and African American arts and letters. Often studied for its literary crafting and for the ways it echoes the work of classic American writers, Invisible Man iterates the black past as it affects its protagonist. This course brings readings in black sociology, anthropology, law, literature, political science, education, folk-life, and music to bear on its examination of the novel and its historical themes, including debates among black ideologues and leaders; links between culture and protest; processes of black migration, urbanization, and community development.

Class Format: seminar
Requirements/Evaluation: class participation and 5 papers
Extra Info: may not be taken on a pass/fail basis

AMST 167 Let Freedom Ring? African Americans and Emancipation (W)

Crosslistings: HIST 167/AFR 167/AMST 167
This course will examine African Americans' transition from slavery to freedom. In the years that encompassed the Civil War and immediately after, most African Americans changed from being legal property, able to be bought, sold, mortgaged, rented out, and leveraged into U.S. citizens, with the Constitutional right to male suffrage. This course examines this transition. How did it come about? To what extent were African Americans able to exercise their rights that the constitution guaranteed? How did Emancipation shape African American family relations, culture and demography? This is a research seminar. We will examine work of historians and discuss the contradictions and nuances of emancipation. Readings will include monographs, scholarly articles and heavy dose of primary sources, as many as possible written by African Americans themselves. Assignments include an original research paper on an aspect of Emancipation. We will devote considerable time throughout the semester to finding primary and secondary sources and on the writing process.

Class Format: seminar
Requirements/Evaluation: research paper, short writing assignments, class participation
Prerequisites: first-year or sophomore standing; juniors or seniors with permission of instructor
Enrollment Preferences: first-year students, and then sophomores who have not previously taken a 100-level seminar

AMST 168 1968-1969: Two Years in America (W)

Crosslistings: HIST 168/AMST 168
These two years were tumultuous ones worldwide. The escalation of the war in Vietnam, the Soviet invasion of Prague, the student uprisings in Paris and Japan, and the racial politics in the Summer Olympics held in Mexico City all had their counterparts that reverberated in the streets, college campuses, the halls of Congress, movie theaters, and concert halls and rock festivals in the United States. This first-year seminar will examine some of the major events of this time period in America: the assassinations of Martin Luther King, Jr. and Robert Kennedy, the Democratic Convention in Chicago, as well as cultural trends such as the development of the anti-war movement, the push for curricular reforms on college campuses, and the rise of the "counter culture."

Class Format: seminar
Requirements/Evaluation: evaluation will be based on a number of writing assignments: two 3- to 5-page response papers, a 5- to 7-page oral history, an annotated bibliography, and a final 10-page research paper
Prerequisites: first-year or sophomore standing; juniors or seniors with permission of instructor
Enrollment Preferences: first-year students, and then sophomores who have not previously taken a 100-level seminar
Enrollment Limit: 19
Expected Class Size: 15-19

AMST 205 Chicana/o Film and Video (D)

Crosslistings: LATS 203/ARTH 203/WGSS 203/AMST 205
Hollywood cinema has long been fascinated with the border between the United States and Mexico. This course will examine representations of the U.S.-Mexico border, Mexican Americans, and Chicana/os in both Hollywood film and independent media. We will consider how positions on nationalism, race, gender, identity, migration, and history are represented and negotiated through film. We will begin by analyzing Hollywood "border" and gang films before approaching Chicana/o-produced features, independent narratives, and experimental work. This course will explore issues of film and ideology, genre and representation, nationalist resistance and feminist critiques, queer theory and the performative aspects of identity. Through a focus on Chicana/o representation, the course explores a wide spectrum of film history (from the silent era to the present) and considers numerous genres. By introducing various interdisciplinary approaches and theoretical methods related to race, representation, and the media, the course fulfills the Exploring Diversity Initiative's themes of critical theorization and power and privilege.

Class Format: film screenings will be scheduled as a lab
Requirements/Evaluation: evaluation will be based on one short paper, midterm exam, final exam and take home essays
Prerequisites: none
Enrollment Limit: 30
Expected Class Size: 20

amst 207 introduction to latina/o literatures (d)
crosslistings: lats 208/amst 207/comp 211/engl 251
this discussion course serves as an introduction; the reading list is not meant to be exhaustive or comprehensive, but will rather provide a sampling or range of texts for students to engage. we will explore a number of readings across different genres (the novel, play, poem, short story, graphic novel). students will endeavor to understand how each author defines latinidad. what characterizes latina/os for each of these writers and how do their works articulate the historical conditions out of which they emerge? how is latina/o literature marked by notions of language, nationality, gender, sexuality, class, race, politics, form, and genre? the readings will provide both a survey of general ideas in the study of latina/o literatures as well as specific case studies and historical examples from which we will extrapolate about the larger field. readings include works by tomas rivera, cristina garcia, cindy c. road, oscar zeta acosta, junot diaz, alisa valdes-rodriguez, and more. this course fulfills the exploring diversity initiative requirements as it offers students a comparative study of cultures and societies by examining the u.s. racial project of constructing a latina/o people out of various peoples. additional attention is given, under the rubric of power and privilege, to the racial project of constructing a latina/o people out of various peoples.

amst 208 time and blackness (w)
crosslistings: afr 208/amst 208/rel 262
the concept of time is one of the most examined, yet least theorized, concepts in africana studies. while the field is saturated with historical studies and literary analyses that take up issues of cultural memory, both of which involve thinking about time, time itself is rarely the subject of sustained inquiry. this may be due to its abstraction as an idea and the level of analysis its conceptualization demands, or because time in the african american experience cannot be understood outside of the meaning of race, which itself is far from tangible. in this tutorial, "time and blackness," we will explore how african american writers across a number of genres understand time. we will read select texts of fiction as well as spiritual autobiographies, historical narratives, and sociological studies to understand how writers draw from—and create—paradigms of time to organize their work. the following questions will structure our investigation: what are the constituent elements of time in african american writing? how does race shape the ways a writer conceives of the experience of time? in examining writings across genres, is there something that we can call an identifiable african-american "timescape"?

class format: tutorial

requirements/evaluation: assignments will include six 2-page response papers; two 5-page writing assignments; and a final, 10-page review essay on how time is understood in a genre of writing

extra info: may not be taken on a pass/fail basis; not available for the fifth course option

amst 209 ecologies of place: culture, commodities and everyday life
crosslistings: env 203/anth 208/amst 209

this course will explore the environmental implications of everyday life in modern america. it will ask how cultural, political, economic, and ecological systems interact to produce ordinary places and vernacular landscapes, from campuses to cul-de-sacs, farms to forests, nation-states to national parks. combining approaches from cultural geography, environmental history, and political ecology, it will focus on the hidden lives of "things"—the commodities and technologies that form the basic building blocks of place: food, oil, water, wood, machines. with strong emphasis on local-global relations, it will look beneath the surface of the ordinary to reveal the complex networks of power, meaning, and matter that connect "here" to "there," "now" to "then," and "us" to "them." in so doing, it will pursue parallel goals: to understand the socio-spatial processes shaping today's global environment; and to explore the cultural systems through which those processes are understood and contested. topics will include the bottled water controversy, factory farming and local agriculture, the political economy of lawns, and the cultural politics of invasive species.

amst 211(s) race and the environment (d)
crosslistings: afr 211/envi 211/soc 211/amst 211

in contemporary societies, race remains an enduring impediment to the achievement of equality. generally understood as a socially meaningful way of classifying human bodies hierarchically, race manifests itself in a number of arenas, including personal experience, economic production and distribution, and political organization. in this course, we will explore how race emerges in local and global environmental issues, like pollution and climate change. we will begin with a review of some of the landmark texts in environmental studies. "capitalism and ecological racism" like robert bullard's现如今 and david pellow's garbage wars. we will examine how to what extent polluting facilities like landfills, oil refineries, and sewage treatment plants are disproportionately located in communities of color; we will also pay attention to how specific corporations create the underlying rationale for polluting industrial sites. after outlining some of the core issues raised in this scholarship, we will turn to cultural productions—like literature, film, and music—to understand how people of color respond to environmental injustice and imagine the natural world.

class format: lecture/discussion

AMST 216(S) Environmental Humanities: Theory and Practice (D)

Crosslistings: ENV 217/AMST 216

How does culture shape our use and imagination of the physical environment? And how does the physical environment shape culture in turn? These are the central questions of the environmental humanities. This course will explore the various ways in which scholars from a broad range of disciplines have sought to answer these questions by incorporating insights from social theory, cultural criticism. Focusing on studies of land and landscape in the Americas from the time of European colonization to the present, it will examine key works from fields such as environmental history, ecocriticism, environmental philosophy, and cultural geography, and it will survey the major methodological and theoretical commitments that unite these fields. Emphasis will be placed on the ideological critique of modernity. How have scholars made environmental sense of liberalism, colonialism, capitalism, nationalism, sexism, racism, and speciesism? How have these “isms” influenced our relations with the natural world, and how can the humanities help us both understand and change these relations for the better?

This course fulfills the Exploring Diversity requirement.

AMST 217 Race(ing) Sports: Issues, Themes and Representations of Black Athletes

Crosslistings: AFR 217/AMST 217/SOC 217/ENGL 215

Althea Gibson to the Williams Sisters. Judkins (Dr. J.) Irving to Michael Jordan. Johnson Owens to Tommie Smith and John Carlos. Throughout the 20th century, black athletes have broken through Jim Crow restraints, challenged racial stereotypes, and taken their sports to new heights of achievement. In this course, students will explore a range of black athletes in the 20th century, paying particular attention to the attitudes, stereotypes and experiences they endured. In addition, this course will prompt students to analyze the representation, perception, and commodification of black athletes in popular media forms. Students will trace trends, shifts and themes in representations of blackness across different sports and historical periods. Topics under study may include resistance against and affirmation of athletes as role models, racial slurs in sports broadcasting, common themes in commercialized images of the black male athlete, and distinctions in media coverage based on race and gender. Texts will include everything from critical essays and sociological studies to commercials and documentary films. In their final projects, students may put their newfound knowledge to the test by exploring their campus or hometown to investigate the role that race plays on their own playing field.

Class Format: lecture/discussion

Requirements/Evaluation: evaluation will be based upon class participation, short weekly reading and/or listening assignments, one 5-page paper, final group project

AMST 220(S) Introduction to African American Literature (W)

Crosslistings: ENGL 220/AMST 220/AFR 220

What does it mean, socially, culturally, historically, personally, and spiritually, to be African American? No single, simple answer suffices, but African American literature as a genre is defined by its ongoing engagement with this complex question. This course will examine a series of texts that in various ways epitomize the fraught literary grappling with the entailments of American blackness.

Readings will include texts by Frederick Douglass, Booker T. Washington, Zora Neale Hurston, Langston Hughes, Richard Wright, Ralph Ellison, Amiri Baraka, Toni Morrison, and Ishmael Reed.

Class Format: seminar

Requirements/Evaluation: writing assignments for the course will total 20 pages, distributed over 4 papers

Extra Info: May not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam, or permission of instructor

AMST 221(F) Introduction to Urban Studies: Shaping and Living the City

Crosslistings: LATS 220/AMST 221/ENVI 221

Generally, cities have been described either as vibrant commercial and cultural centers or as violent and decaying urban slums. In an effort to begin to think more critically about cities, this course introduces important topics in the interdisciplinary field of Urban Studies. Specifically, we will discuss concepts and theories used to examine the peoples and structures that make up cities: In what ways do socio-cultural, economic, and political factors affect urban life and development? How are cities planned and used by various stakeholders (politicians, developers, businesses, and residents)? How do people make meaning of the places they inhabit? We will pay particular attention to the roles of race, ethnicity, class, and gender in understanding and interpreting urban communities. Texts include works by anthropologists, historians, sociologists, cultural critics, cultural geographers, and literary writers.

Class Format: lecture/discussion

Requirements/Evaluation: evaluation will be based on attendance and class participation, several short writing assignments (1-2 pages), two creative group projects and presentations, a midterm essay (5-7 pages) and final essay (8-10 pages)

Extra Info: May not be taken on a pass/fail basis; not available for the fifth course option

AMST 224 U.S. Latina @ Religions (D)
Crosslistings: LATS 224/AMST 224
In this course, we will engage aspects of Latin@ religious experiences, practices, and expressions in the United States of America. We examine moments where religious expressions intersect with politics, popular culture, and daily life in the U.S.A. Given the plurality of Latin@ communities and religious lives in the U.S.A., we will engage certain selected religious traditions and practices—such as popular Catholic devotions to Guadalupe, crypto-Judaism, curanderismo, Latin@ Muslims, and Santería—by focusing on particular moments of religious expression as elucidated in specific historiographies, ethnographies, art, literature, and film. We will also consider, though more briefly, historical contexts in Iberia and Latin America, as well as questions of how one studies Latin@ religions. Rooting ourselves in the social, political, cultural, and historical contexts in which particular Latin@ religious formations developed, this EDI course examines issues of social and institutional power relations that influence particular religious formations.
Class Format: discussion
Requirements/Evaluation: based upon class participation, short writing exercises, a 5- to 8-page take-home midterm essay, and a 10- to 15-page final review essay

AMST 226(S) Gender and the Dancing Body in America
Crosslistings: DANC 226/WGSS 226/AMST 226
This course posits that the dancing body is a particularly rich site for examining the history of gender and sexuality in America. Starting off the semester with the Puritans’ anti-dance treatises and finishing with controversies about twerking, we will analyze how various Americans have used dance to construct and challenge normative values about gender and sexuality. We will pay particular attention to the intersections of race and class with gender, for example looking at how working-class white men danced in drag and blackface in minstrelsy performance in the mid-19th century, and how a moral panic arose when upper-class women attended “tango teas” in New York to dance with working-class immigrant men. We will examine a wide range of dance genres, from stage performance to popular forms to dance on television, and attend live dance performances in the area. No previous dance experience required.

AMST 227 Utopias and Americas
Crosslistings: REL 227/LATS 227/AMST 227/ENVI 227
Where does the term “new world” come from? What do we mean by “utopia,” “utopian,” and “utopianism”? What relationships exist between the people who imagine the utopias and the lands they inhabit? This course considers the relationship between utopian imaginations and the imaginations of the lands and peoples in the Western hemisphere. We will spend some time studying utopian theory, ancient proto-utopias, and utopias in Latin America, though our main focus will be on particular examples of utopianism in the U.S.A. We will attend to particular instances of utopian social dreaming that re-imagine time, space, environment, gender, family, education, and power. The U.S.A. is the main focus of the class, but we will encourage you to pursue and bring to class utopian perspectives from other parts of the Americas. Students are also strongly encouraged to take questions from class and engage utopian images not listed on this syllabus but pertinent to our classroom learning.
Class Format: seminar

Requirements/Evaluation: evaluation will be based on class participation, short weekly writing assignments, a 5-page midterm paper, and a 10- to 15-page final research paper examining an American utopia

AMST 229(S) Reel Jesus: Reading the Christian Bible and Film in the U.S.A. (W)
Crosslistings: REL 229/AMST 229
In this course we examine some of the ways that Christian biblical narratives have appeared in late twentieth-century and early twenty-first century Hollywood movies, looking in particular at films such as The Matrix (1999), The Passion of the Christ (2004), Jesus Christ Superstar (1973), The Shawshank Redemption (1994), The Omen (1976), Children of Men (2006), and The Book of Eli (2010). What are the overt and subtle ways that these films seek to interpret and employ biblical texts? Why do they draw upon the texts they do and read them as they read them? What can cinematic interpretations of biblical texts reveal to us about how these texts are used in broader U.S. culture, especially to crystallize and reflect certain political, economic, ethnic, racial, sexual, and social parameters of U.S. cultures? How does an awareness of this scriptural dimension in a work of “popular culture” affect our interpretation of both the film and the scriptural text's meanings? How do varying interpretations of biblical texts help us to understand cinematic meaning? By assuming that we can read both biblical texts and films in multiple and contradictory ways, this class can use film as the occasion for interpreting, analyzing, and debating the meanings, cultural functions, and affective responses generated by biblical narratives in film. Finally, this course asks us to analyze the implications of ways in which we read texts and films. For this interdisciplinary course we will read selected biblical and extra-canonical texts, including selections from canonical and non-canonical gospels, the letters of Paul, and the book of Revelation, but our focus will be on the way that movies (and the people who make them and watch them) make meaning out of these biblical texts.
Class Format: lecture/discussion
Requirements/Evaluation: evaluation based on participation, short writing exercises (1-pg response papers), one 3-pg analytical essay that will also be revised, a 6-pg synthetic midterm essay, and a final 10-pg review essay

AMST 231(S) Approaches to Media Studies: Analyzing Mediated Difference (D)
Crosslistings: LATS 231/AMST 231/WGSS 232
Media’s influence in 21st century life is pervasive, and encompasses visual, sonic, and discursive formats. This course introduces students to a variety of qualitative approaches to the study of contemporary media. Simultaneously, we will explore questions of ethno-racial identity, gender, and sexuality. Structured around a series of hand-on exercises designed to provide experience in the areas of textual analysis, in-depth interviews, virtual ethnography and participant observation, this class will provide students with interdisciplinary training that enhances their understanding of everyday media and its interaction with multiple categories of identity. This course is a comparative Ethnic Media Studies class that encourages students to employ media as a lens for theorizing the intersections between ethno-racial identity, gender, and sexuality. We review materials focusing on a wide range of minoritarian communities. According to the EDI framework this class engages in the comparative study of cultures and societies, examines questions of power and privilege, and aims to sharpen students’ critical theorization of difference in the media.
Class Format: seminar
Requirements/Evaluation: participation; four 3- to 5-page papers; student papers will be based on hands-on exercises using various current Media Studies methods

AMST 234(F) Religion and Migration (D)
Crosslistings: LATS 234/REL 234/AMST 234

This course is concerned with the ways in which migrants groups have altered the religious landscape of the U.S. and how they innovatively reproduce practices from their places of origin. Crossing into the U.S. from the eastern seaboard, the Pacific Rim, and the southern border with Mexico, migrants bring their own ways of creating sacred space and negotiated religious life. We will seek to understand the multifaceted relationships between religion and migration. How have migrants negotiated the role of religion in their private and public lives? What have been the social consequences pertaining to gender, power, respectability? The course take into account earlier iterations of migration from the nineteenth century but case studies in this course will draw heavily from the third wave of American immigration, characterized by twentieth-century "internal migrations" of African Americans, Latinas/os, Native Americans, and rural dwellers into the urban environment. We will conclude by examining the ways in which forces of modern globalization have changed the nature of religious diversity in the U.S. In this EDI course, we will extensively compare migrant cultures as we interrogate power and privilege pertaining to race and religion. The cultural production of these migrant groups that we will examine will offer students an empathetic understanding of diverse cultures and their form of belonging.

Class Format: seminar
Requirements/Evaluation: student participation, weekly reflection papers (up to half page), midterm primary source write up (up to 5 pages), and a final project on "Representing Religious Migrations"
Extra Info: (includes 8-10 page paper based on primary and secondary sources and interactive component: video, map, photographs, material cultures exhibit plan, etc). Course may require a field trip may not be taken on a pass/fail basis; not available for the fifth course option

AMST 240(F) Latina/o Language Politics: Hybrid Voices (D)
Crosslistings: LATS 240/AMST 240/COMP 210

In this course we will focus on issues of language and identity in the contemporary cultural production and lived experience of various Latina/o communities. As such, how are cultural values and material conditions expressed through Latina/o language and literature? How does Latina/o identity challenge traditional notions of the relationship between language, culture, and nation? In what ways might Latina/o literary and linguistic practices serve as tools for social change? Departing from an overview of common linguistic phenomena such as code-switching (popularly known as "Spanglish") and Latina/o English, we will examine bilingual education, recent linguistic legislation, and the English Only movement. Throughout the course we will survey texts culled from a variety of literary genres as well, including theatre, autobiography, novels, and poetry. Both directly and/or indirectly, these texts address Latina/o language politics, as well as the broader themes of power, community, ethno-racial identity, gender, sexuality, class, and hybridity.

Class Format: seminar
Requirements/Evaluation: participation, two essays, final take-home examination

AMST 237 Islam in the United States: From Black Muslims to the War on Terror (D)
Crosslistings: REL 237/AMST 237/AFR 237

Malcolm X is likely the most prominent and influential Muslim figure in the history of the United States. In this course we will focus on two fundamental themes in the history of Islam in America: conflict between Muslims over what is "authentic" or "orthodox" Islam; and the ways that American history, politics, and culture determine the contours of "American Islam". This course will explore these two themes through an array of topics in the history of American Islam. In so doing, we will examine the complex relation between religion, politics, and culture in the United States. Beginning with the story of Malcolm X, the Nation of Islam, and other African-American Muslim movements, we will try to understand: What made Islam so appealing to millions of African-Americans throughout the 20th century? And were these genuinely "religious" and "Islamic" movements, or just racial/political "black nationalist" movements? What is the "guise of religion"? What counts as "legitimately Islamic", and who gets to decide? We will then move into the latter half of the 20th century and the post-9/11 debates about authentic Islam. What happened to American Muslim communities and organizations after the waves of post-1965 immigration from Muslim countries? How have debates about Muslim identity shifted over time, from being configured in terms of black separatism, to transnational/diasporic identity, to the attempts at articulating an indigenous "American-Muslim" identity? How do national narratives around 9/11 and the "War on Terror" impact these narratives about identity? And "authentic" or "orthodox" Islam; and the ways that American history, politics, and culture determine the contours of "American Islam".

AMST 242(S) Americans Abroad (D) (W)
Crosslistings: COMP 242/ENGL 250/AMST 242

This course examines popular cultural contexts, asking what it means to be a man in contemporary societies. We focus on the manufacture and marketing of masculinity in advertising, fashion, TV/film, theater, popular music, and the shifting contours of masculinity in everyday life, asking: how does political economy change the ideal shape, appearance, and performance of men? How have products ranging from beer to deodorant to cigarettes—had their use value articulated in gendered ways? Why must masculinity be the purview of "males" at all; how can we change discourses to better include "females"? How do cultural stereotypes of male femininity change the ideal shape, appearance, and performance of men? How do cultural ideas about the "male" impact men's own identities? And how do these ideas shape the ways that men respond to gender, power, and sexuality? Throughout the course, we will be studying historical and anthropological material, autobiographies, novels, documentaries, films, and social media. The course focuses critical thinking about diversity by challenging assumptions of who males are, what being American means, and what it is to be a man. It also focuses on the complex interaction of different dimensions of diversity, from religion to race, ethnicity, nationality, culture, gender, language, and age.

In what ways might Latina/o literary and linguistic practices serve as tools for social change? Departing from an overview of common linguistic phenomena such as code-switching (popularly known as "Spanglish") and Latina/o English, we will examine bilingual education, recent linguistic legislation, and the English Only movement. Throughout the course we will survey texts culled from a variety of literary genres as well, including theatre, autobiography, novels, and poetry. Both directly and/or indirectly, these texts address Latina/o language politics, as well as the broader themes of power, community, ethno-racial identity, gender, sexuality, class, and hybridity.

Class Format: seminar
Requirements/Evaluation: participation, two essays, final take-home examination
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none
Enrollment Preferences: Latina/o Studies concentrators, American Studies majors, Comparative Literature majors by seniority
Enrollment Limit: 12

AMST 241(S) Performing Masculinity in Global Popular Culture (D)
Crosslistings: WGSS 240/AMST 241/LATS 241/TEHA 241/SOC 240

This course examines popular cultural contexts, asking what it means to be a man in contemporary societies. We focus on the manufacture and marketing of masculinity in advertising, fashion, TV/film, theater, popular music, and the shifting contours of masculinity in everyday life, asking: how does political economy change the ideal shape, appearance, and performance of men? How have products ranging from beer to deodorant to cigarettes—had their use value articulated in gendered ways? Why must masculinity be the purview of "males" at all; how can we change discourses to better include "females"? How do cultural stereotypes of male femininity change the ideal shape, appearance, and performance of men? How do cultural ideas about the "male" impact men's own identities? And how do these ideas shape the ways that men respond to gender, power, and sexuality? Throughout the course, we will be studying historical and anthropological material, autobiographies, novels, documentaries, films, and social media. The course focuses critical thinking about diversity by challenging assumptions of who males are, what being American means, and what it is to be a man. It also focuses on the complex interaction of different dimensions of diversity, from religion to race, ethnicity, nationality, culture, gender, language, and age.

Class Format: seminar

Spring 2017
SEM Section: 01  W 01:10 PM 03:50 PM  Instructor: Gregory Mitchell
This course will explore some of the many incarnations of American experiences abroad between the end of the 19th century and the present day. Materials will be drawn from novels, short stories, films, and nonfiction about Americans in Europe in times of war and peace. We will compare and contrast the experiences of novelists, soldiers, students, war correspondents, jazz musicians, and adventurers. What has drawn so many Americans to Europe? What is the difference between a tourist, an expat, and an émigré? What are the more recent, often comic, gaps between the traveler’s expectations and the reality of living in, say, Paris or a rural village in Spain? What are the misadventures and unexpected rewards of living, working, writing, or even falling in love in translation? Authors may include: Henry James, Langston Hughes, Martha Gelhorn, Ernest Hemingway, Elaine Dundy, Richard Wright, and Ben Lerner.

Additional reading will be drawn from historical and critical works. All readings will be in English.

This comparative course fulfills the EDI requirement because it is designed to highlight the challenges and benefits of cultural immersion abroad. It will focus on the linguistic, emotional, intellectual, and social adaptation skills that are required to understand others, and oneself, in new contexts.

Class Format: seminar

Requirements/Evaluation: each student will give an in-class presentation and complete 3 writing assignments totaling 20 pages; one of these writing assignments will be a personal travel narrative based on the student’s own experiences.

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: any literature course at Williams or permission of instructor

Enrollment Preferences: students interested in, or returning from, study abroad; and/or students studying abroad at Williams

Enrollment Limit: 18

AMST 244(S) What They Saw in America (W)

Crosslistings: SOC 244/HIST 366/AMST 244

This course traces the travels and writings of four important observers of the United States: Alexis de Tocqueville, Max Weber, G.K. Chesterton, and Sayyid Qutb. The course will consider their respective journeys: Where did they go? With whom did they talk? What did they see? The historical scope and varying national origins of the observers provide a unique and useful outsider’s view of America—one that sheds light on persisting qualities of American national character and gives insight into the nature and substance of international attitudes toward the United States over time. The course will analyze the common themes found in the visitors’ respective writings about America and will pay particular attention to their insights on religion, democracy, agrarianism, capitalism, and race. This course is part of the Williams College program at the Berkshire County Jail and House of Corrections and will be held at the jail. Transportation will be provided by the college. The class will be composed equally of Williams students and inmates, and one goal of the course will be to encourage students from different backgrounds to think together about issues of common human concern.

Class Format: seminar

Requirements/Evaluation: several short response pieces; a final paper of 10-15 pages

Extra Info: may not be taken on a pass/fail basis

AMST 247(S) Religion, Environment, and the American West (D)

Crosslistings: REL 247/LATS 247/AMST 247/ENVI 247

From the “Land of Enchantment” of New Mexico to the barren reaches of the deserts of the sacred temples on the West Coast that overlook Pacific Ocean, this course explores the peoples and the “sacroscapes” of the American West. Historian Patricia Limerick regards this region as an extraordinary site of consciousness and one of “the greatest meeting places on the planet.” The region is a site of cultural complexity where Penitentes maintained a sacred order, Pentecostals attracted a global audience, Native Americans forged legal/protected definitions of “religion,” and Asian immigrants built the first Buddhist and Sikh temples. Until recently, standard surveys of religious history in North America have devoted minimal attention to the distinctive role of religion in the American West. They have focused on religious history in the flow of events westward from the Plymouth Rock landing and Puritan establishment while generally overlooking the Pueblo Revolt in modern-day New Mexico which occurred in that same century and marked the temporary suspension of Spanish encroachment. How do scholars of religion and history account for these renditions between the past and present? Most mainstream religious histories treat religious experience and identity in the U.S. West as additive rather than complementary to or constitutive of its mainstream narratives. Contemporary historians of religion note the need for new “sights,” “cites,” and “sites” in order to deconstruct and reconstruct this incomplete meta-narrative, taking into account such factors as migration, gender, region, and the environment. In this EDI course we will use tools of critical theory and historical scholarship to analyze this region, compare religious cultures, and interrogate ways in which religious practices (de)construct notions of race.

Class Format: lecture/discussion

Requirements/Evaluation: student participation, weekly reflection papers (up to 5 pages), a final research paper on Religion and the Environment (8-10 page paper with a media/visual component)

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

AMST 256(F) Social Justice Traditions: 1960s to #BLM

Crosslistings: AMST 256/AFR 257

We live in a time of renewed social justice activism, as people from all walks of life confront economic inequality, police violence, discrimination against transgender individuals, and other forms of oppression. This course is designed to clarify where recent initiatives like Black Lives Matter and Occupy Wall Street came from, and to evaluate how they might shape American life in the near future. Movements have histories, as today’s activists draw on the “freedom dreams,” tactics, and styles of rhetoric crafted by their predecessors while making use of new technologies, such as Twitter, and evolving understandings of “justice.” Taking a historical approach, we will begin by studying the civil rights, Black Power, anti-war, counter-culture, and feminist initiatives of the 1960s. We will then explore how progressive and radical activists adjusted their theories and strategies as the country became more conservative in the 1970s and 1980s. Making use of movement documents, documentary films, and scholarly accounts, we will study the development of LGBTQI, ecological, and economic justice initiatives up to the present day. Throughout, we will seek to understand how movements in the United States are shaped by global events and how activists balance their political work with other desires and commitments.

Class Format: seminar

Requirements/Evaluation: attendance and class participation; four 2 page reading response papers; discussion of films via GLOW forums; and a final 7-8 page analytical essay

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

AMST 257 Beyond Tonto: American Indians in Film (D)

Crosslistings: AMST 257/HIST 357/ARTH 260/ENGL 272/COMP 273

In 1893, Thomas Edison unveiled the kinetoscope and allowed audience members to glimpse the Hopi Snake Dance by pecking into the device’s viewing window. Since the birth of the motion picture, films portraying Native Americans (often with non-Native actors in redface) have drawn upon earlier frontier mythology, art, literature, and Wild West performances. These depictions in film have embodied romanticized and stereotyped ideas about American Indians in the imaginations of audiences throughout the United States and around the world. In this course, we will critically examine representations of American Indians in film, ranging from the origins of the motion picture industry to the works of contemporary Native filmmakers who challenge earlier paradigms. We will reflect upon revisionist narratives, the use of film form of activism, Indigenous aesthetics and storytelling techniques, reflexivity, and parody. Throughout the semester, we will view and discuss ethnographic, documentary, and narrative films. This course will satisfy the Exploring Diversity Initiative (EDI) requirement as we will examine power relations, cross-cultural interaction, and Indigenous social experiences.

Class Format: seminar
Requirements/Evaluation: attend evening film screenings each week; two short papers; and a 10-page final
Extra Info: may not be taken on a pass/fail basis
Prerequisites: none
Enrollment Preferences: American Studies majors

AMST 263 Cold War Technocultures
Crosslistings: SOC 263/AMST 263/HIST 363/HSCI 263/SCST 263
With the Soviet Union’s collapse at the end of the twentieth century and the emergence of the United States as an unchallenged victor and "new world" hegemon, have we lost a sense of the drama, fear, and unbridled terror that permeated American life during the Cold War? In this course we will set out to understand Cold War American culture(s) by examining the intersection of politics, aesthetics, and a range of major technoscientific developments during this period.

The course will take shape in three parts. Part I will explore the emergence and role of the computer in shaping the distinctly American style of thought aimed at Soviet "containment". We will furthermore trace historical treads connecting MIT’s legendary Whirlwind computer, the SAGE continental air defense system, nuclear wargaming at the RAND Corporation, artificial intelligence, and the advanced technologies, management strategies, and atrocities of the Vietnam War. Part II takes up the symbolic potency of the space race, which we will use as a conduit through which to explore the following events and developments: Sputnik, Yuri Gagarin’s spaceflight, the Apollo moon landing, and American civil defense; the postwar science of cybernetics and the emergence of the now iconic cyborg; the Club of Rome’s Limits to Growth report and the Gaia hypothesis; plans backed by NASA for the industrialization, humanization, and colonization of outer space; and Ronald Reagan’s Strategic Defense Initiative, “Star Wars”. Finally, case studies considered in Part III will focus on moments of conflict and resistance, appropriation, and unintended consequences of the preceding and other Cold War technological developments, among them antipsychiatry and environmentalism; Piri Thomas, an infrastructural causality of the US/CIA-backed Chilean coup of 1973; the American counterculture and the countercultural roots of neoliberalism(s).

Class Format: seminar
Requirements/Evaluation: weekly discussion precis, film screenings, class presentations, and a final research project decided in consultation with the instructor
Prerequisites: none
Enrollment Preferences: preference will be given to students with a demonstrated interest in the study of Cold War science and technology
Enrollment Limit: 19

AMST 266(F) Topics in American Literature: Freedom and Captivity (D) (W)
Crosslistings: ENGL 265/AMST 266
Letters from prison are as central to American literature as are dreams of freedom. This course explores the persistent concern in American literature and culture with forms of freedom and captivity. How have writers witnessed and imagined the experience of dispossession, displacement, internment, diaspora, and emancipation? The course will be weighted toward the 19th century, but will make constant reference to contemporary works as we explore the American carceral imagination in the shift from a slavery democracy to a penal democracy. This course contributes to the College’s Exploring Diversity Initiative by focusing on how cultures and peoples within American society have interacted and responded to one another in the past. In addition to works by Frederick Douglass, Harriet Jacobs, Lydia Maria Child, Zitkala-Sa, Charles Johnson and Julie Otsuka, we will view contemporary films that represent slavery and emancipation (Twelve Years a Slave, Children of the Dust, and the 2016 Birth of a Nation), as well as current contemporary visual art in the collection of the Williams College Museum of Art.

Class Format: seminar
Requirements/Evaluation: three 5- to 7-page papers and one 10-page final essay; weekly short responses.
Extra Info: may not be taken on a pass/fail basis
Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam
Enrollment Preferences: first-year students, sophomores, and English majors who have yet to take a Gateway course

AMST 267(F) “ Ain’t I a Woman?”: An Introduction to Black Women’s Writing in America (D) (W)
Crosslistings: ENGL 267/NYSS 267/AFR 267/AMST 267
This Gateway course offers a survey of African American women’s writing from the nineteenth century to the present day with an equal emphasis on primary literary texts and feminist criticism. We will trace the development of a black womanist/feminist tradition across various genres and disciplines, beginning with the work of abolitionists such as Frances Ellen Watkins Harper and Sojourner Truth and working our way through key texts of the Harlem Renaissance, the civil rights movement, and post-60s Black Feminist writing. Our discussions will focus on the black feminist tradition’s engagement with race, gender, class, and sexuality as intersecting axes of difference. Writers that we will read include: Zora Neale Hurston, Toni Morrison, Suzan-Lori Parks, bell hooks, Audre Lorde, Hortense Spillers, Kimberlé Williams Crenshaw. This course fulfills the EDI requirement by examining the intersection of different minorizing processes in the experiences and writings of African American women in the US.

Class Format: seminar
Requirements/Evaluation: 3 short response papers (approx. 4 pages each) and one final 7-8-page paper; in class presentations, participation in class discussions

AMST 268(S) American Law, Race, and Narrative (D) (W)

Crosslistings: ENGL 284/AFR 284/AMST 284

This course examines how American and African American writers engaged with legal definitions of race, personhood, and citizenship in the nineteenth and twentieth century. The key jacuntries in the formation of these narratives were the Declaration of Independence, the Fugitive Slave Act, Dred Scott v. Sandford in the ante-beulium period, Ferguson v Flessy in the late nineteenth century and Brown v Board of Education in the mid-twentieth century. Authors we will read include: Frederick Douglass, Herman Melville, Martin Delany, Mark Twain, Charles Chesnutt, Jean Toomer, Bebe Moore Campbell, Ntozake Shange, and Natasha Tretheway. As a course that focuses on the legal and literary constructions of race in the US, this course fulfills the EDI requirement.

AMST 275T American Drama: Hidden Knowledge (W)

Crosslistings: THEA 275/COMP 275/ENGL 224/AMST 275

The Buddha is said to have identified three things that cannot stay hidden: the sun, the moon, and the truth. What's the secret? Who is lying? Who is breaking the rules? American drama abounds with hidden knowledge and false representations. (This is not surprising: theatre is always on some level a deceptive practice, a place where one person pretends to be another, and where what is spoken is always open to skeptical scrutiny. We might say theatre is always lying as much as lying is always theatre.) This tutorial course will examine what lies hidden in American plays from the late nineteenth century to the early twentieth-first. Beginning with excerpted critical and historical writings on secrecy and lying (The Adventures of Pinocchio, Machievelli's The Prince, Thomas Carlson's Lying and Deception: Theory and Practice, among others), we will proceed to a set of American plays from across a wide spectrum of playwrights, including Edward Albee, Suzan-Lori Parks, Sarah Ruhl, Sam Shepard, Eugene O'Neill, Arthur Miller, David Mamet, Amy Herzog, and others. Student papers will explore how hidden knowledge structures dramatic action, how different characters create and respond to untruths, and what can we learn in particular from American drama about a national relationship to honesty and its opposites.

Class Format: tutorial

AMST 279 From Cahokia to Casinos: Histories of Native North America from Precontact to the Present

Crosslistings: HIST 279/AMST 279

This course will introduce students to the Native American history of North America, from the theories about the arrival of the “first Americans” to this continent, through the possibilities of early encounters and the challenges of different colonial systems, to the creation of the United States and subsequent policies of forced removal, allotment, assimilation, and education. We will also focus on Native responses to such policies, including the Red Power movement and other efforts aimed at gaining the right to be both Native and American. Finally, we will examine the issues facing Indian Country today (such as environmental worries, health concerns, and gaming and land rights) as Native peoples continue to fight to maintain their political, cultural, and territorial sovereignty in the face of what many see as an ongoing process of imperialism. Throughou, we will assume that Native Americans were and are active producers of their own histories, by seeing Native agency, adaptibility, and tenacity, we can undermine the persistent “myth of the vanishing Indian”.

By the end of the course, students will be able to reevaluate their understanding of North American history in general and to answer the question of why Native American histories matter to all of us.

Class Format: discussion

Requirements/Evaluation: students will be evaluated based on their participation in class discussion and completion of the required assignments, including a writing assignment and midterm and final exams

AMST 280 Introduction to Native American History (D)

Crosslistings: AMST 280/HIST 283

Long ignored and romanticized, Native American history has become a vibrant area of study rich with new scholarship. This course will grapple with the most important issues currently driving inquiry within the field. We will investigate pivotal developments in Native American history and build a foundation for future coursework in Native Studies. Course topics will include: the new worlds that Natives and various newcomers created, competing visions for what is now known as the United States, tribal sovereignty, federal Indian policy, notions of authenticity, structures of settler colonialism, resistance movements, Indigenous governance, cultural revitalization, conflict over natural resources, and urban experiences. We will also examine how stories about the Indigenous past have been politicized, and how Indigenous histories can reshape our broader understandings of American history and culture. This course will satisfy the Exploring Diversity Initiative (EDI) requirement as we will...
examine shifting power relations and cross-cultural interaction in Native America.

AMST 284 Introduction to Asian American History (D)

Crosslistings: HIST 284/AMST 284/ASST 284

This course serves as the introduction to Asian American history, roughly covering the years 1850 to the present. It examines the lives of Chinese, Japanese, Koreans, Filipinos, Indians, and Southeast Asians in America, and the historical reasons why they came to the US and their subsequent interactions with other ethno-racial groups in the United States. Topics include the anti-Asian exclusion movements, the wartime incarceration of Japanese Americans, the increase of Asian immigration after the 1965 Immigration Act and the war in Viet Nam, and the impact of the events of September 11, 2001 on Asian American communities. These themes and others will be explored through the use of historical texts, primary documents, novels, memoirs, and films. This is an ED1 course because it examines how people from different Asian countries and cultures interacted with each other and those already here in the US. There is a story of immigration, exclusion, resistance, accommodation, and the process of "becoming American."

Class Format: lecture/discussion

Requirements/Evaluation: evaluation will be based on four response papers, two short critical essays (5-7 pages) and a final oral history/family history of an Asian American (10-15 pages)

Prerequisites: none; open to all

Enrollment Limit: 40

AMST 300 Lessons of 'The Game': The Wire and American Culture

Crosslistings: AFR 300/AMST 300/SOC 306

The critically acclaimed television program, The Wire, ran for five seasons on Home Box Office (HBO) between 2002 and 2008. Set in "inner city" Baltimore, the program addressed a wide array of topics, including, but not limited to, the urban drug trade, law enforcement, local city politics, labor unions, education, and the newspaper industry. Though a work of "fiction," sociologist William Julius Wilson has called the show an important and instructive portrayal of the "deep inequity in inner-city America." By contrast, some scholars and critics have decried the series and indeed, courses like this one, as examples of mainstream America's fascination with and acceptance of African American drug use, criminal tendencies, and corruption. In this course, we will not deconstruct The Wire per se, but use select episodes from the series to explore key issues in Africana Studies, ranging from political geography to a history of Baltimore and the "War on Drugs." Students should have some familiarity with the show. Africana Studies will show select episodes during Winter Study. Readings will include texts about African American urban life, such as Elijah Anderson's Code of the Street and Sudhir Venkatesh's Gang Leader for a Day. Due to its attention to crime, drug addiction, violence, and urban decay, this course is a part of the Gaudino Danger Initiative.

Class Format: lecture

Requirements/Evaluation: evaluation will be based on 2-3 short papers (5-7 pages), and a final written project (10 pages)

AMST 301(F) Theories and Methods in American Studies (Junior Seminar)

LEC Instructor: James Manigault-Bryant

AMST 301(F) Theories and Methods in American Studies (Junior Seminar)

This course aims to provide a "how to" of American Studies from an integrative, multiracial, and socio-cultural perspective. Taking American culture as a site for testing classic and contemporary theories about how culture works, the Junior Seminar in American Studies serves as an introduction to resources and techniques for interdisciplinary research. Students will be exposed to and experiment with a wide range of current theoretical and methodological approaches employed in American Studies and contributing disciplinary fields, and in the process gain working knowledge in all four tracks of the major (Space and Place; Comparative Studies in Race, Ethnicity and Diaspora; Arts in Context; and Critical and Cultural Theory). The goal of the course is not only for students to develop knowledge of main currents in the field of American Studies but also to become practitioners through a series of assignments that will permit students to exercise their newfound skills. Students will thus, for instance, develop rhetorical analyses, gather ethnographic data, and "read" assorted sites and buildings, as the course explores such problems or topics as national narrations, ethnoracial formations, the American prison system, and the circulation of commodities.

Class Format: discussion

Requirements/Evaluation: evaluation will be based on class participation and a wide variety of student assignments, ranging from postings to the class Glow site, to short, analytical essays (5 pp.), to field work exercises, in class presentations

Prerequisites: AMST 201, junior or senior standing, or permission of instructor

Enrollment Preferences: juniors majoring in American Studies

Enrollment Limit: 15

Expected Class Size: 12

Dept. Notes: required of junior majors

Distributional Requirements: Division 2

AMST 302(F) Practicum: Environmental Planning Workshop

Crosslistings: ENVI 302/AMST 302/ENVI 411

This interdisciplinary, experiential workshop course introduces students to the field of planning through community-based projects. Environmental Planning encompasses many fields pertaining to the natural and built landscape such as city planning, sustainable design, natural resource planning, landscape design, agricultural planning, climate planning, transportation planning, and community development. Students will get out of the classroom and gain direct experience working on the planning process in the Berkshire region. The class is organized into two parts. Part 1 focuses on reading and discussion of the planning literature: history, theory, policy, ethics, and legal framework. Part 2 focuses on project work in which students apply concepts learned to tackle an actual community problem. Small teams of students, working in conjunction with a client in the region and under supervision of the instructor, conduct a planning project using all the tools of a planner, including research, interviews, survey research, mapping, and site design. The project work draws on students' academic training and extracurricular activities, and applies creative, design thinking techniques to solve thorny problems. The midterm assignment is a creative landscape/site design project. The lab sections include field trips, GIS mapping labs, project-related workshop sessions, public meetings, and team project work. The course includes several class presentations and students will gain skills in public speaking, preparing presentations, interviewing, survey research, hands-on design, and team work. The class culminates in a public presentation of each team's planning project.

Class Format: seminar discussion/group workshop/project lab

Requirements/Evaluation: short written exercises, class discussion, class presentations, final group report

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: ENVI 101 or permission of instructor; open to juniors and seniors only

Enrollment Preferences: Environmental Studies majors, Environmental Policy majors, Environmental Science majors and Environmental Studies concentrators

Enrollment Limit: 16

Expected Class Size: 16

Dept. Notes: required course for students wishing to complete the majors in Environmental Studies, Environmental Policy, Environmental Science and the Environmental Studies concentration.

Distribution Notes: does not meet division 1, 2, or 3 requirements

Distributional Requirements: Non-divisional

**AMST 304 Asian American Writing and the Visual Arts (D)**

Crosslistings: AMST 304/ENGL 308/COMP 307

This course examines the intersection of Asian American writing and the visual arts in a range of works: graphic novels, art criticism, collaborative projects between poets and visual artists, works that combine textual and visual elements, ekphrastic poetry, poetry "inspired by" paintings, video work, digital poetry, among others. Writers and artists to be discussed include Mei-mei Berssenbrugge, Theresa Cha, Patty Chang, Mel Chin, Bhanu Kapil, Janice Lee, Tan Lin, Yoko Ono, Adrian Tomine, and John Yau.

**Class Format:** seminar

**Requirements/Evaluation:** two papers, short assignments, participation

**Prerequisites:** none

**AMST 305 The Sociology of Black Religious Experience**

Crosslistings: AFR 305/REL 315/SOC 305/AMST 305

The United House of Prayer For All People. The Nation of Islam. New Birth Missionary Baptist Church. The African-American Buddhist Retreat at Spirit Rock Meditation Center. While each of these groups reflects a different spiritual tradition, all are examples of the rich religious expressions of Black Americans. This course will introduce students to the landscape of Black religious practices in the United States. We will begin with a historical survey of the literature on Black religions. Our review will yield some of the primary themes of the Black religious experience—the injustices of modern racism, the significance of liberation, and continued meaning of Africa as a homeland. We will then investigate how secular processes like industrialization, commodification, and the modern media, alter understandings of the sacred in Black experience.

**Class Format:** seminar/discussion

**Requirements/Evaluation:** evaluation will be based upon class participation, 2-3 short papers, and a final research paper

**Prerequisites:** none, open to all

**Enrollment Preferences:** Africana Studies concentrators and Anthropology/Sociology majors

**Enrollment Limit:** 15

**Expected Class Size:** 10

**Dept. Notes:** this course DOES NOT fulfill the body of theory seminar requirement for Religion majors; this course will count as an elective towards the major in Religion

**Distributional Requirements:**
- Division 2
- Other Attributes:
  - AFR Core Electives
  - AMST Comp Studies in Race, Ethnicity, Diaspora

AMST 306 Queer of Color Critique: Race, Sex and Urban Life (D)

Crosslistings: WGSS 306/AMST 306/AFR 306/LATS 306/COMP 304

This seminar is an introduction to queer of color critique, a field of scholarship that seeks to intervene in the predominantly white canon of queer studies. We will examine the history of this line of critique, beginning with Black and Chicana feminisms and extending into present day issues and activism highlighting intersectionality, exploring how and why QOCC became a necessary intervention into the then still emerging field of queer studies. Our texts include scholarly works, graphic novels, science fiction novels, plays, films, diaries, and graphic novels. Methodologically, we draw on many fields of study, including anthropology, literary studies, feminist studies, and ethnic studies. We focus primarily but by no means exclusively on US contexts, paying particular attention to the role that urban environments have served for queer communities of color. Topics include: feminisms of color, inter-racial desire and fetishization, orientalism and colonial fantasy, black queer science fiction, transgender subjectivities, and the political economy of sexual desire. A key feature of this course will also be the inclusion of numerous and diverse authors to appear on Skype or in person to answer questions about their work as we read it in class.

**Class Format:** discussion/lecture

**Requirements/Evaluation:** mid-term essay, choice of final exam essay or 8-10 page research paper, responses to performance/even special events

**Prerequisites:** none

**Enrollment Preferences:** Women's Gender & Sexuality Studies majors or prospective majors

**Enrollment Limit:** 15

**Expected Class Size:** 15

**Distribution Notes:** meets Division 2 requirement if registration is under WGSS, AMST, AFR or LATS; meets Division 1 requirement if registration is under COMP

**AMST 307 Experimental African American Poetry**

Crosslistings: AMST 307/COMP 311/AFR 301/ENGL 327

Contemporary African American poets in various cities and towns across the nation—from New York City to Los Angeles, from Berkeley to Durham, N.C.—are currently producing a vibrant and thriving body of formally experimental work, yet this poetry is largely unknown to readers both within and outside the academy. This formally innovative poetry defamiliarizes what we normally expect of "black writing" and pushes us to question our assumptions and presuppositions about black identity, "identity politics," the avant-garde (for example, Bhanu Kapil's feminism, Don Farmer's "affirmative," the "queer" dichotomy of form versus content, the black "community," digital poetries, and other issues of race and aesthetics. We will examine the writings of living poets, who range widely in age, and those of their avant-garde predecessors in the twentieth century. We will also be making links between this poetry and African American music and visual art.

**Class Format:** seminar

**Requirements/Evaluation:** two papers (6-8 pp., 8-10 pp.), short response papers, oral presentation, and class participation

**Prerequisites:** none, though at least one previous literature course preferred

**Enrollment Preferences:** American Studies majors

**Enrollment Limit:** 15

**Expected Class Size:** 15

**Distribution Notes:** meets Division 2 requirement if registration is under AMST or AFR; meets Division 1 requirement if registration is under COMP or ENGL

**AMST 309 Womanist/Black Feminist Thought**

Crosslistings: AFR 310/REL 310/WGSS 310/AMST 309

This course explores the genealogy and development of black feminist and womanist thought. We will investigate the explosion of womanist thought from a theologically dominated discourse to a broader category of critical reflection associated more commonly with black feminism, analyze the relationship between womanism and black feminism, and review the historical interventions of black feminism. As critical reflections upon western norms of patriarchy, heterosexism, and racism, womanism and black feminism begin with the assumption that the experiences of women of color—particularly black women—are significant standpoints in modern western society. Through the examination of interdisciplinary and methodological diversity within these fields, students will be introduced to key figures including Alice Walker, Zora Neale Hurston, and Katie Cannon, and will engage materials that draw from multiple fields, including, but not limited to, literature, history, anthropology, and religious studies. Fulfilling the EDI requirement, this course will explore how womanism/black feminism can be a bridge for empathetic understanding of diverse experiences, and will examine the varied social, political, and historical contexts that led to the formulation of womanism/black feminism as a tool to critique power and privilege.

**Class Format:** lecture/discussion

**Requirements/Evaluation:** evaluation will be based on class participation, three short response papers, and the completion of an original research paper or project

**Prerequisites:** none

**Enrollment Preferences:** Africana Studies concentrators, Women's, Gender and Sexuality Studies majors, Religion majors

**Enrollment Limit:** 25

**Expected Class Size:** 20

**AMST 311(F) Development of American Indian Law & Policy (D)**

Crosslistings: AMST 311(H)/LATS 311/COMP 308

In this course, we will conceptualize Native peoples as nations, not merely racial/ethnic minorities. Students will learn about the unique legal landscape in
Indian Country by charting the historical development of tribal governments and the ever-changing body of U.S. law and policy that regulates Indian affairs. We begin by studying Indigenous legal traditions, the European doctrine of discovery, and diplomatic relations between Native nations and European empires. We then shift our focus to treaty-making, the constitutional foundations of federal Indian law, 19th century U.S. Supreme Court decisions, and the growth of the federal bureaucracy in Indian Country. The course devotes considerable attention to the expansion of tribal governments and federal authority during the 20th century, the contemporary relationship between Indian tribes and the federal/state governments, and the role of federal Indian law as both a tool of U.S. colonial domination and a mechanism for protecting the interests of Indigenous communities. No prior background in law or Native American history is required.

Class Format: lecture
Requirements/Evaluation: evaluation will be based upon short papers, group work, and in-class essay exams

AMST 312(S) Chicago
Crosslistings: LAT 312/AMST 312/ENVI 313

“The city of big shoulders has plenty of room for diversity,” reads the official visitor’s website for the city of Chicago. Focusing on this claim, this course asks students to think critically about what kind room has been made for diversity—social, spatial, and ideological. Additionally we examine the ways in which diverse social actors have shouldered their way into the imagined and physical landscape of the city. Working with ethnography, history, literature, critical essays and popular culture, we will explore the material and discursive constructions of Chicago and urban life among its residents. Appreciating these constructions we also consider how Chicago has served as a key site for understandings of urbanity within a broader national and global context.

Class Format: Discussion
Requirements/Evaluation: evaluation will be based on attendance and class participation, group presentations and discussions, 5 critical briefs (2-pages) and a book review essay (12-15 pages)
Prerequisites: none
Enrollment Preferences: American Studies majors, Latina/o Studies concentrators and students who have taken LAT 220/AMST 221/ENVI 221

AMST 313(S) Gender, Race, and the Power of Personal Aesthetics (D)
Crosslistings: LAT 313/AMST 313/WGSS 313/AFR 326

This course focuses on the politics of personal style among women of color in an era of viral video clips, the 24-hour news cycle, and e-commerce sites dedicated to the dermatological concerns of “minority” females. With a comparative, transnational emphasis on the ways in which gender, sexuality, ethnic-racial identity, and class inform standards of beauty, we will examine a variety of materials including commercial websites, histories, personal narratives, ethnographies, sociological case studies, and feminist theory. Departing from the assumption that personal aesthetics are intimately tied to issues of power and privilege, we will engage the following questions: What are the everyday functions of personal style among women of color? Is it feasible to assert that an easily identifiable “African American,” “Latina,” “Arab American” or “Asian American” female aesthetic exists? What role do transnational media play in the development and circulation of popular aesthetic forms? How might the belief in personal style as activist strategy challenge traditional understandings of feminist political activity?

Class Format: Seminar
Requirements/Evaluation: participation, one student-led discussion period, two written essays of 5-7 pages, final take-home exam
Extra Info: may not be taken on a pass/fail basis
Prerequisites: LAT 105, AMST 201, WGSS 101 or permission of instructor; first year students are not permitted to take this course

AMST 314(F) Groovin’ the Written Word: The Role of Music in African American Literature
Crosslistings: AF 314/AMST 314/COMP 321/ENGL 314

In an interview with Paul Gilroy, Toni Morrison once said, “Music provides a key to the whole medley of Afro-American artistic practices.” Morrison is not the only one who believes that music speaks to numerous aspects of the African American experience. From Sterling Brown and Zora Neale Hurston to John Edgar Wideman and Suzan Lori-Parks, many African American authors have drawn on music to take political stands, shape creative aesthetics, and articulate black identity. In this course, students will explore the work of these authors and more, investigating music’s ability to represent and critique African American culture in their literature. Texts will cover a range of literary forms including poetry, plays, short stories and novels alongside theoretical and critical essays. Students will discuss such key issues as assimilation into mainstream culture, authenticity claims on black music, and music used as a tool for protest. Additionally, class assignments will include musical examples in spirituals, gospel, blues, jazz, and rock/rhythm and blues. While this class requires students to practice in-depth literary and performance analysis skills, students are not required to have technical musical knowledge.

Class Format: Lecture/Discussion
Requirements/Evaluation: evaluation will be based upon class participation, short weekly reading responses and/or listening assignments, one 3-page paper, one 6- to 8-page paper consisting of two works, one in-class spoken word performance with 2-page report, final presentation
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course attempt

AMST 315 Blackness 2.0: Race, Film and New Technologies
Crosslistings: AF 315/AMST 315

Media theorists have raised three key questions regarding representations of race (or the lack thereof) within contemporary media forms: (1) Is race a liability in the 21st century where utopian forecasts suggest a race-free or “post-race” future? (2) Is there more to new media and race than assumptions about a “digital divide”? (3) Are race distinctions truly eliminated with digital technologies? In this course we will respond to these questions by investigating the nuanced ways that race becomes constructed in popular media forms. Although we will largely focus on representations of blackness in modern film, we will also explore the implications of “new” media and technologies upon the categories of race, gender, and sexuality. We will, for example, consider how avaral-based social and entertainment media becomes a viable forum for conceptualizing race, and whether or not these formats are somehow “better” spaces in which racialized “bodys” can exist. Additional discussion topics may include: how racial discourses in the “real world” are (or are not) reshaped and redefined in the virtual world; blogsphere politics; social networking; gaming and the virtual world; activism on the web; and fandom in the twitter era.

Class Format: Seminar
Requirements/Evaluation: evaluation based on class participation, maintenance & update of a personal blog (including weekly reading-related posts), & the design of a final, original multimedia project explicitly connected to race & new media/race & new technologies
Extra Info: may not be taken on a pass/fail basis

SEM Instructor: Rhon Manigault-Bryant
Although they represent different genres, what popular films Madea’s Family Reunion (2006), First Sunday (2006), The Princess and the Frog (2009) have in common is that they each offer complex and at times contradictory images of black religious expression in North America. These films, which present varied perspectives on African American experience, implicitly and explicitly engage themes inherent to the study of religion, such as the role of faith in decision-making processes and the use of religious tradition as a means of reinforcing or contesting socio-cultural norms. This course is as much about the use of film to study black religious expression as it is about the use of paradigms of religious thought to study the intersections of gender, race, and religion in film. We will study films of different genres to facilitate discussion about the various dimensions of black religious expression. Conversely, we will use images, metaphors, and teachings found in Religious Studies to discuss what appears on screen. Through interdisciplinary, critical approaches in Film Studies and Popular Culture Studies, this course will examine how black religious expression pervades modern cinema, and will offer constructive strategies for engaging in dialogue with this phenomenon.

Class Format: lecture/discussion

Requirements/Evaluation: class participation and film viewings, film analyses, a Comic Life midterm project, and the completion of an original multimedia narrative

AMST 317 Black Migrations: African American Performance at Home and Abroad

Crosslistings: AFR 317/COMP 319/DANC 317/ENGL 317/THEA 317A

In this course, students will investigate, critique and define the concepts migration and diaspora with primary attention to the experiences of African Americans in the United States and Europe. Drawing on a broad definition of performance, students will explore everything from writing and painting to sports and dance to inquiry how performance reflects, critiques and negotiates migratory experiences in the African diaspora. For example, how did musician Sidney Bechet’s migration from New Orleans to Chicago to London influence the early jazz era? How did Katherine Dunham’s dance performances in Germany help her shape a new black dance aesthetic? Why did writer James Baldwin go all the way to Switzerland to write his first novel on black, religious culture in Harlem? What drew actor/singer Paul Robeson to Russia, and why did the U.S. revoke his passport in response to his speeches abroad? These questions will lead students to investigate multiple migrations in the African diasporic experience and aid our exploration of the reasons for migration throughout history and geography. In addition to critical discussions and written analysis, students will explore these topics through their own individual and group performances in class. No prior performance experience is necessary.

Class Format: seminar/discussion

Requirements/Evaluation: evaluation will be based upon class participation, in-class student performances, several 2-page performance response papers, one 10-12 page research paper, a final performance with a 3-page report

AMST 318(F) California: Myths, Peoples, Places (W)

Crosslistings: LATS 318/AMST 318/REL 318/COMP 328/ENVI 318

Crosslisting Between Paradise and Hell, between environmental disaster and agricultural wonderland, between Reagan and Berkeley, between a land of all nations and a land of multicultural, a diversity of myths have been inscribed onto and pursued within the space we call California. How did certain narratives of California come to be, who has imagined California in certain ways, and why? What is the relationship between certain myths, the peoples who have imagined them, and the other peoples who have shared California dreams? In this course, we will examine some of the myths that surround California by looking at a few specific moments of interaction between the peoples who have come to make California home and the specific places in which they have interacted with each other. Of special interest will be imaginations of the Spanish missions, the Gold Rush, agricultural California, wilderness California, California as “sprawling multicultural dystopia,” and California as “west of the west.”

Class Format: seminar

Requirements/Evaluation: this course will be mostly discussion oriented, with short writing exercises, one 3-page essay, review essay with mandatory revision, one 5- to 8-page midterm review essay, and a final 10- to 15-page comparative review essay

Prerequisites: none

AMST 319 Ethnographic Approaches to African Studies

Crosslistings: AFR 319/ISOC 319/AMST 319

Ethnography is the systematic study and recording of human cultures. It involves the collection and analysis of information from multiple sources including (but not limited to) first-person accounts, life histories, interviews, observations, and autobiographical materials. Within African Studies, ethnographic approaches have been utilized to reflect complex narratives of black experience throughout the Diaspora. This seminar is a critical introduction to the theory, method, and practice of ethnography in African studies. We will explore a variety of cultures and settings, and discuss the practical, methodological, and ethical issues related to ethnography. Three broad questions will dominate our discussions: 1) What are the theoretical, practical, and stylistic tools needed to fashion compelling ethnographies that get to the heart of what it means to document African experience? 2) What are the ethical and political implications of representing African perspectives in fieldwork studies? 3) What are the strengths and limitations of ethnography as a research method in African studies? Each student will utilize the materials covered in the course to research and write his or her own ethnography.

Class Format: seminar

Requirements/Evaluation: evaluation will be based upon class participation, weekly response papers, a 5- to 7-page critical book review, and the construction of a mini-ethnography

Prerequisites: none

Enrollment Preferences: Africana Studies concentrators, Women’s, Gender and Sexuality Studies majors, Religion majors

AMST 320 Dangerous Bodies: Black Womanhood, Sexuality & Popular Culture

Crosslistings: AFR 320/AMST 320/ WGSS 320

Whether presented as maternal saints, diva, video vixens, or bitches, black female celebrities navigate a tumultuous terrain in popular culture. This course considers the ways that black female celebrities such as Oprah, Rihanna, Nicki Minaj, Beyoncé, Janet Jackson, and Michelle Obama negotiate womanhood and sexuality, and the popular landscapes through which we witness that negotiation. It also engages contemporary black feminist scholarship, which most frequently presents the presentation of black female bodies in popular media forms as exploitive. We will review historical stereotypes to black women in popular media forms, discuss the history of the “politics of respectability” within black culture, engage black feminist responses to these types, and examine theoretical approaches to assess social constructions of womanhood and sexuality. We will also consider provocative questions relevant to discussions of contemporary black sexual politics. How should we view these women as feminists? Are they merely representatives of cultural commodification and control of black women’s bodies? Do these women best exemplify the reiteration of problematic racializations? Are they positive models for demonstrating female empowerment, agency, or “fierceness”? This course explores the histories of representation of black female figures in popular culture, and in so doing, troubles contemporary considerations of black womanhood and sexuality.

Class Format: seminar
Requirements/Evaluation: evaluation will be based on attendance/participation, short response papers, and a midterm and final portfolio.

AMST 323(F) Comic Lives: Graphic Novels & Dangerous Histories of the African Diaspora

Crosslistings: AFR 323/AMST 323/ARTH 223/COMP 322/ENGL 356

This course explores how the graphic novel has been an effective, provocative and at times controversial medium for representing racialized histories. Drawing on graphic novels such as Jeremy Love's Bayou and Ho Che Anderson's King: A Comic Biography, this course illustrates and critiques multiple ways the graphic novel commentaries word and image to create more sensorial access into ethnic trauma, challenges and interventions in critical moments of resistance throughout history. Students will practice analyzing graphic novels and comic strips, with the help of critical essays, reviews and film; the chosen texts will center on Africana cultures, prompting students to consider how the graphic novel may act as a useful alternate history for marginalized peoples. During the course, students will keep a journal with images, themes and reflections and will use Comic Life software and ipads to create their own graphic short stories based on historical and/or autobiographical narratives.

Class Format: seminar

Requirements/Evaluation: evaluation will be based upon class participation, weekly written responses, student-led facilitation, one 3-page graphic analysis, one 6- to 8-page essay, and a final project (producing a graphic short story with Comic Life)

Extra Info: may not be taken on a pass/fail basis, not available for the fifth course option

AMST 327 Racial and Religious Mixture (D) (W)

Crosslistings: LATS 427/REL 314/AMST 327/AFR 427

The very term “mixture” implies that two or more distinct substances have been brought together. Distinctions of race and religion are social fictions; yet, the lived ramifications of these social fictions involve tense struggles over the boundaries of racial and religious communities. These boundaries are not just ideas but also practices. In the history of the Americas, mixed racial and religious identities and experiences have more often been the result of violent clashes than romantic encounters. Still, the romanticization of the New World as a geography that makes such mixtures possible reaches back to the earliest days of Spanish conquest in the Americas. This course critically reconsiders varying ways that racial and religious mixtures have been imagined, defined, challenged, negotiated, and survived under imaginative and legal rubrics of mestizaje, creolization, transculturation, passing, syncretism, religious hybridity, and mixed race studies. Focusing on how different peoples have critically theorized and made meaning about and out of racial and religious differences and interconnections, this EDI course investigates the ways that knowledge about mixture and difference have been critically constructed and transformed.

Class Format: seminar

Requirements/Evaluation: evaluation based on participation, presentations, annotated bibliography, short writing assignments, writing workshop participation, and a 20- to 25-page research paper

AMST 328(F) American Social Dramas (W)

Crosslistings: SOC 328/AMST 328/COMP 325/THEA 328

As Shakespeare wrote memorably in Hamlet, "All the world's a stage, and all the men and women merely players." Sociologists have heeded Shakespeare's wisdom, arguing that social and political events are "performances" that take shape in accordance with familiar cultural scripts, and indeed that social acts can be critically interpreted real-world events using structures from literary and dramatic genres such as romance, irony, comedy, and tragedy. We will explore this thesis through the lens of contemporary American political events, including the Clinton-Lewinsky scandal, September 11, Hurricane Katrina, the 2012 presidential election, and current debates over Confederate symbolism. We will also pay careful attention to the unfolding drama associated with the 2016 presidential election. How do social performances and struggles to "control the narrative" shape the meanings and outcomes of political events? Are they merely "spectacles," or wellspring's for genuine civic participation? What role do political comedy, satire, and social media play in shaping the trajectory of contemporary events? Major authors will include Victor Turner, Clifford Geertz, J.L. Austin, Erving Goffman, and Jeffrey Alexander. Throughout the semester, each student will develop a significant project on a political event of his or her choosing.

Class Format: seminar

Requirements/Evaluation: active participation, five 2-page response papers, a 12-page paper that will go through draft and revision stage, and a presentation

Prerequisites: none

Enrollment Preferences: Anthropology and Sociology majors

AMST 329 Revolt and Revelation in 20th-Century Americas (D)

Crosslistings: LATS 328/AFR 328/AMST 329/REL 223

Writing in 1971, Dominican priest and Peruvian theologian Gustavo Gutierrez asked "Is the Church fulfilling a purely religious role when by its silence or faintheartedness it permits the impending social and political crisis to go on?" Such a question encapsulates the sometimes agonistic and other times deeply intertwined relationships between religious institutions, religious thought, and movements for political transformation in the 20th century Americas. This course will examine those forms of "God-talk" broadly termed "liberation theologies" that criticized and challenged social relationships of class, colonization, race, culture, gender, sexuality, (dis)ability, and ecology. These theologies were borne out of and in turn deeply shaped struggles against oppressive regimes and structures in the Americas, and as such we will focus on some specific theological writings—such as those of Gutierrez—and their relationship to distinct social movements and struggles over land, economy, and political power, especially in Brazil, El Salvador, Mexico, Perú, and the United States of America between 1960-2000. This EDI course examines issues of social and institutional power relations that influence particular religious formations as well as the way religious formations respond to and structure social and institutional power relations.

Class Format: lecture/discussion

Requirements/Evaluation: this course will be mostly discussion, with grading based upon participation, short writing exercises, a 5- to 8-page take-home midterm essay, and a 8- to 12-page final essay

Prerequisites: none

Enrollment Preferences: majors and concentrators

Enrollment Limit: none
AMST 331 New Orleans as Muse: Literature, Music, Art, Film and Theatre in the City

Crosslistings: THEA 330/COMP 330/AMST 331

This course will look at the representation of a city and how it has influenced artists. Students will read, listen to, and view a selection of the literature, music, film, and art that represent the city from both pre-flooding and current re-building. Reading selections will include examples such as Harper's Weekly (Lafradéo Hearn), The Awakening (Kate Chopin), A Streetcar Named Desire (Tennessee Williams), The Moviegoer (Walker Percy), Why New Orleans Matters (Tom Piazza), A Confederacy of Dunces (John Kennedy O’Toole), New Orleans Sketches (William Faulkner), One Dead in the Attic (Chris Rose).

Film selections such as A Streetcar Named Desire, An Interview with a Vampire, The Curious Case of Benjamin Briton, When the Levees Broke, Treme, Waiting for Godot (in the 9th Ward). Music selections from examples such as Louis Moreau Gottschalk, Jelly Roll Morton, Louis Armstrong, Fats Domino, The Meters, Kermit Ruffins and the Rebirth Brass Band. Art selections will come from a variety of sources such as THE OGDEN Museum of Southern Art and Prospect 1, 2, & 3.

Class Format: seminar

Requirements/Evaluation: will be on active participation, weekly response essays on film viewings, 2 short essays on class topics, a final paper and a contemporary creative project/performance

Prerequisites: none

Enrollment Preferences: none

Enrollment Limit: 12

AMST 332 Race, Gender, and Performance from Literature to Social Media (D)

Crosslistings: WGSS 330/COMP 339/AMST 332/LATS 335/THEA 322

How can contemporary performance expand practices and ideologies of belonging in the United States, as figured through race, gender, and sexuality? This spring course will begin with readings of dramatic literature including Suzanne-Lon Parks’s Venus, David Henry Hwang’s M. Butterfly, and Young Jean Lee’s The Chosen to analyze literary and staged performance, then continue to discussions and readings on the performance of everyday life via the work of performance artists including Adrian Piper, Nao Bustamante, and Yoko Ono. We will develop shared vocabulary and methodologies of performance studies, including readings by scholars including J.L. Austin, Judith Butler, and José Esteban Muñoz. This course will engage foundational texts to performance studies and offer an interdisciplinary approach to scholarship in gender and sexuality studies, critical ethnic studies, and performance studies from the 1970s to the present. This course recognizes a suspicion for diversity discourses that universalize human experience and asks: how do we resist normativizing forces without reinforcing the regulating logics of those forces?

This EDI course will critically engage with diversity from the heterogeneous and multiple perspectives of racial, sexual, and gender minorities, asking students not only to examine the diversity of human experience but to explore the political stakes of creative expression through interdisciplinary methods and forms.

Class Format: seminar

Requirements/Evaluation: in-class participation, partnered presentation, weekly reading responses, performance analysis, final paper

Extra Info: not available for the fifth course option

AMST 333 An American Family and "Reality" Television (W)

Crosslistings: ARTH 310/WGSS 312/AMST 333/COMP 316

An American Family was a popular documentary series that featured the Loud family from Santa Barbara, California, whose everyday lives were broadcast on national television. The series generated an enormous amount of media attention, commentary, and controversy when it premiered on PBS in 1973. Today, it is regarded as the origin of so-called "Reality TV." In addition to challenging standard rules for television programming, the show challenged social conventions and asked viewers to think seriously about family relations, sexuality, domesticity, and the "American dream." Documenting the family’s life over the course of eight months, the series chronicled the dissolution of the Louds’ marriage and broadcast the "coming out" of eldest son Lance Loud, the first star of reality television.

In this class, we will view the An American Family series in its entirety, research the program’s historical reception, and analyze its influence on broadcast and film media, particularly on "reality" television. A final 16- to 20-page research paper will be prepared in stages, including a 6- to 8-page midterm essay that will be revised and expanded over the course of the semester.

Class Format: seminar

Requirements/Evaluation: class presentations, research assignments, and final 16- to 20-page research paper

Extra Info: not available on a pass/fail basis; not available for the fifth course option

AMST 334(F) Sexual Economies (D)

Crosslistings: WGSS 301/AMST 334/ANTH 301

This course examines various forms of sexual labor in a variety of global contexts with an emphasis on contemporary anthropological and sociological research and its implications for public policy. Our topics include: (a) traditional sex work (e.g., pornography, escorting, street prostitution, brothels, sex tourism), (b) sexualized labor without physical contact (e.g., stripping, burlesque, phone/online sex), and also (c) contemporary debates about sex trafficking and sex worker migration. Because of our ethnographic focus, the readings for this class will frequently foreground the lived experiences of sex workers from a variety of nations, races, classes, and backgrounds in order to explore the broader social implications of our subject matter. A key component of this course is a field trip to New York City to meet with sex workers and sex worker rights advocates. (Note: students should be advised that we will necessarily encounter and discuss adult content and images that some may find offensive.)

Class Format: seminar

Requirements/Evaluation: mid-term essay exam, research proposals/annotated bibliography, app 10-15- page final research paper, field trip reaction paper

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: none

Enrollment Preferences: Women’s Gender & Sexuality Studies majors; short statement of interest

AMST 335(F,S) Uncovering Williams

Crosslistings: AMST 335/ARTH 335

Sparked by current controversies around visual representations at Williams, this course—a joint effort of the Williams College Museum of Art and the American Studies Program—interrogates the history of the college and its relationship to land, people, architecture, and artifacts. Students in this course will examine the visual and material culture of Williams and the land it occupies to uncover how the long and complex history of the college reverberates in the spaces and places students, faculty, and staff traverse daily. We take seriously that objects and environments are not neutral but are the atmospheres that they reflect and produce. Our interdisciplinary approach draws from the methods and theories of American studies, art history, material culture studies, critical race theory, gender studies, and eco-criticism. Topics of discussion may include: the foundation of the college and displacement of native populations; buildings, objects, and monuments linked to Williams’ evangelical history and the role of missionaries in American imperialism; the
symbolic meaning of the varied architectural styles at the college; and the visibility/invisibility of the college’s relationship to slavery and Abolitionism.

Class Format: seminar

Requirements/Evaluation: participation (discussion, GLOW posts), 2-3 short papers, one 5- to 6-page midterm paper, and a 10- to 12-page final project (either a research paper or a substantial arts-type project) + bibliography

Extra Info: may not be taken on a pass/fail basis

AMST 336T Two American Poets: Wallace Stevens and John Ashbery (W)

Crosslistings: AMST 336/ENGL 320/COMP 335

This tutorial focuses on the work of two major American poets who are known for their “difficult” poetry. In some respects, Stevens (1879-1955) and Ashbery (b. 1927) are to the twenty-first century what Stevens is to the modernist poet, perhaps the most philosophically oriented American poet of the twentieth century, and Ashbery is considered by most critics to be the most important American poet alive. Students will do close readings of their poems (and one play, “Three Travelers Watch a Sunrise”, by Stevens), as well as writing on poetry and art. We will discuss the overlaps between Stevens’ and Ashbery’s work and lives—their having grown up in the Northeast and attended Harvard, what some see as the abstractness of their writing, their mastery of the lyric form, among others—but also the differences: Ashbery’s sexuality, his having lived in France, the supposedly more “avant-garde” nature of Ashbery’s work, and so on. Along the way, we will ask questions about the nature of poetic difficulty, of abstraction, of the (lyric) poetic speaker in their work, of poetic tone, of the link between the poem and the world (e.g., in description), of the thinking and philosophizing that poems do. We will also ask about their links to major poetry movements (Modernism, the New York School) and pose questions that are rarely asked about their poetry, such as “What are their politics, implicit and explicit, in their poems?” “What are their views about the United States and American society and culture?” “What assumptions about race, gender and class are embedded in their poetry?” And, always, we will be paying close attention to the question of form and language in Stevens’ and Ashbery’s poetry.

Class Format: tutorial

AMST 337(F) The Black Protest Tradition in America from Prince Hall to Black Lives Matter

Crosslistings: ENGL 336/AFR 337/AMST 337

This course examines the development of various overlapping African American and Afro-Caribbean protest traditions in the past two hundred years, such as Abolitionism, early reparations movements, the civil rights movements, the Black Panthers, black feminism, and Black Lives Matter. We will read a variety of speeches, essays, poems, songs, sermons, and pamphlets by writers, activists, and artists such as David Walker, Robert Wedderburn, Anna Julia Cooper, Ella Baker, Martin Luther King Jr, Malcolm X, Amin Baraka, Angela Davis, George Jackson, and the Combahee River Collective. We will also examine the documents and online-syllabi of the Black Lives Matter movement. This course fulfills the EID requirement as its points of focus are race formation in the US and the black liberation tradition that developed in opposition to racist legal and social norms both at home and abroad.

Class Format: seminar

Requirements/Evaluation: 3 response papers (4-5, 5-6 and 6-7 pages) during the course of the semester. Students will also prepare in-class presentations and participate in discussion

Extra Info: may not be taken on a pass/fail basis

AMST 338(F) The American Renaissance

Crosslistings: ENGL 338/AMST 338

"The American Renaissance" is the name given to US literature from 1830-1860. The explosive cultural energy of this period was provided by expansionist optimism, religious and spiritual experimentation, the horror of slavery and the looming Civil War. It was a period of contradictions: an intellectual exploration of Emerson, Thoreau, and Whitman, or the existential despair of Poe, Hawthorne, Dickinson and Melville, all in the light of the brilliant escaped slave autobiography of Harriet Jacobs, then you won’t grasp much of the cultural history of the United States in the two following centuries.

Class Format: seminar

Requirements/Evaluation: 3 papers totaling about 15 pages, class participation

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

AMST 339 Latina/o Musical Cultures: Sounding out Gender, Race, and Sexuality (D) (W)

Crosslistings: LATS 338/AMST 339/WGSS 338

In this class we will investigate a wide variety of Latina/o popular musical and dance forms, with particular emphasis on questions of gender, sexuality, and ethno-racial identity. Employing interdisciplinary materials and approaches, this course focuses on the sonic and visual analysis of contemporary Latina/o popular music and the identities of its producers, performers, and audiences. We will focus on the following questions, among others: How are the various facets of Latina/o identities expressed through popular music and dance? In what ways do gender, sexuality, and ethno-racial identity inform the performance and interpretation of particular Latina/o musical forms? What unique role does sound play in our understanding of popular music and identity?

Class Format: seminar

Requirements/Evaluation: class participation, one semester-long original research project conducted in stages

Extra Info: may not be taken on a pass/fail basis

Prerequisites: prior courses in AMST, LATS, or WGSS; not open to first-year students

AMST 341(S) American Genders, American Sexualities (D)

Crosslistings: ENGL 341/WGSS 342/AMST 341

This course investigates how sexual identities, desires, and acts are represented and reproduced in American literary and popular culture. Focusing on two cultural rich periods—roughly 1880-1940 (when the terms "homosexual" and "heterosexual" came to connote discrete sexual identities), and the contemporary context of the "postmodern" 21-century—we will
explore what it means to read and theorize "queerly." Among the questions we will ask: What counts as "sex" or "sexual identity" in a text? Are there definably lesbian, gay, bisexual, queer or transgender writing styles or cultural practices? What does sexuality have to do with gender? How are sexual subjectivities intertwined with race, ethnicity, class, and other identities and identifications? Why has "queerness" proven to be such a powerful and sometimes powerfully contested concept? We will also explore what impact particular historical events, such as the rise of sexology, the Harlem Renaissance, and the emergence of a transgender movement have had on queer cultural production. Readings may include works by the following authors: Butler, Cather, Diaz, Ferguson, Fitzgerald, Foucault, Freud, Hammonds, Hughes, James, Larsen, Lorde, Muñoz, Rich, Rodriguez, Sedgwick, and Stein, as well as screenings of contemporary videos and films. This course meets the requirements of the Exploring Diversity Initiative in that it focuses on empathetic understanding, power and privilege, and critical theorization, especially in relation to class, gender, sexuality, race and ethnicity within a U.S. context.

Class Format: discussion/seminar
Requirements/Evaluation: active class participation, several short writing assignments, two 5-page papers, and one 8- to 10-page paper
Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

AMST 342T Interlives: Nineteenth-Century American Literature and the Idea of Home (W)
Crosslistings: AMST 342/COMP 348
We often discuss US history in terms of leaving home: the escape from an old world and the discovery of a new one, the journey from a civilized east to a western frontier, the violent displacement of indigenous peoples and Africans from their native lands. In contrast to these narratives, this course is about staying home. It will explore houses as both actual structures and imaginary places in the work of several major nineteenth-century American writers. We will think about the home as a real space whose walls, windows, and doors organized domestic life—how and when individuals worked, ate, slept, had sex, were enslaved, raised children, cared for the sick, and died—and study the home’s functions as a metaphor for big, abstract ideas about privacy and politics, individualism and nationhood, escape and return, freedom and oppression. Through the careful examination of fiction and personal letters, as well as poetry, photographs, and domestic manuals, the class will consider what it meant to be "at home", what it meant to be imprisoned there, and what it meant to run away. The syllabus will include writing by J.H. Banka, Gustave de Beaumont and Alexis de Tocqueville, Emily Dickinson, Frederick Douglass, Charlotte Perkins Gilman, Harriet Jacobs, Herman Melville, Florence Nightingale, Edgar Allan Poe, Jacob Riis, Henry David Thoreau, Mark Twain and Edith Wharton, as well as secondary materials by Gaston Bachelard, Russ Castronovo, Michel Foucault, Diana Fuss, Caleb Smith, and Wharton (on decorating).

Class Format: tutorial
Requirements/Evaluation: participation, five to six 5-page tutorial papers, five in six 2-page response papers
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Enrollment Preferences: Sophomore, Junior, or Senior standing and at least one previous class in American Studies, English, or Comparative literature, or permission of the instructor

AMST 343(S) Contemporary Theatre and Performance Crosslistings: THEA 345/ENGL 349/COMP 355/AMST 345
As Gertrude Stein once remarked, "The hardest thing is to know one's present moment." What is going on in theatre and performance today? What are the hot topics, the new genres, the avant-garde, the popular? This course will consider both experimental and mainstream drama and performance in the United States from the past twenty years, focusing on topics such as: postmodern performance, theatre of memory, one-person performance, collaborative authorship, alternative theatre, performance art, postdramatic theatre, devised performance, virtuosic theatre, immersive theatre, social practice, neo-collectivism, and more. As part of the seminar, students will conduct individual research on selected topics and present their findings through oral reports. We will take a trip to New York to see a show and speak with contemporary theatre makers. Artists and groups considered may include: The Wooster Group, Richard Foreman, Robert Wilson, Bill T. Jones/Arnie Zane, Caryl Churchill, Tony Kushner, Suzan-Lori Parks, Sarah Kane, Will Eno, Richard Maxwell, Young Jean Lee, Annie Baker, Branden Jacobs-Jenkins, Quiara Alegria Hudes, Anne Washburn, Elevator Repair Service, Nature Theatre of Oklahoma, The Civilians, and many others. As a final project, students will work individually or in small groups to create a script or short performance that addresses the question: "What is the most important story to be telling right now?"

Class Format: seminar
Requirements/Evaluation: evaluation will be based on written and dramaturgical-based assignments, an oral presentation, as well as in-class discussions and a final creative writing and/or performance project

AMST 344(S) When Harlem was in Vogue (D)
Crosslistings: ENGL 334/AFR 335/AMST 344
This course will examine the aesthetics and politics of the first modern African American cultural movement, known today as the Harlem Renaissance. In our readings of key literary texts by authors such as Alain Locke, Jessie Fauset, Zora Neale Hurston, Eric Walrond, Langston Hughes, Claude McKay, Nella Larsen, and Jean Toomer, we will discuss both the national and global contexts of so-called "New Negro Writing." Furthermore, we will trace the heated debates between Harlem's leading intellectuals and artists on the definitions of Black art, the themes and language most appropriate to "race literature" (as well as those seen as least appropriate to it), the responsibilities of the Black artist and his or her position vis-a-vis American and world literature. This course fulfills the EDI requirement by examining the relationship between race and canon-making in the early twentieth century.

Class Format: seminar
Requirements/Evaluation: 3 response papers (4-5, 5-6 and 6-7 pages) during the course of the semester; students will also prepare in-class presentations and participate in discussion

AMST 346 Hispanics/o and the Media: From Production to Consumption

This interdisciplinary course focuses on the areas of Latina/o media production, policy, content, and consumption in an attempt to answer the following questions, among others: How do Latinas/o construct identity (and have their identities constructed for them) through the media? How can we best understand the complex relationship between consumer, producer, and media text? How are Latina/o stereotypes constructed and circulated in mass media? Where do issues of Latina/o consumer agency come into play? In what ways does popular media affect our understandings of ethno-racial identities, gender, sexuality, class, language, and nation?

Class Format: seminar
Requirements/Evaluation: evaluation to be based on student participation, one 2- to 3-page close reading exercise, and an original 12- to 15 page research paper conducted in stages
Extra Info: may not be taken on a pass/fail basis

AMST 349(S) Sexuality and US Literatures of the 19th Century (D)

If homosexuality and heterosexuality, as it is commonly argued, only came into being as legible identities at the end of the nineteenth century, what constituted “sexualities” before that? This course will explore how sexualities were expressed, regulated, denied and embraced “before identity” through reading closely some of the most central literary and cultural works of the period alongside a set of methodologically and theoretically diverse critical works that engage this query. Some questions we may explore include: What counts as sex and why would that be important to understanding a work of literature? What effect does race, ethnicity, gender, class and other differences make on sexual expression and regulation? How does literature itself represent, theorize, and respond to discourses of desire? Authors whose works we may explore include Emily Dickinson, Frederick Douglass, Harriet Jacobs, Henry James, Herman Melville, and Ralph Waldo Emerson.

Class Format: seminar
Requirements/Evaluation: engaged and thoughtful discussion, in-class writing, oral presentation, one 5- to 7-page paper and one 8- to 10-page paper
Extra Info: may not be taken on a pass/fail basis
Prerequisites: none
Enrollment Preferences: ENGL, WGSS, and AMST majors
Enrollment Limit: 19
Expected Class Size: 19
Distributional Requirements: Division 2
Exploring Diversity
Other Attributes: ENGL Literary Histories B

AMST 352(S) Grassroots Organizing and Civil Resistance

This course examines the ways that ordinary people exercise collective power to influence elites, access resources, and even topple authoritarian governments. We will explore a variety of case studies—from the U.S. labor movement and urban community organizing, to recent direct action campaigns to prevent climate catastrophe—in order to gain insight into the art and science of grassroots mobilization. The class will make use of scholarship from the fields of history, sociology, and peace studies to probe the nature of political consent and the efficacy of forms of nonviolent action, such as boycotts, strikes, and blockades. Most importantly, however, we will draw from the personal expertise, tool kits, and training manuals of on-the-ground organizers to develop practical skill sets that can be applied in a variety of settings. Students will gain hands-on experience with important organizing techniques, such as power-mapping, 1-on-1 conversations, and action scenario planning. We will also consider the importance of expressive cultures and artistic practices to social change efforts, and delve into abiding challenges, such as building coalitions across race and class differences. The course will prove useful for those considering careers in social work, the labor movement, international NGOs, the law, public education, or political journalism.

Class Format: seminar
Requirements/Evaluation: attendance and participation; in-person skills assessments; group project; short essay-style final exam
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none
Enrollment Preferences: American Studies majors
Enrollment Limit: 15
Expected Class Size: 15
Distributional Requirements: Division 2

AMST 364(F) History of the Old South

Crosslistings: HIST 364/APR 364/AMST 364

During the course of the semester, we shall investigate two broad, interrelated topics: slavery in the antebellum South, and the impact of slavery on Southern civilization. Our approach will be primarily topical. In the first half of the course, we shall look at subjects like the foreign and domestic slave trade, patterns of work and treatment, the nature of the master-slave relationship, resistance and rebellion, and slave cultural, social, and family life. The second half of the course will concentrate on the influence of the institution of slavery on the mind, social structure, and economy of the Old South, and slavery’s impact on Southern politics and the decision for secession in 1860-61.

Class Format: discussion
Requirements/Evaluation: evaluation based on class participation, two papers of moderate length, and a comprehensive final examination
Prerequisites: none; open to first-year students with instructor's permission
Enrollment Limit: 25
Expected Class Size: 25
Distributional Requirements: Division 2

AMST 365 History of the New South

Crosslistings: HIST 365/APR 365/AMST 365

A study of the history of the American South from 1877 to the present. Social, political and economic trends will be examined in some detail: the role of the “new南南南南南南南南南南南南南南南南南南南南南南南南南南南南南南南南南South” in Reconstruction, tenancy, sharecropping, and the rise of agrarian radicalism; Southern Progressivism; the coming of racial segregation and the destruction of the Jim Crow system during the years of the Civil Rights movement; Southern politics during the depression and post-World War II years.

Class Format: discussion
Requirements/Evaluation: evaluation based on class participation, two papers of moderate length, and a comprehensive final examination

Enrollment Limit: 25
Expected Class Size: 25
Distributional Requirements: Division 2

AMST 369 American History in Film

Crosslistings: HIST 369/AMST 369

Film can tell a story in ways that words alone cannot; films about history can “re-enact” the past for the purposes of entertainment. But like words, they can inform or dis-inform. Because the narrative arc requires resolution, movies may gloss over complexities. And yet, filmmakers also can deploy tools and methods that delve deeply into the intimacies of a singular life, the intricacies of a singular experience, or the nuances of a singular interaction. This course uses popular films about 19th and 20th century American history explore the
following questions: What do movies about America history (generally and specifically) convey about American culture? How have depictions of ideas, events, and people in American history changed over time? What historical depictions were or are controversial, when, and why? Why have certain films about American history sustained popularity? Films include Birth of a Nation; Gone with the Wind; Casablanca; Tora! Tora! Tora!; Malcolm X; Apocalypse Now; and others.

Class Format: seminar; the class will meet twice weekly, with a separate weekly film screening

Requirements/Evaluation: several reviews and short papers, and a final paper or project

Prerequisites: knowledge of American history strongly recommended

Enrollment Preferences: junior and senior History majors; then sophomores; then first years

Enrollment Limit: 25

Expected Class Size: 20

Distributional Requirements: Division 2

AMST 379 American Pragmatism

Crosslistings: PHIL 379/AMST 379

Along with jazz, pragmatism stands as the greatest uniquely American contribution to world culture. As the music wails in the background, we will study the classic pragmatists: William James, C. S. Peirce, and John Dewey. We will continue with the contemporary inheritors of the tradition: Cornel West, Richard Rorty, and Hilary Putnam. Although it has influenced both analytic and continental philosophy, pragmatism is a powerful third philosophical movement. Always asking what practical difference would it make, our authors investigate the central questions and disputes of philosophy, from epistemology and metaphysics to ethics and religion. Rather than seeing philosophy as an esoteric discipline, the pragmatic philosophers (with the possible exception of Peirce) see philosophy as integral to our culture and see themselves as public intellectuals.

Class Format: seminar

Requirements/Evaluation: final paper, several short assignments

Prerequisites: at least two PHIL courses

Enrollment Preferences: Philosophy and American Studies majors, then seniors and juniors of any major

Enrollment Limit: 25

AMST 383 Whiteness and Race in the History of the United States (D)

Crosslistings: HIST 383/WGSS 383/AMST 383

If race is socially and historically constructed, then the study of race relations in the U.S. extends to the topic of whiteness. And if we are never without the past, then "whiteness" must be a part of current discussions about American political culture, citizenship, and social issues. This course uses the prism of race to explore social, political, and economic development in U.S. history, following the development of "whiteness" through a chronology that begins in colonial Virginia, travels through immigration in the nineteenth century, examines racial politics and popular culture in the twentieth century, and ends with a look at the current issues. This course is framed by several questions: What about other analytical categories, like gender and class (or region or ethnicity or sexuality)? How have these experiences shaped and been shaped by the racial category of whiteness? Because historically whiteness has carried overtones of power, privilege, and wealth in the United States, the course necessarily critiques the roots of racial disparities. This class is not for the faint-hearted. Informed participation is necessary to its success. The course fulfills the requirements for the Exploring Diversity Initiative because it examines the differences and similarities between white Americans and other American cultures, and because it explores whiteness as a prism for understanding the operations of power and privilege in American society.

Class Format: discussion

Requirements/Evaluation: evaluation will be based on class participation and four papers

Enrollment Preferences: students in History, Africana Studies and Women's, Gender and Sexuality Studies

AMST 400 Real Indians: Indigeneity and the Authenticity Problem (D)

Crosslistings: AMST 400/ANTH 321

In settler societies, Indigenous peoples must be recognized by the state as sufficiently authentic in order to have rights as legitimate Indigenous peoples. This constitutes a structural dilemma in which Indigenous people face considerable pressure to embody external stereotypes and racial expectations. In this seminar, we will engage with recent scholarship in Native American and Indigenous Studies that addresses indigeneity as a political status, a supposed biological category and frozen temporal/geographic state, and a social experience. Our readings will also engage feminist and queer perspectives on the problem of authenticity and we will devote attention to the appropriation of Indigenous culture by non-Indigenous people. Our primary focus will be on Anglophone settler states, especially the United States and Canada, but we will occasionally draw upon examples elsewhere in the world. Moreover, we will discuss indigeneity as a source of global affinity among colonized peoples and as a human rights framework within the United Nations. This course will fulfill the Exploring Diversity Initiative (EDI) requirement as we will critically engage colonial power structures and processes of othering.

Class Format: seminar

Requirements/Evaluation: attendance/participation in discussion, two short papers, and a 12- to 15-page final

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

AMST 403 New Asian American, African American, Native American, and Latina/o Writing (D)

Crosslistings: AMST 403/COMP 375/ENGL 375/AFR 403/LATS 403

Critics reading minority writing often focus on its thematic—i.e., sociological—content. Such literature is usually presumed to be inseparable from the "identity"/body of the writer and read as autobiographical, ethnographic, representational, exotic. At the other end of the spectrum, avant-garde writing is seen to concern itself "purely" with formal questions, divorced from the socio-historical (and certainly not sullied by the taint of race). In the critical realm we currently inhabit, in which "race" is opposed to the "avant-garde," an experimental minority writer can indeed seem an oxymoron. In this class we will closely read recent work by Asian American, African American, Native American and Latina/o writers which challenges preconceptions about ethnic literature, avant-garde writing, genre categorization, among other things. The writing done by these mostly young, mostly urban, poets and fiction writers is some of the most exciting being written in the United States today; their texts push the boundaries of aesthetic form while simultaneously engaging questions of culture, politics, and history. Reading them forces us to re-think our received notions about literature. Authors to be read include Will Alexander, Sherwin Bitsui, Monica de la Torre, Sesshu Foster, Renee Gladman, Bhanu Kapil, Tan Lin, Tao Lin, Ed Roberson, James Thomas Stevens, Roberto Tejada, and Edwin Torres.

Class Format: seminar/discussion

Requirements/Evaluation: evaluation will be based on either one 16- to 18-page seminar paper or two shorter papers (one 7-8 pages and one 9-10 pages); short response papers; participation

Prerequisites: those taking this as an ENGL class must have previously taken a 100-level ENGL course

Enrollment Preferences: American Studies majors

Enrollment Limit: 15

Expected Class Size: 15

Distribution Notes: meets Division 2 requirement if registration is under AMST, AFR or LATS; meets Division 1 requirement if registration is under COMP or ENGL

AMST 408 Envisioning Urban Life: Objects, Subjects, and Everyday People (D) (W)

Classroom: LATS 408/AMST 408

What is the relationship between real life in urban communities and the multiple ways in which they are imagined? What does it mean to be "urban," to live in an "urban community," or to be the product of an "urban environment"? Who do we think the people are who populate these spaces? This course takes a critical look at specific populations, periods, and problems that have come to dominate and characterize our conceptions of the quality, form, and function of U.S. urban life. A few of the topics we may cover include historical accounts of the varied ways in which poverty and "urban culture" have been studied; race, class, and housing; the spatial practices of urban youth and the urban elderly; and gendered perspectives on social mobility and community activism. Finally, this course will explore how diverse social actors negotiate responses to their socio-spatial and economic circumstances, and, in the process, help envision and create different dimensions of the urban experience. The course fulfills the Exploring Diversity Initiative requirement as it explores how various forms of urban inequality affect the collective experience of social actors in diverse race and class categories. It focuses on the complex and contradictory ways in which urban residents confront, negotiate, and at times challenge social and structural inequalities and the changing political economy of U.S. cities.

Class Format: seminar
Requirements/Evaluation: evaluation will be based on class participation, a short essay, a series of writing exercises, and a seminar-long final project

AMST 416 U.S. Settler Colonialism and Empire (D) Crosslistings: AMST 416/HIST 363

Colonialism in American history is too often regarded as a finite period ending with independence or the "closing of the frontier," but as Patrick Wolfe argues, "settler colonialism is a structure, not an event." This seminar debunks the myth of the US as an "empire of liberty," and delves into a new generation of scholarship that frames settler colonialism and imperialism as deep-seated organizing principles that have characterized the United States since its founding. We approach settler colonialism as an enduring set of power relations and governmental practices that uphold Euro-American domination and seek to eliminate Indigenous power. The course covers topics such as: ideas of Manifest Destiny, military conquests of Native peoples, the shifting ideas of Manifest Destiny, military conquests of Native peoples, the shifting ideas of Manifest Destiny, military conquests of Native peoples, the shifting

AMST 440(S) Racial Capitalism Crosslistings: AMST 440/AFR 342

This class will interrogate the ways in which capitalist economies have "always and everywhere" relied upon forms of racist domination and exclusion. Although the United States will be in the foreground, the subject requires an international perspective by its very nature. We will consider the ways in which the violent expropriation of land from the indigenous peoples of the Americas, paired with chattel slavery and other coercive forms of labor, made possible the rise of a capitalist world economy centered in Europe during the early modern period. We will then explore ways racial divisions have undermined the potential for unified movements of poor and working people to challenge the prerogatives of wealthy citizens, and served to excuse imperial violence waged in the name of securing resources and "opening markets". Ideas about gender and sexuality always undergird racial imaginaries, so we will study, for instance, the ways rhetoric about "welfare queens" has impacted public assistance programs, and claims about the embodiment of Asian women play into the international division of labor. We will also be attentive to the means - from interracial unionism to national liberation struggles-by which subjects of racial capitalism have resisted its dehumanizing effects. This is a reading intensive course that will challenge students to synthesize historical
knowledge with concepts drawn from scholars working in the traditions of Marxist, decolonial, and materialist feminist thought, including: Angela Davis, Cedric Robinson, Aníbal Quijano, Chandra Mohanty, David Roediger, Stuart Hall, Ruth Wilson Gilmore, and Silvia Federici.

Class Format: seminar
Requirements/Evaluation: attendance and participation; a written mid-term exam; one in-class presentation; research paper proposal; 12-16 page research paper.
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

AMST 462 Art of California: Pacific Standard Time (D) (W)
Crosslistings: ARTH 462/AMST 462

In this course, we will study the visual arts and culture of California after 1960 and consider the region’s place in modern art history. We will focus on a series of recent exhibitions organized as part of a Getty initiative entitled Pacific Standard Time. Diverse in scope, these shows explored important developments in postwar art in California, including feminist art, African American assemblage, Chicano collectives, Modernist architecture, craft, and queer activism. In this seminar, we will pursue research projects directly related to the art exhibitions we study, and examine southern California conceptualism, photography, performance, painting, sculpture (including assemblage and installation), and video by artists both canonical and lesser known. Student projects will analyze the critical responses to the exhibitions, while also exploring the roles of archives, art criticism, and curatorial practice in contemporary art history. This course fulfills the Exploring Diversity Initiative requirement as it offers students a comparative study of cultures and societies and provides various interdisciplinary perspectives on the art and visual culture of a specific region.

Class Format: seminar
Requirements/Evaluation: evaluation will be based on several short writing and research assignments, oral presentations, class participation, and a final research paper of 16-20 pages written in stages over the course of the semester.
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

AMST 465 Race and Abstraction
Crosslistings: AMST 465/AFR 362/COMP 465/ENGL 326

Minority artists—writers and visual artists mainly and, to a lesser degree, musicians—face a difficult “double bind” when creating works of art: the expectation is that they, like their racially marked bodies, will exhibit their difference by means of concrete signifiers (details, tropes, narratives, themes) of racial difference. Thus, the question of difference. This course will examine a broad array of works ranging from the popular and the academic imaginary, minority subjects and artists, poets, and the abstract signifying category—homogeneous, undifferentiated, “other,” marginalized, non-universal—while racially “unmarked” (white) artists occupy the position of being universal and individual at once. The irony, of course, is that, say, an African American poet’s being read as an abstract signifier does not mean that the black subject or writer is seen as capable of engaging in abstract ideas. This course will ask questions about the problem of race and abstraction by looking at the work of various African American and Asian American writers, visual artists and musicians—including Will Alexander, Mei-mei Berssenbrugge, David Hammons, Yayoi Kusama, Tan Lin, Nathaniel Mackey, and Cecil Taylor—as well as critics. We will pay particular attention to formally experimental works.

This course will ask questions about the problem of race and abstraction by looking at the work of various African American and Asian American writers, visual artists and musicians—including Will Alexander, Mei-mei Berssenbrugge, John Yau, Cecil Taylor, David Hammons, and Yoko Ono—as well as critics. We will pay particular attention to formally experimental works.

AMST 469 Notions of Race and Ethnicity in American Culture (D)
Crosslistings: HIST 469/AMST 469

While “race” and “ethnicity” have always played fundamental roles in shaping the course of American culture and the definition of who is or who can be an “American,” our understanding of these concepts of race and ethnicity has often been less than clear. The purpose of this seminar is to examine how Americans have defined and articulated the concepts of race and ethnicity at various points in our history and how these ideas have been expressed in art, policy, practice, and theory. This course fulfills the Exploring Diversity Initiative because it examines various dynamics of power structures based on race and ethnic politics, as well as class and gender relations.

Class Format: seminar
Requirements/Evaluation: evaluation will be based on weekly response papers, an exercise with the Williams College Museum of Art, an annotated bibliography, and a final research paper of 20-25 pages; students will also be required to lead a class discussion.

AMST 478(F) Cold War Landscapes
Crosslistings: HIST 478/ENVI 478/AMST 478
The Cold War between the United States and the Soviet Union set in motion dramatic changes to the natural and built environments of many nations between 1945 and 1991. Nuclear test and missile launch sites, naval installations, military production operations, and border securitizations are just a few of the most obvious ways in which the stand-off between the two countries altered rural and urban landscapes around the world. But one can also see the Cold War as setting in motion less immediately direct but nonetheless profound changes to the way that many people saw and planned for the environments around them, as evidenced, for instance, by the rise of the American suburb, the reconstruction of postwar Europe, and agricultural and industrial initiatives in many developing nations. We will begin this seminar by exploring several distinct "Cold War landscapes" in the United States, then move on to examining others in Europe and the Soviet Union. We will spend the final weeks of the semester discussing examples from other parts of the world. Our approach to our topics will be interdisciplinary throughout the semester, and students are welcome to write their research papers on any geographical area of the world.

Class Format: seminar

Requirements/Evaluation: evaluation will be based on class participation, weekly critical writing, and a final 20- to 25-page research paper

Enrollment Preferences: History, Environmental Policy, and Environmental Science majors if over-enrolled

AMST 490T The Suburbs (W)
Crosslistings: HIST 491/ENVI 491/AMST 490
The suburbs transformed the United States. At the broadest level, they profoundly altered spatial residential geography (especially in terms of race), consumer expectations and behavior, governmental policies, cultural norms and assumptions, societal connections, and Americans' relationship to nature. More specifically, the different waves of post-World War II suburban development have both reflected large-scale shifts in how power and money have operated in the American political economy; and set in motion deep-seated changes in electoral politics, in Americans' understandings of how their income should be used, and in how the built landscape should be re-imagined. This tutorial will explore the rich historical literature that has emerged over the last twenty years to provide students with a history of the suburbs, to see the suburbs as more than simply collections of houses that drew individual homeownership to wanted to leave urban areas. We will focus most of our attention on the period from 1945 through the 1980s. Some of the questions we will consider will include: how did the first wave of suburban development bring together postwar racial and Cold War ideologies? Is it possible, as one historian has argued, that suburbs actually created the environmental movement of the 1960s? And how have historians understood the role that suburbs played in America's conservative political turn, leading to the election of Ronald Reagan?

Class Format: tutorial

Requirements/Evaluation: typical tutorial format; every other week, students will write and present orally a 5- to 7-page essay on the assigned readings; on alternate weeks, students will write a 2-page critique

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Writing Intensive

Other Attributes:
ANSO 205(S) Ways of Knowing

An applied exploration of how one makes sense of the social world through fieldwork. Some of the key questions of the course are: What are the philosophical and epistemological underpinnings of social inquiry? How does one frame intellectual problems and go about collecting, sifting, and assessing field materials? What are the uses and limits of statistical data? What is the importance of history to sociological and anthropological research? How can one use archival and other documentary materials to enrich ethnographic research? What are the empirical limits to interpretation? What is the relationship between historical and statistical data and the generation of social theory? How does the social organization of social research affect one's inquiry? What are the typical ethical dilemmas of fieldwork and of other kinds of social research? How do researchers' personal biographies and values shape their work? In the first half of the course, we will approach these problems concretely rather than abstractly through a series of case studies, drawing upon the field experiences of departmental faculty and guest speakers from different professional backgrounds. The second half of the course will be dedicated to a hands-on training in field methods in which the students will design and undertake their own pilot field projects.

Class Format: seminar
Requirements/Evaluation: full-participation in the seminar, several short papers, an independent ethnographic project and a final research proposal
Prerequisites: ANTH 101 or SOC 101 or permission of instructor
Enrollment Limit: 25
Expected Class Size: 25
Distributional Requirements: Division 2

ANSO 305(F) Social Theory

An introduction to social theory in anthropology and sociology, with strong emphasis on enduring themes that cut across disciplinary divides. What is modern about modern social theory? How do social thinkers construe "society" and "culture," and have these constructions withstood challenges over time? What role does human agency play in the unfolding of social life, and where does that sense of agency come from in the first place? What are the forces that animate social interaction on the level of individuals, social groups and communities, and/or nation states? What are the possibilities and limits of systematic approaches to the study of human social experience? The course emphasizes major differences between interpretive frameworks as well as the common elements that contribute to a deeper understanding of the social world.

Class Format: seminar
Requirements/Evaluation: full participation in the seminar, regular reading response papers, a major paper, and a take-home final
Extra Info: formerly ANSO 206
Prerequisites: ANTH 101 or SOC 101 or ANSO 205 or permission of the instructor
Enrollment Preferences: Anthropology and Sociology majors

ANSO 402(S) Senior Seminar

This capstone seminar combines intensive discussion and individual research. Half of the course will be dedicated to the discussion of current debates central to the concerns of both anthropology and sociology, such as the ethics of conducting fieldwork, humanitarianism and relief, global public health, poverty and the city, and environmental conservation. Among the topics discussed, the ethical dilemmas of conducting ethnography will be a common theme. The instructor will consult with the students in late fall to decide on the topics for discussion. The second half of the course will be devoted to independent individual original projects which should have a major ethnographic component. At the end of the course, students will present their projects to the seminar.

Class Format: seminar
Requirements/Evaluation: full participation, major research project and paper (30 pages), class presentation
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: only senior majors in Anthropology and Sociology, or permission of instructor
Enrollment Preferences: Anthropology and Sociology majors
Enrollment Limit: none
Expected Class Size: 12
Distributional Requirements: Division 2

Spring 2017
SEM Section: 01 TF 02:35 PM 03:50 PM Instructor: Antonia Foias

ANTH 101(F,S) How to Be Human (D)

Is there such a thing as "human nature"? Why have human societies developed such a bewildering range of customs to deal with problems common to people everywhere? This course addresses these questions by introducing students to the comparative study of human social life and culture. Topics surveyed in the course include economics, language and thought, kinship and marriage, law and politics, and the wide variations in human belief systems, including religions. The course also considers the ways that anthropology, a discipline that was until recently practiced almost exclusively by Westerners, approaches other societies in search of insights on our own customs and values. Ethnographic descriptions of both "simple" tribal societies and complex modern ones are a prominent part of the readings. This course explores differences and similarities between cultures and societies and ways in which they have interacted and responded to one another in the past.

Class Format: lecture/discussion of case studies and ethnographic films
Requirements/Evaluation: two short essays, a final examination and class participation
Prerequisites: first-year students and sophomores
Enrollment Preferences: first-year students and sophomores; juniors and seniors admitted only by permission of instructor
Enrollment Limit: 30
Expected Class Size: 30
Distributional Requirements: Division 2

ANTH 103 Pyramids, Bones, and Sherds: What is Archaeology?

Anthropology examines not only living societies, but also prehistoric cultures whose remains are found worldwide. This course will present how archaeology reconstructs the various aspects of human society from the physical record of prehistory. How do we study the subsistence and settlement patterns, the political and social organization, and the economy and ideology of prehistoric societies who have left behind mute material records? The objective of anthropological archaeology is to bring to life these prehistoric cultures through archaeological analysis. The different goals, approaches and methodologies of modern archaeology will be discussed theoretically and then applied to case studies.

Class Format: lecture/discussion/class presentations of case studies
Requirements/Evaluation: class presentations, two papers, midterm and final exams
Prerequisites: none
Enrollment Limit: 30
Expected Class Size: 25
Distributional Requirements: Division 2

Not Offered Academic Year 2017

LEC Instructor: Antonia Foias
ANTH 107(S) Introduction to Native American and Indigenous Studies (D)
Crosslistings: AMST 107/HIST 107/ANTH 107
This course provides an interdisciplinary introduction to the growing field of Native American and Indigenous Studies (NAIS). We will primarily focus on surveying historical and contemporary Indigenous issues in the United States, but we will occasionally draw upon parallels from settler states around the world. We will critically engage a wide variety of source materials, including historical documents, legal texts, films, essays, novels, and archaeological evidence. The course will explore Indigenous social and political experiences, histories of settler colonialism, constructions of Indigenous status and identity, intellectual histories, artistic production, gender and sexuality, decolonization, and self-governance. This course will highlight the intellectual breadth of Indigenous studies, introducing the field's key paradigms, theories, and methods. Because it focuses on cross-cultural interaction and power relations, this course satisfies the Exploring Diversity Initiative (EDI) requirement.

Class Format: seminar
Requirements/Evaluation: three essays (approximately 7 pages each) and class participation
Extra Info: may not be taken on a pass/fail basis
Prerequisites: none
Enrollment Limit: 25

ANTH 208 Afghanistan Post-Mortem
Crosslistings: ANTH 208/ASST 208/PSCI 220/GBST 208
The United States attacked and defeated the Afghan Talibab regime over in the course of a few short weeks in 2001. Over the next decade, the finality of that victory was brought into question as the Talibab regrouped and eventually reasserted itself as a formidable guerilla army that the U.S. military could not defeat. This course examines the history of American involvement in Afghanistan, beginning in the Cold War when the U.S. used Afghanistan as a test case for new models of political modernization and economic development, through the Soviet occupation and U.S. support for Islamic political parties in the 1980s, and continuing with the most recent abortive U.S. efforts at nation-building and social and political reform.

Class Format: seminar
Requirements/Evaluation: grading will be determined by class participation, two short essays, and a 15-page research paper
Extra Info: may not be taken on a pass/fail basis
Prerequisites: none
Enrollment Preferences: Anthropology and Sociology majors, Global Studies concentrators, Political Science and Asian Studies majors will get preference
Enrollment Limit: 25
Expected Class Size: 15-20

Not Offered Academic Year 2017
SEM Instructor: David Edwards

ANTH 209 Ecologies of Place: Culture, Commodities and Everyday Life
Crosslistings: ENVI 209/ANTH 209/AMST 209
This course will explore the environmental implications of everyday life in modern America. It will ask how cultural, political, economic, and ecological systems interact to produce ordinary places and vernacular landscapes, from campuses to cul-de-sacs, farms to forests, nation-states to the global. Combining approaches from cultural geography, environmental history, and political ecology, it will focus on the hidden lives of "things"—the commodities and technologies that form the basic building blocks of place: food, oil, water, wood, macadam. With strong emphasis on local-global relations, it will look beneath the surface of the ordinary to reveal the complex networks of power, meaning, and matter that connect "here" to "there," "now" to "then," and "us" to "them." In so doing, it will pursue parallel goals: to understand the socio-spatial processes shaping today’s global environment; and to explore the cultural systems through which those processes are understood and contested. Topics will include the bottled water controversy, factory farming and local agriculture, the political economy of lawns, and the cultural politics of invasive species.

Class Format: lecture/discussion
Requirements/Evaluation: three 5- to 7-page essays and several shorter writing assignments
Prerequisites: none; open to first-year students
Enrollment Limit: 20
Expected Class Size: 20
Distributional Requirements: Division 2

ANTH 210(S) The Challenge of ISIS
Crosslistings: ANTH 210/HIST 210/ARAB 210/RELU 240/GBST 210
What is ISIS and what does it want? Using historical and anthropological sources and perspectives, the course considers the origins, ideology and organization of the Islamic State. Beginning with an examination of early radical movements, including the Muslim Brotherhood, the Afghan mujahidin and Talibab, and al-Qaeda, the course will go on to investigate how ISIS derives and manifests its ideological and organizational structures from these earlier movements and how it deviates from them. We will look at distinct aspects of the movement, such as its use of social media, its extensive destruction of ancient historical sites, its staging of spectacles of violence, and its recruitment of Muslims from Europe and North America. We will also examine the ideological constitution of the movement, including its attitude toward and treatment of non-Muslims, its conceptualization of itself as a modern incarnation of the original Islamic caliphate, the ways in which it justifies its use of violence, and its apocalyptic vision of the present-day as End Time. Finally, we will evaluate current responses to ISIS, in the West and among Muslims in the Middle East and elsewhere, in terms of their effectiveness and strategic coherence.

Class Format: lecture
Requirements/Evaluation: blogs (4 main blog posts, responses to at least 3-4 other blogs each week) (30%); analytic paper or class history paper (35%); 2 midterms (35%)
Extra Info: may not be taken on a pass/fail basis
Prerequisites: none
Enrollment Limit: 40

ANTH 214(F) The Rise and Fall of Civilizations
Crosslistings: ANTH 214/ENVI 224
Over the centuries, philosophers and historians have asked how societies evolved from simple hunter-gatherer bands to complex urban civilizations. Human predatory and history have shown the repeated cycles of the rise, expansion and collapse of early civilizations in both the Old and New World. What do the similarities and differences in the development of these first civilizations tell us about the nature of societal change, civilization and the state, and human society itself? The course will examine these issues through an introductory survey of the earliest civilizations in Mesopotamia, Egypt, India, Mesoamerica and South America. Classical and modern theories on the nature, origin, and development of the state will be reviewed in light of the archaeological evidence.

Class Format: lecture/class discussion
Requirements/Evaluation: mid-term, final exam, paper, two quizzes
Prerequisites: none
Enrollment Limit: 30

ANTH 216T(S) Urbanism in the Ancient World (D) (W)
Crosslistings: ANTH 216/GBST 216
This is a course on cities in the ancient world, which will examine four major ancient urban centers (Nineveh and Nimrud, Iraq; Teotihuacan, Mexico; and Angkor, Cambodia) and end with a sustained, in-depth exploration of urbanism in prehispanic Maya civilization. As more and more people move into cities across the world, human societies are becoming forever transformed. This transformation into an urban globalized world has ancient roots at the beginning of the first civilizations in Eurasia and the Americas. We will delve deeply into the nature of the urban transformation by first exploring sociological and anthropological definitions of urbanism, and recent studies of modern urbanism. We will look at Nineveh, Nimrud, Teotihuacan, and Angkor to consider how ancient urbanism was distinct from modern cities, while at the same time, ancient urbanities had to deal with similar issues as residents of modern cities. We will then examine in more depth the cities of prehispanic Maya civilization, answering such questions as: how different were Maya cities from other premodern ones? Is there one type of Maya city or many? How different was life in Maya cities from life in Maya villages? What were the power structures of Maya cities? How common were immigrants and slaves in these ancient cities?
This course fulfills the Exploring Diversity Initiative through a comparative study of urban cultures and societies across the world in premodern times and by theorizing how power and privilege inequalities were manifested and dealt with in these ancient cities.
Class Format: tutorial
Requirements/Evaluation: 5-page papers every other week; oral responses on alternate weeks; tutorial attendance is required

ANTH 231 Survey of Linguistic Diversity: Meaning, Context and Communication
Crosslistings: JAPN 231/ANTH 231

This course explores ways in which human experiences, including vision, space, emotion and interpersonal awareness are encoded similarly or differently between Western and Asian languages. The course centers around two core areas of linguistics, semantics (study of meaning) and pragmatics

Class Format: team-taught, through a mixture of lectures and discussions
(study of meaning in context and use), which are discussed from cognitive, cultural and social perspectives. Discussion topics include: grammar and cognition, lexicon and culture, conceptual metaphor, honorific systems, and theories of politeness. Lectures and in-class activities will primarily focus on two typologically distant languages, English and Japanese, for comparison. Reading materials may include data from other languages as well, and students may work on languages of their interest for selected assignments.

Class Format: lecture
Requirements/Evaluation: evaluation will be based on class discussions/exercises, assignments and exams
Prerequisites: none; no previous knowledge of linguistics or of foreign languages is required; knowledge of Asian languages is beneficial; open to all
Enrollment Preferences: first-year and sophomore students
Enrollment Limit: 20
Expected Class Size: 20
Distribution Notes: meets Division 1 requirement if registration is under JAPN; meets Division 2 requirement if registration is under ANTH

ANTH 232(F) Town and Gown: Investigating the Relationship of College and Community

Team-taught by an anthropologist and a journalist, this course investigates the relationship between Williams College and the surrounding communities of Northern Berkshire County via ethnographic/journalistic research conducted by students. The course will look at several case studies centered on "town-gown" relations in different eras and locations in order to contextualize and compare the role of alcohol and athletics in town/gown relations, and how the increasing geographical material for understanding the relationship of Williams to its neighboring communities. Among the topics to be considered and possibly investigated will be the social and economic effects of colleges on local communities, the role of alcohol and athletics in town/gown relations, and how the increasing geographical material for understanding the relationship of Williams to its neighboring communities. The focus of the course will be on student research, and a large percentage of class time will be devoted to learning the basic techniques of ethnographic and journalistic research, including interviewing, oral historical research, survey research, and participant-observation. Each student will conduct a major research project of his or her own devising, which will culminate in an investigative report and a public presentation.

Class Format: seminar
Requirements/Evaluation: class participation, research exercises, major ethnographic research paper
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: a previous course in ANTH or SOC
Enrollment Preferences: Anthropology and Sociology majors
Enrollment Limit: 19

ANTH 233 Spiritual Crossroads: Religious Life in Southeast Asia (D)

Crosslistings: ANTH 233/ASST 233/REL 253

No region of the world presents a richer tapestry of religious beliefs, practices, and institutions than Southeast Asia. Buddhism, Hinduism, Christianity and Islam are all to be found and all of them interpenetrate and contend with each other and with a deep undergirding of animism, shamanism, and mystical folk belief systems. This course will survey these religious traditions through time and space, looking in particular at the growing tension between religion and the state as fundamentalism and religious militancy have spread into the region in recent times. All of Southeast Asia will be covered, but particular attention will be devoted to Indonesia, where religious blending and the growth of new fundamentalisms are both especially marked.

Class Format: seminar
Requirements/Evaluation: midterm, short essays, term paper
Prerequisites: none; open to non-majors
Enrollment Limit: 19

ANTH 246(F) India's Identities: Reproducing the Nation,Community and Individual (D) (W)

Crosslistings: REL 246/ANTH 246/WGSS 246/ASST 246

This course considers India's contradictory legacy as a booming Asian democracy and fragile society built upon deep and enduring divisions. Why is India's growing population so often described in terms of multiple identities or fragmenting oppositions — Hindu/Muslim, rich/poor, high caste/outcaste, male/female? What are the historic roots and ongoing causes that produce structural violence around these axes of difference? We pay particular attention to key moments (Partition, communal riots in Gujarat in 2002, Hyderabad in 1990, Delhi in 1984), and places (Punjab, Bengal, Jammu & Kashmir) for our analysis of how religion, gender, and class intersect to provide a landscape of communal violence, social hierarchy, and fragmented subjectivity in India today. We are as interested in discourses and practices that shore up these binaries as well as the third terms that attempt to transcend or diffuse them. For instance, we look at how Buddhism is and is not a middle path between Hindu/Muslim conflict in Indian Kashmir. Our course readings include ethnographic, sociological, and historical analyses, as well as oral histories and popular media. This course fulfills the Exploring Diversity Initiative by theorizing the ways that difference has been used to effect profound historical & social changes in India.

Class Format: tutorial
Requirements/Evaluation: weekly writing assignments and tutorial attendance every week
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Enrollment Limit: 10
Expected Class Size: 10
Distributional Requirements:
Division 2

Exploring Diversity
This course examines the relationship between body, gender, sex, and society in South Asia, using three countries and religions—India, Sri Lanka, and Bangladesh, and Hinduism, Buddhism, and Islam—as its foil. The course uses the body as a lens by which to unpack South Asian discourses that link body and sexuality with nation, community, and population. In particular, it explores a South Asian sociology that links individual and social bodies in ways that occasion solidarity as well as social suffering, violence as well as communal cohesion. We ask questions such as: How do bodies come to signify the purity or prosperity of the nation or community and with what social or discursive effects? We begin by unpacking foundational theories of the body as proposed by Mauss, Foucault, Douglas, and Bourdieu in order to better understand how local discourses of the body and sexuality were produced in South Asia. By considering how the human body can serve as a map for society and vice versa, we examine both classical discourses and modern institutional practices of the body including the temple, the monastery, the mosque, and the mendicant, as well as bodily practices such as yoga, celibacy, sex work, and new reproductive technologies. We also analyze how the body has served as a symbol of nation, community, and social health. Throughout, we are interested in the cross-cutting effects of gender and sex in perpetuating structural hierarchies and social suffering around the body in South Asia.

Class Format: seminar
Requirements/Evaluation: the course has weekly writing, more than 20 pages total, and there is student-faculty feedback every week including a week dedicated to a one-one writing feedback session between student and instructor
Prerequisites: none
Enrollment Preferences: majors in Religion, Women's, Gender and Sexuality Studies, Asian Studies and Anthropology/Sociology
Enrollment Limit: 19

This course introduces students to Buddhism by examining its ideas and practices as they have taken place in actual social contexts rather than as disembodied textual objects. After examining the main ideas and narratives of the tradition, we turn our attention to Thailand where we examine how these ideas and narratives have shaped a whole range of practices, from meditation to shamanistic rituals. We then consider the transnational implications of Buddhism as it has been undergoing in contemporary society, examining the rise of meditation movement, the changing role of monks and lay people, the resurgence of the nun order, the rise of Buddhist social activism and the development of new Buddhist social philosophies. We ask questions such as: How can Buddhism adapt to a modern global consumerist society? What are the transformations involved in this process and the role that Buddhism can play in such a global society? Should Buddhists take advantage of the opportunities of this new global culture or should they adopt a critical stance toward its consumerist values?
Class Format: lecture/discussion
Requirements/Evaluation: full attendance and active participation; two essays
Prerequisites: none
Enrollment Preferences: none
Enrollment Limit: 25
Expected Class Size: 25
Distributional Requirements: Division 2

Not Offered Academic Year 2017
LEC Instructor: Georges Dreyfus

This course looks at how gender has shaped Buddhism as well as how Buddhism has shaped gender. Most generally, it considers the myriad ways that Buddhist soteriology and practice produce the very gender differences they purport to overcome. How have the Buddha and his far-flung disciples institutionalized gender differences in spite of their putative goal of transcending duality? We examine the varying experiences of women and men in Buddhist societies and literatures as a lens by which to analyze the pervasive operation of social and gender hierarchies. Last but not least, we discuss how well feminist and American revisions of Buddhism have transformed gender and other forms of difference. Our analysis revolves around several interdependent themes. (1) How do female and male bodies become the subject of a specific set of Buddhist gazes? What does Buddhist discourse say about the possibility of gaining enlightenment in the female body? (2) How do gender divisions reflect deeper social divisions such as class and race in Buddhist discourse? (3) How have feminist deconstructions of Buddhist discourses transformed gender and social hierarchies in the contemporary world? This course fulfills the Exploring Diversity Initiative by seeking to theorize the ways that Buddhism has produced and reinscribed gender differences and social hierarchies.

ANTH 262(F) Language and Power

"A language is a dialect with an army and a navy." This (originally Yiddish) aphorism points to a paradox: language, often imagined to be a neutral or apolitical medium of communication, proves in practice to be a social domain fully implicated in the operations of power. How do we broadcast or disguise our social location by the way that we talk? How are ideologies and cultural values encoded into everyday speech and styles of speaking? In this introduction to linguistic anthropology, students will gain familiarity with key concepts (sociolect, performatives, code-switching, language ideology), themes (language and nationalism) and debates (the relation between language and thought) in the social scientific study of language. Assignments include regular postings of 1-page critical response papers and an ethnographic project: either an analysis of a linguistic ideology operative in the Williams or Berkshire County community, or an ethnographic micro-study of a linguistic interaction.

Class Format: lecture
Requirements/Evaluation: regular postings of critical response papers and an ethnographic final project
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none

ANTH 272 Sex and the Reproduction of Society

Crosslistings: ANTH 272/WGSS 272

Why is reproduction such a controversial subject in society today, especially in areas of medicine, culture, and religion? And why is the reproductive body subject to such highly ideological and yet contradictory types of practices and discourses across the globe? This course seeks to examine the myriad ways that societies police the range of practices surrounding reproduction— including fertility, conception, pregnancy, birth, abortion, and motherhood. We will pursue a comparative analysis of reproduction across major societies and cultures, through an in-depth look at specialized topics such as the new reproductive technologies, the medicalization and ritualization of obstetrics in America, the continuing controversies over abortion across the globe, and the ongoing debates about the rise of women and the "End of Men". Throughout the course, we remain focused on the cultural, social, and medical construction of birth and reproduction more generally. To this end, we explore the varying ritual and medical practices that surround reproduction in different cultural contexts, from high tech to low tech settings and societies. We will deconstruct the process of human reproduction through readings culled from a variety of cultures and disciplines including anthropology, medicine, religious studies, sociology, and gender and sexuality studies.

Class Format: seminar
Requirements/Evaluation: in-class presentations, attendance, class blog, final research paper
Prerequisites: none
Enrollment Preferences: majors in Anthropology/Sociology, Women's Gender & Sexuality Studies

Enrollment Limit: 25
Expected Class Size: 25

ANTH 279 The Body in Power

Crosslistings: ANTH 279/REL 274

The thesis of this course is that ritual plays a crucial role not only in legitimizing and mobilizing political power, but also in determining whether people decide to act in defense of or dissent against the status quo. In the first part of the semester, we focus on the ways in which different cultures construct categories of inclusion and exclusion, safe and dangerous, while also creating rituals for ensuring the preservation of the dominant social order against all that is transgressive and undermining to those in power. Of particular importance to our discussion will be consideration of how the body is ritually marked as either an expression of a linguistic ideology operative in the Williams or Berkshire County community, or an ethnographic micro-study of a linguistic interaction.

Class Format: seminar
Requirements/Evaluation: class participation, three short response papers, and one 10- to 12-page research paper
Prerequisites: none
Enrollment Preferences: open to first years
Enrollment Limit: 19
Expected Class Size: 19
Distributional Requirements: Division 2

Not Offered Academic Year 2017
SEM Instructor: Kim Gutschow

ANTH 301(F) Sexual Economies (D)

Crosslistings: WGSS 301/AMST 334/ANTH 301

This course examines various forms of sexual labor in a variety of global contexts with an emphasis on contemporary anthropological and sociological research and its implications for public policy. Our topics include: (a) traditional sex work (e.g., pornography, escorting, street prostitution, brothels, sex tourism), (b) sexualized labor without physical contact (e.g., stripping, burlesque, phone/online sex), and also (c) contemporary debates about sex trafficking and sex worker migration. Because of our ethnographic focus, the readings for this class will frequently foreground the lived experiences of sex workers from a variety of nations, races, classes, and backgrounds in order to explore the broader social implications of our subject matter. A key component of this course is a field trip to New York City to meet with sex workers and sex worker rights advocates. (Note: students should be advised that we will necessarily encounter and discuss adult content and images that some may find offensive.)

Class Format: seminar
Requirements/Evaluation: mid-term essay exam, research proposals/annotated bibliography, app 10-15-page final research paper, field trip reaction paper

ANTH 321 Real Indians: Indigeneity and the Authenticity Problem (D)

Crosslistings: AMST 400/ANTH 321

In settler societies, Indigenous peoples must be recognized by the state as sufficiently authentic in order to have rights as legitimate Indigenous peoples. This constitutes a structural dilemma in which Indigenous people face considerable pressure to embody external stereotypes and racial expectations. In this seminar, we will engage with recent scholarship in Native American and Indigenous Studies that address indigeneity as a political status, a supposed biological category and frozen temporal/geographic state, and a social experience. Our readings will also engage feminist and queer perspectives on the problem of authenticity and we will devote attention to the appropriation of Indigenous culture by non-Indigenous people. Our primary focus will be on Anglophone settler states, especially the United States and...
Canada, but we will occasionally draw upon examples elsewhere in the world. Moreover, we will discuss indigeneity as a source of global affinity among colonized peoples and as a human rights framework within the United Nations. This course will satisfy the Exploring Diversity Initiative (EDI) requirement and we will critically engage colonial power structures and processes of othering.

**Class Format:** seminar

**Requirements/Evaluation:** attendance/participation in discussion, two short papers, and a 12- to 15-page final

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**Prerequisites:** none

**Crosslistings:** ANTH 322/ENVI 322/GBST 322

**What is waste? What is filth? Why do titles or categories of sanitation workers—"garbage man," for instance—bear such charged social and sometimes moral significance in many societies? In this seminar we will critically examine the production of waste and its role in the production of value, meaning, hierarchy, and the environment. Readings will be of three types. First we will consider theoretical inquiries into the relations between filth and culture. Second, we will examine studies of the political and environmental consequences of systems of waste management historically and in the present, with a focus on the Middle East, South Asia and the United States. Third, we will read ethnographies of sanitation labor and social hierarchy with the same regional focus - work on Cairo, Dhaka, and New York, respectively. There is also a fieldwork component to this class. In groups, students will conduct ethnographic micro-studies of elements of the systems of waste production and management in Berkshire County (e.g., cafeterias, retail outlets, homes, dorms, recycling facilities, sewage treatment plants). Students will post field notes to a class blog, and each group will present its findings in the form of short film, multimedia presentation, or paper.

**Class Format:** lecture/discussion

**Requirements/Evaluation:** regular posting of critical response papers and an ethnographic final project

**ANTH 324 Empires of Antiquity (W)**

**Cycles of rise and collapse of civilizations are common in our human past. Among the most fascinating cases are those of empires, conquest civilizations, or states that encompass a number of different ethnicities, polities and peoples. However, their rise and often rapid collapse begs an important question: how stable have empires been in human prehistory? Are they intrinsically unstable political forms? The course will address these questions by examining the major empires of the Old and New World in pre-modern history: Persian; Assyrian; Mongol; Roman; Chinese; Ottoman; Aztec; and Inca empires. Using readings by political scientists, historians, epigraphers, archaeologists and political anthropologists, we will consider the causes of the expansion and collapse of these empires. We will also explore the sociopolitical and economic structures as mechanisms for their maintenance in order to provide a cross-cultural comparison of the differential success and final decline of all these empires.

**Class Format:** seminar

**Requirements/Evaluation:** weekly short response papers and a research paper, class presentation and participation

**ANTH 328T Emotions and the Self (D) (W)**

**Everyone everywhere experiences emotions, and everyone everywhere is faced with the task of conceptualizing a self-hood and its place in the social world. This course analyzes a variety of recent attempts in the social sciences to come to grips with topics that have long been avoided: the nature of the interior experience and an epistemological framework for its cross-cultural comparison. Exploring the borderlands between anthropology, sociology, and psychology, we will bring the tools of ethnographic analysis to bear on central pan-human concepts: emotions and the self. By examining these phenomena as they occur in other cultures, we will be better placed to apprehend and challenge the implicit (and often unconsciously held) assumptions about emotions and the self in our own culture, both in daily life and in academic psychological theory. What are emotions? Are they things—neuro-physiological states—or sociocultural constructions? How are they to be described; compared? What is the self? How are selves constructed and constituted? How do various cultures respond to categories of emotion and self, and how can we develop a sense of the relationship between self and emotion?**

**ANTH 331 Witchcraft, Sorcery, and Magic**

Beliefs in magic, malign and otherwise, have been nearly universal in human experience. This course examines these beliefs in an attempt to understand their cognitive basis, symbolic effectiveness, and social consequences. In particular we will approach the question of "magical thinking" as a universal non-rational way of seeing the world. What does the fact of presumably rational people holding apparently irrational beliefs say about the whole idea of rationality? Are witches self-aware agents who believe in the malign magic they practice, or are they innocent, marginalized victims of hegemonic powers? To answer these and other questions we will draw on case studies from a broad range of ethnographic and historic sources, including Aguaruna love magic, Azande oracles, Voodoo in Brooklyn, and witches in Renaissance Italy and twentieth-century England.

**Class Format:** seminar

**ANTH 334 Imagining Joseph (W)**

**Crosslistings:** ANTH 334/COMP 334/JWST 334/REL 334

**Beloved son, rival brother, faithful servant, dreamer, seer, object of desire, lover, husband, bureaucrat, Joseph is one of the most fully-limned and compelling figures in the Jewish, Christian, and Muslim scriptural traditions. The story of Joseph unfolds over fourteen chapters in the Hebrew Bible, and is the subject of the fourth longest sura in the Qur'an. Through millennia, the story of Joseph has inspired a wealth of interpretations, commentaries, apocrypha, re-tellings, and back-story, including an apocryphal book of scripture about Joseph and his wife, Asenath, Sufi poetry about Joseph and Zuleikha (Potiphar's wife), a trilogy by the 20th century German novelist Thomas Mann, a musical by Andrew Lloyd Weber, and many expressions in Western visual art. The course will explore these various expressions, looking to them for the ways in which Joseph has captured the imaginations of peoples and cultures across time and space. The course will be organized as a collaborative seminar in which the class will read the foundational scriptures together, followed by thematic discussions to which students will contribute insights from their own readings of particular peripheral texts. Students will learn the pleasures of close and intense exegetical reading in approaching the Hebrew Bible and Qur'an, as well as the more expansive pleasures of linking post-scriptural expressions together.**

**Class Format:** seminar

ANTH 335 In Between: The Ritual Construction of Identity and Difference
This course examines the categories of inclusion and exclusion, safe and dangerous, and points right and wrong that constitute cultural worlds, while also creating the middle zones that make cultural creativity possible. Beginning with the trajectory of "similarity" and rules of passage in the work of Arnold Van Gennep and Victor Turner, we will go on to look at Mary Douglas's seminal work on the construction of categories of inclusion and exclusion and other theoretical works on ritual and the sacred. In the course of the semester, we will write a variety of cultural contexts in which linchpin is of central importance, including transvestism in traditional Native American and contemporary US cultures, various avant garde artistic movements, and the ritual construction of the suicide bomber/martyr in Islamist practice.

Class Format: seminars, research paper, and final exam

Requirements/Evaluation: class participation, short two response papers, research paper, final exam

Prerequisites: ANTH 101, SOC 101 or another ANTH/SOC course

Enrollment Preferences: Anthropology and Sociology majors

Enrollment Limit: 20

Expected Class Size: 18-20

Distributional Requirements: Division 2

ANTH 340 Artisan and Connoisseur (W)
In recent decades Americans have increasingly taken up the small-scale hand-work production of specialized goods as a livelihood, depending on connoisseurs who appreciate and are willing to pay high prices for their goods. Products ranging from cheeses to wooden boats have secured markets enabling lifestyles that appear to challenge classic capitalist modes of labor and consumption. We'll explore this movement. Students will conduct original research resulting in a major paper and presentation.

To elaborate: We will explore the differences among traditional craftsmen, hobbyists, and contemporary artisans, considering the nature of creativity and hand-work. We will use Marx's concepts of the alienation of labor and commodity fetishism as a frame for understanding the ways in which both artisans and connoisseurs appear to be resisting modern capitalist modes of production and consumption. But we will also look at the ways in which artisans' articulation with capitalism and industrial production has shifted over time, beginning with the Arts and Crafts movement around the turn of the last century, through the "hippies" of the 1960s and '70s, to more recent entrepreneurial artisans and those engaged in the "Maker Movement."

The course entails a commitment to undertaking an original, possibly ethnographic research project in which a student undertakes a detailed investigation of the production and consumption of an "artisanal" product, involving a preparatory paper, a preliminary proposal, and culminating in a research paper at least 20 pages and a class presentation.

Class Format: seminar

Requirements/Evaluation: 5-page paper, 8-page proposal, 20-page research project, and class presentation

ANTH 346 Islam and Anthropology
Crosslistings: ANTH 346/REL 346/ARAB 280/ASST 346
If anthropologists have helped to define Islam in global thought, Islam has returned the favor, holding a critical mirror to the anthropological endeavor perhaps more than any other traditional "object" of study. This course examines anthropological studies of Islamic societies for what they teach us both about Islam and about anthropology. We begin with influential social theorists whose studies of religious phenomena helped give rise to the field of anthropology of religion. We then survey influential efforts to construct "ideal-type" models of Muslim society based on anthropological and historical knowledge of "practice" and relations to the model-building project (notably by Talal Asad and Edward Said). The second half of the course is devoted to ethnographies that explore, from a variety of perspectives and in several regions (Morocco, India, Egypt, Syria), questions of human agency, hierarchy and resistance, and Islam as discourse resource, ethical project, and embodied community.

Class Format: seminar

Requirements/Evaluation: weekly postings, one 5-page paper, one 10-page paper, discussion leading

Prerequisites: none

Enrollment Preferences: juniors and seniors, Anthropology, Sociology or Religion majors

Enrollment Limit: 19

Expected Class Size: 19

Distribution Notes: meets Division 2 requirement if registration is under ARAB

Distributional Requirements: Division 2

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

ANTH 346 Islam and Anthropology

ANTH 347 Tribe and State on the Afghan-Pakistan Border
Crosslistings: ANTH 347/ASST 347
One of the major challenges President Obama will face in his first term in office involves the perilous situation on the border between Afghanistan and Pakistan. While the problems in the region are generally framed in relation to Islamic extremism, the more fundamental issue is the failure of the Afghan and Pakistani governments to exercise control over the tribes that occupy the mountainous frontier. This course will look first at the history of the Afghan and Pakistani states and of the Pashtun and Baluchi tribes that are part of, yet independent from the states that surround them. We will go on to consider the role of Islam as a political force in the region, with particular emphasis on the ways in which outside religious groups, most recently al-Qaeda, have managed to gain a foothold in the borderlands, despite the historic resistance of the tribes to outsiders of any kind. The course will also examine the efforts of, first, the Soviet Union in the 1980s and, more recently, the United States and its allies to control the borderlands, and we will conclude with a consideration of the geopolitical implications if Afghanistan and Pakistan prove in the end to be "failed states." Readings will include theoretical discussions of tribal-state relations, British and Soviet era accounts of the frontier (non-fiction and fiction), ethnographies of tribal societies, and contemporary studies.

Class Format: seminar

Requirements/Evaluation: class participation, short response papers, research paper, and final exam

Prerequisites: none; open to first-year students

Enrollment Preferences: Anthropology and Sociology majors

Enrollment Limit: 25

Expected Class Size: 20-25

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

ANTH 347 Tribe and State on the Afghan-Pakistan Border

ANTH 371(F) Medicine, Pathology, and Power: An Ethnographic View (D)
This course explores the ways in which medicine and medical systems and practices have come to play an increasingly important role in society, and the consequences of this for understanding the construction of identity and disease. We begin with a reading of Foucault's Discipline and Punish, which has come to be regarded as a "classic" in the study of how power functions in modern societies. We then explore how medical anthropology has engaged with this work, particularly interested in how medical anthropologists employ ethnographic techniques such as participant observation and reflexive interviewing that has been described as "deep hanging out". Through experiential and other social factors, while paying particular attention to the most marginalized and vulnerable populations or individuals in society. After reading a selection of medical ethnographies, students will pursue their own individual, fieldwork-based projects in the Berkshires. Our goal is a better understanding of the limits and strengths of ethnographic inquiry as we

SOP 211(S) Race and the Environment (D)

Crosslistings: AFR 211/ENVI 211/SOC 211/AMST 211

In contemporary society, race remains an enduring impediment to the achievement of equality. Generally understood as a socially meaningful way of classifying human bodies hierarchically, race manifests itself in a number of arenas, including personal experience, economic production and distribution, and political organization. In this course, we will explore how race emerges in local and global environmental issues, like pollution and climate change. We will begin with a review of some of the landmark texts in Environmental Studies that address “environmental racism,” like Robert Bullard’s Dumping in Dixie and David Pellow’s Garbage Wars. We will examine how and to what extent polluting facilities like landfills, oil refineries, and sewage treatment plants are disproportionately located in communities of color; we will also pay particular attention to the sine qua non of any environmental injustice narrative, “racist discrimination.” In this course, we will consider how “environmental racism,” as a concept, has evolved and has been defined and applied. We will also examine the cultural and social contexts in which such patterns emerge and consider how and why they persist. As we develop strategies for understanding the roots of today’s environmental problems, we will also consider the social and political implications of our ability to develop solutions. Expectations include short papers and take-home exams, often requiring students to apply class concepts to real-world examples. Students will develop strategies for understanding the roots of today’s environmental problems, as well as social and political implications of their ability to develop solutions. Students will develop strategies for understanding the roots of today’s environmental problems, as well as social and political implications of their ability to develop solutions.

SOP 217 Race(ing) Sports: Issues, Themes and Representations of Black Athletes

Crosslistings: AFR 217/AMST 217/SOC 217/ENGL 217

Althea Gibson to the Williams Sisters, Julius (Dr. J) Irving to Michael Jordan. Joyce Owens to Tommie Smith and John Carlos. Throughout the 20th century, black athletes have broken through Jim Crow restraints, challenged racial stereotypes, and taken their sports to new heights of achievement. In this course, students will explore a range of black athletes in the 20th century, paying particular attention to the attitudes, stereotypes and experiences they endured. In addition, this course will prompt students to analyze the representation, perception, and commodification of black athletes in popular media forms. Students will trace trends, shifts and themes in representations of blackness across different sports and historical periods. Topics under study may include resistance against and affirmation of athletes as role models, racial slurs in sports broadcasting, common themes in commercialized images of the black male athlete, and distinctions in media coverage based on race and gender. Texts will include everything from critical essays and sociological studies to commercial and documentary films. In their final projects, students may put their newfound knowledge to the test by exploring their campus or hometown to investigate the role that race plays on their own playing fields.

Class Format: Lecture/Discussion
Requirements/Evaluation: Evaluation will be based upon class participation, short weekly reading and/or listening assignments, one 5-page paper, final group project

SOP 218(F) Law and Modern Society

This class is designed to introduce students to the field of law and society. The course begins with an overview of the various theoretical perspectives on the subject, including Durkheimian, Marxist, Foucauldian, and Weberian analyses of law, society, as well as the work of those following in the different theoretical schools established by these scholars. Informed by the theoretical overview, the next part of the course considers empirical research in selected areas of the law, including tort law, criminal trial procedures, abortion, and divorce law, “community justice,” and the adjudication of drug offenses. Recognizing that understandings of our own legal practices are enlightened through comparisons to other legal systems, the second half of the course is primarily historical/comparative in focus. In this section, through an exploration of several case studies, American legal processes and habits are compared with related legal practices in such places as England, Scotland, Ireland, Australia, Germany, Norway, and Canada.

Class Format: Lecture/Discussion
Requirements/Evaluation: a short paper and midterm and final exams

SOC 219 Images and Society

"This is obvious!" is what we say when we believe our point is irrefutable. But images are far less obvious than we may like to think. This course will create a forum for discussing the role of images in our lives, as well as the place of the visual in social inquiry. It will explore the variety of ways in which images—and even vision itself—are shaped by the social and cultural context in which they are embedded, develop skills for critical analysis of existing representations, and address the analytical possibilities and limitations of the study of signs and images. The course will touch upon a range of visual material, from advertising to paintings, but the bulk of the course is dedicated to photography, both as an object of visual analysis and as, increasingly, a research method in social sciences. Topics for discussion include debates around truth in photography and the politics of representation, changing uses of photography in institutional settings, different photographic cultures and their anthropological and sociological significance, as well as the use of photography in social research. Primary sources for the discussions will be drawn from a variety of spheres, from Soviet propaganda posters to Indian studio portraiture, and will include the images we encounter in everyday life, media, politics, academia, "high" art and pop culture.

Class Format: seminar

SOC 221 Money and Intimacy
Can money buy love and care? The course will consider this taboo question from a sociological perspective. We will look into how relevant the question has been over the course of history, what forces have contributed to the shift in thinking about it, and, most importantly, how sociological research helps us understand its current ramifications. We will discuss a wide range of aspects of money and intimacy: the relationship between arranged marriage and romantic relationship, the role of inheritance in family and social life, the distribution of resources in the context of modern family forms (most notably remarriages), and the outsourcing of care for dependents. Intimacy bears different value and content in these changing contexts. The course will further look into the changing character of new economy where "people's skills" are ever more required from employees (emotional labor) and where intimacy, care, and/or sex constitute purchasable commodities. A reflection on the growth of new technologies will complicate some of the discussed concepts and notions, but throughout a common denominator of our discussion will be the role of social inequality.

SOC 230(F) Memory and Forgetting (D)
On the surface, remembering generally confronts us as a deeply personal act. What is more private than nostalgic reverie or the secrets of a dark and painful past? Yet even "individual" memories take shape through social frameworks, and we also remember "collectively" through shared myths, narratives, traditions, and the like. This course will explore the social dimensions of memory and remembering as well as their inevitable counterpart—forgetting. How do social frameworks inform our individual understandings of the past and shape our sense of selfhood? How and why are figures from the past cast as heroes or villains? How do collectivities celebrate past glories, and how do they deal with shameful or embarrassing episodes? How do economic and political power relations shape struggles over the past? In an increasingly global society, can we speak of "cosmopolitan" or "transcultural" forms of memory? Topics will include self-identity, memories, and oral history; memorials, museums, and monuments; reputations, commemorations, and collective trauma; silence, denial, and forgetting; and transitional justice, official apologies, and reparations. This course meets the ED requirement by taking a comparative perspective, attending to cross-national struggles over memory and examining cases such as the Holocaust, the atomic bombings of Hiroshima and Nagasaki, Anzac Day in Australia and New Zealand, the assassination of Yitzhak Rabin in Israel, apartheid in South Africa, and slavery in the United States.

Class Format: seminar
Requirements/Evaluation: active class participation, several short papers, one class presentation, and a final exam

SOC 232 Symbols and Society
Human beings, as Kenneth Burke put it, are "symbol-using, symbol-making, and symbol-revealing" animals. Indeed, among humans, symbols help to substitute for "instincts." Symbols guide our actions, shape our emotions, and enable us to coordinate with others. Symbols may generate solidarity across wide spaces and among people who have never encountered one another face-to-face. They may also inflame conflicts and exaggerate distinctions, even promote violence. This course will examine the role of symbols and symbolism in modern society, exploring how words, gestures, images, and icons give shape and form to social life. The first part of the course will provide a broad introduction to the sociological study of symbols. The second part of the course will pay particular attention to the role that symbols play in politics and nationhood. How do symbols such as flags, anthems, values, ideals, monuments, and memorials promote solidarity and common identity across space and time? When and how do symbols strengthen or undermine collective identities? This course will include the Vietnam Veterans Memorial, the 1995 Etona Gay exhibit at the Smithsonian, the Holodomor monument in的形象s debates over the Confederate flag in South Carolina and beyond. We will focus primarily on the U.S., but will also work to make comparisons.

Class Format: seminar

SOC 240(S) Performing Masculinity in Global Popular Culture (D)
Crosstsuccessful: WGSS 240/AMST 241/LATS 241/THEA 241/SOC 240
This course examines popular cultural contexts, asking what it means to be a man in contemporary societies. We focus on the manufacture and marketing of masculinities in advertising, fashion, TV/film, theater, popular music, and the shifting contours of masculinity in everyday life, asking: how does political economy change the ideal shape, appearance, and performance of men? How have products - ranging from beer to deodorant to cigarettes — had their meaning and use articulated in gendered ways? Why must masculinity be the purview of "males" at all; how can we change discourses to better include performances of female masculinities, butch-identified women, and trans* men? We will pay particular attention to racialized, queer, and subaltern masculinities. Some of our case studies include: the short half-life of the boy band in the US and in Asia (e.g., J/K-Pop), hip hop masculinities at home and abroad and the curious blend of chastity and homoeroticism that constitutes masculinity in the contemporary vampire genre. Through these and other examples, we learn to reconceptualize masculinity as a performance shaped by the political economy of a given culture. The course includes a field trip to a drag performance in Northampton.

Class Format: seminar
Requirements/Evaluation: masculinity journal, mid-term essay, visual analyses of pop culture artifact, choice of final essay or 8-10 page final paper, short field trip reaction essay
Prerequisites: none
Enrollment Preferences: in the event of over-enrollment, a short statement of interest will be solicited
Enrollment Limit: 20
Expected Class Size: 20

SOC 241(S) Meritocracy
Crosstsuccessful: PSCI 241/SOC 241
Although an infinitesimal number of Americans have degrees from Harvard or Yale Universities, 33% of the top decision makers in the second Obama administration did. So do seven of the country's eight sitting Supreme Court Justices (as of early 2016). Is this a positive sign that the United States is governed by its most talented and capable members who have risen through hard work and equal opportunity? Or a negative one pointing to the power of a corrupt and self-selecting elite? This course explores the theme of meritocracy—how the intellectually talented become the rule by the intellectually talented — in comparative perspective. We will look at both old and new arguments regarding the proper role and definition of merit in political society as well as take the measure of meritocracy in present-

**SOC 244(S) What They Saw in America (W)**

_Crosslistings:_ SOC 244/HIST 366/AMST 244

This course traces the travels and writings of four important observers of the United States: Alexis de Tocqueville, Max Weber, G.K. Chesterton, and Sayyid Qutb. The course will consider their respective journeys: Where did they go? With whom did they talk? What did they see? The historical scope and varying national origins of the observers provide a unique and useful outsider’s view of America—one that sheds light on persisting qualities of American national character and gives insight into the nature and substance of international attitudes toward the United States over time. The course will analyze the common themes found in the visitors’ respective writings about America and will pay particular attention to insights on religion, democracy, agrarianism, capitalism, and race. This course is part of the Williams College program at the Berkshire County Jail and House of Corrections and will be held at the jail. Transportation will be provided by the college. The class will be composed equally of Williams students and inmates, and one goal of the course will be to encourage students from different backgrounds to think together about issues of common human concern.

**Class Format:** seminar

**Requirements/Evaluation:** several short response pieces; a final paper of 10-15 pages

**SOC 248(F) Altering States: Postsoviet Paradoxes of Identity and Difference (D) (W)**

_Crosslistings:_ SOC 248/GBST 247/RUSS 248

Critics and apologists of Soviet-style socialism alike agree that the Soviet ideology was deeply egalitarian. Putting aside for a moment the very reasonable doubts about how justified this perception actually was, it is still worth asking, how did people who lived in the world in which differences in race, class, gender or ethnicity were not supposed to matter, make sense of their postsocialist condition, one in which new forms of difference emerged, and old ones assumed greater prominence? And how do these encounters with difference impact current events, such as the Russia-Ukraine conflict or the persistent tensions between East and West Germans? This tutorial will examine new dilemmas through ethnographic studies and documentary films that aim to capture in real time the process of articulating and grappling with newly discovered divides. We will focus especially closely on Russia, but will also read some of the West. The exercise will be to demonstrate that the histories of the postsocialist condition are not limited to the post-socialist period and that a critical ethnographic imagination can help us to understand the complex and often subtle ways in which the meaning of social and cultural categories have changed in Russia and other former Soviet states. This tutorial will meet weekly and explore a variety of topics in the philosophy of post-socialism, with a focus on weekly discussion precis, film screenings, class presentations, and a final research project decided in consultation with the instructor.

**Class Format:** tutorial

**Requirements/Evaluation:** 5-page paper every other week; comments on the partner’s paper in alternate weeks

_Fall 2016_ TUT Section: T1 TBA Instructor: Oleg Shevchenko

**SOC 252 Moral Life in the Modern World**

This interdisciplinary seminar attempts to locate and examine modern moral life (i.e., the ethical dimension of modern culture) in its broader historical and cultural context. The aim of the course is less to analyze and debate the theoretical morals of philosophers and theologians, than it is to interpret and attempt to understand the lived moralities that people actually practice and carry out: that shape conduct and selfhood in the modern world. Part I of the course will provide a guided introduction to a range of contested issues in the study of ethics and morality: moralism, moral relativism, and the nature of modern moral discourse; moral truth, and value freedom; the differences between normative and descriptive ethical inquiry; “thick” and “thin” moral concepts, and the historically variable relationships between lived moralities, theoretical moralities, and moral customs. In Part II we will work through a series of case studies that take up the following issues: moral life in corporate, urban, and suburban contexts; media, moralism, and modern morality; business ethics; race and racism; depersonalization, war and genocide. The course will furthermore examine ethics and morality in “,” “through,” and “of” literature, as students will select, read, and critique a work of fiction.

**Class Format:** lecture

**SOC 263 Cold War Technocultures**

_Crosslistings:_ SOC 263/AMST 263/HIST 363/HSCI 263/SCST 263

With the Soviet Union’s collapse at the end of the twentieth century and the emergence of the United States as an unchallenged victor and “new world” hegemon, have we lost a sense of the drama, fear, and unbridled terror that permeated American life during the Cold War? In this course we will set out to understand Cold War cultural, historical, and comparative perspectives on and around the Cold War technological developments, among them antipsychiatry and the industrialization, humanization, and colonization of outer space; and atrocities of the Vietnam War. Part II takes up the symbolic potency of the US/CIA-backed Chilean coup of 1973; the American counterculture and the Club of Rome’s Limits to Growth report and the Gaia hypothesis; plans backed by NASA for cybernetics and the emergence of the now iconic cyborg; the SAGE continental air defense system, nuclear wargaming at the RAND Corporation, artificial intelligence, and the advanced technologies, management strategies, and atrocities of the Vietnam War. This course fulfills the EDI requirement by exploring comparatively the ways in which people in different countries made sense of the social, cultural and political heterogeneity of the postsocialist condition. This course is designed to explore, both theoretically and empirically, the relationship of social change and stratification. Therefore, an important focus

SOC 283 Religion and Capitalism (W)
Crosslistings: PSCI 140/SOC 283/REL 282
Up through the 1960s it was popular to claim that the world was becoming increasingly and inevitably secular, with the development of modern capitalist social relations as a signature cause. Today the 'secularization thesis' is largely defunct. Instead one sees the vibrant return of religion to social, economic, and political prominence in most parts of the world—at the very same time we are experiencing through globalization and the information revolution the most dramatic economic advances in a century.

This course investigates the historical and contemporary relationship between culture and economics, religion and capitalism, in their most encompassing forms. In investigating this theme, our cornerstone will be Max Weber's famous argument from *The Protestant Ethic and the Spirit of Capitalism*. Along the way we will discuss both the origins of capitalist society as well as its more recent transformations through the rise of the welfare state, consumerism, and globalization. We will also discuss changes in religion under the influence of capitalism including romanticism, Pentecostalism, moralistic therapeutic Deism, and the 'God gap' between largely theist Africa, South and West Asia, and the Americas on the one hand and largely atheist Europe and East Asia on the other. The focus of the course is on Christianity in Western countries both historically and in the present, but we will spend time discussing religion (particularly Pentecostalism) and capitalism in the contemporary Global South as well.

Class Format: seminar
Requirements/Evaluation: regular discussion questions, three 5- to 6-page papers, in-class paper workshops, 20- to 24-page final term paper incorporating earlier papers
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

SOC 291 Religion and the American Environmental Imagination (W)
Crosslistings: ENV 291/REL 291/SOC 291
This course examines the relationship between religious and environmental thought in modern America. Exploring a broad range of practices and beliefs, we will examine the religious (and anti-religious) roots of contemporary environmental discourse. Drawing widely on both religious studies and the environmental humanities, we will examine the works of famous environmental thinkers such as Henry David Thoreau and Wendell Berry, as well as a number of lesser-known writers from non-Christian backgrounds. We will read these writers alongside recent scholarship on religion and ecology to understand how they were influenced by social and environmental trends such as urbanization, industrialization, immigration, and globalization. We will also ask how religion has intersected with gender, race, class, and ethnicity to shape environmental politics in the twenty-first century, with particular emphasis on agrarianism, wilderness preservation, and climate justice.

Class Format: seminar
Requirements/Evaluation: a 15- to 18-page research paper and several shorter writing assignments
Prerequisites: ENV 101 or permission of instructor
Enrollment Preferences: Environmental Studies majors and concentrators
Enrollment Limit: 15

SOC 303/SOC 306 Cultures of Climate Change (W)
Crosslistings: ENVI 303/SOC 303
This course asks why people think and talk about climate change in such very different ways. Climate change is a physical phenomenon that can be observed, quantified, and measured. But it is also an idea, and as such it is subject to the vagaries of cultural interpretation. Despite scientific agreement about its existence and its causes, many people do not see climate change as a serious problem, or as a problem at all. Many others see it as the most serious problem our species has ever faced. What are the sources of this discrepancy? Why can't we agree about climate change? How does something as complex and confusing as climate change become a "problem" in the first place? This course will explore a broad array of factors, from religion to race, class to colonialism. It will focus especially closely on the communication of scientific knowledge, risk perception, and environmental ethics, and it will apply a range of theories from the social sciences and humanities to a set of concrete case studies.

Class Format: seminar
Requirements/Evaluation: a 15- to 18-page research paper and several shorter writing assignments
Prerequisites: ENVI 101 or permission of instructor

SOC 306 Lessons of 'The Game': The Wire and American Culture
Crosslistings: AFR 300/AMST 300/SOC 306
The critically acclaimed television program, The Wire, ran for five seasons on Home Box Office (HBO) between 2002 and 2008. Set in "inner city" Baltimore, the program addressed a wide array of topics, including, but not limited to, the urban drug trade, law enforcement, local city politics, labor unions, education, and the newspaper industry. Through a work of "fiction," sociologist William Julius Wilson has called the show an important and instructive portrayal of the "deep inequality in inner-city America." By contrast, some scholars and critics have decried the series and indeed, courses like this one, as examples of mainstream America's fascination with and acceptance of African American drug use, criminal tendencies, and corruption. In this course, we will not deconstruct The Wire per se, but use select episodes from the series to explore key issues in Africana Studies, ranging from political geography to a history of Baltimore and the "War on Drugs." Students should have some familiarity with the show. Africana Studies will show select episodes during Winter Reading. Winter readings will include texts about African American urban life, such as Elijah Anderson's Code of the Street and Sudhir Venkatesh's Gang Leader for a Day. Due to its attention to crime, drug addiction, violence, and urban decay, this course is a part of the Gaudino Danger Initiative.

SOC 315 Culture, Consumption and Modernity (W)
How do lifestyles, fashions and trends appear and evolve? Are we authors of our own taste? What structures our choices of goods and activities? What is it that gives meaning to objects and makes them desirable? Are there non-consumer societies in the modern world? How has globalization changed the ways people consume in different parts of the globe? This course will explore the consumption and consumer practices as products of modernity and will analyze the political, cultural and social agendas that have transformed consumption over time. Politics of consumption (the way in which seemingly free and independent consumer choices-aggregate into the existing system of global capitalism) will be treated alongside its symbolic element: the role of consumer practices in creating and articulating identities, building relationships and creating solidarities. It will look at fashion, advertising, arts and shopping in places and eras as varied as nineteenth-century France, socialist Russia, and in contemporary United States, tracing both the mechanisms that structure patterns of consumption, and the implications that these patterns have for the larger social order.

SOC 317T The Public and the Private (W)
The sharp distinction between the private and the public spheres is often taken as one of the defining features of the Western modernity itself. Furthermore, the existence and vibrancy of the public sphere is a crucial precondition for participatory democracy, whereas respect for privacy and provisions and guarantees that ensure personal autonomy remain fundamental for the daily operations of society. This tutorial course will address the public and the private as concepts that are always in a state of tension, and will explore aspects from a sociological and historical vantage point. Topics include: democracy and the public sphere, publicity and its institutions, from the coffee house to the mass media, individual and collective identities, the "religion of individualism" and its rites and rituals, public and private spaces, the private sector of culture and its manifestations. On the one hand, the private sector of culture and its manifestations may be a precondition for participatory democracy, whereas respect for privacy and provisions and guarantees that ensure personal autonomy remain fundamental for the daily operations of society. This tutorial course will address the public and the private as concepts that are always in a state of tension, and will explore aspects from a sociological and historical vantage point. Topics include: democracy and the public sphere, publicity and its institutions, from the coffee house to the mass media, individual and collective identities, the "religion of individualism" and its rites and rituals, public and private spaces, the private sector of culture and its manifestations.
Class Format: tutorial; students will meet in pairs with the instructor 1 hour each week; they will write a 5- to 7-page paper based on the readings every other week (5 papers total); on alternate weeks they will write & present a 2-page response to their peer's paper
Requirements/Evaluation: evaluation will be based on the analytical qualities of the students' written and oral work and on their weekly participation in discussion
Extra Info: may not be taken on a pass/fail basis
Prerequisites: none; open to all

LEC Instructor: Olga Shevchenko
SOC 319 Ethnographic Approaches to African Studies
Crosslistings: AFR 319/SOC 319/AMST 319
Ethnography is the systematic study and recording of human cultures. It involves the collection and analysis of information from multiple sources including (but not limited to) first-person accounts, life histories, interviews, observations, and autobiographical materials. Within African Studies, ethnographic approaches have been utilized to reflect complex narratives of black experience throughout the Diaspora. This seminar is a critical introduction to the theory, method, and practice of ethnography in African studies. We will explore a variety of contexts and settings, and discuss the practical, methodological, and ethical issues related to ethnography. Three broad questions will dominate our discussions: 1) What are the theoretical, practical, and stylistic tools needed to fashion compelling ethnographies that get to the heart of what it means to document African experience? 2) What are the ethical and political implications of representing African perspectives in fieldwork studies? 3) What are the strengths and limitations of ethnography as a research method in African studies? Each student will utilize the materials covered in the course to research and write his or her own ethnography.
Class Format: seminar
Requirements/Evaluation: evaluation will be based upon class participation, weekly response papers, a 5- to 7-page critical book review, and the construction of a mini-ethnography
Prerequisites: none
Enrollment Preferences: African Studies concentrators, Women's, Gender and Sexuality Studies majors, Religion majors
Enrollment Limit: 15

SOC 324 Memory and Identity (D)
Our sense of ourselves—our sense of our existence—is closely tied to our understanding of our past, both as individuals and as members of society. This sense of origins, however, is far from natural; it itself has its origins in the debates and politics of the time, and evolves under an array of influences. This course analyzes discourses of collective and individual identity and the mechanisms involved in the formulation of the individuals' sense of their place in the world. Topics include: media of memory, politics of commemoration, nostalgia and selective
forgotten, narratives of trauma and of a "golden age," the invention of tradition, and battles over remembrance and heritage, such as the dispute over the ownership of Parthenon Marbles between Greece and the UK, or over the proper way to commemorate the victims of 9/11 in the US or the victims of Stalin's purges in the post-Soviet space. This course fulfills the EDI requirement because it explores the diversity of the ways in which communities imagine and engage with their past, and puts struggles over memory in the context of groups' struggles for power and visibility.

**SOC 328(F) American Social Dramas (W)**

**Crosslistings:** SOC 328/AMST 328/COMP 328/THEA 328

As Shakespeare wrote memorably in *You Like It,* "All the world's a stage, and all the men and women merely players." Sociologists have heeded Shakespeare's wisdom, arguing that social and political events are "performances" that take shape in accordance with familiar cultural scripts, and indeed that social actors implicitly interpret real-world events using plot structures from literary and dramatic genres such as romance, irony, comedy, and tragedy. We will explore this thesis through the lens of contemporary American political events, including the Clinton-Lewinsky scandal, September 11, Hurricane Katrina, the 2012 presidential election, and current debates over Confederate symbolism. We will also pay careful attention to the unfolding drama associated with the 2016 presidential election. How do social performances and struggles to "control the narrative" shape the meanings and outcomes of political events? Are they merely "spectacles," or wellspring for genuine civic participation? What role do political comedy, satire, and social media play in shaping the trajectory of contemporary events? Major authors will include Victor Turner, Clifford Geertz, J.L. Austin, Erving Goffman, and Jeffrey Alexander. Throughout the semester, each student will develop a significant project on a political event of his or her choosing.

**Class Format:** seminar

**SOC 332(F) Life and Death in Modernity**

Death is a biological fact. Death is also one of the few universal parameters in and through which social worlds and individual lives are created. Death, in other words, is a primary source of the material and symbolic activities through which humans work to construct, legitimate, and maintain social realities. To attend to "ways of death," then, is to attend simultaneously, if only indirectly, to "ways of life"—the hopes and fears, the ways and wants of a people. In this course we will ask: How, why, and with what manner of consequence has it come to be that, under late-modernity, the aged, the sick, the dying, the bereaved, and indeed death itself, are routinely "set aside", hidden from view and thus awareness, institutionally sequestered from those of us among the living? We will attend to the historical emergence of the institutional forms that perpetrate this sequestration, and show how they have become tightly articulated with one another: hospitals, nursing homes, hospice centers, funeral homes, cemeteries. We will furthermore examine the peculiar bodies of expert knowledge that have arisen in tandem with these institutional forms, among them gerontology, thanatology, and bereavement therapy, showing how they have conspired in the (bio)medicalization of aging, death, and grief. Other topics to be explored include the commodification and consumption of health and well-being; the emergence of "rational" and "irrational" rationales of human life extension; cryogenic suspension, zombies, and the paranormal.

**Class Format:** seminar

**Requirements/Evaluation:** weekly journal entries, film screenings, take-home midterm, class presentations, and a final 12- to 15-page paper to be decided in consultation with the instructor

**SOC 334 Special Studies of (Pseudo)-Science**

What makes science science? Where does dogma end and pseudoscience begin? What (if anything) separates the crackpots from the innovators? Philosophers of science have long labored over the so-called "demarcation" problem: how to analytically hive off "science" from "non-science." In this course we will work through the historical and sociological implications of approaching demarcation as an analytical problem amenable to solution in the abstract. Operating instead in a largely sociohistorical register, we will consider demarcation as a practical problem that scientists take up and negotiate in the concrete, in a range of different contexts and for a variety of ends. What is at stake in scientists' efforts to establish boundaries between what counts as scientific knowledge and what does not? How are these boundaries created, maintained and contested, and by whom? This course will speak to these questions by focusing on how and under what circumstances various doctrines that have aspired to science have nevertheless been met with the designation of "pseudoscience." Students will work through primary and secondary materials on a range of cases, among them parapsychology, intelligent design, climate change skepticism, eugenics, nanotechnology, diametics, and UFOlogy. The aim is neither to debunk nor to validate, but rather to develop an understanding of how science and scientific authority operate in practice, in a given historical moment, by way of attending to instances of pseudoscientific designation.

**Class Format:** seminar

**Requirements/Evaluation:** seminar paper of 15-20 pages; (in)formal weekly writing; participation

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**SOC 350(S) Max Weber & Critical Theory or Rationalization & Its Discontents**

**Crosslistings:** REL 350/SOC 350/COMP 349

We live in an age characterized by unprecedented technological and scientific progress—we have unraveled the building blocks of life, witnessed the birth of stars at the edge of the galaxy, and harnessed the power of the atom—and yet modern life often appears fundamentally meaningless and lacking in ultimate meaning. As we work, we die, perhaps in the interim shuffling paperwork, sucking up to our boss, and asking ourselves, "What kind of dining set defines me as a person?" Few thinkers have explored the roots of this modern ennui as thoroughly as Max Weber, a German sociologist often regarded as the single most important social theorist of the twentieth century. Weber wanted to know why it was European civilization in particular that gave birth to the grand trifecta of rationality, science, and capitalism and how we have become ensnared by the very things that were supposed to have set us free. Weber's key innovation was to trace the grand trajectory of Western "rationalization"—the historical attempt to produce a world in which "one can, in principle, master all things by calculation." Further, he demonstrated how this rationalization produced not just mastery over nature, but also "the disenchantment of the world" - value fragmentation, hyper-specialization, bureaucracy, and ultimately the "iron cage" of modernity. The first part of this
course will follow in Weber's footsteps by studying his theory of rationalization and by exploring it in different social spheres, such as the economy, the law, the professions, and the secularization of religion. The second half of the course will look at Weber's legacy in Critical Theory. It will show how thinkers such as Theodor Adorno, Georges Bataille, Jürgen Habermas, Max Horkheimer, Michael Löwy, and Alasdair MacIntyre suggested various lines of flight from the iron cage of modernity.

Class Format: seminar
Requirements/Evaluation: attendance and participation, weekly critical reflections, 5- to 6-page midterm paper, 10- to 15-page final essay
Prerequisites: none

SOC 387 Propaganda

A sociological analysis of the phenomenon of mass persuasion in modern society. The course will examine the institutional and technical apparatus of modern propaganda and the role of intellectuals and technicians in shaping and disseminating propaganda. The symbolic content of specific kinds of propaganda—political, commercial, social, and organizational—will be considered with attention to propaganda that seeks to overthrow social structures as well as maintain them. The course will proceed through a series of intensive case studies with a particular focus on propagandists themselves, considered as experts with symbols, and on the institutional milieus in which they work. Among other examples, we will examine the U.S. Committee on Public Information during the First World War; the Nazi Ministry of Propaganda; the propaganda machinery in contemporary states and non-state actors of both the left and right; conservative and liberal "public interest" groups; propaganda in contemporary social movements and national political campaigns; the workings of corporate and university personnel offices; and advertising and public relations agencies in the United States. Throughout the course, we will analyze how the language, ideologies, and visual symbols of particular varieties of propaganda seem to affect mass audiences.

ARABIC STUDIES

(DIV I, with some exceptions as noted in course descriptions)
Students must earn a cumulative grade average of B or higher in the sequence of eight courses. In addition, they must receive a score of at least 85% on a language proficiency test administered by the Arabic faculty. The test is administered once a year during the month of April to all students who wish to obtain the Certificate. Those interested should express their intent to the Arabic faculty by March 1st or earlier.

Students who enter Williams with previous training in Arabic may be exempted from up to three of the required eight courses. Thus, in order to earn a certificate, a student must take no fewer than five courses (including three language courses) after enrolling at Williams.

THE DEGREE WITH HONORS IN ARABIC STUDIES

Prerequisites
Honors candidates in Arabic are required to have maintained a GPA of 3.5 in the major to qualify for submitting a thesis proposal. In addition, candidates must demonstrate a strong interest in a specific topic for which an appropriate faculty advisor will be available in the senior year.

Timing
Students wishing to pursue a thesis in Arabic are strongly urged to secure an advisor by the end of the year after Spring Break in their junior year. By May 15th of their junior year, candidates must submit to the Program Advisory Committee a comprehensive proposal and a preliminary bibliography. The Advisory Committee will inform candidates by June 1 whether they may proceed with the thesis and advise them about any changes that should be made in the focus or scope of the project. The summer before the senior year will be spent compiling a more detailed bibliography and preparing for the process of writing the thesis.

In their senior year, candidates will devote two semesters and the winter study period to their theses (ARAB 493-W31-ARAB 494). By the end of the Fall semester, students will have normally have undertaken substantial research and produced the draft of at least the first half of the project. At this point students should also have a clear sense of the work remaining for completion of the thesis. In the course of the Fall semester, students will also have chosen and met with a second reader for the project, who will provide additional guidance and read the final thesis. By the end of Winter Study, students should have completed a draft of the entire project. At that time, the Comparative Literature Advisory Committee, together with the advisor, will determine whether the project may continue as an Honors Thesis, or whether its first portions (ARAB 493-W) will be graded as Independent Studies.

The second semester of independent thesis work will be spent revising as necessary. The completed thesis in its final form will be due one week before the last day of classes. At the end of the Spring term, the student will make a public presentation of the final project, to which members of the Advisory Committee will be specially invited.

Characteristics of the Thesis, Evaluation, and Major Credit
The topic of the thesis must have to do with some aspect of Arabic language, culture, history, politics, etc. and will be worked out between the thesis writer and her/his advisor. It is also possible to write a thesis that consists of an original translation of a significant text or texts; in this case, a theoretical apparatus must accompany the translation. The complete thesis must be at least 50 and at most 75 pages in length, excluding the bibliography.

The advisor will assign grades for the thesis courses (ARAB 493-W-494); the Advisory Committee will determine whether a candidate will receive Honors, Highest Honors, or no honors.

For students who pursue an honors thesis, the total number of courses required for the major-including the thesis course (ARAB 493-W-494)-is 10, i.e., one of the thesis courses may substitute for one elective.

STUDY AWAY
You can find general study away guidelines for Arabic Studies here.

ARAB 101(F) Elementary Arabic
This is the first course in the year-long Beginning Arabic sequence. It will help you establish a foundation of communicative competence and understanding of the Arabic language and culture. The course adopts an integrated-skills approach with a focus on "formal Arabic" (or so-called Modern Standard Arabic), the language of formal writing and speech in Arab countries, while simultaneously familiarizing you with one variety of spoken Arabic. The course focuses on day-to-day situations and familiar topics.

Class Format: lectures, five hours a week

Requirements/Evaluation: evaluation is based on tests, daily homework, and active class participation

Extra Info: students registered for ARAB 101 and 102 are required to attend and pass the sustaining program during the winter study period; credit is granted only if both semesters (ARAB 101 and 102) are taken

Prerequisites: none

Enrollment Preferences: students considering a major in Arabic Studies

Enrollment Limit: 20

Expected Class Size: 15

Distributional Requirements: Division 1

Fall 2016
LEC Section: 01 M-F 10:00 AM 10:50 AM Instructor: Lama Nassif

ARAB 102(S) Elementary Arabic
This is the second course in the Beginning Arabic sequence. It builds on the foundation of Arabic competence that you established in Arabic 101, and will continue to develop your competence in Modern Standard Arabic and one variety of spoken Arabic. The course will continue to focus on day-to-day situations and familiar topics from the immediate environment while expanding the range of topics and authentic materials, and broadening the scope of linguistically-based and culturally-based tasks and course expectations.

Class Format: lectures, five hours a week

Requirements/Evaluation: evaluation is based on tests, daily homework, and active class participation

Extra Info: students registered for Arabic 101 and 102 are required to attend and pass the sustaining program during the winter study period; credit is granted only if both semesters (ARAB 101 and 102) are taken

ARAB 111 Movers and Shakers in the Middle East (D) (W)

Crosslistings: HIST 111/LEAD 150/ARAB 111

This course examines the careers, ideas, and impact of leading politicians, religious leaders, intellectuals, and artists in the Middle East in the 20th century. Utilizing biographical studies and the general literature on the political and cultural history of the period, this course will analyze how these individuals achieved prominence in Middle Eastern society and how they addressed the pertinent problems of their day, such as war and peace, relations with Western powers, the role of religion in society, and the status of women. A range of significant individuals will be studied, including Gamal Abd al-Nasser, Mustafa Kemal Ataturk, Ayatollah Khomeini, Muhammad Mussadiq, Umm Kalthum, Sayyd Qutb, Anwar Sadat, Naghub Mahfouz, and Huda Shaarawi.

Class Format: seminar

Requirements/Evaluation: evaluation will be based on class participation, short essays, and a final paper

Prerequisites: first-year or sophomore standing; juniors or seniors with permission of instructor

Enrollment Preferences: first-year students, and then sophomores who have not previously taken a 100-level seminar

Enrollment Limit: 19

Expected Class Size: 15-19

Distribution Notes: meets Division 2 requirement if registration is under ARAB

Distributional Requirements: Division 2

ARAB 207(F) The Modern Middle East (D)
Crosslistings: HIST 207/JWST 217/REL 239/ARAB 207/GBST 101/L

This course addresses the main economic, religious, political and cultural trends in the modern Middle East. Topics to be covered include the cultural diversity of the Middle East, relations with Great Powers, the impact of imperialism, the challenge of modernity, the creation of nation states and nationalist ideologies, the discovery of oil, radical religious groups, and war and peace. Throughout the course these significant changes will be evaluated in light of their impact on the lives of a variety of individuals in the region and especially how they have grappled differentially with increasing Western political and economic domination. This course is part of the Exploring Diversity Initiative because it compares the differences and similarities between different cultures and societies in the Middle East and the various ways they have responded to one another in the past.

Class Format: lecture/discussion
Requirements/Evaluation: evaluation will be based on participation, 2 short papers and quizzes, midterm and final exam
Extra Info: may not be taken on a pass/fail basis
Prerequisites: none

ARAB 210(S) The Challenge of ISIS
Crosslistings: ANTH 210/HIST 210/ARAB 210/REL 240/GBST 210

What is ISIS and what does it want? Using historical and anthropological sources and perspectives, the course considers the origins, ideology and organization of the Islamic State. Beginning with an examination of early radical movements, including the Muslim Brotherhood, the Afghan mujahideen and Talibain, and al-Qaeda, the course will go on to investigate how ISIS derives important aspects of its ideology and organization from these earlier movements and how it deviates from them. We will look at unique aspects of the movement, such as its use of social media, its extensive destruction of ancient historical sites, its staging of spectacles of violence, and its recruitment of Muslims from Europe and North America. We will also examine the ideological constitution of the movement, including its attitude toward and treatment of non-Muslims, its conceptualization of itself as a modern incarnation of the original Islamic caliphate, the ways in which it justifies its use of violence, and its apocalyptic vision of the present-day as End Time. Finally, we will evaluate current responses to ISIS, in the West and among Muslims in the Middle East and elsewhere, in terms of their effectiveness and strategic coherence.

Class Format: lecture
Requirements/Evaluation: blogs (4 main blog posts, responses to at least 3-4 other blogs each week) (30%); analytic paper or class history paper (35%); 2 midterms (35%)

ARAB 21ST The Veil: History and Interpretations (D) (W)
Crosslistings: HIST 110/ARAB 215/WGSS 110

This tutorial will consider the history and the changing meanings of the veil (hijab) and its many manifestations (e.g. burqa, chador, niqab), starting with the earliest religious traditions and the status of women in Islamic law. We will then proceed to examine imperialist and orientalist representations of gender in the Middle East, the rise of Islamic feminism and finally consider the emergence and return of the veil in recent years in the Middle East, North America, Asia and Europe. The tutorial is part of the Exploring Diversity Initiative (EDI) because it considers the veil across different cultural areas.

Class Format: tutorial
Requirements/Evaluation: each week each student will either write a 5- to 7-page essay on assigned readings or offer a 2-page critique of their partner’s paper; by semester’s end each student will have written a minimum of 40 pages
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none
Enrollment Preferences: first years, sophomores and those with demonstrated interest in the Middle East
Enrollment Limit: 10

ARAB 221(F) Humor in Classical Arabic Literature
Crosslistings: ARAB 221/COMP 291

In medieval Arab-Islamic society, littératours and scholars were expected to relate knowledge at parties, literary salons, and banquets of the court as well as in their writings in ways that would entertain their audience. From elegant witicisms and irony to crude jokes and mockery, humor played an important role in winning audience approval; it abounds in literature from the classical period. In this class we will read selections from literary (adab) compilations including works such as al-Khattib al-Baghdadi’s Book of Party-Crashing and Party-Crashers, al-Jahiz’s Book of Misers, al-Ibshihi’s The Precious and Refined in Every Genre and Kind, as well as from the poetry of Abu Nuwas and Abu-l-Qasim al-Zahi. All readings in English, although those with Arabic language competency are invited to make comparisons with the original where possible.

Class Format: seminar
Requirements/Evaluation: class participation, 2 short papers, one long research paper, and weekly responses
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

ARAB 222 Photography in/of the Middle East (D)
Crosslistings: ARTH 222/ARAB 222

Since its inception, photography has been globally disseminated but locally inflected, serving disparate documentary needs and expressive purposes in different cultural contexts. In the Middle East, the powers and pleasures of the medium have been valued by colonial forces, indigenous populations, photojournalists and artists; the resulting images merit aesthetic appreciation even as they grant visual access to the past and present in complicated places. The course will explore photographic practices in different zones of the Middle East—e.g., the Holy Land, Egypt or the Persian sphere—by attending to individual photographers and case studies. This tightly focused approach will support, in turn, a consideration of the burdens and risks of representation in particular circumstances—what work do photographs do? Who resists and who benefits? The general goal will be to appreciate the diversity of perspectives that underlie renderings of the Middle East.

ARAB 224(S) Second Language Learning: The Learner, the Classroom, and the Social World

Learning a second language is one of the most exhilarating, rewarding, and eye-opening experiences of a life-time. Millions of people around the globe embark on a journey of exploration of target languages and cultures while
reflecting on the self and home culture(s) in the process. This course introduces you to core issues related to the learning of a second language. What are the processes involved in learning a second language? What does it mean to know another language? Is second language learning similar to first language learning? Why are some language learners more successful than others? What individual variables do learners bring to the learning process? How can classrooms facilitate second language learning? How do learners perceive teachers’ feedback? How does the specific socio-cultural context impact language learning? How does learning about the target culture feed into language learning? How does the learner’s identity evolve in the process of second language learning? These are some key second language learning questions that we will examine in this class. Readings are drawn from studies on the learning of different languages.

Class Format: lecture
Requirements/Evaluation: active class participation, assignments, article presentations, leading a class discussion, language learner interview, a research paper

ARAB 228 Modern Arabic Literature in Translation (D) (W)
Crosslistings: ARAB 228/COMP 228
In this course we will study prominent texts and authors of the modern Arab world. The development of genres and themes of this literature is vast. In particular, we will analyze the debates around modernity and the importance given to social engagement in these texts. Our readings may include works by authors who have received some notoriety outside of the Arab world such as Naguib Mahfouz, winner of the Nobel Prize for literature in 1988. We will also read the Iraqi poets Nazik al-Malaika and Badr Shakir al-Sayyab, the Palestinians Ghassan Kanafani and Mahmoud Darwish, and Tayyib Salih from the Sudan. Included in our readings are the famous autobiography by the Moroccan Muhammad Shu’u and a recent edition of women’s literature by Hanan al-Sherif, Huda Barakat and Nawal Sadaawi. All readings are in English. This literature course fulfills the requirements of the Exploring Diversity Initiative (EDI), as it engages the Arab world from a humanistic perspective that aims to promote cultural awareness. A fundamental goal of the course is to engage the diversity of approaches to sexuality, religion, gender and politics that are so prominent in contemporary literature from the Arab world.

ARAB 230(F) Who was Muhammad? (D)
Crosslistings: REL 230/ARAB 230/GBST 230
Considered the Messenger of God, Muhammad is a central character of the Islamic tradition and has been the object of love and devotion for centuries. Recent outbursts sparked by controversial cartoons depicting Muhammad have made it clear that there remains a reverent and controversial figure even today. This course takes a critical historical perspective to the biographies of Muhammad, the founder of Islam. Rather than focus on the “facts” of his life, we will think about the ways in which historical context, political interests, and shifting conditions of religion have influenced the way in which Muhammad has been imagined and remembered. We will also consider the ways in which Muslim and non-Muslims biographies of Muhammad are intertwined and interdependent, often developing in tandem with one another. By exploring Muslim and non-Muslim, pre-modern and modern accounts of Muhammad’s life, we will think about the many ways in which Muhammad’s life has been told and re-told over the centuries. In this course we will consider some of the following depictions of Muhammad: Muhammad as the object of ritual devotion; Muhammad as statesman and military leader; Muhammad’s polygamous marriages and his young wife, Aisha; Muhammad as social reformer and revolutionary. Course readings will include pre-modern biographies (in translation) as well as contemporary Muslim and non-Muslim biographies.
Class Format: seminar
Requirements/Evaluation: reading responses, 3 short essays (3-4 pages double-spaced), and final exam

ARAB 233 Introduction to Classical Arabic Literature (W)
Crosslistings: ARAB 233/COMP 233
In this course we will examine the rich, complex and diverse texts of Classical Arabic Literature. The readings include works that have achieved notable notoriety outside of the Arab world (such as the Quran and One Thousand and One Nights) as well as works by authors largely unknown outside of the Arab world but canonical in Arabic-language culture such as Imru al-Qays, al-Jahiz, al-Ma’arri, Abu Nuwas, al-Hallaj, al-Ghazali and al-Mutamanni. Women’s literature in this context includes works by al-Khansa’, known for her elegies, and by Wallada bint al-Mustakfi of Cordoba, who contributed to the courtly love poetry of both Europe and the Arab world. Topics for discussion include theological and philosophical queries, erotica, wine, bibliomania and avarice. Our primary texts represent such varied regions as the Arabian Peninsula, Egypt, Abbasid Baghdad, North Africa and Islamic Spain. Chronologically, the texts range from the sixth century CE to the fourteenth century. All readings are in English.
Class Format: lecture/discussion
Requirements/Evaluation: consistent and pro-active class participation, two 3- to 5-page papers, a final 8- to 10-page paper, one short presentation and weekly 1- to 2-page reaction papers

ARAB 235(F) The Qur’an and Literature
Crosslistings: COMP 235/ARAB 235/REL 235
This course explores the rich and multifaceted relationship between the Qur’an and literature from several different perspectives. The first part of the course will examine Qur’anic stylistics through primary readings in translation and scholarship on the question of whether the Qur’an is literature. Readings will consider how the Qur’an sheds light on the category of literature through attention to such features as sound, figurative language, and genre. Students will also discover what the Qur’an has to say about poets and stories. We will then turn to the classical discourse on Qur’anic inimitability (‘i`jaz al-Qur’an), with an emphasis on stylistic/rhetorical inimitability and its relationship to Arabic literary theory. We will make use of recent translations of ‘i`jaz treatises, manuals of literary criticism, and historical readings on the status of the Qur’an in early Islamic history. Finally, we will read a selection of later literature that takes up Qur’anic themes and language in Islamic history, in order to explore questions of intertextuality, rewriting, and the guises that commentary can take.
Class Format: seminar
Requirements/Evaluation: 2 papers (5-7 pp., 8-10 pp.), short response papers, class participation
Enrollment Preferences: Comparative Literature majors, Arabic Studies majors
Enrollment Limit: 40
Expected Class Size: 15

ARAB 237(S) Love, Desire, and Longing in Classical Arabic Poetry
Crosslistings: COMP 237/ARAB 237
This course is designed for students with no prior training in classical Arabic language. In its various guises, it has been a vehicle for expressing many forms of desire, including erotic passion, “platonic” yearning for the loved one from a distance, and mystical love for the Divine. This course will explore the development of ghazal, beginning with pre-Islamic odes, continuing through the rise of the ghazal as an independent genre, and then taking up its adaptations across the classical and pre-modern Arabic-speaking world. We will pay close attention to aesthetics, tone, emotional effect, and features particular to certain sub-genres of ghazal. Background readings about historical, cultural, and literary contexts will shed further interpretive light on the poetry. Through these sources, which come from lands as diverse as Fustat, Iberia, North Africa, the Levant, and the Arabian Peninsula, we will investigate how classical Arabic-language love poets expressed issues of gender, class, sexuality, existential despair, hope and loss, and loving in relationship to God.
Class Format: seminar
Requirements/Evaluation: 2 papers (5-7 pp., 8-10 pp.), short response papers, class participation

ARAB 252 Arab Women Memoirs: Writing Feminist History
Crosslistings: ARAB 252/COMP 252/WGSS 251/HIST 309
This course reviews selected autobiographical writings by Arab women writers from the wave of independence in the 20th century to the contemporary Arab uprisings, passing through all the transformations that globalization and the technosphere have instigated. We will examine the role that first-person narratives play in shaping literature, history and thought, while providing a space to reclaim the social and political agency. Focusing on the different articulations of self-representation, our discussion will address how these women reflect on the shifting discourses of identities, gender, nationalism, religion, feminism, sexuality, politics, borders and their histories. Questions we will address include: How did these memoirs contribute to the development of Arab feminist consciousness? In addition to the memoirs, we will look at women's blogs and watch films that focus on first-person narrative to discuss related topics, such as visual testimonies, virtual political participation and feminist resistance in the technosphere. Required texts may include: Fatwa Tugan (A Mountainous Journey: An Autobiography), Fatima Mernissi (Dreams of Trespass: Tales of a Harem Girlish), Leila Ahmed (A Border Passage: From Cairo to America—a Woman’s Journey), Fadia Faqir and Shirley Eber (In the House of Silence: Autobiographical Essays by Arab Women Writers), and Jumannah Haddad (I Killed Scheherazade: Confessions of an Angry Arab Woman), as well as critical essays and selections from autobiographical writings that reflect the diversity of Arab women in the Middle East and the diaspora.

Class Format: seminar
Requirements/Evaluation: active class participation, several short response papers, three short papers (3-5 pages), and a final paper (7-10 pages)
Extra Info: may not be taken on a pass/fail basis; not available for the fifth class option

ARAB 253 Narratives of Placement and “Dis-placement” from the Global South
Crosslistings: COMP 253/ARAB 253
This seminar deals with the theme of placement and “dis-placement” in literature from different sites in the Global South in the late 20th century. Situating the question of placement and uprootedness within multiple historical and cultural contexts in different sites in the Southern hemisphere, the location of much of the “developing world,” including the Middle East and North-Africa, Latin America, the Caribbean, the African Diaspora and the US-Mexico border, we will address the following questions: What distinguishes exile from Diaspora? What constitutes “dis-placement”? How do the experiences of up-rootedness and forced migration among Palestinian refugees and Mexican migrant workers (within Mexico and the US, with or without documents) inform our notion of home and belonging? How do the legacy of French colonialism in North Africa and the rise of globalization in Latin America, for example, shed light on the ongoing massive immigration of subjects from the Global South to...
the North? Our emphasis will be on working together to find avenues for expressing yourselves in writing and other media, such as creating your own blog entries about these topics. In addition to a course reader with selected stories, poems, and critical essays, readings will include: Benyamin's

ARAB 256 Arab and Anglophone: Narratives Beyond Nation and Diaspora

Crosslistings: ARAB 256/COMP 256/ENGL 284

This course takes a close look at contemporary Anglophone Arab writings. The objective is to familiarize students with major Arab writers, and/or writers of Arab descent who live in the Anglo-Saxon diaspora, especially the UK, North America and Australia. We will investigate the work of these writers with special attention to the history of Arab migration to these geographies, and the emergence of hyphenated Arab identities and literatures. At the heart of this course is a desire to not only shed light on what it means to be an Arab or an immigrant producing English literature, but also to understand the multiple ways in which we conceptualize and seek to define what transnational literature means. Texts for this course may include novels by the following writers: Rabih Alameddine (Lebanon/USA), Mohja Kahf (Syria/USA), Leila Aboulela (Sudan/UK), Hisham Matar (Libya/UK), and Randa Abdel-Fattah (Palestine-Egypt/Australia). There will also be a course reader that includes critical essays, poems, as well as a number of films and selections of music that shed light on the different articulations of being Arab and Anglophone.

Class Format: seminar

Requirements/Evaluation: active class participation, 4 short response assignments (2-3 pages), and final paper (5-7 pages)

ARAB 259(S) Bilad al-Sudan and Beyond: Arts of the Afro-Islamic World (D)

Crosslistings: ARTH 259/AFR 259/ARAB 259

From the Swahili stone houses of East Africa to the massive earth and timber mosques of the Sahel, the story of Islam in Africa is one of cultural and spiritual hybridity expressed through material form. In this course, students will explore how artistic forms and traditions in Africa have functioned as vehicles of access and integration for Islam, enabling it to assimilate itself with numerous African contexts towards becoming the dominant religious force on the continent. In addition, students will investigate how the forms, functions, and meanings of Afro-Islamic objects across the continent reflect not just one African Islam, but many different iterations, each shaped by the specific frameworks of its cultural context. The contemporary component of the course will examine how modernity in the form of globalization, technology, and Westernization has affected Afro-Islamic artistic traditions, and how these shifts reflect larger evolutions within understandings of Islam in Africa in the contemporary period.

This course fulfills EDI requirements through its exploration of the cross-cultural strategies used by Islam to interact with, respond to, and manifest itself within established African expressive traditions.

Class Format: lecture

Requirements/Evaluation: three reading response papers (2 pages each), class journal, a midterm exam, and a final exam

Prerequisites: none, although an introductory course in art history or Islamic studies would be useful

Enrollment Preferences: if the course is oversubscribed, preference will be given to students who have declared a major in Art History or African Studies

Enrollment Limit: 25

Expected Class Size: 15

ARAB 261 Comparative Postcolonial Narratives: Novels from the Arab World, Latin-America and the Caribbean (W)

Crosslistings: COMP 261/ARAB 261

In this introductory course to the global postcolonial novel, we will examine novels in translation from the Arab world, Latin America and the Caribbean that are in conversation with each other. Through textual and formal analysis of selected novels in translation, we will ask questions concerning the legacy of the different forms of European colonialism in these distinct geographies. This course has two goals: First, to familiarize students with classical, canonical and popular Arabic, Latin American and Caribbean novels that deal with the history of European colonialism and/or its aftermath. Second, to introduce student to some of the critical trends and theoretical debates concerning the potential and limits of reading these novels as resistance and/or postcolonial literature. In addition to selected critical essays, the requirement for this course may include novels by the following writers: Assia Djebar (Algeria), Gamal al-Ghitani (Egypt), Sahar Khalifa (Palestine), Tayyib Saleh (Sudan), Alejo Carpentier (Cuba), Rosario Castellanos (Mexico), Jamaica Kincaid (Antigua), and Gabriel Garcia Marquez (Colombia).

ARAB 280 Islam and Anthropology

Crosslistings: ANTH 346/REL 346/ARAB 280/ASST 346

If anthropology has helped to define Islam in global thought, Islam has returned the favor, holding a critical mirror to the anthropological endeavor perhaps more than any other traditional “object” of study. This course examines anthropological studies of Islamic societies for what they teach us both about Islam and about anthropology. We begin with foundational social theorists whose studies of religious phenomena helped give rise to the field of anthropology of religion. We then survey influential efforts to construct “ideal-type” models of Muslim society based on anthropological and historical knowledge, alongside efforts to critique, historicize, and redirect the model-building project (notably by Talal Asad and Edward Said). The second half of the course is devoted to case studies that explore, from a variety of perspectives and in several regions (Morocco, India, Egypt, Syria), questions of human agency, hierarchy and resistance, and Islam as discursive resource, ethical project, and embodied community.

Class Format: seminar

Requirements/Evaluation: weekly postings, one 5-page paper, one 10-page paper, discussion leading
Prerequisites: none
Enrollment Preferences: juniors and seniors, Anthropology, Sociology or Religion majors

ARAB 292(S) Revolutions and Counter-Revolutions: Narratives from the Arab World, Latin America and the Caribbean (D) (W)
Crosslistings: COMP 292/ARAB 292

This course offers a South-South comparative reading of revolutions and counter-revolutions in the second half of the 20th century in the Arab World, Latin America and the Caribbean. Focusing mostly on novels that depict histories of social movements, post-independence revolutions, indigenous autonomousities, dictatorship, and counter-revolutions, our aim is to investigate narratives of people power vs. absolute power, insurgency vs. neocolonialism, utopias and dystopias. To familiarize students with an alternative, yet foundational, canon of modern Arabic, Latin American and Caribbean literatures, we will focus on novels from the post-Sixties generation in the Arab world and the post-Boom Latin American generation. Questions that we will ask: How do these novels configure narratives of the nation and its fragments? What can we learn about the rise and fall of Communist rebellions in Oman and Cuba? How memories of traumatic lives under dictatorship in Syria and Chile shaped the genre of the political novel? How did novels about the ‘revolution’ contribute to the rise of realist experimental literary movements Arab and Latin American literatures? In addition to selected films and critical essays, the readings for this course may include novels by the following writers: Sahar Khalifeh, (Palestine), Sonallah, Ibrahim (Egypt), Dima Wannous (Syria), Sinan Antoon (Iraq), Zoé Valdés (Cuba), Subcomandante Marcos and Paco Ignacio Taibo III (México), Roberto Bolano (Chile), and Luisa Valenzuela (Argentina).

ARAB 303(F) A History of Islam in Africa (D)
Crosslistings: HIST 303/REL 303/AFR 303/ARAB 303/GBST 303

This course examines the history of Islam in Africa from the seventh century to the present. We will start off by looking at the spread of Islam in different parts of Africa. We will then analyze the social, political, economic, and cultural impact of Islam on African societies, the interaction between Islam and indigenous African institutions, the Islamic revolutions in the nineteenth century, the impact of European colonial rule on Muslim societies, and the development of Islam in the post-independence period. We will also examine how African Muslims reconstructed and asserted their religious identities by localizing Islamic intellectual traditions, healing practices, music, arts, cultural norms, and formal and informal religious festivals. By the end of the semester students should be able to appreciate Islam’s common framework as well as its diversity and dynamics within that larger framework and over time. This EDI course explores the experiences and expressions of the culturally diverse peoples of Africa in the New World (and the Old), as well as the myriad ways in which they confront, negotiate, and at times challenge dominant U.S. and/or European hierarchies of race, culture, gender and class.

Class Format: seminar
Requirements/Evaluation: two 7-page papers and one 12- to 15-page paper

ARAB 305 Nationalism and Nation Building in the Middle East (D)
Crosslistings: HIST 305/ARAB 305

In 1932, or twelve years into his rule and twelve years after the establishment of Iraq, King Faisal I lamented that there were "no Iraqi people but only unimaginable masses of human beings, devoid of any patriotic idea, imbued with religious traditions and absurdities, connected by no common tie." This course will consider how true the King’s statement still holds by evaluating the various attempts at state and nation building in the modern Middle East and the challenges of statecraft. After assessing some of the more influential theories of nationalism, we will explore the historical experience of nationalism and national identity in Iraq, Israel, Turkey, Palestine, Iran, and Egypt. What has been at the basis of nationhood? How did European concepts of nation translate into the Middle Eastern context? What was the role of religion in these modern societies? How did traditional notions of gender affect conceptions of citizenship? We will also explore some of the unresolved issues facing the various nations of the Middle East, such as unfinished nationalist aspirations, disputes over land and borders, and challenges to sovereignty. Finally, we will evaluate the role of foreign powers in nation building in the Middle East and consider whether the modern concept of the nation has any validity in the Middle Eastern context. Because this course is comparative in nature that utilizes theoretical frameworks to better understand cross-cultural interaction and because it focuses on the ways in which governments in the Middle East have used their power to legitimize their actions in the name of nationalism, this course fulfills elements of the Exploring Diversity Initiative (EDI).

Class Format: lecture/discussion
Requirements/Evaluation: evaluation will be based on several short papers and a "Magnus" Opus (a.k.a. final research paper)

ARAB 311 The United States and the Middle East

Crosslistings: HIST 311/ARAB 311

At the turn of the twentieth century, the United States was considered a benign superpower in the Middle East. Americans were known as “innocents abroad” for their educational and philanthropic work. From a distance, American society was admired for its affluence and freedom, and Middle Eastern politicians eagerly sought American advice and assistance. Today, however, the situation could hardly be more different. This course will examine the remarkable transformation of American involvement in the Middle East. Significant cultural and political developments of the latter half of the twentieth century will be assessed in order to identify how the United States has approached the region and consider the multifaceted and sometimes ambivalent reactions of people in the Middle East to increasing U.S. presence. It will also explore the difficulty the United States has experienced in balancing diverse, and sometimes conflicting, foreign policy interests, and will evaluate what may account for the increasing level of antagonism and mistrust on both sides.

Class Format: discussion

ARAB 332 Islamic Feminism

Crosslistings: REL 332/WGSS 334/ARAB 332

This course examines the relationship between feminism and Islam, focusing particularly on Islamic feminist scholarship. We will take a genealogical approach to our study of Islamic feminism tracing the different discourses that have informed and shaped the field. The first part of the course will begin with a critical examination of orientalist and colonial representations of Muslim women as oppressed and in need of liberation. We will then explore Muslim responses to such critiques that were entwined with nationalism and independence movements. This historical backdrop is critical to understanding why the question of women and their rights and roles become crucial to Muslim self-understanding and Islamic reform. The second part of the course will focus on major intellectuals and thinkers who have influenced Islamic feminism. Finally, the last part of our course will explore the breadth of Islamic feminist literature, covering the following themes: 1) feminist readings of scripture, 2) feminist critiques of Islamic law, and 3) feminist theology.

Class Format: seminar
Requirements/Evaluation: weekly responses, four 2- to 3-page essays
Prerequisites: none
Enrollment Preferences: Religion, Arabic Studies, Women's, Gender and Sexuality Studies, History majors
Enrollment Limit: 15

ARAB 410 Kings, Heroes, Gods, & Monsters: Historical Texts and Modern Identities in the Middle East (D) (W)
What role does ancient history play in modern societies? What is the role of myths and fables in the creation of national identities? This course will address the use and abuse of ancient history and archaeology in the modern Middle East. The first part will focus on some of the primary ancient texts, with special focus on Ferdowsi's epic Shahnameh (Book of Kings); we will compare its themes and world view with those of the Icelandic sagas that share many similarities with the Iranian canon. In the second part of the course we will explore how ancient history, archaeology, and epic texts helped forge national identities in the modern Middle East. Our primary attention will be Iran and its relationship with the Shahnameh. But we will also consider the relationship of Biblical history to the establishment of modern Israel and Israeli nationalism, how contemporary Egypt relates to its Pharaonic past, the obsession with pre-Islamic history in modern Turkey, and the relationship between archaeological artifacts and ancient Mesopotamian history and 20th century Iraqi politics. Because of its comparative focus, this course is part of the Exploring Diversity Initiative.

Class Format: seminar

Requirements/Evaluation: a final, 25-page research paper on the relationship between ancient history and a modern Middle Eastern country, shorter papers, and group work

Prerequisites: previous upper division work in HIST or courses on the Middle East

Enrollment Preferences: History majors, Jewish Studies concentrators, Arabic Studies majors, and other students with a strong background in Middle East studies

Enrollment Limit: 15

Expected Class Size: 15

ART (DIV I)

Chair: Professor PETER LOW

The Department offers students different paths to explore the vital connection between visuality and creativity. With courses of study in the History of Art and the Practice of Studio Art (or a combination of History and Practice), the Major is designed to train students to develop the technical, conceptual, critical, and historical tools they need to engage the visual world. ADVISING: Majors are expected to discuss their choice of courses and path through the major with their advisor or another professor in the department. Official departmental advisors for each route through the major (listed here below) are
available to field general questions concerning curriculum, requirements, and planning to study away.

Art History Faculty Advisor: Guy Hedreen (Fall), Stefanie Solum (Spring)
Art Studio Faculty Advisor: Ed Epping (Fall), Barbara Takenaga (Spring)
History and Practice Faculty Advisors: Ben Benedict, E. J. Johnson

ART HISTORY

The history of art is different from other historical disciplines in that it is founded on direct visual confrontation with objects that are both concretely present and yet documents of the past. We emphasize analysis of images, objects, and their environments, as the basis for critical thought and visual literacy. In addition to formal and iconographic analysis, we use the work of other disciplines to understand visual images, such as social history, perceptual psychology, engineering, psychoanalysis, cultural studies, and anthropology. Because of its concentration on visual experience, the Art History major increases one’s ability to observe and to use those observations as analytical tools for understanding history and culture.

Major Requirements

The Art History major requires a minimum of nine courses:

Major Requirements

ART HISTORY

ART HISTORY

Any ARTS (studio) course

Any two courses in Art History concerned with the following:

a) a period of art after 1600

One 400-level Seminar or 500-level Graduate Seminar (in addition this course may be used to satisfy the pre-1600 or post-1600 requirement).

One additional course, at any level

The faculty encourages students to construct a major with historical depth and cultural breadth. The numbered sequence of courses is intended to develop knowledge and skills appropriate to students’ interests, and to develop students’ perceptions and imaginations as they investigate a variety of visual media.

100-LEVEL COURSES require no experience in the subject. They are introductions to the field that develop students’ skills in visual analysis, interpretation, and written expression and argumentation.

200-LEVEL COURSES are introductions to specific fields within art history, but normally open to students with no experience in art history. Often, there is a significant lecture component to the courses.

300-LEVEL COURSES focus more closely on specific art-historical problems, or present material in a tutorial format. The goal of these courses is to build skills needed for independent research and sustained analytical writing. Generally, there is a higher expectation of student participation or initiative, and longer and/or more frequent writing assignments. In the 300 level, students learn to work with and evaluate different types of sources, research tools, historical perspectives, and methodological approaches.

400-LEVEL COURSES are intensive discussion-oriented seminars that emphasize critical analysis and build toward student-initiated, independent work (oral presentations and sustained, analytical research papers). Advanced majors who have taken ARTH 301 are encouraged to work at the 400 or 500 level, and papers produced in these courses are normally the basis for the senior thesis.

ART STUDIO

The studio division of the Art major has been structured to foster the development of a critical understanding of making art to support creative interests, and to develop students’ perceptions and imaginations as they investigate a variety of visual media.

Major Requirements

ARTS 100 Drawing I

Three courses in three different media (ARTS 100 and tutorials do not satisfy this requirement)

Any one 200-level ARTS course

ARTS 319 Junior Seminar

Any two of the 300-level ARTS courses, or one 300-level ARTS course and ARTS 418T Senior Tutorial

Drawing I, ARTS 100 serves as an introduction to the basic drawing and design principles which establish the foundation for the development of visual expression. An art history course provides part of the necessary background in the critical analysis of art. The 200-level ARTS courses provide opportunities to learn the elements of some of the principal visual arts media: for example, architecture, painting, photography, printmaking, sculpture, and video. These courses combine technical foundations in the medium with analysis of the interrelation of visual form and content. The 300- and 400-level courses place a greater emphasis on the application of appropriate visual skills and strategies to particular thematic concerns, and to the development of the student’s individual vision. All students taking ARTS418 are required to exhibit in the spring of their senior year at the Williams College Museum of Art or other appropriate venues. Students who choose to take two 300-level classes do not exhibit at WCMA in the spring of the senior year.

HISTORY AND PRACTICE

This route allows students to study in depth both the history of art and the making of it. It offers considerable flexibility: students may propose courses of study that emphasize particular media, themes, or methodological issues. Students may take more courses in one wing of the department than the other, as long as the minimum requirements in each wing are satisfied. (Note that the Art History and Studio Art Practice routes are strongly recommended for any prospective Art major who is contemplating graduate study in Art History or Art Studio.)

Some students will be attracted to both wings of the department but will not have time to devote to both equally. The faculty encourages students to choose between history and studio-taking additional courses from the other wing as desired. In short, the History and Practice route is reserved for students with a strong record of achievement who cannot be accommodated in the two wings of the department.

History and Practice students who are admitted to the Senior Tutorial will participate in the senior studio exhibition at the end of the year. Unlike the history or studio routes, acceptance into the History and Practice route requires that students cannot not take both courses in the same wing, and that they must submit a thoughtful statement of the theme of their course work. This application must include a thoughtful statement of the theme of the major that both 1) shows the coherence and integrity of the plan of study and 2) explains why the students’ goals cannot be met in either history or studio. The application must include both the written statement and a list of proposed courses. The application must be submitted in two copies to advisors in both wings of the department. If approved, the application and list of proposed courses must be submitted to the department secretary before registering for the major.

Major Requirements

ARTS 100 Drawing I

One 200-level ARTS course

ARTS 319 Methods or ARTS 319 Junior Seminar

One 400-level ARTS course, or one 500-level graduate course (except 508)

Any four additional Art Studio or Art History courses. At least one elective must be taken in each wing of the department. At least one of the electives must be an Art History course concerned with a period of art prior to 1600.

THE DEGREE WITH HONORS IN ART

Students who wish to become candidates for the degree with honors must show prior evidence of potential in the major as well as research capabilities to carry out the proposed project.

ART HISTORY

To graduate with honors in art history, students are to enroll in the Senior Thesis Seminar (ARTH 494) during the Spring semester of their senior year, where they will develop an original research paper (completed in a prior course or an independent study). To be admitted to the seminar, students must submit their original research paper to the Art Department’s Administrative Assistant in Spencer no later than the end of the exam period of the Fall semester. The paper must be properly formatted and include both illustrations and bibliography. It must additionally include an abstract of not more than 250 words.

Students must also secure an academic advisor for their project and complete the advising Agreement Form (available from the Art Department’s Administrative Assistant) by the end of the exam period of the Fall semester. This form serves to verify: a) your advisor’s support of your project, and b) your advisor’s approval of your plans for Winter Study. Students should plan to dedicate Winter Study to work on their thesis project and, to this end, they should enroll in ARTH 31 immediately after (but not before) notification of admission into ARTH 494. (To avoid problems should they not be admitted to ARTH 494, students should pre-register in another Winter Study course). Because faculty are not usually available during this period, it is very important for students to plan, together with their advisors, a work schedule for Winter Study that is consistent with their specific goals. Admission to the Senior Thesis Seminar will be determined by the instructor of the seminar, in consultation with the Art Department faculty. The important criteria for admission are: 1) the quality, originality, and potential of the research paper on which the thesis project will be based; 2) the availability of a suitable advisor for the project, and the commitment of that advisor to supervise the work during the Spring term; 3) strong past performance in the art history route to the Major; 4) completion of ARTH 301 by the end of the semester (exceptions to this rule must be granted beforehand by the chair of the Department).

In early January, the instructor will notify students of their admission to the Thesis Seminar. Since enrollment is by invitation only, students should pre-register for four classes in the Spring semester. If invited to join the seminar, students should then drop one of those courses and add the Thesis Seminar during drop-add period. The Thesis Seminar is to be taken in addition to the
nine required courses for the art history route to the Major. Once in the seminar, students will revise, refine, and expand on previous research and produce a paper of approximately 25 pages. At the end of the semester, they will present a shortened version of the paper to the faculty and public at the Williams College Museum of Art.

ART STUDIO

Studio art concentrators who wish to be candidates for honors are required to take an extra studio course, of their choosing, for a total of ten courses. One of the ten courses must be the 400-level Senior Tutorial (ARTS 418T). Students must also take the Honors Independent Study course (ARTS 319) during Winter Study of their senior year, if they wish to have graduation of their major in the Spring semester. The entire studio faculty will be featured on the progress of the honors project at the beginning of the Spring semester. Honors candidates enrolled in the Senior Tutorial must demonstrate prior experience in the media chosen for the honors work. This proof may consist of one or more 200-level courses in the medium, course work at the 300 level, and/or a portfolio demonstrating the student’s proficiency in the media chosen for the honors project. This work must be presented to the instructor of the Senior Tutorial at the start of the Spring semester. At the end of the Spring semester of senior year, however, the studio faculty will vote on the project and whether or not it will receive honors. At the beginning of senior year, a candidate for honors in History and Practice makes a proposal to two faculty members, one faculty advisor from each wing of the department. If both advisors agree to supervise the project, the candidate enrolls in an independent study and works through the Fall semester and Winter Study. The progress of the project is assessed by both advisors until the entire studio faculty will vote on the project and whether or not it will develop, the advisors may end it at that time. If the project is allowed to move forward, the student enrolls either in Senior Tutorial (ARTS 418T, for which they will need permission of the instructor), if the project is primarily a matter of making art, or Honors Independent Study (ARTS 418S, for primarily a writing project. The final project is submitted to the two advisors, who will determine whether or not it will receive honors.

STUDY ABROAD

The route to honors is a combination of the art studio and art history routes to honors. At the beginning of senior year, a candidate for honors in History and Practice makes a proposal to two faculty members, one advisor from each wing of the department. If both advisors agree to supervise the project, the candidate enrolls in an independent study and works through the Fall semester and Winter Study. The progress of the project is assessed by both advisors until the entire studio faculty will vote on the project and whether or not it will develop, the advisors may end it at that time. If the project is allowed to move forward, the student enrolls either in Senior Tutorial (ARTS 418T, for which they will need permission of the instructor), if the project is primarily a matter of making art, or Honors Independent Study (ARTS 418S, for primarily a writing project. The final project is submitted to the two advisors, who will determine whether or not it will receive honors.

ART HISTORY CLASSES

Students planning on studying abroad must: consult a departmental advisor, leave a copy of their curriculum to the department, and consider the required junior seminars (ARTH 301 and ARTS 319) that prepare students for the independent research and/or independent artistic production which is the focus of the senior year.

Art History majors must take ARTH 301 in their junior year unless they are planning to study abroad for a full year; in that case, they may take the required class in their senior year (and should consider taking the course as a second-semester sophomore). The Department does not pre-approve courses for the art history major, but will offer provisional credit for courses that appear to satisfy requirements for the major. Art history majors may satisfy no more than 3 requirements abroad (the ARTS requirement may be satisfied only with the approval of the department). Art History majors must take ARTH 101-102, a hyphenated course, must be taken to receive course credit for either semester; students must take ARTH 101 before ARTH 102.

Extra Info: both semesters of ARTH 101-102, a hyphenated course, must be taken to receive course credit for either semester; students must take ARTH 101 before ARTH 102.

Enrollment Limit: none

Expected Class Size: 180

Distributional Requirements:
Division 1

ARTH 101(F) Art Through Time
A year-long, team-taught introduction to European and North American art and architecture, this course celebrates the glory of works of art as physical objects, to be viewed and contemplated, to be sure, but also often to be worshiped, exhibited, bought and sold, held, touched, worn, passed through or around, and lived in. To help students begin to appreciate how these works of art might have been understood by those who originally made and used them, the course sets its objects of study within a number of revealing historical contexts, from the social and the political to the philosophical and the art historical. In the first semester (ARTH 101), we cover art and architecture from the beginning to approximately 1600. In the second semester (ARTH 102), we examine art and architecture from 1600 to today. To train students to look carefully at art, and to give them time with original works of art, we use the wealth of art resources in Williamsburg: the Clark Art Institute, the buildings and sculpture of the Williams College Campus, the Williams College Museum of Art, and the Chapin Rare Book Library.

Class Format: lecture with discussion section
Requirements/Evaluation: quizzes, midterm, two papers and a final exam
Extra Info: both semesters of ARTH 101-102, a hyphenated course, must be taken to receive course credit for either semester; students must take ARTH 101 before ARTH 102
Prerequisites: none

ARTH 102(S) Art Through Time
A year-long, team-taught introduction to European and North American art and architecture, this course celebrates the glory of works of art as physical objects, to be viewed and contemplated, to be sure, but also often to be worshiped, exhibited, bought and sold, held, touched, worn, passed through or around, and lived in. To help students begin to appreciate how these works of art might have been understood by those who originally made and used them, the course sets its objects of study within a number of revealing historical contexts, from the social and the political to the philosophical and the art historical. In the first semester (ARTH 101), we cover art and architecture from the beginning to approximately 1600. In the second semester (ARTH 102), we examine art and architecture from 1600 to today. To train students to look carefully at art, and to give them time with original works of art, we use the wealth of art resources in Williamsburg: the Clark Art Institute, the buildings and sculpture of the Williams College Campus, the Williams College Museum of Art, and the Chapin Rare Book Library.

Class Format: lecture with discussion section
Requirements/Evaluation: quizzes, midterm, two papers and a final exam
Extra Info: both semesters of ARTH 101-102, a hyphenated course, must be taken to receive course credit for either semester; students must take ARTH 101 before ARTH 102
Prerequisites: ARTH 101

ARTH 103(D) Asian Art Survey: From the Land of the Buddha to the World of the Geisha (D)

Crosslistings: ARTH 103/ASST 103
This course introduces to students some of the most enduring masterpieces of Asian art with an emphasis on the art of India, China, and Japan. Its contextual approach helps students gain insight into the aesthetic, religious, and political ideas and cultural meanings conveyed by the works of art. It also provides students with the vocabulary, techniques, and patterns of thinking needed for advanced art history courses. Highlights include sexual symbolism in Hindu and Buddhist art; nature or landscape painting as moral and political rhetoric; the sex industry and kabuki theater and their art in Edo Japan; and the meeting of the Eastern and Western art. This course is one of the three foundational courses; art history majors may choose any of the three courses Arth 101, Arth 102, and Arth 103 to fulfill the foundational requirements. As an EDI course, its historical, visual, and thematic analyses will bear upon the interconnectedness not only among these three distinctively different cultures, but their respective interactions with the West.

Class Format: lecture
Requirements/Evaluation: evaluation will be based on three quizzes, two short papers, film screening and class attendance
Extra Info: may not be taken on a pass/fail basis
Prerequisites: none; highly recommended for first-year students
Enrollment Preferences: none
Enrollment Limit: 35
Dept. Notes: can be taken with either ARTH 101 or ARTH 102 as the foundational requirement for the Art History route to the major
Distribution Notes: meets Division 1 requirement if registration is under ASST
Distributional Requirements:
Division 1

ARTH 104(F) Materials, Meanings, and Messages in the Arts of Africa (D)
Crosslistings: ARTH 104/AFR 105

This course introduces students to the wealth, power, and diversity of expressive forms that have characterized the arts of Africa and its Diaspora from prehistory to the present. Pulling extensively from the collections at the Williams College Museum of Art and other campus resources, students will not only experience firsthand the wide array of objects that have been produced within this vast geography, but will also come to recognize how multiple senses including sight, sound, smell, and touch play a key role in understanding how these objects work within their respective contexts. As tools of political control, social protest, divine manifestation, and spiritual intervention, these objects and their associated performances also challenge what we might typically consider art in the Western tradition and as such students will be pushed to think beyond such terms in their examinations of these rich creative traditions. This course fulfills EDI requirements through its exploration of the differences between concepts of art in African and Western traditions, and its focus on renovating historical biases and assumptions about these objects that position them as ‘primitive’ or ‘exotic’ constructs.

Class Format: lecture
Requirements/Evaluation: three 2-page response papers, class journal, midterm exam and final exam
Prerequisites: none
Enrollment Preferences: lottery
Expected Class Size: 25
Distribution Notes: meets Division 1 requirement if registration is under ARTH; meets Division 2 requirement if registration is under AFR

ARTH 203 Chicana/o Film and Video (D)
Crosslistings: LATS 203/ARTH 203/AMST 205

Hollywood cinema has long been fascinated with the border between the United States and Mexico. This course will examine representations of the U.S.-Mexico border, Mexican Americans, and Chicana/os in both Hollywood film and independent media. We will consider how positions on nationalism, race, gender, identity, migration, and history are represented and negotiated through film. We will begin by analyzing Hollywood “border” and gang films before approaching Chicana/o-produced features, independent narratives, and experimental work. This course will explore issues of film and ideology, genre and representation, national/ethnic resistance and femicide critiques, queer theory and the performative aspects of identity. Through a focus on Chicana/o representation, the course explores a wide spectrum of film history (from the silent era to the present) and considers numerous genres. By introducing various interdisciplinary approaches and theoretical methods related to race, representation, and the media, the course fulfills the Exploring Diversity Initiative’s themes of critical theorization and power and privilege.

Class Format: film screenings as a lab
Requirements/Evaluation: evaluation will be based on one short paper, midterm exam, final exam and take home essays
Prerequisites: none
Enrollment Limit: 30
Expected Class Size: 20

Distribution Notes: meets Division 2 requirement if registration is under AMST, LATS or WGSS; meets Division 1 requirement if registration is under ARTH

Not Offered Academic Year 2017
LEC Instructor: C. Ondine Chavoya

ARTH 205 Cinematography in the Digital Age (D)
Crosslistings: ENGL 203/SCI 205/ARTH 205

In this course we study the language of modern cinema as shaped by two forces. The first is the aesthetics of cinematography, as contributed by many cultures. The second is digital film production, which has proved both empowering and constraining. The modern filmmaker succeeds only through understanding both forces.

The structure of the course is similar to a writing workshop. We begin with close reading of isolated scenes from influential films, which we compare and critique in writing and discussion. We augment this with cinematic and image processing theory, solidified through experiments in Photoshop and Premiere that reveal how digital technology shapes a director's choices. We then create our own short scenes using these tools and consumer video recorders. We refine our film fragments in the context of group critique.

Topics covered include: framing and composition, pace, storyboarding, blocking, lighting, transitions, perspective, sensors, quantization, compression, visual effects, Internet streaming, and color spaces. Studied films include those by Georges Méliès, Stanley Kubrick, Jonas Ivory, Barbara Kopple, Martin Scorsese, Sarah Polley, Onos Welles, David Lynch, Fritz Lang, Michael Haneke, Hayao Miyazaki, Spike Lee, Sophia Coppola, and Ken Burns. This course explores diversity through comparative study of how different cultures variously render similar themes, and through a larger investigation of film's ability to make audiences identify with potentially alien points of view.

Class Format: studio
Requirements/Evaluation: video production activity, computational exercises in Photoshop, script and storyboarding exercises, participation in discussions, and end of quarter exhibition
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: a 100 level English course, or a score of 5 on the AP Exam in English Literature or a 0 or 7 on the International Baccalaureate, or permission of instructor
Enrollment Preferences: sophomores; Computer Science and English majors
Enrollment Limit: 36
Expected Class Size: 30

Distribution Notes: meets Division 1 requirement if registration is under ENGL or ARTH; meets Division 3 requirement if registration is under CSC
Distributional Requirements:
Division 1

ARTH 209 The Art and Archeology of Maya Civilization: A Marriage Made in Xibalba
Crosslistings: ANTH 219/ARTH 209

The ancient Maya civilization was one of the most sophisticated and complex cultures of prehispanic Central America. Its complex calendrics, astronomy, mathematics and hieroglyphic writing system are well known worldwide. The course will examine the trajectory and nature of ancient Maya civilization from the combined perspectives of archaeology and art history. The origins and evolution of the Maya states during the Preclassic period (1000 B.C.-A.D. 250) will be explored by looking at the rich archaeological evidence and at Preclassic art styles. The Classic Maya civilization (A.D. 250-1000) will then be presented through a detailed survey of the archaeology, art and hieroglyphic texts of this period. Finally, the collapse of Classic Maya civilization and its visualization and endurance during the Postclassic period and under early Spanish rule (A.D. 1000-1600) will be critically evaluated through a detailed review of the archaeological and iconographic evidence.

Class Format: lecture/discussion
Requirements/Evaluation: midterm and final exams, hieroglyphic project, research paper
Prerequisites: none, but an introductory ARTH or ANTH course recommended
Enrollment Preferences: Anthropology/Sociology and Art History majors
Enrollment Limit: 25
Expected Class Size: 16

Distribution Notes: meets Division 1 requirement if registration is under ARTH; meets Division 2 requirement if registration is under ANTH
Distributional Requirements:
Division 2

Not Offered Academic Year 2017

ARTH 212 Distant Encounters: East Meets West in the Art of the European Middle Ages
This lecture course investigates the rich artistic consequences—in architecture, manuscript illumination, mosaic, sculpture, panel painting, fresco, metalwork, and other minor arts—of European contact with the Eastern Mediterranean between approximately 300 and 1450 AD. From the beginnings of Christianity, pilgrimages from Europe made the long journey to sacred sites in the Holy Land (extending across parts of present-day Egypt, Israel, Syria, and Turkey). When Jerusalem became less accessible with the spread of Islam in the seventh century, Europeans sought to recreate the sites at home. Later, from 1095 onward, Christian Europeans attempted to reclaim and hold the Holy Land from non-Christians by force, through an ill-fated series of five major and several lesser “crusades.” Over the centuries, before, during, and after the Crusades, exposure to the peoples, ideas, and cultures of the Eastern Mediterranean also came through trade and through the settlement and non-Europeans in Europe itself, particularly in Spain, Sicily, and Venice. The course aims to survey artistic production within each of these different contexts of East-West encounter.
Class Format: lecture/discussion
Requirements/Evaluation: two to three short papers, midterm, and final exam
Prerequisites: none, but previous coursework in medieval art helpful (ARTH 101-102, 223, or 224)
Enrollment Limit: 25
Expected Class Size: 25
Distributional Requirements: Division 1
Other Attributes: ARAB Arabic Studies Electives

LEC Instructor: Antonio Foias

ARTH 213 Greek Art and Myth
Crosslistings: ARTH 213/CLA 213
Classical myth provides rich subject matter for painters and sculptors throughout the history of western art. This course investigates the earliest representation of myth in Greek art of the seventh through the first centuries B.C.E. Sophisticated narratives involving gods and heroes first appear in a variety of forms and contexts. Myth informs the visual culture of the Greeks on many levels, from paintings on vases used in domestic contexts to the marble sculpture that decorated the monumental temples of great sanctuaries throughout the Greek world. The purpose of the course is two-fold: to familiarize students with the subjects and narratives of Greek myths and the underlying belief system that, in part, produced them, and also provide a comprehensive outline of developments in Greek art in the first millennium B.C.E. Of special interest will be the techniques developed by artists for representing narratives visually, as well as the conceptual issues that underlie certain myths, such as sacrifice, war, marriage, coming of age, specific festivals, and the relationships between men and women, and those between mortals and immortals. Reading will include ancient literature in translation (Hesiod, Homer, Sappho, Aischylos, Sophokles, Euripides and Apollodorus) as well as secondary literature by contemporary authors that provides insights into the religious, social and historical developments that influenced artists in their choices of subject matter and style.
Class Format: lecture
Requirements/Evaluation: two short papers, quiz, hour test, final exam, required fieldtrip to The Metropolitan Museum in New York
Prerequisites: none
Enrollment Limit: 45
Expected Class Size: 45
Distributional Requirements: Division 1
Not Offered Academic Year 2017
LEC Instructor: Peter Low

ARTH 216 Body of Evidence: Greek Sculpture and the Human Figure
Crosslistings: ARTH 216/CLA 216
From the beginnings of Greek sculpture in the eighth century B.C.E. until the end of the Hellenistic period in the first century B.C.E., the human figure remained the most prominent choice of subject for Greek artists. Introductory classes will cover sculpture in the Neolithic and Bronze Ages but the goal of this course is to study Greek sculpture in the first millennium B.C.E. with emphasis on ancient Greek attitudes toward the body. We will consider the function, surroundings and reception of male and female figures, both human and divine, from athletic, religious and funerary contexts, and look at dedications of individual figures as well as the complex mythological narratives found on Greek temples. Reading material includes ancient literature in translation as well as contemporary critical essays.
Class Format: lecture
Requirements/Evaluation: two short papers, midterm, final exam
Prerequisites: none
Enrollment Limit: 30
Expected Class Size: 25
Distributional Requirements: Division 1
Not Offered Academic Year 2017
LEC Instructor: Elizabeth McGowan

ARTH 218(F) Dutch Art: History and Studio Combined
Crosslistings: ARTS 117/ARTH 218
By the seventeenth century, the Northern Netherlands succeeded in throwing off Spanish Hapsburg rule and becoming a locally governed republic. More than other European artists, Dutch artists based images on their land and its people. This course considers works by Rembrandt, Vermeer, and other artists from a studio as well as an art historical perspective. Lectures, readings, and discussions will examine what the artists depicted, how they worked, and the degree to which they both reflected and shaped their social context. Twice a week students will attend studio sessions during which they will do related introductory level exercises in drawing, leading up to the production of drawings in the styles of Rembrandt and his Dutch contemporaries. No prior experience in drawing is expected; students will learn basic methods for working with a range of media including ink wash, pen, and watercolor. The close study of these Dutch artists will offer insights into large issues of representation, and the studio component will complement those insights with a sense of how that representation was achieved.
Class Format: lecture
Requirements/Evaluation: evaluation based on 2 short papers, questions submitted about readings, weekly drawing assignments, and class participation
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none; no prior experience in drawing is expected
Enrollment Limit: 16
Expected Class Size: 16
Materials/Lab Fee: drawing supplies will be provided and charged to the student's term bill
Distributional Requirements: Division 1
Fall 2016
LEC Section: 01 W 11:00 AM 12:15 PM Instructors: Zirka Filipczak, Steven Levin
LAB Section: 02 MF 11:00 AM 12:15 PM Instructors: Zirka Filipczak, Steven Levin

ARTH 222 Photography in/of the Middle East (D)
This lecture course will examine the history of photography from its beginnings in the 1830s to the present, from the first grainy black and white images to the work of contemporary artists using cutting-edge photographic technologies. We will examine photographs used for documentary, scientific, and aesthetic purposes, and we will trace the medium's emergence and acceptance as a fine art. We will also explore photography's physical and conceptual characteristics as a medium, paying particular attention to its uniquely intimate and frequently contested relationship to "the real." By the end of the course, students will have a broad understanding of photography as a unique medium within the history of art and knowledge of the theoretical frameworks that developed alongside that history.
Class Format: lecture
Requirements/Evaluation: one short paper, a 6- to 8-page paper, mid-term, and final exam
Prerequisites: none
Enrollment Limit: 25

ARTH 222 Photography in/of the Middle East (D)
Crosslistings: ARTH 222/ARAB 222
Since its inception, photography has been globally disseminated but locally influenced, serving disparate documentary, scientific, and aesthetic purposes in different cultural contexts. In the Middle East, the powers and pleasures of the medium have been valued by colonial forces, indigenous populations, photojournalists and artists; the resulting images merit aesthetic appreciation even as they grant visual access to the past and present in complicated places. This course will explore photographic practices in different zones of the Middle East — e.g., the Holy Land, Egypt or the Persian sphere — by attending to individual photographers and case studies. This tightly focused approach will support, in turn, a consideration of the burdens and risks of representation in unfamiliar circumstances — what work do photographs do? Who resists and who benefits? The general goal will be to appreciate the diversity of perspectives that underlie renderings of the Middle East.
Class Format: lecture
Requirements/Evaluation: class participation, short papers, term project
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none
Enrollment Preferences: permission of instructor
Enrollment Limit: 19

ARTH 283(F) Comic Lives: Graphic Novels & Dangerous Histories of the African Diaspora

Crosslistings: AFR 323/AMST 323/ARTH 223/COMP 322/ENGL 356

This course explores how the graphic novel has been an effective, provocative art at times controversial medium for representing racialized histories. Drawing on graphic novels such as Jeremy Love's Bayou and Ho Che Anderson's King: A Comic Biography, this course illustrates and critiques multiple ways the graphic novel conveys meaning and image to create more sensual access into ethnic traumas, challenges and interventions in critical moments of resistance throughout history. Students will practice analyzing graphic novels and comic strips, with the help of critical essays, reviews and film; the chosen texts will center on Africania cultures, prompting students to consider how the graphic novel may act as a useful alternate history for marginalized peoples. During the course, students will keep a journal with images, themes and reflections and will use Comic Life software and ipads to create their own graphic short stories based on historical and/or autobiographical narratives.

Class Format: Seminar
Requirements/Evaluation: evaluation will be based upon class participation, weekly written responses, student-led facilitation, one 3-page graphic analysis, one 6- to 8-page essay, and a final project (producing a graphic short story with Comic Life)
Extra Info: may not be taken on a pass/fail basis, not available for the fifth course option
Prerequisites: none
Enrollment Preferences: none
Enrollment Limit: 19
Expected Class Size: 19

ARTH 226(S) Renaissance Architecture

The revival in fifteenth-century Italy of ancient architectural forms for new purposes, begun by Brunelleschi and Alberti, has influenced the course of architecture to the present time. The focus will be on major Italian architects including Bramante, Michelangelo and Palladio, with excursions into England, France and Spain. Parallel developments in painting and sculpture will be considered.

Class Format: Lecture
Requirements/Evaluation: mid-term test, final exam
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

ARTH 230(S) The Temple in South Asia (D)

Crosslistings: ARTH 230/ASST 230

Towering over urban expansions and secluded forests, or turning up on roadside corners and in narrow back alleys, temples occupy a crucial place in the physical and sacred landscape of South Asia. At once meeting places for diverse communities, markers of piety and power, and architectural and sculptural wonders, temples are where artistic practice, devotion, and political and social aspirations come together. This lecture course explores the history, forms, and meanings of South Asian temples both as important works of architecture and centers of religious and social activity. Through topics such as ritual and sacred space, pilgrimage, architecture and symbolic cosmology, and the politics of architectural reuse, we will develop a multifaceted understanding of the temple in South Asia.

Class Format: Lecture
Requirements/Evaluation: midterm and final exams; one 4- to 5-page paper, and one longer final paper (8-10 pages)
Prerequisites: none
Enrollment Limit: 30

ARTH 236 Demigods: Nature, Social Theory, and Visual Imaginaton in Art and Literature, Ancient to Modern

Crosslistings: ARTH 236/CLAS 236/ENVI 236

This course traces the obscure history of demigods (satys, centaurs, nymphs, Pan, etc.) from its origins in ancient Greek art and poetry until today. We pay special attention to three points: the relationship between the mythology of demigods and ancient political theory concerning primitive life; the relationship between the mythology and evolving conceptions of the environment, and the capacity of the arts and images to generate and transmit mythology that has a limited literary counterpart.

Individual demigods occasionally interact with gods or heroes, and end up in the pages of a book. But animal-human hybrids are usually envisioned in art as a primary visual experience, where they rise to this day. The interpretation of demigods has changed over time, keeping up with developments in ethics and evolving hierarchies of genre and taste. Demigods
have been subordinated to the status of decoration, or banished altogether. In antiquity, they are hardly ornamental. Embodied in satyrs, nymphs, Pan, and the others is a collective vision of an alternate evolutionary trajectory and cultural history. In this parallel world, humans and animals not only talk to each other, they live similar lives, immernary, and create new species. The distinction between nature and culture is not meaningful. Male and female are more or less equal. The industrial revolution never happens. How much of the ambiguity and the differences between modern cartography and the geographical mapping techniques used in the ancient world.

AR 245(S) Visual Arts and Natural History
Scientists and artists of the early modern period were faced with a natural world in expansion, which they endeavored to describe in detail. While scientifically, public rituals challenged existing ideas about classification, visual expertise, and collecting and display, new fields of study, such as ornithology, were forming into distinct scientific disciplines. From the emergence of cabinets of curiosity in the Renaissance to the creation of museums of natural history at the end of the Enlightenment, this course will examine the relation between visual arts and natural history in the early modern world. Topics such as women artists and collectors, the representation of life versus death, geographic exploration, teratology, taxonomy, imperialism, and fetishism will be studied. Students are expected to engage critically with the literature on the history of art and of natural history, to study thoroughly a set of primary sources, and to think creatively about questions of epistemology by observing the natural world around them.

Class Format: lecture
Requirements/Evaluation: three field assignments (e.g., herbal, snowflake observation), three response papers, 6- to 8-page research paper, midterm exam, final exam
Prerequisites: none

AR 246 Do You See What I See!!

Spring 2017
LEC Section: 01  TBA Instructor: Catherine Girard
We are all citizens of global visual culture, subject to a daily assault of images, artifacts, information and experiences. What we see and how we make meaning from it all depends on many variables—who we are, where we are and what we choose to look at. It also depends on what tools we bring to bear. This class is an opportunity to assemble a useful tool kit for the challenging visual environments of the 21st century. Image study will be central as we look, sketch and write throughout the semester, thereby exploring the entire spectrum of visuality and what different visual cultures might overlap in the global arena. Students will look, sketch and write.
of access and integration for Islam, enabling it to assimilate itself with numerous African contexts towards becoming the dominant religious force on the continent. In addition, students will investigate how the forms, functions, and meanings of Afro-Islamic objects across the continent reflect not just one African Islam, but many different iterations, each shaped by the specific frameworks of its cultural context. The contemporary component of the course will examine how modernity in the form of globalisation, technology, and Westernization has affected Afro-Islamic artistic traditions, and how these shifts reflect larger evolutions within understandings of Islam in Africa in the contemporary period.

This course fulfills EDI requirements through its exploration of the cross-cultural strategies used by Islam to intersect and respond to, and manifest itself within established African expressive traditions.

Class Format: lecture
Requirements/Evaluation: three reading response papers (2 pages each), class journal, a mid-term exam, and a final exam
Prerequisites: none, although an introductory course in art history or Islamic studies would be useful
Enrollment Preferences: if the course is oversubscribed, preference will be given to students who have declared a major in Art History or Africana Studies

ARTH 260 Beyond Tonto: American Indians in Film (D)

Crosslistings: AMST 257/HIST 357/ARTH 260/ENGL 260/COMP 273

In 1893, Thomas Edison unveiled the kinetoscope and allowed audience members to glimpse the Hopi Snake Dance by peeking into the device’s viewing window. Since the birth of the motion picture, films portraying Native Americans (often with non-Native actors) have been based upon earlier frontier mythology, art, literature, and Wild West performances. These depictions in film have embedded romanticized and stereotyped ideas about American Indians in the imaginations of audiences throughout the United States and around the world. In this course, we will critically examine representations of American Indians in film, ranging from the origins of the motion picture industry to the works of contemporary Native filmmakers who challenge earlier paradigms. We will reflect upon revisionist narratives, the use of film as a form of activism, Indigenous aesthetics and storytelling techniques, reflexivity, and parody. Throughout the semester, we will view and discuss ethnographic, documentary, and narrative films. This course will satisfy the Exploring Diversity Initiative (EDI) requirement as we will examine power relations, cross-cultural interaction, and Indigenous social experiences.

Class Format: seminar
Requirements/Evaluation: attend evening film screenings each week; two short papers; and a 10-page final
Extra Info: may not be taken on a pass/fail basis
Prerequisites: none
Enrollment Preferences: American Studies majors
Enrollment Limit: 25

ARTH 261(F) Augustan Rome
Crosslistings: CLAS 260/HIST 260/ARTH 261

In 31 BCE, Octavian defeated Marc Antony at Actium, the culminating battle in a bloody civil war that had wracked the Roman state for years. As victor, Octavian found himself in a complex position: he was sole ruler over a society that traditionally abhorred monarchy, he had defeated a charismatic Roman citizen whose supporters might now pose resistance, and he had promised to re-establish a governmental system that seemed hopelessly broken. Octavian, soon given the honorific name Augustus, set about repairing the war-torn state while simultaneously solidifying his power. He announced that he had “restored the Republic,” yet we regard him as Rome’s first emperor. How did the remains of this transition and subsequent ancient authors interpret? How do works of art from Augustus’ time contribute to, or resist, the idea that he ushered in a Roman “golden age”? In this course we will consider these questions using a range of sources including monuments and visual art, ancient historiography, biography, and poetry (Dio, Suetonius, Tacitus, Horace, Propertius, Vergil, Ovid), and selections from contemporary scholarship. In the process, we will gain a better understanding of a pivotal period of ancient history, as well as tools for thinking comparatively about power, rhetoric, and propaganda in our own day. All readings are in translation.

Class Format: lecture/discussion
Requirements/Evaluation: class discussion, student presentations, quizzes, two papers, and a final exam

ARTH 265 Pop Art (W)

Crosslistings: ARTH 265/AMST 265

The use of commercial and mass media imagery in art became recognized as an international phenomenon in the early 1960s. Items such as comic strips, advertising, movie stills, television programs, soup cans, “superstars” and a variety of other accessible and commonplace objects inspired the subject matter, form and technique. This course will critically examine the history and legacy of Pop Art by focusing on its social and aesthetic contexts. An important component of the course involves developing skills in analyzing visual images, comparing them with other forms, and relating them to their historical context.

Class Format: lecture/discussion
Requirements/Evaluation: two short response papers, oral presentation, and one final research paper

ARTH 268(F) Chinese Art and Culture: From Imperial Treasures to Contemporary Visions (D)

Crosslistings: ARTH 268/ASST 268

This course introduces students to some of the major artistic traditions and trends from the dawn of Chinese civilization to the present. Highlights include ancient bronze vessels commissioned by the royal house and the mysteries and scholarly debates surrounding their fantastic surface décor; how the teachings of different Buddhist schools and sects are visualized for the attainment of Nirvana; how nature or landscape painting was used as religious, moral, and political rhetoric; the relationship between words and images; the way in which Chinese artists represent space and the external world in contrast to the European approaches that use the one-point perspective technique; the way picture making; how China’s encounters with foreign cultures and their arts in different times in history have contributed to the development of Chinese culture and artistic trends, including 20th social realism made during Communist China’s Cultural Revolution; and how some contemporary Chinese artists show their defiance against tradition, using traditional Chinese visual imagery, while some try to achieve shock value in their art, forcing the viewer to confront the positive and negative influences of
Western art theories on contemporary Chinese artworks. The course's contextual approach helps students gain insight into the aesthetic, religious, and political ideas and cultural meanings conveyed by the works of art. It also provides students with the vocabulary, techniques, and patterns of thinking needed for advanced art history courses. This course fulfills the EDI initiative in that its historical, visual, and thematic analyses will bear upon not only the interconnectedness between Chinese culture and the distinctively different cultures of India, Korea, and Japan, but China's respective interactions with other cultures in the Middle East and West.

**ARTH 274(F) Chinese Calligraphy: Theory and Practice**  
**Crosslistings:** ARTH 274/ASST 274/ARTS 274  
Beginning in the fourth century, Chinese calligraphy has remained one of the highest art forms in China and in East Asia generally, practiced by the literati, or highly erudite scholars. This course has two components: art history and studio practice. The first offers students an opportunity to acquire an understanding of theoretical and aesthetic principles of Chinese calligraphy. It also examines the religious, social, and political functions of Chinese calligraphy in ancient and contemporary China. Students will also have an opportunity to investigate contemporary artists, both Eastern and Western, whose works are either inspired or influenced by Chinese calligraphy, and whose works are akin to Chinese calligraphy in their abstraction. Studio practice allows students to apply theories to creating beautiful writing, or calligraphy (from Greek kallos "beauty" + graphe "writing"). This course can be taken as either an Art History or a Studio Art course.  

**Class Format:** lecture/studio instruction  
**Requirements/Evaluation:** weekly assignments, a midterm, one short paper, oral presentations, participation in class discussion, a final project (artistic or scholarly), class attendance, film screening

**ARTH 277 Twentieth Century Modern and Contemporary Art**  
This course will introduce students to modern and contemporary art from the turn of the twentieth century to the present. Though it will focus primarily on art in the United States and Europe, we will attend to more global concerns near the end of the semester. Organized more-or-less chronologically, we will explore the concept of the avant-garde, the development of different modes of abstraction, and the roles of photography, technology, and appropriation. We will explore the aesthetic, philosophical, and political motivations that shaped the crucial artistic movements of the twentieth century including Cubism, Dada, Surrealism, Abstract Expressionism, Pop Art, Minimalism, Conceptual Art, Performance Art, and Postmodernism. By the end of the semester, students should be able to examine modern and contemporary works of art formally and critically, ground them firmly in cultural and political contexts, and have the intellectual tools to grapple confidently with even the most challenging works of modern and contemporary art.  

**Class Format:** lecture  
**Requirements/Evaluation:** two papers, midterm, final

**ARTH 280 Art of the Commons: Social Practice, Participatory Art and Performing Publics (D)**  
**Crosslistings:** THEA 280/ARTH 280  
What responsibility does art have to its public? How is art a "social practice"? What is the model of the "cultural commons" and how might it be reshaping the way we make art today? This combined seminar and studio course will begin by exploring the concept of the "commons" as a cultural resource belonging to all members of a community. Drawing from recent scholarship, theory and debates across disparate fields (law, economics, history, theatre
and performance studies, and art), we will first define the "cultural commons" of Williams College and Williamstown. We will then design and implement a series of art and performance projects involving participation, collective labor and ownership, community building, utopianism, active spectatorship, and public space. Students will also conduct and present to the class independent research on contemporary artists (Theaster Gates, Mierle Laderman Ukeles, Santiago Sierra, Francis Alÿs, Tino Sehgal, Paul Chan), collectives (The TEAM, The Civilians, Gentila Girls, Sojourn Theatre, The Neofuturists, Ghana Think Tank), and community-based initiatives in our local art institutions (WCMA, Mass MoCA, The Clark). Readings on participatory art, happenings, relational aesthetics, social works, and utopia may be drawn from such authors as: Allan Kaprow, Theodor Adorno, Augusto Boal, Nicolas Bourriaud, Jacques Ranciére, Peggy Phelan, Shannon Jackson, Claire Bishop, Grant Kester, Nicholas Ridout, Jill Dolan, José E. Muñoz, Guillermo Gomez-Peña, and Rebecca Schneider. This course fulfills the Exploring Diversity Initiative by engaging directly with questions of how diversities of gender, race, class, and sexuality may be embraced rather than negated by communal forms of art-making.  

Class Format: seminar  
Requirements/Evaluation: weekly writing; two "workshop" showings; public art or performance project; one 15-minute oral presentation; one 10- to 12-page paper; active participation  
Prerequisites: none  
Enrollment Preferences: Art Majors, Theatre Majors  
Enrollment Limit: 14  
Expected Class Size: 10

ARTH 301(F,S) Methods of Art History  
This course on the methods and historiography of art history offers art-history majors an overview of the discipline since the late 18th century. The course surveys influential definitions of the discipline, the evolving tasks it has set itself, and the methods it has developed for implementing and executing them. Works of art will inevitably enter into our discussions, but the main objects of study will be texts about art as well as texts about methods for an historical study of art. Topics include: style and periodization; iconography, narratology, and phenomenology; the social functions of images and the social history of art; art and the material world; art, gender, and sexuality; and art as a global phenomenon.  

Class Format: lecture and discussion  
Requirements/Evaluation: six short papers, one final paper, one short oral presentation, and class participation  
Extra Info: may not be taken on a pass/fail basis  
Prerequisites: ARTH 101-102 or equivalent  
Enrollment Preferences: enrollment restricted to Art-History majors and required of them  
Enrollment Limit: 25  
Expected Class Size: 15-10  
Dept. Notes: for spring; open to undergraduate Art majors only; graduate students may not enroll without permission of the department chair

ARTH 308T(S) African Art and the Western Museum (D) (W)  
Crosslistings: ARTH 308/AFR 369  
Provides a focused study of the issues associated with the exhibition of African objects within Western institutions from the formative period of the practice in the early 19th century to the modern era. Covering topics ranging from early collection and display methodologies to exhibition-based practice in the contemporary digital era, this tutorial will provide an opportunity for robust discussion about the interactions that have occurred between the arts of Africa and the Western museum over the lengthy history of their engagement. Students will investigate the nature of the cross-cultural dialogues taking place and the politics of display at work in regional museum spaces that display African art towards fleshing out how exhibitions function through the strategic organization and display of objects. In other words, students will explore how the dialogues created between objects and individuals often speak to the voices and agendas that collide, collaborate, and even compete with each other within the environment of the museum. This tutorial fulfills EDI requirements through its exploration of issues of so-called 'authentic' representation, cultural capital, rights of seeing, the politics of representation, and the meaning of art as it applies to African artifacts displayed within the context of a Western art museum.  

Class Format: tutorial  
Requirements/Evaluation: field trips to area museums, bi-monthly response papers (5 pages), bi-monthly peer response papers (2 pages)  
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option  
Prerequisites: none  
Enrollment Preferences: seniors and majors  
Enrollment Limit: 10  
Expected Class Size: 10  
Distributional Requirements: Division 1  
Distribution Notes: meets Division 1 requirement if registration is under ARTH; meets Division 2 requirement if registration is under AFR

ARTH 310 An American Family and "Reality" Television (W)  
Crosslistings: ARTH 310/WGSS 312/AMST 333/COMP 316  
An American Family was a popular documentary series that featured the Loud family from San Barbara, California, whose everyday lives were broadcast on national television. The series generated an enormous amount of media attention, commentary, and controversy when it premiered on PBS in 1973. Today, it is regarded as the origin of so-called "Reality TV." In addition to challenging common rules for television programming, the show challenged social conventions and asked viewers to think seriously about family relations, sexuality, domesticity, and the "American dream." Documenting the family's life over the course of eight months, the series chronicled the dissolution of the Loud's marriage and broadcast the "coming out" of eldest son Lance Loud, the first star of reality television.  

In this class, we will view the An American Family series in its entirety, research the program's historical reception, and analyze its influence on broadcast and film media, particularly on "reality" television. A final 16- to 20-page research paper will be prepared in stages, including a 6- to 8-page midterm essay that will be revised and expanded over the course of the semester.  

Class Format: seminar  
Requirements/Evaluation: class presentations, research assignments, and final 16- to 20-page research paper  
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option  
Prerequisites: none  
Enrollment Preferences: junior majors, followed by senior majors  
Enrollment Limit: 19  
Expected Class Size: 14
ARTH 317 Gender Construction in Chinese Art (D) (W)
Crosslistings: ARTH 317/AMST 317/WGSS 317

“One is not born, but rather becomes a woman”—Simone de Beauvoir

This course will investigate how gender as a cultural and social construction is visualized in Chinese art. Issues of interest include how gendered space is constructed in Chinese painting; how landscape paintings can be decoded as masculine or feminine; and ways in which images of women help construct ideas of both femininity and masculinity. This course will also discuss Confucian literature’s [ideals] of reclusion and homosociality; didactic art for women; images of concubines, courtesans; and lonely women’s isolation and abandonment. For example, while nature is often seen as feminine, Chinese landscape painting may be coded as masculine due to its association with the Confucian scholar’s ideals of eremitism, a means for the cultivation of the mind, and homosociality. On the other hand, the placement of a masculine landscape in feminine poetry may be seen as rhetorical strategy, accentuating the lonely woman’s isolation and abandonment, which are important tropes in Chinese erotic poetry as well. This course fulfills the EDI requirement in that it is designed to enable students to study the logic of gender and sexuality in a context different from their own; to see how both genders are constructed in relation to each other, and how they interact in the context of class, ideology, politics, and ideals, as well as how we may compare their representation in China with those of other cultures, notably Japan and the West. Using both visual art and literature, this course also challenges the gender stereotyping that still exists in current scholarship.

Class Format: seminar/discussion
Requirements/Evaluation: a series of 2-3 page position papers; one 3-4 page 1st oral presentation write-up; one 4-5 page pre-focus/focus paper for exploring the final paper topic; 2 oral presentations; a 12-15 page final research paper; class attendance
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none
Enrollment Limit: 14
Expected Class Size: 10
Distribution Notes: meets Division 1 requirement if registration is under ARTH; meets Division 2 requirement if registration is under ASST or WGSS

ARTH 319(F) Robert Rauschenberg: Art, Archives, and Exhibitions
Robert Rauschenberg (1925-2008) was a leading figure in postwar American art whose work is considered an important bridge between Abstract Expressionism and Pop art. Throughout his career he worked in a wide range of media, collaborated frequently with dancers and performers, and was dedicated to promoting awareness of causes he cared about, including world peace, the environment and humanitarian issues. The Robert Rauschenberg Foundation archives have recently been processed and opened to scholars for the first time. This course will make use of the archives with the aim of shedding new light on Rauschenberg’s art and collaborations in the form of an exhibition that will open at the Williams College Museum of Art in the spring 2017 semester. Students will have hands-on access to archival materials and will collaborate on the development of the exhibition through both individual and group activities and assignments. As a class we will critically explore the role and possibilities of research and archives in curatorial practices and museum exhibitions. Course readings will be drawn from the major monographs on Rauschenberg’s art, texts that highlight various historical, theoretical, and methodological approaches to the archive, and primary source material from the Rauschenberg archive.

Class Format: seminar
Requirements/Evaluation: oral presentations and object-based research assignments; two writing assignments: one 5-6 pages and one 10-12 pages; and one final written project of 6-8 pages and final presentation; one required field trip to New York City
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: ARTH 102 or permission of instructors
Enrollment Preferences: Art History majors
Enrollment Limit: 16
Expected Class Size: 12

ARTH 327 Acquiring Art: Selecting and Purchasing Objects For WCMA
Crosslistings: ARTH 327/ECON 227/ARTH 527

How do museums acquire art? Factors considered in selecting objects include the museum’s existing collection, the availability of suitable objects, evaluation of the art historical importance of potential purchases, and the available budget. How can objects be identified and obtained at the most reasonable cost? How do auctions work and what strategies are best for purchasing works at auction? Is it more economical to purchase art at auction or to work with dealers or (for contemporary works) directly with artists? Do museums consider value in the same way as private collectors? What role does an object’s history and condition play in the evaluation process? In this course students will work as teams to identify and propose objects for addition to the collection of the Williams College Museum of Art (WCMA). A significant budget will be made available for the acquisition. We will discuss approaches for identification, acquisition and evaluation of objects. Students will be responsible for identifying a set of objects that would make appropriate additions to the WCMA collection, and a strategy for acquiring one or more of those objects. Working with the advice of WCMA curatorial staff, one or more of these objects will be acquired using the agreed strategy, and a plan for payment will be generated. This course fulfills the EDI requirement in that it is designed to enable students to study the logic of gender and sexuality in a context different from their own; to see how both genders are constructed in relation to each other, and how they interact in the context of class, ideology, politics, and ideals, as well as how we may compare their representation in China with those of other cultures, notably Japan and the West. Using both visual art and literature, this course also challenges the gender stereotyping that still exists in current scholarship.

Class Format: seminar
Requirements/Evaluation: three papers of 10-15 pages each and each class participation; student teams will make proposals for objects; each student will be required to submit three papers, dealing with the objects, the likely cost, and the best strategy
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: ECON 110 or permission of instructor
Enrollment Preferences: senior majors in Art History, Economics and Political Economy; graduate students will be admitted only by permission of instructors
Enrollment Limit: 20
Expected Class Size: 20
Distribution Notes: meets Division 1 requirement if registration is under ARTH; meets Division 2 requirement if registration is under ECON

Division 1
Not Offered Academic Year 2017
SEM Instructor: Kevin Murphy

ARTH 330/375 Michelangelo: Biography, Mythology, and the History of Art (W)

One might argue that Michelangelo’s enduring fame, and his preeminence in the European art historical canon, is as much a product of his artistic persona as his artistic achievement. Indeed, the classic image of the artist as a brooding, tortured genius of unstoppable creative force finds its roots in the Italian Renaissance, and specifically in the fascinating biography—and mythology—of Michelangelo. With a life and career more fully documented than those of any western artist to precede him, Michelangelo provides us with the foundations for a triangulation of person-persona-artistic production that has a modern ring. But what are the limits of our knowledge, and what are the boundaries of interpretation? And how might we approach the study of an artistic self when that self is, also, a work of art? In this course, students will become well-acquainted with the life and work of Michelangelo, giving critical attention to the connection between the artist and his work. We will investigate, in particular, the practice of interpreting his work according to his philosophical outlook, political convictions, religious beliefs, sexual desire, and more. While this course will bring us deep into the life and work of a single artist, one of its goals is to generate ideas about the very act of biographically-based art historical interpretation. How can thinking carefully about Michelangelo reshape our own thinking about art historical practice?

Class Format: tutorial
Requirements/Evaluation: evaluation will be based on the quality and improvement of written work (5 weekly papers and 5 response papers, and a final written exercise addressing major themes of the tutorial), and oral dialogue
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: one ARTH course of any level; open to sophomores, juniors, and seniors

ARTH 335(F) Uncovering Williams
Crosslistings: AMST 335/ARTH 335

Sparked by current controversies around visual representations at Williams, this course—a joint effort of the Williams College Museum of Art and the American Studies Program—investigates the history of the college and its relationship to land, people, architecture, and artifacts. Students in this course...
will examine the visual and material culture of Williams and the land it occupies to uncover how the long and complex history of the college reverberates in the spaces and places students, faculty, and staff traverse daily. We take seriously that objects and environments are not neutral nor are the atmospheres that they reflect and produce. Our interdisciplinary approach draws from the methods and theories of American studies, art history, material culture studies, critical race theory, gender studies, and eco-criticism. Topics of discussion may include: the foundation of the college and displacement of native populations; buildings, objects, and monuments linked to Williams' evangelical history and the role of missionaries in American imperialism; the symbolic meaning of the varied architectural styles at the college; the visibility/invissibility of the college's relationship to slavery and Abolitionism.

ARTH 376 Zen Buddhist Visual Culture: The Path to Nirvana (W)

Crosslistings: PSCI 337/ARTH 337

Even casual observers know that appearances matter politically and that the saturation of politics by visual technologies, media, and images has reached unprecedented levels. Yet the visual dimensions of political life are, at best, peripheral topics in contemporary political science and political theory. This seminar explores how our understanding of politics and political theory might change if visibility were made central to our inquiries. Treating the visual as a site of power and struggle, order and change, we will examine not only how political institutions and conflicts shape what images people see and how they make sense of them but also how the political field itself is visually constructed. Through explorations, which will consider a wide variety of visual examples, we will also take up fundamental theoretical questions about the place of the senses in political life. Readings may include relevant excerpts from ancient and modern theorists, but our primary focus will be contemporary and will bring political theory into conversation with such fields as art history and criticism, film studies, psychoanalysis, affect theory, and cognitive science. Possible authors include Arendt, Azoulay, Bat, Barthes, Benjamin, Bruno, Buck-Morss, Butler, Clark, Connolly, Chimp, Deleuze, Enzensberger, Fanon, Foucault, Hebbel, Lacan, Merleau-Ponty, Mitchell, Mulvey, Noé, Plato, Rancière, Rogin, Scott, Slavikowski, Sontag.

Class Format: seminar

Requirements/Evaluation: regular, engaged class participation and three 7- to 8-page papers

Prerequisites: at least one prior course in political theory, cultural theory, visual studies, or art history; or permission of instructor

Enrollment Preferences: Political Science and Art History majors

Enrollment Limit: 19

ARTH 376(F) Zen Buddhist Visual Culture: The Path to Nirvana (W)

Crosslistings: ARTH 376/ASST 376/REL 252

This course is about the ways in which images are produced, viewed, and used in the Zen Buddhist tradition. It explores the various ways in which visual culture is a key part of Zen Buddhist teaching in China and Japan. In this class we will look at both high art and popular expressions of Zen Buddhist visual culture. Topics of interest include: 1) Buddhist image making and icon worship; 2) Gardens; 3) tea rooms, tea ceremony and tea bowls; 4) The Zen Tenempos Ryoan-ji, Daisen-in, and Daitoku-ji; 5) The political function of Zen and its art in Japan's samurai culture; 6) The popular Zen Buddhist cult of Bodhisattva Avalokiteshvara and his gender transformation; and 7) Daruma (Bodhidharma) imagery in popular culture. This course is a CRAAS (critical reasoning and analytical skills) course. The class format also offers students opportunities to practice public speaking and writing skills.

Class Format: lecture/class discussion

Requirements/Evaluation: class discussions and participation, oral presentations, short papers; and a research paper

Enrollment Preferences: sophomores, juniors and seniors

Enrollment Limit: 10

Expected Class Size: 8

Distribution Notes: meets Division 1 requirement if registration is under ARTH; meets Division 2 requirement if registration is under ASST or REL

ARTH 400(F) MEdieval MEditerranea: Artistic interactions across water Crosslistings: ARTH 500/ARTH 400

Among possible readings: Roland Barthes on cultural theory and representation; Claudia Rankine and Robin Coste Lewis on black bodies; Tamar Garb on portraiture; Elaine Scarry on the body in pain; Joan Acocella, Hilton Als, Judith Thurman and other writers on the arts; Judith Butler and Peggy Phelan on the performative body; Marvin Carlson and Terry Castle on haunting; and Bill Brown and Mark Doty on things. In addition to readings, assignments include performances at the '62 Center and works on view at WCMA, as well as site-specific taped performances as well as films.
The constant contacts, in peace and war times, between the Latin West and the world of Islam, especially during the Middle Ages, formed and shaped the identities of both Christian and Muslim worlds. Moreover, these cultural clashes and artistic exchanges seemed on the one hand to consolidate identities and maintain barriers of differences but on the other hand to contribute to dynamic aesthetic conversations, enriching the visual cultures of both. In several moments in history, which, sometimes, can hardly be defined as such, a new amalgamated aesthetic language was born. Trade with luxury goods and even the lack of works of art ‘sponsored’ and enhances visual dialogues between different religious cultures of the Mediterranean. In this seminar the routes and the ‘ambassadors’ of these exchange moments are discussed. The Mediterranean basin (between 800 to 1500 AD) is in focus. The mobile world around the shores of the Mediterranean Sea—from the far west district of al-Andalus and the city of Cordoba to the Near Eastern metropolises of Cairo and Damascus—will be highlighted. Port cities such as Salerno, Amalfi, Genova, Pisa, Mahdia, Venice, Palermo and Acre will be jointly discussed in order to draw a full and complete picture of the particular medieval art, which developed across the Mediterranean basin.

Enrollment Preferences:
- places for 8 undergraduates and 8 graduate students assured

ARTH 400(S) CVPS: Jerusalem: The Making of the Holy Crosslistings: ARTH 500/ARTH 400

What are the reasons for declaring a particular space holy? How are the borders of this holy space made visible? What practices and rituals are employed to make the holy space? How is the sacred space maintained? The city of Jerusalem is the case study through which these questions will be critically examined. The city, sacred to three monotheistic religions, has been made and remade throughout history as a sacred space to Judaism, Christianity and Islam. This seminar will examine Jerusalem's changing architectural program over circa one thousand years, as well as its representation in images and texts from Jewish, Christian and Muslim sources. The main focus will be the Haram al-Sharif, the temple mount in Jerusalem as well as other spaces in the old city of Jerusalem and its vicinity, in which further sacred spaces were built and designed for pilgrims. Aspects of different rituals and even oral traditions will be brought into discussion to illustrate the varied methods and politics of the space and the continuous contestations over Jerusalem's sacredness up to the present day. At the same time, modern, mainly nationalistic, methods for reconstructing past narratives for Jerusalem will be critically discussed, focusing mainly on archaeology, urban architectural developments and museum display.

Class Format: seminar
- Enrollment Preferences: places for 8 undergraduates and 8 graduate students assured
- Enrollment Limit: 16

ARTH 402 Monuments and The Art of Memorial

The urge to commemorate individuals, heroic acts or historic events whether unspeakable or splendid is both human and timeless. This seminar will document and explore the concepts behind and the nature of monuments, both commemorative ones, and those that adornish or inform without commemorating a specific event or individual. Students will study and analyze monuments and memorials from the ancient Mediterranean (Egypt; Mycenae; Greece of the Archaic, Classical and Hellenistic periods; Imperial Rome) and chart their influence on monuments in later history, especially those of the nineteenth and twentieth centuries. The current trend towards countermonuments, or anti-monuments, such as Maya Lin's Vietnam Veterans Memorial or the Gerzé's vanishing "Monument Against Fascism, War and Violence and for Human Rights" in Hambach/Harburg will be discussed in light of the monumental tradition of combining word, image, and architecture to create memorials that will endure in both spatial and temporal terms. Ongoing discussions of Holocaust memorials and the problems inherent in the design of the monument for the WTC will also be addressed. More humble memorials, such as ephemeral installations roadside shrines and photographic assemblages will be included in the discussion concerning the concept of "monument" alongside topics such as historic buildings and National parks.

Class Format: seminar
- Requirements/Evaluation: participation in discussions, short response paper/two in-class presentations that provide material for a major term paper of 20-25 pages due at the end of the semester
- Prerequisites: ARTH 101-102 or permission of instructor; students of History and Anthropology are also encouraged to enroll
- Enrollment Limit: 14
- Dept. Notes: satisfies pre-1400 or pre-1800 if the student pursues a research topic and term paper in those areas

ARTH 405(S) Seminar in Architectural Criticism (W) How does one judge a building? According to its structural efficiency or its aesthetic qualities? Its social responsibility—or just its pizzazz? Depending on the building, and the critic, any of these questions might be pertinent, or impertinent. This seminar explores architectural criticism, that curious genre between literature and architecture, and looks at its history, nature and function. We will read and discuss classic reviews by historical and contemporary critics as John Ruskin, Mariana van Rensselaer, Lewis Mumford, Ada Louise Huxtable and Herbert Muschamp. Insights gained from these discussions will be applied by students to writing their own reviews, which will likewise be discussed in class. Early assignments will concentrate on mechanics: how to describe a building vividly and accurately, how to balance description and interpretation judiciously, how to compare. Subsequent ones will be more synthetic, encouraging students to write bold, lively and critical essays. The ultimate goal is to develop a distinctive and effective voice, and to gain a better understanding of the nature of criticism in general.

Class Format: seminar
- Requirements/Evaluation: students will write and revise six papers (5-7 pages) during the semester
- Prerequisites: ARTH 101-102 and permission of instructor
- Enrollment Prerequisites: junior Art History majors
- Enrollment Limit: 11

ARTH 412(S) The Politics of Aesthetics: Collaboration and Participation in Contemporary Art

The social turn is a hallmark of contemporary art, as artists since the 1960s turned from the art object toward dynamic exchanges with the public, from sole author to collaborative engagement. This seminar provides a theoretical framework to historicize as well as to critically analyze the promise and pitfalls of this emphasis on collaborative works, on active participants rather than passive spectators, and on the metaphoric rise of community-based artistic practices. A wide range of case studies will also allow us to delve into the intersections and productive tensions between aesthetics and politics, or between art and life.

Class Format: seminar
- Requirements/Evaluation: class presentations, research assignments, and final 20-page paper
- Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

ARTH 418(S) Visual Cultures of Modern South Asia (D) Crosslistings: ARTH 418/ASST 418

This seminar explores the visual and material cultures of modern South Asia. Beginning in the late eighteenth century and moving chronologically to the present, we will examine the rise and spread of new visual technologies and spaces of display, including museums, craft practices, photography, print, and
film, and their role in the formation of South Asia's colonial, national, and global identities. Topics include colonial landscapes, politics of display, craft and nationalism, and alternative modernities. An emphasis will be placed on popular culture — posters, calendar art, tourist souvenirs, and Bollywood movies and paraphernalia — and its social and performative lives, as well as its tension and engagement with "high art."

**Class Format:** seminar

**Requirements/Evaluation:** presentations, weekly response papers, one short paper (4-5 pages), and one final paper (15-20 pages)

**Prerequisites:** none; however, students are encouraged to take the Arts of South Asia, offered in the fall

**Enrollment Preferences:** majors

**Enrollment Limit:** 12

**Expected Class Size:** 12

**Distribution Notes:** meets Division 1 requirement if registration is under ARTH; meets Division 2 requirement if registration is under ASST

**Spring 2017**

**ARTH 419 Going to Ground: Considering Earth in the Arts of Africa (D) (W)**

**Crosslistings:** ARTH 419/AFR 419/ENVI 419

Drawing its inspiration from the landmark exhibition *Earth Matters: Land as Material and Metaphor in the Arts of Africa* (National Museum of African Art, 2013), this seminar explores how earth has been conceptualized and integrated into African artistic thought as material, metaphor, geography, environment, and intervention, and how this interpretive flexibility has allowed it to become a symbol of power and presence in African art-making from prehistory to the present. The seminar will also focus on the ways in which earth has been used in contemporary art towards addressing the growing problems of pollution, unsustainable development, and the widespread depletion of earth-based natural resources in Africa. Over the course of this seminar, students will develop a knowledge base of earth-related issues that have been addressed in African artistic production, and engage with various cross-disciplinary methodologies to critically analyze the conceptual and aesthetic strategies deployed in these works. Students will also have the opportunity to interact with specialists from diverse disciplines and fields towards fleshing out their knowledge base. This course fulfills EDI requirements through its exploration of the effects of globalization and modernization on the African natural environment, and its engagement with diverse cultural legacies, socio-political systems, and economic realities on the continent as contributors to art-making strategies deployed by contemporary African environmental artists. Students will also explore the ways in which African artists have internalized and interpreted the symbolic potential of earth in their contexts as individuals defined by gender, sexual orientation, religious affiliation, etc. as well as members of distinctive cultures and communities.

**Class Format:** seminar

**Requirements/Evaluation:** 2-page reading response papers, 2-page paper proposal, draft and final paper (15 pages) with presentation

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**ARTH 420(F) Architecture and Sustainability in a Global World (W)**

**Crosslistings:** ARTH 420/ENVI 420/GBST 420/EXPR 420

What does it mean to create a sustainable built environment? What do such environments look like? Do they look the same for different people across different times and spaces? This course takes these questions as starting points in exploring the concept of architectural sustainability, defined as "minimizing the negative impact of built form on the surrounding landscape," and how this concept can be interpreted not only from an environmental point of view, but from cultural, political, and social perspectives as well. Over the course of the class, students will explore different conceptualizations of sustainability and how these conceptualizations take form in built environments in response to the cultural identities, political agendas, social norms, gender roles, and religious values circulating in society at any given moment. In recognizing the relationship between the way things are constructed (technique of assembly, technology, materials, process) and the deeper meanings behind the structural languages deployed, students will come to understand sustainability as a fundamentally context-specific idea, and its manifestation within the architectural environment as a mode of producing dialogues about the anticipated futures of both cultural and architectural worlds.

**Class Format:** seminar

**Requirements/Evaluation:** response papers on class readings (2 pages), leading class discussions, and final project/paper (15-20 pages) and presentation

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

ARTH 430(F) Aesthetics and Human Variety: European Representations of Oceania 1755-
Crosslistings: ARTH 430/ARTH 530
Using European representations of the inhabitants of Oceania as the primary materials of our investigation, this seminar will explore the connections to be made among theories of beauty, practices of art making, and the construction of race as a scientific concept in the second half of the eighteenth century and the beginning of the nineteenth century. In Europe, this was a period that gave rise to aesthetics as a branch of philosophy, to several theories of the origins of human difference, to debates over the abolition of slavery, and to no fewer than fifteen expeditions to the Pacific Ocean. This course will investigate the crucial role that pictures played in all of these developments. Though students will not be expected to write their research papers on pictures of Oceania, they should consider the central questions of the course: What purposes do the various conceptions of race serve? What are the aesthetic assumptions made by theorists of race? How do models of making art influence European ideas about foreigners? How do the pictures of foreign peoples impact the response papers, and critical commentary on work of peers

ARTH 449(S) Body Language in Baroque Art
Art of the 1600s represents a highpoint in artists’ ability and interest in conveying “the passions of the soul” through the actions of the body. Never previously had artists represented such a broad range of feelings. We will distinguish individual from conventional poses, track how long the conventional poses had been in use, and consider which ones, if any, specific artists favored. Emphasis on both renowned and less-known artists, e.g., Caravaggio, Rembrandt, Artemsies Gentleschi, Adriaen Brouwer). Art of the 1600s represents a highpoint in artists’ ability and interest in conveying “the passions of the soul” through the actions of the body. Never previously had artists represented such a broad range of feelings. We will distinguish individual from conventional poses, track how long the conventional poses had been in use, and consider which ones, if any, specific artists favored. Emphasis on both renowned and less-known artists, e.g., Caravaggio, Rembrandt, Artemsies Gentleschi, Adriaen Brouwer)
Class Format: seminar
Requirements/Evaluation: 5-minute oral report, 20-minute oral report on the same material as the 20-page paper (half of the paper due mid-way through the semester, the whole at the end)
Extra Info: may not be taken on a pass/fail basis
Prerequisites: ARTH 102
Enrollment Preferences: Art History majors
Enrollment Limit: 12
Expected Class Size: 12
Distributional Requirements:
Division 1

ARTH 451 Ideal Bodies: The Modern Nude and Its Dilemmas
Crosslistings: ARTH 451/WGSS 451
Since the nineteenth century, the female nude has been so dominant that the very term “nude” has come to stand for the female body. This course looks at both male and female nudes from the time of the French revolution to the present in order to order how and why this gendering occurred. We will explore the ways in which certain types of bodies have been defined in opposition to the white western ideal, and thereby exoticized and marginalized. Our prime focus is the work of David, Ingres, Courbet, Gericault, Manet and Renoir but more popular nineteenth-century images as well as selected works by artists working in the twentieth and twenty-first centuries will be discussed.
Class Format: seminar
Requirements/Evaluation: evaluation will be based on biweekly 1-page papers, short reports, an oral presentation and a 10- to 20-page paper
Prerequisites: two semesters of ARTH 101-102-103; permission of instructor required
Enrollment Preferences: junior and senior Art majors, Women’s, Gender and Sexuality Studies majors, French majors, and History majors with a concentration in European studies.
Enrollment Limit: 12
Distribution Notes: meets Division 1 requirement if registration is under ARTH; meets Division 2 requirement if registration is under WGSS
Distributional Requirements:
Division 1

Not Offered Academic Year 2017
SEM Instructor: Carol Ockman
ARTH 455(F) Ottoman and Orientalist Visual Culture
Crosslistings: ARTH 555
Jean-Léon Gérôme's famous painting, "The Snake Charmer," at the Clark Art Institute will be our starting point for examining the connections between Ottoman and Orientalist visual culture in the modern period. Artists who were fascinated by the Near East (Gérôme, Ingres, Delacroix, Lewis, Renoir and Matisse) will be studied alongside Orientalist photography, international exhibitions, travel literature, and film. This course encompasses diverse regional orientalisms (in Poland, Russia, Denmark, America and Australia) and the distinctive contribution of women artists. Western engagement with the Islamic world will be examined alongside contemporaneous Ottoman art, patronage and the visual culture of statecraft. We will consider Ottoman modernization as a context through which alternative images of the region were generated. The cultural and political significance of Orientalist visual culture will be critically analyzed through comparative study of French-trained Ottoman artists and their Orientalist mentors Gérôme and Boulangier.

Class Format: seminar
Requirements/Evaluation: each student will write one short midterm paper and a longer concluding essay, as well as present a couple of readings to the class.
Extra Info: may not be taken on a pass/fail basis.
Enrollment Preferences: places for 8 undergraduates and 8 graduate students assured
Enrollment Limit: 16
Expected Class Size: 16
Distributional Requirements: Division 1

ARTH 462 Art of California: Pacific Standard Time (D) (W)
Crosslistings: ARTH 462/AMST 462/LATS 462/ARTH 562
In this course, we will study the visual arts and culture of California after 1960 and consider the region's place in modern art history. We will focus on a series of recent exhibitions organized as part of a Getty initiative entitled Pacific Standard Time. Diverse in scope, these shows explored important developments in postwar art in California, including feminist art, African American assemblage, Chicano collectives, Modernist architecture, craft, and queer activism. In this seminar, we will pursue research projects directly related to the art exhibitions we study, and examine southern California conceptualism, photography, performance, painting, sculpture (including assemblage and installation), and video by artists both canonical and lesser known. Student projects will analyze the critical responses to the exhibitions, while also exploring the roles of archives, art criticism, and curatorial practice in contemporary art history. This course fulfills the Exploring Diversity Initiative requirement as it offers a comparative study of cultures and societies and provides various interdisciplinary perspectives on the art and visual culture of a specific region.

Class Format: seminar
Requirements/Evaluation: evaluation will be based on several short writing and research assignments, oral presentations, class participation, and a final research paper of 16-20 pages written in stages over the course of the semester
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: ARTH 102
Enrollment Preferences: senior Art major and senior Latina/o Studies concentrators
Enrollment Limit: 15
Expected Class Size: 15

Spring 2017
SEM Section: 01 R 01:10 PM 03:50 PM Instructor: Holly Edwards

ARTH 472 Timelines
This course examines the history of art in the context of significant cultural and historical events. It explores the ways in which art reflects and responds to these events, and how these events shape our understanding of art. The course will be taught through a series of case studies, focusing on specific themes such as the relationship between art and politics, the role of art in social change, and the influence of technological developments on art production. Students will be expected to participate actively in class discussions and to complete regular writing assignments that require them to engage with the material critically.

Class Format: seminar
Requirements/Evaluation: regular presentations and term project
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: 100-level art history course
Enrollment Preferences: majors, seniors
Enrollment Limit: 15
Expected Class Size: 15

Division 1

Not Offered Academic Year 2017
SEM   Instructor: C. Ondine Chavoya

ARTH 494(S) Thesis Seminar
To graduate with honors in art history, students are required to enroll in the Senior Honors Seminar during the Spring semester of their senior year, where they will develop an original research paper based on prior research. Under the guidance of the instructor, students will present and defend their own work in both written and oral form, as well as respond to, and critique, the work of their peers. As students work toward transforming their existing paper into an honor's thesis, they will also be trained in skills necessary to analyze an argument effectively, and strategies of constructive critique.

Class Format: seminar
Requirements/Evaluation: once in the seminar, students will revise, refine and expand on previous research and produce a paper of approximately 25 pages.

pages and present a shortened version of the paper to the faculty and public at the Williams College Museum of Art
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: for requirements of entry into the course, please see "The Degree with Honors in Art, Art History"
Enrollment Preferences: permission of instructor required
Enrollment Limit: 5
Expected Class Size: 6
Dept. Notes: does not satisfy the Art History seminar requirement

ARSTUDIO CLASSES

ARTS 100(F) Drawing I
This course will heighten your awareness of the visual world, teach basic drawing skills, and demonstrate how drawing operates as a form of visual expression. Each class session introduces you to a specific drawing technique, concept or media. The homework assignments involve practicing the skills presented in class while encouraging personal expression by incorporating your own ideas into the art work. This course also promotes the understanding presented in class while encouraging personal expression by incorporating your own ideas into the art work. This course also promotes the understanding of artists and their work. It requires that you attend at least one Visiting Artist presentation to gain a deeper knowledge of artist's aspirations and practices. To allow for more practice with working directly from life, you are also required to attend at least two evening life drawing sessions.
Class Format: studio
Requirements/Evaluation: evaluation will be based on the quality and quantity of work produced, depth and quality of investigative process, participation in critiques, and attendance
Extra Info: may not be taken on a pass/fail basis
Prerequisites: none
Enrollment Preferences: Art Majors (declared); students who have previously enrolled but have been dropped from the course, first-year and sophomore students
Enrollment Limit: 18
Expected Class Size: 18
Materials/Lab Fee: lab fee TBD will be added to the student's term bill
Distributional Requirements:
Division 1

Fall 2016
IND Section: 01 TBA Instructor: Peter Low

ARTS 101(S) Drawing II
This course will expand on the techniques and materials introduced in Drawing I. You will develop a vocabulary of marks that reflect on historical events and the ongoing present. We will look at a variety of work, including: Fiona Banner, Catherine Bigelow, Wafaa Bilal, Nao Bustamante, Paul Chan, Adam Curtis, Jean-Luc Godard, Danny Glover, Dara Greenwald, Sharon Hayes, Spike Lee, Zoe Leonard, Chris Marker, Alain Robbe-Grillet, Anna Deveare Smith, Lisa Steele, Agnes Varda, The Yes Men, Haskell Wexler, and collectives including ACT UP, Pink Bloque, TVTV, and Occupy Wall Street. Readings will include work by Margaret Atwood, Jerome Bruner, Judith Butler, Greg Bordowitz, Joan Didion, George Lipsitz, Chantal Mouffe, Paul Virilio, David Foster Wallace, among others.
Class Format: studio
Requirements/Evaluation: students will produce three short videos, essayistic or fictional non-academic written works, or action/performance works; evaluation will be based primarily on these works and class participation
Prerequisites: none
Enrollment Preferences: first-year and sophomore students
Enrollment Limit: 12
Expected Class Size: 12
Materials/Lab Fee: lab fee TBD will be added to the student's term bill
Distribution Notes: meets Division 2 requirement if registration is under ARTS; meets Division 1 requirement if registration is under ARTS
Distributional Requirements:
Division 1
Explored Diversity

Spring 2017
STU Section: 01 T 01:10 PM 03:50 PM Instructor: TBA

ARTS 106(F) Photography: Drawing with Light
PHOTO (light) GRAPHY (drawing/writing) As the publication of Fox Talbot's book Pencil of Nature illustrated in 1844, the essence of photography lies in its seemingly magical ability to fix shadows on light-sensitive surfaces. This can be done with or without a camera, by casting shadows, manipulating light, and chemically treating that surface. This class will concentrate on the design and fabrication of photographic drawings, using alchemy and light. Employing both digital and analog photographic processes, we will also use alternative processes, like gum dichromate. Imagery will focus on abstraction as well as two-dimensional renderings of the three-dimensional world. We will employ finder imagery as well as invent our own and embrace the best of what reveals itself to us in our experimentation. There will be ample opportunity for chance, materials, and the elements to impact on the nature of the image created; we will learn to recognize the best results and edit out the rest. Evaluation will be based primarily on the quality of the portfolio, as compared to an ideal of conceptual, formal, and technical achievement.
Class Format: studio
Requirements/Evaluation: portfolio, improvement, participation
Prerequisites: none
Enrollment Limit: 12
Expected Class Size: 10
Distributional Requirements:
Division 1

111
ARTS 107(S) Creating Games (Q)
Crosslistings: CSCI 107/ARTS 107
The game is unique as the only broadly-successful interactive art form. Games communicate the experience of embodying a role by manipulating the player's own decisions, abstraction, and discrete planning. Those three elements are the essence of computation, which makes computer science theory integral to game design. Video games also co-opt programming and computer graphics as new tools for the modern artist. As a result, games are integral to game design. Video games also co-opt programming and computer graphics as new tools for the modern artist. As a result, games are collaborative interdisciplinary constructs that use computation as a medium for creative expression. Students analyze and extend contemporary video and board games using the methodology of science and the language of the arts. They explore how computational concepts like recursion, state, and complexity apply to interactive experiences. They then synthesize new game elements using the mathematics, programming and both digital and traditional art tools. Emphasis is on the theory of design in modern European board games. Topics covered include experiment design, gameplay balance, minimax, color theory, pathfinding, game theory, composition, and computability.

Class Format: Lecture and studio
Requirements/Evaluation: evaluation will be based on participation, studio work, and quizzes
Prerequisites: none; no programming or game experience is assumed
Enrollment Preferences: first-year students
Enrollment Limit: 19
Expected Class Size: 19
Dept. Notes: not open to students who completed a Computer Science course numbered 136 or above. Does not count toward the Art Major
Materials/Lab Fee: lab fee of $25 will be added to the student's term bill
Distribution Notes: meets Division 3 requirement if registration is under CSCI; meets Division 1 requirement if registration is under ARTS
Distributional Requirements: Division 3

ARTS 117(F) Dutch Art: History and Studio Combined
Crosslistings: ARTS 117/ARTH 218
By the seventeenth century, the Northern Netherlands succeeded in throwing of Spanish Hapsburg rule and becoming a locally governed republic. More than other European artists, Dutch artists based images on their land and its people. This course considers works by Rembrandt, Vermeer, and other artists from a studio as well as an art historical perspective. Lectures, readings, and discussions will examine what the artists depicted, how they worked, and the degree to which they both reflected and shaped their social context. Twice a week students will attend studio sessions during which they will do related introductory level exercises in drawing, leading up to the production of drawings in the styles of Rembrandt and his Dutch contemporaries. No prior experience in drawing is expected; students will learn basic methods for working with a range of media including ink wash, pen, and watercolor. The close study of these Dutch artists will offer insights into large issues of representation, and the studio component will complement those insights with a sense of how that representation was achieved.
Class Notes: Lectures and studio
Requirements/Evaluation: evaluation based on 2 short papers, questions submitted about readings, weekly drawing assignments, and class participation
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none; no prior experience in drawing is expected
Enrollment Limit: 16
Expected Class Size: 16
Materials/Lab Fee: drawing supplies will be provided and charged to the student's term bill
Distributional Requirements: Division 1

ARTS 200 Costume Design
Crosslistings: THEA 305/ARTS 200
This course is both an introductory and an intensive study of the art of costume design. The course focuses on the designer's process: script analysis, collaboration, research, color theory, basic design principles, rendering techniques, fabric research, organizational skills and presentation of designs.
Class Format: Studio
Requirements/Evaluation: evaluation will be based on multiple design assignments including a detailed final design project, costume lab, image and research files, costume sketchbook, short papers, committed participation, and attendance
Extra Info: successful completion of any 200-level course in any of the fine or performing arts or permission of instructor
Enrollment Preferences: Theater and Art Studio, sophomores and juniors
Enrollment Limit: 10
Expected Class Size: 8
Dept. Notes: does not satisify any requirements for the Art major
Materials/Lab Fee: lab fee of $100.00 will be added to the student's term bill
Distributional Requirements: Division 1
Not Offered Academic Year 2017
STU Instructor: Deborah Brothers

ARTS 211(F) Worldbuilding: Staging and Design For The Theater Crosslistings: THEA 211/ARTS 201
This course examines the designer's and director's creative processes as they work together to imagine the fictional worlds of theatrical productions. Over a series of practical projects in staging, mise-en-scene, and visual development, we will develop techniques for eliciting an initial creative response to a text, developing that response into a point-of-view, and solving the practical needs of the production. Particular emphasis is placed on how design elements synthesize with one another and the work of the actors and director, to form the larger intellectual, emotional, and physical context of the work as a whole. Students will adopt various creative roles throughout a series of assigned projects, giving a broad exposure to the work of designers and directors. Basic presentation skills and technique, as well as methodologies for critical feedback, will be taught as crucial elements of staging and design development.
Class Format: Studio
Requirements/Evaluation: evaluation will be based upon committed class participation and thoughtful, timely completion of all assignments and projects
Prerequisites: none
Enrollment Preferences: Theatre majors
Enrollment Limit: 14
Expected Class Size: 12
ARTS 206(F) Color Digital Photography
This course explores both the technical, aesthetic, and conceptual possibilities of color photography using digital cameras. This course is designed to introduce students to questions and considerations of the use of color in photography, and new questions surrounding the use of digital color. Students will create color photographs using digital cameras. Weekly assignments. Regular critiques will discuss student work and progress. Demonstrations and hands-on sessions will cover technical topics such as camera operation, proper image exposure, additive and subtractive color, digital workflow (including RAW files and Photoshop) and digital inkjet printing techniques. Lectures will provide historical context and an overview of traditional and contemporary artists working in color such as William Eggleston, Jeff Wall, David Benjamin Sherry, and Deana Lawson.

Requirements/Evaluation:
evaluation will be based on photographic assignments, regular critiques, and a final portfolio of prints
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none
Enrollment Preferences: majors, seniors
Enrollment Limit: 10
Expected Class Size: 12
Distributional Requirements:
Class Format: studio
class discussion and critiques
Distributional Requirements:

ARTS 211T Photographic Montage and Collage
It is all about the edge. Montage is the seamless combination of photographs which beg the viewer to suspend disbelief and embrace the new composite reality. Collage also yields an alternate reality by combining multiple photographs but here the process unabashedly reveals itself. In this course, students will learn basic photographic techniques as well as use found photographs to make both collages and montages. These combinations will be made with razor blades and glue as well as in Photoshop.

Requirements/Evaluation:
portfolio, tutorial preparedness and participation
Extra Info: may not be taken on a pass/fail basis
Prerequisites: none
Enrollment Preferences: Art majors
Enrollment Limit: 10
Expected Class Size: 10
Materials/Lab Fee: TBD
Distributional Requirements:
Class Format: studio
class discussion and critiques
Distributional Requirements:

ARTS 215(F) Sustainabuilding (verb)
Sustainability considerations figure prominently (and always have) in good building design. This architectural design studio will include instruction, research, and reading about current design and energy strategies. These lessons will be applied in two or more design problems. Drawings and models will be critiqued in class reviews with outside critics.

Requirements/Evaluation:
based on quality of design and presentation
Prerequisites: none but ARTS 220 and/or ENVI 108 are recommended; permission of instructor is required; preregistration does not guarantee admission to the course
Enrollment Limit: 12
Expected Class Size: 12
Materials/Lab Fee: lab fee TBD will be added to the student's term bill
Distributional Requirements:
Class Format: studio
class discussion and critiques
Distributional Requirements:

ARTS 220(S) Architectural Design I
Instruction in design with an introduction to architectural theory. Five simple design problems will explore form and meaning in architecture. Each problem will require drawings/model and will be critiqued in a class review with outside critics.

Requirements/Evaluation:
evaluation will be based on quality of design, with improvement taken into account
Prerequisites: ARTS 100, ARTH 101-102 strongly suggested; permission of instructor is required; registration does not guarantee admission to the course
Enrollment Limit: 15
Expected Class Size: 15
Materials/Lab Fee: lab fee TBD will be added to the student's term bill
Distributional Requirements:
Class Format: studio
class discussion and critiques
Distributional Requirements:

ARTS 221T Scenic Design and Experimental Performance
Crosslistings: THEA 302/ARTS 221
The artistic, intellectual, and practical roles of a set designer vary widely, from the spectacle of Broadway to the do-it-yourself ingenuity of downtown theater. In contemporary experimental theater designers are essential parts of the ensemble, contributing equally to devised work alongside directors, writers, performers and dramaturgs. Design is not viewed as a response to the script, but rather an initial condition: a world whose creation describes the limits of the play while also providing the necessary components for that play to exist. In this way the act of devising and the act of designing can be seen as inextricably entwined—even interchangeable.
This course explores a range of techniques and methodologies utilized to create stage environments in traditional and experimental modes. Grounded in textual analysis and research, and emphasizing process, critique, and revision, we will create theoretical stage designs in response to a variety of performance texts. These may include plays, musicals, operas, physical- and dance-theater, and other work that is deeply grounded in the physicality of performer, spectator and performance environment. Emphasis will be on sketching and model-making as the primary means for developing and communicating design ideas Drafting and digital tools will also be factors in course work, which will include training and mentorship in all materials and craft.

Requirements/Evaluation:
evaluation will be based on committed class participation in discussion and critique, as well as thoughtful, timely completion of all assignments and projects
Extra Info: may not be taken on a pass/fail basis
Prerequisites: THEA 201 or permission of instructor
Enrollment Preferences: Theatre and Art majors
Enrollment Limit: TBD
Expected Class Size: 10
Dept. Notes: this course does not count toward the Art major
Materials/Lab Fee: lab fee of $125 will be added to the student's term bill
Distributional Requirements:
Class Format: studio
class discussion and critiques
Distributional Requirements:

ARTS 230(S) Drawing II
This advanced drawing course will continue to investigate the techniques and ideas which were introduced in the Drawing I course. Having become more familiar with the drawing process, students will be encouraged through intensive weekly assignments to expand and challenge the conventions of markmaking. As with any discipline, familiarity with the rules allows the users to seek alternatives and develop definitions of how the drawing process can best be suited to their own visual vocabulary. The range of exercises could include traditional materials on paper as well as non-traditional methods and exercises.

Requirements/Evaluation:
evaluation will be based on the quality of work produced, participation in class discussions and critiques, successful completion of all assignments and attendance
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: ARTS 100
Enrollment Preferences: ARTS majors, ARTH majors
Enrollment Limit: TBD
Expected Class Size: TBD
Materials/Lab Fee: TBD
Distributional Requirements:
Class Format: studio
class discussion and critiques
Distributional Requirements:
ARTS 241 Painting
This is a beginning course focused on the development of sound working methods for oil painting. In addition, the course begins the study of the relationship between formal and technical choices in painting and the resulting expressive content of the work. The primary course activities will be exercises in painting, technical demonstrations, and critiques. Assigned work for the class will consist of paintings to be done almost entirely outside of class meetings, requiring a commitment of at least eight hours of work each week outside of class times.

Class Format: studio
Requirements/Evaluation: based largely on fulfillment of objectives, primarily technical, for each of the assigned work, some consideration will be given to attendance and to participation in critique
Prerequisites: ARTS 100
Enrollment Preferences: majors, sophomores, juniors, seniors
Enrollment Limit: 15
Expected Class Size: 15
Distributional Requirements: Division 1

Not Offered Academic Year 2017
STU Instructor: Steven Levin

ARTS 241 Acrylic Painting
In this course, we will explore the options that painting with acrylic can offer. The class will focus on developing necessary technical skills, such as the manipulation of color, value, form, and texture. We will also consider issues of content in a diverse range of approaches, including painting from life (still life and portraits), abstraction, and some mixed media. The particular characteristics of acrylic paint will be explored in a variety of processes. There will be visits to the museum, critiques, and slide presentations.

Class Format: studio
Requirements/Evaluation: evaluation will be based on the quality of work, investment of time, participation in critiques, and attendance
Prerequisites: ARTS 100
Enrollment Preferences: Art majors
Enrollment Limit: 14
Expected Class Size: 14
Materials/Lab Fee: lab fee TBD will be added to student's term bill
Distributional Requirements: Division 1

Not Offered Academic Year 2017
STU Instructor: Barbara Takenaga

ARTS 241(F) Painting
The variables of oil painting are so numerous that the permutations are endless. As an introduction to basic variables like color, brushwork, surface, form and light, this course is the beginning of what may be a life long, creative process. As an introduction to basic variables like color, brushwork, surface, and texture. We will also examine the conceptual and scientific bases for how we perceive the world around us. In this course, we will examine some of the many approaches used to photograph people. We'll start by exploring self-portraiture, and progress to photographing others—both familiar and strangers, in the studio and in less controlled environments. We'll end with a consideration of "documentary" photography and other visual narratives. In each case, we'll examine our reasons for making an image, and the methods available for achieving these goals. Thus, the class will have a significant technical component, dealing with the creative use of camera controls, the properties and uses of light, and digital capture and processing. We will also examine the conceptual and scientific bases for how we perceive and evaluate images. Students will initially use school-supplied digital cameras, and later have the option of using film.

Class Format: workshop
Requirements/Evaluation: weekly assignments
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: ARTS 100; ARTS 230 recommended
Enrollment Preferences: majors, sophomores, juniors, seniors
Enrollment Limit: 15
Expected Class Size: 15
Materials/Lab Fee: a lab fee of approximately $375 to be added to the student's term bill
Distributional Requirements: Division 1

Fall 2016
STU Section: 01 M 11:00 AM 12:15 PM M 01:10 PM 03:50 PM Instructor: Michael Glier

ARTS 241(S) Introduction to Oil Painting
This course is designed to introduce the fundamentals of oil painting. A significant portion of class time will be devoted to learning some of the basics of painting, such as the manipulation of color, value, surface, and texture. We will learn to prepare paper, canvas, and board supports as well as exploring the properties of several mediums (what the paint is mixed with to allow for application and drying). This course is focused on giving students access to a range of introductory techniques that they can explore during the semester. We will also spend time looking at each other's work and giving feedback and suggestions as well as studying the work of established artists. Evaluation will be based on evidence of each student's progress, as shown by the weekly assignments; attendance and participation in class discussions.

Class Format: studio
Requirements/Evaluation: based on evidence of each student's progress, as shown by the weekly assignments; attendance and participation in class discussions

Spring 2017
STU Section: 01 T 09:00 AM 11:50 AM Instructor: Laylah Ali

ARTS 250 Devised Performance Studio
Crosslistings: THEA 350/ARTS 250
This course offers students a hands-on experience of devising new performance work as an ensemble. Through an examination of innovative, non-traditional models for performance creation used by contemporary theater and art collectives (including Théâtre du Soleil, Complicite, Nature Theatre of Oklahoma, Elevator Repair Service, Big Art Group, The Civilians, The T.E.A.M., and National Theatre of the United States of America), this class will form its own unique structure for developing and producing a new theatrical performance. A major emphasis of the course will be on experiential education, which provides an invaluable opportunity to encounter firsthand the highly complex relationships present in collaborative creation. The course will also include guest classes with practitioners from the profession and other members of the Departments of Theater, Music, and Art, who can provide a fuller range of skills for the student ensemble to utilize during the devising process. Work-in-progress presentations spaced regularly throughout the semester will provide opportunities to receive feedback from small, invited audiences, as well as the opportunity to learn how to process and apply that critique to an ongoing creative process. At the end of the semester the accumulated work will have a public presentation in a workshop format.

Class Format: studio
Requirements/Evaluation: participation, indiv. presentations, contribution to group work, self-evaluation
Extra Info: students will contribute to the creation and presentation, by the group as a whole, of a newly devised performance piece
Prerequisites: none
Enrollment Preferences: the instructors will balance the course by level of prior theatrical experience
Enrollment Limit: 14
Expected Class Size: 10
Distributional Requirements: Division 1

Not Offered Academic Year 2017
STU Instructor: David Gucray-Morris

ARTS 252 The Human Image: Photographing People and Their Stories
Crosslistings: INTR 252/ARTS 252
The single most photographed subject is the human form. The motivations and strategies for imaging faces and bodies, both individual and aggregate, are as varied as the subjects themselves. In this course, we will examine some of the many approaches used to photograph people. We'll start by exploring self-portraiture, and progress to photographing others—both familiar and strangers, in the studio and in less controlled environments. We'll end with a consideration of "documentary" photography and other visual narratives. In each case, we'll examine our reasons for making an image, and the methods available for achieving these goals. Thus, the class will have a significant technical component, dealing with the creative use of camera controls, the properties and uses of light, and digital capture and processing. We will also examine the conceptual and scientific bases for how we perceive and evaluate images. Students will initially use school-supplied digital cameras, and later have the option of using film.

Class Format: studio/lecture
Requirements/Evaluation: students will be expected a) to photograph extensively outside of scheduled class hours b) to participate in class discussion and in both oral and written critique, c) to present one paper, and d) to exhibit their work at the end of the semester
Prerequisites: 200 level; students from all disciplines are welcome; previous photography experience is desirable, but not essential; permission of instructor is required
Enrollment Preferences: portfolio review; permission of the instructor
Enrollment Limit: 10
Expected Class Size: 10
Materials/Lab Fee: lab fee of $250 to be added to the student's term bill
Distribution Notes: meets Division 1 requirement if registration is under INTR
Distributional Requirements: Division 1
Other Attributes: FMST Related Courses

Not Offered Academic Year 2017
STU Instructor: Barry Goldstein

ARTS 253(S) Film Photography
Taught in the context of the art dept, the primary purpose of the course is to help students find an individual vision. An Introduction to B/W, still, film photography using both 35mm SLR cameras and 4x5 view cameras, provided
by the art department. Students will learn how to process film and make silver prints. The assignments will guide students through the ideas and aesthetics related to these particular cameras, primarily in the 19th and 20th centuries. Some thought and discussion of what role, if any, film photography has in the 21st century, after the advent of digital. Meant as a companion course to Arts 254, (Digital Photography) the assignments in this course will allow students to engage with the aspects of photography which are best done with film and silver printing. Substantial amounts of work will be done outside of class, and in the Spencer Art darkroom.

Class Format: studio

Requirements/Evaluation: based primarily on the quality of the photographic portfolio produced. Technical & conceptual sophistication, demonstrated comprehension of the ideas contained in the assignments, and individual progress will determine the final grade

Prerequisites: none
Enrollment Preferences: none
Enrollment Limit: 12
Expected Class Size: 12
Distributional Requirements: Division 1

Other Attributes: FMST Related Courses

ARTS 254 Digital Photography

Cell phones and scanners, along with Digital SLR cameras, will be used as image capture devices. Instruction in Photoshop software on the Macintosh platform and printing on a variety of digital media will be taught. Assignments will investigate the influence of these digital technologies on art photography. Meant as a companion course to Arts 253, Film Photography* the assignments in this course will allow students to engage with the aspects of photography which are best achieved digitally. Substantial amounts of work will be done outside of class, in the Mac lab in Jesup and in the digital printing lab in Spencer Art. With the exception of camera phones, the college will provide all other equipment necessary to complete coursework.

Class Format: studio

Requirements/Evaluation: based primarily on the quality of the photographic portfolio produced. Technical and conceptual sophistication, as demonstrated by the comprehension of the ideas contained in the assignments, as well as individual progress will determine the final grade

Extra Info: students need NOT take both Arts 253 and 254

Prerequisites: none
Enrollment Preferences: none
Enrollment Limit: 12
Expected Class Size: 12
Distributional Requirements: Division 1

Other Attributes: FMST Related Courses

ARTS 263(F) Printmaking: Intaglio and Relief

An introduction to printmaking through the process of intaglio and relief. Techniques will include drypoint, etching, and solar plates. Monotypes, some color work, collage, and hand tinting will also be covered. Both technical skill and a strong conceptual basis will be emphasized in order to create finished fine art prints. Experimentation is encouraged. Class time will consist of studio work, demonstrations, lectures, critiques, and field trips.

Class Format: studio

Requirements/Evaluation: evaluation will be based on attendance, participation in class, and the quality of work produced

Prerequisites: ARTS 100 or ARTS 103
Enrollment Limit: 12
Materials/Lab Fee: lab fee TBD will be added to the student's term bill

Distributional Requirements: Division 1

Fall 2016

STU Section: 01  Location: 115  Time: 09:55 AM 12:35 PM  Instructor: Aida Laliean

ARTS 264 Printmaking: Lithography

An introduction to printmaking through the process of lithography. Students will work on both stones and aluminum plates. Techniques will include traditional lithographic processes as well as monotyping, multiple plates, collage, and hand tinting. Both technical skill and a strong conceptual basis will be emphasized in order to create good, finished, fine art prints.

Class Format: studio work, demonstrations, lectures, critiques, and field trips

Requirements/Evaluation: evaluation will be based on attendance, participation in class, and the quality of work produced

Extra Info: may not be taken on a pass/fail basis

Prerequisites: ARTS 100
Enrollment Limit: 12
Materials/Lab Fee: lab fee TBD will be added to the student's term bill

Distributional Requirements: Division 1

Not Offered Academic Year 2017

ARTS 266 Low Tech Printmaking

This course will cover a variety of easy techniques to make multiple images, including xeroxing, linoleum plates, stenciling, collagraphics, and monotyping. Students will be encouraged to hand-color or add to the prints, incorporating drawing, painting, photography, bookmaking and collage. With less emphasis on complicated techniques, the focus of the course will be more upon form and content, investigating how the reproduction and serial nature of printmaking has an impact upon artmaking. There will be a minimum of five assignments during the semester and students are expected to work substantial hours outside of class.

Class Format: studio

Requirements/Evaluation: evaluation will be based primarily on the quality of the finished work, as well as attendance in class and participation in critiques

Extra Info: may not be taken on a pass/fail basis

Prerequisites: ARTS 100
Enrollment Preferences: Art majors
Enrollment Limit: 12
Expected Class Size: 12
Distributional Requirements: Division 1

Stu Instructor: Barbara Takenaga

ARTS 267T Artists' Books

To celebrate Williams' year-long initiative of the "Book Unbound," Artists' Books (normally ARTS 364) will be offered as a 200 level tutorial for the first time. This course will investigate the processes and ideas associated with the making of works that are fine art books/objects, generally using visual images and text. Projects could include visual diaries, tri-dimensional pop-up books, solely visual narratives, literary text/image collaborations, animated "flip" books, or sculptural books. Media options include painting, drawing, etching, lithography, relief printing, and photography as well as bookbinding techniques (from sewn bindings to boxes). As a tutorial, this course is designed to support individual directions, to stress student participation and responsibility for learning, and to examine different points of view. Students will meet in small groups for critique of individual projects—in the tutorial format—students are expected to give 20 minute presentations about their work and to respond to questions and criticism. Students will also meet once a week as a group for demonstrations, lectures, and discussion of readings.

Class Format: tutorial

Requirements/Evaluation: evaluation will be based on student participation and the conceptual and technical quality of the work

Extra Info: may not be taken on a pass/fail basis

Prerequisites: any one of the following: ARTS 230, 241, 242, 257, 263, 264, or 266
Enrollment Preferences: Art majors
Enrollment Limit: 9
Materials/Lab Fee: lab fee TBD will be added to the student's term bill

Distributional Requirements: Division 1

Not Offered Academic Year 2017

STU Instructor: Barbara Takenaga

ARTS 273(F) Sound Art, Public Music

Crosslistings: MUS 175/ARTS 273

Western music performance traditionally occurs within contained spaces in which "performer" and "audience" adhere to designated locations and follow tacit scripts: seats/stage, applause/bows, etc. In recent years, traditional boundaries and scripts of performance and reception have moved into public spaces—from sound art installations to ambient music, from interactive sound sculpture to radio art to social media driven flash mobs. This course studies the work of pioneers in public music and sound art including Alvin Lucier, Bill Fontana, John Cage, Trimpin, Brian Eno and Gregory Whitehead, among others. The course will alternate between study and analysis of particular artistic strategies and the creation of site-specific works on and around the Williams campus.

Class Format: seminar

Requirements/Evaluation: class participation, three short (2-4 page) essays, a response journal and the creation of four public music works

Prerequisites: none
Enrollment Preferences: juniors and seniors
Enrollment Limit: 10
Expected Class Size: 10
Distributional Requirements: Division 1

Fall 2016

SEM Section: 01  MR 02:35 PM 03:50 PM  Instructor: Brad Wells

ARTS 274 Chinese Calligraphy: Theory and Practice

Crosslistings: ARTH 274/ASST 274/ARTS 274

Beginning in the fourth century, Chinese calligraphy has remained one of the highest art forms in China and in East Asia generally, practiced by the literati, or highly erudite scholars. This course has two components: art history and studio practice. The first offers students an opportunity to acquire an understanding of the theoretical and aesthetic principles of Chinese calligraphy. It also examines the religious, social, and political functions of Chinese calligraphy in ancient and contemporary China. Students will also have an
opportunity to investigate contemporary artists, both Eastern and Western, whose works are either inspired or influenced by Chinese calligraphy, and whose works are akin to Chinese calligraphy in their abstraction. Studio practice allows students to apply theories to creating beautiful writing, or calligraphy (from Greek kallos "beauty" + graphe "writing"). This course can be taken as either an Art History or a Studio Art course.

**Class Format:** lecture/studio instruction

**Requirements/Evaluation:** weekly assignments, a midterm, one short paper, oral presentations, participation in class discussion, a final project (artistic or scholarly), class attendance, film screening

**Prerequisites:** none

**Enrollment Limit:** 12

**Dept. Notes:** this course can count toward the Art History or Studio major

**Materials/Lab Fee:** lab fee TBD will be added to the student's term bill

**Distribution Notes:** meets Division 1 requirement if registration is under Art History Studio Electives

**Fall 2016**

LEC Section: Cancelled  Instructor: Ju-Yu Jang

**ARTS 275(F,S) Introduction to Sculpture**

This course is an introduction to the media and processes of sculpture. The focus will be on the development of technical and analytical skills as they relate to the interplay of form, content, and materials. This section will introduce students to a variety of techniques and processes associated with the making of sculpture, including, but not limited to, woodworking and welding. Sculpture encompasses a broad scope of approaches and materials, therefore a wide variety of media exploration is encouraged and expected. This course is structured on a series of sculpture projects, which investigate formal and conceptual practices, with the ultimate goal being visual fluency and successful expression of ideas. A substantial amount of time outside of class is expected to complete these projects.

**Class Format:** studio

**Requirements/Evaluation:** evaluation will be based on the quality of work produced, depth and quality of the investigative process, participation in critiques, and attendance

**Prerequisites:** any ARTS 100 class

**Enrollment Limit:** 12

**Materials/Lab Fee:** lab fee TBD will be added to the student's term bill

**Distribution Requirements:**

Division 1

**Fall 2016**

STU Section: 01  T 01:10 PM 03:50 PM  Instructor: Amy Podmore

**ARTS 284(S) Writing for Film, Video, and Performance (W)**

Crosslistings: ARTS 284/TheA 284

This is a writing workshop for all time-based artists. We will study the use of language in a variety of kinds of film, video, and performance-based artworks. We will study examples in avant-garde film, video art, performance art, essay films, and explore the use of language and syntax of these forms in relation to, and in contrast with, popular cultural forms. The second half of the course will focus primarily on narrative screenwriting. The main goal of this course is to identify and generate a thematic, tonal, and narrative sensibility that is specific to each student. Students will create monologues, voiceovers, screenplays and short video anecdotes, and will also write several response papers about the use of language in film, video, and performance.

**Class Format:** studio

**Requirements/Evaluation:** grades will be based on in-class writing, weekly assignments, participation in workshop discussion and critiques, and video-sketches that visually demonstrate ideas generated through writing

**Enrollment Preferences:** students will be asked for writing samples

**Enrollment Limit:** 15

**Expected Class Size:** 10

**Distribution Requirements:**

Division 1

**Writing Intensive**

**Other Attributes:** FMST Core Courses

**Not Offered Academic Year 2017**

**SEM  Instructor:** Liza Johnson

**ARTS 319(F) Junior Seminar**

The objectives of this intensive seminar for studio majors are, through weekly studio projects, to strengthen both creative and technical skills as well as analytic, technical, and critical abilities.

**Class Format:** seminar and studio workshop

**Requirements/Evaluation:** evaluation will be based on the quality of work produced, participation in class discussions and critiques, successful completion of all studio projects, and attendance

**Prerequisites:** three studio courses required for the major, including at least two which are 200 level or higher, or permission of instructor

**Enrollment Preferences:** enrollment is limited to studio art majors (or permission of instructor)
ARTS 322T The Empowered Object
The development of "found object" in the language of art has played a significant role in constructing meaning in the consciousness of the twenty-first century. This tutorial will have students explore that tradition further through their own creative endeavors. They will be asked to add to the lineage of art that uses "found objects" in a creative and meaningful way. They will have the freedom to choose which medium will convey their ideas most effectively. They include, but are not limited to: sculpture, painting, drawing, photography, printmaking and video. For example, within the investigation of the "found object," projects could include: still life painting with a focus on the objects, 2-dimensional work depicting or incorporating real objects, collage, assemblage, etc. The "found object" in art will be examined through: art practice, readings and presentations. As a tutorial, the course is designed to meet individual needs and to stress student participation and responsibility for learning. Students will meet weekly with a peer and the professor to review work.
Class Format: tutorial
Requirements/Evaluation: evaluation is based on the conceptual and technical quality of the work, as well as the level of participation in the tutorial meetings
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: any 200-level art course in the area that you are planning to work that is housed solely in the studio wing of the art department
Enrollment Limit: 10
Expected Class Size: 10
Materials/Lab Fee: lab fee TBD will be added to the student's term bill
Distributional Requirements: Division 1

Not Offered Academic Year 2017
TUT Instructor: Amy Podmore

ARTS 324 The Documentary Photography Project
Crosslistings: ARTS 324/INTR 324
While every image documents something, the field of documentary photography traditionally uses still images to relate a story about the events and people that shape our world. Students will learn skills required to produce a coherent visual narrative. Technical aspects of image acquisition that are particularly useful in conveying information will be reviewed, including manipulation of exposure controls, wide angle composition, and location lighting. Conceptual topics will include myths about "truth" and "objectivity" in photography, and the responsibilities of the documentarian to his/her subjects. Students will practice different types of documentation, and consider techniques for approaching, photographing and interviewing subjects. The practical aspects of developing a story, gaining access, working in unfamiliar environments and editing both individual images and series will be examined. Students will work throughout the semester on planning and executing a documentary project, culminating in an exhibition of their work and production of a print-on-demand book. Acceptance into the class requires strong technical competence, and a demonstrated ability to work independently and to commit to a long-term project. Participants should expect to spend significant time working off campus.
Class Format: studio
Requirements/Evaluation: class attendance is mandatory; participation in class discussion and critiques 20%; aesthetic and technical strengths of shooting exercises 20%; aesthetic and technical strength of final project 60%
Prerequisites: ARTS/INTR 252 and permission of instructor
Enrollment Preferences: base on portfolio review
Enrollment Limit: 8
Expected Class Size: 8
Materials/Lab Fee: $200
Distribution Notes: meets Division 1 requirement if registration is under ARTS; meets Division 2 requirement if registration is under INTR
Distributional Requirements: Division 1
Other Attributes: FMST Related Courses

Not Offered Academic Year 2017
STU Instructor: Barry Goldstein

ARTS 326(F) Advanced Photography
This course is designed for students ready to pursue in-depth and advanced personal projects in photography. Emphasis will be placed on developing a body of work that reflects personal vision and investigation. In addition to photographic work, students will be asked to examine and discuss the work of contemporary artists who use photography on a weekly basis. Regular assignments will ask students to delve deeper into the technical and theoretical underpinnings of photography. The second half of the semester will be devoted to the development of an individual project that culminates in a final portfolio of photographs.
Class Format: studio

Requirements/Evaluation: evaluation will be based on short written assignments, multiple photographic assignments, and a final portfolio project
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: ARTS 206, ARTS 207, ARTS 303, or by Portfolio Review
Enrollment Preferences: if overenrolled, an application will be required
Enrollment Limit: 10
Expected Class Size: 10
Materials/Lab Fee: $175, subject to change
Distributional Requirements: Division 1
Other Attributes: FMST Related Courses

Fall 2016
STU Section: 01 M 10:10 PM 03:50 PM Instructor: Elle Perez

ARTS 329 Architectural Design II
A continuation and expansion of ideas and skills learned in Architectural Design I. There will be four to six design projects requiring drawings and models, each of which will emphasize particular aspects of architectural theory and design. Visiting critics will discuss student work. The course is useful for students thinking of applying to graduate school in architecture.
Class Format: studio, site visits, lectures, readings
Requirements/Evaluation: evaluation will be based on quality of designs during the term
Prerequisites: ARTS 220 or ARTS 215
Enrollment Limit: 15
Expected Class Size: 15
Materials/Lab Fee: lab fee TBD will be added to the student's term bill
Distributional Requirements: Division 1
Other Attributes: ENVI Humanities, Arts + Social Science Electives

Not Offered Academic Year 2017
STU Instructor: Ben Benedict

ARTS 333(S) Image/Object
This course engages with the idea of the `image object' to explore the rich intersection of photography and sculpture. Often overlooked, a photograph's materiality allows us to consider and question how photographs function as both representations and objects in society. On the other hand, sculptures and performance that alter meaning of a photograph on a weekly basis. Regular discussions that offer possibilities for considering a photograph sculpturally and a sculpture photographically. Regular critiques and lectures will offer a historical context and an overview of contemporary artists working in this intersection such as Pierre Huyghe, Liz Deschenes, Lorna Simpson, Matthew Barney, Gabriel Orozco, Vanessa Beecroft, and Amanda Ross Hoo.
Class Format: studio
Requirements/Evaluation: evaluation will be based on short written assignments, multiple assignments, and a final project
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: one of the following: ARTS 275, ARTS 206, ARTS 207, ARTS 303, ARTS 322 or by Portfolio Review
Enrollment Preferences: in case of over enrollment, an application will be required
Enrollment Limit: 12
Expected Class Size: 12
Materials/Lab Fee: $175, subject to change
Distributional Requirements: Division 1

Spring 2017
STU Section: 01 MR 10:10 PM 03:50 PM Instructor: Elle Perez

ARTS 3337 Narrative Strategies
Crosslistings: ARTS 333/COMP 333
In this tutorial, we will examine the use of narrative in a range of fine art practices, which could include painting, drawing, video, sculpture, installation, public art, and sound art. Students who are interested in telling or referencing stories in their work in some way will be given the opportunity to develop their ideas and skills in a challenging studio class. In addition to intensive projects, we will look at and discuss the work of artists such as Huma Bhabha, Lorna Simpson, Joe Sacco, Lydia Davis, Raymond Pettibon, Todd Solondz, Sophie Calle, Jenny Holzer, and Omer Fast among others. One of the aims of this course is to challenge traditional notions and expectations of narrative. For instance, what could minimally constitute a narrative piece? How does omission powerful and present in novels and short stories) change in a visual arts context?
This is a studio tutorial with an emphasis on demanding, weekly projects. Students will work both in mediums of their choice and be asked to experiment with new, unfamiliar formats. Readings and screenings will be required in addition to tutorial hours.
Class Format: studio with an emphasis on demanding, weekly projects; students will work both in mediums of their choice and be asked to
ARTS 340(S) Transparency and Opacity
Crosslistings: ARTS 340/ENGL 340
"Transparency" and "opacity" are metaphors—evoking openness and corruption, for example—and they are also material properties. In this course, students will consider transparency and opacity as formal devices alongside related tools, such as symmetry, reflectivity, reflectivity, and perspective. An intensive program of 10-week, 20-hour class will be dedicated to the study of discourses of political theory, literary criticism, psychology, architecture, and more; authors include philosopher Edouard Glissant, architectural theorist Adam Vidler, and novelist Tom McCarthy, among others. We will investigate visual artists whose work uses transparent, translucent, and opaque materials, including Marcel Duchamp, Donald Judd, Josiah McElheny, Michaelangelo Pistoletto, David Hammons, Joseph Kosuth, Paul Chan, and Demetrius Oliver. Our research will inform a sequence of demanding independent studio exercises; creative work and group critique are important components of this course. Assessable tasks include response papers, studio exercises, and a studio project.

Class Format: studio
Requirements/Evaluation: evaluation will be based on full and active participation and quality of studio work
Extra Info: may not be taken on a pass/fail basis
Prerequisites: at least one 100-level ARTS course OR one 100-level ENG course OR permission of the instructor
Enrollment Preferences: Art Studio majors, English majors
Enrollment Limit: 10
Expected Class Size: 10
Distributional Requirements: Division 1

Spring 2017
STU Section: 01 R 01:10 PM 03:50 PM Instructor: Steffani Jemison
ARTS 344 Abstraction
The Clark Art Institute will open its new galleries with "Make It New", an exhibition of post-war, American abstract art. This exhibition will include 35 works by a diverse selection of artists including Jo Baer, Lynda Benglis, Sam Gilliam, Yayoi Kusama, Joanne Mitchell, Barnett Newman, Jackson Pollock, Mark Rothko and Alma Thomas. This studio workshop for intermediate and advanced drawing, painting and sculpture students will use the exhibition as a source for studying the content and design principles that define the genre. Among the concepts to be explored are color theory, field composition, gestural painting and minimalism. Weekly assignments, including an oral presentation on an artist in the Clark exhibition, will be given over the first eight weeks of class. The final four weeks will be dedicated to independent projects. Short, informal responses to weekly readings are also required.

Class Format: studio
Requirements/Evaluation: evaluation will be based on the quality of the visual projects, the oral presentation, the reading responses and the student's participation in class discussion
Extra Info: may not be taken on a pass/fail basis
Prerequisites: ARTS 230, or a 200-level painting class or a 200-level sculpture class, or permission of instructor
Enrollment Preferences: Studio Art majors, seniors, juniors, sophomores
Enrollment Limit: 10
Expected Class Size: 10
Materials/Lab Fee: a lab fee of approximately $275 to be added to the student's term bill
Distributional Requirements: Division 1

Not Offered Academic Year 2017
STU Instructor: Michael Glier

ARTS 350(S) Subjective Documentary
This documentary film course proposes to look at how even the most seemingly objective films are shaped by a subjective eye. An eye which is molded by gender, race, class and the social structures of our communities. Just as these influence our economics and politics, they also influence the entire filmmaking process from decisions about how something is shot to how it is shot as well as how the viewer experiences and interprets what's on the screen. How we look at something, for how long we look at it and how it is contextualized carries as much meaning as the content of our films. Similarly, the subjective eye of the viewer shapes how he or she understands and relates to the film. So then, what are we really talking about when we talk about documentary films? What makes a documentary a documentary? Why is such a categorization valuable? necessary? useful? The course will consist of a series of documentary exercises to put into practice these concepts on subjectivity. Students will refine their filmmaking skills (shooting and editing) so that they can make more precise decisions about form to most effectively tell the stories they want to tell. Students will also develop critique skills by reviewing each other's projects as part of the creative process, with the goal of creating a supportive and constructive critique environment. The production aspect of the course will be supplemented with screenings and readings.

Class Format: studio
Requirements/Evaluation: Class participation and engagement documentary filmmaking assignments: craft, risk and commitment
Prerequisites: intended for students with prior video production and editing skills
Enrollment Preferences: Art majors and seniors
Enrollment Limit: 10
Expected Class Size: 10
Distributional Requirements: Division 1

Spring 2017
STU Section: 01 TBA Instructor: Natalia Almada
ARTS 367(F) Projects: Multiples, Order, Chance
This course will explore the visual possibilities of chance and ordering systems using multiples and other media, which can include painting, printmaking, sculpture, collage, photography, drawing and more. Students will choose from the wide variety of reproductions available in contemporary culture as resource materials for projects. This could include hand-produced prints and photographs, plaster casts of objects, found images, commercial packaging, and mass-produced objects. Using these materials, students will conceive a structure for individual projects, while employing chance to subvert that plan and open up the creative process—inviting visual play, the option of failure and the risks of problem solving. This course examines the creative process as a combination of the random and the intentional, thinking visually and intuitively. For example, an assignment may be to create a game that involves 3 or more players that will produce a large scale art work using 100 recycled, mass produced items (newspapers, coffee cups, plastic spoons, etc.). Or to create a 2-d or 3-d collage of multiples produced by hand (framed drawings, editions of prints or photographs, folded paper, etc.) with a specific theme. Or to create a work produced by using one of the many Surrealists' games as in the exquisite corpse, frottage, or automatism. Related artists include El Anatsui, Sol Lewitt, Tara Donovan, Lisa Hoke, Fred Tomaselli and John Cage. There will be demonstrations, slide presentations, and on-campus field trips.

Class Format: studio
Requirements/Evaluation: evaluation will be based on student participation as well as the conceptual and technical quality of the work
Extra Info: may not be taken on a pass/fail basis
Prerequisites: any one college level class in the following media: painting, printmaking, sculpture, drawing, photography or by permission of instructor
Enrollment Preferences: Art majors
Enrollment Limit: 10
Expected Class Size: 10
Distributional Requirements: Division 1

Fall 2016
STU Section: 01 M 01:10 PM 03:50 PM Instructor: Barbara Takenaga
ARTS 376 Sculpture Expanded
This course is designed to expand the definitions of sculpture by adding interdisciplinary solutions to the artistic ideas at hand. The class will be using a wide array of artistic practices towards developing three-dimensional spaces and emphasizing environmental or performative outcomes. Media such as video, drawing, painting, photography, architecture, as well as other artistic practices may be incorporated to create visual solutions to the projects. This is an upper level course focusing on developing one's artistic voice while simultaneously strengthening technical and analytical skills. A substantial amount of time outside of class is expected to complete these projects.

Class Format: studio
Requirements/Evaluation: evaluation will be based on the quality of work produced, depth and quality of the investigative process, participation in critiques, and attendance
Prerequisites: ARTS 275 or any 200 level course in the media that will be incorporated or permission of instructor
Enrollment Limit: 10
Materials/Lab Fee: lab fee TBD will be added to the student's term bill
Distributional Requirements: Division 1

Not Offered Academic Year 2017
STU Instructor: Amy Podmore

ARTS 385(S) The Sculptural Costume and It's Performance Potential
Crosslistings: ARTS 385/THFA 385
A team-taught art / theatre course designed to explore the rich territory of the wearable sculpture and its generative role in art and performance. From ritual costumes, to Carnival, to Dada performance, to Bauhaus dance, to Helio Oiticica’s Parangole, and Nick Cave’s sound-suits, there has been a rich tradition where sculpture and costumes merge. Students will study artists who have bridged distinctions between the theatrical costume and the sculptural object as well as produce hybrid objects that explore the range of possibilities.
within this collaborative practice. The students will produce object-costumes involving a wide variety of media, from recycled materials to new technologies, while striving to develop their individual artistic voices.

Class Format: studio
Requirements/Evaluation: evaluation will be based on the quality of work produced, the depth and quality of the content and process, participation in critiques, and attendance
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: successful completion of any 200-level course in art studio or performing arts, or permission of the instructor
Enrollment Preferences: Art and Theater majors
Enrollment Limit: 14
Expected Class Size: 12
Materials/Lab Fee: $125
Distributional Requirements: Division 1

Spring 2017
STU Section: 01 M 01:10 PM 03:50 PM Instructors: Amy Podmore, Deborah Brothers
ARTS 418(S) Senior Seminar
The course will offer a studio art major at Williams the educational opportunity to exhibit a body of work at The Williams College Museum of Art. This class helps you strengthen your skills and refine your individual goals as an artist. It encourages the use of critical analysis in the creation and evaluation of your work with the emphasis on producing a strong and coherent body of artwork for your senior exhibit.
Class Format: studio will be taught as an independent study
Requirements/Evaluation: grading includes: attendance, effort, diligent and creative investigation, attitude, participation, community responsibility, and the ability to communicate visually
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: you must be a senior Art Studio major with all requirements fulfilled by the end of this term
Enrollment Preferences: Art Studio seniors, Art majors pursuing History and Practice may have permission of the instructor to enroll
Enrollment Limit: none
Expected Class Size: 15
Materials/Lab Fee: no lab fee, students are responsible for purchasing supplies
Distributional Requirements: Division 1

Spring 2017
STU Section: 01 TBA Instructor: Amy Podmore
ARTS 497(F) Independent Study: Art Studio
With current staffing limitations, it is difficult for studio faculty to supervise more than a few very independent studies projects. We feel our curriculum includes rich and varied offerings and believe that the need for most independent work can be met through those regular offerings.
Class Format: independent study
Prerequisites: student will be accepted into an independent studio project until he/she has completed two 200-level ARTS courses and one 300-level ARTS tutorial; permission of instructor is required
Distributional Requirements: Division 1

Fall 2016
IND Section: 01 TBA Instructor: Peter Low
ARTS 498(S) Independent Study: Art Studio
With current staffing limitations, it is difficult for studio faculty to supervise more than a very few independent studies projects. We feel our curriculum includes rich and varied offerings and believe that the need for most independent work can be met through those regular offerings.
Class Format: independent study
Prerequisites: no student will be accepted into an independent studio project unless he/she has completed two 200-level ARTS courses and one 300-level ARTS tutorial; permission of instructor is required
Distributional Requirements: Division 1

Spring 2017
IND Section: 01 TBA Instructor: Peter Low
GRADUATE COURSES IN ART HISTORY
Requirements for the Degree of Master of Arts in Art History
To qualify for the Master of Arts degree in art history, candidates complete a minimum of twelve courses for graduate credit plus two winter study periods, the latter comprising an international Study Trip in the first year (normally in January) (ARTH 51) and preparation of a Draft Qualifying Paper in the second (ARTH 52). Students must also demonstrate reading proficiency in two foreign languages, one of them German, for more specific information on the language requirements, see below, after the listing for ARTH 597/598). At the end of the second year, all students present a shortened version of the Qualifying Paper in the annual Graduate Symposium.

At least eight of the twelve courses must be graduate seminars. Included among them are four required of all students: ARTH 504, "Methods of Art History," to be taken during the first semester; ARTH 506, "Graduate Art History Writing Workshop" and ARTH 507, "Object Workshop," to be taken in the second; and ARTH 509, "Graduate Student Symposium," to be taken in the fourth.

Students must also fulfill a distribution requirement by undertaking coursework in three of six areas:
- East Asian, Indian, Islamic art
- Ancient Near Eastern, Egyptian, Greek, and Roman art
- Early Christian, Byzantine, and Western Medieval art to 1400
- Western art, 1780 to present
- Arts of Africa, Oceania, and the Americas (Pre-Hispanic or Native American cultures)

Students may petition the Director to apply a thematic or non-period specific course toward the distribution requirement by demonstrating substantial work in an appropriate area.

Undergraduate Courses and Private Tutorials
With permission from the Director and the individual instructors, students may take up to four undergraduate courses for graduate credit, with the understanding that research papers submitted in such courses meet a standard commensurate with those prepared for graduate seminars.

Students submit the topic of the Qualifying Paper in writing to the Director by the final day of exams of their third semester. Before this, students must obtain their original faculty supervisor’s agreement to be engaged in the Qualifying Paper process.

On the first Friday of their fourth semester, students submit drafts of their Qualifying Paper, including illustrations, to three faculty readers (generally the original faculty supervisor, the Director, and the Post-Doctoral Teaching Fellow). Although a draft, this version of the paper should be brought to a high level of completion.

Students and their readers meet together to discuss the drafts. Within six weeks of these discussions (at a date determined by the Director), students submit their Qualifying Papers. Qualifying Papers should not exceed 8,000 words, including footnotes and bibliography.

The Graduate Symposium
All second-year students speak in the Symposium, presenting 20-minute talks developed from their Qualifying Papers. Each student has an ad hoc committee to give advice in preparing these presentations (ad hoc committees are not limited to, the Director, one additional faculty mentor, one first-year graduate student, and one second-year graduate student). Preparations include at least three practice sessions for each student. Speakers present the first and third of these run-throughs to the ad hoc committee, the second to the other second-year students in a workshop scheduled by the Director.

Grades and Academic Standing
The Program uses the following grading system:

A+ = truly exceptional (4.33)
A    = outstanding (4.00)
A-   = excellent (3.67)
B+   = good (3.33)
B    = satisfactory (3.00)
B-   = barely adequate (2.67)
C    = inadequate (2.00)
D    = failing (0)

Courses in which students receive a grade below B do not receive graduate credit.

Letter grades are used in all seminars except ARTH 507 and 509. These and the Winter Study courses (ARTH 51 and 52) are Pass/Fail. Grades in language courses are converted to Pass/Fail on the Williams transcript and are not calculated in the GPA. The Director reviews students’ records at the end of the first year; those with GPAs of 3.00 or lower may be asked to resign from the Program.

Course instructors set the deadlines for coursework. If students seek and receive extensions that result in semester grades ofIncomplete, they must hand in their work by the instructor’s revised deadline, which will be no later than the second Monday of the next semester’s classes. Extensions beyond that date will be solely at the discretion of the Director (in consultation with the instructor).

Students who resign from the Program may, after a period of at least one year, petition to the Director for re-admission. Such a petition must include evidence that deficiencies have been remedied and that the student is capable of completing the course of study without further interruption.
The M.A. requirements are designed for completion in two consecutive academic years in residence. There is no credit for coursework done prior to matriculation in the Program. The Program is full-time, requires students to live in Williamstown or its vicinity, and does not normally admit students on a part-time basis.

Language Courses

Incoming students’ language preparation is assessed through exams administered at the outset of the semester. In French and German, scores attained on SAT II reading examinations determine placement within the two-semester French/three-semester German sequence. If students attain a minimum score of 700 on the placement exam, they are exempted from further coursework in that language. With a score between 500 and 700, they are placed into the graduate course of readings in art history, French 512 or German 513. With a score below 500, they enroll in the appropriate introductory course (French 511 or German 511/512). In the case of a second language other than French, arrangements will be made on an individual basis.

Returning students who have completed or passed out of GER 512 may, with the prior approval of the Director and consultation with German language faculty, satisfy the requirement of GER 513 by one of two alternative means: earning at least a B-, or the equivalent, in a pre-approved intensive German-language summer course; or, through self-study, perhaps augmented by a less-rigorous summer course, successfully passing a translation exam administered by the German faculty at the beginning of their second fall semester.

ARTH 500(F) MEdIEval MEDitteranean: Artistic interactions across water Crosslistings: ARTH 500/ARTH 400

The constant contacts, in peace and war times, between the Latin West and the world of Islam, especially during the Middle Ages, formed and shaped the identities of both Christian and Muslim worlds. Moreover, these cultural clashes and artistic exchanges seemed on the one hand to consolidate identities and maintain barriers of differences but on the other hand to contribute to dynamic aesthetic conversations, enriching the visual cultures of both. In several moments in history, which, sometimes, can hardly be defined as convivencia, a new amalgamated aesthetic language was born. Trade with luxury goods and even the sacking of works of art ‘sponsored’ and enhances visual dialogues between different religious cultures of the Mediterranean. In this seminar the routes and the champions of these exchange moments are discerned. The Mediterranean basin (between 800 to 1500 AD) is in focus. The mobile world around the shores of the Mediterranean Sea—from the far west district of Andalus and the city of Cordoba to the near Eastern metropolises of Cairo and Damascus—will be highlighted. Port cities such as Salerno, Amalfi, Genua, Mahdiyya, Venice, Palermo and Acre will be jointly discussed in order to draw a full and complete picture of the particular medieval art, which developed across the Mediterranean basin.

Enrollment Preferences: places for 8 undergraduates and 8 graduate students assured

Enrollment Limit: 16

ARTH 500(S) CVPS: Jerusalem: The Making of the Holy Crosslistings: ARTH 500/ARTH 400

What are the reasons for declaring a particular space holy? How are the borders of this holy space defined? What practices and rituals are employed in holy spaces? Can the sanctity of the holy be transferred? The city of Jerusalem is the case study through which these questions will be critically examined. The city, sacred to three monotheistic religions, has been made and remade throughout history as a sacred space to Judaism, Christianity and Islam. The course will examine Jerusalem’s changing architectural program over circa one thousand years, as well as its representation in images and texts from Jewish, Christian and Muslim sources. The main focus will be the Haram al-Sharif, the temple mount in Jerusalem as well as other spaces in the old city of Jerusalem and its vicinity, in which further sacred spaces were built and designed for pilgrims. Aspects of different rituals and even oral traditions will be brought into discussion to illustrate the varied methods and politics of the space and the continuous contestations over Jerusalem’s sacredness up to the present day. At the same time, modern, mainly nationalist, methods for reconstructing past narratives for Jerusalem will be critically discussed, focusing mainly on archaeology, urban architectural developments and museum display

ARTH 502 History, Theory, and Techniques of Printmaking

This course will consider the history of prints in Europe and America from the fifteenth century through the 1920s. Focusing primarily on the holdings of the Clark, classes will be held in the new Manton Study Center for Works on Paper where students will view original works of art. Equal emphasis will be placed on primary literature, theoretical texts, and a careful understanding of printmaking processes. Media to be investigated include, among others, 15th-century woodcuts by Albrecht Dürer, drypoints by Rembrandt van Rijn, engravings by Henri de Breton and Louis-Emmanuel Debucourt, aquatints by Francesco Goya, lithographs by Edouard Manet, etchings by James McNeill Whistler, photo- mechanical processes like photogravure by artist Alfred Stieglitz, and color woodcuts by the German Expressionists. The rise and fall of various processes and practitioners will be explored from a socio-historical perspective, considering market, taste, and changing exhibition strategies. Additionally, consideration will be given to the status of the printmaker over the centuries as their roles shifted from professional to amateur and back again.

Class Format: seminar

Requirements/Evaluation: evaluation will be based on involved class participation, several short presentations, one short paper, and a final paper of approx. 20 pages

Extra Info: may not be taken on a pass/fail basis

Enrollment Preferences: Graduate Program students and then to Art History majors

Enrollment Limit: 14

ARTH 505 Shades of Plato’s Cave: Image, Screen, and Spectacle Crosslistings: PSCI 374/COMP 374/ARTH 505

In Book VII of the Republic, Socrates famously asks his interlocutors to picture people living in a cave, bound in chains and able to see only shadows on the wall. Socrates believes the presentation of this most influential metaphor in the history of philosophy. One might even claim that when Plato deployed the metaphor in an extended allegory, he constituted the fields of both philosophy and political theory. In repeatedly examining the allegory over the centuries, later thinkers have elaborated their approaches not only to Plato but also to the nature of politics and the tasks of thinking. This class begins with the Republic’s cave and other key Platonic discussions of appearances, visual
representation, and (literal and metaphoric) seeing, asking how Plato's approaches to image, politics, and theory/philosophy shape each other. Building on those inquiries, we next take up important twentieth and twenty-first century returns to the cave, engaging such figures as Heidegger, Strauss, Arendt, Derrida, Irigaray, Rancière, and Badiou. Finally, we examine recent theories of screen and spectacle—read both for their resonances with and departures from debates over the Platonic legacy—and case studies in the phenomenon of both military and racial spectacles in the U.S. The question of what is an image and what images do will run from the beginning of course to the end. Beyond the authors mentioned, readings may include such authors as Allen, Bruno, Clark, Deleuze, Friedberg, Goldsby, Josellit, Mitchell, Nightingale, Rodowick, Rorty, Silverman, and Virilio. Insofar as it fits student interest, we will also explore the cave's considerable presence in visual culture, ranging from Renaissance painting through such recent and contemporary artists as Kelley, Demand, Hirschhorn, Kapoor, Sugimoto, and Walker, to films such as The Matrix.

Class Format: seminar
Requirements/Evaluation: regular group posts and three 7- to 8-page essays or one 20-page final paper
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: one prior course in political theory, art history, cultural/literary theory, or philosophy or permission of the instructor
Enrollment Preferences: majors in political science, comparative literature, and art history, as well as students (up to 4) in the graduate program in art history
Enrollment Limit: 19
Expected Class Size: 12
Distribution Notes: meets Division 2 requirement if registration is under PSCI; meets Division 1 requirement if registration is under COMP or ARTH

ARTH 506(S) An Expository Writing Workshop
A common and depressing consequence of too much education is how our writing tends to devolve, as the task of saying what we mean is complicated by new anxieties: trying to impress our potential employers, intimidate our competition, claim our place in an intellectual community, and generally avoid looking like fools. In many professions, bad prose tends to proliferate like some disgusting disease, as scholars, trying above all to avoid mistakes, become tentative, obscurantist, addicted to jargon, and desperate to imitate other bad writers. In this course we will try to relearn the basic skills of effective communication and adapt them to new and complicated purposes. In class we will go over weekly or bi-weekly writing assignments, but we will also look at the essays you are writing for your other courses, to give them an outward form that will best display their inner brainsiness. Among other things, I am a fiction writer, and part of my intention is to borrow the techniques of storytelling to dramatize your ideas successfully.

Class Format: seminar
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Enrollment Preferences: limited to and required of first-year students in the Graduate Program in the History of Art
Enrollment Limit: 14

Spring 2017
SEM Section: 01 Cancelled

ARTH 508(S) Art and Conservation: An Inquiry into History, Methods, and Materials
This course is designed to acquaint students with observation and examination techniques for works of art, artifacts, and decorative arts objects; give them an understanding of the history of artist materials and methods; and familiarize them with the ethics and procedures of conservation. This is not a conservation training course but is structured to provide a broader awareness for those who are planning careers involving work with cultural objects. Sessions will be held at the Williamstown Art Conservation Center, Williams College, the Clark Art Institute, and the Governor Nelson A. Rockefeller Empire State Plaza Art Collection in Albany. Examination questions may be formulated from exhibitions at these locations. Six exams will be given. Exam scores will be weighted in proportion to the number of sessions covered by the exam (e.g., the paintings exam, derived from six sessions of the course, will count as 25% of the final grade).

Class Format: slide presentations, lectures, gallery talks, hands-on opportunities, and examinations, and group discussions
Requirements/Evaluation: attendance is required at all sessions; the course grade is based on exams given throughout the semester; there is no final exam
Enrollment Preferences: Graduate Program students, then students in art history or studio art
Enrollment Limit: 14
Distributional Requirements: Division 1
Other Attributes: EXPE Experiential Education Courses

ARTH 527 Acquiring Art: Selecting and Purchasing Objects For WCMA
This course is designed to assist qualified fourth-semester graduate students in preparing a scholarly paper to be presented at the annual Graduate Symposium. Working closely with a student and faculty ad hoc advisory committee, each student will prepare a twenty-minute presentation based on the Qualifying Paper. Special emphasis is placed on the development of effective oral presentation skills.

Class Format: symposium
Requirements/Evaluation: each student will present three practice runs and a final oral presentation at the symposium
Prerequisites: successful completion and acceptance of the Qualifying Paper
Dept. Notes: limited to and required of second-year students in the Graduate Program in the History of Art
Distributional Requirements: Division 1

Spring 2017
SEM Section: 01 TBA Instructor: Marc Gottlieb

ARTH 528(S) Icons
Crosslistings: ARTH 327/ECON 227/ARTH 527
How do museums acquire art? Factors considered in selecting objects include: the museum's existing collection, its mission, the availability of suitable objects, evaluation of the art historical importance of potential purchases, and the available budget. How can objects be identified and obtained at the most reasonable cost? How do auctions work and what strategies are best for purchasing works at auction? Is it more economical to purchase art at auction or to work with dealers or (for contemporary works) directly with artists? Do museums consider value in the same way as private collectors? What role does an object's history and condition play in the evaluation process? In this course students will work as teams to identify and propose objects for addition to the collection of the Williams College Museum of Art (WCMA). A significant budget will be made available for the acquisition. We will discuss the rationale for identification, acquisition and evaluation of objects. Student teams will be responsible for identifying a set of objects that would make appropriate additions to the WCMA collection, and a strategy for acquiring one or more of those objects. Working with the advice of WCMA curatorial staff, or promote of the project, these objects will be acquired using the agreed strategy, and the object will become part of the WCMA permanent collection. Graduate students will participate in all aspects of the class but may be required to undertake different assignments.

Class Format: seminar
Requirements/Evaluation: three papers of 10-15 pages each and class participation; student teams will make proposals for objects; each student will be required to submit three papers, dealing with the objects, the likely cost, and the best strategies for identification, acquisition and evaluation of objects.

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none
Enrollment Preferences: seniors majors in Art History, Economics and Political Economy; graduate students will be admitted only by permission of instructors
Enrollment Limit: 20
Expected Class Size: 20
Distribution Notes: meets Division 1 requirement if registration is under ARTH; meets Division 2 requirement if registration is under ECON
Distributional Requirements: Division 1

ARTH 528(S) Icons
Crosslistings: ARTH 428/ARTH 528
This seminar will explore the appearance and use of icons, the sacred images of the early Christian church, between the first century and the eighth century. Materials include panel paintings, ivories and mosaics. The goal of the inquiry is to examine the survival corpus of icons (about 75), consider how they functioned and the ways in which the artists who created them manipulated such formal elements as line, color and composition to create an image of the sacred.

Class Format: seminar
Requirements/Evaluation: preparation of readings, class participation, research paper (c. 20 pages), seminar report (c. 30 minutes)
about their various processes of transformation? How did changing philosophies and concepts of matter alter the concept of the artwork, particularly in globally-connected North Europe? What role (if any) was played by rediscovered antique texts about matter (Lucretius, etc.)? This seminar pivots on two questions: first, how did Renaissance artists and audiences understand the material constituents of their craft? And second, can we imagine an art-history of material today outside a rubric of blunt materialism? Material art history shouldn’t mean shucking hermeneutics or criticality. After all, going back to Heraklitos, what could be more "philosophical" than matter itself?

At the same time, the "scientific" scrutiny of artworks — using X-rays, infrared scanning, radiographic photography, chemical analyses, and dendrochronology — has long been a particular fetish of the study of Northern Renaissance art. The insights onto the artistic process these methods offer are indisputable. Yet aside from verifying (or undermining) claims to age, authorship, or condition of old artworks, it remains extremely unclear to many scholars what motives scientific examination — in many respects a solution without a clear problem — are addressing. Worse, such investigations often seem like advocacy for inferences of artistic intention — a concept viewed with skepticism by many historians today. Theorist’s "return to the object" turn in art history (a maneuver, since the 1980s, often rooted in Northern artworks) has showed possibilities, but also limitations. Durability — the reigning dictate of many lane-objects — poses specific challenges to narratives privileging stories of rupture.

Topics include: alchemy, the studio, early atomistic theories, restoration, authenticity, fakura, and "science."

Class Format: seminar
Requirements/Evaluation: active participation, short presentations; final paper
Enrollment Limit: 14
Expected Class Size: 14
Distributional Requirements: Division 1

Not Offered Academic Year 2017
SEM Instructor: Christopher Heuer

ARTH 551 Winslow Homer

In this seminar we will explore the life and art of Winslow Homer (1836-1910). Paintings, prints, watercolors, and photographs in the collection of the Clark and the Williams College Museum of Art will focus our discussions and provide the basis for understanding Homer’s art-making and his place within the art-culture of his day. A consideration of his subjects will necessarily intersect with many of the nation’s most pressing issues during his era: the Civil War and Reconstruction; the rise of middleclass leisure; the relation of art to the environment.

Class Format: seminar
Requirements/Evaluation: class discussion, weekly précis of the readings, two short papers, an oral presentation (and response to someone else’s), and a final research paper (20-25 pages)
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Enrollment Preferences: Graduate Program students and then to senior Art History majors
Enrollment Limit: 14
Expected Class Size: 8-12
Dept. Notes: satisfies the seminar requirement for the undergraduate Art History major
Distributional Requirements: Division 1

Not Offered Academic Year 2017

ARTH 552 The Enemies of Impressionism, 1870-1900

Crosslistings: ARTH 552/ARTH 404

This class explores French and European painting and sculpture of the last quarter of the nineteenth-century, particularly the work of artists once famous in their day but whose reputations collapsed with the rise of Impressionism and Modernism. Attention to aesthetic theory, pictorial narrative, and the formation of artistic taste. Artists include Gerome, Bouguereau, and Alma-Tadema.

Class Format: seminar
Requirements/Evaluation: readings and research paper
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Enrollment Preferences: none
Enrollment Limit: 14
Expected Class Size: 12
Distributional Requirements: Division 1

Not Offered Academic Year 2017
SEM Instructor: Marc Gottlieb

ARTH 554(S) The Matrix and the Market: Printmaking and Photography in the Nineteenth Century

In the last half of the 19th century, technical, commercial, and aesthetic approaches to printmaking and photography experienced dramatic paradigm shifts that have had a profound impact on the development of modern art. This seminar focuses on the technical and economic conditions that enabled artists — both amateur and professional — to produce and distribute their work, and the various strategies that they employed to promote themselves and their ideas. We will examine the materials and processes of printmaking — such as the invention of the lithographic process — and the way in which the development of photography helped shape artistic production and production. The seminar will also consider the relationship between printmaking and photography, and the ways in which these two technologies have influenced each other. Finally, we will look at the ways in which printmaking and photography have been used to challenge and resist social and political authority.
Photography, in turn, negotiated the boundaries between "documentary" and commercialism and raised the medium's status to a respected art form. Shifts. Etching, for example, simultaneously functioned as a reproductive printmaking and photographic matrix, critical responses to the various processes, art-driven initiatives, and the formative role of the art market and book trade in shaping popular opinion. We will consider these topics across political and geographic borders from Europe to the United States, reading both primary and secondary sources. The class will be held in the study room of the Clark's department of prints, drawings, and photographs, with visits to the Clark and Chapin libraries and the Williams College Museum of Art. 

Class Format: seminar
Requirements/Evaluation: students will be responsible for readings and involved class discussion; several short and one long presentation; and a final paper (20-25 pages)
Enrollment Preferences: Graduate Program students and then to senior Art History majors
Enrollment Limit: 12
Distributional Requirements: Division 1

ARTH 555(F) Ottoman and Orientalist Visual Culture

Crosslistings: ARTH 555/ARTH 455
Jean-Léon Gérôme’s famous painting, The Snake Charmer, at the Clark Art Institute will be our starting point for examining the connections between Ottoman and Orientalist visual culture in the modern period. Artists who were fascinated by the Near East (such as Gérôme, Ingres, Delacroix, Levillain, Renoir and Matisse) will be studied alongside Orientalist photography, international exhibitions, travel literature and film. This course encompasses diverse regional orientalisms (in Poland, Russia, Denmark, America and Australia) and the distinctive contribution of women artists. Western engagement with the Islamic world will be examined alongside contemporaneous Ottoman art, patronage and the visual culture of statecraft. We will consider Ottoman modernization as a context through which alternative images of the region were generated. The cultural and political significance of Orientalist visual culture will be critically analyzed through comparative study of French-trained Ottoman artists and their Orientalist mentors Gérôme and Boulanger.

Class Format: seminar
Requirements/Evaluation: each student will write one short midterm paper and a longer concluding essay, as well as present a couple of readings to the class
Extra Info: may not be taken on a pass/fail basis
Enrollment Preferences: places for 8 undergraduates and 8 graduate students assured
Enrollment Limit: 16
Expected Class Size: 16
Distributional Requirements: Division 1

ARTH 562 Art of California: Pacific Standard Time (D) (W)

Crosslistings: ARTH 462/AMST 462/LATS 462/ARTH 562
In this course, we will study the visual arts and culture of California after 1960 and consider the region’s place in modern art history. We will focus on a series of recent exhibitions organized as part of a Getty initiative entitled Pacific Standard Time. Diverse in scope, these shows explored important developments in postwar art in California, including feminist art, African American assemblage, Chicano collectives, Modernist architecture, craft, and queer activism. In this seminar, we will pursue research projects directly related to the art exhibitions we study, and examine southern California conceptualism, photography, performance, painting, sculpture (including assemblage and installation), and video by artists both canonical and lesser known. Student projects will analyze the critical responses to the exhibitions, while also exploring the role of archives, art criticism, and curatorial practice in contemporary art history. This course fulfills the Exploring Diversity Initiative requirement as it offers students a comparative study of cultures and societies and provides various interdisciplinary perspectives on the art and visual culture of a specific region.

Class Format: seminar
Requirements/Evaluation: evaluation will be based on several short writing and research assignments, oral presentations, class participation, and a final research paper of 16-20 pages written in stages over the course of the semester
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: ARTH 102
Enrollment Preferences: senior Art major and senior Latin/o Studies concentrators
Enrollment Limit: 15
Expected Class Size: 15
Distribution Notes: meets Division 1 requirement if registration is under ARTH; meets Division 2 requirement if registration is under AMST or LATS

Exploring Diversity Writing Intensive

ARTH 563(F) Contemporary Curatorial Workshop

Bi-weekly workshop for graduate students working on contemporary art and curatorial projects. Under the direction of the chair, students will present ongoing curatorial projects, undertake studio and site visits, host local and visiting curators for presentations, and explore key topics in modern and contemporary art and curatorial practice.

Class Format: seminar, meets all year; graded on a pass/fail basis
Prerequisites: graduate art students
Enrollment Preferences: only open to graduate students
Enrollment Limit: 25
Distributional Requirements: Division 1

Fall 2016
SEM Section: 01 Cancelled

ARTH 565(F) Aesthetics of Dissent in the Global Contemporary

What is protest art, and what are its aesthetic and conceptual strategies, visual markers, modalities, and effects? How does protest art correlate with a general modernity, modern and contemporary visual practice more generally, and how do we situate protest art in the larger narrative of the history of art? (Or should we?)

In order to address the question of what constitutes an art of protest, this MA-level course will engage with two disciplinary sub-fields not often put in direct dialogue: social art history and social movement mobilization theory; two disciplinary offshoots of the "cultural turn" in the humanities and political sciences developed in the 1970s and relevant today. Of central importance to art's salience in contemporary social politics is the ability of a self-contained expression to transmit information in excess of itself: to generate meaningful correspondence between singular and collective experience. What marks certain political struggles as singular and unique to specific groups and experiences, and what images or ideas link disparate conflicts productively together? What artistic practices can be demonstrated as instrumental to the creation and/or dismantling of political opportunities and social change? Art's status as an extra-political (as in outside politics) force in human society will be both challenged and substantiated in these investigations, as we examine the interrelationship of culture, representation, interpretation, visibility, space, and power in select global case studies, e.g.: the aesthetics of the Black Panther Party, the global anti-Vietnam War movement, women's spaces in revolutionary Iran, Tahrir Square circa 2011, Occupy Wall Street, and #BlackLivesMatter.

Class Format: seminar
Requirements/Evaluation: based on classroom discussion, several short (3-5 page) writing assignments & an original research paper (15-20 pages)
Extra Info: utilizing interdisciplinary bibliographic sources to interpret and evaluate the artistic properties & political products of a contemporary social movement
Enrollment Limit: 12
Distributional Requirements: Division 1

ARTH 567(F) What is Art Criticism? Current Debates, Past Precedents

Taking as its point of departure recent debates concerning a purported "crisis" of art-criticism, this seminar considers traditions of writing about the work of living artists in modernity. We will begin with current literature and then pivot back to the eighteenth century, tracing a sequence of episodes in art criticism’s evolution as a genre by looking at key works of art as mediated by their first critics. Emphasis will be placed on close readings of primary historical texts as prompts for thinking through the following broad questions, among others: What is critique, and what is art criticism? Is the art critic a judge, a historian, a partisan, a participant, or an artist in her own right? How do forms of distribution impact the content of art criticism, and how does art criticism impact the form and content of art? What is the relationship, if any, between taste, assessment of value, and interpretation of meaning? Artists considered include, among others, Boucher, Friedrich, Whistler, Seurat, Pollock, Piper.

Class Format: seminar
Requirements/Evaluation: two short writing assignments, twenty page final paper
Distributional Requirements: Division 1

ARTH 573(S) Modern and Contemporary Art from the Middle East and North Africa

Not Offered Academic Year 2017
SEM Instructor: C. Ondine Chavoya
This is an exciting time for art from the Middle East and North Africa. Contemporary artists are exhibiting in international shows and biennales, and the global art market has responded to collector interest and crowned its favorities. The visibility and celebration of these artists, however, does not take into account the larger historical arena of cultural production and artistic practice from which they emerge. In terms of the discipline of art history, the field of modern painting and contemporary visual practice in the region is in its first generation of formation and definition. Drawing on very recent scholarship in art history and visual anthropology, we will explore the “history” of modern and contemporary art in the Middle East and North Africa (from the 1920s–the present). We will pay particular attention to how key terms and categories such as: modern, contemporary, Islamic, and Arab, have been constructed, deployed and debated by artists, institutions and scholars in the field. We will explore the role of museums, art schools, archives and biennales in the region, the creation of art publics and communities, and how the international market has responded to contextual and historical considerations. And perhaps most importantly, we will study work by artists that identify with the region and engage and complicate constructions of race, gender, religion, environment, autonomy and community.

Class Format: seminar

Requirements/Evaluation: short response essays and a culminating research paper

Enrollment Preferences: graduate program students and then senior Art History and Arabic Studies majors

ASIAN STUDIES
(DIV I & II, see explanation below)
Chair: Associate Professor Li YU

The mission of the Department of Asian Studies is to help as many students as possible—both majors and non-majors—develop practical proficiency in Asian languages and, in the tradition of the liberal arts, acquire a meaningful understanding of important facets of one or more of the disciplines represented within Asian Studies (including anthropology, art history, economics, history, linguistics, literature, music, political science, religion, and sociology), so that they may realize their fullest intellectual and personal potential and be able to make useful contributions to society.

We offer courses in English in the field of Asian Studies as well as courses in Chinese and Japanese language, literature, and culture. Three distinct majors are offered: a major in Chinese; a major in Japanese; and an interdisciplinary Asian Studies major which allows students to choose from a wide range of courses in the anthropology, art, economics, history, languages, linguistics, literature, music, politics, religion, and sociology of China, Taiwan, Japan, and other Asian countries. In particular, an increasing number of courses on South Asia are offered (e.g. ASST 117, ASST 221, ASST 244, ASST 246T, ASST 248, ASST 252, ASST 256, ASST 391, ASST 415, ASST 424, ASST 431, ASST 488). Students with questions about the Asian Studies majors or about Asian Studies course offerings should consult the chair.

Please note: Courses with ASST prefix carry Division II credit unless otherwise noted and courses with CHIN and JAPN prefixes carry Division I credit unless otherwise noted.

THE MAJOR

All students wishing to major in the Department of Asian Studies are required to take and pass a total of eleven courses, as follows:

One course that explicitly compares at least two countries in Asia, such as ASST 103, ASST 126, ASST 245, ASST 248, ASST 250, ASST 256, ASST 271, ASST 391, ASST 414, ASST 424, ASST 431. Or students may take instead a course on a country that is different from their country of primary focus.

Four semesters of Chinese or Japanese language (including no more than two 100-level courses).

In addition to completing (1) and (2) above, all majors choose either an Area Studies track, leading to a major in Asian Studies; or a Language Studies track, leading to a major in Chinese or Japanese. The requirements for each of these tracks are indicated below:

Asian Studies Major

Three-course qualification in one of the disciplines represented within Asian Studies (anthropology, art history, economics, history, linguistics, literature, music, political science, religion). The qualification, to be determined through consultation between students and their advisor, normally includes an introductory course and more advanced courses. At least two of these three courses must be on Asia.

Three approved electives, which may include further language work

Chinese Major

Four additional semesters of Chinese language (300-level or higher)
One semester of introduction to Classical Chinese
One approved course in Chinese literature, linguistics, or culture

Japanese Major

Four additional semesters of Japanese language (300-level or higher)
One approved course in Japanese language (400-level), literature or culture
One approved elective on Japan

STUDY ABROAD

Students intending to major in Asian Studies are encouraged to study in Asia during one or both semesters of their junior year. Williams faculty serve on the boards of several study abroad programs in China and Japan. Opportunities to study in India, Indonesia, Korea, Taiwan, Thailand, and other Asian countries are also available. Prospective Asian Studies majors who are planning to study abroad should discuss their plans with their advisor as far in advance as possible. Up to eight courses taken overseas can count toward graduation, and up to four courses taken off campus may be counted toward the major. You can find general study away guidelines for Asian Studies here.

THE DEGREE WITH HONORS

Students interested in writing an honors thesis in Asian Studies, Chinese, or Japanese should submit a proposal to the department chair before they pre-register for senior courses in the spring of their junior year. The proposal should include a statement of the topic, a general description of the types of materials available for study and how the study will be carried out, and the name of the faculty member who will serve as advisor. Admission to the honors thesis program will normally be limited to students who have maintained at least a B+ average in their courses for the major. Students admitted to the program should register for ASST 493-W31-494, or JAPN 493-W31-494, or JAPN 493-W31-494. T117 will be expected to turn in the final draft of their thesis shortly after spring break and to discuss their results formally with their faculty graders. Their final grades in the three courses listed above and the award of Honors, Highest Honors, or no honors will be determined by the quality of the thesis and the student’s performance in the oral defense.

THE ASIAN STUDIES ENDOWMENT

The Linen summer grants for study abroad, the Linen visiting professorships, and several other programmatic activities in the department are supported by an endowment for Asian Studies established by family and friends in memory of James A. Linen III, Class of 1934, Trustee of the College from 1948 to 1953 and from 1963 to 1982. ASST 103(S) Asian Art Survey: From the Land of the Buddha to the World of the Geisha (D)

Crosslistings: ARTH 103/ASST 103

This course introduces to students some of the most enduring masterpieces of Asian art with an emphasis on the art of India, China, and Japan. Its contextual approach helps students gain insight into the aesthetic, religious, and political ideas and cultural meanings conveyed by the works of art. It also provides students with the vocabulary, techniques, and patterns of thinking needed for advanced art history courses.
Highlights include sexual symbolism in Hindu and Buddhist art; nature or landscape painting as moral and political rhetoric; the sex industry and kabuki theatre and their art in Edo Japan; and the meeting of the Eastern and Western art. This course is one of the three foundational courses; art history majors may choose any two of the three courses Arth 101, Arth 102, and Arth 103 to fulfill the foundational requirements.

As an EDI course, its historical, visual, and thematic analyses will bear upon the interconnectedness not only among these three distinctively different cultures, but their respective interactions with the West.

Class Format: lecture
Requirements/Evaluation: evaluation will be based on three quizzes, two short papers, film screening and class attendance
Extra Info: may not be taken on a pass/fail basis
Prerequisites: none; highly recommended for first-year students
Enrollment Preferences: none
Enrollment Limit: 90
Dept. Notes: can be taken with either ARTH 101 or ARTH 102 as the foundational requirement for the Art History route to the major

ASST 115 The World of the Mongol Empire (W)
Crosslistings: HIST 115/ASST 115

By the middle of the thirteenth century, Mongol armies led by Genghis Khan had conquered an enormous swath of territory, extending from China westward to Eastern Europe. Further expanded by Genghis’s descendants, the Mongol Empire incorporated a vast range of different peoples, cultures, enhancing communications, trade, and exchange among them. In this course we will examine the “world order” of the Mongol Empire from its origins on the Asian steppe through its expansion, consolidation, disintegration, and legacies for later periods. From a wide range of primary and secondary sources, including travelers’ accounts, chronicles, art, and literature, we will investigate the diverse experiences of the Mongol world in different places, such as China, Russia, Persia, and Central Asia.

Class Format: seminar
Requirements/Evaluation: evaluation will be based on class participation, several short papers, and a final research paper
Extra Info: not available for the fifth course option
Prerequisites: first-year or sophomore standing; juniors or seniors with permission of instructor
Enrollment Preferences: first-year students and then sophomores who have not previously taken a 100-level seminar
Enrollment Limit: 19

ASST 117 Bombay/Mumbai: Making of a Modern Metropolis (W)
Crosslistings: HIST 117/ASST 117/GBST 117

Bombay or Mumbai is India’s foremost urban center and is well known today as a truly global city. It is the heart of India’s commercial life comparable in vibrancy and multiculturalism with the world’s emerging cities like Shanghai, Hong Kong and Sao Paulo. What are the historical moments that contributed to the making of India’s most modern and global metropolis? What are the antecedents of the modernity, the vibrant culture, dark underbelly and economic diversity that characterize Bombay today? What does the history of Bombay tell us about modernity in India and the emerging countries of the third world in general?

This seminar will help students to answer these questions through historical materials on Bombay as well a wide range of multimedia sources including cinema, photography and literature. With a focus on the 19th and 20th centuries, we will explore themes like the commercial culture of a colonial port city, the modern public sphere, theatre and film, labor migration, public health and prostitution to understand what went into the making of this modern metropolis.

The primary objective of this course is to introduce students to a wide range of historical sources and ways of interpreting them. The other objective is facilitating their understanding of the history of modern India through the history of its most important city.

Class Format: seminar
Requirements/Evaluation: assessment will be based on class participation and weekly responses to readings, 2-3 short papers, leading to an oral presentation and final paper
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: first-year or sophomore standing

Enrollment Preferences: first-year students, then sophomores
Enrollment Limit: 19

ASST 121(F) The Two Koreas (W)
Crosslistings: HIST 121/ASST 121

The two Koreas—North and South—were born in the aftermath of World War II, when the United States and the Soviet Union arbitrarily divided the peninsula into two zones of occupation at the 38th parallel. Today, over six decades later, the split endures as what has been called “the Cold War's last divide.” This tutorial examines the history of the two Koreas from their creation in 1945 to the present. We will explore the historical and ideological origins of the division; how tensions between North and South led to the outbreak of the Korean War; why the paths of the two Koreas have differed so markedly; how each country has been shaped by its political leaders and their ideologies; and what recent developments in North Korea, including its nuclear program, have meant for relations on the peninsula and beyond. Course material will include primary and secondary sources of various kinds, including political documents, intellectual treatises, films, and short stories.

Class Format: tutorial
Requirements/Evaluation: students will meet with the instructor in pairs for an hour each week; a student either will write and present orally a 5- to 7-page essay on the assigned readings or will be responsible for offering an oral critique of their partner’s work
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: first-year or sophomore standing; juniors or seniors with permission of instructor
Enrollment Preferences: first-year students, and then sophomores who have not previously taken a 100-level seminar

TUT Section: T1 TBA Instructor: Eiko Siniawer

ASST 126 Musics of Asia (D)
Crosslistings: MUS 112/ASST 126

This course offers an introduction to the great diversity of Asian music. Our survey will span from East Asia (China, Korea, and Japan) to Southeast Asia (Thailand and Indonesia) to the Indian subcontinent, Central Asia (Tibet and Afghanistan), to the Middle East (Iran and the Arabian peninsula), and will end with the extension of Asian music across North Africa and into Eastern Europe. Within this broad survey, we will focus on selected and representative musical cultures and genres. In each section of the course, aspects of cultural context (including music’s function in religious life and its relationship to the other arts), will be emphasized. While our focus will be on the traditional and classical musics of these cultures, we will also briefly consider the current musical scene. Encounters with this music will include attendance at live performances when possible.

This course satisfies the EDI requirement by exploring how the diverse musical traditions of Asia are shaped by radically different religious beliefs and social norms and by demonstrating how various Asian cultures can be understood through their musical traditions. Much of the music we will encounter presents aesthetics and cultural norms that differ radically from mainstream Euro-American cultural practices. To engage with these traditions students must attempt to place themselves within different cultural frameworks, to hear music that they may find shockingly foreign with a different set of ears.

Class Format: lecture/discussion
Requirements/Evaluation: evaluation will be based on four tests and two papers
Prerequisites: none; no musical experience necessary
Enrollment Limit: 25
Expected Class Size: 20

Class Format: changing form and function of the book interact across its long and diverse
works of art to ephemeral trash, they have been public and private, sacred
and profane, magical and commonplace. Likewise, notions of the book have
influenced every subsequent form of communication and transmission,
whether we are browsing film and song "libraries" or "scrolling" down "pages"
on the web. This course will explore aspects of the material, social, cultural,
and intellectual history of the book, from the invention of the earliest writing
systems through the modern development of digital media. Our inquiry will
span the globe and the millennia, but we will pay special attention to the
ancient and medieval era, Grek, and Latin traditions and their enduring
influence in the modern world. Topics will include orality and literacy,
manuscript production, the invention and spread of printing, typography,
reading culture, notions of authorship, libraries and collections, censorship,
and the digital book. We will examine a variety of readings, hands-on exercises, and
interactions with our abundant library resources, we will investigate how the
changing form and function of the book interact across its long and diverse
history. All readings are in translation.

ASST 212(F) Transforming the "Middle Kingdom": China, 2000 BCE-1600 (D)
Crosslistings: HIST 212/ASST 212
China expanded from scattered Neolithic settlements to become one of the world's most complex and sophisticated civilizations. During this process, it experienced dramatic transformation as well as remarkable institutional and cultural continuities. This course will examine Chinese history from prehistoric times to the "early modern" seventeenth century. It will address topics such as the creation and transformation of dynastic authority, the reinterpretation of Confucian thought, the transmission of Buddhism, the conquest of China proper by "barbarian" peoples, the composition of elites, and change in daily life, popular culture, and gender roles. This course fulfills the Exploring Diversity Initiative requirement in that it engages with questions of difference through studying the development of the modern Chinese nation-state from the multi-ethnic empire of the Qing and China's particular experiences of imperialism in the nineteenth and twentieth centuries.
Class Format: lecture/discussion
Requirements/Evaluation: evaluation will be based on class participation, two short papers (5 pages), and a final paper (10 pages) or self-scheduled final exam

ASST 219(S) Japanese Culture and History from Courtiers to Samurai and Beyond (D)

Crosslistings: HIST 219/COMP 229/ASST 219/JAPN 219

This course will introduce students to the history, literature, and artistic culture of premodern Japan, from the time of the first recorded histories in the 800s through the abolition of the samurai class in the late 1800s. We will focus on the politics and aesthetic culture of the ruling elites in such periods, from the heyday of the imperial court through the rise and eventual decline of the samurai warrior and the growth of Edo (Tokyo), with its new mode of early modern government and new forms of literature, theater, and art. Team taught by faculty from History and Comparative Literature, the course will examine historical texts alongside works drawn from literature, visual culture, and performing arts, and will ask students to consider how these different kinds of texts can shed light on one another. What is the difference between reading history and reading literature, or is it even meaningful to distinguish the two? By critically engaging in various kinds of textual analysis, this EDI course not only considers the relationship between politics, culture, and society in premodern Japan but also explores how we can attempt to know and understand different times and places. Primary texts will include court diaries, war tales, and fiction; laws and edicts; essays and autobiographies; noh, kabuki, and puppet theater; and tea ceremony, visual art, and architecture. Students should register under the prefix specific to the Division in which they want to receive credit.

Class Format: lecture/discussion

Requirements/Evaluation: evaluation will be based on class participation, response assignments, two short papers (approximately five pages each), and a final exam

Extra Info: may not be taken on a pass/fail basis

ASST 221 The Making of Modern South Asia: 1750-1950 CE

Crosslistings: HIST 221/ASST 221/GBST 221

This course focuses on the history of South Asia with the aim of providing an overview of the political and social landscape of the region from the end of the Mughal Empire through British colonial rule and the Partition of India and Pakistan.

We will explore a range of themes including the rise of colonialism, nationalism, religion, caste, gender relations, and the emergence of modern social and political institutions on the subcontinent. In addition to reading key texts and historical primary sources on the specific themes, we will also work with a variety of multimedia sources including films, short stories and website content.

One objective of this course is to introduce students to the different political and social processes that led to the creation of India, Pakistan and Bangladesh; another is to teach students to think critically about the significance of history and history writing in the making of the subcontinent.

Class Format: lecture/discussion

Requirements/Evaluation: class participation, response papers (2-3 pages), two short essays (4-5 pages), midterm and final exams

Prerequisites: none; open to all

Enrollment Limit: 40

ASST 222 History and Society in India and South Asia: c. 2000 to 1700s

Crosslistings: HIST 220/ASST 222

This course is an introduction to the history of India and South Asia from prehistoric times to the emergence of early modernity. During these centuries, the subcontinent emerged as one of the most diverse and complex regions of the world, as it continues to be even today. The course will cover the period between the rise of the Indus Valley civilization to the end of the Mughal Empire and will address topics such as the “discovery of India”, the coming of the “Aryans”, society and culture in the great epics like the Ramayana, the beginnings of Jain and Buddhist thought, politics and patronage under Islamic polities, the formation of Mughal imperial authority through art, architecture and literature, among others. Through the study of social processes, the course will focus on the diversity and connectedness of regions that have defined the subcontinent throughout its history. It will also consider the role of history in the region and how a number of events from the past continue to inform its present.

Class Format: lecture/discussion

Requirements/Evaluation: class participation, response papers and presentation, 2 essays, a mid-term and a final exam

ASST 230(S) The Temple in South Asia (D)

Crosslistings: ARTH 230/ASST 230

Towering over urban expansions and secluded forests, or turning up on roadside corners and narrow back alleys, temples occupy a crucial place in the physical and sacred landscape of South Asia. At once meeting places for diverse communities, markers of piety and power, and architectural and sculptural wonders, temples are where artistic practice, devotion, and political and social aspirations come together. This lecture course explores the history, forms, and meanings of South Asian temples both as important works of architecture and centers of religious and social activity. Through topics such as ritual and sacred space, pilgrimage, architecture and symbolic cosmology, and the politics of architectural reuse, we will develop a multifaceted understanding of the temple in South Asia.

Class Format: lecture

Requirements/Evaluation: midterm and final exams; one 4- to 5-page paper, and one longer final paper (8-10 pages)

Not Offered Academic Year 2017

LEC Instructor: Sarah Penney
Crosslistings: ANTH 233/ASST 233/REL 235
No region of the world presents a richer tapestry of religious beliefs, practices, and institutions than Southeast Asia. Buddhism, Hinduism, Christianity and Islam are all to be found and all of them interpenetrate and contend with each other and with a deep undergirding of animism, shamanism, and mystical folk belief systems. This course will survey these religious traditions through time and space, looking in particular at the growing tension between religion and the state as fundamentalism and religious militancy have spread into the region in recent times. All of Southeast Asia will be covered, but particular attention will be devoted to Indonesia, where religious blending and the growth of new fundamentalism are both especially marked.

Class Format: seminar

ASST 243(F) Red Chamber Dreams: China's Greatest Novel as Literature and Legacy

Crosslistings: COMP 245/ASST 243

The eighteenth-century novel Dream of the Red Chamber, also known as Story of the Stone, is widely regarded as China's greatest novel due to the intricacy of its narrative and the sophistication with which it deals with themes as varied as romance, enlightenment, sexuality and gender identity, and the construction of public and private spaces. We will read the novel through a variety of critical approaches, addressing it both as a work of literature and as a cultural phenomenon.

Class Format: seminar

Requirements/Evaluation: three 2-page papers, one 5-page paper, and a final 6- to 7-page paper

ASST 244 Mind and Persons in Indian Thought

Crosslistings: REL 244/ASST 244

In this course, we follow the conversation among Indian philosophers concerning the self and the nature of consciousness. We start with some of the Hindu views about the self and the mind and consider their ethical implications. We then consider a range of Buddhist critiques of these views, focusing more particularly on the Madhyamaka philosophy, which radicalizes the critique of the self into a global anti-realist and skeptical stance. We also examine the Yogacara school, which offers a process view of reality focusing on the analysis of experience. We conclude by considering some of the later Hindu holistic views of the self as responses to the Buddhist critique. In this way we come to realize that far from being the irrational foil of "the West," Indian tradition is a rich resource for thinking through some of the central ideas that have challenged philosophers in both traditions.

Class Format: lecture/discussion

ASST 245(T) Nationalism in East Asia (D)

Crosslistings: PSCI 354/ASST 245/HIST 318

This tutorial examines the theoretical literature on nationalism, and then uses insights from those readings to study of the emergence and development of modern nationalist movements and national identities in China, Japan, Korea — both South and North — and Taiwan. It is an Exploring Diversity Initiative course and, as such, engages in explicit and critical cross-cultural comparisons, asking how theories of nationalism developed largely from European history might need to be revised when applied to East Asia, and how experiences of nationalism and expressions of national identity vary within East Asia.

Class Format: tutorial

Requirements/Evaluation: two 5-page papers, class participation, final exam

ASST 246(T) India’s Identities: Reproducing the Nation, Community and Individual (D)

Crosslistings: REL 246/ANTH 246/WGSS 246/ASST 246

This course considers India’s contradictory legacy as a booming Asian democracy and fragile society built upon deep and enduring divisions. Why is India’s growing population so often described in terms of multiple identities or fragmenting oppositions — Hindu/Muslim, rich/poor, high caste/outcaste, male/female? What are the historic roots and ongoing causes that produce structural violence around these axes of difference? We pay particular attention to key moments (Partition, communal riots in Gujarat in 2003, Hyderabad in 1990, Delhi in 1984), and places (Punjab, Bengal, Jammu & Kashmir) for our analysis of how religion, gender, and caste intersect to produce a landscape of communal violence, social hierarchy, and fragmented subjectivity in India today. We are as interested in discourses and practices that shore up these binaries as well as the third terms that attempt to transcend or diffuse them. For instance, we look at how Buddhism is and is not a middle path between Hindu/Muslim conflict in Indian Kashmir. Our course readings include ethnographic, sociological, and historical analyses, as well as oral histories and popular media. This course fulfills the Exploring Diversity Initiative by theorizing the ways that difference has been used to effect profound historical & social changes in India.

Class Format: tutorial

ASST 247 Tibetan Civilization (D)

Crosslistings: REL 245/ASST 247

Tibet is depicted as exotic, mythological and ideal country. Tibet has had the dubious privilege of being a focus of Western fantasies. One cannot but wonder about the motives and sources of this mythology. Although this course examines these representations, its main focus is an immersion in the cultural and historical aspects of Tibetan civilization, which give students the tools with which to understand Tibetan culture from the inside. As such this course is part of the Exploring Diversity Initiative. We first consider the early history of Tibet, the introduction of Buddhism, the relations between Buddhism and the indigenous religion, and some of the stages in the development of Tibetan Buddhism. We also examine the historical developments that led to the development of the institutions (such as the Dalai-Lama) unique to Tibet and some of the aspects of the culture that these institutions helped to create (such as gender roles, family structure and social stratification). Finally, we consider the more recent tragic events and examine the profound transformations that they have brought. Throughout the course, we consider the central role of the complex interaction between Buddhism and politics in Tibetan history both in the pre-modern period and in more recent times, when the Tibetan people have faced the challenge of how to use their institutions and culture to resist oppression. In this way, we get a footing in the Tibetan world, and the indispensable assessment of Western representations of Tibet becomes not just an exercise in self-reflection but also a gate to a better understanding of a remarkable but tragically threatened civilization. This course, which explores in depth Tibetan cultural and the tragic cross-cultural misunderstandings that threaten its integrity, is part of the Exploring Diversity Initiative.

ASST 248 Body Politics in South Asia: Gender, Sex, Religion, and Nation (D) (W)
Crosslistings: REL 248/ASST 248/ANTH 248/GWS 249/GBST 248

This course examines the relationship between body, gender, sex, and society in South Asia, using three countries and religions—India, Sri Lanka, and Bangladesh—and Buddhism, Hinduism, and Islam—as its foil. The course uses the body as a lens by which to unpack South Asian discourses that link body and sexuality with nation, community, and population. In particular, it explores a South Asian sociology that links individual and social bodies in ways that occasion solidarity as well as social suffering, violence as well as communal cohesion. How do bodies come to signify the purity or prosperity of the nation or community and with what social or discursive effects? We begin by unpacking foundational theories of the body as proposed by Mauss, Foucault, Douglas, and Bourdieu in order to better understand how local discourses of the body help produce gender and other social hierarchies in South Asia. By considering how the human body can serve as a map for society and vice versa, we examine both classical discourses and modern institutional practices of the body including the temple, the monastery, the mosque, and the mendicant, as well as bodily practices such as yoga, celibacy, sex work, and new reproductive technologies. We also analyze how the body has served as a symbol of nation, community, and social health. Throughout, we are interested in the cross-cutting effects of gender and sex in perpetuating structural hierarchies and social suffering around the body in South Asia.

Class Format: seminar

ASST 250 Scholars, Saints and Immortals: Virtue Ethics in East Asia (D)
Crosslistings: REL 250/ASST 250

In East Asian cultures, as in the United States, popular conceptions of morality typically take their shape, not from explicit rules, but from moral paragons—stylized figures that are said to embody a distinctive cluster of virtues. For example, American Christians invoke not only Jesus, but also a pantheon of "secular saints" as diverse as Martin Luther King Jr. and General Patton, George Washington and Cesar Chavez. This course will explore the cultural functions of moral paragons and philosophies of virtue in East Asia by introducing students to examples from Chinese and Japanese history, ranging from Confucian articulations of the ideal scholar-bureaucrat to Buddhist conceptions of the Bodhisattva to Taoist immortals. It will also address the history of ethical thought in East Asia, focusing particular attention on conceptions of "Virtue Ethics." This approach has come to be seen by some contemporary analytic philosophers as a way out of the impasse produced by ethical relativism and the loss of theological rationales for moral action. Readings will include Euro-American philosophers such as Nietzsche and MacIntyre as well as primary texts in translation by Chuang-tzu, Confucius, Shantideva, and others. This course fulfills the Exploring Diversity Initiative by providing students with tools for cross-cultural analysis of ethics and moral paragons, as part of how societies manage difference and articulate hierarchies of privilege and power.

ASST 251 Zen Buddhism: History and Historiography
Crosslistings: REL 251/ASST 251

Because mystifying references to Zen are strewn throughout American popular culture—from episodes of the Simpsons to names of perfumes and snack foods—most Americans have an image of Zen Buddhism that is disconnected from anything actually practiced in East Asia. This course offers a corrective to this image by familiarizing students with both the history of Zen and the historiographical roots of these popular perceptions. This course will examine the origins of Zen (Ch’ an) in China, trace its transmission to Japan, and cover its development in both cultural contexts. It will conclude with an examination of Zen’s unique role in American popular culture. The course will enrich the conventional image of Zen by addressing its involvement with power and governance, gods and demons, mummies and sacred sites, sex and violence, nationalism and scholarship. Texts will include selections from primary works in translation (The Platform Sutra of the Sixth Patriarch, The Gateless Barrier, The Lancel of Seated Meditation) as well as selections from secondary literature including Suzuki, Zen and Japanese Culture, Victoria, Zen at War, and Philosophies of Immediacy.

ASST 252 Zen Buddhism: History and Historiography
Crosslistings: ARTH 251/ASST 252

This course is an introduction to the history of art in the Indian subcontinent from ca. 300 B.C. to the present. We will explore the wide range of artistic production in South Asia, including painting, manuscripts, sculpture, and architecture, and examine the developments in their style, production technique, and subject matter within specific social, historical, and cultural contexts. The Indian subcontinent has been home to multiple artistic, religious, and philosophical traditions, including Buddhism, Jainism, Hinduism, and Islam, and a special emphasis will be placed on the ways in which artists, patrons, and audiences have negotiated their encounters with the diverse cultural practices within and beyond South Asia. Topics include ritual and technological space; architectural reuse and appropriation; art as propaganda; miniature painting and courtly culture; trade and circulation of art objects. Students will learn the skills of visual analysis and interpretation, and become familiar with the different approaches art historians have taken to understand the development of South Asian art. In addition to lectures, the class will make use of the collections at the Williams College Museum of Art to provide firsthand experiences with South Asian art objects. No background in Asian or South Asian art is necessary for the successful completion of this course. This course fulfills EDI requirements through its exploration of the intercultural dialogues in South Asian art through the transmission of ideas, objects, and people, and the economic and political dynamics that facilitated such movements.

ASST 255 Buddhism: Ideas and Practices
Crosslistings: REL 255/ASST 255/ANTH 255

This course introduces students to Buddhism by examining its ideas and practices as they have taken place in actual social contexts rather than as disembodied textual objects. After examining the main ideas and narratives of the tradition, we turn our attention to Thailand where we examine how these ideas and narratives have shaped a whole range of practices, from meditation to shamanistic rituals. We then consider the transformations that Buddhism is undergoing in contemporary society, examining the rise of meditation movement, the changing role of monks and lay, the resurgence of the nun order, the rise of Buddhist social activism and the development of new Buddhist social philosophies. We think questions such as: How can Buddhism adapt to a modern global consumerist society? What are the transformations involved in this process and the role that Buddhism can play in such a global society? Should Buddhists take advantage of the opportunities of this new global culture or should they adopt a critical stance toward its consumerist values?

Class Format: lecture/discussion

asst 256 engendering buddhism: how women and men shape and are shaped by buddhism (w)
crosslistings: rel 256/wgss 256/anth 256/asst 256
this course looks at how gender has shaped buddhism as well as how buddhism has shaped gender. most generally, it considers the myriad ways that buddhist soteriology and practice produce the very gender differences they purport to overcome. how have the buddha and his far-flung disciples institutionalized and gender differences in spite of their putative goal of transcending duality? we examine the varying experiences of women and men in buddhist societies and literatures as a lens by which to analyze the pervasive operation of social and gender hierarchies. last but not least, we discuss how well feminist and american revisions of buddhism have transformed gender and other forms of difference. our analysis revolves around several interdependent themes. (1) how do female and male bodies become the subject of a specific set of buddhist gazes? what does buddhist discourse say about the possibility of gaining enlightenment in the female body? (2) how do gender divisions reflect deeper social divisions such as class and race in buddhist discourse? (3) how have feminist deconstructions of buddhism transformed gender and social hierarchies in the contemporary world? this course fulfills the exploring diversity initiative by seeking to theorize the ways that buddhism has produced and reinscribed gender differences and social hierarchies.

asst 268(f) chinese art and culture: from imperial treasures to contemporary visions (d)
crosslistings: arth 268/asst 268
this course introduces to students some of the major artistic traditions and trends from the dawn of chinese civilization to the present. highlights include ancient bronze vessels commissioned by the royal house and the mysteries and scholarly debates surrounding their fantastic surface décor; how the teachings of different buddhist schools and sects are visualized for the attainment of nirvana; how nature or landscape painting was used as religious, moral, and political rhetoric; the relationship between words and images; the way in which chinese artists represent space and the external world in contrast to the european approaches that use the one-point perspective technique in picture making; how china’s encounters with foreign cultures and their arts in different times in history have contributed to the development of chinese culture and artistic trends, including 20th social realism made during communist china’s cultural revolution; and how some contemporary chinese artists show their defiance against tradition, using traditional chinese visual imagery, while some try to achieve shock value in their art, forcing the viewer to confront the positive and negative influences of western art theories on contemporary chinese artworks. the course's contextual approach helps students gain insight into the aesthetic, religious, and political ideas and cultural meanings conveyed by the works of art. it also provides students with the vocabulary, techniques, and patterns of thinking needed for advanced art history courses. this course fulfills the ed initiative in that its historical, visual, and thematic analyses will bear upon not only the interconnectedness between chinese culture and the distinctively different cultures of india, korea, and japan, but china's respective interactions with other cultures in the middle east and west.

asst 284 introduction to asian american history (d)
crosslistings: hiat 284/asst 284
this course serves as the introduction to asian american history, roughly covering the years 1850 to the present. it examines the lives of chinese,
Japanese, Koreans, Filipinos, Indians, and Southeast Asians in America, and the historical reasons why they came to the US and their subsequent interactions with other ethno-racial groups in the United States. Topics include the anti-Asian exclusion movements, the wartime incarceration of Japanese Americans, the increase of Asian immigration after the 1965 Immigration Act and the war in Vietnam, and the impact of the events of September 11, 2001 on Asian American communities. These themes and others will be explored through the use of historical texts, primary documents, novels, memoirs, and films. This is an EDI course because it examines how people from different Asian countries and cultures interacted with each other and those already here in the US. There is a story of immigration, exclusion, resistance, accommodation, and claims of "becoming American."

**Class Format:** lecture/discussion

**Requirements/Evaluation:** evaluation will be based on four response papers, two short critical essay (5-7 pages) and a final oral history/family history of an Asian American (10-15 pages)

**ASST 317 Gender Construction in Chinese Art (D) (W)**

**Crosslistings:** ARTH 317/ASST 317/WGSS 318

"One is not born, but rather becomes a woman"—Simone de Beauvoir This course will investigate how gender as a cultural and social construction is visualized in Chinese art. Issues of interest include how gendered space is constructed in Chinese painting; how landscape paintings can be decoded as masculine or feminine; and ways in which images of women help construct ideas of both femininity and masculinity. This course will also discuss Confucian literati's [ideals] of reclusion and hierarchal; didactic art for women; images of concubines, courtesans; and lonely women's isolation and abandonment. For example, while nature is often seen as feminine, Chinese landscape painting may be coded as masculine due to its association with the Confucian scholar-officials of eremitism, a means for the cultivation of the mind, and homoeroticism. On the other hand, the placement of a masculine landscape in feminine space may be seen as rhetorical strategy, accentuating the lonely woman's isolation and abandonment, which are important tropes in Chinese erotic poetry as well.

This course fulfills the EDI requirement in that it is designed to enable students to study the logic of gender and sexuality in a context different from their own; to see how both genders are constructed in relation to each other, and how they interact in the context of class, ideology, politics, and ideas, as well as how we may compare their representation in China with those of other cultures, notably Japan and the West. Using both visual art and literature, this course also challenges the gender stereotyping that still exists in current scholarship.

**Class Format:** seminar/discussion

**Requirements/Evaluation:** a series of 2-3 page position papers; one 3-4 page 1st oral presentation write-up; one 4-5 page pre-focus/focus paper for exploring the final paper topic; 2 oral presentations; a 12-15 page final research paper; class discussions; class attendance

**ASST 319 Gender and the Family in Chinese History (D)**

**Crosslistings:** HIST 319/WGSS 319/ASST 319

Although sometimes claimed as part of a set of immutable "Asian values," the Chinese family has not remained fixed or stable over time. In this course, we will use the framework of "family" to gain insight into gender, generational, and sexual roles in different historical periods. Beginning in the late imperial period (18th-19th Centuries), we will examine the religious, marital, sexual, and childrearing practices associated with the "orthodox" Confucian family. We will then explore the wide variety of "heterodox" practices in imperial China, debates over and critiques of the family system in the twentieth century, and configurations of gender and family in contemporary China. As an EDI course, this class makes use of anthropological and gender studies methods to analyze both the specifics of Chinese ideas and practices regarding family, gender and sexuality as well as the considerable variety among these ideas and practices at different points in time.

**Class Format:** lecture/discussion

**Requirements/Evaluation:** evaluation will be based on class participation, several short papers, and a final paper

**Extra Info:** not available for the fifth course option

**Prerequisites:** none; open to first-year students with instructors permission

**ASST 321 History of U.S.-Japan Relations (D)**

**Crosslistings:** HIST 321/JAPN 321/ASST 321

An unabating tension between conflict and cooperation has been an undercurrent of U.S.-Japan relations in the past 150 years, at times erupting into clashes reaching the scale of world war and at times allowing for measured collaboration. We will explore the U.S.-Japan relationship from the perspectives of both countries with a focus on how culture, domestic concerns, economic and political aims, international contexts, and race have helped shape its course and nature. This course will fulfill the requirements of the Exploring Diversity Initiative by examining not just the diplomatic relationship between the United States and Japan, but also how various types of interactions have influenced the dynamics of power between these two countries and have shaped the ways in which each country has understood and portrayed the other. Topics will include early U.S.-Japan encounters; the rise of both countries as imperial powers; the road to, and experience of, World War II; the politics and social history of the postwar American occupation of Japan; the U.S.-Japan security alliance; trade relations; and popular culture. Contemporary topics will also be discussed.

**Class Format:** lecture/discussion

**Requirements/Evaluation:** evaluation will be based on class participation, response papers, two short papers (5 pages), and a self-scheduled final exam or research paper

**Prerequisites:** none; open to first-year students with instructors permission

**Enrollment Limit:** 25

**Expected Class Size:** 25

**ASST 337 Zen and Philosophy: The Kyoto School and its Legacy in Japanese Thought**

**Crosslistings:** REL 337/ASST 337/COMP 337

Popularly regarded as the most important philosophical movement in modern Japanese history, the Kyoto School creatively marshaled the resources of Chinese, Japanese, and European thought. After providing some brief background in Japanese Buddhism to address the impasses of Western philosophy to startling effect. Although the members of the Kyoto School were not all of one mind, their shared aims were ambitious: to bridge the dualism between subject and object, to overcome nihilism, to explore the implications of absolute nothingness, and to surmount what they saw as the chasm between Japanese and European thought. After providing some brief background in Japanese
Buddhism, we will read the writings of the core thinkers of the Kyoto School: Nishida Kitaro, Tanabe Hajime, Nishitani Keiji, and some of their later protégés. Thematically, we will explore issues in ethics, epistemology, phenomenology, metaphysics, and the philosophy of religion; and demonstrate the continued relevance of their insights in these areas. Finally, we will reflect on the group’s engagement with Japanese nationalism. All readings will be in translation.

Class Format: seminar

Requirements/Evaluation: regular participation and attendance, regular short writing assignments, 10- to 15-page final paper

Prerequisites: none, but previous coursework in Religion, Comparative Literature, Political theory, and/or Philosophy is strongly recommended.

Enrollment Preferences: Religion, Asian Studies, and Comparative Literature majors

Enrollment Limit: 15

Expected Class Size: 15

Distribution Notes: meets Division 2 requirement if registration is under REL or ASST; meets Division 1 requirement if registration is under COMP

Distributional Requirements: Division 2

Not Offered Academic Year 2017

ASST 341(S) Caste, Race, Hierarchy (D)

Crosslistings: ANTH 341/AFR 341/ASST 341/GBST 341

Caste in India looms large in global social thought as a kind of benchmark against which hierarchical social systems across the world are measured. This prominence has much to do with British colonial ideologies of rule, but it also has a deeper and different history: the Buddha compared caste to Greek slavery, early modern Jesuits related it to the system of European estates, and since the nineteenth century, anti-caste radicals from Dalit, or “untouchable,” backgrounds have drawn a sustained comparison between the forms of oppression they face and those with which African Americans contend in the United States. Reciprocally, thinkers from W.E.B. DuBois to Toni Morrison have deployed the category of caste in their writings on race. What can the study of caste in postcolonial South Asia contribute to global debates over the persistence of “traditional” forms of social hierarchy? What are the stakes of bringing caste and race into the same conversation, and what are the implications of refusing to do so? In this seminar we will acquire a thorough grounding in the anthropological literature on caste and then investigate the politics of the caste-race comparison over the last hundred years.

Assignments include weekly postings of 1-page critical response papers and either a research paper or an interview-based, ethnographic final project examining “caste” in one’s own community. In its engagement with hierarchy in our various communities, and in its critical theorization of the commensurability (or not) of distinctive systems of inequality, the course fulfills the EDI requirement.

Class Format: seminar

Requirements/Evaluation: weekly postings of 1-page critical response papers and research paper or ethnographic final project

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: none

Enrollment Preferences: seniors, juniors, majors in ANSO, AFR, or ASST

Enrollment Limit: 20

ASST 346 Islam and Anthropology

Crosslistings: ANTH 346/REL 346/ARAB 280/ASST 346

If anthropology has helped to define Islam in global thought, Islam has returned the favor, holding a critical mirror to the anthropological endeavor perhaps more than any other traditional “object” of study. This course examines anthropological studies of Islamic societies for what they teach us both about Islam and about anthropology. We begin with foundational social theories, see how these phenomena helped give rise to the field of anthropology of religion. We then survey influential efforts to construct “ideal-type” models of Muslim society based on anthropological and historical knowledge, alongside efforts to critique, historicize, and redirect the model-building project (notably by Talal Asad and Edward Said). The second half of the course is devoted to ethnographies that explore, from a variety of perspectives and in several regions (Morocco, India, Egypt, Syria), questions of human agency, hierarchy and resistance, and Islam as discursive resource, ethical project, and embodied community.

Class Format: seminar

Requirements/Evaluation: weekly postings, one 5-page paper, one 10-page paper, discussion leading

Prerequisites: none

Enrollment Preferences: juniors and seniors, Anthropology, Sociology or Religion majors

Enrollment Limit: 19

Expected Class Size: 19

Distribution Notes: meets Division 2 requirement if registration is under ARAB

Distributional Requirements: Division 2

Not Offered Academic Year 2017

ASST 347 Tribe and State on the Afghan-Pakistan Border

Crosslistings: ANTH 347/ASST 347

One of the major challenges President Obama will face in his first term in office involves the perilous situation on the border between Afghanistan and Pakistan. While the tribes in the region are generally framed in relation to Islamic extremism, the more fundamental issue is the failure of the Afghan and Pakistani governments to exercise control over the tribes that occupy the mountainous frontier. This course will look first at the history of the Afghan and Pakistan states and of the Pushtun and Baluchi tribes that are part of, yet independent from the states that surround them. We will go on to consider the role of Islam as a political force in the region, with particular emphasis on the ways in which outside religious groups, most recently al-Qaeda, have managed to gain a foothold in the borderlands, despite the historic resistance of the tribes to outsiders of any kind. The course will also examine the efforts of, first, the Soviet Union in the 1980s and, more recently, the United States and its allies to control the borderlands, and we will conclude with a reconsideration of the geopolitical implications if Afghanistan and Pakistan prove in the end to be “failed states.” Readings will include theoretical discussions of tribe/state relations, British and Soviet era accounts of the frontier (non-fiction and fiction), ethnographies of tribal societies, and contemporary studies.

Class Format: seminar

Requirements/Evaluation: class participation, short response papers, research paper, and final exam

Prerequisites: none; open to first-year students

Enrollment Preferences: Anthropology and Sociology majors

Enrollment Limit: 25

ASST 376(F) Zen Buddhist Visual Culture: The Path to Nirvana (W)

Crosslistings: ARTH 376/ASST 376/REL 252

This course is about the ways in which images are produced, viewed, and used in the Zen Buddhist tradition. It explores the various ways in which visual culture is a key part of Zen Buddhist teaching in China and Japan. In this class we will look at both high art and popular expressions of Zen Buddhist visual culture. Topics of interest include: 1) Buddhist image making and icon worship; 2) Gardens; 3) tearooms, tea ceremony and tea bowls; 4) The Zen temples Ryoan-ji, Daisen-in, and Daitoku-ji; 5) The political function of Zen and its art in Japan’s samurai culture; 6) The popular Zen Buddhist cult of Bodhisattva Avalokiteshvara and his gender transformation; and 7) Daruma (Bodhidharma) imagery in popular culture. This course is a CRReAS (critical reasoning and analytical skills) course. The class format also offers students opportunities to practice public speaking and writing skills.

Class Format: lecture/class discussion

Requirements/Evaluation: class discussions and participation; oral presentations, short papers; and a research paper

Enrollment Preferences: sophomores, juniors and seniors

Enrollment Limit: 10

Expected Class Size: 8

HIST Group F Electives - U.S. + Canada
ASST 389 The Vietnam Wars
Crosslistings: HIST 389/ASST 389/LEAD 389
This course explores Vietnam's twentieth century wars, including an anti-colonial war against France (1946-1954), a massive Cold War conflict involving the United States (1965-1973), and postcolonial confrontations with China and Cambodia in the late-1970s. Course materials will focus primarily on Vietnam's domestic politics and its relations with other countries. Lectures, readings, films, and discussions will explore the process by which Vietnam's anti-colonial struggle became one of the central conflicts of the Cold War, and examine the ramifications of that fact for all parties involved. The impact of these wars can hardly be overstated, as they affected the trajectory of French decolonization, altered America's domestic politics and foreign policy, invigorated anti-colonial movements across the Third World, and left Vietnam isolated in the international community. Students will read a number of scholarly texts, primary sources, memoirs, and novels to explore everything from high-level international diplomacy to personal experiences of conflict and displacement. It is the change brought by decolonization and decades of warfare.
Class Format: seminar
Requirements/Evaluation: class participation, several short papers, and a 10- to 12-page final paper

ASST 414(S) Visual Cultures of Modern South Asia (D)
Crosslistings: ARTH 418/ASST 418
This seminar explores the visual and material cultures of modern South Asia. Beginning in the late eighteenth century and moving chronologically to the present, we will examine the rise and spread of new visual technologies and spaces of display, including museums, craft practices, photography, print, and...
film, and their role in the formation of South Asia’s colonial, national, and
global identities. Topics include colonial landscapes, politics of display, craft
and nationalism, and alternative modernities. An emphasis will be also placed
on popular culture — posters, calendar art, tourist souvenirs, and Bollywood
movies and paraphernalia — and its social and performative lives, as well as
its tension and engagement with “high art.”

Class Format: seminar
Requirements/Evaluation: presentations, weekly response papers, one short
paper (4-5 pages), and one longer final paper (15-20 pages)
Prerequisites: none; however, students are encouraged to take the Arts of
South Asia, offered in the fall
Enrollment Preferences: majors

ASST 426(F) Envisioning the South Asian City, 1700-1900 (D) (W)
Crosslistings: ARTH 426/ASST 426
This seminar explores cities in South Asia as sites of cross-cultural encounters
and power negotiations through its visual production — urban planning and
landscapeing, architecture, ritual performance, and the representations of cities
in maps, panoramas, topographic paintings, and photograph albums. What
was the relationship between a new urban identity and the city's past layers of
history? How did the visual representations reinforce and disseminate a city's
image by selectively promoting and criticizing characteristics? How did
cultural encounters create a hybrid urban space? With these questions in
mind, we will look at some of the major South Asian cities that went through
significant transformations in their urban forms between 1700-1900, such as
Delhi, Jaipur, Lucknow, Banaras, and Calcutta. We will consider not only the
distinctive visual production of each city, but also the ways in which these
cities were linked to each other through the larger political, social, and cultural
networks.

Class Format: seminar
Requirements/Evaluation: presentations, one short midterm paper (3-4
pages), and one final paper (15-20 pages)
Extra Info: may not be taken on a pass/fail basis; not available for the fifth
course option

ASST 460 Economic Development of China
Crosslistings: ECON 460/ASST 460
This course is an introduction to the economic development of China in the
post-1978 period. It seeks to provide an overview of the process by which
China grew from an economic backwater to the second largest economy in
the world, with a particular focus on rural development and the growing
gap between rural and urban incomes; human capital and education; and health
and gender in the Chinese context. In addition, the course has the goal of
familiarizing students with current economics research on Chinese topics and
enabling them to be informed consumers of this research.

Class Format: seminar
Requirements/Evaluation: in-class quizzes, literature critique, individual
project comprising a presentation and final paper

ASST 486 War and Remembrance in Vietnam (W)
Crosslistings: HIST 486/ASST 486/GBST 486
This seminar, which includes a required spring break field trip to Vietnam,
examines how that country’s twentieth century wars for independence
have been remembered, memorialized, and represented by the Vietnamese state,
by citizens and scholars, and by the ever-growing number of international
tourists who visit Vietnam each year. All class members are eligible to
participate in the spring break field trip at no cost. In the weeks leading up to
the trip, students will read a number of scholarly works on war and memory
that will prepare them to think critically and knowledgeably about the
representations of Vietnam’s recent past that they encounter inside
the country's borders. Students will consider the following questions: What factors
influence representations of war in Vietnam? What cultural assumptions
underlie them? What political, social, or economic purposes might they serve?

How do official memorials in state-run museums and monuments differ from
other memorials that are in the private sector? How do the representations of
Vietnam Wars differ from American memories and representations, and for
what reasons? These questions will serve as the basis for a research paper or
final project on one aspect of war and remembrance in Vietnam that students
will complete during the second half of the semester, based in part on
observations recorded during the trip.

Class Format: seminar
Requirements/Evaluation: class participation, several short writing
assignments, and a substantial final research paper or other approved final
project
Extra Info: may not be taken on a pass/fail basis
Prerequisites: none
Enrollment Preferences: History and Asian Studies majors; students with
prior coursework related to the Vietnam Wars
Enrollment Limit: 10
Expected Class Size: 10

ASST 488T Gandhi: Nationalism, Philosophy, and Legacy (D) (W)
Crosslistings: HIST 488/ASST 488/GBST 486
This course studies the work and ideas of M.K. Gandhi, one of the most
influential thinkers of the non-western world. Gandhi is well known today for
his philosophy of non-violence and its application in India’s freedom struggle
as well as his influence on the work of leaders like Martin Luther King and
Nelson Mandela. Hailed as the ‘father of the Indian nation’, however, Gandhi
is not only known for his political ideas but also for his deep engagement with
aspects of everyday human behavior and morality: truth, vegetarianism, sex
and celibacy, to name just a few of his obsessive concerns which contributed
to making his broader philosophy. It is this commitment to a morally pure life
that earned him the title of ‘Mahatma’ or ‘Great Soul’ in India.

The tutorial will focus on three key aspects of Gandhi: his ideas of nationalism,
his contemplations on moral philosophy and on his legacy in modern India.
The materials will include a combination of Gandhi’s own writings as well as
journal articles, monographs and films. The course will probe questions such
as: What was the nature of Gandhian nationalism? Did it help to integrate
the Indian nation? How, if at all, was shaped by Gandhi's engagements with moral
philosophy and human behavior? Was Gandhi truly a Great Soul, a saint or a shrewd politician? In what ways is Gandhi received and remembered by the Indian nation today? How does understanding a figure like Gandhi facilitate our understanding of modern nationalism, citizenship and political action?

Class Format: tutorial; students will meet with the instructor each week for one hour sessions in pairs

Requirements/Evaluation: every other week each student will write and orally present a 5- to 7-page essay on the assigned readings of that week; students not presenting an essay will write and present 2 page critique of their partners' work; also a final 10-page paper

Extra Info: may not be taken on a pass/fail basis

COURSES IN CHINESE (Div. I)

The department regularly offers four levels of instruction in Modern Standard Chinese (Mandarin), designed to enable the student to become proficient in aural comprehension, speaking, reading, and writing, as well as introductory courses in Cantonese, Taiwanese, Classical Chinese, and Chinese linguistics. The course numbering system for Chinese is sequential. Students move from Chinese 101-102 to 201, 202, 301, 302, 401, 402, and if appropriate, 403, 404, 405 and 406. 19 Independent study (Chinese 497, 498) may be offered depending on student needs and available resources. Those students entering with proficiency in Chinese should see the Coordinator concerning placement. The department also offers courses on Chinese literature and culture in English translation for students who wish to become acquainted with the major achievements in Chinese literary, intellectual and cultural history. For the purpose of the distribution requirement, all courses in Chinese are considered Division I unless otherwise noted.

STUDY ABROAD

Students majoring in Chinese are strongly encouraged to study in mainland China or Taiwan during one or both semesters of their junior year, during the summer, or over Winter Study. It is important that students interested in any of these options consult as early as possible with the department and the Dean’s Office concerning acceptable programs.

CHIN 101(F) Basic Chinese (D)

An introduction to Mandarin, the language with the largest number of native speakers in the world, which is the national language of China and Taiwan, and one of the official languages of Singapore. Course objectives are for the student to develop simple, practical conversational skills and acquire basic proficiency in reading and writing at about the 200-character level. The relationship between language and culture and the sociolinguistically appropriate use of language will be stressed throughout. Both audio and video materials will be employed extensively. This is an EDI course. Throughout the course we will address issues of how cultural differences inform and are informed by different linguistic contexts and practices.

Class Format: for spoken classes dialog performance, drills, communicative exercises; for written classes oral reading, questions and discussion in Chinese, translation and explanation in English

Requirements/Evaluation: evaluation is based on classroom performance, homework, quizzes, unit tests, and an oral and written final exam

Extra Info: students registered for CHIN 101-102 are required to attend and pass the sustaining program during the winter study period; credit granted only if both semesters (CHIN 101 and 102) are taken.

CHIN 121(F) Basic Written Chinese: Accelerated Track

The goal of this course is to help students with prior background in Spoken Chinese to develop reading and writing skills in basic Chinese. The target audience of this course is students who already know how to speak Mandarin Chinese through high school, Chinese weekend schools, self-study, or home, but who struggle to learn the basic reading and writing skills. The course introduces the basics of the Chinese Writing System (including information on radicals, character components, and stroke order) and helps students reach the basic literacy level of 300 commonly used characters (approximately 700 common words). By the end of the course, students will be able to read simple stories and write short notes. The course is conducted in Chinese and emphasizes the parallel development of listening, speaking, reading, writing, and cultural skills.

Class Format: reading/discussion

Requirements/Evaluation: quizzes, homework, class preparation and participation, one midterm, and one written final

Prerequisites: basic speaking proficiency in Chinese or instructor's permission

Enrollment Limit: none

Expected Class Size: 12

Distributional Requirements:

CHIN 131(S) Basic Cantonese

An introduction to Standard Cantonese, a major regional language of southern China which is spoken by over 70 million people in Hong Kong, Macao, Guangdong, and Guangxi as well as by many overseas Chinese in Southeast Asia, Hawaii, and North America. Due to the pervasive influence of Hong
It is, however, a notion that is more fiction than fact, one story of many that can be told about the area we now call China. This course is organized around a number of topics ranging across different periods and cultures in China, including the following: language, protest, order (and disorder), commerce, the supernatural, reclusion, individualism, and beauty. Lectures and discussions will focus on texts from a wide range of time periods and genres, from ancient poems to modern films, from Buddhist sutras to the writings of Mao Zedong. This course functions as an EDI course in a number of ways. Throughout, we will compare the different cultures broadly considered Chinese to understand the ways in which they interacted, influenced each other, and came into conflict. We will also examine issues of power and privilege as we analyze how different interests used cultural structures and products to gain and maintain their power in society. No previous knowledge of China or Chinese expected. All readings in English.

Class Format: lecture
Requirements/Evaluation: evaluation will be based on attendance, in-class participation, oral presentations, two short response papers, and one final research paper
Prerequisites: none; no Chinese language required, though students with Chinese language background are encouraged to work with Chinese sources if they wish; open to all
Enrollment Preferences: Chinese or Asian Studies majors, and then to sophomores and juniors
Enrollment Limit: 20
Expected Class Size: 20
Distributional Requirements: Division 1

CHIN 223 Ethnic Minorities in China: Past and Present (D)
Crosslistings: CHIN 223/ANTH 223
By 2000, of the 1.3 billion population of China, more than 100 million were ethnic minorities (shaoshu minzu). Most of these reside in autonomous regions and districts, which constitute 64% of China's total acreage. This course introduces students to the multiethnic aspect of China's past and present. We will address topics such as the minority-group identification project; the definition of minzu; government policy toward the current situation of the fifty-five official ethnic minority groups; historical sino-centric views about “foreigners” and “barbarians”; ideas of “diversity,” “unity,” and “sinification,” and the roles that “barbarians” have played in China’s long history. All readings will be in English. This is an EDI course. We will explore various meanings of “diversity” and “being ethnic” in the Chinese context and compare them with students’ own experiences through class discussions and an essay assignment.

Class Format: lecture/discussion
Requirements/Evaluation: evaluation will be based on attendance, in-class participation, oral presentations, two short response papers, and one final research paper
Prerequisites: none; no Chinese language required, though students with Chinese language background are encouraged to work with Chinese sources if they wish; open to all
Enrollment Preferences: Chinese or Asian Studies majors, and then to first-year students

CHIN 227(S) Made in China or Making “China?”: Twentieth-Century Chinese Perfor mative Culture
Crosslistings: CHIN 227/COMP 227/THEA 227
This course explores the ways in which twentieth-century Chinese performative culture fashioned our contemporary understanding of “China.” Starting with Chinese hybrid theatres staged in the US, Japan, and semicolonial Shanghai in the early 1900s and ending with the 2008 Beijing Olympic Opening Ceremonies, this course examines performative works drawn from the breadth of an expanded 20th century; including film, spoken drama, intercultural reproductions of Peking and Kun Operas, revolutionary and avant-garde theatre, Chinese Rock concerts, and global mass mediated performances. Emphasis will be placed on how performances (encompassing the performance onstage and the performance-making backstage) placed “China” on the global stage; and shaped racial, gender, and national identities among play-makers and audiences. We will also explore how Chinese operas were reinvented as “traditional culture” and a “national essence” in the early 20th century; and how agents of Chinese performance, as makers of imagery, social assets and threats to real-life arbiters of power. The class will be structured around the themes of “Inventing Tradition on the World Stage.” “Acting the Right Part,” and “Performing the Nation.” Students will learn to engage performances as cultural texts embedded in national and intercultural relations, between literature canons (fictions, essays, and dramas) and popular media and genres: blockbuster cinemas and art house films, popular novels, photographs and posters, etc. This course meets the aims of the Exploring Diversity Initiative by fostering an empathetic understanding of various groups within China and their relationships with “disease,” and by questioning the power and privilege inherent within such categories as “rural” and “urban,” “science” and “literature,” and “East” and “West.”

Class Format: lecture/discussion
Requirements/Evaluation: regular in-class participation, three short papers (3-5 pages), and one final project
Prerequisites: none
Enrollment Preferences: students who major or plan to major in Chinese and/or Asian Studies
Enrollment Limit: 19
Expected Class Size: 15

CHIN 228 Traditional Chinese Poetry (D) (W)
Crosslistings: CHIN 228/COMP 228
Poetry was the dominant form of literature in China for most of the pre-modern period. It could be used to justify the overthrow of dynasties or to court a beloved; Chinese poets sang about communing with the gods and about brewing ale, sometimes in the same poem. In this course we will read and discuss poems from the 2000 years of the Chinese literary tradition. Some of the issues we will explore include the ways in which poems present the world and make arguments about it; how Chinese poets construct different notions of the self through their poems; and how poetry can give voice to conflicts between aesthetics and morality, between the self and the community, and between the state and other sources of social capital. We will also look at Chinese theories of literature and poetry and compare them with dominant Western models. This is an EDI course and we will be concerned throughout with the ways in which Chinese and other cultures thought about and utilized poetry. We will examine the implicit biases inherent in the ways Western scholars in particular have analyzed and translated Chinese poetry. All readings in English translation.

Class Format: lecture/discussion
Requirements/Evaluation: numerous short response papers, two longer papers (1700-2300 words), and a final exam; participation in class discussions required
Prerequisites: none; no previous experience with poetry or Chinese required
Enrollment Preferences: Chinese majors; open to all
Enrollment Limit: 19
Expected Class Size: 19

CHIN 253(F) "Disease" in Modern Chinese Literature and Culture (D)
Crosslistings: CHIN 253/COMP 254/GWS 255
From early modern anxieties about China's status as the "sick man of Asia" to contemporary concerns regarding the prospect of transnational pandemics, "disease" and related stories have played a critical role in making and contesting individual psychologies and Chinese modernity in the 20th and 21st centuries. Actual diseases, from tuberculosis to AIDS, constitute not only social realities that trouble political and popular minds in their own right; but further provide powerful metaphors for exploring issues of human rights, national identity, and transnational circulation. This course examines how Chinese literature in the 20th and 21st centuries writes and visualizes "disease"—a universal human experience that is nevertheless heavily bounded by culture and history. Specifically, we examine the cultural and social meaning of "disease", the relationship between diseases on the one hand, and the politics of body, gender, and class on the other; we ask how infectious (sexual) disease, and mental illness are defined, represented, and understood in both male and female writers' analytical essays and fictional writings in the 20th century; we examine how metaphorical "diseases," such as infectious cannibalism and fin-de-siècle "virus," are imagined and interpreted by key culture figures ranging from the founding father of modern literature (Lu Xun), to the winner of the 2012 Nobel Prize in Literature (Mo Yan), to the "Second New Wave" film director of Taiwanese Cinema (Tsai Ming-liang); and we explore how Freud's psychoanalysis and post-Freudian psychotherapy are "practiced" in literature circulated in both print and internet cultures. Throughout the course, we will focus on the intersection between literature canons (fictions, essays, and dramas) and popular media and genres: blockbuster cinemas and art house films, popular novels, photographs and posters, etc. This course meets the aims of the Exploring Diversity Initiative by fostering an empathetic understanding of various groups within China and their relationships with "disease," and by questioning the power and privilege inherent within such categories as "rural" and "urban," "science" and "literature," and "East" and "West.

CHIN 301(F) Upper-Intermediate Chinese (D)
The goal of this course is to continue developing students' overall language proficiency. However, special emphasis will be on strengthening students' reading and writing proficiency in standard written Chinese, the grammar and vocabulary of which differ considerably from colloquial Chinese introduced during the first two years of instruction. Conducted in Mandarin. This is an EDI course. In addition to involving immersion in a classroom Chinese environment, much of our focus will be on the ways that various cultural issues are perceived and addressed differently (and, in many instances, in similar ways) in China and the US.

Class Format: lecture/discussion/reading
Requirements/Evaluation: evaluation will be based on classroom performance, short essays, homework, quizzes, tests, and a final exam
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

CHIN 352 Bridging Theory and Practice: Learning and Teaching Chinese as a Second Language
This course introduces students to the principles of second language acquisition (SLA), a field of study that investigates how people learn a foreign language and provides a basis for understanding research related to foreign language learning and teaching. Theoretical issues to be covered include what it means to know a language, how one becomes proficient in a foreign language, factors that affect the learning process, and the role of one's native language, factors that affect the learning process, and the role of one's native
language. We will also examine what SLA research has discovered about teaching grammar, pronunciation, vocabulary, and writing. The goal is to improve their own learning of Chinese and those who plan to teach or conduct research on Chinese. All readings in English with some examples in Chinese.

Class Format: lecture and discussion

Requirements/Evaluation: evaluation will be based on class participation, several oral presentations and short papers, and a final research project

Prerequisites: CHIN 101 or permission of instructor

Enrollment Limit: 15

CHIN 404 Advanced Readings in Chinese Cultural and Social Issues

Using selections from Chinese literary works, as well as journalistic and academic articles, this advanced reading course is designed to further develop students' abilities to analyze and discuss in Mandarin complex ideas related to Chinese cultural and social issues. Acquisition of specialized vocabulary and improving proficiency in formal discourse, both oral and written, are two primary aims of this course.

Class Format: two 75-minute classes plus a conversation session; primarily reading and discussion

Requirements/Evaluation: evaluation based on classroom performance, homework, quizzes, tests, and a final project

Prerequisites: CHIN 402 or permission of instructor

Enrollment Preferences: Chinese majors

Distributional Requirements:
"Liberated" by the development of written vernacular Chinese yet "framed" by the concerns of mass media, Chinese intellectuals, via their mediated eyes and experimental pens, interpreted China from an array of perspectives in the first half of the 20th century, creating linguistic norms, genre hierarchies, and cultural modernities in the process. This literature course, taught in Chinese, takes a thematic approach to study how China's media culture complicated the canonization of modern Chinese literature and the practices of literary modernity. We will closely read selections from a broad range of modern literary texts written by influential male and female writers from the 1890s to the 2000s, including short stories, proses, plays, "miscellaneous writings" (zawen), biographies, and newspaper advertisements. Through class discussions, response papers, and individual projects, this course will not only enhance proficiency in modern Chinese, but also help students to develop analytical abilities, both oral and written, to discuss, critique, and embrace modern Chinese literature as aesthetic, intellectual, and cultural expressions. Students will come away from this course cognizant of the general development of modern Chinese language and familiar with many of the key texts of Chinese literature from the 20th century.

**Class Format:** lecture/discussion

**Requirements/Evaluation:** based on class performance, quizzes, three short response papers in Chinese, and a final project consisting of a 8-10 minute recorded multimedia piece

**Old Shanghai, New Shanghai (W)**

Once nicknamed as “Parts of the East,” Shanghai, now a megacity with a population of 25 million, is the industrial, commercial and financial center of contemporary China. Shanghai is often depicted as a metropolis that marked the beginning of China’s modernity and urban culture. People from other regions in China see Shanghai as a place of opportunities, but characterize its people as astute and shrewd, cocky and unwelcoming. Foreigners, however, find the city appealing and its people open-minded. Jews fleeing Nazi persecutions during WWII, found Shanghai to be a “paradise of ghetto” that provided the only haven of survival. For local people, there have always been two Shanghai: an old one and a new one. They are proud of the new Shanghai but constantly nostalgic about the old one. This tutorial examines the multifaceted city of Shanghai and its people from historical and cultural perspectives. We will look at the city’s history (from the late nineteenth century to present day), its local language and culture, and everyday life of the people (including migrants and foreigners) living in it. The central ideas we will explore are “modernity” and “regional identity.” We will investigate how these theoretical constructs play out in the making of the city of Shanghai and the formation of its unique local identity. Course readings include historical and cultural studies as well as documentaries in English about Shanghai, and primary sources in Chinese in a wide range of genres including fiction, essays, and films. The course is conducted in Chinese. Students will be able to not only improve their reading and writing skills in Chinese, but also come away with a critical understanding about China’s regional cultures and one of its most important metropolitan cities. We will meet once a week, half of the class time for discussion, half for reading. In addition, each tutorial pair will meet with me for one hour during the week, during which time we will discuss a 5-page paper that one of the partners has submitted.

**Class Format:** tutorial

**Requirements/Evaluation:** attendance and participation, 5 short papers and 5 critiques, 1 final project

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**Introduction to Chinese Linguistics**

Is Chinese—whose nouns "lack" number and whose verbs have no tense—a monosyllabic, "primitive" language? Are the Chinese characters a system of logical symbols or "ideographs," which indicate meaning directly without regard to sound? And should (and could) the characters be done away with and alphabetized? Are Cantonese, Hakka, and Taiwanese dialects or languages? And what is the relationship between Chinese, Japanese, Korean, and Vietnamese? These are some of the questions we will be taking up in this one-semester introduction to the scientific study of the Chinese language.

Topics to be covered include: the phonological, syntactical, and lexical structure of Modern Standard Chinese; the Chinese writing system; the modern Chinese dialects; the history of the Chinese language; sociolinguistic aspects of Chinese; and language and politics in various Chinese-speaking societies. Readings in English and Chinese, with class discussion in Mandarin and/or English depending on student proficiency levels in a given year.

**Class Format:** lecture/discussion

**Requirements/Evaluation:** evaluation will be based on classroom performance, homework, two short papers, and one longer paper

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**Prerequisites:** CHIN 302 or permission of instructor; no prior background in linguistics required

**Enrollment Preferences:** current or prospective Chinese or Asian Studies majors

**COURSES IN JAPANESE**

The department regularly offers four levels of language instruction in Modern Japanese, designed to enable the student to become proficient in aural comprehension, speaking, reading, and writing. Courses on Japanese literature in translation and film are also offered. The course numbering system is sequential. Students move from Japanese 101-102 to 201, 202, 301, 302, 401, 402 and, if appropriate, 403, 404, 405 and 406. Independent study (Japanese 497, 498) may be offered for students who have completed 402 or the equivalent, depending on student needs and available resources. Students interested in pursuing independent study must contact the Coordinator of the Japanese Program one semester in advance and present a proposal to the professor with whom they wish to study by the first day of pre-registration week. Those students entering with proficiency in Japanese should see the Coordinator concerning placement. For the purpose of the distribution requirement, all courses in Japanese are considered Division I unless otherwise noted.

**STUDY ABROAD**

Students majoring in Japanese are encouraged to consider study in Japan at some point in their Williams career—during one or both semesters of their junior year, during the summer, or over Winter Study. It is important that students interested in any of these options consult carefully with the department and the Dean’s Office starting at an early date.

**JAPN 101(F)**

**Elementary Japanese (D)**

An introduction to modern spoken and written Japanese, the course aims to instill proficiency in Japanese by developing four necessary skills of speaking, listening, reading, and writing to successfully interact with native speakers.
The relationship between language and culture and the sociolinguistically appropriate use of language will be stressed throughout. Audio, video, and computer—assisted learning materials will be used extensively. Classes consist of a combination of "act" classes, conducted exclusively in Japanese, where students use the language in various types of drills and communicative activities, and "fact" classes, conducted in Japanese and English, where students learn about the language and culture. This is an EDI course.

Throughout the course we will address issues of how cultural difference inform and are informed by different linguistic contexts and practices.

Class Format: fact classes, three hours per week; act classes three hours per week
Requirements/Evaluation: evaluation will be based on daily classroom performance, homework, quizzes, a midterm, and a final exam
Extra Info: students registered for JAPN 101-102 are required to attend and pass the sustaining program during the winter study period; credit granted only if both semesters (JAPN 101 and 102) are taken
Prerequisites: none
Enrollment Limit: none

JAPN 130 Intro. to Linguistic Analysis

This course examines the nature of human language and its structural patterns. Students will be introduced to linguistic methods for analyzing speech sounds (phonetics and phonology), word and sentence structures (morphology and syntax) and meaning (semantics) through data/problem sets of various languages, including English and Asian languages, such as Japanese and Chinese. The methods will be further used to analyze linguistic phenomena in cross-linguistic, historical and social contexts, and can be applied to languages of students' interest.

Class Format: lecture
Requirements/Evaluation: evaluation will be based on class discussions/exercises, assignments, and exams
Prerequisites: none; no previous knowledge of linguistics or of foreign languages is required; knowledge of Asian languages is beneficial; open to all students
Enrollment Preferences: first-year and sophomore students
Enrollment Limit: 25
Expected Class Size: 25
Distributional Requirements: Division 1
Other Attributes: COGS Interdepartmental Electives
Not Offered Academic Year 2017
LEC Instructor: Sayaka Abe

JAPN 131(S) Introduction to Japanese Linguistics

This course is an introduction to the basic ideas and methodology of linguistics. We learn how to formally analyze the patterns of speech sounds (phonetics and phonology), word formation (morphology), sentence structures (syntax), and meanings (semantics and pragmatics). Other topics, such as first language acquisition and language variations, may be discussed as needed. Although we use Japanese as the primary target data throughout the course, we occasionally look at data from other languages for further application of linguistic methodology and for the better understanding of cross-linguistic variations and underlying universality across languages. Classes are conducted in English.

Class Format: lecture
Requirements/Evaluation: class discussion, reading assignments (as preparation for class), written assignments (exercises), mid-term and final exam
Prerequisites: no background knowledge of Japanese or linguistics is required; open to all students who are interested in Japanese language or language in general
Enrollment Preferences: first-year and sophomore students
Enrollment Limit: 25
Expected Class Size: 25
Distributional Requirements: Division 1

Spring 2017
LEC Section: 01 MR 02:35 PM 03:50 PM Instructor: Mamoru Hatakeyama

JAPN 153 Japanese Film

Crosslistings: COMP 153/JAPN 153
From the swashbuckling samurai films of Kurosawa and delicate family dramas of Ozu to edgy cinematic experiments and a breathtaking range of animation, Japan has one of the most varied and exciting film traditions in the world. This course will introduce you to major periods, genres, and directors in that tradition. We will read film criticism that represents a range of approaches, but focus particularly on learning and practicing the kind of close visual analysis that will allow you to build your own original descriptions of how a given scene "works." Throughout the course we will consider the relationship between classic cinema and popular genres like sword flicks, melodramas, psychological thrillers, and anime, focusing particularly on directors whose work seems to borrow equally from genre film and the artistic avant-garde. All texts are translated or subtitled. All levels welcome.

Class Format: lecture
Requirements/Evaluation: attendance, participation, some responses, two papers (5-7 pages), test
Prerequisites: none
Enrollment Preferences: students majoring in a related field
Enrollment Limit: 40
Expected Class Size: 20
Distributional Requirements: Division 1
Other Attributes: FMST Core Courses
Not Offered Academic Year 2017
LEC Instructor: Christopher Bolton

JAPN 201(F) Intermediate Japanese (D)

This course is a continuation of First-Year Japanese 101-102, further developing the four skills of speaking, listening, reading, and writing. The same general methodology will be used. Upon completing the course, students will have been introduced to most of the major structural patterns of contemporary Japanese and will be able to read simple expository prose. This is an EDI course. Throughout the course we will address issues of how cultural difference inform and are informed by different linguistic contexts and practices.

Class Format: fact classes, three hours per week; act classes three hours per week
Requirements/Evaluation: evaluation will be based on daily performance, homework, quizzes, a midterm, and a final exam
Prerequisites: JAPN 101-102 or permission of instructor

JAPN 217 Early Modern Japan
Crosslistings: HIST 217/JAPN 217/ASST 217

Stunning revolutions, the construction and collapse of an empire, the waging of wars, devastating defeat and occupation by a foreign power, and postwar economic ups and downs have marked Japan's modern experience. The course will explore how various Japanese from politicians and intellectuals to factory workers and farmers have understood, instigated, and lived the upheavals of the past century and a half. We will ask why a modernizing revolution emerged out of the ashes of the early modern order; how Japan's encounters with "the West" have shaped the country's political and cultural life; what democracy and its failures have wrought; how world war was experienced and what legacies it left in its wake; how national identity has been constructed and reconstructed; and how postwar Japan has struggled with the successes and costs of affluence. Materials will include anthropological studies, government documents, intellectual tracts, fiction, films, and oral histories.

Class Format: lecture/discussion
Requirements/Evaluation: evaluation will be based on class participation, response papers, two short papers (5 pages), and a final paper (10 pages) or self-scheduled final exam
Prerequisites: none; open to all
Enrollment Limit: 40
Expected Class Size: 25-30
Distribution Notes: meets Division 2 requirement if registration is under JAPN
Distributional Requirements: Division 2

JAPN 219(S) Japanese Culture and History from Courtiers to Samurai and Beyond (D)
Crosslistings: HIST 219/COMP 229/ASST 219/JAPN 219

This course will introduce students to the history, literature, and artistic culture of premodern Japan, from the time of the first recorded histories in the 800s through the abolition of the samurai class in the late 1800s. We will focus on the politics and aesthetic culture of the ruling elite in each period, from the heyday of the imperial court through the rise and eventual decline of the samurai warrior and the growth of Edo (Tokyo), with its new mode of early modern government and new forms of literature, theater, and art. Texts taught by faculty from History and Comparative Literature, with original, creative readings of the literary texts

Prerequisites: none; open to all
Enrollment Limit: none
Expected Class Size: 15
Distributional Requirements: Division 1
Other Attributes: GBST East Asian Studies Electives

Not Offered Academic Year 2017
LEC Instructor: Christopher Bolton

JAPN 255 Love and Death in Modern Japanese Literature (D)
Crosslistings: COMP 255/JAPN 255

premodern Japan but also explores how we can attempt to know and understand different times and places. Primary texts will include court diaries, war tales, and fiction; laws and edicts; essays and autobiographies; noh, kabuki, and puppet theater; and tea ceremony, visual art, and architecture. Students should register under the prefix specific to the Division in which they want to receive credit.

Class Format: lecture/discussion
Requirements/Evaluation: evaluation will be based on class participation, response assignments, two short papers (approximately five pages each), and a final exam
Extra Info: may not be taken on a pass/fail basis
Prerequisites: none; open to all
Enrollment Preferences: students majoring or considering a major in a related field
Enrollment Limit: 40
Expected Class Size: 30

JAPN 231 Survey of Linguistic Diversity: Meaning, Context and Communication
Crosslistings: JAPN 231/ANTH 231

This course explores ways in which human experiences, including vision, space, emotion and interpersonal awareness are encoded similarly or differently between Western and Asian languages. The course centers around two core areas of linguistics, semantics (study of meaning) and pragmatics (study of meaning in context and use), which are discussed from cognitive, cultural and social perspectives. Discussion topics include: grammar and cognition, lexicon and culture, conceptual metaphor, honorific systems, communicative strategies, and theories of politeness. Lectures and in-class activities will primarily focus on two typologically distant languages, English and Japanese, for comparison. Reading materials may include data from other languages as well, and students may work on languages of their interest for selected assignments.

Class Format: lecture
Requirements/Evaluation: evaluation will be based on class discussions/exercises, assignments and exams
Prerequisites: some knowledge of linguistics or of foreign languages is required; knowledge of Asian languages is beneficial; open to all
Enrollment Preferences: first-year and sophomore students
Enrollment Limit: 20
Expected Class Size: 20
Distribution Notes: meets Division 1 requirement if registration is under JAPN; meets Division 2 requirement if registration is under ANTH
Distributional Requirements: Division 1

JAPN 254 Beauty, Danger, and the End of the World in Japanese Literature
Crosslistings: COMP 254/JAPN 254

From the endemic warfare of the medieval era to the atomic bombing and the violent explosion of technology in the last century, the end of the world is an idea which has occupied a central place in almost every generation of Japanese literature. Paradoxically, the spectacles of destruction has given birth to some of the most beautiful, most moving, and most powerfully thrilling literature in the Japanese tradition. Texts may be drawn from medieval war narratives like The Tale of the Heike; World War II fiction and films by Ibuse Masumichi, Imai Shōhei, and Ichikawa Kon; fantasy and science fiction novels by Abe Kiōko, Murakami Haruki and Murakami Ryû; apocalyptic comics and animation by Oshii Mamoru, Ótomo Katsuhiro, and others. The class and the readings are in English; no familiarity with Japanese language or culture is required.

Class Format: lecture/discussion
Requirements/Evaluation: in-class exam, ungraded creative project, and a few short response assignments, plus two 5- to 7-page papers emphasizing original, creative readings of the literary texts
Prerequisites: none; open to all
Enrollment Limit: none
Expected Class Size: 15
Distributional Requirements: Division 1
Other Attributes: GBST East Asian Studies Electives

Not Offered Academic Year 2017
LEC Instructor: Christopher Bolton
One thing that surprises many first-time readers of modern Japanese fiction is its striking similarity to Western fiction. But equally surprising are the intriguing differences that lie concealed within that sameness. This course investigates Japanese culture and compares it with our own by reading Japanese fiction about two universal human experiences—love and death—and asking what inflections Japanese writers give these ideas in their work. The course begins with tales of doomed lovers that were popular in the eighteenth-century kabuki and puppet theaters, and that still feature prominently in Japanese popular culture, from comics to TV dramas. From there we move on to novels and short stories by canonical modern authors like Tanizaki, Kawabata, and Mishima as well as more contemporary fiction by writers like Murakami Haruki; we will also look at some visual literature, including puppet theater, comics, animation, and Japanese New Wave films and the readings are in English.

Class Format: seminar/lecture/discussion
Requirements/Evaluation: in-class exam, ungraded creative project, and two short papers (5-7 pages each) emphasizing original, creative, and convincing responses, assignments, one test, two 5-page papers, and an ungraded creative project
Prerequisites: none; no familiarity with Japanese language or culture is required

JAPN 256 Confession and Deception in Japanese Literature
Crosslistings: COMP 266/JAPN 256
Situated at the origins of Japanese literature are the beautiful and revealing diaries of ladies in waiting at the tenth- and eleventh-century court. Yet one of the most famous of these women turned out to be a man. For the next thousand years, Japanese literary tradition would place a premium on confessional writing, but the distortions and concealments of these narrators (and the authors hiding behind them) would always prove at least as interesting as the revelations. This course examines several centuries of Japanese literature to ask whether you can ever put your true self into writing; and the way I will ask you what you reveal, conceal, discover, or reinvent about yourself when you write about literature for a class like this. Texts will range from classical and medieval court literature by Sei Shônagon and Lady Nijö, through autobiographical and confessional novels by Sôseki, Tanizaki, Mishima, and Abe Kôbô, to documentary and subculture films like The New God and Kamikaze Girls. The class and the readings are in English; no familiarity with Japanese language or culture is required.

Class Format: seminar
Requirements/Evaluation: attendance and participation, 2 or 3 short response assignments, one test, two 5-page papers, and an ungraded creative project
Prerequisites: none; no familiarity with Japanese language or culture is required
Enrollment Preferences: students majoring or considering a major in Comparative Literature
Expected Class Size: 25
Distributional Requirements: Division 1
Other Attributes: GBST East Asian Studies Electives
Not Offered Academic Year 2017

JAPN 260 Japanese Theatre and its Contemporary Context
Crosslistings: JPN 260/JAPN 260
Japan's rich and varied performance traditions, old and new, born of different historical settings, coexist to this day and compete for the attention of audiences, domestically and abroad. The forms to be considered (nōgaku, kabuki, bunraku, shingeki, butoh, and Takarazuka all female revue among others) are all dynamic. Each has transformed itself in response to evolving social conditions. This course examines these performance traditions, considers how each reflects the social, cultural, and political context of its birth, and poses the question, "of what relevance is each to a contemporary audience?" Some of the other questions we will explore are: How have these performing traditions transformed themselves throughout history, including after 3.11? What do we mean by traditional? contemporary? How are traditional and contemporary performance genres interacting with each other? How have the central themes of these works evolved?

All readings and discussion will be in English.
Class Format: lecture/discussion
Requirements/Evaluation: active class participation, presentations, written journals, two short papers, and one longer paper
Prerequisites: none; open to all
Enrollment Limit: 15

JAPN 271 Transitional Japanese Literature into the Twentieth Century
Crosslistings: JAPN 271/COMP 269
After more than two centuries of National Seclusion, Japan's modern era began suddenly in the middle of the nineteenth century, with the unexpected arrival of Commodore Perry, the destabilization of the 250-year old shogunal government, and the violent restoration of Imperial rule. Rapid and radical changes followed in every aspect of society, from fashion to philosophy. This course will explore how such changes have been expressed through literature, film and performance. We will trace how the authors of literary and other artistic works perceived, interpreted, and rejected expectations of the old and the new. All readings and discussions will be in English.

Class Format: lecture/discussion
Requirements/Evaluation: evaluation will be based on active class participation, presentations, written journals, two short and one longer paper
Prerequisites: none; open to all

JAPN 274T Confronting Japan (W)
Crosslistings: JAPN 274T/COMP 274
This tutorial looks into confrontations, within Japan and across its borders, how such confrontations are perceived, handled and narrated, and what they tell us about Japanese society. Through literature and other media, we will probe domestic issues, such as gender/economic disparities, aging, minorities, suicide, reclusion and post-3-11 recovery, and international issues, related to Japan's shifting roles within East Asia and beyond. Discussions will unchallenge the conflicting perspectives, and elaborate the thoughts and feelings of the various contestants. All readings and discussions will be in English. Some course materials will also be available in Japanese, for those interested. As this tutorial actively explores diversity of human thought, and the contexts that create such diversity, this is an EDI course.

Class Format: tutorial
Requirements/Evaluation: 4- to 5-page papers and 2-page critiques (in alternating weeks), and one final report at the culmination of the course
Extra Info: not available for the fifth course option
Prerequisites: sophomore standing or higher
Enrollment Preferences: Japanese majors
Enrollment Limit: 10

LEC Instructor: Shinko Kagaya
Some of Japan's performance traditions, which developed in different historical settings, have survived to this day and continue to coexist and compete for the attention of audiences both domestically and abroad. This course examines the Japanese literature of three major periods in Japan's history, focusing on how literary and performance traditions have been interrelated in the unfolding of Japanese literary history. We will begin by looking into the Heian period (794-1185), when the work of female authors occupied center stage and the majority of the canonical texts of the Japanese literary and cultural tradition were born. Next we will consider the medieval period (1185-1600), which saw the rise of the samurai class and the consequent shift in the domain of artistic creation. Then we will look at the Edo period (1600-1867), when a new bourgeois culture flourished and audiences were greatly transformed. We will also explore the continuing force of premodern literary traditions in contemporary performing arts.

### Class Format:
Lecture/discussion

### Requirements/Evaluation:
Active class participation, presentations, written journals, two essay questions, one paper, and attendance of live performance events.

**Prerequisites:** None; open to all

**Enrollment Limit:** 15

**Expected Class Size:** 15

**Distributional Requirements:** Division 1

**Other Attributes:**
- GBST East Asian Studies Electives
- PERF Interdepartmental Electives

### JAPN 301(F) Upper-Intermediate Japanese (D)

This course is a continuation of Japanese 201 and 202. Students will further develop the four skills of speaking, listening, reading, and writing, while consolidating the foundations built in Elementary and Intermediate Japanese. The same general methodology will be used. In this course, students begin to emphasize vocabulary building through the study of situationally oriented materials stressing communicative competence. The reading of expository prose in both semi-authentic and authentic materials of intermediate difficulty will also receive some extensive attention. This is an EDI course. In addition to involving immersion in a classroom Japanese environment, much of our focus will be on the ways that various cultural issues are perceived and addressed differently (and, in many instances, in similar ways) in Japan and the US.

**Class Format:** Three 75-minute classes

**Requirements/Evaluation:** Evaluation will be based on daily performance, homework, quizzes, a midterm, and a final exam.

**Prerequisites:** JAPN 202 or permission of instructor

**Enrollment Limit:** None

**Expected Class Size:** 10

**Distributional Requirements:** Division 1

---

### JAPN 404 Advanced Seminar in Japanese II (D)

This course is designed for advanced Japanese language students. The goal is for students to be able to carry on extended discourse—such as a discussion, a speech, or an interview—in a culturally appropriate manner; to read authentic materials with ease; and to make presentations and write
research papers on issues of interest. The course will focus on current social, cultural, educational, and political issues in Japan. This course, which is conducted entirely in Japanese, has the EDI designation since students are immersed in a Japanese language environment and the course materials will involve critical thinking and discussion of two diverse cultures, Japan and the U.S.

Class Format: three hours per week
Requirements/Evaluation: evaluation will be based on daily classroom performance, homework, quizzes, and projects
Prerequisites: JAPN 403 or permission of instructor
Enrollment Limit: none
Expected Class Size: 5
Distributional Requirements:
- Division 1
- Exploring Diversity

Not Offered Academic Year 2017
SEM Instructor: Shinko Kagaya

JAPN 405 Thematic Reading and Writing in Japanese I (D)
This course is designed for the advanced students of Japanese who want to develop their reading and writing skills intensively. Students will be exposed to various genres of readings on the themes of modern and pre-modern Japanese society in contrast to those of the U.S. Research and writing skills will be developed in conjunction with student projects. This course also aims to develop a high level of speaking proficiency through discussion and narrative discourse. This is an EDI course because students are immersed in a Japanese environment in class and will learn how to express their ideas and opinions using Japanese discourse patterns both in texts and dialogues. This requires reflective thinking over different cultural perspectives between Japan and the U.S. or whatever cultural heritage each student may have.

Class Format: seminar
Requirements/Evaluation: evaluation will be based on daily preparation and in-class performance, a weekly journal, and a final research paper
Prerequisites: any one of JAPN 400-level courses or permission of instructor; open to all
Enrollment Preferences: JAPN majors and then seniors and juniors
Enrollment Limit: 5

JAPN 407(T) An Exploration of Japanese Language and Culture (W)
Language is the primary means for human beings to lead social lives and it expresses, embodies and symbolizes cultural and social reality. This tutorial will examine the intertwining ways in which the Japanese language reflects the patterns of life and intrinsic beliefs of Japanese, while exploring how this linguistic code influences and shapes the ways Japanese think. We will look into the following topics: polite languages and the variety of personal pronouns in order to examine how the hierarchical structure of Japanese society is reflected in them. Also, we will explore women's speech, youth and queer Japanese to discuss social and gender identities and the role of linguistic stereotypes in manga, anime and TV dramas as well as the "easy Japanese movement," which depicts the shift from a monolingual to multi-lingual Japanese society. And finally, our examination will investigate the semantic and cultural losses that occur in translations from Japanese prose to English prose. The course is conducted in Japanese with materials drawn from linguistics and socio-cultural studies both in Japanese and English. Students will not only develop analytical and critical thinking, but will gain more advanced Japanese skills such as reading to understand the logic of arguments, exponent narrative, and academic presentations and writing.

Class Format: tutorial
Requirements/Evaluation: attendance and participation, 5 short papers, 5 critiques, and one final project
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: upper-intermediate or advanced level Japanese proficiency, or permission of instructor
Enrollment Preferences: current or perspective Japanese and Asian Studies majors
Enrollment Limit: 10
Expected Class Size: 8
Distributional Requirements:
- Division 1
- Writing Intensive

Fall 2016

JAPN 486T The Pacific War in Japanese Historical Memory (W)
Crosslistings: HIST 486/JAPN 486/ASST 486
Almost seven decades after Japan's surrender, the enduring question of how to remember the Pacific War continues to provoke controversy both within Japan and between Japan, South Korea, and China. This tutorial will explore how this difficult past has been remembered in postwar Japan, and how and why these memories have changed from 1945 to the present. Our focus will be on certain sites of memory—museums, shrines, literature, textbooks, and films—and how they have expressed and shaped memories of various aspects of the war from the atomic bombings of Hiroshima and Nagasaki to military comfort women and the Nanking massacre. Key issues include how various Japanese have tried to make sense of death and personal sacrifice in the name of a lost war; the implications of Japan's unique position as both perpetrator of wartime atrocities and victim of atomic bombings; the relationship between memory and nationalism; and what it means to come to terms with pasts contested both within and between countries.

Class Format: tutorial; students will meet with the instructor in pairs for an hour each week; a student either will write and present orally a 5- to 7-page essay on the assigned readings or be responsible for offering an oral critique of the work of their partner.
Requirements/Evaluation: students will be evaluated on these essays and critiques, and there will be a final paper (12-15 pages) on the themes of the course
Extra Info: may not be taken on a pass/fail basis
Prerequisites: none; open to all
Enrollment Preferences: History and Asian Studies majors, and then to students who have taken courses in History or Asian Studies
Enrollment Limit: 10
Expected Class Size: 10
Distribution Notes: meets Division 2 requirement if registration is under JAPN

Astronomy (DIV III)

Chair: Professor KAREN KWITTER

Professors: K. KWITTER, J. PASACHOFF, Observatory Supervisor/Senior Lecturer: S. SOUZA.

How long will the Sun shine? How do we discover Earth-like planets among the many circling other stars? How did the universe begin and how has it evolved over its 13.8-billion-year history? Astronomy is the science that asks and tries to answer questions like these. We have come a long way toward understanding what makes the sky appear as it does and how the Universe behaves. The Astronomy Department offers courses for anyone who is interested in learning about the Universe, and who would like to be able to follow new astronomical discoveries as they are made. All courses in Astronomy satisfy the Division III requirement. The Astrophysics major is intended jointly with the Physics Department and the Astronomy major are described below.

The beginning astronomy courses are offered on two levels. Astronomy 101, 102, 104, and 330-range courses are intended primarily for non-science majors and have no prerequisite. Astronomy 111 is designed for students with some exposure to physics. It has a prerequisite of one year of high school physics or permission of the instructor, and a co-requisite of Mathematics 140 or equivalent background in calculus.

Most of the astronomy courses take advantage of our observational and computational facilities including a 24-inch computer-controlled telescope with sensitive electronic detectors, and our own computer network for image processing and data analysis. The Astronomy Department home page can be found at astronomy.williams.edu

Astrophysics Major

The Astrophysics major is designed for students who want a rigorous introduction to the field, including not only those who plan graduate study in astronomy, astrophysics, or a closely related area, but also those interested in a wide variety of careers. Astrophysics alumni are not only astronomers but also computer scientists, geologists, teachers, doctors, lawyers, business school professors, and more. Most of the astronomy courses majors have had a second major in fields as wide ranging as mathematics, geosciences, economics, English, and art history. This major emphasizes understanding the observed properties of the physical systems that comprise the known Universe, from the Sun and solar system, to the evolution of stars and star clusters, to the Milky Way Galaxy, to external galaxies and clusters of galaxies. Because some knowledge of physics and calculus is necessary to understand many astronomical phenomena, the Astronomy major requires the first two semesters each of the physics and calculus that are also required of Physics majors and Astrophysics majors.

Major Requirements for Astrophysics

Astronomy 111 Introduction to Astrophysics
or Astronomy 101: Stars: From Suns to Black Holes
and Astronomy 202 The Solar System—Our Planetary Home
or Astronomy 104 The Milky Way Galaxy and the Universe Beyond
or Two 400-level astronomy courses
Three 400-level courses at least one of the following:
Astronomy 211 Astronomical Observing Image Processing and Analysis
Physics 302 Statistical Physics
Physics 402 Applications of Quantum Mechanics
Physics 405 Electromagnetic Theory
Physics 411 Classical Mechanics
Physics 418 Gravity
Physics 131 Particles and Waves
or Physics 141 Particles and Waves—Enriched
or equivalent placement
Physics 142 Foundations of Modern Physics
or Physics 151 Seminar on Modern Physics
Physics 201 Electricity and Magnetism
Physics 202 Waves and Optics
Physics/Mathematics 210 Mathematical Methods for Scientists
Physics 301 Introductory Quantum Physics
Mathematics 150 Multivariable Calculus
or Mathematics 151 Multivariable Calculus
Mathematics 140 Calculus II
Mathematics 150 Multivariable Calculus
or Mathematics 151 Multivariable Calculus
or equivalent placement

The total number of courses required for the Astrophysics major, an interdisciplinary major, is eleven. Students entering with Advanced Placement in physics and/or mathematics may obtain credit toward the major for the equivalent of Physics 141 and/or Mathematics 140 and/or 150 or 151 taken elsewhere, but at least 8 courses in astronomy, physics, and mathematics must be taken at Williams. There are some aspects of astrophysics that are closely related to chemistry or geosciences. In recognition of this relation, certain advanced courses in those departments can be accepted for credit toward the Astrophysics major.

The Degree with Honors in Astrophysics

The honors degree in Astrophysics will be awarded on the basis of a senior thesis presenting the results of an original observational, experimental, or theoretical investigation, carried out by the student under the direction of a faculty member in Astronomy or Physics. There are no specific grade requirements (other than College-wide requirements for remaining in good academic standing) for entry into the thesis research program; however, a student wishing to do a thesis should have demonstrated both ability and motivation for independent work in previous courses and in any earlier research involvement. Students doing theses will normally choose a topic and an advisor early in the second semester of their junior year and usually begin their thesis work for the summer. During the senior year, those students whose proposals have been approved will elect two courses and a winter study project in addition to the minimum requirements for the major.

Preparation for the thesis will occupy at least one course (Astrophysics 493) and the winter study project (Astrophysics 031). At the end of the winter study period, the departments will decide, in consultation with each student, whether to admit the student to honors candidacy. Both a written thesis and an oral presentation to faculty and fellow students are required. The degree with honors will be awarded to those who meet these requirements with distinction. The degree with highest honors will be awarded to those who fulfill the requirements with unusually high distinction.

The departments will be flexible with regard to the number and timing of courses, from the general guidelines of two courses and a winter study project over and above the minimum major requirements and the written and oral presentations, especially in cases of students with advanced standing and/or summer research experience.

Students completing possible routes through the Astronomy major, depending on preparation and interest. Students considering a major in Astronomy should consult with members of the department early and often. A first-year student, if unsure about choosing between Astronomy and Astrophysics, may wish to take not only Astronomy 111 but also Physics 131, 141, or 151, and Mathematics 140 (if necessary) in the fall. Students who might place out of physics courses should read the section on placement under Physics, those who place out of Physics 131 or 141 into Physics 142 or 151 should particularly consider taking Astronomy 111 in the fall of their first year.

In addition to the major courses described below, other courses in geosciences, mathematics, and computer science may also be appropriate.

Astronomy Major

The Astronomy major is designed for students with an interest in learning about many aspects of modern astronomy, but who do not choose to take the most advanced physics and math courses of the astrophysics major. It is also appropriate as a second major for students concentrating in another field. The Astronomy major should be adequate for understanding the observed properties of the physical systems that comprise the known Universe, from the Sun and solar system, to the evolution of stars and star clusters, to the Milky Way Galaxy, to external galaxies and clusters of galaxies. Because some knowledge of physics and calculus is necessary to understand many astronomical phenomena, the Astronomy major requires the first two semesters each of the physics and calculus that are also required of Physics majors and Astrophysics majors.

Major Requirements for Astronomy

Astronomy 111 Introduction to Astrophysics
or Astronomy 101: Stars: From Suns to Black Holes
and either Astronomy 102 The Solar System—Our Planetary Home
or Astronomy 104 The Milky Way Galaxy and the Universe Beyond
Two 400-level Astronomy courses (or additional 400-level Astronomy courses as substitutes)
Two 400-level Astronomy courses
Physics 131 Particles and Waves
or Physics 141 Particles and Waves—Enriched
or equivalent placement
Physics 142 Foundations of Modern Physics
or Physics 151 Seminar on Modern Physics
Mathematics 140 Calculus II
Mathematics 150 Multivariable Calculus
or Mathematics 151 Multivariable Calculus
or equivalent placement

The total number of courses required for the Astronomy major is nine. Students entering with Advanced Placement in physics and/or math may obtain credit toward the major for the equivalent of Physics 142 and/or Mathematics 150 or 151 taken elsewhere. There are some aspects of astronomy that are closely related to chemistry or geosciences. In recognition 145
THE DEGREE WITH HONORS IN ASTRONOMY

The honors degree in Astronomy will be awarded on the basis of a senior thesis presenting the results of an original observational, experimental, or theoretical investigation carried out by the student under the direction of a faculty member in Astronomy. There are no specific grade requirements (other than College-wide requirements for remaining in good academic standing) for entry into the thesis research program; however, a student wishing to do a thesis should have demonstrated both ability and motivation for independent work and have possession of knowledge and skills gained from any earlier research involvement. Students doing theses will normally choose a topic and an advisor early in the second semester of their junior year and usually begin their thesis work during the summer. During the senior year, those students whose proposals have been approved will select two courses and a winter study project in addition to the minimum requirements for the major. Preparation for the thesis will occupy at least one course (Astronomy 493) and the winter study project (Astronomy 031). At the end of the winter study period, the department will decide, in consultation with each student, whether to admit that student to honors candidacy. Both a written thesis and an oral presentation to faculty and fellow students are required. The degree with honors will be awarded to those who meet these requirements with distinction. The degree with highest honors will be awarded to those who fulfill the requirements with unusually high distinction.

The department will be flexible with regard to the number and timing of courses devoted to thesis research within the general guidelines of two courses and a winter study project over and above the minimum major requirements and the written and oral presentations, especially in cases of students with advanced standing and/or summer research experience. Students considering unusual requests are urged to consult with potential advisors or the department chair as early as possible.

STUDY AWAY

You can find general study-away guidelines for Astronomy/Astrophysics here.

ASTR 101(F) Stars: From Suns to Black Holes

What makes a star shine? For how long will the Sun keep shining and what will happen to it then? What are black holes and how can they form? What about the recently discovered “chirp” from gravitational radiation resulting from two giant black holes merging? What about this coming summer’s total solar eclipse? Astronomy 101, a non-major, general introduction to the part of contemporary astronomy that includes how stars form and how they end their existence, will provide answers to these questions and more. The course gives special attention to the exciting discoveries of the past few years. Topics include modern astronomical instruments such as the Hubble Space Telescope, the Chandra X-ray Observatory, the Kepler mission to discover planets around other stars, the latest huge telescopes and some results from them; how astronomers interpret the light received from distant celestial objects; the Sun as a typical star (and how its future will affect ours); and our modern understanding of how stars work and how they change with time. We will also discuss how pulsars and black holes result from the evolution of normal, massive stars and how supermassive black holes lurk at the center of galaxies and quasars. We will discuss the discovery of planets around stars other than the Sun. We will also discuss how pulsars and black holes result from the evolution of normal, massive stars and how supermassive black holes lurk at the center of galaxies and quasars. We will discuss the discovery of planets around stars other than the Sun. We will cover the historical development of humanity’s understanding of the solar system, examining contributions by Aristotle, Ptolemy, Copernicus, Galileo, Newton, Einstein, and others. We will discuss the discovery of over 2000 exoplanets around stars other than the Sun. The course gives special attention to exciting discoveries of the past few years by space probes and by the Hubble Space Telescope and the Kepler Mission. We will discuss the new observations and developments in astronomy and relate them to the topics covered in the course. This course is independent of, and on the same level as Astronomy 104 (galaxies and cosmology), and students who have taken those courses are welcome. Observing sessions will include use of the 24-inch telescope and other telescopes for nighttime observations of stars, star clusters, planets and their moons, nebulae, and galaxies, as well as use of other telescopes for daytime observations of the Sun.

Class Format: lecture (three hours per week), observing sessions (scattered throughout the semester), afternoon labs (five times per semester), and a planetarium demonstration.

Requirements/Evaluation: evaluation will be based on two hour tests, a final exam, an observing portfolio, and lab reports.

Extra Info: not available for the fifth course option.

Enrollment Limit: 30

Expected Class Size: 15

ASTR 104(S) The Milky Way Galaxy and the Universe Beyond

It has been less than a century since the Sun was discovered not to be at the center of the Milky Way Galaxy, and the Milky Way Galaxy was determined to be only one of countless “island universes” in space. A host of technological advances is enabling us to understand even more clearly our place in the universe and how the universe began. For example, the recently discovered “chirp” from gravitational radiation (reported in 2016) resulting from two giant black holes merging has opened a whole different way of observing the universe and how the universe began. For example, the recently discovered “chirp” from gravitational radiation (reported in 2016) resulting from two giant black holes merging has opened a whole different way of observing the universe. Observations with those and other new telescopes on the ground and in space help to confirm and enlarge our understanding of the Big Bang. In addition, study of the early Universe (most recently from the
Astronomy 104, a non-major, general introduction to part of contemporary astronomy comprising the study of galaxies and the Universe, develops clues into how the Universe's currently observed structure arose. Astronomy 104, a non-major, general introduction to part of contemporary astronomy comprising the study of galaxies and the Universe, develops clues into how the Universe's currently observed structure arose. This course is independent of, and on the same level as Astronomy 101 and 102, and students who have taken those courses are welcome. ASTR 217T Planets and Moons (W) Crosslistings: GEOS 217/ASTR 217 We live in a solar system full of wonders. Each planet and each moon is strange: different from our Earth, and different from each other. The recent flood of images and data from Mars constantly reveals new marvels—the rest of the solar system is even stranger. The U.S. put men on the moon; there are robots on Mars; and the Soviet Union landed several times on Venus. The other worlds are known only from flybys and remote images, but it's amazing what those can teach us. By focusing on recent research, we will examine how the solar system works and delve into its mysteries. Topics may include the possible Late Heavy Bombardment of the moon, runaway greenhouse on Venus, water on Mars, hidden oceans on Europa, and the methane weather cycle on Titan.
Class Format: lecture/discussion, observing sessions, and five labs per semester
Expected Class Size: 20
Distributional Requirements: Division 3
Quantiative/Formal Reasoning
ASTR 221 Compact Stellar Remnants: White Dwarfs, Neutron Stars, and Black Holes (Q) Crosslistings: ASTR 221/ASTR 421 As stars end their varied lives they each end up as a dense, compact remnant. In this course we will study the final stages of stellar evolution and concentrate on the basic properties of the three possible remnant states: white dwarf, neutron star and black hole. We will study radio and X-ray pulsars, which represent observed manifestations of some compact objects. In addition, we will discuss the observations confirming the existence of black holes. Finally, we will explore the extreme conditions existing near neutron stars and black holes and discuss their astrophysical consequences.
Class Format: lecture/discussion
Requirements/Evaluation: evaluation will be based on classroom participation, homework assignments, a midterm exam and final exam. Prerequisites: if taken under ASTR 221:PHYS 151 or co-requisite of PHYS 142, and MATH 150 or 151; if taken under ASTR 421: Physics 201 & permission. Fall 2016
LEC Instructor: Ronadh Cox
ASTR 221 Astronomical Observing and Data Analysis (Q) This course will introduce techniques for obtaining and analyzing astronomical data. We will learn by doing practical observation planning and move on to discussion of CCD detectors, signal statistics, digital data reduction, and image processing. We will make use of data we obtain with our 24-inch telescope, as well as data from other optical ground-based observatories and archives. We will also learn about and work with data from space-based non-optical observatories such as the Chandra X-Ray Observatory and the Spitzer Space Telescope (infrared).
Class Format: lecture/discussion plus computer work and observing Requirements/Evaluation: evaluation will be based on weekly problem sets, an hour exam and observing projects
Expected Class Size: 10

ASTR 330(S) The Nature of the Universe

This course is a journey through space and time from the first 10 seconds to the ultimate fate of the Universe billions of years in the future. Topics include the Big Bang and its remnants, cosmic background radiation, cosmic inflation, conditions during the first three minutes, creation of the elements, stellar and giant black holes, relativity, galaxies and quasars, and formation of the large-scale structure of the Universe. We will explore current ideas about the future of the Universe, in particular the acceleration of the Universe’s expansion, and its implications for the end of time.

Class Format: lecture/discussion, three hours per week
Requirements/Evaluation: evaluation will be based on two hour tests, a small observing portfolio, occasional quizzes, and a final exam
Extra Info: not available for the fifth course option
Prerequisites: none; open only to juniors and seniors; closed to students who have taken or are taking ASTR 104, and closed to ASPH, ASPM, and PHYS majors
Enrollment Limit: 48
Expected Class Size: 20
Dept. Notes: non-major course; course in the 33X sequence are meant as general education courses for students in all majors

ASTR 336 Science, Pseudoscience, and the Two Cultures (W)

Crosslistings: ASTR 336/HSCI 336

A famous dichotomy between the sciences and the humanities, and public understanding of them, was laid down by C. P. Snow and has been widely discussed, with ignorance of the second law of thermodynamics compared with ignorance of Shakespeare. In this seminar, we will consider several aspects of science and scientific culture, including how scientific thinking challenges the claims of pseudoscience. We will consider C. P. Snow and his criticism, as well as the history of the Copernican Revolution and other paradigms invented by Thomas Kuhn. We will discuss the recent "Science Wars" over the validity of scientific ideas. We will consider the fundamental origins of modern science, including Tycho, Kepler, Galileo, and Newton, viewing their original works in the Chapin Library of rare books and comparing their interests in science with what we now call pseudoscience, like alchemy.

We will review the history and psychology of astrology and other pseudosciences. Building on the work of Martin Gardner in his column "Scientific American" and using the current journal The Scientific Review of Alternative Medicine, we consider from a scientific point of view what is now called complementary or alternative medicine, including both older versions such as chiropractic and newer nonscientific practices. We will discuss the current global-climate-change deniers and their effects on policy. We consider such topics as GM (genetically modified) foods, the safety and regulation of dietary supplements, and the validity of government and other recommendations relevant to the roles of dietary salt and fat in health. We consider the search for extraterrestrial intelligence (SETI) and report on UFO's and aliens. We consider the possible effects that superstitions have on the general public’s cooperation in vaccination programs and other consequences of superstition. We also consider the recently increased range of dramatic that are based on scientific themes, such as Tom Stoppard's Arcadia and Michael Frayn's Copenhagen.

Class Format: seminar
Requirements/Evaluation: evaluation will be based on biweekly 5-page papers, participation in discussions, and a 15-page final paper
Prerequisites: none
Enrollment Preferences: juniors and seniors and to those with backgrounds in science, history of science, or philosophy.
Enrollment Limit: 3
Expected Class Size: 12
Dept. Notes: non-major course; does not count toward ASPH, ASTR or PHYS majors
Distribution Notes: meets Division 3 requirement if registration is under ASTR; meets Division 2 requirement if registration is under HSCI
Distributional Requirements: Division 3
Writing Intensive
Other Attributes: SCST Elective Courses

Not Offered Academic Year 2017 SEM Instructor: Jay Pasachoff

ASTR 402 Between the Stars: The Interstellar Medium (Q)

The matter between the stars—the interstellar medium—manifests itself in many interesting and unexpected ways, and, as the detritus of stars, its properties and behavior hold clues to the history and future evolution of both stars and the galaxies that contain them. Stars are accompanied by diffuse matter all through their lifetimes, from their birthplaces in dense molecular clouds, to the stellar winds they eject with varying ferocity as they evolve, to their final fates as they shed their outer layers, whether as planetary nebulae or dazing supernovae. As these processes go on, they enrich the interstellar medium with the products of the stars’ nuclear fusion. The existence of life on Earth is eloquent evidence of this chemical enrichment. In this course we will study the interstellar medium in various forms. We will discuss many of the physical mechanisms that produce the radiation we observe from diffuse matter, including radiative ionization and recombination, collisional excitation of "forbidden" lines, collisional ionization, and synchrotron radiation. This course is observation-intensive. Throughout the semester students will work in small groups to perform practical work using the current scientific literature and online astronomical tools.

Class Format: discussion/seminar, plus computer work and observing projects
Requirements/Evaluation: evaluation will be based on homework, class presentations/problem-solving, and observing projects
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: PHYS 201 or permission of instructor
Enrollment Limit: 10
Expected Class Size: 8
Distributional Requirements: Division 3
Quantitative/Formal Reasoning

Not Offered Academic Year 2017 SEM Instructor: Karen Kwitter

ASTR 410 Compact Stellar Remnants: White Dwarfs, Neutron Stars and Black Holes

A star is a very interesting, very complicated physical object. Properties of stars and their evolutionary paths depend on an intricate interplay of different physical phenomena with gravity, nuclear interactions, radiation processes and even quantum and relativistic effects playing important roles. Using basic physics we will construct simple models of stars and discuss their evolution concentrating on the key physical processes that play the dominant role at different evolutionary stages. We will discuss late stages of stellar evolution and concentrate on the basic properties of three possible remnants: white dwarfs, neutron stars and black holes. Radio and X-ray pulsars, supernovae including Type Ia and Gamma Ray Bursts will be discussed as well as observational confirmation of existence of black holes. We will explore extreme conditions existing near neutron stars and black holes and discuss their astrophysical consequences.

Class Format: lecture/discussion, three hours per week
Requirements/Evaluation: evaluation will be based on classroom participation, homework assignments, a midterm exam and a final exam
Prerequisites: PHYS 201
Enrollment Limit: 19
Expected Class Size: 12
Distributional Requirements: Division 3

Not Offered Academic Year 2017 LEC Instructor: Marek Demianski

ASTR 412T(S) Solar Physics (W)

In the 14-15 academic year of the study of the book, honoring the new library and the expansion of the Chapin Library of Rare Books, we study many of the greatest names in the history of astronomy, consider their biographies, assess their leadership roles in advancing science, and examine and handle their first-edition books and other publications. Our study includes the original books published as follows: 16th-century, Nicolaus Copernicus (heliocentric universe); Tycho Brahe (best pre-telescopic observations); 17th-century, Galileo (discoveries with his first astronomical telescope, 1610; sunspots, 1613; Dialogo, 1632), Johannes Kepler (laws of planetary motion, 1609, 1619), Johannes Hevelius and Elisabeth Hevelius (atlas of stars and of the Moon, 1647 and 1687), Isaac Newton (laws of universal gravitation and of motion, 1687); 18th-century, Edmond Halley (Miscellanea cunicosa, eclipse maps, 1715, 1724); John Flamsteed and Margaret Flamsteed (Atlas Coelestis, 1729); William Herschel and Caroline Herschel (1781, 1798). In more recent centuries, the original works are articles: 20th-century: Albert Einstein (special relativity, 1905; general relativity, 1916); Marie Curie (radioactivity); Cecilia Payne-Gaposchkin (hydrogen dominating stars, 1929), Edwin Hubble’s (law, 1929); Vera Rubin (dark matter, 1970s); Jocelyn Bell (pulsar discovery, 1968); 21st-century: Wendy Freedman (Universe’s expansion rate, 2000s). We will also read biographies and recent novels dealing with some of these astronomers. With the collaboration of the librarians, we will meet regularly in the Chapin Library of Rare Books and also have a session at the library of the Clark Art Institute to see its rare books of astronomical interest.
We study all aspects of the Sun, our nearest star. This semester leads up to the total solar eclipse of August 21, 2017, the first eclipse whose totality crosses the U.S. from coast to coast in since 1918 and the first to be entirely within the US since 1776. In addition to discussing plans for observing the eclipse and what has been learned about the solar atmosphere from eclipse research, we discuss the solar interior (including the Nobel-prize-winning solar neutrino experiment and helioseismology), the photosphere, the chromosphere, the corona, and the solar wind. We discuss the Sun as an example of stars in general. We discuss both theoretical aspects and observational techniques, including work at recent total solar eclipses. We discuss results from current spacecraft, including the Solar and Heliospheric Observatory (SOHO), the Solar Dynamics Observatory, the Sun Watcher (SWAP), and Hinode (Sunrise), and the new GOES/UVIS (Solar Ultraviolet Imager) run by an alumnus as well as additional Total Solar Irradiance measurements from ACRIMSAT and SORCE. As a special timely treat, we will discuss the role of solar observations in confirming Einstein's General Theory of Relativity with the bending of light at the 1919 and 1922 total solar eclipses as well as gravitational redshift measurements in solar spectral lines, extending our discussion to the recent "chirp" of gravitational radiation reported in 2016 from LIGO andIGO. We also discuss our data analysis of recent transits of Mercury across the face of the Sun (most recently in May 2016) and the 2004 and 2012 transits of Venus across the face of the Sun as observed from Earth, the first such transits of Venus since 1882, as well as our work in observing transits of Venus from the Hubble Space Telescope and from Saturn with NASA's Cassini spacecraft.

Class Format: tutorial; students will meet weekly with the professor in groups of two or three to discuss readings and make presentations, often in PowerPoint or Keynote format.

Requirements/Evaluation: evaluation will be based on four 5-page papers, discussions, and presentations; students will be expected to improve their writing throughout the course, with the aid of careful editing by and comments from the professor.

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option.

Prerequisites: Astronomy 111 or a 200-level Physics course.

Enrollment Limit: 12

Expected Class Size: 6

Distributional Requirements: Division 3

TUT Section: T1 TBA Instructor: Jay Pasachoff

ASTR 420 Observational Cosmology: Observing and Modeling the Universe (Q)

Recent astronomical observations have revealed that the universe contains large amounts of dark matter (most probably consisting of undetected yet very-weakly-interacting particles) and dark energy (a strange kind of uniformly-distributed energy that creates negative pressure causing accelerated expansion of the universe), while ordinary radiating matter (stars, galaxies and clouds of gas) is only a minor addition. In this course we will discuss the most important observations that lead us to these conclusions. We will start by studying and classifying galaxies. Eighty-five years ago Hubble discovered that the universe is expanding and almost 30 years later Gamow proposed the Big Bang model of the evolution of the universe. We will discuss observational data that support the Big Bang model, concentrating on the microwave background radiation and its properties, along with the process of primordial nucleosynthesis. Recent observational data indicate that at a very early stage of evolution the universe expanded through a phase of very rapid exponential expansion called "inflation." We will develop and discuss the Standard Cosmological Model that describes the evolution of the universe from the Big Bang to its present state. In particular we will discuss the early phases of radiation-dominated evolution and the late process of structure formation. Finally we will concentrate on the observations indicating that the universe is now dominated by dark matter and dark energy.

Class Format: lecture/discussion.

Requirements/Evaluation: evaluation will be based on classroom participation, homework assignments, a midterm exam and final exam.

Prerequisites: Astronomy 201 or permission of instructor.

Enrollment Preferences: if overenrolled, preference will be given to Astronomy and Astrophysics majors.

Enrollment Limit: 19

Expected Class Size: 12

Distributional Requirements: Division 3

Quantitative/Formal Reasoning

Not Offered Academic Year 2017

LEC Instructor: Marek Demianski

ASTR 421 Compact Stellar Remnants: White Dwarfs, Neutron Stars, and Black Holes (Q)

Crosslistings: ASTR 221/ASTR 421

As stars end their varied lives they each end up as a dense, compact remnant. In this course we will study the final stages of stellar evolution and concentrate on the basic properties of the three possible remnant states: white dwarf, neutron star and black hole. We will study radio and X-ray pulsars, which represent observed manifestations of some compact objects. In addition, we will discuss the observations confirming the existence of black holes. Finally, we will explore the extreme conditions existing near neutron stars and black holes and discuss their astrophysical consequences.

Class Format: lecture/discussion

Requirements/Evaluation: evaluation will be based on classroom participation, homework assignments, a midterm exam and final exam.

Prerequisites: if taken under ASTR 221:PHYS 151 or co-requisite of PHYS 242, and MATH 150 or 151; if taken under ASTR 421: Physics 201 & permission of instructor.

Enrollment Preferences: if overenrolled, preference will be given to Astronomy and Astrophysics majors.

Enrollment Limit: 19

BIOINFORMATICS, GENOMICS, AND PROTEOMICS (DIV III)

Bioinformatics, genomics, and proteomics are rapidly advancing fields that integrate the tools and knowledge from biology, chemistry, computer science, mathematics, physics, and statistics in research at the intersection of the biological and informational sciences. Inspired by the enormous amount of biological data that are being generated from the sequencing of genomes, these new fields will help us pose and answer biological questions that have long been considered too complex to address. Research in genomics, proteomics, and bioinformatics will also significantly impact society affecting medicine, culture, economics, and politics.

The Bioinformatics, Genomics, and Proteomics curriculum involves faculty from the biology, chemistry, computer science, mathematics/statistics, and physics departments and is designed to provide the foundation for a better understanding of these revolutionary new areas of investigation. The introductory level courses, Computation and biology and Statistics for Biologists are accessible to all students interested in gaining familiarity with the power of genomic analysis. Students interested in graduate work in bioinformatics, genomics, and proteomics should take the core courses and five of the recommended courses. Interested students are also encouraged to participate in independent research with members of the advisory faculty as they explore the development of these new fields.

Core Course

BIOI 319/MATH 319/CHM 319/PHYS 319/CSCI 319 Integrative Bioinformatics, Genomics, and Proteomics Lab

Recommended Courses (in addition to the core course):

- BIOI 202 Genetics
- BIOI 305 Evolution
- BIOI 430 Genome Sciences: At the Cutting Edge
- CSCI 134 Introduction to Computer Science
- CSCI 136 Data Structures and Advanced Programming
- CSCI 256 Algorithm Design and Analysis
- PHYS 315/CSCI 315 Computational Biology
- STAT 101 Elementary Statistics and Data Analysis
- STAT 201 Statistics and Data Analysis

Related Courses

BIMO 321/BIOI 321/CHM 321 Biochemistry I: Structure and Function of Biological Molecules
BIMO 322/BIOI 322/CHM 322 Biochemistry II: Metabolism
MATH 337 Phylogenetics
PHYS 302 Stat Mechanics & Thermodynamics
STAT 231 Statistical Design of Experiments

BIOCHEMISTRY AND MOLECULAR BIOLOGY (DIV III)
Chair: Professor DANIEL LYNCH

Biochemistry and molecular biology are dynamic fields that lie at the forefront of science. Through elucidation of the structure and function of biologically important molecules (such as nucleic acids, lipids, proteins, and carbohydrates) these disciplines provide insights and advances in the fields of molecular engineering (recombinant DNA technology, "intelligent" drug design, "in vitro evolution"), genomics and proteomics, signal transduction, immunology, developmental biology, and evolution.

The Biochemistry and Molecular Biology Program is designed to provide students with an opportunity to explore living systems in molecular terms. Biochemistry and molecular biology are at the interface between the chemical and biological methods of looking at nature; therefore, the program draws heavily from these disciplines. While chemistry is concerned with the relationships between molecular structure and reactions, and biology focuses on cells and organisms, biochemistry and molecular biology probe the details of the structures and interactions of molecules in living systems in order to provide the foundation for a better understanding of biological molecules both individually and as members of more complex structures.

PROGRAM

While aspects of biochemistry and molecular biology can be very diverse, a common set of chemical and biological principles underlie the more advanced topics. With this in mind, the program has been structured to provide the necessary background in chemistry and biology and the opportunity to study the many facets of the molecular areas of the biological sciences. Students interested in the Biochemistry and Molecular Biology Program should plan their course selection carefully. Since it is expected that Biochemistry 321 and 322 would be taken in the junior year, students are advised to take the prerequisites for these courses in both biology and chemistry during their first two years at Williams. While the program is open to all students, it is expected that it will appeal primarily to majors in biology and chemistry because of the number of courses required in those fields. In addition to taking the required courses, students planning to take the Biochemistry and Molecular Biology Program are strongly encouraged to elect courses in mathematics and physics.

The following interdepartmental courses serve as the core of the Biochemistry and Molecular Biology Program. BIMO 321 and 322 provide a comprehensive introduction to biochemistry. BIMO 401, the capstone course for the concentration, provides students the opportunity to examine the current scientific literature in a wide variety of BIMO-related research areas.

To complete the concentration in Biochemistry and Molecular Biology, a student must complete all of the required courses listed below, take at least one elective in biology and one elective in chemistry from the list below, and attend at least eight Biology and/or Chemistry Department colloquia. Since the Chemistry Department counts two biology courses and the Biology Department counts two chemistry courses toward the majors (each of which can be completed with only eight other courses), a student majoring in either chemistry or biology would have to take only two or three additional courses to complete the program.

Required Courses

BIMO 321/BIOI 321/CHM 321 Biochemistry I: Structure and Function of Biological Molecules
BIMO 322/BIOI 322/CHM 322 Biochemistry II: Metabolism
BIMO 401 Topics in Biochemistry and Molecular Biology
BIOL 101 The Cell
BIOL 102 The Organism
BIOL 202 Genetics
CHEM 151 Introductory Chemistry or
CHEM 153 Concepts of Chemistry or
CHEM 155 Principles of Modern Chemistry
CHEM 156 Organic Chemistry: Introductory Level
CHEM 251 Organic Chemistry; Intermediate Level
CHEM 256 Advanced Chemical Concepts (not required if CHEM 155 was taken)

Students can check with the program chair to see if other courses not listed here might count as electives.

Elective Courses

BIOI 301 Developmental Biology
BIOI 306 Cellular Regulatory Mechanisms
BIOI 308 Integrative Plant Biology: Fundamentals and New Frontiers
BIOI 310/NSCI 316/NSCI 331 Neural Development and Plasticity
BIOI 313 Immunology
BIOI 315 Microbiology: Diversity, Cellular Physiology, and Interactions
BIMO 319/MATH 319/CHM 319/PHYS 319/CSCI 319 Integrative Bioinformatics, Genomics, and Proteomics Lab
BIMO 326 Cellular Assembly and Movement
BIMO 406 Dynamics of Membrane Systems
BIMO 407/NSCI 347 Neurobiology of Emotion
BIMO 408 RNA Biology
BIMO 410 Nanomachines in Living Systems
BIMO 414 Life at Extremes: Molecular Mechanisms
BIMO 416 Epigenetics
BIMO 418 Signal Transduction to Cancer
BIMO 426 Frontiers in Muscle Physiology: Controversies
BIMO 430 Genome Sciences: At the Cutting Edge
CHEM 324 Enzyme Kinetics and Reaction Mechanisms
CHEM 326 Chemical Biology: Discoveries at the Interface
CHEM 338 Bioorganic Chemistry
CHEM 341/ENVI 341 Toxicology and Cancer
CHEM 342 Synthetic Organic Chemistry
CHEM 343 Medicinal Chemistry
CHEM 344 Physical Organic Chemistry
CHEM 348 Polymer Chemistry
CHEM 364/ENVI 364 Instrumental Methods of Analysis
CHEM 366 Analytical Chemistry and Statistical Mechanics
CHEM 367 Biophysical Chemistry

Colloquium Requirement

Concentrators must attend at least eight Biology and/or Chemistry Department colloquia. The Biology and Chemistry Departments hold colloquia on Friday afternoons during the fall and spring semesters. Scientists from other academic or research institutions are invited to present their research to students and faculty. Approximately a dozen colloquia offered each semester among which BIMO concentrators may choose. Attendance at the honors student research presentations and the Biology/BIMO Alumni Reunion poster session also count toward the colloquium requirement. Concentrators may receive credit for colloquia attended during any of their semesters at Williams College.

BIMO 321(F) Biochemistry I: Structure and Function of Biological Molecules (Q)

This course introduces the basic concepts of biochemistry with an emphasis on the structure and function of biological macromolecules. Specifically, the structure of proteins and nucleic acids are examined in detail in order to determine how their chemical properties and their biological behavior result from those structures. Other topics covered include catalysis, enzyme kinetics, mechanism and regulation; the molecular organization of biomembranes; and the flow of information from nucleic acids to proteins. In addition, the principles and applications of the methods used to characterize macromolecules in solution and the interactions between macromolecules are discussed. The laboratory provides a hands-on opportunity to study macromolecules and to learn fundamental techniques of biochemical including electrophoresis, chromatography, and principles of enzymatic assays.

Class Format: lecture, three hours per week; laboratory, four hours per week

Requisites/Evaluation: evaluation is based on quizzes, a midterm exam, a final exam, problem sets and performance in the laboratories including lab reports

Extra Info: may not be taken on a pass/fail basis

Prerequisites: BIOL 101 and CHEM 251/255 and CHEM 155/256

Enrollment Preferences: junior and senior Biology and Chemistry majors and BIMO concentrators
Enrollment Limit: 48  
Expected Class Size: 48  
Dept. Notes: does not satisfy the distribution requirement in the Biology major

BIMO 322(S) Biochemistry II: Metabolism (Q)  
Crosslistings: BIMO 322/BIOL 322/CHEM 322  
This lecture course provides an in-depth presentation of the complex  
metabolic reactions which are central to life. Emphasis is placed on the  
biological flow of energy including alternative modes of energy generation  
(aerobic, anaerobic, photosynthetic); the regulation and integration of the  
metabolic pathways including compartmentalization and the transport of  
metabolites; and biochemical reaction mechanisms including the structures  
and mechanisms of coenzymes. This comprehensive study also includes the  
biosynthesis and catabolism of small molecules (carbohydrates, lipids, amino  
acids, and nucleotides). Laboratory experiments introduce the principles and  
procedures used to study enzymatic reactions, bioenergetics, and metabolic  
pathways.  
Class Format: lecture, three hours per week; laboratory, three hours per week  
Requirements/Evaluation: evaluation is based on several exams and  
performance in the laboratories including lab reports that emphasize  
conceptual and quantitative and/or graphic analysis of the data generated  
Extra Info: may not be taken on a pass/fail basis; not available for the fifth  
course option  
Prerequisites: BIOL 101 and CHEM 251/255 or permission of instructor

BIMO 401(S) Topics in Biochemistry and Molecular Biology (W)  
This seminar course involves critical reading, analysis, and discussion of  
papers from the current biochemistry and molecular biology literature. Specific  
topics vary from year to year but are chosen to illustrate the importance of a  
wide range of both biological and chemical approaches to addressing  
important questions in the biochemical and molecular biological fields. To  
facilitate discussion, students will prepare written critiques analyzing the data  
and conclusions of the chosen literature.  
Class Format: seminar, three hours per week  
Requirements/Evaluation: evaluation will be based on class presentations and  
discussions, frequent short papers, and a final paper  
Extra Info: may not be taken on a pass/fail basis; not available for the fifth  
course option  
Prerequisites: BIOL 202 and BIMO 321

BIOLOGY (DIV III)  
Chair: Professor JOAN EDWARDS  

Professors: H. ART , L. BANTA, J. EDWARDS, D. LYNCH, R.  
SAVAGE, S. SWOAP, C. TING, H. WILLIAMS, M. MORALES, Senior  
Lecturer: D. C. SMITH, Associate Professor: L. MAROJA, Associate  
Professors: M. CARTER, P. CHEN, T. LEBESTKY, D. TURNER, Lecturers:  
D. DEAN, J. MACINTIRE. Visiting Assistant Professor of Marine Science for  
the Williams-Mystic Program: M. NISHIZAKI.  
The Biology curriculum has been designed to provide students with a broad  
base for understanding principles governing life processes at all levels, from  
biochemistry and cell biology to physiology to ecology and behavior. Courses  
emphasize fundamentals common to all sub-disciplines including the coupling  
of structure to function, the transfer of energy in living systems,  
communication, and the molding of diversity by the evolutionary process. In  
upper-level courses and in independent and honors research, students have  
the opportunity to investigate areas at the frontiers of modern biology.  
Although the Biology major is specifically designed to provide a balanced  
curriculum in the broader context of the liberal arts, it is also excellent  
preparation for graduate studies in the life sciences and in the health  
professions.  

MAJOR REQUIREMENTS  
In order to make the major accessible to students with diverse interests,  
required courses are kept to a minimum. The Biology major is satisfied by nine  
courses, as follows:  

- Biology 101 The Cell  
- Biology 102 The Organism  
- Biology 202 Genetics  
- Any two 300-level courses, each of which must have a laboratory  
  associated with it  
- Any one 400-level course other than 493-494  
- Any other three courses or any other two courses and two semesters of  
  Organic Chemistry  

Note: Independent study courses and AMS 311 (Same as Biology 231) do  
not fulfill the 300-level or 400-level course requirements. WIOX 316 Biology:  
Evolution, in the Williams Oxford Program qualifies for major credit at the 200-  
level.  

Distribution Requirement  
In order to ensure that majors broaden their knowledge of biology, one of  
the elective courses for the major must include an upper-level course covering  
biological processes at levels of organization above the cell. Courses that  
satisfy this distribution requirement are indicated in the individual course  
description.  

COURSE SELECTION AND PLACEMENT  
It is preferable for students who plan to major in biology, or think they may  
be interested in doing so, to take Biology 101, 102 during their first year at  
Williams. It is also possible to begin the Biology major during the sophomore  
year, although students should understand that it may require taking two or  
more biology courses during several semesters. Students interested in biology,  
whether or not they intend to major in it, are encouraged to take Biology 101, 102.  
It is also possible, with permission of the instructor, to take Biology 203 Ecology,  
Biology 204 Animal Behavior and Biology 220 Field Botany without prerequisite.  
Other 100-level biology courses are designed specifically for students who do not  
intend to take additional upper-level courses in biology. All of these courses satisfy  
the Division III distribution requirement.  
Beginning students should normally enroll in Biology 101 and 102. Students  
with unusually strong backgrounds in biology, such as those with outstanding  
performance on the College Board Biology Advanced Placement Test, may be  
permitted to elect a sophomore-level course in lieu of Biology 101 and/or  
Biology 102 upon successful completion of a departmental qualifying exam,  
administered during First Days.  

COURSES RELATED TO THE BIOLOGY MAJOR  
Students planning to pursue their interest in biology and related fields after  
completing their undergraduate degrees are strongly encouraged to take one  
year of chemistry, at least one semester of mathematics (a course in statistics  
is recommended), and one semester of physics. Students may wish to check  
the requirements for graduate admission at relevant universities, and are also  
encouraged to consult with the Biology Department’s graduate school advisor  
about prerequisites for admission to graduate programs.  

BIOCHEMISTRY AND MOLECULAR BIOLOGY  
Students interested in Biochemistry and Molecular Biology (BIMO) should  
consult the general statement under Biochemistry and Molecular Biology.  

BIОINFORMATICS, GENOMICS AND PROTEOMICS  
Students interested in Bioinformatics, Genomics and Proteomics (BiGP)  
should consult the general statement under Bioinformatics, Genomics and  
Proteomics. Biology majors interested in this field are strongly encouraged to  
enroll in Integrative Bioinformatics, Genomics, and Proteomics (Biology 319).  

NEUROSCIENCE  
Students interested in Neuroscience (NSCI) should consult the general  
statement under Neuroscience.  

PUBLIC HEALTH  
Students interested in Public Health (PH) should consult the general  
statement under Public Health.  

ENVIRONMENTAL STUDIES  
Students interested in Environmental Studies (ENVI) should consult the  
general statement under Environmental Studies.  

THE DEGREE WITH HONORS IN BIOLOGY  
In order to be recommended for the degree with honors, a Biology major is  
normally expected to have completed the equivalent of two semesters and a  
winter study (031) of independent research culminating in a thesis which  
demonstrates outstanding achievement of an original and innovative nature.  

151
Although the presentation of a thesis and associated oral presentation in the fall and poster defense in the spring are required for consideration for a degree with honors, their completion should not be interpreted as a guarantee of a degree with honors. The principal considerations in admitting a student to the program of independent honors research will be mastery of fundamental material and skills, ability to pursue independent study successfully, and demonstrated interest and motivation. Students interested in participating in the honors program should meet with the department early in the spring semester of the junior year. Approval must be received before spring registration in the junior year. The number of Biology Department faculty available to mentor research students and the number of students each can accommodate will vary from year to year. Although the department will make every effort to provide an opportunity for students to conduct Honors research, you should be aware that it may not be possible to assign all applicants to a laboratory.

In addition to the normal honors route, which includes two semesters (Biology 493-494) and a winter study of research (WSP 031) during senior year, students have the option, subject to the approval of their thesis advisor, to begin the honors research during winter study junior year or during the second semester junior year. In general, thesis students who start during WSP or spring semester of their junior year are working on a project that requires winter or spring field work. Students beginning honors in winter study of junior year would take Biology 494 in the spring of their junior year followed by Biology 493 in the fall of their senior year; students beginning honors during winter study of junior year would take Biology 494 in the spring of their junior year followed by Biology 493 in the fall of their senior year. The number of Biology Department faculty available to mentor research students and the number of students each can accommodate will vary from year to year. Although the department will make every effort to provide an opportunity for students to conduct Honors research, you should be aware that it may not be possible to assign all applicants to a laboratory.

STUDY ABROAD

Students planning on majoring in Biology are strongly advised to take Biology 202 before going abroad, since Biology 202 is required for the major and a prerequisite for many upper-level courses; a Genetics course taken while studying away cannot substitute for Biology 202. Biology majors studying abroad may receive credit toward the major for at most two 200-level electives; the departmental distribution requirement can be satisfied through an appropriate course approved by the Department Chair. Students should meet with the Department Chair to discuss study abroad options. You can find general study abroad guidelines for Biology here.

CREDIT FOR COURSES AT OTHER INSTITUTIONS

Students who enroll in study away programs may receive credit for up to two 200-level electives toward the biology major upon approval of the course syllabi by the Biology Department Chair.

Students wishing to satisfy prerequisites for courses offered by the Biology Department with courses taken at other institutions should consult, in person, with a member of the Biology Department, prior to registering for the course that requires a prerequisite. Such consultations will include a review of the course syllabi and examination of the student’s previous college work, and students should bring these materials with them.

RESEARCH AND THESIS COURSES

Individual research projects must be approved by the department. Application should be made to the department prior to spring registration.

Note: Senior thesis and independent study courses do not count as 300-level or 400-level course requirements for the major. Only one research course (i.e., BIOL 297, BIOL 298, BIOL 493, or BIOL 494) may be counted towards the major requirements.

BIOL 101(F) The Cell

This course investigates cell structure and function as a consequence of evolutionary processes, and it stresses the dynamic properties of living systems. Topics include an introduction to biological molecules and enzyme action, membrane structure and function, energy exchange and design of metabolic systems, expression of genetic information, cell signaling, cell trafficking, the cell cycle, and cancer. Student-designed laboratory experiments and discussions based on primary biology literature will highlight how biological knowledge is created and understood.

Class Format: Lecture, 3 hours per week; laboratory and discussion, 3 hours per week

Requirements/Evaluation: evaluation will be based on hour tests, a final exam, lab reports, discussion assignments, and discussion participation

Extra Info: may not be taken on a pass/fail basis

Prerequisites: none

Enrollment Preferences: first year students

Enrollment Limit: 45/Lecture

Expected Class Size: 192

BIOL 102(S) The Organism

This course focuses upon the developmental and evolutionary processes that have led to the unique diversity of multicellular organisms. We consider many levels of biological organization, from molecular and cellular to individuals and populations in our examination of evolutionary concepts. Topics include meiosis and sexual reproduction, developmental and evolutionary mechanisms, and speciation with representative examples from a diversity of plants and animals. Readings are drawn from a variety of sources, including the recent primary literature.

Class Format: lecture/discussion/laboratory, six hours per week

Requirements/Evaluation: will be based on hour tests, a final exam, three lab reports, and problem sets

Extra Info: may not be taken on a pass/fail basis

Prerequisites: BIOL 101 or permission of instructor

BIOL 133 Biology of Exercise and Nutrition

This class, intended for the non-scientist, focuses on the impact of exercise and nutrition on the human body. We will discuss topics such as how different types of training influence exercise performance; the changes that occur in the cardiovascular system during an exercise routine; the inherent limits of the body to perform aerobic and anaerobic tasks; and the long-term health consequences of a lifetime of activity inactivity. We will also examine how nutrition and metabolism affect body composition. For example, we will rigorously and scientifically scrutinize the use of ‘fad’ diets as a means to lose weight.

Class Format: lecture 3 hours per week

Requirements/Evaluation: evaluation will be based on exams and lab notebook and class participation

Prerequisites: none

Enrollment Preferences: seniors, juniors, sophomores, then first-year students

Enrollment Limit: 120

Expected Class Size: 120

Dept. Notes: does not satisfy the distribution requirement for the Biology major

Distributional Requirements:

Division 3

Other Attributes:

PHIL Biomedical Determinants of Health

Not Offered Academic Year 2017

LEC Instructor: Steven Swapo

BIOL 134 The Tropics: Biology and Social Issues (D)

This course explores the biological dimensions of social issues in tropical societies, and focuses on specifically on the peoples and cultures of tropical regions in Africa, Asia, Latin America, Oceania, and the Caribbean. Tropical issues have become prominent on a global scale, and many social issues in the tropics are inextricably bound to human ecology, evolution, and physiology. The course begins with a survey of the biological environment of humans, major climatic and habitat features. The next section focuses on human population biology, and emphasizes demography and the role of disease particularly malaria and AIDS. The final section of the course is devoted to a study of the ways in which natural and local and global ecosystems including the challenges of tropical food production, the importance of organic diversity, and the interaction of humans with their supporting ecological environment.

This course fulfills the EBI requirement. Through lectures, debates and readings, students confront social issues in the tropics from the perspective of biologist. This builds a framework for lifelong exploration of human diversity.

Fall 2016
Class Format: lecture/debate, three hours per week
Requirements/Evaluation: evaluation will be based on two hour exams, a short paper, panel preparation, and a final exam
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none
Enrollment Preferences: seniors, juniors, sophomores, and first-year students—in that order
Enrollment Limit: 60
Expected Class Size: 60
Dept. Notes: does not count for major credit in Biology; does not satisfy the distribution requirement in the Biology major

BIOL 136 Studying Human Genetic Diversity: Individuals, Populations, and ‘Races’—Dangerous Biology (D)

Scientists are rapidly acquiring DNA sequence information on thousands of individuals from a wide variety of human populations. This information can be used to illuminate human history and evolution. It can also be used in the field of medicine to develop new drugs and as a first step toward tailoring treatments to match individuals’ genomes. This information can also create new ethical and social dilemmas. Do such studies support or refute the idea of a biological basis for ‘race’? Can the data be used to justify societal inequities? Do the data have any use outside of scientific circles? Through reading scientific articles we’ll explore genome sequencing data to determine the types of DNA differences that exist among humans. We’ll examine the data in the light of human population history (migration, population bottlenecks, selection) to understand how these variations come about. Throughout we’ll discuss the implications of these studies for individuals and for society. In particular we’ll critique the use of such information in guiding policy and practice in areas such as genetic screening and eugenics, ancestry testing, ‘race-based’ medicine, forensics.

As an EDI course, we’ll examine issues of power and privilege in shaping practice and policy associated with these genetic initiatives, such as in deciding what populations to study, in administering informed consent, and in addressing health disparities.

Class Format: seminar
Requirements/Evaluation: one exam, one short paper (4-6 pages), final paper (10-12 pages); class participation
Prerequisites: none
Enrollment Preferences: juniors, sophomores, seniors, first-years; not open to students who have taken BIOL 202 or BIOL132
Enrollment Limit: 20
Expected Class Size: 20

Distributional Requirements: Division 3
Exploring Diversity
Other Attributes: ENVI Core Courses
ENVS Core Courses

EVST Living Systems Courses

Not Offered Academic Year 2017

LEC Instructor: David Smith
BIOL 202(F) Genetics (Q)

Genetics, classically defined as the study of heredity, has evolved into a discipline whose limits are continually expanded by innovative molecular technologies. This course covers the experimental basis for our current understanding of the inheritance, structures, and functions of genes. It introduces approaches used by contemporary geneticists and molecular biologists to explore questions in areas of biology ranging from evolution to medicine. The laboratory part of the course provides an experimental introduction to modern genetic analysis. Laboratory experiments include linkage analysis, bacterial transformation with plasmids and DNA restriction mapping.

Class Format: lecture/laboratory, six hours per week
Requirements/Evaluation: evaluation will be based on biweekly problem sets, weekly laboratory exercises and laboratory reports, and examinations
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: BIOL 101 and 102
Enrollment Limit: none
Expected Class Size: 84
Dept. Notes: does not satisfy the distribution requirement in the Biology major

BIOL 203(F) Ecology (Q)

This course combines lectures with field and indoor laboratory exercises to explore factors that determine the distribution and abundance of plants and animals in natural systems. The course begins with an overall view of global patterns and then builds from the population to the ecosystem level. An emphasis is given to basic ecological principles and relates them to current environmental issues. Selected topics include population dynamics (competition, predation, mutualism); community interactions (succession, food chains and diversity) and ecosystem function (biogeochemical cycles, energy flow).

Class Format: lecture/laboratory, six hours per week
Requirements/Evaluation: evaluation will be based on problem sets, lab reports, hour exams, and a final exam
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: BIOL 101 and 102, or ENVI 101 or 102, or permission of
Enrollment Limit: none
Expected Class Size: 35

BIOL 204(S) Animal Behavior

Crosslistings: BIOL 204/NSCI 204

Making sense of what we see while watching animals closely is both an enthralling pastime and a discipline that draws on many aspects of biology. Explanations can be found on many levels: evolutionary theory tells us why certain patterns have come to exist, molecular biology can help us understand how those patterns are implemented, neuroscience gives insights as to how the world appears to the behaving animal, endocrinology provides information on how suites of behaviors are regulated. The first part of the course focuses upon how descriptive studies provide the basis for formulating questions about behavior as well as the statistical methods used to evaluate the answers to these questions. We then consider the behavior of individuals, both as it is mediated by biological mechanisms and as it appears from an evolutionary perspective. The second half of the course is primarily concerned with the behaviors of groups of animals from a wide variety of vertebrate and invertebrate species, concentrating upon the stimuli, responses, and internal mechanisms that maintain social systems and on the selection pressures that drive animals toward a particular social system.

Class Format: lecture/laboratory, six hours per week
Requirements/Evaluation: evaluation will be based on examinations, lab reports, and a research paper
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: BIOL 102, or PSYC 101, or permission of instructor
Enrollment Preferences: Biology majors and Neuroscience concentrators
Enrollment Limit: 32
Expected Class Size: 32
Dept. Notes: satisfies the distribution requirement in the Biology major

Distributional Requirements: Division 3

BIOL 205(S) Physiology

This lecture-based course examines principles, patterns, and mechanisms of biological function from the level of cells and tissues to the whole organism. The themes of the course include structure and function, mechanisms of regulation, control and integration, and adaptation to the environment. Examples of these themes are taken from a wide variety of organisms with a focus on vertebrates. Laboratories provide practical experience in measurement and experimental elucidation of physiological phenomena and functional analysis of gross structure.
**BIOL 211(S) Paleobiology**

**Crosslistings:** GEOG 211, BIOI 211

The fossil record is a direct window into the history of life on Earth and contains a wealth of information on evolution, biodiversity, and climate change. This course investigates the record of ancient life forms, from single-celled algae to snails to dinosaurs. In addition to the intellectual discovery of fossils as organic relics and the ways in which fossils have been used to support conflicting views on nature, geologic time, and evolution, we will cover a range of topics central to modern paleobiology. These include: how the fossil record informs our understanding of evolutionary processes including speciation; the causes and consequences of mass extinctions; how fossils help us tell time and reconstruct the Earth’s climatic and tectonic history; statistical analysis of the fossil record to reconstruct biodiversity through time; analysis of fossil morphology to recreate the biomechanics of extinct organisms; and using fossil communities to reconstruct past ecosystems. Laboratory exercises will take advantage of Williams’ superb fossil collections as well as published datasets to provide a broad understanding of fossils and the methods we use to study the history of life on Earth. We will also view a diversity of fossils in their geologic and paleo-environmental context on our field trip to Eastern New York.

**Class Format:** lecture/laboratory; field trip to the the Paleozoic of New York State

**Requirements/Evaluation:** evaluation will be based on lab assignments, short quizzes and writing assignments, and a final exam

**Prerequisites:** any 100-level GEOG course or BIOI 102, 203 or 205

**Enrollment Preferences:** sophomores and juniors

**Enrollment Limit:** 15

**Expected Class Size:** 12

**BIOL 219T(D) DNA, Life, and Everything (W)**

Since the molecular biology revolution of the 1960s, a view of biology has developed which regards living organisms as predictable products of their encoded DNA programs. A motto for this philosophy and scientific approach could be “To know my DNA is to know me.” In this tutorial we’ll examine the power and the limitations of DNA analysis and manipulation for understanding life. Students will read and discuss scientific articles that deal with creativity and artificial life (the field of synthetic biology), environmental DNA sampling (to deduce community structure; to discover new, uncultured species), human genome diversity surveys (to discover the basis for human phenotypic variation and human evolutionary history), comparative genomics to study evolutionary questions (ex., chimps and Neanderthals compared to humans), and resurrecting extinct organisms.

**Class Format:** tutorial

**Requirements/Evaluation:** evaluation will be based on 5 papers (4-5 pages each) and on in-class performance as a presenter or challenger

**Extra Info:** may not be taken on a pass/fail basis, not available for the fifth course option

**Prerequisites:** none

**Enrollment Preferences:** junior, seniors, then sophomores

**Enrollment Limit:** 10

**Expected Class Size:** 10

**Dept. Notes:** does not satisfy the distribution requirement in the Biology major

**Distributional Requirements:**
- Division 3
- Writing Intensive

**Other Attributes:**
- SCST Related Courses

**Not Offered Academic Year 2017**

**TUT Instructor:** Marsha Aalschuler

---

**BIOL 219T(S) Dangerous Exposures: Environment, Immunity, and Infectious Disease (W)**

Global reports of emerging infectious diseases and old diseases with new pathogenic properties incite fears for personal safety as well as national security. The specter of a contagious pandemic has captured the public imagination through the mass news media, movies, and even popular on-line and board games. In this tutorial we will explore the ecology and evolution of several recently emergent diseases such as Ebola hemorrhagic fever, dengue, and AIDS. Topics to be considered include transmission dynamics, epidemiological modeling of vaccination strategies, and wildlife reservoirs that contribute to human virus exposure. We will examine progress in preventing the parasitic disease malaria and why such diseases have proven so refractory. We will also discuss the science behind the recent development of the vaccine against the human papillomavirus, which causes cervical cancer, and the intriguing and highly unusual transmissible cancers in dogs and Tasmanian devils. Finally, we will think about the contributions of inadequate diagnostic capacities world-wide and broader issues of resource shortages in driving the global emergence of drug resistance in tuberculosis and other diseases. One common theme in each of these case studies will be the interplay between the host immune response and the evolution of the pathogen. Although the primary focus of the course is on biology rather than policy, all readings will have implications for public health and/or conservation biology.

**Class Format:** tutorial

**Requirements/Evaluation:** six 4- to 5-page papers; tutorial presentations, and the student’s progress towards intellectual independence and creativity as a presenter and a respondent
BIOL 220(S) Field Botany and Plant Natural History
Crosslistings: BIOL 220/ENVI 220
This field-lecture course covers the evolutionary and ecological relationships among plant groups represented in our local and regional flora. Lectures focus on the evolution of the land plants, the most recent and revolutionary developments in plant systematics and phylogeny, and characteristics of plant families and cultural and economic uses of plants, native species. The labs cover field identification, natural history, and ecology of local species.
Class Format: lecture
Requirements/Evaluation: evaluation will be based on exams, field quizzes, field notebook and a class project
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none
Enrollment Preferences: seniors, Biology majors, and Environmental Studies majors & concentrators
Enrollment Limit: 40
Expected Class Size: 25
Dept. Notes: satisfies the distribution requirement in the Biology major
Distributional Requirements: Division 3

BIOL 225(F) Natural History of the Berkshires: Stone Hill (W)
Crosslistings: BIOL 225/ENVI 225
This field-seminar course examines the rich diversity of upland and wetland communities located within walking distance of the Williams College Campus in general and on Stone Hill in particular. The course will utilize the 2016 exhibition Sensing Place: The Nature of Stone Hill that will be hosted by the Clark Art Institute at the Lunder Center on Stone Hill and co-curated by the instructor. Seminars/discussions/field exercises will focus on the biological, geological, climatological, and historical underpinnings needed to observe, interpret, and analyze the biological communities of this place. The field lab investigations will engage students in reading the landscape, field identification of indicator species, natural history, and using historical documents and textural materials. On a weekly basis, students will write response papers that integrate field observations and experiences with reading assignments. Students will also undertake a longitudinal study of a specific site on Stone Hill and write entries in a field journal on a weekly basis. These entries will serve as the foundation for a final research project report on the specific site.
Class Format: seminar / field laboratory, three hours per week
Requirements/Evaluation: based on field journal entries, field trip / reading responses, one hour exam, class presentations, and a final project
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none
Enrollment Preferences: seniors, Biology majors, and Environmental Studies majors and concentrators
Enrollment Limit: 12
Expected Class Size: 10

Distributional Requirements: Division 3

Spring 2017
LEC Section: 01 TBA Instructor: Joan Edwards

BIOL 301 Developmental Biology
Developmental biology has undergone rapid growth in recent years and is becoming a central organizing discipline that links cells and molecular biology, evolution, anatomy and medicine. We are now beginning to have a molecular understanding of fascinating questions such as how cells decide their fate, how patterns are created, how male and females are distinguished, and how organisms came to be different. We have also discovered how the misregulation of important development regulatory genes can lead to a variety of known cancers and degenerative diseases in humans. In this course we will examine these and related topics combining a rich classical literature with modern genetic and molecular analyses.
Class Format: lecture/discussion/laboratory, six hours per week
Requirements/Evaluation: evaluation will be based on hour exams, short papers, and a final exam
Prerequisites: BIOL 202 or permission of instructor
Enrollment Preferences: Biology majors
Enrollment Limit: 24
Expected Class Size: 15
Dept. Notes: does not satisfy the distribution requirement in the Biology major
Distributional Requirements: Division 3
Other Attributes: BIMO Interdepartmental Electives

Not Offered Academic Year 2017
LEC Instructor: Robert Savage

BIOL 302(F) Communities and Ecosystems (Q)
Crosslistings: BIOL 302/ENVI 312
An advanced ecology course that examines how species interact with each other and their environment with a focus on conservation implications. This course emphasizes phenomena that emerge in complex ecological systems, building on the fundamental concepts of population biology, community ecology, and ecosystem science. This foundation will be used to understand specific topics relevant to conservation including the functional significance of diversity for ecosystem stability and processes. Lectures and labs will explore how they characterize the emergent properties of communities and ecosystems, and how theoretical, comparative, and experimental approaches are used to understand their structure and function. The lab component of this course will emphasize hypothesis-oriented field experiments but will also include some laboratory microcosm experiments. The laboratory component of the course will culminate with a self-designed independent or group project.
Class Format: lecture/laboratory, six hours a week
Requirements/Evaluation: evaluation will be based on lab reports, a midterm exam, a term project presentation, and a final project paper
Prerequisites: BIOL/ENVI 203 or 220
Enrollment Preferences: Biology majors and Environmental Studies majors and concentrators
Enrollment Limit: 28
Expected Class Size: 24
BIOL 305(S) Evolution (Q)

This course offers a critical analysis of contemporary concepts in biological evolution. We focus on the relation of evolutionary mechanisms (e.g., selection, drift, and migration) to long-term evolutionary patterns (e.g., evolutionary innovations, origin of major groups, and the emergence of diversity). Topics include micro-evolutionary models, natural selection and adaptation, sexual selection, speciation, the inference of evolutionary history among others.

Class Format: lecture/discussion/laboratory, six hours per week

Requirements/Evaluation: evaluation will be based on independent research project, problem sets, participation in discussions and exams

Prerequisites: BIOL 202

Enrollment Preferences: Biology majors

Enrollment Limit: 24

LAB Section: 02   W 01:00 PM 04:00 PM   Instructor: Manuel Morales

BIOL 306 Cellular Regulatory Mechanisms

This course explores the regulation of cellular function and gene expression from a perspective that integrates current paradigms in molecular genetics, intracellular trafficking, genomics, and synthetic biology. Selected topics include: the contribution of nuclear organization to genome regulation, mechanisms to maintain genomic integrity, transcriptional and post-transcriptional regulation, nuclear export, cell cycle and cell signaling. A central feature of the course will be discussion of articles from the primary literature, with an emphasis on the molecular bases for a variety of human pathologies such as cancer and aging. The laboratory will consist of a semester-long project that incorporates fluorescence-based approaches, quantitative PCR analysis of transcriptional patterns, bioinformatics, and protein analysis.

Class Format: lecture/discussion/laboratory

Requirements/Evaluation: evaluation will be based on three take-home tests, in-class discussion of papers, laboratory notebook/report, an independent lab research project, and a research paper

Prerequisites: BIOL 202

Enrollment Preferences: Biology majors; not open to first-year students

Enrollment Limit: 24

Expected Class Size: 22

LAB Section: 01   MWF 10:00 AM 10:50 AM   Instructor: Luana Maroja
LAB Section: 02   W 01:00 PM 04:00 PM   Instructor: Luana Maroja
LAB Section: 03   R 01:00 PM 04:00 PM   Instructor: Luana Maroja

BIOL 311 Neural Systems and Circuits

This course will examine the functional organization of the vertebrate brain, emphasizing both neuroanatomy and neurophysiology. How do specific populations of neurons and their connections analyze sensory information, form perceptions of the external and internal environment, make cognitive decisions, and execute movements? How does the brain produce feelings of reward/motivation and aversion/pain? How does the brain regulate homeostatic functions such as sleep, food intake, and thirst? We will explore these questions using a holistic, integrative approach, considering molecular/cellular mechanisms, physiological characterizations of neurons, and connectivity among brain systems. Laboratory sessions will provide experience in examining macroscopic and microscopic neural structures, as well as performing experiments to elucidate the structure and function of neural systems using classical and cutting-edge techniques.

Class Format: lecture/lab, six hours per week

Requirements/Evaluation: class participation, laboratory notebooks and posters, hour exams and a final exam

Prerequisites: BIOL 212 (same as PSYC 212 or NSCI 201) or BIOL 205

Enrollment Preferences: Biology majors and Neuroscience concentrators

Enrollment Limit: 24

Expected Class Size: 24

LAB Section: 01   MWF 10:00 AM 10:50 AM   Instructor: Tim Lebestky
LAB Section: 02   M 01:00 PM 04:00 PM   Instructor: Tim Lebestky
LAB Section: 03   T 01:00 PM 04:00 PM   Instructor: Tim Lebestky

BIOL 313(S) Immunology

The rapidly evolving field of immunology examines the complex network of interacting molecules and cells that function to recognize and respond to agents foreign to the individual. In this course, we will focus on the biochemical mechanisms that act to regulate the development and function of the immune system and how alterations in different system components can cause disease. Textbook readings will be supplemented with current literature.

Class Format: lectures, three hours a week; laboratory, three hours a week
BIOL 315 Microbiology: Diversity, Cellular Physiology, and Interactions

Bioremediation and the alarming spread of antibiotic resistant bacteria are but two of the reasons for the resurgence of interest in the biology of microorganisms. This course will examine microbes from the perspectives of cell structure and function, genomics, and evolution. A central theme will be the characterization of bacteria as they evolve to fill specific ecological niches, with an emphasis on microbes: host interactions that lead to pathogenesis. We will consider communication among bacteria as well as between bacteria and their environment. Topics include: microbial development, population dynamics, bioremediation, plant and animal defenses against infection, and bacterial strategies to subvert the immune system. In the lab, major projects will focus on horizontal gene transfer, metagenomics, and the isolation and characterization of bacteria from natural environments. Students will also use flow cytometry to investigate fundamental aspects of the mammalian immune system. The lab experience will culminate in multi-week independent investigations. Readings will be supplemented by articles from the primary literature.

Prerequisites: BIOL 202
Enrollment Preferences: senior and junior Biology majors
Enrollment Limit: 24
Expected Class Size: 24

BIMO Required Courses

Not Offered Academic Year 2017

BIOL 319(F) Integrative Bioinformatics, Genomics, and Proteomics Lab (Q)

What can computational biology teach us about cancer? In this capstone experience for the Genomics, Proteomics, and Bioinformatics program, computational analysis and wet-lab investigations will inform each other, as students majoring in biochemistry, computer science, and mathematics/statistics, and physics contribute their own expertise to explore how ever-growing gene and protein data-sets can provide key insights into human disease. In this course, we will take advantage of one well-studied system, the highly conserved Ras-related family of proteins, which play a central role in numerous fundamental processes within the cell. The course will integrate bioinformatics and molecular biology, using database searching, alignments and pattern matching, phylogenetics, and recombinant DNA techniques to reconstruct the evolution of gene families by focusing on the gene duplication events and gene rearrangements that have occurred over the course of eukaryotic speciation. By utilizing high-through put approaches to investigate genes involved in the MAPK signal transduction pathway in human colon cancer, students will uncover regulatory mechanisms that are aberrantly altered by siRNA knockdown of putative regulatory components. This functional genomic strategy will be coupled with independent projects using phosphorylation-state specific antisera to test our hypotheses.

Proteomic analysis will introduce the students to de novo structural prediction and threading algorithms, as well as data-mining approaches and Bayesian modeling of protein network dynamics in single cells. Flow cytometry and mass spectrometry will be used to study networks of interacting proteins in colon tumor cells.

Class Format: two afternoons of lab, with one hour of lecture, per week
Prerequisites: BIOL 202 and CHEM 251/255 and CHEM 155/256
Enrollment Preferences: seniors, then juniors, then sophomores
Enrollment Limit: 12
Expected Class Size: 12

Extra Info: may not be taken on a pass/fail basis
Prerequisites: BIOL 101 and CHEM 251/255 and CHEM 155/256
Enrollment Preferences: junior and senior Biology and Chemistry majors and BIMO concentrators
Enrollment Limit: 48

BIOL 322(S) Biochemistry II: Metabolism (Q)

This lecture course provides an in-depth presentation of the complex metabolic reactions which are central to life. Emphasis is placed on the biological flow of energy including alternative modes of energy generation (aerobic, anaerobic, photosynthetic); the regulation and integration of the metabolic pathways including compartmentalization and the transport of metabolites; and biochemical reaction mechanisms including the structures and mechanisms of enzymes. This comprehensive study also includes the biosynthesis and catabolism of small molecules (carbohydrates, lipids, amino acids, and nucleotides). Laboratory experiments introduce the principles and procedures used to study enzymatic reactions, bioenergetics, and metabolic pathways.

Class Format: lecture, three hours per week; laboratory, three hours per week
Prerequisites: BIOL 101 and CHEM 251/255 or permission of instructor
Enrollment Preferences: junior and senior Biology and Chemistry majors and BIMO concentrators
Enrollment Limit: 64

BIOL 326(F) Cellular Assembly and Movement

This course will focus on how multi-protein complexes are assembled to control key cellular processes in eukaryotic systems: 1) protein sorting and trafficking, 2) establishment and maintenance of cell architecture, and 3) mitosis, cell migration and tissue morphogenesis that require coordination of the membrane transport and cytoskeleton. The course will highlight...
involvement of these processes in pathological conditions. Laboratories will use mammalian tissue culture as a model system to study cellular functions. Important techniques in cell biology will be introduced in the first half of the semester; in the second half of the term, students will conduct a multi-week independent project. Textbook readings will be supplemented with primary literature.

Class Format: lectures, three hours a week; laboratory, three hours a week, the laboratory projects will require additional time outside of class hours

Requirements/Evaluation: three exams, in-class discussion of papers, lab reports, an oral presentation and research paper based on an independent lab research project

Extra Info: may not be taken on a pass/fail basis

Prerequisites: BIOL 202

Enrollment Preferences: senior and junior Biology majors

Enrollment Limit: 12

Expected Class Size: 12

Dept. Notes: does not satisfy the distribution requirement in the Biology major

Distributional Requirements:

Division 3

Other Attributes: BIMO Interdepartmental Electives

BIOL 405T Sociobiology (W)

Sociobiology, or the study of social behavior, has challenged the limits of evolutionary theory since Darwin described the non-reproducing castes among social insects (i.e., eusociality) as "one special difficulty." Inclusive fitness theory and Hamilton's rule—that an altruistic act can evolve where the benefit to related individuals exceeds the cost to the actor—potentially resolves Darwin's paradox. Nevertheless, explanations including delayed fitness benefits and ecological constraints have been suggested as alternatives to inclusive fitness theory. Moreover, the theoretical justification for inclusive fitness theory has recently been vigorously challenged. This course will use readings from the primary literature to examine the evidence for inclusive fitness as a potential explanation for topics including the evolution of helping behavior, eusociality and its relationship to extraordinary sex ratios and spiteful behavior. Other topics that we will cover include the evolution of deceit and self-deception.

Class Format: tutorial

Requirements/Evaluation: evaluation will be based on five (4-5-page) papers: tutorial presentations, & the student's effectiveness as a critic

Extra Info: may not be taken on a pass/fail basis

Prerequisites: BIOL 202 and either BIOL/ENVI 203 or 204 or 302 or 305 or permission of instructor; open to juniors and seniors

Enrollment Preferences: senior Biology majors who have not taken a 400-level course

Enrollment Limit: 10

Expected Class Size: 12

Dept. Notes: satisfies the distribution requirement in the Biology major

Distributional Requirements:

Division 3

Writing Intensive

Not Offered Academic Year 2017

TUT Instructor: Manuel Morales

BIOL 406 Dynamics of Internal Membrane Systems

Eukaryotic cells build and maintain a diverse set of internal membrane compartments, such as the endoplasmic reticulum, the Golgi compartment, and lysosomes, which exist as parts of an interconnected and dynamic membrane system. Each of these membrane compartments has unique functions despite a high rate of exchange between the different organelles. This course will mechanistically examine how the identity of organelles is achieved via highly regulated membrane trafficking events and investigate the importance of membrane trafficking in specialized biological processes including neurotransmission, glucose homeostasis, and immune cell killing. We will read classic and current primary literature articles and discuss the essential techniques, experimental design, and models of cell biology.

Class Format: seminar

Requirements/Evaluation: discussion, three hours per week; evaluation will be based on class participation and 4 three page papers

Extra Info: may not be taken on a pass/fail basis

Prerequisites: BIOL 202

Enrollment Preferences: open to juniors and seniors with preference given to senior biology majors who have not taken a 400-level course, then to juniors

Enrollment Limit: 12

Expected Class Size: 12

Distribution Notes: does not satisfy the distribution requirement in Biology

Distributional Requirements:

Division 3

Other Attributes: BIMO Interdepartmental Electives

Not Offered Academic Year 2017

SEM Instructor: Alex Engel

BIOL 407(S) Neurobiology of Emotion

Crosslistings: BIOL 407/NSCI 347

Emotion is influenced and governed by a number of neural circuits and substrates, and emotional states can be influenced by experience, memory, cognition, and many external stimuli. We will read and discuss articles about mammalian neuroanatomy associated with emotion as defined by classic lesion studies, pharmacology, electrophysiology, fMRI imaging, knockout mouse studies, as well as new optogenetic methods for investigating neural circuit function in order to gain an understanding of the central circuits and neurotransmitter systems that are implicated in emotional processing and mood disorders.

Class Format: discussion, three hours per week

Requirements/Evaluation: evaluation will be based on class participation and several short papers

Prerequisites: BIOL 202 and 212; open to juniors and seniors

Enrollment Preferences: senior Biology majors who have not taken a 400-level Biology course; then to eligible NSCI concentrators

Enrollment Limit: 12

Expected Class Size: 12

Dept. Notes: does not satisfy the distribution requirement in the Biology major

Distributional Requirements:

Division 3

Other Attributes: BIMO Interdepartmental Electives

Not Offered Academic Year 2017

SEM Instructor: Dawn Carone

BIOL 410(S) Nanomachines in Living Systems

Through reading and discussing the primary literature, this course will explore how nanometer-sized biological molecules like proteins perform functions that require integration of information and transmission of force at much larger scales, microns and above. These nanoscale proteins will be considered as nanomachines that can transform a chemical energy into a mechanical one.

We will focus on the cytoskeleton, which gives cells their shape, organizes the internal parts of cells and provides mechanical support for essential cellular processes like cell division and movement. An emphasis will be placed on how the biochemical properties of actin, actin-binding proteins and motors are used to generate mechanical force necessary for the respective biological function. Topics will include some controversial and emerging hypotheses in the field: sliding versus depolymerizing hypotheses for constriction of the contractile ring in cytokinesis, roles of cytoskeleton in pathogen entry and propagation, organelle dynamics, polarity establishment in cell migration, immunological synapse and neuronal function.

Class Format: three hours per week

Requirements/Evaluation: class participation and several short papers

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: BIOL 202; open to juniors and seniors

Enrollment Preferences: senior Biology majors who have not taken a 400-level course, then juniors

Enrollment Limit: 24

Expected Class Size: 24

Dept. Notes: does not satisfy the distribution requirement in the Biology major

Distributional Requirements:

Division 3

Other Attributes: BIMO Interdepartmental Electives

Spring 2017

BIOL 414(F) Life at Extremes: Molecular Mechanisms

All organisms face variability in their environments, and the molecular and cellular responses to stresses induced by environmental change often illuminate otherwise hidden facets of normal physiology. Moreover, many...
organisms have evolved unique molecular mechanisms, such as novel cellular compounds or macromolecular structural modifications, which contribute to their ability to survive continuous exposure to extreme conditions, such as high temperatures or low pH. This course will examine how chaperonins, proteases, and heat- and cold-shock proteins are regulated in response to changes in the external environment. We will then consider how these and other molecular mechanisms function to stabilize DNA and proteins- and, ultimately, cells and organisms. Other extreme environments, such as hydrothermal vents on the ocean floor, snow fields, hypersaline lakes, the intertidal zone, and acid springs provide further examples of cellular and molecular responses to extreme conditions. Biotechnological applications of these molecular mechanisms in areas such as protein engineering will also be considered. Class discussions will focus upon readings from the primary literature.

Class Format: discussion, three hours per week
Requirements/Evaluation: evaluation will be based on class participation and several short papers
Extra Info: may not be taken on a pass/fail basis
Prerequisites: BIOL 202; open to juniors and seniors
Enrollment Preferences: senior Biology majors who have not taken a 400-level course; then juniors

BIMO Interdepartmental Electives

BIOL 416 Epigenetics

After decades of studies emphasizing the role of DNA in heredity, scientists are now turning their attention from genetics to a variety of heritable phenomena that fall under the heading of epigenetics, heritable changes that do not result from an alteration in DNA sequence. Research reveals that stable changes in gene function can result from, for example, stable changes in protein conformation, protein modification, DNA methylation, or the location of a molecule within the cell. Using readings from the primary literature, we will explore the epigenetic nature and molecular mechanisms underlying a diverse array of phenomena such as prion propagation, genetic imprinting, dosage compensation, transvection, centromere formation, vernalization, and programmed genome rearrangements. The significance of epigenetic processes for development, evolution, and human health will be discussed.

Class Format: discussion, three hours per week
Requirements/Evaluation: evaluation will be based on class participation and several short papers
Prerequisites: BIOL 202; open to juniors and seniors
Enrollment Preferences: senior Biology majors who have not taken a 400-level course; then juniors
Enrollment Limit: 12
Expected Class Size: 12
Dept. Notes: does not satisfy the distribution requirement in the Biology major
Distributional Requirements:
Division 3
Other Attributes:

BIOL 417(F) Translational Immunology: From Bench to Bedside

Recent advances in the field of immunology have led to the development of new approaches to prevent and treat diseases that affect millions of people worldwide. Discoveries that elucidate the body's natural immune response have become powerful tools in treating the world's major diseases— infection, autoimmunity and cancer. This course will use readings from the primary literature to explore central themes involved in translating basic research to new clinical and therapeutic approaches. Topics will include vaccine development, transplantation immunology, autoimmunity and cancer immunotherapy.

Class Format: seminar/conference
Requirements/Evaluation: evaluation will be based on class participation and several short papers
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: BIOL 202; open to juniors and seniors
Enrollment Preferences: senior Biology majors who have not taken a 400-level course; then juniors
Enrollment Limit: 12
Expected Class Size: 12
Dept. Notes: does not satisfy the distribution requirement in Biology
Distributional Requirements:

BIOL 418 Signal Transduction to Cancer

Division of normal cells is a highly regulated process based on input from both intrinsic and extrinsic signals. The cell's response to its environment affects all aspects of cell behavior: proliferation, death, differentiation and migration. The goal of the course is to understand the molecular mechanisms of signal transduction that guide normal cell behavior and how disruptions in this process can lead to cancer. We will focus on the Hedgehog-Gli signaling pathway, that is mutated in 40% of all known cancers. Genetic studies will serve as an introduction to the components of the pathway, followed by an examination of the molecular mechanisms of signal reception, transduction of intracellular information, scaffolding and transcriptional targets. The final section of the course will investigate how high throughput screens, medicinal chemistry studies and mouse models are used to identify small molecular inhibitors of pathway components. We will consider the effectiveness of these inhibitors in pharmacological studies, clinical trials and potential cancer treatments.

Class Format: seminar
Requirements/Evaluation: four papers
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: BIOL 202 or permission of instructor
Enrollment Preferences: seniors and then juniors
Enrollment Limit: 12
Expected Class Size: 12
Dept. Notes: does not satisfy the distribution requirement in Biology
Distributional Requirements:
Division 3
Other Attributes:

BIOL 422(F) Ecology of Sustainable Agriculture

Crosslistings: BIOL 422/ENVI 422

A seminar/field course investigating patterns, processes, and concepts of stability in human-dominated, food production ecosystems. As a capstone course, the course will draw upon the experiences that students have had in biology and environmental studies courses. Topics will include: the relationships among diversity, ecosystem function, sustainability, resilience, and stability of food production, distribution systems, nutrient pools and processing in human dominated ecosystems. Two extensive field trips will be taken to agricultural operations in the region. Each student will present a seminar on a topic requiring extensive reading of primary resources and is responsible for leading the discussion that ensues. Reading question paper assignments will be due prior to the seminar. Criticism paper assignments will be made at approximately bi-weekly intervals and due two days after the seminar to which they relate.

Class Format: seminar; two 75 minute sessions per week
Requirements/Evaluation: evaluation will be based on writing assignments, seminar presentation, and course participation
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: BIOL/ENVI 203 or BIOL 302 or permission of instructor
Enrollment Preferences: open to juniors and seniors
Enrollment Limit: 12
Expected Class Size: 12
Dept. Notes: Satisfies the distribution requirement in Biology; the ENVS biology track; the Natural World distributional requirement of the Environmental Studies program

BIOL 424T Conservation Biology (W)

Crosslistings: BIOL 424/ENVI 424

This tutorial examines the application of population genetics, population ecology, community ecology, and systematic to the conservation of biological diversity. While the focus of this tutorial is on biological rather than social, legal, or political issues underlying conservation decisions, the context is to develop science-based recommendations that can inform policy. Topics include extinction, the genetics of small populations, habitat fragmentation, the impact of invasive species, restoration ecology, design of reserves and conservation strategies.

Format: tutorial/field trip, one to three hours per week
Requirements: evaluation will be based on 5 writing assignments, tutorial presentation, performance in the role of paper critic, and course participation
Class Format: tutorial/field trip

BIOL 424T Conservation Biology (W)

Crosslistings: BIOL 424/ENVI 424

This tutorial examines the application of population genetics, population ecology, community ecology, and systematic to the conservation of biological diversity. ### BIOL 426T Frontiers in Muscle Physiology: Controversies (W)

While an active muscle fiber, contraction of muscle is far from the only function of this intriguing organ system. Muscle plays a major role in metabolic regulation of organisms, acts as a glucose storage facility, regulates blood pressure in mammals, and produces numerous hormones. The mechanism for contractile activity varies not only among different organisms, but also among different muscles within the same organism. Controversies, disagreements, and arguments pervade the muscle biology literature perhaps because of the integrative nature of the science. In this tutorial course, we will utilize molecular, physiological, comparative, and evolutionary aspects of muscle biology to address current controversies of this dynamic tissue. Some questions that will be addressed include: 1) Lactic acid generated by skeletal muscle is / is not involved with fatigue at high exercise intensity, 2) Satellite cells are / are not obligatory for skeletal muscle hypertrophy, 3) Do mammals possess the same “stretch activation” of skeletal muscle as seen in insect flight muscle?, 4) Are smooth and skeletal muscles from the same lineage of cells, or do they represent convergent evolution on the tissue level? After an initial group meeting, students meet weekly with a tutorial partner and the instructor for an hour each week. Every other week at this tutorial meeting, students present a written and oral critical analysis of the assigned research articles. Students not making a presentation question and critique the work of their colleague.

#### Class Format:
tutorial meeting one hour a week

#### Requirements/Evaluation:
evaluation is based on five tutorial papers of four pages each, five critiques, tutorial presentations, and general participation

#### Enrolment Limit:
10

#### Expected Class Size:
10

#### Dept. Notes:
does not satisfy the distribution requirement in the Biology major

#### BIOL 493(F) Senior Thesis Research: Biology

Each student prepares a thesis under the supervision of a member of the department. Thesis work can begin either in the spring of the junior or the fall of the senior year, and includes the Winter Study period of the senior year. The number of Biology Department faculty available to mentor research students and the number of students each can accommodate in her/his lab vary from year to year. Although the department will make every effort to provide an opportunity for students to conduct Honors research, you should be aware that it may not be possible to assign all applicants to a laboratory.

#### Class Format:
independent study

#### Extra Info:
this is part of a full-year thesis (493-494)

#### BIOL 499 Biology Colloquium

Scientists from around the country who are on the cutting edge of biological research come to talk about their work. Students of Biology at any level are welcome.

#### Class Format:
lecture

#### Extra Info:
this is not a for-credit course; registration is not necessary to attend

#### Distributional Requirements:
Non-divisional

### CHEMISTRY (DIV III)

#### Chair: Professor AMY GEHRING

#### Professors:
A. GEHRING, L. KAPLAN***, C. LOVETT**, L. PARK*, E. PEACOCK-LOPEZ, D. RICHARDSON, T. SMITH, J. THOMAS***. Associate Professors:
G. GOH, G. GOH, Assistant Professors: J. BLAIR, Visiting Assistant Professor: P. PUMPER, Lecturer Emerita: A. SKINNER, Lecturer: J. MACINTIRE. Lab Instructors: A. NDUWUMWAMI, L. STRAUDEL.

#### MAJOR

Through a variety of individual courses and sequential programs, the department provides an opportunity for students to explore the nature and significance of chemistry, an area of important achievement in our quest for knowledge about ourselves and the world around us. The student of chemistry is able to become aware of the special viewpoint of chemists, the general nature of chemical investigation, some of its important results, how these results are expressed, and something of their significance within the fields of science and in the area of human endeavor as a whole. The Chemistry major provides excellent preparation for graduate study in chemistry, biochemistry, chemical engineering, environmental science, materials science, medicine, and the medical sciences.

In the junior year, candidacy can be achieved in several ways, preferably beginning in the student’s first year at Williams, but also beginning in the sophomore year. Building on a foundation in general chemistry, organic chemistry, and physical chemistry, a student elects additional advanced courses to complete a major that is consistent with his or her background in other sciences, interests, and goals. A student’s program might emphasize biochemistry, organic chemistry, physical chemistry, or inorganic chemistry, with additional courses available in analytical chemistry, environmental science, and materials science. Students considering a major in chemistry should consult with a member of the department as early as possible in order to plan a program which best suits their interests and abilities and which makes full use of their previous preparation.

All students begin their study in the department with either Chemistry 151, 153, or 155. Placement at the introductory level is based upon performance on the departmental placement test results and consultation with the chair; results of the College Board Advanced Placement Test or the International Baccalaureate Exam are also taken into account. The first year is completed with Chemistry 156. In the second year at the introductory level, students take Chemistry 251 (or 255) and Chemistry 256 (those students who complete 155 are exempted from 256). Completion of a Chemistry major requires either nine semester chemistry courses or eight semester chemistry courses plus two approved courses from among the following: Biology 101; Computer Science 134; Mathematics 130, 140, 150, 151; Physics 131, 141; or any courses in...
these departments for which the approved courses are prerequisites. CHEM 155 counts for two courses toward the major, but a single course toward graduation credit. Starting at the 300 level, at least three of the courses taken must have a laboratory component, and at least one must be selected from Chemistry 361, 366, 364, or 367. (The specific course elected, in consultation with the chair or major advisor, will depend on the student's future plans.) In addition, the department has a number of “Independent Research Courses” which, while they do not count toward completion of the major, provide a unique opportunity to pursue an independent research project under the direction of a faculty member.

Foundational Courses

First Year
Fall: 151, 153 or 155 Gateway courses
Spring: 156 Organic Chemistry: Introductory Level

Second Year
Fall: 251 (or 255) Organic Chemistry: Intermediate Level
Spring: 256 Advanced Chemical Concepts (or 300-level if completed 155)

Elective Courses
319 Integrative Bioinformatics, Genomics, and Proteomics Lab
321 Biochemistry I-Structure and Function of Biological Molecules
322 Biochemistry II-Metabolism
324 Enzyme Kinetics and Reaction Mechanisms
326 Chemical Biology: Discoveries at the Interface
335 Inorganic/Organometallic Chemistry
336 Materials Chemistry
338 Bioinorganic Chemistry: Metals in Living Systems
341 Toxicology and Cancer
342 Synthetic Organic Chemistry
343 Medicinal Chemistry
344T Physical Organic Chemistry
347 Physical Organic Chemistry
348 Polymer Chemistry
361 Quantum Chemistry and Chemical Dynamics
364 Instrumental Methods of Analysis
366 Thermodynamics and Statistical Mechanics
367 Biophysical Chemistry
368T Computational Chemistry and Molecular Spectroscopy

Independent Research Courses
393-W31-394 Junior Research and Thesis
397, 398 Independent Study, for Juniors
393-W31-494 Senior Research and Thesis
397, 498 Independent Study, for Seniors

For the purpose of assisting students in selecting a program consistent with their interests and possible continuation of their studies at the graduate level, the following groupings of electives and faculty advisors are suggested. However, a case can be made for selecting courses from the different groups.

Biochemistry: Chemistry 321, Chemistry 322, Chemistry 324, Chemistry 326, Chemistry 341, Chemistry 364, Chemistry 367, Students interested in biochemistry should consult with Professors Blair, Gehring, Kaplan, or Lovett.

Physical and Inorganic Chemistry: Chemistry 335, Chemistry 336, Chemistry 338, Chemistry 361, Chemistry 364, Chemistry 366, Chemistry 368T. Students interested in physical chemistry should consult with Professors Peacock-López, or Thoman. Students interested in inorganic chemistry should consult with Professors Barber, C. Goh, or Park. Students interested in materials science should consult with Professors Barber, C. Goh, or Park.

While any accepted route through the major would permit a student to proceed to graduate study in chemistry, four electives should be considered a minimum; and at least one course should be taken. The department's curriculum is approved by the American Chemical Society (A.C.S.), a professional body of academic, industrial, and research chemists. The A.C.S. suggests the following courses for someone considering a career in any of the areas: 151 (153 or 155), 156, 251 (255), 256, 321, 335, 364, 361 (366 or 367) and at least 4 courses (two of which must have a laboratory component) from our remaining upper level electives: 319, 322, 324, 326, 336, 338, 341, 342, 343, 344T, 348, 361, 366, 367, 368T, 493, 494, 497, 498, BIMO 401. In addition, students are strongly encouraged (though not required) to pursue independent research in some form. Students completing these requirements can be designated Certified A.C.S. Majors.

THE DEGREE WITH HONORS IN CHEMISTRY

The degree with honors in Chemistry provides students with an opportunity to undertake an independent research project under the supervision of a faculty member, and to report on the nature of the work in two short oral presentations and in a written thesis.

CHEM 113 Chemistry and Crime: From Sherlock Holmes to Modern Forensic Science

In this course, designed for students who do not plan to major in the natural sciences, we use a case-oriented approach to explore selected topics of forensic science. These include: (1) the scientific and technological foundation for the examination of physical, chemical, and biological items of evidence, and (2) the scope of expert qualifications and testimony, the legal status of scientific techniques, and the admissibility of the results in evidence. The analysis of trace evidence, including glass, soil, gunpowder residues and bullet fragments, and inorganic and heavy metal poisons are discussed through an understanding of the basics of concepts of chemistry and analytical chemistry. Forensic toxicology and pharmacology are applied to the analysis of alcohol, poisons, and drugs based upon the principles of organic chemistry and biochemistry. The characterization of blood and other body fluids necessitates an understanding of organic chemistry and molecular genetics. The cases which stimulate the exploration of these areas include: the John and Robert Kennedy assassinations, the Jeffrey MacDonald case (Fatal Vision), the Warren Zevon case, the deaths of celebrities Marilyn Monroe, John Belushi, and Janis Joplin, the authenticity of the Shroud of Turin, the Rodney Anthony case, the Tylenol poisonings, and the identity of Anastasia. Interactive demonstration sessions provide an appreciation of scientific experimentation in general and the work of a crime lab in particular. It includes an analysis of evidence and provides an opportunity to learn forensic techniques such as chromatography (for ink, drug, and fire accelerant analysis), spectroscopy (for alcohol and drug analysis), and electrophoresis (for DNA fingerprinting).

The degree with honors in Chemistry provides students with an opportunity to undertake an independent research project under the supervision of a faculty member, and to report on the nature of the work in two short oral presentations and in a written thesis.

Students interested in Bioinformatics, Genomics, and Proteomics should consult with the general statement under the Biochemistry and Molecular Biology Program (BIMO) in the Courses of Instruction. Students interested in completing the BIMO program are also encouraged to complete the biochemistry courses within the chemistry major by taking 321, 322, 324, and 367 in addition to the first and second year required courses.

 beginner requirements/Evaluation: evaluation is based on problem sets and/or quizzes, hour tests, a final exam, and papers

Prerequisites: none; designed for the non-science major who does not intend to pursue a career in the natural sciences; not open to students who have taken CHEM 151, 153, 155, 156/251, or 256

Class Format: lecture, three times per week
CHEM 115 AIDS: The Disease and Search for a Cure
Since the discovery of the human immunodeficiency virus (HIV-1) in 1983, modern techniques of molecular biology have revealed much about its structure and life cycle. The intensity of the scientific investigation directed at HIV-1 is unprecedented in history. We now know more about this virus than any other known pathogen. However, the early optimism concerning the prospects for an effective AIDS vaccine, and the molecular targets of anti-HIV drugs, is for a cure. We look at how HIV-1 interacts with the human immune system and discuss prospects for developing an effective HIV vaccine.  
Class Format: lecture, three times per week; laboratory, four hours per week  
Requirements/Evaluation: evaluation is based on frequent electronic and quantitative written weekly problem set assignments, laboratory work and reports, quizzes, two tests, and a final exam  
Extra Info: information about the Chemistry Placement Test can be found at http://chemistry.williams.edu/placement/ may not be taken on a pass/fail basis; not available for the fifth course option  
Prerequisites: students planning to take the Chemistry Placement Test prior to registering for the course & to meet with a faculty member during First Days; students who have studied chemistry for one or more years are directed to CHEM 153 or 155  
Enrollment Limit: none  
Expected Class Size: 45  
Dept. Notes: CHEM 151 may be taken concurrently with MATH 102—see under Mathematics; CHEM 151 or its equivalent is prerequisite to CHEM 156; one of CHEM 151 or 153 or 155 required for the BIMO concentration

CHEM 153(F) Concepts of Chemistry (Q)
This course broadens and deepens the foundation in chemistry of students who have had typically one year of chemistry at the high school level. Most students begin study of chemistry at Williams with this course. Familiarity with stoichiometry, basic concepts of equilibria, and the model of an atom is expected. Principal topics for this course include kinetic theory of gases, modern atomic theory, molecular structure and bonding, states of matter, chemical equilibrium (acid-base and solubility), and an introduction to atomic and molecular spectroscopy. Laboratory work includes synthesis, qualitative and quantitative chemical analysis, and molecular modeling. The course is of interest to students who anticipate professional study in chemistry, related sciences, or one of the health professions, as well as to those who want to explore the fundamental ideas of chemistry as part of their general education.  
Class Format: lecture, three hours per week; laboratory, four hours per week  
Requirements/Evaluation: evaluation is based on quantitative written weekly problem set assignments, laboratory work and reports, hour tests, and a final exam  
Extra Info: information about the Chemistry Placement Test can be found at http://chemistry.williams.edu/placement/ may not be taken on a pass/fail basis  
Prerequisites: students are required to take the online Chemistry Placement Test prior to registering for the course & to meet with a faculty member during First Days  
Enrollment Limit: none  
Expected Class Size: 60  
Dept. Notes: one of CHEM 151 or 153 or 155 required for the BIMO concentration  
Distributional Requirements: Division 3  
Quantitative/Formal Reasoning  
Other Attributes: BIMO Required Courses  
ENVS Group EC-A Electives

CHEM 155(F) Principles of Modern Chemistry (Q)
This course is designed for students with strong preparation in secondary school chemistry, including a laboratory experience, such as provided by an Advanced Placement chemistry course (or equivalent) with a corresponding score of 5 of the AP Chemistry Exam (or a 7 on the IB Exam, or equivalent). Topics include chemical thermodynamics, kinetics, structure and bonding, coordination chemistry, electrochemistry and spectroscopy and their application to fields such as materials science, industrial, environmental, biological, and medicinal chemistry. Laboratory work includes synthesis, characterization, and reactivity of coordination complexes, electrochemical analysis, materials chemistry, qualitative analysis, and molecular modeling. This course is of interest for students who are anticipating professional study in chemistry, related sciences, or one of the health professions, as well as for students who wish to explore the fundamental ideas of chemistry as part of their general education.  
Class Format: lecture, three hours per week; laboratory, four hours per week  
Requirements/Evaluation: evaluation is based on weekly problem sets, laboratory work and reports, an hour test, and a final exam  
Extra Info: information about the Chemistry Placement Test can be found at http://chemistry.williams.edu/placement/ may not be taken on a pass/fail basis; not available for the fifth course option
CHEM 156(S) Organic Chemistry: Introductory Level (Q)

This course provides the necessary background in organic chemistry for students who are planning advanced study or a career in chemistry, the biological sciences, or the health professions. It initiates the systematic study of the common classes of organic compounds with emphasis on theories of structure and reactivity. The fundamentals of molecular modeling as applied to organic molecules are presented. Specific topics include basic organic structure and bonding, isomerism, stereochemistry, molecular energetics, the theory and interpretation of infrared and nuclear magnetic resonance spectroscopy, substitution and elimination reactions, and the addition reactions of alkenes and alkynes. The coordinated laboratory work includes purification and separation techniques, structure-reactivity studies, organic synthesis, IR and NMR spectroscopy, and the identification of unknown compounds.

Class Format: lecture, three hours per week; laboratory, four hours per week
Requirements/Evaluation: evaluation will be based on quantitative problem sets, laboratory performance, including written lab reports, three midterm exams, and a final exam
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: CHEM 151 or 153 or 155 or placement exam or permission of instructor
Enrollment Limit: 16 per lab
Expected Class Size: 120
Distributional Requirements: Division 3
Quantitative/Formal Reasoning
Other Attributes: BIMO Required Courses
MTSC Related Courses

CHEM 251(F) Organic Chemistry: Intermediate Level

This course is a continuation of Chemistry 156 and it concludes the systematic study of the common classes of organic compounds with emphasis on theories of structure and reactivity. Specific topics include radical chemistry, an introduction to mass spectrometry and ultraviolet spectroscopy, the theory and chemical reactivity of conjugated and aromatic systems, the concept of kinetic and thermodynamic control, an extensive treatment of the chemistry of the carboxyl group, alcohols, ethers, polyfunctional compounds, the concept of selectivity, the fundamentals of organic synthesis, an introduction to carbohydrates, carboxylic acids and derivatives, acyl substitution reactions, amines, and an introduction to amino acids, peptides, and proteins. The coordinated laboratory work includes application of the techniques learned in the introductory level laboratory, along with new functional group analyses, to the separation and identification of several unknown samples. Skills in analyzing NMR, IR, and MS data are practiced and further refined.

Class Format: lecture, three hours per week; laboratory, four hours per week
Requirements/Evaluation: evaluation is based on midterm exams, problem sets, laboratory performance, including written lab reports, and a final exam
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: CHEM 156 or permission of instructor
Enrollment Limit: 16 per lab
Expected Class Size: 100
Distributional Requirements: Division 3
Other Attributes: BIMO Required Courses
MTSC Related Courses

CHEM 255(F) Organic Chemistry: Intermediate Level—Special Laboratory Section

This course is a continuation of CHEM 156 and contains the same material as CHEM 251 except for the laboratory program described below. The aim of this advanced laboratory section is to enrich and enhance the laboratory experiences of motivated students of recognized ability by providing a laboratory program that more closely resembles the unpredictable nature and immediacy of true chemical research. Students synthesize, isolate, and characterize (using a range of modern physical and spectroscopic techniques) a family of unknown materials in a series of experiments constituting an integrated, semester-long investigation. A flexible format is employed in which the students are responsible for planning the course of their laboratory work based upon discussions with the instructor about the previous week’s experimental results. Students are drawn from CHEM 156 with placement based upon student selection and nomination by the CHEM 156 instructor. Participants attend their regular CHEM 251 lecture but attend the special laboratory section instead of a CHEM 251 laboratory section.

Class Format: lecture, three hours per week; laboratory, four hours per week; weekly one-hour discussion
Requirements/Evaluation: evaluation is based on the requirements for the CHEM 251 lecture and performance in this special laboratory section including written laboratory reports and participation in discussions
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: permission of instructor
Enrollment Preferences: sophomores
Enrollment Limit: 12
Expected Class Size: 12
Dept. Notes: course was developed under a grant from the Ford Foundation
Distributional Requirements: Division 3
Other Attributes: ENVS Group EC-B Electives
MTSC Related Courses
students majoring in biology, chemistry, computer science, mathematics/statistics, and physics contribute their own expertise to explore how ever-growing gene and protein data-sets can provide key insights into human disease. In this course, we will learn the fundamental experimental techniques of biochemistry including structure and function of biological molecules and the interactions between macromolecules are discussed. The structure of proteins and nucleic acids are examined in detail in order to determine how their chemical properties and their biological behavior result from these structures. Other topics covered include catalysis, enzyme kinetics, mechanism and regulation; the molecular organization of biomembranes; and the flow of information from nucleic acids to proteins. In addition, the principles and applications of the methods used to characterize macromolecules in solution and the interactions between macromolecules are discussed.

This course introduces the basic concepts of biochemistry with an emphasis on the structure and function of biological macromolecules. Specifically, the structure of proteins and nucleic acids are examined in detail in order to determine how their chemical properties and their biological behavior result from these structures. Other topics covered include catalysis, enzyme kinetics, mechanism and regulation; the molecular organization of biomembranes; and the flow of information from nucleic acids to proteins. In addition, the principles and applications of the methods used to characterize macromolecules in solution and the interactions between macromolecules are discussed. The course introduces the tools of chemical biology, focusing on how small chemical molecules directed at biological systems facilitate answering important questions in biology. Building upon this foundation of chemical and biological techniques, this course will study current applications of these techniques through case studies of recent discoveries. Topics covered include bioconjugation, chemical genetics, extending the genetic code, activity-based probes, and fragment-based drug discovery.

This lecture course provides an in-depth presentation of the complex metabolic reactions which are central to life. Emphasis is placed on the biochemical flow of energy (aerobic, anaerobic, photosynthetic); the regulation and integration of the metabolic pathways including compartmentalization and the transport of metabolites; and biochemical reaction mechanisms including the structures and mechanisms of coenzymes. This comprehensive study also includes the biosynthesis and catabolism of small molecules (carbohydrates, lipids, amino acids, and nucleotides). Laboratory experiments introduce the principles and procedures used to study enzymatic reactions, bioenergetics, and metabolic pathways.

This functional genomic strategy will be coupled with independent projects using phosphorlation-state specific antisera to test our hypotheses. Proteomic analysis will introduce the students to de novo structural prediction and threading algorithms, as well as data-mining approaches and Bayesian modeling of protein network dynamics in single cells. Flow cytometry and mass spectrometry will be used to study networks of interacting proteins in colon tumor cells.

Class Format: two afternoons of lab, with one hour of lecture, per week
Requirements/Evaluation: lab participation, several short homework assignments, on lab report and one exam.
Prerequisites: BIOL 202; students who have not taken BIOL 202 but have taken BIOL 101 and CSCI 315 or PHYS 315, may enroll with permission of instructor. No prior computer programming experience is required.
Enrollment Preferences: seniors, then juniors, then sophomores
Expected Class Size: 12

CHEM 321(F) Biochemistry I: Structure and Function of Biological Molecules (Q)

Crosslistings: BIMO 321/BIOL 321

This course introduces the basic concepts of biochemistry with an emphasis on the structure and function of biological macromolecules. Specifically, the structure of proteins and nucleic acids are examined in detail in order to determine how their chemical properties and their biological behavior result from these structures. Other topics covered include catalysis, enzyme kinetics, mechanism and regulation; the molecular organization of biomembranes; and the flow of information from nucleic acids to proteins. In addition, the principles and applications of the methods used to characterize macromolecules in solution and the interactions between macromolecules are discussed. The course introduces the tools of chemical biology, focusing on how small chemical molecules directed at biological systems facilitate answering important questions in biology. Building upon this foundation of chemical and biological techniques, this course will study current applications of these techniques through case studies of recent discoveries. Topics covered include bioconjugation, chemical genetics, extending the genetic code, activity-based probes, and fragment-based drug discovery.

Class Format: lecture, three hours per week
Requirements/Evaluation: evaluation is based on several exams and
Extra Info: may not be taken on a pass/fail basis
Prerequisites: CHEM/BIOL/BIMO 321 or permission of instructor
Enrollment Limit: none
Expected Class Size: 10

CHEM 326 Chemical Biology: Discoveries at the Interface

Complex biological behavior is driven by the chemistry of biological molecules including secondary messengers, lipids, proteins, and nucleic acids. Chemists and biologists have recognized that manipulating the chemistry of these systems affords a powerful method to regulate and study cellular activity. The burgeoning field of chemical biology encompasses these efforts. This course introduces the tools of chemical biology, focusing on how small chemical molecules directed at biological systems facilitate answering important questions in biology. Building upon this foundation of chemical and biological techniques, this course will study current applications of these techniques through case studies of recent discoveries. Topics covered include bioconjugation, chemical genetics, extending the genetic code, activity-based probes, and fragment-based drug discovery.

Class Format: lecture, three hours per week
Requirements/Evaluation: evaluation is based on class participation, several short papers, and a final research paper
Extra Info: may not be taken on a pass/fail basis
Prerequisites: CHEM/BIOL/BIMO 321
Enrollment Limit: 19
Expected Class Size: 16
Distributional Requirements: Division 3
Other Attributes: BIMO Interdepartmental Electives
Not Offered Academic Year 2017

CHEM 335(F) Inorganic/Organometallic Chemistry

This course covers fundamental aspects of the chemistry of transition metals and main group elements and highlights how these properties are key to understanding the roles of these elements in a range of applications, from the catalysis of synthetic organic transformations, the functions of enzymatic processes, the production of commodity chemicals such as plastics, to the actions of metal-based drugs such as cis-platin. The course introduces concepts of symmetry and group theory, and applies them in a systematic approach to the study of the structure, bonding, and spectroscopy of...
coordination and inorganic compounds. The course also covers the kinetics and mechanism of selected inorganic and organometallic reactions. Through exploration of primary literature and review articles we will discuss recent developments and applications in inorganic chemistry, such as finding molecular solutions to the capture of solar energy, to cancer treatments and to optimizing industrial-scale reactions.

Class Format:
lecture, three hours per week

Requirements/Evaluation:
evaluation is based on problem sets, exams, presentations, and group-based literature reviews

Extra Info: may not be taken on a pass/fail basis

Prerequisites: CHEM 155 or 256 and 251/255

Enrollment Limit: 16

Expected Class Size: 16

Distributional Requirements:
Division 3

Other Attributes:

CHEM 336(F) Materials Chemistry
Materials Science focuses on the study of bulk physical properties such as hardness, fracture toughness, plasticity. Materials chemists bridge the gap between traditional synthetic chemists and materials scientists, by working to understand the relationships between bulk physical properties, length scale (mesoscale, nanoscale), and molecular structure. This course will cover a variety of different types of materials and their properties, including solids (insulators, semiconductors, conductors, superconductors, magnetic materials), soft materials (polymers, gels, liquid crystals), nanoscale structures, and electronic. We’ll examine some of the latest developments in materials chemistry, including new strategies for the synthesis and preparation of materials on different length scales, as well as a variety of potential applications of emerging technologies. Laboratory will include analysis of thermal properties, optical properties, force curves, as well as the preparation and measurement of mesoscale and nanoscale structures and their properties.

Class Format:
lecture, three hours per week

Requirements/Evaluation:
evaluation is based on problem sets, reviews of research articles, hour exams, and a final exam

Extra Info: may not be taken on a pass/fail basis

Prerequisites: CHEM 155 or 256 and 251/255

Enrollment Limit: 24

Expected Class Size: 16

CHEM 338(S) Bioorganic Chemistry: Metals in Living Systems
Bioorganic chemistry is an interdisciplinary field that examines the role of metals in living systems. Metals are key components of a wide range of processes, including oxygen transport and activation, catalytic reactions such as photosynthesis and nitrogen-fixation, and electron-transfer processes. Metals perform regulatory roles and stabilize the structures of proteins. In medical applications, the metals are central to many diagnostic and therapeutic tools. To understand the role metals in these biological processes, we will cover principles of coordination chemistry: topics such as structure and bonding, spectroscopic methods, electrochemistry, kinetics and reaction mechanisms. Building on this fundamental understanding of the nature of metals, students explore topics of current interest in the field.

Class Format:
lecture and tutorial-style meetings, 3 hours per week

Requirements/Evaluation:
evaluation is based on problem sets, two exams, tutorial participation, a class presentation, and a final project

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: CHEM 155 or CHEM 256 and 251/255

CHEM 342(S) Synthetic Organic Chemistry (W)
The origins of organic chemistry are to be found in the chemistry of living things and the emphasis of this course is on the chemistry of naturally-occurring compounds. This course presents the logic and practice of chemical total synthesis while stressing the structures, properties and preparations of terpenes, polyketides and alkaloids. Modern synthetic reactions are surveyed with an emphasis on the stereochemical and mechanistic themes that underlie them. To meet the requirements for the semester’s final project, each student chooses an article from the recent synthetic literature and then analyzes the logic and strategy involved in the published work in a final paper. A summary of this paper is also presented to the class in a short seminar. Laboratory sessions introduce students to techniques for synthesis and purification of natural products and their synthetic precursors.

Class Format:
lecture, three hours per week; laboratory, four hours per week

Requirements/Evaluation:
evaluation is based on problem sets, midterm exams, laboratory work, a final project, and class participation

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: CHEM 256 or permission of instructor

Enrollment Limit: 12

CHEM 341(S) Toxicology and Cancer
Crosslistings: CHEM 341/ENVI 341

What is a poison and what makes it poisonous? Paracelsus commented in 1537: “What is not a poison? All things are poisonous (and nothing is without poison). The dose alone keeps a thing from being a poison.” Is the picture really this bleak; is modern technology-based society truly swimming in a sea of toxic materials? How are the nature and severity of toxicity established, measured and expressed? Do all toxic materials exert their effect in the same manner, or can materials be poisonous in a variety of different ways? Are the safety levels set by regulatory agencies low enough for a range of common toxic materials, such as mercury, lead, and certain pesticides? How are poisons metabolized and how do they lead to the development of cancer? What is cancer and what does it take to cause it? What biochemical defense mechanisms exist to counteract the effects of poisons? This course attempts to answer these questions by surveying the fundamentals of modern chemical toxicology and the induction and progression of cancer. Topics will range from description and quantitation of the toxic response, including risk assessment, to the basic mechanisms underlying toxicity, mutagenesis, carcinogenesis, and DNA repair.

Class Format:
lecture, three times per week

Requirements/Evaluation:
evaluation is based on two hour tests, a class presentation and paper, participation in discussion sessions, a self-exploration of the current toxicological literature, and a final exam

Extra Info: may not be taken on a pass/fail basis

Prerequisites: CHEM 156; may be taken concurrently with CHEM 251/255; a basic understanding of organic chemistry

Enrollment Limit: 30

Expected Class Size: 24

Distributional Requirements:
Division 3

Not Offered Academic Year 2017

LEC  Instructor: Thomas Smith

CHEM 344T(S) Physical Organic Chemistry

This course extends the background derived from previous chemistry courses to the understanding of organic reaction mechanisms. Correlations between
structure and reactivity are examined in terms of kinetic and thermodynamic parameters including: solvent effects, isotope effects, stereoechemical specificity, linear free energy relationships, acid/base theory, delocalized bonding, and aromaticity. For the first 7 weeks, the class meets once a week for an introductory lecture. A second tutorial meeting between the instructor and 2 other students occurs early the following week, for example during the laboratory time period. During this time, students work through and present solutions to an assigned problem set. For the remaining 5 weeks, students execute a self-designed set of laboratory experiments that revolve around physical organic methods. Students present and critique results each week (in the hour time slot). The experiments culminate in a final paper.

Class Format: tutorial, 90 minutes per week; lecture, one hour per week; laboratory, four hours per week

Requirements/Evaluation: evaluation is based on problem sets, participation, laboratory work, and a final laboratory paper

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: CHEM 251/255

Enrollment Preferences:

CHEM 348 Polymer Chemistry

From synthetic to natural macromolecules, we encounter polymers everywhere and everyday. This course explores the multitude of synthetic techniques available and discusses how structure defines function. Topics include condensation and chain (anionic, cationic, radical) polymerizations, dendrimers, controlling molecular weight, ring opening, and biopolymer syntheses. Fundamentals of composition and physical properties of polymers, and methods of characterization are also covered.

Class Format: lecture, two meetings per week; laboratory, four hours per week

Requirements/Evaluation: evaluation is based on problem sets, participation, exams, laboratory work, and a final project

Prerequisites: CHEM 251/255

Enrollment Preferences: Chemistry majors

Enrollment Limit: 12

CHEM 366(S) Thermodynamics and Statistical Mechanics

The thermodynamic laws provide us with our most powerful and general scientific principles for predicting the direction of spontaneous change in physical, chemical, and biological systems. This course develops the concepts of energy, entropy, free energy, temperature, heat, work, and chemical potential within the framework of classical and statistical thermodynamics. The principles developed are applied to a variety of problems: chemical reactions, phase changes, energy technology, industrial processes, and environmental science. Laboratory experiments provide quantitative and practical demonstrations of the theory of real and ideal systems studied in class.

Class Format: lecture, three hours per week; laboratory, four hours per week; discussion, one hour per week

Requirements/Evaluation: evaluation is based on class participation, oral presentations, problem sets, laboratory work, and an independent project.

Extra Info: may not be taken on a pass/fail basis

Prerequisites: CHEM 155 or 256, and basic knowledge of applied integral and differential calculus

Enrollment Limit: none

Expected Class Size: 12

Distributional Requirements: Division 3

Other Attributes:

CHEM 368T(S) Computational Chemistry and Molecular Spectroscopy

This course provides an introduction to the principles of computational quantum mechanics and their application to problems of chemical interest such as chemical bonding, chemical reactivity, and molecular spectroscopy.
Emphasis is placed upon modern electronic structure calculations, their fundamentals, practical considerations, interpretation, and applications to current research questions. Under guidance in the laboratory session and through independent work, students will use computational methods to explore assigned weekly research problems. The research results will be presented to and discussed with the tutorial partner at the end of each week.

**Class Format:** tutorial, meeting time to be determined

**Requirements/Evaluation:** evaluation is based on tutorial participation, presentations, and submitted papers

**CLASSICS (DIV I)**

Chair: Professor AMANDA WILCOX

Professors: K. CHRISTENSEN**, M. HOPPIN. Associate Professors: E. DEKEI, A. WILCOX. Visiting Assistant Professor: K. DRAPER.

The course offerings in Classics enable students to explore the ancient Greek, Roman, and Greco-Roman worlds from various perspectives, including literature, history, archaeology, art, philosophy, and religion. Courses are of two types: language (Greek and Latin) and translation (Classical Civilization).

The 100-level language courses are intensive introductions to Greek and Latin grammar; the 200-level language courses combine comprehensive grammar review with readings from Greek or Latin texts of pivotal historical periods; Latin 302 and the 400-level language courses are seminars that explore in depth selected authors or topics and the methods of analysis appropriate to each of them. Courses in which texts are read in translation provide both surveys and more specialized study of the classical world from earliest historical times through late antiquity.

**MAJOR**

Majors and prospective majors are encouraged to consult with the department’s faculty to ensure a well-balanced and comprehensive selection of Classics courses appropriate to their individual interests. A course or courses in ancient history are strongly recommended. Majors may also benefit from advice on courses offered in other departments that would complement their particular interests in Classics. A reading knowledge of French, German, and Italian is useful for any study in Classics and is required in at least two of these modern languages by graduate programs in classics, ancient history, classical art and archaeology, and medieval studies.

The department offers two routes to the major: Classics and Classical Civilization.

**Classics:** (1) Six courses in Greek and/or Latin, with at least two 400-level courses in one language; (2) Three additional courses, elected from the offerings in Greek, Latin, or Classical Civilization or from approved courses in other departments; 3) Participation in the Senior Colloquium.

**Classical Civilization:** (1) Either Classics 101 or 102 and one of Classics 222, 223, or 224; (2) Three additional courses from the offerings in Classical Civilization or from approved courses in other departments (3) Three courses in Greek or Latin with at least one at the 400 level, or four courses in Latin at any level; (4) A senior independent study is normally required to complete the Classical Civilization major. Several of the courses elected, including the independent study, should relate to each other in such a way as to reflect a concentration on a particular genre, period, or problem of Greek and Roman civilization, including topics in ancient art and archaeology, religion in the Greco-Roman world, and ancient philosophy; 4) Participation in the Senior Colloquium.

The number of courses from other departments are cross-listed with Classics and may be elected for the major, for instance, Art History 213 Greek Art and Myth, Philosophy 201 Greek Philosophy, and Religion 210 Reading Jesus, Writing Gospels. Appropriate courses that are not cross-listed may also count toward the major with the approval of the Chair of Classics. Examples of such courses, which vary from year to year, are Art History 105 Picturing God in the Middle Ages, Religion/Jewish Studies 201 The Hebrew Bible, Religion 212 The Development of Christianity, and Political Science 231 Ancient Political Thought.

**Senior Colloquium:** Senior majors are required to enroll in CLAS 499 in both semesters. The topics and activities of this colloquium, which normally meets every other week for an hour, vary according to the interests of the participants. Junior majors are also encouraged to participate.

**THE DEGREE WITH HONORS IN CLASSICS**

Students who wish to be considered for the degree with honors will normally prepare a thesis or pursue appropriate independent study in one semester and winter study of their senior year. The thesis or independent study offers students the opportunity to work in depth on a topic of their choosing and to apply and develop the techniques and critical methods with which they have become acquainted during their regular course work. It may also include relevant work with members of other departments. In order to
write a thesis, students normally must have a minimum GPA of 3.3 in their major courses and must submit a thesis proposal before the end of the spring semester of their junior year that earns departmental approval. To be awarded the degree with honors in Classics, the student is required to have taken a minimum of ten semester courses in the department (not including the thesis or independent study) and to have demonstrated original or superior ability in studies in the field both through course work and through the thesis or equivalent independent study.

**CLASSICS COURSES**

**CLAS 101(S) The Trojan War (W)**

*Crosslistings: CLAS 101/COMP 107*

The Trojan War may or may not have taken place near the end of the Bronze Age (c1100), but it certainly provided poets, visual artists, historians, philosophers, and many others in archaic and classical Greece (750-320) with a rich discourse for engaging questions about gender, exchange, desire, loss, and remembrance, and about friendship, marriage, army, city-state and religious cult. This discourse of "The Trojan War" attained a remarkable coherence yet also thrived on substantial variations and changes over the 300-400 years of Greek literature we will explore, a dynamic of change and continuity that has persisted through the more than two millennia of subsequent Greek, Roman, Western, and non-Western participation in this discourse. More than half of the course will be devoted to the Homeric Iliad and Odyssey; we will also read brief selections from lyric poetry (e.g. Archilochus, Sappho of Lesbos), some scenes from Homer, the Iliad, and the Iliad itself, and students can visit the department’s website for information and links to helpful sites. You can find general study area guidelines for Classics here.

**CLAS 102 Roman Literature: Foundations and Empire**

*Crosslistings: CLAS 102/COMP 108*

In the first book of Vergil's Aeneid, the god Jupiter prophesies the foundation and the greatness of Rome: "I place no limits on their fortunes and no time; I grant them empire without end." Yet elsewhere in this epic account of Rome’s origins, this promise of unlimited power for the descendants of Romulus seems to be seriously abridged. Some readers have seen, not only in the Aeneid but throughout literature, a persistent tendency to inscribe the decay and disintegration of Roman power into the very works that proclaim and celebrate Roman preeminence. This course explores the ancient Romans’ own interpretations of their past, their present, and their destiny: the humble beginnings of their city, its rise to supreme world power, and premonitions of its decline. Related topics for our consideration will include Roman constructions of gender, the location and expression of virtue in the public and private spheres, the connections and conflicts between moral probity and political success, the exercise of individual power versus action on behalf of the commonwealth, the absorption of foreign customs and peoples into Rome, the management of literal and imaginary frontiers, and other anxieties of empire. We will read selections and complete works by a wide variety of Roman authors, including Cicero, Catullus, Caesar, Vergil, Sallust, Horace, Ovid, Seneca, and Tacitus. *All readings will be in translation.*

**CLAS 200 History of the Book**

*Crosslistings: CLAS 200/ASST 200/HIST 392/REL 260/COMP 280*

From ancient clay tablets, bamboo strips, and papyrus rolls to modern hardbacks, paperbacks, and e-readers, no object has so broadly and deeply represented the capacity for humans to create, preserve, and transmit knowledge, information, and ideas as the book. Books have been worshiped and condemned, circulated and censored, collected and destroyed. From works of art to ephemeral trash, they have been public and private, sacred and profane, magical and commonplace. Likewise, notions of the book have influenced and been influenced by every subsequent form of communication and transmission, whether we are browsing film and song "libraries" or "scrolling" down "pages" on the web. This course will explore aspects of the material, social, cultural, and intellectual history of the book, from the invention of the earliest writing systems through the modern development of digital media. Our inquiry will span the globe and the millennia, but we will pay special attention to the ancient and medieval Chinese, Greek, and Latin traditions and their enduring influence in the modern world. Topics will include orality and literacy, manuscript production, the invention and spread of printing, typography, reading culture, notions of authorship, libraries and collections, censorship, and the digital book. Through a variety of readings, hands-on exercises, and interactions with our abundant local resources, we will investigate how the changing form of the book interact across its long and diverse history. *All readings are in translation.*

**Class Format:** seminar

**Requirements/Evaluation:** class participation, short written assignments, and a final project

**Prerequisites:** none

**Enrollment Preferences:** none

**Enrollment Limit:** 25

**Expected Class Size:** 25

- HIST Group P Electives - Premodern

Not Offered Academic Year 2017

**SEM Instructor:** Eden Dekel

**CLAS 203(F) History of Ancient Greek Philosophy**

*Crosslistings: PHIL 201/CLAS 203*

Very few people believe that everything is water, that we knew everything before birth, that philosophers ought to rule the state, or that some people are natural slaves. Why then could we spend our time studying people who in addition to having these surprising beliefs have been dead for 2500 years? First of all, Greek thinkers, especially Plato and Aristotle, radically shaped the trajectory of Western thought in every area of philosophy. No one can have an adequate understanding of Western intellectual history without some familiarity with the Greeks, and we might think that an understanding of our intellectual history can deepen our understanding of our own situation. More importantly, many of the thinkers that we will read in this class are simply excellent philosophers, and it is worthwhile for anyone interested in philosophical problems to read treatments of these problems by excellent philosophers. We will begin the course by looking briefly at some of the Presocratic philosophers active in the Ionian, Ionian, and other places and then move on to Aristotle, the godfather of the Western intellectual tradition.

**Class Format:** lecture/discussion

**Requirements/Evaluation:** short papers, possibly supplemented by one or more exams

**Prerequisites:** none; open to first-year students

**Enrollment Limit:** none

**Expected Class Size:** 20-40

**Dept. Notes:** Required course for Philosophy majors
CLAS 205 Ancient Wisdom Literature

Crosslistings: REL 205/CLAS 205/COMP 217/JYST 205

The Biblical books of Proverbs, Ecclesiastes, and Job are often grouped together under the Hebrew category of hokhmah, 'wisdom.' Although these books are very different in content, they can all be interpreted as meditations on ethical and practical philosophy. In this way, they represent the Hebrew Bible's canonical embrace of a widespread Near Eastern literary phenomenon. From the instructional literature in Egypt and Mesopotamia to Greek didactic poetry and fables, ancient Mediterranean cultures offer a wide range of texts that engage the issues of personal behavior, leadership, and justice. Starting with the central wisdom books of the Hebrew Bible and moving through relevant material from the Apocrypha, New Testament, and the Egyptian and Babylonian traditions, this course will examine the literature of wisdom throughout the ancient world with an eye toward understanding its various social, political, and philosophical contexts. We will then consider the Greek wisdom tradition in such texts as Hesiod's Works and Days, Aesop's fables, and fragments from the pre-Socratic philosophers. Finally, we will explore the influence of these ancient sources on later expressions of wisdom in medieval European literature, as well as more recent examples such as Benjamin Franklin's Poor Richard's Almanack. All readings are in translation.

CLAS 207 From Adam to Noah: Literary Imagination and the Primeval History in Genesis

Crosslistings: REL 207/COMP 250/JYST 207/CLAS 207

How long did Adam and Eve live in the Garden of Eden? What was the mark of Cain? Why did Enoch not die? Who was Noah's wife? How did Giants survive the Flood? These are only a few of the fascinating questions that ancient readers and interpreters of the Book of Genesis asked and attempted to answer. The first ten chapters of Genesis present a tantalizingly brief narrative account of the earliest history of humankind. The text moves swiftly from the Creation to the Flood and its immediate aftermath, but this masterful economy of style leaves many details unexplained. This course will explore the rich and varied literary traditions associated with the primordial history in the Genesis. Through a close reading of ancient noncanonical sources such as the Book of Enoch, Jubilees, and the Life of Adam and Eve, as well as Jewish traditions represented in Josephus, Philo, and Rabbinic literature and other accounts presented in early Christian and Gnostic texts, we will investigate the ways in which the elliptical style of Genesis generated a massive body of ancient folklore, creative exegesis, and explicit literary re-imaging of the early history of humankind. We will then turn to several continuations of these variant traditions in medieval and early modern literature, with particular attention to the extensive material on the figures of Cain and Noah. All readings are in translation.

CLAS 210 The New Testament: Purpose, History and Method (W)

Crosslistings: REL 210/CLAS 210/COMP 213

The New Testament is the most important collection of documents in the Christian religion. This course offers overviews and discussions of the origin and purpose of the writings, their influence throughout history, and the development of methods of readings of the texts. We start with the origin of the writings before they became collected into the New Testament, and ask: what forms of writings (genres) were available to the authors of the new scriptures, and how were they used for the purpose of shaping faith in Jesus Christ and creating communities? Why just these scriptures were included, and not others, for instance, the Gospel of Thomas, is another much discussed question. The impact of the New Testament writings upon society is a problematic history; for instance, they have been used to support negative attitudes to Jews, women and homosexuals. This raises the issue of how to read the New Testament. There are many different ways of reading the New Testament, perhaps the most common way to read it is as Scripture, important for one's religious faith. In this course, however, we will focus on scholarly and academic readings of the New Testament. But they, too, have gone through many changes, influenced by contemporary methods, e.g. historical-critical ones in the 19th and into 20th century, more recently, by literary, feminist and post-colonial readings. Through extensive readings of New Testament writings in their cultural and historical context, documentations of their use in history, and recent theories of interpretation, the aim is to gain an independent position on the New Testament as a historical and religious document. All readings are in translation.

CLAS 212/COMP 267/REL 267

Crosslistings: REL 267/CLAS 267/COMP 267

This course explores the nature and evolution of ancient Greek religion from the Bronze Age (1200s BCE) to the rise of Christianity, with a focus on ritual and cultic practices in their cultural and historical context. We will draw on the rich evidence provided by literary and documentary texts, and also take into account archaeological evidence, including works of art such as sculpture and vase painting. We will pay special attention to ritual in civic and political life, and its role in expressing and forming individual and group identity. We will also examine the intersection of religion and literature by reading works that describe or depict cultic practice, or that were composed for performance in ritual contexts. Readings include Homer's Iliad, Hesiod's Theogony, Euripides' Bacchae, Aristophanes' Women at the Thesmophoria, and selections from the Homeric Hymns and Pindar's Odes.

CLAS 218 Ancient Greek Religion

Crosslistings: CLAS 208/REL 208

This course explores the nature and evolution of ancient Greek religion from the Bronze Age (1200s BCE) to the rise of Christianity, with a focus on ritual and cultic practices in their cultural and historical context. We will draw on the rich evidence provided by literary and documentary texts, and also take into account archaeological evidence, including works of art such as sculpture and vase painting. We will pay special attention to ritual in civic and political life, and its role in expressing and forming individual and group identity. We will also examine the intersection of religion and literature by reading works that describe or depict cultic practice, or that were composed for performance in ritual contexts. Readings include Homer's Iliad, Hesiod's Theogony, Euripides' Bacchae, Aristophanes' Women at the Thesmophoria, and selections from the Homeric Hymns and Pindar's Odes.
Division 1

CLAS 213 Greek Art and Myth
Crosslistings: ARTH 213/CLAS 213

Classical myth provides rich subject matter for painters and sculptors throughout the history of western art. This course investigates the earliest representation of myth in Greek art of the seventh through the first centuries B.C.E. Sophisticated narratives involving gods and heroes first appear in a variety of forms and contexts. Myth informs the visual culture of the Greeks on many levels, from paintings on vases used in domestic contexts to the marble sculpture that decorated the monumental temples of great sanctuaries throughout the Greek world. The purpose of the course is two-fold: to familiarize students with the subjects and narratives of Greek myths and the underlying belief system that, in part, produced them, and also provide a comprehensive outline of developments in Greek art in the first millennium B.C.E. Special interest will be the techniques developed by artists for representing narratives visually, as well as the conceptual issues that underlie certain myths, such as sacrifice, war, marriage, coming of age, specific festivals, and the relationships between men and women, and those between mortals and immortals. Reading will include ancient literature in translation (Hesiod, Homer, Sappho, Aischylus, Sophokles, Euripides and Apollodoros) as well as secondary literature by contemporary authors that provides insights into the religious, social and historical developments that influenced artists in their choices of subject matter and style.

Class Format: lecture
Requirements/Evaluation: two short papers, quiz, hour test, final exam, required fieldtrip to The Metropolitan Museum in New York
Prerequisites: none
Enrollment Limit: 45
Expected Class Size: 45
Distributional Requirements: Division 1

Not Offered Academic Year 2017

CLAS 216 Body of Evidence: Greek Sculpture and the Human Figure
Crosslistings: ARTH 216/CLAS 216

From the beginnings of Greek sculpture in the eighth century B.C.E. until the end of the Hellenistic period in the first century B.C.E., the human figure remained the most prominent choice of subject for Greek artists. Introductory classes will cover sculpture in the Neolithic and Bronze Ages but the goal of this course is to study Greek sculpture in the first millennium B.C.E. with emphasis on ancient Greek ideas of function, surroundings and reception of male and female figures, both human and divine, from athletic, religious and funerary contexts, and look at dedications of individual figures as well as the complex mythological narratives found on Greek temples. Reading material includes ancient literature in translation as well as contemporary critical essays.

Class Format: lecture
Requirements/Evaluation: two short papers, midterm, final exam
Prerequisites: none
Enrollment Limit: 30
Expected Class Size: 25
Distributional Requirements: Division 1

Not Offered Academic Year 2017
LEC Instructor: Elizabeth McGowan

CLAS 218 Gnosis, Gnostics, Gnosticism (W)
Crosslistings: REL 218/CMP 218/CLAS 218

What is gnosticism and Gnosticism? Who were the Gnostics? Salvation by knowledge, arch-heresy, an eternal source of mystical insights and experiences, secret esoteric teachings available only to a few. All these and more have been claims made about gnosticism, Gnostics, and Gnosticism. This course will introduce you to the key ancient texts and ideas associated with Gnostics as well as to the debates over and claims made about Gnosticism in modern times. We shall explore neoplatonic, Jewish, and Christian thought, as well as modern spiritualism and esotericism. We shall also ask about how ancient Gnostics relate to later religious groups such as the Knights Templar and modern Theosophists. Readings include: Nag Hammadi writings in English, Irenaeus, Against All Heresies; David Brakke, The Gnostics; Elaine Pagels, The Gnostic Gospels; Karen King, What is Gnosticism? and The Secret Revelation of Mary Magdalene.

Class Format: lecture/discussion
Requirements/Evaluation: periodic reflection papers, 2 textual analysis papers, 2 historiographical analysis papers, and a final paper that entails a revision and expansion of an earlier paper
Prerequisites: none
Enrollment Preferences: students with prior coursework in biblical or other ancient literature or history
Enrollment Limit: 15
Expected Class Size: 19
Distribution Notes: meets Division 2 requirement if registration is under REL; meets Division 1 requirement if registration is under CLAS or COMP
Distributional Requirements: Division 2
Writing Intensive

Not Offered Academic Year 2017
LEC Instructor: David Brakke

CLAS 222 Greek History
Crosslistings: CLAS 222/HIST 222

Ancient Greece has been thought to embody the origins of Western civilization in its institutions, values, and thought; it has been seen as the infancy of modern society, with the attributes of innocence, purity, and the infant's staggering capacity for exploration and learning; it has been interpreted as an essentially primitive, violent culture with a thin veneer of rationality; and it has been celebrated as the rational culture par excellence. The study of ancient Greece indeed requires an interpretive framework, yet Greek culture and history have defied most attempts to articulate one. We will make our attempt in this course by investigating ancient Greece as a set of cultures surprisingly foreign to us, as it so often was to its own intellectual elite. But we will also come to appreciate the rich and very real connections between ancient Greek and modern Western civilization. The course will begin with Bronze Age Greece and the earliest developments in Greek culture, and will conclude with the spread of Greek of special interest into Asia through the conquests of Alexander the Great. We will explore topics such as the aristocratic heritage of the city-state, the effects of pervasive war on Greek society, the competitive spirit in political and religious life, the confrontations with the East, the relationship of intellectual and religious movements to art; the growth of Greek thought and the diversity of political and social forms in the Greek world. The readings will concentrate on original sources, including historical writings, philosophy, poetry, and oratory.

Class Format: lecture/discussion
Requirements/Evaluation: evaluation will be based on contributions to class discussions, a midterm, a final exam, and a medium-length paper
Prerequisites: none; open to all
Enrollment Limit: 25
Expected Class Size: 25

LEC Instructor: Kerry Christensen

CLAS 223 Roman History
Crosslistings: CLAS 223/HIST 223

The study of Roman history involves questions central to the development of Western institutions, religion, politics and modes of thought. Scholars have looked to Rome both for actual antecedents of European cultural development and for paradigmatic scenes illustrating what they felt were cultural universals. Yet Roman history also encompasses the most far-reaching experience of diverse cultures, beliefs, and practices known in the Western tradition until perhaps contemporary times. A close analysis of Roman history on its own terms shows the complex and fascinating results of an ambitious, self-confident nation's encounter both with unexpected events and crises at home, and with other peoples. As this course addresses the history of Rome from its mythologized beginnings through the reign of the emperor Constantine, it will place special emphasis on the impressive Roman ability to turn the unexpected into a rich source of cultural development, as well as the complex tendency later to interpret such ad hoc responses as inevitable. The Romans also provide a vivid portrait of the relationship between power and self-confidence on the one hand, and violence and ultimate disregard for dissent and difference on the other. Readings for this course will concentrate on a wide variety of original sources, and there will be a strong emphasis on the problems of historical interpretation.

Class Format: lecture/discussion
Requirements/Evaluation: evaluation will be based on weekly brief in-class responses, one 9- to 10-page paper, a midterm, and a final exam
Prerequisites: none; open to all
Enrollment Limit: 40
Expected Class Size: 40

CLAS 224 Roman Archaeology and Material Culture
Crosslistings: CLAS 224/HIST 224/ANTH 235/ARTH 235

This course examines the development of Roman archaeology and material culture from the early Iron Age, ca. 1000 BCE, to the end of the reign of Constantine in 337 CE. The primary goal of the course is to help students understand the social and historical context in which Roman material culture was created and used. We will consider a variety of evidence from across the empire, including monumental and domestic architecture, wall painting, mosaics, sculpture, coins and inscriptions. Special emphasis will be placed on the city of Rome; however, we will also look at other important urban centers, such as Pompeii, Aphrodisias and Lepcis Magna. Roman art and architecture
were not the product of any single people or culture, but rather the hybrid synthesis of complex cultural negotiations between the Romans and their colonial subjects (i.e., Greeks, Jews, Celts, etc.). Class discussions will focus on issues related to gender, ethnicity and cultural identity in the Roman Empire. For example, we will explore what it meant to be “Roman” in terms of language, ethnicity and cultural institutions. We will also discuss how Roman elites used material culture to convey political messages and social status in the imperial hierarchy, as well as the legacy of Roman art and architecture in the modern world.

**Class Format:** lecture/discussion

**Requirements/Evaluation:** evaluation will be based on classroom participation, quizzes, one 8- to 10-page paper, a midterm, and a final exam

**CLAS 236 Demigods: Nature, Social Theory, and Visual Imagination in Art and Literature, Ancient to Modern**

**Class Format:** lecture

**Crosslistings:** ARTH 236/CLAS 236/ENVI 236

This course traces the obscure history of demigods (satyrs, centaurs, nymphs, Pan, etc.) from its origins in ancient Greek art and poetry until today. We pay special attention to three points: the relationship between the mythology of demigods and ancient political theory concerning primitive life; the relationship between the ancient and evolving conceptions of the environment, and the capacity of the visual arts to generate and transmit mythology that has a limited literary counterpart.

Individual demigods occasionally interact with gods or heroes, and end up in the pages of a book. But animal-human hybrids are usually envisioned as masse and exist primarily in visual art, where they thrive to this day. The interpretation of demigods has changed over time, keeping up with developments in ethics and evolving hierarchies of genre and taste. Demigods have been subordinated to the status of decoration, or banished altogether. In antiquity, they are hardly ornamental. Embodied in satyrs, nymphs, Pan, and the others is a collective vision of an alternate evolutionary trajectory and cultural history. In this parallel world, humans and animals not only talk to each other, but coexist with their animal-human hybrids. In this vision, the distinction between nature and culture is not meaningful. Male and female are more or less equal. The industrial revolution never happens. How much of the ancient conceptual framework informing the representation of demigods survives along with the visual imagery? We will examine the origins and mythology of the demigods in works of ancient art, including sculpture and painted vases, such as the François vase and the Parthenon, and ancient texts, such as Hesiod’s *Theogony* and Ovid’s *Metamorphoses.* We will contextualize these representations within ancient intellectual history via texts ranging in genre from Old Comedy and political theory to theology, religious history, philosophy, and ethics (e.g., Aristophanes, Demokritos, and Lucretius). We will investigate the survival of the ancient myth of evolution, and how this will enrich the methodological framework through which we approach those ancient conceptual categories.

**Not Offered Academic Year 2017**

**LEC Instructor:** Guy Hedreen

**CLAS 241/COMP 241/WGSS 241**

**Crosslistings:** CLAS 241/COMP 241/WGSS 241

In the ancient Mediterranean world, sexuality and gender shaped a broad range of attitudes and actions. These categories created and reinforced difference in virtually every aspect of life, from the household to the political arena. This course examines the diverse discourses and practices around sexuality and gender in the cultures of ancient Greece and Rome, while also dismantling false assumptions about the continuity of the “classical” past with our own contemporary norms and values. We will carefully analyze, contextualize, and deconstruct a variety of texts, including selections from tragedy and comedy (Euripides, Terence), epic ( Homer, Ovid) and lyric poetry (Sappho, Catullus), novels, epiphanies, and early saints’ lives, in order to gain a deeper and more complex understanding of how gender and sexuality were experienced and represented in the culture of ancient Rome. Our primary sources will be on ancient texts, but selections from contemporary criticism and theory will enrich the methodological framework through which we approach those primary sources. The course fulfills the EDI requirement by providing sufficient context for students to make independent investigations of how literary and religious texts and practices engaged with political and social institutions to maintain different life courses and different systems of reckoning for the value of men’s lives, women’s lives, and the lives of individuals who didn’t fit easily into either category. Additionally, the course will promote students’ capacity to critically evaluate two past cultures that have long been important sources for intellectual and cultural traditions in the West, and which are still inevitably, sometimes misleadingly, to explain or justify positions and practices of privilege or oppression.

**Class Format:** lecture

**Requirements/Evaluation:** attendance, participation, midterm exam, final exam, final short research paper

**Prerequisites:** none

**LEC Instructor:** Amanda Wilcox

**CLAS 226T The Ancient Novel (W)**

**Crosslistings:** CLAS 226/COMP 226

In this course we read and closely analyze long works of fiction composed in the ancient Mediterranean between the first century BCE and the fourth century CE. To call these ancient works “novels” might be misleading, if our concept of novels is founded on the historical conditions that fostered the emergence of the modern novel (e.g., industrialization and widespread literacy). On another definition, however, the novel is that genre which, more than any other, devours and incorporates other genres. Judged by this standard, the works we will deal with in this course are quintessentially novels. They afford new perspectives on the diverse, cosmopolitan culture of the Hellenistic and late antique Mediterranean world in which they were originally written and read. Replete with spectacular tales of true love, death, danger, miracles, stunts, conversions, triumphant recognitions and happily-ever-after reconciliations, they access other classical genres such as history, tragedy, and epic by means of parody, allusion, and homage.

**Class Format:** lecture

**Requirements/Evaluation:** alternating papers and critiques

CLAS 248(S) Greek Art and the Gods
Crosslistings: ARTH 238/CLAS 248/REL 216
In the illiad, when the god Apollo is visualized, it is as a man, angry in his heaven, coming down from the peaks of Olympys, bow and quiver on his shoulders, the arrows clanging as the god moves, "like the coming of night," to bring dogs, horses, and men to their deaths. By the end of the Classical period, one statue of the archer god depicted him as a boy teasing a lizard. In this course, we will examine the development of the images the Greek gods and goddesses, from their superhuman engagement in the heroic world of epic, to their sometimes sublime artistic presence, complex religious function, and transformation into metaphors in aesthetic and philosophical thought. The course will cover the basic stylistic, iconographical, narrative, and ritual aspects of the gods and goddesses in ancient Greek culture. The course will address in detail influential artistic monuments, literary forms, and social phenomena, including the sculptures of Olympia and the Parthenon; divine corporeality in poetry; the theology of mortal-immortal relations; the cultural functions of visual representations of gods, and the continued interest in the gods long after the end of antiquity. Readings assignments will include selections from Homer, Hesiod, Sappho, Aischylos, Euripides, Plato, Walter Burkert, Jean-Pierre Vernant, Nikolaus Himmelmann, Erika Simon, and Friedrich Nietzsche.

Class Format: lecture and discussion
Requirements/Evaluation: short writing assignments, midterm exam, final exam, final paper
Prerequisites: none
Enrollment Preferences: preference will be given to pre-registered Art-History majors needing to fulfill the pre-1400 requirement; otherwise, the course is open to any interested student
Enrollment Limit: 40
Expected Class Size: 30

CLAS 260(F) Augustan Rome
Crosslistings: CLAS 260/HIST 260/ARTH 261
In 31 BCE, Octavian defeated Marc Antony at Actium, the culminating battle in a bloody civil war that had wracked the Roman state for years. As victor, Octavian found himself in a complex position: he was sole ruler over a society that traditionally abhorred monarchy, he had defeated a charismatic Roman citizen whose supporters might now pose resistance, and he had promised to re-establish a governmental system that seemed hopelessly broken. Octavian, soon given the honorific name Augustus, set about repairing the war-torn state while simultaneously solidifying his power. He announced that he had "restored the Republic," yet we regard him as Rome’s first emperor. How did those living through this transition and subsequent ancient authors interpret it? How do works of art from Augustus’ time contribute to, or resist, the idea that he ushered in a Roman “golden age”? In this course we will consider these questions using a range of sources including monuments and visual art, ancient historiography, biography, and poetry (Dio, Suetonius, Tacitus, Horace, Properius, Vergil, Ovid), and selections from contemporary scholarship. In the process, we will gain a better understanding of a pivotal period of ancient history, as well as tools for thinking comparatively about power, rhetoric, and propaganda in our own day. All readings are in translation.

Class Format: lecture/discussion
Requirements/Evaluation: class discussion, student presentations, quizzes, two papers, and a final exam
Extra Info: meets Division 1 requirement if registration is under CLAS or ARTH; meets Division 2 requirement if registration is under HIST
Prerequisites: none
Enrollment Preferences: majors and intending majors in Classics and History
Enrollment Limit: 40
Expected Class Size: 25
Distributional Requirements: Division 1

Fall 2016
course, we will look at the way in which each thinker characterizes happiness, virtue and the relation between the two. We will also pay close attention to the way in which each of these thinkers takes the practice of philosophy to play a key role in our realization of the good human life.

This course is part of the Williams College program at the Berkshire County Jail and House of Corrections and will be held at the jail. Transportation will be provided by the college. The class will be composed equally of Williams students and inmates, and one goal of the course will be to encourage students from different backgrounds to think together about issues of common human concern.

Class Format: seminar

Requirements/Evaluation: several short response pieces. A final paper of 10-15 pages

Extra Info: may not be taken on a pass/fail basis

Enrollment Preferences: juniors & seniors & students who can demonstrate an interest in the subject matter of the class; there will not be any preference purely on the basis of major; final selection for the course will be made on the basis of an interview with the instructor

Enrollment Limit: 9

Expected Class Size: 9

CLAS 320T Enchantment and the Origins of Poetry (W)

Crosslistings: CLAS 320/COMP 320/CLGR 410

Since the earliest period of Greek literature, poems have been intimately bound up in the notion of enchantment, or thehsis. The power of song to alter the mental and physical states of the audience and to interwined with the wide variety of uses to which ancient magic was applied. Similarly, the idea of divine or supernatural inspiration can be interpreted as a reflexive enchantment that binds the poet to the transformative power of language. This tutorial course will focus on the fundamental ways in which ancient Greek and Roman poetry, and its later offspring, are configured and understood as a kind of enchantment or incantation. By examining works that explicitly depict acts of enchantment as well as those that represent themselves as spells, dreams, charms, and curses, we will attempt to understand the structural and semantic relationships between song and magic across several genres. We will also consider the role of inspiration, enthusiasm, memory, truth, and falsehood in shaping both the poems themselves and discourses about poetry. Finally, we will investigate the reception and elaborate of these concepts in later European poetic traditions and their later offspring, are configured and understood as a kind of enchantment or incantation. By examining works that explicitly depict acts of enchantment as well as those that represent themselves as spells, dreams, charms, and curses, we will attempt to understand the structural and semantic relationships between song and magic across several genres. We will also consider the role of inspiration, enthusiasm, memory, truth, and falsehood in shaping both the poems themselves and discourses about poetry. CLAS 323 Leadership, Government, and the Governed in Ancient Greece (W)

Crosslistings: CLAS 323/LEAD 323/HIST 323

Visionary, opportunist, reformer, tyrant, demagogue, popular champion: compare characterization of influential leaders is often irresistible. But placing leaders in their much less encapsulated political, social, and religious contexts reveals them to be far more complicated and challenging subjects. Among the questions that will guide our study of Greek leadership: Was the transformative leader in a Greek city always an unexpected one, arising outside of the political or social systems? To what extent did the prevailing systems determine the nature of transformative as well as of normative leadership? How did various political and social norms contribute to legitimation and the specific forms of leadership such as the “tyrants” who prevailed in many Greek cities of both the archaic and classical eras, then Athenian leaders like Solon, Cleisthenes, Cimon, PericlesCleon, and Demosthenes, and Spartans like Cleomenes, Leonidas, Brasidas, and Lysander, we will focus on Alexander the Great, whose unique accomplishments transformed every aspect of Greek belief about leadership, national boundaries, effective government, the role of the governed, and the legitimacy of power. Readings will include accounts of leadership and government by ancient Greek authors (e.g. Homer, Solon, Herodotus, Thucydides, Plato, Aristotle, Demosthenes, all in translation) and prominent political theorists.

Class Format: lecture/discussion

Requirements/Evaluation: evaluation will be based on contributions to class discussions, three short papers (4-6 pages each), a midterm exam, and an orally presented and written final paper (15-20 pages)

Prerequisites: none, but a background and/or interest in the ancient world, political systems, and/or Leadership Studies is preferred; open to first-year students with instructors permission

Enrollment Limit: 12

Expected Class Size: 12

CLAS 330 Plato (W)

Crosslistings: PHIL 330/CLAS 330

Plato is one of the most important and influential thinkers in the history of the western tradition. His depiction of the trial and death of Socrates is one of the classics of western literature, and his views on ethics and politics continue to occupy a central place in our discussions 2400 years after they were written. It is, in fact, quite difficult to get through any course of study in the liberal arts without some familiarity with Plato. Nevertheless, comparatively few people realize that the views we commonly think of as “Platonic” represent only one strand in Plato’s thought. For example, we commonly attribute to Plato a theory of the Forms on the basis of his claims in the so-called “middle dialogues” (mainly Republic, Phaedo, and Symposium). However, in his philosophically more sophisticated and notoriously difficult later dialogues (such as the Parmenides, Philebus, Sophist and Statesman), Plato engages in radical criticism and revision of his earlier views. In this course, we will spend the first third of the semester attempting to understand the metaphysics and epistemology in Plato’s middle dialogues. We will spend the balance of the semester coming to grips with Plato’s arguments in the later dialogues. We will read several complete dialogues in translation, and will also read a wide variety of secondary source material.

Class Format: lecture/discussion, this class will be a roughly equal mixture of lectures, student presentations, and seminar discussion

Requirements/Evaluation: students will be expected to prepare a seminar presentation, to write several focused short analytical pieces, and to write a 15- to 20-page term paper in multiple drafts

Prerequisites: PHIL 101, PHIL 102 or permission of instructor; a prior course in logic will be extremely helpful, but is not necessary

Enrollment Preferences: upper-level Philosophy and Classics majors

Enrollment Limit: 15

Expected Class Size: 15

Distribution Notes: meets Division 2 requirement if registration is under PHIL; meets Division 1 requirement if registration is under CLAS

CLAS 332 Aristotle’s Metaphysics (W)

Crosslistings: PHIL 332/CLAS 332

In this course we will study Aristotle’s Metaphysics concentrating of books gamma-theta. Aristotle sets out to study being qua being, or what is insofar as it is. The thoughts that Aristotle expresses in these books were instrumental in setting an intellectual agenda that dominated western thought through the Middle Ages and provided the backdrop against which the modern philosophical tradition arose. Furthermore, many of the issues that Aristotle takes up in these books remain of central importance in contemporary philosophy. Our main goal in this course is to work our way through Aristotle’s text which can be extremely daunting, and to reconstruct his central positions and his arguments for these positions. We will also read selections from the vast secondary literature on Aristotle’s Metaphysics.

Class Format: seminar

Requirements/Evaluation: discussion leadership, weekly short papers, term paper

Extra Info: may not be taken on a pass/fail basis

CLAS 334 Greek and Roman Ethics (W)

Crosslistings: PHIL 334/CLAS 334

Most thoughtful human beings spend a good deal of time musing about how we ought to live. The philosophers of ancient Greece and Rome were among the first thinkers to develop rigorous arguments in response to such musings. While ancient scientific theories and the philosophical systems constructed in accordance with these theories might be of interest only to scholars of the ancient world, the moral philosophy produced in Greece and Rome remains as relevant today as it was when it was written. In this course, we will closely examine some central texts in ancient moral philosophy. We will begin by reading several of Plato’s early dialogues and the entirety of his Republic. We will then turn to Aristotle’s Nicomachean Ethics, as well as selections from his Eudemian Ethics, Magna Moralia and Politics. Finally we will examine some central texts in the Stoic and Epicurean traditions, as well as some of Cicero’s contributions to moral philosophy. We will pay special attention to how different thinkers conceive of the nature of happiness, the nature of virtue, and the relation between the two. We will also spend a good deal of time thinking about the moral psychology of the thinkers we read.

Class Format: Seminar

Requirements/Evaluation: Several short response pieces, two 10-page papers which will involve substantial revision in light of instructor feedback, active participation in seminar meetings

Prerequisites: PHIL 221 or permission of instructor

Enrollment Preferences: Philosophy and Classics majors

CLAS 341 Envisioning Empire: Geography in the Graeco-Roman World (D)

Crosslistings: CLAS 341/HIST 341/ARTH 239

During the first century BCE, successive civil wars divided the Roman Empire along ethnic, geographical and partisan lines. Octavian’s victory at battle of Actium in 31 BCE officially brought an end to the Roman civil wars, but it did not in itself unify the empire. Out of this matrix of social fragmentation and uncertainty arose the geographical texts of the Augustan age. The genre of universal geography provided a convenient means to reconfigure identities and boundaries in post-Actium world. By delineating stable boundaries between the peoples and provinces, geographical texts (whether written, sculptural or pictorial) literally mapped out identity boundaries and power relationships to create a new, unified image of the Roman Empire. This course examines the political and cosmological implications of geographical sources produced under the Roman Empire, including the Rés Gestae of Augustus, Strabo’s Geography and Tacitus’ Germania. We will also look at maps and other visual representations of the Roman world, such as the personification groups depicted on the Roman imperial cult temples at Aphrodisias and Pisidian Antioch. Discussion will focus on such issues as the relationship between geography and ethnography and the differences between modern cartography and the geographical mapping techniques used in the ancient world.

Class Format: Seminar/Lecture/Discussion

Requirements/Evaluation: Evaluation will be based on classroom performance, a midterm and one 12-15 page paper

CLAS 485T After Rome (W)

Crosslistings: HIST 485/CLAS 485

What happened to the Western Roman Empire? Did barbarians destroy it, did internal weakness undermine it, or did its participants voluntarily set it aside in favor of new cultural, social and political ideas? How did the evaporation of imperial political and military structures change the cultural and religious fabric of Europe? And above all, what is it that divides the ancient from the medieval world? Few questions in European history have occupied historians as insistently as these, and yet for all the lengthy books, ponderous documentaries, and political polemics, we are no closer to a consensus view. This tutorial will approach these timeless questions, first, through a comparative survey of the post-Roman Mediterranean, considering North Africa, Spain, Italy, Gaul, and the Byzantine East in turn. We will consult key primary sources for each region, including tax records, laws, narrative histories, letters, religious texts and archeological finds, as they are variously available. This first-hand experience with the problems of post-Roman history will prepare us to engage with secondary scholarship on the late imperial and early medieval worlds. Alongside the classic catastrophist readings of post-Roman history, which see the centuries after 476 CE as a period of severe economic and social dislocation, we will explore more recent arguments that seek to circumvent the problem of Rome’s fall by positing an era of economic, cultural and intellectual continuity from the fifth through the eighth centuries.

Class Format: Tutorial

Requirements/Evaluation: Six essays (5-7 pages each) and six critiques, together with a longer, final essay (ca. 10 pages)

CLGR 101(F) Introduction to Greek
This full-year, intensive course presents the fundamentals of Greek grammar, syntax, and vocabulary and introduces students, in the second semester, to works of the classical period (usually Xenophon and Euripides).

Class Format: recitation/discussion
Requirements/Evaluation: evaluation will be based on frequent quizzes, tests, and a final exam
Extra Info: credit granted only if both semesters (CLGR 101 and 102) are taken
Prerequisites: none; designed for students who are beginning Greek or have studied less than two years of Greek in secondary school; students with some previous experience in Greek may want to enroll in CLGR 102 only (consult the department)
Enrollment Limit: 15
Expected Class Size: 8-10
Distributional Requirements: Division 1

CLGR 102(S) Introduction to Greek
This full-year, intensive course presents the fundamentals of Greek grammar, syntax, and vocabulary and introduces students, in the second semester, to works of the classical period (usually Xenophon and Euripides).

Class Format: recitation/discussion
Requirements/Evaluation: evaluation will be based on frequent quizzes, tests, and a final exam
Extra Info: credit granted only if both semesters (CLGR 101 and 102) are taken
Prerequisites: CLGR 101 or permission of department
Enrollment Limit: 15
Expected Class Size: 8-10

Spring 2017
LEC Section: 01 MW 11:00 AM 12:15 PM Instructor: Kerry Christensen

CLGR 201(F) Intermediate Greek
Reading of selections from Hesiod and from Plato, combined with grammar review. The primary goal of this course is to develop fluency in reading Greek. We will also read the texts closely to explore important continuities and changes in Greek culture between the archaic and classical periods. The emphasis will vary from year to year, but possible subjects to be explored include: the education and socialization of the community's children and young adults; religion and cult practices; the performative aspects of epic (and choral) poetry and of prose genres like oratory and the philosophical dialogue; traditional oral poetry and storytelling and the growth of literacy; the construction of woman, of man; the development of the classical polis.

Class Format: recitation/discussion
Requirements/Evaluation: evaluation will be based on classroom participation, quizzes, tests, and a final exam
Prerequisites: CLGR 101-102 or two years of Greek in secondary school
Enrollment Limit: 12
Expected Class Size: 5-10
Distributional Requirements: Division 1

Fall 2016
LEC Section: 01 MWF 11:00 AM 12:15 PM Instructor: Amanda Wilcox

CLGR 401 Homer: The Iliad
From the early archaic era through the classical and beyond, Homer's Iliad and Odyssey remained foundational in Greek discourse about community, leadership, war, heroism, family, friendship, loyalty, the gods, justice, and much more. Nearly all of subsequent Greek literature, both poetry and prose, developed out of a dialogue with these epics. In this course, we will read extensive selections from the Iliad in Greek and the entire epic in translation.

Class Format: seminar
Requirements/Evaluation: class participation, short written exercises and/or oral reports, midterm and final exams, and a final paper
Prerequisites: CLGR 201 or permission of instructor
Enrollment Preferences: majors in Classics, Comparative Literature, English and other literatures
Enrollment Limit: 12
Expected Class Size: 5-6

CLGR 405 Greek Lyric Poetry
This course will explore the development of Greek lyric poetry from the eighth to the fifth centuries BCE. Beginning with Archilochus, Sappho, and Alcaeus, and proceeding through such poets as Solon, Anacreon, Bycus, and Theognis, we will examine the formal, social, and performative contexts of lyric, the influence of epic and choral poetry on the evolution of the genre, and the difficulties of evaluating a fragmentary corpus. Finally, we will explore the influence of political and economic changes in the early fifth century on the work of Simonides. The goal throughout is to investigate the structures, innovations, and problems of poetic self-expression in early Greek poetry.

Class Format: seminar
Requirements/Evaluation: evaluation will be based on class participation, a midterm exam, a final paper, and a final exam
Prerequisites: CLGR 201 or permission of instructor
Enrollment Limit: 12
Expected Class Size: 5
Distributional Requirements: Division 1

Not Offered Academic Year 2017
SEM Instructor: Edan Dekel
CLGR 406T Coming of Age in the Polis (W)
Crosslistings: CLGR 406T/WGSS 406

Studying a society's modes of rearing its young, and especially the ways it prepares and tests adolescents for their "coming of age" into their adult roles, provides an excellent approach to exploring its fundamental values and institutional practices. Archaic and classical Greek literature not only reflects but actively reflects upon the socialization of boys and girls in the Greek polis. In this course we will read in Greek selections from the Homeric Hymns to Demeter and Apollo and, in its entirety, a tragedy (e.g., Sophocles' Philoctetes), examining these texts through the lens of "coming of age." We will read in English brief selections from Homeric epic and from elegiac and lyric poetry (monodic and choral), and several Athenian tragedies and perhaps a comedy. We will also read critical literature on childrearing, religious cults for boys and girls of different ages, and the role of dance, song and poetry in preparing the young for their adult roles, particularly in fifth-century Athens. Students will be divided into tutorial pairs chiefly according to their previous experience in Greek courses. Students will meet with the instructor once a week either individually or in pairs to present their translations of the Greek assigned for that week, and they will also meet once a week in pairs for the oral presentation of written 5-page reports. At the latter meeting, each student will alternate between making a formal presentation one week and, in the next week, offering an oral critique of the other student's presentation.

Class Format: tutorial

Requirements/Evaluation: evaluation will be based on the translations, reports, and critiques presented in the tutorial sessions

Extra Info: may not be taken on a pass/fail basis

Prerequisites: CLGR 201 or permission of instructor

Enrollment Limit: 10

Expected Class Size: 6-8

CLGR 407 Rhetoric and Democracy: the Greek Orators

The Greek orators of the 4th-century BCE were specialists in rhetoric and persuasive discourse, and in the deployment of the one to produce the other. They wrote forensic oratory intended to sway juries; political speeches with which they argued policy before the Athenian Assembly and aspired to be the city's leaders; attack speeches which they hoped would destroy their rivals; and show pieces intended to dazzle the listener with their rhetorical brilliance. In this course the most influential orators of 4th-century Athens will instruct us in rhetoric, demonstrating the stylistic versatility of the Greek language, teach us about what Athenians in the 4th century cared about, reveal theories of human psychology, and persuade us of a thing or two. We will read selected speeches by Lysias, Isocrates, and Demosthenes, as well as portions of speeches by other orators such as Aeschines, Antiphon, and Dinarchus.

Class Format: seminar

Requirements/Evaluation: evaluation will be based on class translation and discussion, several short exercises, a midterm, a final paper, and a final translation exam

Prerequisites: CLGR 201 or permission of instructor

Enrollment Limit: 12

Expected Class Size: 6-8

Distributional Requirements: Division 1

Not Offered Academic Year 2017

LEC Instructor: Kerry Christensen

CLGR 409(F) Plato

Plato's writing has exercised an incalculable influence on the development of subsequent philosophy and literature, but his dialogues are equally compelling when they are read independently of the works they have inspired. In this course we will read substantial selections from one or more of the so-called middle dialogues (Symposium, Phaedo, Republic, Phaedrus), in which a variety of speakers, including Socrates, ask and provisionally answer questions such as what is love, beauty, and justice, and how does the human soul in possession of these goods participate in the divine?

Class Format: seminar

Requirements/Evaluation: evaluation will be based on class participation, several short written assignments, a midterm and final exam, and a longer final paper

Prerequisites: CLGR 201 or permission of instructor

Enrollment Preferences: if oversubscribed, preference given to majors in Classics, Philosophy, Comparative Literature, English or another literature

Enrollment Limit: 12

CLGR 410T Enchantment and the Origins of Poetry (W)

Crosslistings: CLAS 320/COMP 320/CLGR 410

Since the earliest period of Greek literature, poems have been intimately bound up in the notion of enchantment, or thelexis. The power of song to alter the mental and physical states of the audience and the world at large is intertwined with the wide variety of uses to which ancient magic was applied. Similarly, the idea of divine or supernatural inspiration can be interpreted as a reflexive enchantment that binds the poet to the transformative power of language. This tutorial course will explore the fundamental ways in which ancient Greek and Roman poetry, and its later offspring, are configured and understood as a kind of enchantment or incantation. By examining works that explicitly depict acts of enchantment as well as those that represent themselves as spells, dreams, charms, and curses, we will attempt to understand the structural and semantic relationships between song and magic across several genres. We will also consider the role of inspiration, entheism, magic, and self-deception in shaping both the poems themselves and discourses about poetry. Finally, we will investigate the reception and elaboration of these concepts in later European poetic traditions from the middle ages through modernity. Readings may include selections from Homer, Hesiod, Pindar, Aeschylus, Euripides, Plato's Ion and Phaedrus, Theocritus, Virgil, Horace, Ovid, Roman love elegy, Old English charms, Old Norse poetry, Marlowe's Dr. Faustus, Shakespeare's A Winter's Tale, Coleridge, Shelley, Mallarmé, Valéry, T. S. Eliot, and various other poets and critics. All works will be read in English translation, but students who have studied ancient Greek will be expected to read significant portions of the early material in the original.

Class Format: tutorial

Requirements/Evaluation: students will meet with instructor in pairs once a week; one 5- to 7-page paper every other week and critique of partners' papers in alternate weeks

CLGR 412 Herodotus

This course will focus on the reading in Greek of Herodotus' Histories, his multivalent and deeply human account of how and why several hundred years of contact and conflict between the Greek city-states and non-Greek peoples to the east culminated in the Persian invasion of Greece. We will explore the ways in which his rich narrative style and intellectual landscape reflect the influence of Greek and near-eastern oral traditions, Ionian philosophical thought, Greek tragedy, and contemporary Athenian rhetoric and philosophy. We will also study his use of anthropological methods, ethnography, and geography in explaining human events. Among the many themes that permeate his work, we will pay special attention to the working of divine versus human justice, the mutability of human affairs, the nature of authority, the role of family, and the quest for wisdom.

Class Format: seminar

Requirements/Evaluation: class participation, two short written assignments, a midterm exam, a final paper, and a final exam

Prerequisites: CLGR 201 or permission of instructor

Enrollment Preferences: Classics majors

Enrollment Limit: 12

Expected Class Size: 8

Distributional Requirements: Division 1

Not Offered Academic Year 2017

CLGR 413 Hellenistic Poetry

After the death of Alexander the Great in 323 BCE, a new cultural center emerged in the recently founded city of Alexandria in Egypt. From across the Greek-speaking world, intellectuals who were both scholars and poets flocked to Alexandria's Museum (the shrine to the Muses) and its renowned library to categorize and organize the literature of the past while creating new kinds of poetry and poetic ideal. This course surveys the poetry of Hellenistic period with a focus on the "big three" poets of the third century, Callimachus, Theocritus, and Apollonius of Rhodes, who were especially influential on later Latin poetry of the Roman and Augustan ages. As we read a variety of texts including epigrams, hymns, minae, pastoral idylls, and selections from epic, we will pay close attention to issues of genre, the tension between tradition and innovation, and the cultural context of Greco-Egyptian Alexandria.

Class Format: seminar

Requirements/Evaluation: based on class participation, shorter written exercises and/or oral reports, midterm and final exams, and a final paper

Prerequisites: CLGR 201 or permission of instructor

Enrollment Preferences: Classics majors

Enrollment Limit: 12

Expected Class Size: 5-7

**CLLA 201(F) Intermediate Latin: The Late Republic**

Reading of selections from Latin prose and poetry, normally from a speech or letters by Cicero and from the poetry of Catullus. This course includes a comprehensive review in grammar and aims primarily at developing fluency in reading Latin. At the same time it acquaints students with one of the most turbulent and important periods in Roman history and attests to the development of their interpretative and analytic skills.

**Class Format:** recitation/discussion

**Requirements/Evaluation:**
- evaluation will be based on classroom performance, quizzes, a midterm, and a final exam; occasional oral presentations or short essays may be required as well

**Prerequisites:** CLLA 101-102 or 3-4 years of Latin in secondary school; consult the department

**Enrollment Limit:** 12

**Expected Class Size:** 6-10

**Distributional Requirements:** Division 1

---

**Fall 2016**

**LEC Section:** 01  MWF 09:00 AM 09:50 AM  Instructor: Amanda Wilcox

**CLLA 302(S) Vergil’s “Aenied”**

This course is a comprehensive introduction to Vergil’s Aeneid. Students will develop their ability to read and translate the Latin text of the poem, while at the same time exploring the major interpretive issues surrounding the definitive Roman epic. Through a combination of close reading and large-scale analysis, we will investigate the poem’s literary, social, and political dimensions with special attention to Vergil’s consummate poetic craftsmanship.

**Class Format:** discussion/recitation

**Requirements/Evaluation:**
- evaluation will be based on class participation, a midterm exam, a final exam, and a final paper

**Prerequisites:** CLLA 201 or permission of instructor

**Enrollment Limit:** 12

**Expected Class Size:** 10

**Distributional Requirements:** Division 1

---

**Spring 2017**

**SEM Section:** 01  TF 02:35 PM 03:50 PM  Instructor: Edan Dekel

**CLLA 406 Horace Odes 1-3**

In his Odes Horace fashioned a poetic delight comparable to his experience of reading a Horatian ode. Through close readings of selected odes in Books 1-3 we will seek to experience such delight for ourselves and to learn why, as Nietzsche put it, “what is here achieved is in certain languages not even to be hoped for.” We will examine the relation between poetic landscapes, poetic programs and the poetry’s exploration of subjects like love, friendship, youth and old age, death, politics, private morality; the poet’s
those demands. It is in terms of this transformational power of poetry that we poems and throughout the collection; the demands thereby placed on the capacity to define himself by offering his own account of poetic traditions and Requirements/Evaluation: Assignment will be based on contributions in the classroom, two 2- to 3-page papers (translation with comments), a short memorization assignment, perhaps a midterm, a final paper, and a final exam
Prerequisites: CLLA 302 or permission of instructor
Distributional Requirements: Division 1

Not Offered Academic Year 2017
LEC  Instructor: Meredith Hoppin

CLLA 407 Caesar and Cicero
The one a brilliant strategist, the other preeminent in the courts, Caesar and Cicero were both masters of the Roman idiom whose ambitions for their country and themselves brought them into bitter conflict. Their combined oeuvres provide compelling, detailed accounts of the events and personalities that ended the Roman republic and ushered in an era of prolonged civil war. Moreover, despite striking differences, their works justifiably are regarded as the twin summits of classical Latin prose. In this course we will read extensive selections from Caesar's commentaries (the Bellum Gallicum and Bellum Civile) and from Cicero's speeches and letters, aiming throughout at a better understanding of these authors' stylistic achievements and performing careful analysis of their pragmatic persuasive goals.
Class Format: recitation/discussion
Requirements/Evaluation: evaluation will be based on class participation, several short written assignments (such as article reviews), a midterm exam and essay of moderate length, plus a final exam and longer paper
Prerequisites: CLLA 302 or permission of instructor
Enrollment Limit: 12
Expected Class Size: 6-9
Distributional Requirements: Division 1

Not Offered Academic Year 2017
LEC  Instructor: Amanda Wilcox

CLLA 408(S) Roman Comedy
Roman comedy flourished only briefly, between the second and third Punic Wars, but its cultural-historical importance is undeniable. In these fabulae palliatae, Latin comedies staged in Greek costume and featuring ostensibly Greek characters, Roman attitudes are questioned and mocked but ultimately reassessed. We will read the Menaghezi of Plautus and the Aedile of Terence, two plays that burlesque the stereotypical relationships between fathers, brothers, sons, and slaves. We may also consider selections from Cato the Elder, Cicero's letters, and other primary and secondary texts that shed additional light on Roman familial relationships and their place in republican society.
Class Format: discussion/recitation
Requirements/Evaluation: evaluation will be based on class participation, several papers of varying length, a midterm and a final exam
Prerequisites: CLLA 302 or permission of instructor
Enrollment Preferences: if the course is oversubscribed, preference will be given to majors and potential majors in Classics and Comparative Literature
Enrollment Limit: 12
Expected Class Size: 8-10
Distributional Requirements: Division 1

Spring 2017
SEM Section: 01  TF 01:10 PM 02:25 PM  Instructor: Amanda Wilcox

CLLA 409 Seneca and the Self
Through a close reading of selections from his Dialogues, Epistulae Morales, and a tragedy (probably Medea), this course will consider ethical and literary dimensions of self-fashioning, self-formation, and the conception of self in the Stoic philosophy of the younger Seneca. The focus of this course lies squarely in the first century CE, and on the analysis of Seneca's own texts. We will begin, however, with an introduction to the ethics of Roman Stoicism through the personae theory of Panaetius as recorded in Cicero's De Officiis. Moreover, we will read and discuss selections from some of Seneca's most famous and influential interpreters, including Montaigne and Foucault, in order to enrich our understanding of contemporary assessments of his work and to gain an appreciation of Seneca's considerable influence on later theorizations of selfhood.
Class Format: seminar
Requirements/Evaluation: evaluation will be based on class participation, several short written and oral assignments, midterm and final exams, and a final paper
Prerequisites: CLLA 302 or permission of instructor
Enrollment Limit: 12
Expected Class Size: 5-10
Distributional Requirements: Division 1

Not Offered Academic Year 2017
SEM  Instructor: Amanda Wilcox

CLLA 412 Roman Ethnography
This course explores the development of Roman ethnography from the Late Republic into the early Empire. We will begin by examining how Greek ethnographic accounts of the barbarian “Other” influenced Roman writers of the late Republic, and then move on to assess the impact of Roman imperial ideology on the further development of the genre. Roman ethnographers appealed to popular tropes and ethnic stereotypes that were easily intelligible to their Roman audience. As a result, their writings tell us far less about the foreign peoples and places they claim to describe than about the cultural and political aspirations of the Romans themselves. In addition to reading excerpts, in Latin, from Caesar’s De Bello Gallico, Ovid’s Tristia, and Tacitus’ Agricola, we also will read selections from Catullus, Pliny’s Natural History, and the earliest Roman geographer, Pomponius Mela.
Class Format: seminar
Requirements/Evaluation: class participation, a midterm exam, an 8- to 10-page final paper, and a final exam
Prerequisites: CLLA 302 or permission of instructor
Enrollment Preferences: majors or prospective majors in Classics, History, Art History
Enrollment Limit: 12
Expected Class Size: 6-9
Distributional Requirements: Division 1

Not Offered Academic Year 2017
SEM  Instructor: Benjamin Rubin

CLLA 414 Vergil’s Eclogues and Georgics
This course will explore the two major works of Vergil that preceded the Aeneid: the Eclogues, a series of ten pastoral poems that range widely across personal, political, and mythological themes; and the Georgics, a longer didactic poem in four books that uses an agricultural framework to examine issues of life, death, power, suffering, and love. The goal throughout is to investigate the literary, political, and social dimensions of the poems with special attention to their relationship to earlier models, as well as their distinctive poetic craftsmanship.
Class Format: seminar
Requirements/Evaluation: class participation, a midterm exam, a final exam, and a final paper
Prerequisites: CLLA 302 or permission of instructor
Enrollment Preferences: Classics majors
Enrollment Limit: 15
Expected Class Size: 10
Distributional Requirements: Division 1

Not Offered Academic Year 2017
SEM  Instructor: Edan Dekel

COGNITIVE SCIENCE (DIV II)
Chair: Professor JOSEPH CRUZ
Advisory Committee: Professors: J. CRUZ, A. DANYLUK, K. KIRBY, H. WILLIAMS, S. ZAKI. Associate Professor: N. KORNELL.

Cognitive science is concerned with how humans, non-human animals, and computers acquire, represent, manipulate, and use information. As an interdisciplinary field it combines research and theory from computer science (e.g., artificial intelligence), cognitive psychology, philosophy, linguistics, and neuroscience, and to some extent evolutionary biology, math, and anthropology. Complex issues of cognition are not easily addressed using traditional intra-disciplinary tools. Cognitive researchers in any discipline typically employ a collection of analytic and modeling tools from across traditional disciplinary boundaries. Thus, the methods and research agenda of cognitive science are broader than those of any of the fields that have traditionally contributed to cognitive science. The Cognitive Science Program is designed to provide students with the broad interdisciplinary foundation needed to approach issues of cognition.

THE CONCENTRATION
The concentration in Cognitive Science consists of six courses, including an introductory course, four electives, and a senior seminar.

Minds, Brains, and Intelligent Behavior (COGS 222) is the entry point into the concentration, and provides an interdisciplinary perspective on issues of cognition. Ideally, it should be taken before the end of the sophomore year. Emphasizing the highly interdisciplinary nature of the field, the four electives must be distributed over at least three course prefixes. In the fall of the senior year, concentrators will participate in a senior seminar (COGS 493). Required Courses
COGS/PHIL/PSYC 222 Minds, Brains, and Intelligent Behavior: An Introduction to Cognitive Science
COGS 493 Senior Seminar

Elective Courses
Four electives are required, chosen from at least three prefixes, at most two of which can be from the same prefix.

BIOL 204/NSCI 204 Animal Behavior
CSCI 134 Introduction to Computer Science
CSCI 361/MATH 361 Theory of Computation
CSCI 373 Artificial Intelligence
CSCI 374 Machine Learning
JAPN 130 Intro. to Linguistic Analysis
CROSSLISTINGS: COGS 222(F) Minds, Brains, and Intelligent Behavior: An Introduction to Cognitive Science
This course will emphasize interdisciplinary approaches to the study of computation in symbolic and connectionist architectures, concept acquisition, the philosophical foundations of cognitive science, representation and general study away guidelines for Cognitive Science here.

STUDY ABROAD
Students who wish to discuss plans for study abroad are invited to meet with any member of the Cognitive Science advisory committee. You can find general study away guidelines for Cognitive Science here.

COGS 222(F) Minds, Brains, and Intelligent Behavior: An Introduction to Cognitive Science
Crosslistings: COGS 222/PHIL 222/PSYC 222
This course will emphasize interdisciplinary approaches to the study of intelligent systems, both natural and artificial. Cognitive science synthesizes research from cognitive psychology, computer science, linguistics, neuroscience, and contemporary philosophy. Special attention will be given to the philosophical foundations of cognitive science, representation and computation in symbolic and connectionist architectures, concept acquisition, problem solving, perception, language, semantics, reasoning, and artificial intelligence.

Class Format: lecture/discussion
Requirements/Evaluation: midterm and final exams, and self-paced weekly exercises
Prerequisites: PSYC 101 or any introduction to PHIL course or CSCI 134 or permission of instructor; background in more than one of these is recommended
Enrollment Preferences: first-year and sophomore students
Enrollment Limit: 25
Expected Class Size: 25
Dept. Notes: meets Contemporary Metaphysics & Epistemology requirement only if registration is under PHIL
Distributional Requirements: Division 2
Other Attributes: PHIL Contemp Metaphysics & Epistemology Courses
PSYC 200-level Courses

Fall 2016
LEC Section: 01 TR 11:20 AM 12:35 PM Instructor: Joseph Cruz

COGS 497(F) Senior Thesis: Cognitive Science
Distributional Requirements: Division 2

Spring 2017
HON Section: 01 TBA Instructor: Joseph Cruz

COGS 498(S) Independent Study: Cognitive Science
Prerequisites: permission of program chair
Distributional Requirements: Division 2

Comparative Literature

MAJOR
Track 1
This track within the Comparative Literature major combines the focused study of a single foreign-language literature with a wide-ranging exploration of literary forms across national, linguistic, and historical boundaries. Each student on this track must select a single foreign language as his or her specialty, although the serious study of literature in foreign languages other than the student’s specialty is strongly encouraged. The languages currently available are French, German, Ancient Greek, Latin, Russian, and Spanish. Each student should choose a faculty advisor with whom the student will meet each semester to discuss how best to fulfill the requirements for the major.

Eleven courses are required for Track 1 of the major — students should aim to complete core requirements by the end of junior year:

Comparative Literature 110 Introduction to Comparative Literature
or Comparative Literature 111 The Nature of Narrative

Any three comparative literature core courses. A core course is any course that meets at least one of the following criteria: a) it must be genuinely comparative across cultures and/or b) it must primarily treat literary theory. The three core courses may be chosen from the offerings of the Program in Comparative Literature or from the offerings of other departments and programs, including, but not limited to, the foreign language programs and English, Religion, Africana Studies, Latino/Latina Studies, and Women’s, Gender, and Sexuality Studies. Examples of core courses include the following (please be aware that this is not an exhaustive list; consult with a major advisor about which courses may count as cores):

- COMP 117 Introduction to Cultural Theory
- COMP 200 European Modernism—and its Discontents
- COMP 205 Job and The Book of Job and Joban Literature
- COMP 223 Comparative Middle Eastern and Latin American Cultural Studies
- COMP 242 Americans Abroad
- COMP 243 Modern Women Writers and the City
- COMP 259 Adultery in the Nineteenth-Century Novel
- COMP 340 Literature and Psychoanalysis
- COMP 345 Museums, Memorials, and Monuments: The Representation and Politics of Memory
- COMP 380 Literary and Critical Theory in the Twentieth Century

Three literature courses in the student’s specialty language, in which texts are read in the original. At least one of the three must be at the 300-level or above. Students should aim to acquire intermediate-level proficiency in their specialty language by the end of the sophomore year.

Three courses in which most of the course work concerns literature other than that of the student’s specialty language or literary theory. These courses may be selected from Comparative Literature offerings or from other departments and must be approved by the student’s major advisor. Only one may be in English or American literature.

Comparative Literature 401 Senior Seminar (variable topics). Students are expected to take the version of 401 offered in their senior year.

With the permission of their advisor or the chair, students may also count appropriate courses in music or art toward major requirements. Students pursuing the Comparative Literature major are strongly encouraged to study abroad during their junior year. Students may receive major credit for up to 4 courses taken during study abroad. At least three courses towards the major must be at the 300 level or above. At least one of the courses counted toward the major must be Writing Intensive.

Eleven courses are required for Track 2 of the major — students are required to aim to complete core requirements by the end of junior year:

Comparative Literature 111 The Nature of Narrative

Or Comparative Literature 110 Introduction to Comparative Literature

Any four comparative literature core courses. A core course is any course that meets at least one of the following criteria: a) it must treat primarily literature and b) it must be genuinely comparative across cultures and/or primarily theoretical. The four core courses may be chosen from the offerings of the Program in Comparative Literature or from the offerings of other departments and programs, including, but not limited to, the foreign language programs and English, Religion, Africana Studies, Latino/Latina Studies, and Women’s, Gender, and Sexuality Studies. See above under “Track 1” for some examples of core courses. (Please be aware that this is not an exhaustive list; consult with a major advisor about which courses may count as cores.)

Five courses devoted to literature or literary theory that cover at least three different national/cultural traditions. The courses may be selected from Comparative Literature offerings or from other departments and must be approved by the student’s major advisor. Of the courses taken outside of the Program in Comparative Literature, no more than two may have the same course prefix. Students are strongly encouraged to include courses in a foreign language among these five.

Comparative Literature 401 Senior Seminar (variable topics). Students are expected to take the version of 401 offered in their senior year.

With the permission of their advisor or the chair, students may also count appropriate courses in music or art toward major requirements. Students who choose to study abroad during their junior year may receive major credit for up to 4 courses taken during study abroad. At least three courses towards the major must be at the 300 level or above. At least one of the courses counted toward the major must be Writing Intensive.

THE DEGREE WITH HONORS IN COMPARATIVE LITERATURE

Prerequisites

- Honors candidates in Comparative Literature are required to have maintained a GPA of 3.5 in the major to qualify for submitting a thesis proposal. In addition, candidates must demonstrate a strong interest in a specific topic for which an appropriate faculty advisor will be available in the senior year.

Timing

- Students wishing to pursue a thesis in Comparative Literature are strongly urged to secure an advisor by the end of the week after Spring Break in their junior year. By May 15th of their junior year, candidates must submit a Proposal to the Program Advisory Committee, together with the advisor, will discuss the process of writing the thesis.

In their senior year, candidates will devote two semesters and the summer study abroad to their thesis (493-W31-494). By the end of the Fall semester, students will normally have undertaken substantial research and produced the draft of at least the first half of the project. At this point students should also have a clear sense of the work remaining for completion of the thesis. In the course of the Fall semester, students will also have chosen and met with a second reader for the project, who will provide additional guidance and read the final thesis. By the end of Winter Study, students should have completed a draft of the entire project. At that time, the Comparative Literature Advisory Committee, together with the advisor, will determine whether the project may continue as an Honors Thesis, or whether its first portions (COMP 493-W) will be graded as Independent Studies.

- The second semester of independent thesis work will be spent revising as necessary. The completed thesis in its final form will be due one week before the last day of classes. At the end of the Spring term, the student will make a public presentation of the final project, to which members of the Advisory Committee will be specially invited.

Characteristics of the Thesis, Evaluation, and Major Credit

- The topic of the thesis must be comparative and/or theoretical. It is also possible to write a thesis that consists of an original translation of a significant text(s); in this case, a theoretical apparatus must accompany the translation. The complete thesis must be at least 50 and at most 75 pages in length, excluding the bibliography.

- The advisor will assign the grades for the thesis courses (COMP 493-W-494); the Advisory Committee will determine whether a candidate will receive Honors, Highest Honors, or no honors.

- For students who pursue an honors thesis, the total number of courses required for the major—including the thesis course (COMP 493-W494)—is 12, i.e., one of the thesis courses may substitute for one elective.

STUDY ABROAD

- The Program in Comparative Literature strongly urges its students to study abroad. Students in track 1 should seriously consider study abroad in a country where their specialty language is spoken; they will likely be able to complete one of the specialty language courses required for the major during study abroad. But all students can benefit from study abroad; literature courses abroad are often candidates for credit at the College. You can find general study away guidelines for Comparative Literature here.

- The Program in Comparative Literature 104 Critical Approaches to Theatre and Performance (D) Crosslistings: THEA 104/COMP 104

This introductory critical survey course will explore a variety of theatre and performance traditions from around the globe, from antiquity to the present day. Through close analysis of select texts and performance practices in a seminar format, the course will consider what role theatre plays in the establishment and growth of culture, politics, and aesthetics. Topics may include: Ancient Greek theatre, Classical Indian performance, Renaissance English theatre, Japanese Noh and Kabuki, popular American traditions, modern European theatre, and postmodern performance. Films and other media will be utilized when relevant. Regular in-class visits to the Williams College Museum of Art will occur, as well. This course meets the criteria of the Exploring Diversity Initiative as it engages in a cross-cultural investigation of performance and explores how theatre is deeply embedded in power relations.

Class Format: seminar

Requirements/Evaluation: 5 structured writing & creative assignments based on thematic elements of the course, as well as a final "Company" performance; in-class participation, writing, & discussion

Extra Info: participation in all LABS; all students enrolled in the course are also required to attend the departmental theatre productions

Enrollment Preferences: Theater majors and Comparative Literature majors

Enrollment Limit: 18

Expected Class Size: 14

Notes: this course is required for and is suggested as an introduction to the major in Theatre

Distributional Requirements:

Division 1: Exploring Diversity

Other Attributes:

- FMST Related Courses
- PERF Interdepartmental Electives

Not Offered Academic Year 2017

SEM Instructor: Amy Holzapfel

We will get to know such writers and artists as Homer, Euripides, Ovid, Augustine, Shakespeare, Donne, Milton, Lacroix, Mozart, Freud, Frost, Scorsese.

Class Format: seminar
Requirements/Evaluation: four five-page papers, in-class presentation, thoughtful participation in discussions
Extra Info: may not be taken on a pass/fail basis
Prerequisites: none
Enrollment Preferences: first-year students who have not taken or placed out of a 100-level ENGL course
Enrollment Limit: 19
Expected Class Size: 19
Distributional Requirements: Division I
Writing Intensive

Fall 2016
SEM Section: 01 TR 08:30 AM 09:45 AM Instructor: Emily Vasiliauskas

COMP 107(S) The Trojan War (W)
Crosslistings: CLAS 101/COMP 107

This course explores the ancient Greek and Roman construction of gender, the location and expression of virtue in the public and private spheres, the connections and conflicts between moral probity and political success, the exercise of individual power versus action on behalf of the commonplace, the absorption of foreign customs and peoples into Rome, the management of literal and imaginary frontiers, and other anxieties of empire. We will read selections and complete works by a wide variety of Roman authors, including Cicero, Catullus, Caesar, Vergil, Sallust, Horace, Ovid, Seneca, and Tacitus. All readings will be in translation.

Class Format: lecture/discussion
Requirements/Evaluation: evaluation will be based on a series of short papers involving close textual analysis, two 5-page papers, and contributions to class discussion
Prerequisites: none
Enrollment Preferences: majors in Classics and Comparative Literature, with attention also given to assuring a balance of class years and majors
Enrollment Limit: 19
Expected Class Size: 19
Distributional Requirements: Division I
Writing Intensive
Other Attributes: MAST Interdepartmental Electives

Spring 2017
LEC Section: 01 TR 09:55 AM 11:10 AM Instructor: Meredith Hoppin

COMP 108 Roman Literature: Foundations and Empire
Crosslistings: CLAS 102/COMP 108

In the first book of Vergil's Aeneid, the god Jupiter prophesies the foundation and the greatness of Rome: "I place no limits on their fortunes and no time; I grant them empire without end." Yet elsewhere, this epic account of Rome's origins, this promise of unlimited power for the descendants of Romulus seems to be seriously abridged. Some readers have seen, not only in the Aeneid but throughout classical Roman literature, a persistent tendency to inscribe the decay and disintegration of Roman power into the very works that proclaim and celebrate Roman preeminence. This course explores the ancient Romans' own interpretations of their past, their present, and their destiny: the humble beginnings of their city, its rise to supreme world power, and premonitions of its fall. Readings for our consideration will include Roman constructions of gender, the location and expression of virtue in the public and private spheres, the connections and conflicts between moral probity and political success, the exercise of individual power versus action on behalf of the commonplace, the absorption of foreign customs and peoples into Rome, the management of literal and imaginary frontiers, and other anxieties of empire. We will read selections and complete works by a wide variety of Roman authors, including Cicero, Catullus, Caesar, Vergil, Sallust, Horace, Ovid, Seneca, and Tacitus. All readings will be in translation.

Class Format: lecture/discussion
Requirements/Evaluation: evaluation will be based on short written assignments, midterm and final exams with essays, and contributions to class discussion
Prerequisites: none

Enrollment Preferences: first-year students and sophomores and majors in Classics and Comparative Literature
Enrollment Limit: 25
Expected Class Size: 15
Distributional Requirements: Division I

Not Offered Academic Year 2017
LEC Instructor: Amanda Wilcox

COMP 110(F) Introduction to Comparative Literature
Crosslistings: COMP 110/ENGL 241

This course involves reading and analyzing literature drawn from different periods, movements, cultures, and media. In this class, we will study English translations of texts from eras spanning the ancient to the contemporary, with movements including romanticism, realism, and postmodernism; national traditions arising in Western and Eastern Europe, Asia, and Latin America; and media including prose fiction, graphic memoir, and film. Throughout the course, we will consider what it means to think about all these different works as literary texts. To help with this, we will also read selections of literary theory that define literature and its goal in abstract or philosophical terms. Assignments will focus on close, creative reading of relatively short texts by authors like Homer, Sei Shônagon, Kleist, Lemmontov, Zola, Borges, Wilde, Mamet, Bechdel, and others. All readings will be in English.

Class Format: lecture
Requirements/Evaluation: attendance, participation, two 5-page papers, a few short responses, midterm exam
Extra Info: may not be taken on a pass/fail basis
Prerequisites: none
Enrollment Preferences: students considering a major in Comparative Literature
Enrollment Limit: 40
Expected Class Size: 35
Distributional Requirements: Division I

Fall 2016
LEC Section: 01 Cancelled

COMP 111(F) Nature of Narrative (W)
Crosslistings: COMP 111/ENGL 120

This course examines the nature and workings of narrative using texts drawn from a wide range of literary traditions, media, and genres. Readings will include Greek and Chinese classics (Homer and others), 19th-century French, German, and Russian fiction (Zola, Kleist, Lemmontov), Latin American magic realism (Marquez), and visual literature from stage drama to film and graphic memoir (Oscar Wilde, Sam Mendes, Alison Bechdel). We will also read some short works of literary theory from around the world to help us broaden our idea of what literature can be and do. All readings in English.

Class Format: seminar
Requirements/Evaluation: regular attendance and participation, ungraded creative project, several short response assignments, two 4- to 5-page papers, and one paper rewrite
Extra Info: may not be taken on a pass/fail basis
Prerequisites: none
Enrollment Preferences: students considering a major in Comparative Literature
Enrollment Limit: 19
Expected Class Size: 19
Distributional Requirements: Division I
Writing Intensive

Fall 2016
SEM Section: 01 TF 01:10 PM 02:25 PM Instructor: Christopher Bolton

COMP 111(S) The Nature of Narrative (W)
Crosslistings: COMP 111/ENGL 120

This course focuses on the nature and function of narrative using a wide range of texts from different periods, traditions, and genres. We will analyze the ways in which several first-rate works of fiction communicate their concerns; in other words: how do they say what they say? And why does "how" matter as much as, if not more than, "what"? We will also look at film, blogs, and articles, and accompany the readings with a few pertinent theoretical texts. The authors we will study may include Marie de France, Cervantes, Austen, Gogol, Flaubert, Kafka, Zweig, García Márquez, Farhadi. All readings in English, although those with foreign language competency are invited to make comparisons with the original where possible.

Class Format: linear
Requirements/Evaluation: meaningful class participation, two short papers, and a final paper of 10 pages, which will consist of a draft and a final version
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none
Enrollment Preferences: students considering a major in Comparative Literature
Enrollment Limit: 19
Expected Class Size: 19
Distributional Requirements: Division I
Writing Intensive
Other Attributes:
COMP 117(F, S) Introduction to Cultural Theory (W)
Crosslistings: ENGL 117/COMP 117

This course has a clear purpose. If you had signed up for a course in biology, you would know that you were about to embark on the systematic study of living organisms. If you were registered for a course on the American Civil War, you would know that there had been an armed conflict between the northern and southern states in the 1860s. But if you decide you want to study "culture," what exactly is it that you are studying? The aim of this course is not to come up with handy and reassuring definitions for this word, but to show you why it is so hard to come up with such definitions. People fight about what the word "culture" means, and our main business will be to get an overview of that conceptual brawl. We will pay special attention to the conflict between those thinkers who see culture as a realm of freedom or equality or independence or critical thought and those thinkers who see culture as a special form of bondage, a prison without walls. The course will be organized around short theoretical readings by authors ranging from Matthew Arnold to Constance Penley, but we will also, in order to put our new ideas to the test, watch several films (Ferris Bueller’s Day Off, Silence of the Lambs, The Lord of the Rings) and listen to a lot of rock & roll. Why do you think culture matters? Once you stop to pose that question, there’s no turning back.

Class Format: discussion/seminar
Requirements/Evaluation: five short papers totaling about 20 pages, class attendance and participation
Extra Info: may not be taken on a pass/fail basis
Prerequisites: none
Enrollment Preferences: first-year students who have not taken or placed out of a 100-level ENGL course
Enrollment Limit: 19
Expected Class Size: 19
Distributional Requirements: Division 1
Writing Intensive

AMST Critical and Cultural Theory Electives

Fall 2016
SEM Section: 01 TF 01:10 PM 02:25 PM Instructor: Christian Thorne

COMP 128(S) Reading Asian American Literature (W)
Crosslistings: AMST 128/ENGL 128 COMP 128

Though the category and term "Asian American" came about as a result of political struggle in the 1960s, what we now call Asian American writing in English began in the nineteenth century and has played a significant role in every American literary "movement" from Modernism, realism, protest literature to various avant-gardes, the graphic novel, and digital poetries. This writing-intensive course closely reads a sampling of texts in a variety of genres and styles—produced by writers from various Asian American ethnic groups—from the late nineteenth century to the present and contextualizes them historically, both domestically and globally. We will examine the material, cultural, political, and psychic intersections of larger structural forces with individual writers and texts. Along the way, we will interrogate the notion of "Asian American"—its contradictions, heterogeneous nature, and our assumptions—and its relation to the idea of "American." Some questions we will ask: "Why have Asian Americans and Asian American writers and writing so often been viewed as foreign or alien to the American body politic and the English-language literary tradition?" "How might Asian American writing be linked to other English-language texts in the Asian diaspora?"

Class Format: seminar
Requirements/Evaluation: six 2-3 pp. papers, participation (attendance, discussion, GLOW posts), and a final project (the final project is 7-9 pages: either a creative project or an analytical paper)
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none
Enrollment Preferences: prospective AMST or ENGL majors
Enrollment Limit: 15
Expected Class Size: 15
Distribution Notes: meets Division 2 requirement if registration is under AMST; meets Division 1 requirement if registration is under COMP or ENGL
Distributional Requirements: Division 2
Writing Intensive

COMP 151(F) Introduction to Theatre
Crosslistings: THEA 101/COMP 151

This introductory course serves as a general gateway to the study of Theatre. The course investigates principal areas of Theatre practice, including the Play and Playwright, Actor, Director, Designer, Audience, and Company. Through lectures, class discussions, performance practice, and hands-on laboratory sessions, students will encounter dramatic texts and theatrical contexts from a variety of traditions around the globe. Dramatists covered may include: Sophocles, Shakespeare, Zeami, Molière, Chekhov, BeCKETT, and Parks. Students are expected to complete reading and writing assignments, as well as to participate in practical projects in the labs. This course is open to all and welcomes non-Theatre majors. For students interested in the Theatre major, this course fulfills a primary requirement and should be taken during one's first or second year.

Class Format: lecture
Requirements/Evaluation: three short papers; in-class writing; mid-term Company studio presentation; final Company performance and portfolio
Extra Info: may not be taken on a pass/fail basis
Prerequisites: none
Enrollment Preferences: none
Enrollment Limit: none
Expected Class Size: 30

COMP 153 Japanese Film
Crosslistings: COMP 153/JAPN 153

From the swashbuckling samurai films of Kurosawa and delicate family dramas of Ozu to edgy cinematic experiments and a breathtaking range of animation, Japan has one of the most varied and exciting film traditions in the world. This course will introduce you to major periods, genres, and directors in that tradition. We will read film criticism that represents a range of approaches, but focus particularly on learning and practicing the kind of close visual analysis that will allow you to build your own original descriptions of how a given scene "works." Throughout the course we will consider the relationship between classic cinema and popular genres like sword flicks, melodramas, psychological thrillers, and anime, focusing particularly on directors whose work seems to borrow equally from genre film and the artistic avant-garde. All texts are translation or subtitled. All levels welcome.

Class Format: lecture
Requirements/Evaluation: attendance, participation, some responses, two papers (5-7 pages), test
Prerequisites: none
Enrollment Preferences: students majoring in a related field

COMP 156 Thirteen Ways of Looking at Jazz (D) (W)
Crosslistings: AFR 156/COMP 156/AMST 156/ENGL 223

Taking its title from the Wallace Stevens poem, “Thirteen Ways of Looking at a Blackbird,” which interprets the blackbird in different ways, this course similarly explores the many complex, multi-layered perspectives on jazz, from jazz and American democracy to jazz in visual art. Accordingly, the course introduces students to several genres, including historical documents, cultural criticism, music, literature, film, photography and art. The course does not draw on a musicalological method but rather a socio-cultural analysis of the concept, music and its effect—so students are not required to have any prior musical knowledge or ability. In this writing intensive course, students will write and revise short close analyses of multiple types of media, ultimately honing their writing skills on one form of media for a polished, original analysis that weeds their increased critical thinking skills. This EDI course explores the musical expressions of the culturally diverse peoples of African descent in the New World, as well as the myriad ways in which representations of jazz signify on institutional power, reaffirm dominant U.S. and/or European hierarchies of race, gender and class, and signal inequality in order to contest it.

Class Format: lecture
Requirements/Evaluation: evaluation will be based upon class participation, 1 quiz, several 2-page response essays, one 3-page essay, one 5-page essay, one oral presentation/performance with 3-page critical report, totaling approximately 20 pages of written work
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none
Enrollment Preferences: none
Enrollment Limit: none
Expected Class Size: 19
Distribution Notes: meets Division 2 requirement if registration is under AFR and AMST; meets Division 1 requirement if registration is under COMP or ENGL

COMP 172 Myths in Music (W)
Crosslistings: MUS 172/COMP 172
Orpheus, Prometheus, Faust, and Don Juan—these figures have captured the imagination of writers, artists, and composers throughout history. This course explores how prominent myths of western civilization have found expression in a broad variety of musical works, e.g., operas by Claudio Monteverdi, Wolfgang Amadeus Mozart, Jacques Offenbach, and Richard Wagner; songs by Franz Schubert, Hugo Wolf, Ricky Ian Gordon, and Adam Guettel; ballets by Ludwig van Beethoven and Igor Stravinsky; symphonic poems by Franz Liszt, Richard Strauss, and Alexander Scriabin; Broadway musicals by Richard Adler and Randy Newman; and mixed-media projects by Rinde Eckert. Our inquiry will lead us to ponder an array of questions: Why have certain myths proven especially appealing to composers? What accounts for these myths' musical longevity? How have myths been adapted to different musical genres and styles, and for what purposes? How do the works reflect the historical cultures in which they originated? How have they engaged with different social, political, artistic, and intellectual concerns?

Requirements/Evaluation: evaluation will be based on class participation, three 6-8 page papers (with revisions), and a final presentation.
Prerequisites: students with a demonstrated interest in literature or music.
Enrollment Limit: 15
Expected Class Size: 10

COMP 200 European Modernism—and Its Discontents
What is/was Modernism? An artistic movement? A new dynamic and sensibility? A transformative response to changed conditions? All these and more? This course will attempt to deal with such issues via examination of certain key works spanning the years 1850-1930. Topics to be considered: the rise of industrial capitalism and the literary market, advances in science and technology, urban alienation and social conflict, anti-“bourgeois” stances, the displacement of religion, the fragmented self, the proliferation of multiple perspectives, the break with the past and privileging of the present, and the horrors of war. To be studied: poetry by Baudelaire, Yeats, and Neruda; prose fiction by Dostoevsky, Kafka, Proust, Joyce, and Woolf; drama by Beckett; Futurist and Surrealist manifestos; German Expressionist films; and theoretical writings by Marx, Freud, Nietzsche, Ortega y Gasset, and Benjamin. In addition, select portions of Bell-Villada’s Art for Art’s Sake and Literary Life and Peter Gay’s Modernism will serve as general background to the course. All readings in English.

Class Format: lecture/discussion
Requirements/Evaluation: class participation, brief weekly journals, one class presentation, three 6-page papers, a mid-term, and a final examination.
Prerequisites: none; first-year students must consult with the instructor before registering for this course.
Enrollment Preferences: students considering a major in Comparative Literature.
Enrollment Limit: 20
Expected Class Size: 20
Distributional Requirements: Division 1

COMP 201(F) The Hebrew Bible
Crosslistings: REL 201/COMP 201/JWST 201
The Hebrew Bible is perhaps the single most influential work in the history of Western philosophy, literature, and art. But the overwhelming presence of the text in nearly every aspect of modern culture often obscures the sheer brilliance of its narrative technique as well as the complex interplay between law, history, prophecy, and poetry. This course offers a comprehensive introduction to the literary, historical, and theological aspects of the Hebrew Bible with an eye towards developing a sophisticated understanding of the text and its ancient context. Through the close reading of substantial portions of the Hebrew Scripture in translation and the application of various modern critical approaches to culture and literature, students will explore fundamental questions about the social, ritual, and philosophical history of ancient Israel, as well as the fundamental power of storytelling that has resonated across two millennia.

Class Format: lecture/discussion
Requirements/Evaluation: evaluation will be based on class participation, short written assignments, and two to three longer papers.
Prerequisites: none.
Enrollment Preferences: Jewish Studies concentrators, Religion and Comparative Literature majors.
Enrollment Limit: 40
Expected Class Size: 40
Distribution Notes: meets Division 2 requirement if registration is under REL or JWST, meets Division 1 requirement if registration is under COMP.

COMP 206(S) The Book of Job and Joban Literature (W)

Crosslistings: REL 206/COMP 206/JWST 206

The Book of Job has often been described as the most philosophical book of the Hebrew Bible. The story of one man's struggle to understand the cause of his suffering and his relationship to God represents the finest flowering of the Near Eastern wisdom literature tradition. Through its exploration of fundamental issues concerning human suffering, fate and divinity, and the nature of philosophical self-examination, Job has served as a touchstone for the entire history of existential literature. At the same time, the sheer poetic force of the story has inspired some of the greatest artistic and literary meditations in the Western tradition. This course will engage in a close reading of the Book of Job in its full cultural, religious, and historical context with special attention to its literary, philosophical, and psychological dimensions. We will then proceed to investigate key modern works in several genres that involve Joban motifs, themes, and text both explicitly and implicitly. These texts will include Franz Kafka's The Trial, Archibald MacLeish's J.B., Robert Frost's "Masque of Reason," Carl Jung's Answer to Job, and William Blake's Illustrations to the Book of Job. All readings are in translation.

Class Format: discussion

Requirements/Evaluation: evaluation will be based on class participation, weekly short written assignments, and two longer papers

COMP 207T Tolstoy: The Major Novels (W)

Crosslistings: RUSS 210/COMP 207

This tutorial will focus on Lev Tolstoy's four novelistic masterpieces—War and Peace, Anna Karenina, Resurrection, and Hadji Murat—placing them in their appropriate historical, social, and philosophical context. For each week of class, students will read a significant portion of a novel by Tolstoy, along with a selection of secondary literature taken from those works that inspired the author, reactions that arose at the time of the novel's publication, and scholarship that seeks to explain the power and enduring significance of these novels. Students will meet with the professor in pairs, with one student writing a five-page paper for each class session and the other student providing a critique of the paper. For those students without Russian language skills, all works will be read in English translation. Those students who have completed at least three years of college-level Russian may take the course in Russian.

Class Format: tutorial

Requirements/Evaluation: evaluation will be based on completion of weekly reading and writing assignments and active discussion during tutorial sessions

Extra Info: may not be taken on a pass/fail basis

Prerequisites: for students taking the tutorial in ENGL: none; for students taking the tutorial in RUSS: either RUSS 252 or permission of instructor

Enrollment Preferences: Russian, Comparative Literature, and Literary Studies majors

COMP 208 Through the Looking Glass: Comparative Children's Literature

Oh, the roads we will read, if you follow my lead! We will amble at first and then soon pick up speed, And we'll bury our noses in books thick and thin. This I vow by the hair on my chinny-chin-chin. There'll be picture books, fairy tales, primers, and verse, Tales of joy, fun, and laughter; and, alas, the reverse. Some were written in English, but most of them not. Though we'll read in translation: Sign on up, polyglot! For example, there's Pootvliet, Collodi, and Gimm, Machado, and Sendak. Surely, you've heard of him? We'll critique illustrations, we'll wonder, we'll ponder. And by turns we'll divine what defines this grand genre. Is it mere fun and games, pixie dust, sweet as pie? Does it ask to be read with a serious eye? Books appeal to our puzzler, our minds, after all, And a child is a thinker, no matter how small. You'll reflect, cogitate, then you'll write, write, WRITE! And your thoughts will become this instructor's delight.

Class Format: seminar

Requirements/Evaluation: regular reading and/or viewing, class discussion, frequent writing assignments, and one final project

COMP 209 Dolls, Puppets and Automatons (W)

Since their origin, humans have always made anthropomorphic representations, first in the form of idols, fetishes, or statues for religious worship; later in the shape of puppets, dolls, or automatons for their entertainment qualities. And yet, these objects have always played multiple roles in human society; modernity in particular shows a great interest paired with great ambivalence towards dolls, puppets, and automatons, regarded both as uncanny (Döblinger or threatening machines. In order to comprehend the scope of our modern fascination with these figures, we will explore their haunting presence in literary texts by ETA Hoffmann, Achim von Arnim, Theodor Storm, Feliberto Hernandez, discuss theoretical texts by Sigmund Freud and Heinrich von Kleist, look at paintings by Oskar Kokoshka and at photographs by Hans Bellmer, watch a ballet by Kurt Joos and films by Fritz Lang and Ridley Scott, and watch fashion shows by Alexander McQueen, Jean-Paul Gaultier, and Viktor & Rolf. Conducted in English.

Class Format: seminar

Requirements/Evaluation: active class participation, one oral presentation, three 5- to 8-page papers

COMP 210(F) Latina/o Language Politics: Hybrid Voices (D)

Crosslistings: LAT 240/AMST 240/COMP 210

In this course we will focus on issues of language and identity in the contemporary cultural production and lived experience of various Latina/o communities. As such, how are cultural values and material conditions expressed through Latina/o language and literature? How does Latina/o identity challenge traditional notions of the relationship between language, culture, and nation? In what ways might Latina/o literary and linguistic practices serve as tools for social change? Departing from an overview of common linguistic phenomena such as code-switching (popularly known as "Spanglish") and Latina/o English, we will examine bilingual education, recent linguistic legislation, and the English Only movement. Throughout the course we will survey texts culled from a variety of literary genres as well, including theatre, autobiography, novels, and poetry. Both directly and/or indirectly, these texts address Latina/o language politics, as well as the broader themes of power, community, ethno-racial identity, gender, sexuality, class, and hybridity.

Class Format: seminar

Requirements/Evaluation: participation, two essays, final take-home examination

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: none

Enrollment Preferences: Latina/o Studies concentrators, American Studies majors, Comparative Literature majors by seniority

Enrollment Limit: 12

Division 2

Exploring Diversity

Other Attributes:
COMP 211 Introduction to Latina/o Literatures (D)

Crosslistings: LATS 208/AMST 207/COMP 211/ENGL 251

This discussion course serves as an introduction; the reading list is not meant to be exhaustive or comprehensive, but will rather provide a sampling or range of texts for students to engage. We will explore a number of readings across different genres (the novel, play, poem, short story, graphic novel). Students will endeavor to understand how each author defines Latinidad. What characterizes Latina/os for each of these writers and how do their works articulate the historical conditions out of which they emerge? How is Latina/o literature marked by notions of language, nationality, gender, sexuality, class, race, politics, form, and genre? The readings will provide both a survey of general ideas in the study of Latina/o literatures as well as specific case studies and historical conditions in which they emerged.

This discussion course fulfills the Exploring Diversity Initiative requirements as it offers students a comparative study of cultures and societies by examining the U.S. racial project of constructing a Latina/o people out of various peoples. Additional attention is given, under the rubric of power and privilege, to the specific economic and political institutions that structure Latina/o cultural production.

Class Format: lecture

Requirements/Evaluation: students will be evaluated based on their weekly online discussion forum posts, two short papers, a midterm exam, a final comprehensive project, as well as classroom participation.

Prerequisites: none

Enrollment Preferences: Latina/o Studies concentrators, American Studies and Comparative Literature majors

Enrollment Limit: 25

Expected Class Size: 20

Distribution Notes: meets Division 1 requirement if registration is under COMP or ENGL; meets Division 2 requirement if registration is under AMST or LATS

COMP 215 Experimental Asian American Writing

Crosslistings: COMP 215/ENGL 217/COMP 215

This course offers overviews and discussions of the origin and purpose of the writings, their influence throughout history, and the development of methods of readings of the texts. We start with the origin of the writings before they became collected into the New Testament, and ask: why is the New Testament written? how were they used for the purpose of shaping faith in Jesus Christ and creating communities? Why just these scriptures were included, and not others, for instance, the Gospel of Thomas, is another much discussed question. The impact of the New Testament writings upon society is a problematic history; for instance, they have been used to support negative attitudes to Jews, women and homosexuals. This raises the issue of how to read the New Testament. There are many different ways of reading the New Testament; perhaps the most common way to read it is as Scripture, important for one's religious faith. In this course, however, we will focus on scholarly and academic readings of the New Testament. But they, too, have gone through many changes, influenced by contemporary methods, e.g. historical-critical ones in the 19th and into 20th century, more recently, by literary, feminist and post-colonial readings. Through extensive readings of New Testament writings in their cultural and historical context, documentations of their use in history, and recent theories of interpretation, the aim is to gain an independent position on the New Testament as a historical and religious document.

Class Format: lecture/discussion

Requirements/Evaluation: one class presentation; three 3-page papers, one 5- to 7-page paper, and a final paper (15 pages)

Prerequisites: none; open to all

Enrollment Preferences: sophomores

Enrollment Limit: 19

Expected Class Size: 10

Distribution Notes: meets Division 2 requirement if registration is under REL; meets Division 1 requirement if registration is under CLAS or COMP

COMP 216 Moses: Stranger in a Strange Land

Crosslistings: REL 202/JWST 202/COMP 214

As a priest, prophet, and lawgiver all in one, Moses occupies the central place in the history of Israelite and Jewish leaders. However, he is a somewhat unlikely candidate for such an important role. He is God's chosen leader among the enslaved Israelites, but he is raised as an Egyptian prince. He is a spokesman for his people, but he is slow of speech. He is the lawgiver and first judge of his nation, yet he is quick-tempered and impatient. The story of the most revered figure in the Jewish tradition, who nevertheless remains an outsider to the very end, has fascinated commentators and inspired countless artistic and literary interpretations. This course will engage in a close study of the figure of Moses by examining the biblical narrative of his life and career from Exodus through Deuteronomy with an eye towards understanding the complex and often contradictory portrait of this self-described "stranger" in a strange land.  We will also examine some of the ancient legendary and folkloric accounts about Moses, as well as philosophical and allegorical treatments in Hellenistic Jewish, early Christian, and Muslim biographies. We will then proceed to investigate key modern reconfigurations of Moses in several genres, which may include renaissance visual depictions, literary works by Sigmund Freud, George Eliot, Thomas Mann, and Zora Neale Hurston, and even musical and cinematic renditions. All readings are in translation.

Class Format: seminar

Requirements/Evaluation: active participation, two short papers, an oral presentation, and a final paper

Prerequisites: none

Enrollment Preferences: students who have already taken a course in biblical literature

Enrollment Limit: 19

Expected Class Size: 19

Distribution Notes: meets Division 2 requirement if registration is under REL or JWST; meets Division 1 requirement if registration is under COMP

COMP 217 The New Testament: Purpose, History and Method (W)

Crosslistings: REL 210/CLAS 210/COMP 213

The New Testament is the most important collection of documents in the Christian religion. This course offers overviews and discussions of the origin and purpose of the writings, their influence throughout history, and the development of methods of readings of the texts. We start with the origin of the writings before they became collected into the New Testament, and ask: what forms of writing (genres) in Greco-Roman culture were available to the authors of the new scriptures, and how they were used for the purpose of shaping faith in Jesus Christ and creating communities? Why just these scriptures were included, and not others, for instance, the Gospel of Thomas, is another much discussed question. The impact of the New Testament writings upon society is a problematic history; for instance, they have been used to support negative attitudes to Jews, women and homosexuals. This raises the issue of how to read the New Testament. There are many different ways of reading the New Testament; perhaps the most common way to read it is as Scripture, important for one's religious faith. In this course, however, we will focus on scholarly and academic readings of the New Testament. But they, too, have gone through many changes, influenced by contemporary methods, e.g. historical-critical ones in the 19th and into 20th century, more recently, by literary, feminist and post-colonial readings. COMP 218 Gnosis, Gnostics, Gnosticism (W)
Crosslistings: REL 218/COMP 218/CLAS 218
What is gnosticism? Who were the Gnostics? Salvation by knowledge, arch-heresy, an eternal source of mystical insights and experiences, secret esoteric teachings available only to a few. All these and more have been claims made about gnosticism, Gnostics, and Gnosticism. This course will introduce you to the key ancient texts and ideas associated with Gnostics as well as to the debates over and claims made about Gnosticism in modern times. We shall explore neoplatonic, Jewish, and Christian thought, as well as modern spiritualism and esotericism. We shall also ask about how ancient Gnostics relate to other religious groups such as the Knights Templar and modern Theosophists. Readings include: Nag Hammadi writings in English, Irenaeus, Against All Heresies; David Brakke, The Gnostics; Elaine Pagels, The Gnostic Gospels; Karen Ren, What is Gnosticism? and The Secret Revelation of John.

Class Format: lecture/discussion
Requirements/Evaluation: periodic reflection papers, 2 textual analysis papers, 2 historiographical analysis papers, and a final paper that entails a revision and expansion of an earlier paper

COMP 221(F) Hollywood Film
Crosslistings: ENGL 204/COMP 221

Not Offered Academic Year 2017
LEC Instructor: Edan Dekel
For almost a century, Hollywood films have been the world's most influential art form, shaping how we dress and talk, how we think about sex, race, and power, and what it means to be American. We'll examine both the characteristic pleasures provided by Hollywood's dominant genres—including action films, horror films, science fiction and fantasy, thrillers and romantic comedies—and the complex, sometimes unsavory fantasies they mobilize. We will do this by looking carefully at a dozen or so iconic films, probably including films: The Godfather, Schindler's List, The Lord of the Rings: The Return of the King; Bridesmaids; and 12 Years a Slave. In addition to the assigned reading, students will be required to attend free screenings of course films on Sunday evenings at Images Cinema.

**Class Format:** lecture

**Requirements/Evaluation:** mandatory attendance at free Sunday 8pm film screenings at Images, several short writing exercises, two editing exercises, two midterms, and a final exam

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**COMP 222 Detective Fiction (W)**

Despite the genre's comparative youth, detective fiction has proven unusually adaptable and stunningly prolific. In the less than 200 years since its birth, detective fiction has traveled to virtually every region of the globe and into countless languages, found a home in both high art and popular culture, penetrated media including print, cinema, the internet, and the iPhone app, and spawned subgenres as sundry and specific as the police procedural, cooking detective fiction, medieval monk detective fiction, and lesbian detective fiction. This class seeks to understand the genre's explosion in the wake of Edgar Allan Poe's seminal stories by surveying the diverse material that falls within its capacious generic boundaries, as well as work by those who theorize detective fiction. In addition to reading classics by Poe, Arthur Conan Doyle, and Agatha Christie, we will read detective fiction from outside the Anglo-American world, discover what separates men from women writers, and explore why so many Chinese, French, and Japanese detectives are female. We will address the question of what it means to be a detective; see what happens when the detective gets self-consciously conceptual in works by writers such as Jorge Luis Borges and Paul Auster. All readings will be in English.

**Class Format:** seminar

**Requirements/Evaluation:** regular attendance, active participation in class discussions, three short papers of varying lengths, and a final paper of 10-12 pages

**Extra Info:** may not be taken on a pass/fail basis

**Prerequisites:** none

**Enrollment Preferences:** Comparative Literature majors and those planning to major in Comparative Literature

**Enrollment Limit:** 19

**Expected Class Size:** 15

**Distributional Requirements:**

**COMP 224(S) The Cookbook Through History**

More than a compilation of recipes and instructions, a cookbook is a means of cultural transmission. This course will read between the recipe lines, exploring cookbooks as important documents that reveal a surprising amount about history and society. As Ando and Appadurai have noted, cookbooks "tell unusual cultural tales, combining the sturdy pragmatic virtues of all manuals with the vicarious pleasures of the literature of the senses."

We will begin by examining the cookbooks of antiquity for what they can tell us about social status, global trade, and the distribution of foodstuffs and wealth. Moving into the medieval period we will look at cookbooks-cum-medical texts and consider the importance of diet and nutritional advice. Many early modern cookbooks were also agricultural and household primers, so we will touch on garden and table design and also discuss how the recipes reflect the great shifts of the Columbian exchange.

The "receipt" books kept by many women were often their sole means of expression; these manuscripts will lead to discussions of gender and class. As we progress to the 19th century, we'll look at cookbooks intended to assist immigrant groups, as well as the cookbooks those groups published to keep their culinary traditions intact. We will see how nutrition becomes ever more prescriptive, as in "domestic science" and "home economics" as ways of validating women's kitchen labors. The 20th century brings a proliferation of culinary instruction in new forms, including artists' books, TV shows and videos.

Because cookbooks engage with issues still pertinent today—gender, race, immigration, global trade, national identity, health, and religious and cultural tensions—we will approach the books through many different disciplines, from culinary history to sociology and anthropology, to the visual arts, gender studies, and nutrition. Students will actively use the rich collection of rare cookbooks in Chapin Library.

**Class Format:** seminar

**Requirements/Evaluation:** active class participation, 4 response papers, one 8- to 10-page research paper, 1 oral presentation and 2 class projects

**Extra Info:** may not be taken on a pass/fail basis

**Prerequisites:** none

**Enrollment Preferences:** students who have studied another language

**Enrollment Limit:** 12

**Expected Class Size:** 12

**Distributional Requirements:**

- Division 1

**COMP 225 Traditional Chinese Poetry (D) (W)**

Poetry was the dominant form of literature in China for most of the pre-modern period. It could be used to justify the overthrow of dynasties or to court a beloved; Chinese poets sang about commuting with the gods and about brewing ale, sometimes in the same poem. In this course we will read and discuss these wide-ranging materials. None of the issues we will explore include the ways in which poems present the world and make arguments about it; how Chinese poets construct different notions of the self through their poems; and how poetry can give voice to conflicts between aesthetics and morality, between the self and the community, and between the state and other sources of social capital. We will also look at Chinese theories of literature and poetry and compare them with dominant Western models. This is an ENGL course and we will be concerned throughout with differences in the way Chinese and other cultures thought about and utilized poetry. We will examine the implicit biases inherent in the ways Western scholars in particular have analyzed and translated Chinese poetry. All readings in English translation.

**Class Format:** lecture/discussion

**Requirements/Evaluation:** numerous short response papers, two longer papers (1700-2300 words), and a final exam; participation in class discussions required

**Prerequisites:** none; no previous experience with poetry or Chinese required

**Enrollment Preferences:** Chinese majors; open to all

**Enrollment Limit:** 19

**Expected Class Size:** 19

**Distributional Requirements:**

- Division 1
- Exploring Diversity
- Writing Intensive

**COMP 226T The Ancient Novel (W)**

In this course we read and closely analyze long works of fiction composed in the ancient Mediterranean between the first century BCE and the fourth century CE. To call these ancient works "novels" might be misleading, if our definition depended on the historical conditions that fostered the emergence of the modern novel (e.g., industrialization and widespread literacy). On another definition, however, the novel is that genre which, more than any other, devours and incorporates other genres. Judged by this standard, the works we will deal with in this course are quintessentially novels. They afford new perspectives on the diverse, cosmopolitan culture of the Hellenistic and late antique Mediterranean world in which they were originally written and read. Replete with spectacular tales of true love, death, danger, miracles, stunts, conversions, triumphant recognitions and happily-ever-after reconciliations, they access other classical genres such as history, tragedy, and epic by means of parody, allusion, and homage.

**Class Format:** tutorial

**Requirements/Evaluation:** alternating papers and critiques

**Extra Info:** may not be taken on a pass/fail basis

**Prerequisites:** none; not open to students who took this course as CLAS 105/COMP 113

**Enrollment Preferences:** sophomores and first-years intending to major in Classics, Comparative Literature, English, or another Literature

**Enrollment Limit:** 10

**Expected Class Size:** 10

**Distributional Requirements:**

- Division 1
- Writing Intensive

**COMP 227(S) Made in China or Making "China"?: Twentieth-Century Chinese Performative Culture**

This course explores the ways in which twentieth-century Chinese artistic, cultural, and national narratives were created and configured. theater, opera, dance, music, film, literature, and graphic arts were all woven together in a multimedia matrix of images, sounds, and words. This course investigates the ways in which film, spoken drama, intercultural reproductions of Peking and Kun Opera, revolutionary
and avant-garde theatre, Chinese Rock concerts, and global mass mediated performances. Emphasis will be placed on how performances (encompassing the performance onstage and the performance-making backstage) placed "China" on the global stage; and shaped racial, gender, and national identities among play-makers and audiences. We will also explore how Chinese operas were reinvented as "traditional culture" and a "national essence" in the early 20th century; and how agents of Chinese performance, as makers of imaginary worlds, serve as both assets and threats to real-life arbiters of power. The class will be structured around the themes of "Inventing Tradition on the World Stage," "Acting the Right Part," and "Performing the Nation." Students will learn to engage performances as cultural texts embedded in national and global histories. By gaining knowledge about major playwrights, directors, artists, networks, and ideas, students will also become fluent in the landscape of performance culture in China. All class materials and discussions are in English.

Class Format: lecture/discussion
Requirements/Evaluation: regular in-class participation, three short papers (3-5 pages), and one final project
Prerequisites: none
Enrollment Limit: 19
Expected Class Size: 15
Distributional Requirements: Division 1

COMP 228 Modern Arabic Literature in Translation (D) (W)

In this course we will read important texts and authors of the modern Arab world. The range of genres and themes of this literature is vast. In particular, we will analyze the debates around modernity and the importance given to social engagement in these texts. Our readings may include works by authors that have received significant attention outside of the Arab world such as Naguib Mahfouz, winner of the Nobel Prize for literature in 1988. We will also read the Iraqi poets Nazik al-Malaika and Badr Shakir al-Sayyab, the Palestinians Ghassan Kanafani and Mahmoud Darwish, and Tayyib Salih from the Sudan. Included in our readings are the famous autobiography by the Moroccan Muhammad Shukri as well as women's literature by Hanan al-Sheikh, Huda Barakat and Nawal Sadawi. All readings are in English. This literature course fulfills the requirements of the Exploring Diversity Initiative (EDI), as it engages the Arab world from a humanistic perspective that aims to promote cultural awareness. A fundamental goal of the course is to engage the diversity of approaches to sexuality, religion, gender and politics that are so prominent in contemporary literature from the Arab world.

Class Format: lecture/discussion
Requirements/Evaluation: active and consistent class participation, two short paper (3-5 pages) and a final paper (5-7 pages)
Prerequisites: none
Enrollment Limit: 19
Expected Class Size: 19
Distributional Requirements: Division 1
Other Attributes: ARAB Arabic Studies Electives

ENGL 228/COMP 230

At the same time as the individual human being in possession of a distinctive personality was taking on enormous importance in politics, philosophy, literature, and the visual arts, early modern Europeans were encountering unprecedented levels of cultural diversity. In this interdisciplinary course, we will consider the various developments both separately and together. As Renaissance humanists were acquiring a sophisticated understanding of the distance between the present and various European pasts (the recent medieval past and the remote history of antiquity), they were also coming into contact with non-European cultures in Africa, the Americas, and Asia via trade and economic development, imperial expansion, and religious conversion. Always at stake in these encounters was the question of who counted as an individual; that is, notions of self-fashioning, self-fashioning, and style. We will consider such English writers as the Pearl poet, More, Marlowe, Spenser, Shakespeare, Browne, and Milton; such continental intellectuals as Descartes, Erasmus, Las Casas, and Castiglione; and such continental artists as Michelangelo, Velázquez, Bruegel, and Rembrandt. The course will contribute to the College’s Exploring Diversity Initiative by examining the role of historical and cultural difference within and beyond Europe at the very beginning of globalization.

Class Format: seminar
Requirements/Evaluation: five 4-page papers, in-class presentation, thoughtful participation in discussions
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam
Enrollment Preferences: first- and second-year students and English majors who have yet to take a Gateway course
Enrollment Limit: 19

COMP 231T Postmodernism (W)

In one definition, postmodernism in art and literature is what you get when you combine modernism’s radical experimentation with pop culture’s easy appeal. This term has been used to describe works from Andy Warhol’s paintings of Campbell’s soup cans and Jean Baudrillard’s critical essays on Disneyland to Murakami Haruki’s euphoric conspiracy novels. Theorists of the postmodern have claimed that these works present not only a radical change in aesthetic sensibilities, but a fundamentally new relationship between art, language, and society. In this tutorial, we will read some of the most important theoretical essays defining the postmodern (essays which themselves often embrace this playful and sometimes ironic style), and we will pair them with artistic texts that are said to illustrate the features of postmodernism. The latter will be mainly novels and short stories from around the world, but one feature of this theory is a flattening of the distinction between high and low culture as well as between what is written and the visual, so we will also examine examples from architecture, visual art, and/or broader pop culture. Texts will include essays by Jean Baudrillard, Fredric Jameson, Jean-François Lyotard, and others; novels and short stories by writers like Don DeLillo, Italo Calvino, and Murakami Haruki; painting and sculpture associated with Pop Art and Superflat; the architecture of Williamstown-area museums; etc. Writing assignments will focus on reading the theoretical texts closely and applying their insights to the arts texts in creative and interesting ways. Open to sophomores as well as advanced students.

Class Format: tutorial; after an introductory lecture meeting, students will meet with the instructor in pairs for approximately an hour each week
Requirements/Evaluation: 5 papers (4-5 pages each) and 5 responses (1 page each) in alternate weeks

COMP 230(S) The Renaissance in England and the European Continent: Self and World (D) (W)

Crosslistings: ENGL 228/COMP 230

At the same time as the individual human being in possession of a distinctive personality was taking on enormous importance in politics, philosophy, literature, and the visual arts, early modern Europeans were encountering unprecedented levels of cultural diversity. In this interdisciplinary course, we will consider these two developments both separately and together. As Renaissance humanists were acquiring a sophisticated understanding of the distance between the present and various European pasts (the recent medieval past and the remote history of antiquity), they were also coming into contact with non-European cultures in Africa, the Americas, and Asia via trade and economic development, imperial expansion, and religious conversion. Always at stake in these encounters was the question of who counted as an individual; that is, notions of self-fashioning, self-fashioning, and style. We will consider such English writers as the Pearl poet, More, Marlowe, Spenser, Shakespeare, Browne, and Milton; such continental intellectuals as Descartes, Erasmus, Las Casas, and Castiglione; and such continental artists as Michelangelo, Velázquez, Bruegel, and Rembrandt. COMP 229(S) Japanese Culture and History from Courtiers to Samurai and Beyond (D)

Crosslistings: HIST 219/COMP 229/ASST 219/JAPN 219

This course will introduce students to the history, literature, and artistic culture of premodern Japan, from the time of the first recorded histories in the 800s through the abolition of the samurai class in the late 1800s. We will focus on the politics and aesthetic culture of the ruling elites in each period, from the heyday of the imperial court through the rise and eventual decline of the samurai warrior and the growth of Edo (Tokyo), with its new mode of early modern government and new forms of literature, theater, and art. Team taught by faculty from History and Comparative Literature, the course will examine historical texts alongside works drawn from literature, visual culture, and performing arts, and will ask students to consider how these different kinds of texts can shed light on one another. What is the difference between reading history and reading literature, or is it even meaningful to distinguish the two? By critically engaging in various kinds of textual analysis, this ED course not only considers the relationship between politics, culture, and society in premodern Japan but also explores how we can attempt to know and understand different times and places. Primary texts will include court diaries, war tales, and fiction; laws and edicts; essays and autobiographies; noh, kabuki, and puppet theater; and tea ceremony, visual art, and architecture. Students should register under the prefix specific to the Division in which they want to receive credit.

Class Format: lecture/discussion
Requirements/Evaluation: evaluation will be based on class participation, response assignments, two short papers (approximately five pages each), and a final exam
Extra Info: may not be taken on a pass/fail basis

Enrollment Preferences: students majoring or considering a major in a related field
Enrollment Limit: 40

COMP 232T Reading and Writing the Body (W)
Am I a body, or do I have one? The western tradition of favoring our intellectual and spiritual experience over the physical has long informed, and indeed limited, our sense of self as human beings. While some writers maintain that the creative impulse is a gift of the muse and that it is rooted entirely in the mind or spirit, there are those for whom the human body, frequently their own, plays a central role, both in the process of creation and as a subject of artistic inquiry and contemplation. In their writing, these authors tell a very different tale with regard to the human experience, and it is focused on the primacy of the body. This course will consider the work of, among others, Maupassant, Kafka, Tanizaki, Tolstoy, Dinesen, Colloidi, Babel, and Atwood in order to examine how writers from different cultural and aesthetic perspectives either present or use the body as a vehicle of expression. We will also consider other areas of study that are intimately related to the life of the body, such as asceticism, pathology, prostitution, and disability.

Class Format: tutorial; weekly sessions with the instructor and a fellow student
Requirements/Evaluation: on alternate weeks students will either write and present a 5-page paper on the assigned readings or write and present a 2-page critique of a pre-circulated paper Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none
Enrollment Preferences: first-year and sophomore students considering a major in Comparative Literature
Enrollment Limit: 10
Expected Class Size: 10
Distributional Requirements: Division 1
Writing Intensive
Other Attributes: PHIL Bioethics + Interpretations of Health

COMP 233 Introduction to Classical Arabic Literature (W)
In this course we will explore the rich, complex and diverse texts of Classical Arabic Literature. The readings include works that have achieved notoriety outside of the Arab world (such as the Qur'an and One Thousand and One Nights) as well as works by authors largely unknown outside of the Arab world but canonical in Arabic-language culture such as Imru al-Qays, al-Jahiz, al-Ma'arri, Abu Nuwas, al-Hallaj, al-Ghazali and al-Mutammini. Women's literature in this course includes works by al-Khansa', known for her elegies, and by Wallada bint al-Mustakfi of Cordoba, who contributed to the courtly love poetry of both Europe and the Arab world. Topics for discussion include theological and philosophical queries, erotica, wine, bibliomania and avarice. Our primary texts represent such varied regions as the Arabian Peninsula, Egypt, Abbasid Baghdad, North Africa and Islamic Spain. Chronologically, the texts range from the sixth century CE to the fourteenth century. All readings are in English.

Class Format: lecture/discussion
Requirements/Evaluation: oral/seatant and pro-active class participation, two 3- to 5-page papers, a final 8- to 10-page paper, one short presentation and weekly 1- to 2-page reaction papers
Prerequisites: none
Enrollment Preferences: Comparative Literature majors and students with a background in Middle Eastern Studies
Enrollment Limit: 19
Expected Class Size: 19
Distributional Requirements: Division 1
Writing Intensive
Other Attributes: ARAB Arabic Studies Electives

COMP 234(F) Sexuality and Imperialism (D)
This course takes as its central premise that the definition and experience of modern sexuality are intimately bound to nineteenth-century imperialism and its legacies. How did imperial power relations help to constitute racial and sexual categories and classifications? To what extent did sexual norms in both the colonies and European metropole contribute to the "management of empire"? In what ways can this historical and intellectual framework help us understand contemporary phenomena such as homonationalism and pinkwashing? We will explore these questions through the study of novels, films, and a variety of other cultural and historical texts, ranging from Freud's Totem and Taboo and Foucault's History of Sexuality to Andre Gide's accounts of sexual tourism in colonial Algeria and Fanon's analysis of the decolonizing psychological effects of colonialism. As part of the Exploring Diversity Initiative, this class will foster an awareness of how the economic and political structures of imperialism affected sexual diversity (and vice versa), and how colonial social hierarchies created differing and unequal sexual expectations, restrictions, and freedoms in individual lives.

Class Format: seminar
Requirements/Evaluation: two or three 3-page papers, a 6- to 8-page final essay, a presentation on the final essay topic, and engaged participation

COMP 235T(F) She Speaks in Color: Examining the 'Color Complex' in Toni Morrison's Writings (W)

Crosslistings: AFR 295/COMP 235

This tutorial will explore the rich and multifaceted relationship between the Qur'an and literature from several different perspectives. The first part of the course will examine Qur'anic stylistics through primary readings in translation and scholarship on the question of whether the Qur'an is literature. Readings will consider how the Qur'an sheds light on the category of literature through attention to such features as sound, figurative language, and genre. Students will also discover what the Qur'an has to say about poets and stories. We will then turn to the classical discourse on Qur'anic inimitability ("i'jaz al-Qur'ani"); with an emphasis on stylistic/rhetorical inimitability and its relationship to Arabic literary theory. We will make use of recent translations of i'jaz treatises, manuals of literary criticism, and historical readings on the status of the Qur'an in early Islamic history. Finally, we will read a selection of later literature that takes up Qur'anic themes and language in Islamic history, in order to explore questions of intertextuality, rewriting, and the guises that commentary can take.

Class Format: tutorial
Requirements/Evaluation: 2 papers (5-7 pp., 8-10 pp.), short response papers, class participation
Enrollment Preferences: Comparative Literature majors, Arabic Studies majors
Enrollment Limit: 40

COMP 236T She Speaks in Color: Examining the 'Color Complex' in Toni Morrison's Writings (W)

Crosslistings: AFR 295/COMP 236/WGSS 207

The practice of colorism, or skin color discrimination, is very familiar to people of color globally. Often described as intra-racial racism, colorism within the Black American context is part of the colonial legacy of institutionalized slavery where the vestiges of white supremacy have created color castes among Blacks that still, to this day, have serious consequences for those on the darkest end of the color spectrum. The impact of this practice is far-reaching, influencing everything from romantic partnering, economic and educational attainment, and criminalization.

Although the vast majority of colorism scholarship is empirically based, there is much that we can glean from a literary investigation of this practice by analyzing the works of renowned writer, theorist, and folklorist Toni Morrison. Her work is particularly useful in examining issues of skin color, as this topic has been persistent yet underexplored in Morrison's writings. Employing the methods of literary and rhetorical criticism, this tutorial will investigate five Morrison novels, The Bluest Eye (1970), sula (1973), Song of Solomon (1977), Love (2003) and God Help the Child (2015). In our discussions of each text, we will examine the problem of the "color complex" at the intersections of race, gender, sexuality, class and sexual violence, and how the characters manage these overlapping issues. We will bring the novels into conversation with social science articles on the practices of colorism in daily life. Because the tutorial blends different kinds of investigations into colorism, it will equip first year students with tools to critically engage and interrogate fictional literature; how does skin color discrimination affects Black communities; and consider how Morrison, one of our foremost writers, bridges literary creativity with ethnographic observation.

Class Format: tutorial
Requirements/Evaluation: six 2-page papers, two 5- to 7-page papers, 10 minute vlog, annotated bibliography
COMP 237(S) Love, Desire, and Longing in Classical Arabic Poetry Crosslistings: COMP 237/ARAB 237
The genre of ghazal, or love poetry, has a long and fascinating history in classical Arabic literature. In its various guises, it has been a vehicle for expressing many forms of desire, including erotic passion, "platonic" yearning from a distance, and mystical love for the Divine. This course will explore the development of ghazal, beginning with pre-Islamic odes, continuing through the rise of the ghazal as an independent genre, and then taking up its adaptations across the classical and pre-modern Arabic-speaking world. We will pay close attention to aesthetics, tone, emotional effect, and features particular to certain sub-genres of ghazal. Background readings about historical, cultural, and literary contexts will shed further interpretive light on the poetry. Through these sources, which come from lands as diverse as Iberia, North Africa, the Levant, and the Arabian Peninsula, we will investigate how classical Arabic-language love poets expressed issues of gender, class, sexuality, existential despair, hope and loss, and living in relationship to God.

Class Format: seminar
Requirements/Evaluation: 2 papers (5-7 pp., 8-10 pp.), short response papers, class participation

COMP 238 Introduction to Ecocriticism: North-South Dialogues on Nature and Culture (D) Crosslistings: ENVI 239/COMP 238
This course will introduce students to the study of the relationship between literature and the environment, often referred to as 'ecocriticism,' through careful examination of Jean de Léry's 1577 History of a Voyage to the Land of Brazil and related texts. Léry's fascinating account of a yearlong stay among the 'cannibals' of Brazil gets at many of the themes and debates taken up by ecocritics today: How do political, economic, religious and philosophical factors influence individual and collective conceptions of 'nature' and its value? How do acts of reading and writing inform (or deform) our understanding of the 'natural' world? What is the role of aesthetics in environmental politics, and how can new eco-centric assumptions about race, gender, and cultural differences influence representations of global environmental issues like deforestation and global warming? Envi 239/Comp 238 fulfills the goals of the Exploring Diversity Initiative by contextualizing current questions of international environmental policy within the long history of colonialism, challenging students to think about cultural diversity as well as economic inequity as relevant to contemporary debates about the value and distribution of natural resources. In addition to Léry's History, we will also read landmarks of ecocritical scholarship by scholars including Lawrence Buell, William Cronon, Candace Slater and Jorge Marcone, as well as more recent literary interventions into environmental issues in the Americas.
Class Format: lecture/discussion
Requirements/Evaluation: three 5- to 7-page essays and several shorter writing assignments

ENVI 239 Introduction to Ecocriticism: North-South Dialogues on Nature and Culture (D) Crosslistings: ENVI 239/COMP 239
This course introduces students to some of the most significant and compelling trends in modern criticism—such as gender and postcolonial theory, deconstruction, sociological analysis, and psychoanalytic criticism—in an applied, hands-on way. The course will engage a range of primary texts from Shakespeare to Hitchcock by way of varied theoretical approaches. Can Othello be read as a feminist text? A site of class struggle? A staging of the relationship between language and the unconscious? The course aims both to make familiar some of the critical methods students are likely to encounter in the field of literary studies these days, and to show how such methods can transform our understanding of a text, opening surprising possibilities even in familiar works. In the process, the course will also raise broader questions about the imperatives and usefulness of literary theory in relation to texts and worlds.
Class Format: seminar
Requirements/Evaluation: frequent short papers totaling 20 pages

COMP 241T Sex and Gender in Ancient Greece and Rome (D) (W) Crosslistings: COMP 241T/CLASSICS 241
This course examines the diverse discourses and popular perceptions of sexuality and gender in the cultures of ancient Greece and Rome, while also dismantling false assumptions about the continuity of the "classical" past with our own contemporary norms and values. We will carefully analyze, contextualize, and compare a variety of texts, including selections from tragedy and comedy (Euripides, Terence), epic (Homer, Ovid) and lyric poetry (Sappho, Catullus), novels, epiphatns, and early saints' lives, in order to gain a
deeper and more complex understanding of how gender and sexuality were expressed, experienced, and regulated in Greece and Rome. Our emphasis will be on ancient texts, but selections from contemporary criticism and theory will enrich the methodological framework through which we approach those primary sources. The course fulfills the EDI requirement by providing sufficient context for students to make independent investigations of how literary and religious texts and practices engaged with political and social institutions to maintain different life courses and different systems of reckoning for the value of men’s lives, women’s lives, and the lives of individuals who didn’t fit easily into either category. Additionally, the course will promote students’ capacity to critically evaluate two past cultures that have long been important sources for institutional and cultural traditions in the West, and which are still invoked today, sometimes misleadingly, to explain or justify positions and practices of privilege or oppression.

Class Format: tutorial

Requirements/Evaluation: five to six weekly tutorial papers, five to six responses, a midterm self-evaluation and conference with instructor, a mid-length final paper (approximately eight pages) consisting of a revision and expansion of a previously written paper

Extra Info: may not be taken on a pass/fail basis

Prerequisites: none

Enrollment Preferences: majors or intended majors in Classics, WGSS, and Comparative Literature

Enrollment Limit: 10

Expected Class Size: 10

Distribution Notes: meets Division 1 requirement if registration is under CLAS or COMP; meets Division 2 requirement if registration is under WGSS

COMP 242(S) Americans Abroad (D) (W)

Crosslistings: COMP 242/ENGL 250/AMST 242

This course will explore some of the many incarnations of American experiences abroad between the end of the 19th century and the present day. Materialists will draw on male and female travel narratives, and fiction about Americans in Europe in times of war and peace. We will compare and contrast the experiences of novelists, soldiers, students, war correspondents, jazz musicians, and adventurers. What has drawn so many Americans to Europe? What is the difference between a tourist, an expat, and an emigre? What are the profound, and often comic, gaps between the traveler’s expectations and the reality of living in, say, Paris or a rural village in Spain? What are the misadventures and unexpected rewards of living, working, writing, or even falling in love in translation? Authors may include: Henry James, Langston Hughes, Martha Gellhorn, Ernest Hemingway, Elaine Dundy, Richard Wright, and Ben Lerner.

Additional reading will be drawn from historical and critical works. All readings will be in English.

This comparative course fulfills the EDI requirement because it is designed to highlight the challenges and benefits of cultural immersion abroad. It will focus on the linguistic, emotional, intellectual, and social adaptation skills that are required to understand others, and oneself, in new contexts.

Class Format: seminar

Requirements/Evaluation: each student will give an in-class presentation and complete 3 writing assignments totaling 20 pages; one of these writing assignments will be a personal travel narrative based on the student’s own experiences

Extra Info: may not be taken on a pass/fail basis; not available for the fifth semester

Prerequisites: any literature course at Williams or permission of instructor

Enrollment Preferences: students interested in, or returning from, study abroad; and/or students studying abroad at Williams

Enrollment Limit: 18

Expected Class Size: 18

COMP 243 Modern Women Writers and the City (W)

Crosslistings: COMP 243/WGSS 252

Ambivalence has always been a vital part of literary responses to city life. Whether they praise the city or blame it, women writers react to the urban environment in a significantly different way from men. While male writers have often emphasized alienation and strain, women writers have celebrated the mobility and public life of the city as liberating. We will look at issues of women’s work, class politics, sexual freedom or restriction, rituals of consumption, the conservation of memory by architecture, and community-building in cities like London, New York, Berlin, Paris. We will examine novels and short stories about the modern city by writers as diverse as Virginia Woolf, Gertrude Stein, Anzia Yezierska, Ann Petry, Jean Rhys, Margareture Duras, Margaret Drabble, Ntozake Shange, Verana Stefan and Jhumpa Lahiri and Edwidge Danticat. We will consider theoretical approaches to urban spaces by feminists (Beatriz Cololina, Elizabeth Wilson), architectural historians (Christine Boyer) and anthropologists and sociologists (Janet Abu-Lughod, David Sibley, Michael Sorkin). Several contemporary films will be discussed.

All readings in English.

Class Format: seminar/discussion

Requirements/Evaluation: two short papers of 3-5 pages, one of 5-7 pages, and one final paper of 8-10 pages

Prerequisites: COMP 111 or a 100-level ENGL course

Enrollment Limit: 19

Expected Class Size: 19

COMP 246(S) Bloody Vampires: From Fiction to Film and Fashion (W)

Crosslistings: COMP 246/ENGL 287

This course explores the figure of the vampire and seeks to explain the popular appeal such a fictive creature has been enjoying for over two centuries. What kind of fears and fantasies does it crystallize? And what kind...
of discourse about sexuality, death, and disease does it validate? What does its mere existence reveal about gender and ethnicity?

We will examine the emergence of the vampire in gothic literature of the late 18th and 19th centuries, its omnipresence in cinema in the 20th century and investigate its resurgence in 21st-century pop culture. In order to gain a deeper understanding of the figure of the vampire, we will read poems by Browning and Coppola, the Dance of Vampires by Polanski, The Hunger by Scott, Blade by Norrington, Twilight by Hardwicke, and Daybreakers, as well as episodes of the TV series Buffy the Vampire Slayer, True Blood, and The Vampire Diaries. We will also discuss music video clips by Lady Gaga and Marilyn Manson, and fashion shows by Alexander McQueen, John Galliano and Vivienne Westwood.

Class Format: seminar

COMP 247T(F) Gender, Sexuality and Modern Performance (D) (W)
Crosslistings: THEA 250/ENGL 253/WGSS 250/CMP 247

This interdisciplinary tutorial explores aspects of gender, sexuality, performativity, race, class, and representations of the body in modern theatre and performance in America. While attention will be given to the still understudied role of women in the arts, we will focus primarily on the transsexualities and social identities under interrelated systems of oppression. Close analysis of works by dramatists—such as Adrienne Kennedy, Caryl Churchill, Wendell Wasserstein, Ntozake Shange, Tony Kushner, Naomi Iizuka, Paula Vogel, Suzan-Lori Parks, David Henry Hwang, Tarell McCraney, Gina Gionfriddo, and Taylor Mac—will occur alongside consideration of works by artists such as Karen Finley, Ron Athey, Tim Miller, E. Patrick Johnson, and Young Jean Lee. Our approach to this varied material will be comparative and will be enriched by readings of critical works by writers such as: Judith Butler, bell hooks, Cherríe Moraga, Gloria Anzaldúa, Eve K. Sedgwick, Jill Dolan, José Esteban Muñoz, David Remédios, and Donna Haraway. This course meets the criteria of the Exploring Diversity Initiative as it draws focus towards the diversity of race, class and ethnicity represented by the subjects of our study as well as towards the political power of theatre and performance.

Class Format: tutorial
Requirements/Evaluation: students will meet with instructor in pairs for an hour each week; they will write a 5- to 7-page paper every other week (five in all), and comment on their partner's papers in alternate weeks
Extra Info: emphases will be placed on developing skills in reading, interpretation, critical argumentation, and critical written and oral response may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none

COMP 250 From Adam to Noah: Literary Imagination and the Primeval History in Genesis
Crosslistings: REL 207/CMP 250/JWST 207/CLAS 207

How long did Adam and Eve live in the Garden of Eden? What was the mark of Cain? Why did Enoch not die? Who was Noah’s wife? How did Giants survive the Flood? These are only a few of the fascinating questions that ancient readers and interpreters of the Book of Genesis asked and attempted to answer. The first ten chapters of Genesis present a tantalizingly brief narrative account of the earliest history of humankind. The text moves swiftly from the Creation to the Flood and its immediate aftermath, but this masterful economy of style leaves many details unexplained. This course will explore the rich and varied literary traditions associated with the primeval history in the Genesis. Through a close reading of ancient noncanonical sources such as the Book of Enoch, Jubilees, and the Life of Adam and Eve, as well as Jewish traditions represented in Josephus, Philo, and Rabbinc literature and other accounts presented in early Christian and Gnostic texts, we will investigate the ways in which the elliptical style of Genesis generated a massive body of ancient folklore, creative exegesis, and explicit literary re-imagining of the early history of humankind. We will then turn to several continuations of these variant traditions in medieval and early modern literature, with particular attention to the extensive material on the figures of Cain and Noah. All readings are in translation.

Class Format: discussion
Requirements/Evaluation: evaluation will be based on class participation and several writing assignments

COMP 251 Popular Culture in the Arab World: Youth, Populism, and Politics
Crosslistings: ARAB 251/COMP 251

Since the uprisings in the Arab world in 2011, much attention has been paid to the significant role of the “popular” in creating social and political transformations. The voice of the youth and “the street,” in particular, emerged as massive sources and sites for political mobilization. But, are these categories identical? Does youth culture equal popular culture? This survey course is designed to provide students with an introduction to the different layers that constitute popular culture in the Arab world since the decolonization of Arab states in the 1950s. Questions that we will ask include: What constitutes “popular culture” in the Arab world? How is it different than folk culture, mass culture, or “high” culture? Who are the key players in the creation and dissemination of “popular” culture? Besides globalization, for example, how do social, political and economic dynamics engulfs the definition of the “popular”? What are modes of self-fashioning and representation of Arab identity that characterize this culture? To answer these questions we will watch several documentaries about music, politics and youth in the Arab world. We will also read a selection of essays from anthropology, Arab culture studies, political science, and journalism to provide historical and critical context for the material discussed in class. Required graphic texts include Naji Al-Alí’s A Child in Palestine and Majdi Shafii’s Metro: A Story of Cairo.

Class Format: lecture
Requirements/Evaluation: active class participation, several short response assignments (2-3 pages each), and final paper (5-7 pages)

COMP 252 Arab Women Memoirs: Writing Feminist History

Crosslistings: ARAB 252/COMP 252/WGSS 253/HIST 309

This course reviews selected autobiographical writings by Arab women writers from the wave of independence in the 20th century to the contemporary Arab uprisings, passing through all the transformations that globalization and the technosphere have instigated. We will examine the role that first-generation narrators have played in shaping literature, history and thought, while providing a space to reclaim cultural, social and political agency. Focusing on the different articulations of self-representation, our discussion will address how these women reflect on the shifting discourses of identities, gender, nationalism, religion, feminism, sexuality, politics, borders and their histories. Questions we will address include: How did these memoirs contribute to the development of Arab feminist consciousness? In addition to the memoirs, we will look at women’s blogs and watch films that focus on first-person narrative to discuss related topics, such as, visual testimonies, virtual political participation and feminist resistance in the technosphere. Required texts may include: Fadwa Tahhan (A Mountainous Journey; An Autobiography), Fatima Mernissi (Dreams of Trespass: Tales of a Harem Girlhood), Leila Ahmed (A Border Passage: From Cairo to America—a Woman’s Journey), Fadia Faqir and Shirley Eber (In the House of Silence: Autobiographical Essays by Arab Women Writers), and Jumanah Haddad (A Border Passage: From Cairo to America—a Woman’s Journey), Nezamov (I Killed Scheherazade: Confessions of an Angry Arab Woman), as well as critical essays and selections from autobiographical writings that reflect the diversity of Arab women in the Middle East and the diaspora.

Class Format: seminar

COMP 253 Narratives of Placement and “Dis-placement” from the Global South [W]

Crosslistings: COMP 253/ARAB 253

This seminar deals with the theme of placement and “dis-placement” in literature from different sites in the Global South in the late 20th century. Situating the question of placement and uprootedness within multi-dimensional and cultural contexts in different sites in the Southern hemisphere, the location of much of the “developing world,” including the Middle East and North-Africa, Latin America, the Caribbean, the African Diaspora and the US-Mexico borderland, we will address the following questions: What distinguishes exile from Diaspora? What constitutes “dis-placement”? How do the experiences of uprootedness and forced migration among Palestinian refugees and Mexican migrant workers (within Mexico and the US; with or without documents) inform our notion of home and belonging? How do the legacy of French colonialism in North Africa and the rise of globalization in Latin America, for example, shed light on the ongoing massive immigration of subjects from the Global South to the North? Our emphasis will be on working together to find avenues for expressing yourselves in writing and other media, such as creating your own blog entries about these topics. In addition to a course reader with selected short story passages, and critical essays, readings will include: Benyamin’s Goat Days, Aimé Césaire’s Return to My Native Land, Ghassan Kanafani’s Men in the Sun, Mamud Darwish’s Journal of an Ordinary Grief, and Lalai Lalami’s Hope & Other Dangerous Pursuits.

Class Format: seminar

Requirements/Evaluation: active class participation, several short response assignments (1-2 pages), one midterm paper (5-6 pages), and final paper (7-10 pages)

COMP 254(F) “Disease” in Modern Chinese Literature and Culture (D)

Crosslistings: CHIN 254/COMP 254/WGSS 255

From early modern anxieties about China’s status as the “sick man of Asia” to contemporary concerns regarding the prospect of transnational pandemics, “diseases” and their related stories have played a critical role in making and contesting individual psychologies and Chinese modernity in the 20th and 21st centuries. Actual diseases, from tuberculosis to AIDS, constitute not only social realities that trouble political and popular minds in their own right, but further provide powerful metaphors for exploring issues of human rights, national identity, and transnational circulation. This course examines how Chinese literature in the 20th and 21st centuries writes and visualizes “disease”—a universal human experience that is nevertheless heavily bounded by culture and history. Specifically, we examine the cultural and social meaning of “disease”; the relationship between diseases on the one hand, and the politics of body, gender, and class on the other. We will explore disease, illness, and mental illness defined, represented, and understood in both male and female writers’ analytical essays and fictional writings in the 20th century; we examine how metaphorical “diseases,” such as infectious cannibalism and fin-de-siecle “vices,” are recognized and interpreted by key culture figures ranging from the founding father of modern literature (Lu Xun), to the winner of the 2012 Nobel Prize in Literature (Mo Yan), to the “Second New Wave” film director of Taiwanese Cinema (Tsai Ming-liang); and we explore how Freud’s psychoanalysis and post-Freudian psychotherapy are “practiced” in literature circulated in both print and internet cultures. Throughout the course, we will focus on the interplay between literary canons (fictions, essays, and dramas) and popular media and genres: blockbuster cinemas and art house filmmaking and culture, from comics to TV dramas. From there we move on to novels and films that examine a range of other relationships between love and death, including parental love and sacrifice, martyrdom and love of country, sex and the occult, and romance at an advanced age. We will read novels and short stories by canonical modern authors like Tanizaki, Kawabata, and Mishima as well as more contemporary fiction by writers like Murakami Haruki; we will also look at some visual literature, including puppet theater, comics, animation, and Japanese New Wave film. The class and the readings are in English.

Class Format: lecture/discussion

COMP 255 Arab and Anglophone: Narratives Beyond Nation and Diaspora

Crosslistings: ARAB 256/COMP 256/ENGL 284

This course takes a close look at contemporary Anglophone Arab writings. The premise is that students who are already familiar with major Arab writers, and/or know the story of Arab descent who live in the Anglo-Saxon diaspora, especially the UK, North America and Australia. We will investigate the work of these writers with special attention to the history of Arab migration to these geographies, and the emergence of hyphenated Arab identities and literatures. At the heart of this course is a desire to not only shed light on what it means to be an Arab or an immigrant producing English literature, but also to understand the multiple...
ways in which we conceptualize and seek to define what transnational literature means. Texts for this course may include novels by the following writers: Rabih Alameddine (Lebanon/USA), Mohja Katif (Syria/USA), Leila Abouleila (Sudan/UK), Hisham Matar (Libya/UK), and Randa Abdel-Fattah (Palestine-Egypt/Australia). There will also be a course reader that includes critical essays, poems, as well as a number of films and selections of music that shed light on the different articulations of being Arab and Anglophone.

Class Format: seminar
Requirements/Evaluation: active class participation, 4 short response assignments (2-3 pages), and final paper (5-7 pages)

COMP 257 From Putin to Pussy Riot: Discourses of Post-Soviet Gender (DIS)
Crosslistings: RUSS 213/GBST 213/WGSS 214/COMP 257
Before 1991, Russians typically appeared in the Western media as macho villains in the nuclear arms race or a James Bond film. Today, however, news from the Former Soviet Union often sounds like a bizarre gendered media stunt. For example, Russian president Vladimir Putin has been photographed topless while fishing on vacation in Siberia, while the feminist punk-rock collective Pussy Riot protested Putin’s regime by performing in day-glo balaclavas in Russia’s largest stadium. This course examines related post-Soviet media spectacles in the attempt to understand the Western press’s fascination with Russia, as well as how social trends defining the post-Soviet era. We will focus on the ways in which gender and sexuality have come to mark post-Soviet culture and discourse as different from those in the West. In addition to Vladimir Putin and Pussy Riot, we will consider the so-called crisis of masculinity in post-Soviet Russia, the trafficking of women from the Former Soviet Union, the Ukrainian feminist collective Femen, the Eurovision Song Contest, and the 2013 legislation in the Russian Federation banning homosexual propaganda among minors. We will try to understand how concepts, such as feminism, tolerance of sexual minorities, and performed gender, have been deemed dangerous in the post-Soviet East at the very time they have attained normative status in the West.

This course is part of the Exploring Diversity Initiative because it engages in cultural comparison, explores how power and privilege are allocated differently in post-Soviet societies than in Western liberal democracies, and engages in the critical theorization of post-Soviet culture and discourse.

All readings will be in English.
Class Format: seminar
Requirements/Evaluation: active participation in class discussions, response papers based on assignments for class. 2 papers (3-5 pages each) on relevant current events in the post-Soviet world, and a final project

COMP 258(F) Film and Media Studies: An Introduction
Crosslistings: ENGL 254/COMP 258
This team-taught interdisciplinary course introduces students to concepts and skills central to the study of moving images. After familiarizing ourselves with the basic elements—visual, narrative and auditory—necessary for formal analysis, we will develop critical tools for understanding film and media in their historical and social contexts. We will discuss influential ideas, theories, and methods in the discipline of film and media studies. Students will learn to respond to works drawn from a wide range of forms: fiction and nonfiction film, animation, television, video games, and emerging forms of virtual reality. Throughout, our emphasis will be on the diverse ways in which moving pictures create meaning. How can we best think about the reciprocal relations between film, new media, and contemporary life? This course will be presented through a mixture of lectures, discussions, and exercises.

Class Format: lecture/discussion/studio
Requirements/Evaluation: class attendance and participation; frequent (probably weekly) writing assignments that will include several short responses, three essays (1000-2000 words), three production exercises; and a final long paper or project
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: no prior production experience is required
Enrollment Preferences: open to first-year students; approximately 2/3 of places will be reserved for first- and second-year students
Enrollment Limit: 30
Expected Class Size: 30

COMP 259T(S) Adultery in the Nineteenth-Century Novel (W)
Crosslistings: COMP 259/ENGL 261/WGSS 259
In this tutorial, we will read four novels written between 1850 and 1900, all of which focus on the figure of the adulteress. Bovary (1856), Lev Tolstoy's Anna Karenina (1873-77), Leopoldo Alas y Ureña’s La Regenta (1884-85), and Theodor Fontane's Effi Briest (1894). For each week of class, students will read one of these primary texts, as well as a selection of secondary literature that will allow us to understand the novel in its historical and social context. How can we account for the rise of the novel as a literature of modernity? How do these novels comment on advances in technology, privacy, or education? How are these texts represented through a mixture of lectures, discussions, and exercises.

Class Format: seminar
Requirements/Evaluation: active class participation, 4 short response assignments (2-3 pages), and final paper (5-7 pages)
Prerequisites: none
Enrollment Preferences: open to first-year students; approximately 2/3 of places will be reserved for first- and second-year students

COMP 260 Reading Comics from the French-Speaking World
Crosslistings: RLFR 260/COMP 260
From political cartoons and satire of the 19th century to contemporary graphic novels, the bande dessinée has a long history in the French-speaking world. We will read early political cartoons, classics such as Asterix and Tintin, and contemporary BD from France, Québec, Côte d’Ivoire, Morocco, Rwanda, and Guadeloupe to analyze how they tackle subjects such as nation, empire, sexuality, biography, war and human rights. We will pay attention to the visual form and critical theory of the genre. Conducted in French.

Class Format: seminar
Requirements/Evaluation: weekly response papers, 5-page paper, graphic-form paper, final research project
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none
Enrollment Preferences: French majors and certificate students, Comparative Literature majors
Enrollment Limit: 20
Expected Class Size: 15

COMP 261 Comparative Postcolonial Narratives: Novels from the Arab World, Latin America and the Caribbean (W)
Crosslistings: COMP 261/ARAB 261
In this introductory course to the global postcolonial novel, we will examine novels in translation from the Arab world, Latin America and the Caribbean that are in conversation with each other. Through textual and formal analysis of selected novels in translation, we will ask questions concerning the legacy of the different forms of European colonialism in these distinct geographical. This course has two goals: First, to familiarize students with classical, canonical and popular Arabic, Latin American and Caribbean novels that deal with the history of European colonialism and/or its aftermath. Second, to introduce students to some of the critical trends and theoretical concerns concerning the potential and limits of reading these novels as resistance and/or postcolonial literature. In addition to selected critical essays, the readings for this course may include novels by the following writers: Assia Djebar (Algeria), Gamal al-Ghitani (Egypt), Sahar Khalilah (Palestine), Tayyib Saleh (Sudan), Alejo Carpentier (Cuba), Rosario Castellanos (Mexico), Jamaica Kincaid (Antigua), and Gabriel García Marquez (Colombia).
COMP 262 Japanese Theatre and its Contemporary Context

cross-listings: JAPN 271/COMP 262

Japan's rich and varied performance traditions, old and new, born of different historical settings, coexist to this day and compete for the attention of audiences, domestically and abroad. The forms to be considered (noh, kabuki, bunraku, shingeki, butoh, and Takarazuka all female revue among others) are all dynamic. Each has transformed itself in response to evolving social conditions. This course examines these performance traditions, considers how each reflects the social, cultural, and political context of its birth, and poses the question, "of what relevance is each to a contemporary audience?" Some of the other questions we will explore are: How have these performing traditions transformed themselves throughout history, including after 3.11? What do we mean by traditional? contemporary? How are traditional and contemporary performance genres interacting with each other? How have the central themes of these works evolved? All readings and discussion will be in English.

Class Format: lecture/discussion
Requirements/Evaluation: active class participation, presentations, written journals, two short papers, and one longer paper

COMP 266F Theories of Language and Literature (W)

Cross-listings: ENGL 269/COMP 266

This course is made up of questions: What is language and why would anyone want to study it? What can you figure out by examining language that you can't figure out by studying history or psychology? Do students of literature have distinctive ways of asking questions about the world? Why do we call some language literary? Can any language be literary if it appears in the right kind of book? Is there a difference between verbal forms of art and visual or auditory ones? Can novels do things that plays and poetry cannot? Why does anyone read poetry anyway?

Class Format: seminar
Requirements/Evaluation: four short papers totaling 20 pages, informal weekly writing, class attendance and participation

COMP 267(F) The Art of Friendship
Crosslistings: CLASS 212/COMP 267/REL 267
The idea of friendship has captivated poets, philosophers, and their audiences for over three millennia. The subtle dynamics of this fundamental relationship between humans have been a source of inspiration, consolation, and consternation for countless writers and readers. What are the different types of friendship? How does one make a friend, and what makes a good friend? How does a friend differ from an acquaintance, an ally, an accomplice, an enemy? Can the beloved also be a friend? Ancient Greek and Latin writers took up these and other questions about friendship in philosophical dialogues and treatises, epic and lyric poems, tragic and comic plays, oratory, and correspondence. This course will explore ancient representations of friendship through readings from many of the most important texts and authors of antiquity, including Gilgamesh, the Hebrew Bible, Homer, Sappho, Euripides, Plato, Aristotle, Cicero, Virgil, Seneca, and the Epistles of Paul. We will also consider the wide-ranging responses to these meditations and depictions in later traditions from the Middle Ages to modernity, in such writers as Heloise and Abelard, Aelred of Rievaulx, Aquinas, Montaigne, Ralph Waldo Emerson, Emily Dickinson, Elizabeth Bishop, Jack Kerouac, and Susan Sontag. All readings are in translation.
Class Format: seminar
Requirements/Evaluation: class participation, short written assignments, and a final paper/project
Prerequisites: none
Enrollment Limit: 25
Expected Class Size: 25
Distribution Notes: meets Division 1 requirement if registration is under CLASS or COMP; meets Division 2 requirement if registration is under REL

COMP 268(F) Caribbean Women Writers
Crosslistings: AFR 327/WWGS 268/ENGL 307/COMP 268
This course is designed to explore the issues and themes commonly found in literatures of the Caribbean written by women. We will consider prose and poetry published in English in the twentieth and early twenty-first centuries, reading the texts from several different angles - including colonialism, globalization, and migration - with feminism as the overarching/organizing theme of the course. In addition to the general literary study of author, genre and discourse, our methodology will include strategies of close reading, contextualization, and a range of interdisciplinary critical approaches utilized to assess the significance and role of Caribbean women's writings as part of national and women's literatures and to explore questions of identity formation and/or (dis)integration, gender, social status, and ethnicity. We will be examining the well-known "forerunners" of the genre - possibly writers such as Paule Marshall, Jamaica Kincaid, Jean Rhys, and Lorna Goodison - although not necessarily their most famous texts. We will also read works from relative newer shores - possibly Zadie Smith, Edward Danctit, and Patricia Powell - to determine how they continue old trends while blazing new trails.
Class Format: seminar
Requirements/Evaluation: evaluation will be based on class participation, 2-3 short papers (5-7 pages), and a 10-page final paper or project
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none

COMP 269 Transitional Japanese Literature into the Twentieth Century Crosslistings: JAPN 271/COMP 269
After more than two centuries of National Seclusion, Japan's modern era began suddenly in the middle of the nineteenth century, with the unexpected arrival of Commodore Perry, the destabilization of the 250-year old shogunal government, and the violent restoration of Imperial rule. Rapid and radical changes followed in every aspect of society, from fashion to philosophy. This course will explore how such changes have been expressed through literature, film and performance. We will trace how the authors of literary and other artistic works perceived, integrated and at times rejected experiences of the new and the foreign. All readings and discussions will be in English.
Class Format: lecture/discussion
Requirements/Evaluation: evaluation will be based on active class participation, presentations, written journals, two short and one longer paper
Prerequisites: none; open to all
Enrollment Preferences: majors first and then seniors and juniors
Enrollment Limit: 15
Expected Class Size: 15
Distributional Requirements: Division 1

Not Offered Academic Year 2017
SEM Instructor: Shinko Kagaya

COMP 270 Performing Greece and Rome
Crosslistings: CLASS 262/TEA 262/COMP 270
This course explores the fluidity of genres by focusing on tragedy and comedy. Each began as a grafted thing, a hybrid, a fusion of poetic, musical and dramatic genres previously developed for a variety of occasions outside the Theater of Dionysus. Fusion continued to energize both genres, and we will attend to its effects as we read several tragedies by Aeschylus, Sophocles, and Euripides and comedies by Aristophanes from fifth-century Athens; a comedy infected one from the early post-Alexandrian Greek world; comedies by Plautus and Terence from republican Rome; and a tragedy by Seneca from the imperial Rome of Nero. We will also read short selections from (or read about) the genres out of which tragedy and comedy were created and re-created, and into which they sometimes made their own incursions (e.g., heroic epic, women's laments, choral and solo lyric poetry, wisdom poetry, oratory, philosophical texts, histories, mime, farce, various kinds of dance, music and visual arts). We will especially attend to the ways tragedy and comedy interrelated one another. Critical readings, along with modern productions of ancient tragedies and comedies, will guide us as we consider all these generic exchanges in light of changing conditions and occasions of theatrical performance, other public spectacles shaping the expectations of theater audiences, and the development of writing and reading as modes of performance.
Class Format: seminar
Requirements/Evaluation: evaluation will be based on participation in class, several very short essays, and two longer essays, one of which may be replaced by an original script, design project, musical composition, or live performance
Prerequisites: none
Enrollment Preferences: if oversubscribed, preference given to majors or prospective majors in Classics, Theatre, Comparative Literature, English or any other literature, and to students engaged in performing or studio arts
Enrollment Limit: 15

COMP 271 From Kleist to Kafka
Crosslistings: GERM 271/COMP 271
Heinrich von Kleist (1777-1811) and Franz Kafka (1883-1924) wrote some of the most puzzling and intriguing work in European literary history. From Kleist's drama Penthesilea, which culminates in the consumption of the hero by the heroine (literally!), to Kafka's "A Hunger Artist," profiling a man who starves for a living, the texts in the course attempt to access the most profound—and at times bizarre—regions of the human mind. Works we will read include Kleist's dramas Prince Friedrich of Homburg, Amphitryon, and Penthesilea, and his short stories "The Marquise of O..." "The Earthquake in Chile," "The Foundling," "St Cecilia and the Power of Music," and "The Betrothal in Santo Domingo." By Kafka we will study "The Judgment," "The Metamorphosis," "A Hunger Artist," "In the Penal Colony," "The Burrow," "A Country Doctor," and others. Literary readings will be supplemented by selected letters and essays by Kleist, and by excerpts from Kafka's diaries.
Readings and discussion in English.
Class Format: seminar
Requirements/Evaluation: intensive participation, four 2- to 3-page response papers, one 5- to 7-page paper, final project
Prerequisites: none

COMP 273 Beyond Tonto: American Indians in Film (D)
Crosslistings: AMST 257/HIST 357/ARTH 260/ENGL 260/COMP 273
In 1893, Thomas Edison unveiled the kinetoscope and allowed audience members to glimpse the Hopi Snake Dance by peaking into the device's viewing window. Since the birth of the motion picture, films portraying Native Americans (often with non-Native actors in redface) have drawn upon earlier frontier mythology, art, literature, and Wild West performances. These depictions in film have embodied romanticized and stereotyped images about American Indians in the imaginations of audiences throughout the United States and around the world. In this course, we will critically examine representations of American Indians in film, ranging from the origins of the
motion picture industry to the works of contemporary Native filmmakers who challenge earlier paradigms. We will reflect upon revisionist narratives, the use of film as a form of activism, Indigenous aesthetics and storytelling techniques, reflexivity, and parody. Throughout the semester, we will view and discuss ethnographic, documentary, and narrative films. This course will satisfy the Exploring Diversity Initiative (EDI) requirement as we will examine power relations, cross-cultural interaction, and Indigenous social experiences.

untangle the conflicting perspectives, and elaborate the thoughts and feelings related to Japan's shifting roles within East Asia and beyond. Discussions will probe domestic issues, such as gender/economic disparities, aging, how such confrontations are perceived, handled and narrated, and what they mean. This tutorial looks into confrontations, within Japan and across its borders, in the past and present and past, or living and dead. This course will examine literature and thought at the moments when the tectonic plates of reason and supposed unconcealedness collide most forcefully: around 1800 (Goethe, Kleist, and the Romantics), around 1900 (Nietzsche, Freud, Kafka, Hofmannsthal), the mid-twentieth century with its dislocations (Hitler, Böll, Bachmann) and the end of the millennium (Roth, Jelinek). Some theoretical work (psychoanalytic theory, Adorno, Benjamin) will aid in the process of understanding the literature and philosophy we read. All readings and discussion will be in English translation.

**COMP 278(S) Premodern Japanese Literature and Performance**

Crosslistings: JAPN 278/COMP 278

Some of Japan's performance traditions, which developed in different historical settings, have survived to this day and continue to coexist and compete for the attention of audiences both domestically and abroad. This course examines the Japanese literature of three major periods in Japan's history, focusing on how literary and performance traditions have been interrelated in the unfolding of Japanese literary history. We will begin by looking into the Heian period (794-1185), when the work of female authors occupied center stage and some of the canonical texts of the Japanese literary and cultural tradition were born. Next we will consider the medieval period (1185-1600), which saw the rise of the samurai class and the consequent shift in the domain of artistic creation. Then we will look at the Edo period (1600-1867), when a new bourgeois culture flourished and audiences were greatly transformed. We will also explore the continuing force of these premordern literary traditions in contemporary performing arts. All readings and discussions will be in English.

**Class Format:** lecture/discussion

**Requirements/Evaluation:** active class participation, presentation, written journals, two essay questions, one paper, and attendance of live performance events

**Prerequisites:** none; open to all

**COMP 279(F) Erotic, Grotesque, Sublime: Ghosts and Monsters in East Asian Religion and Popular Culture**

Crosslistings: REL 271/ASST 271/COMP 279/WGSS 279

"Ghosts and monsters" (Chinese yaoguai, Japanese yokai, Korean yoge) have long figured prominently in East Asian cultural history. In premodern East Asian chronicles, wrathful demons attacked the imperial palace, ghosts haunted abandoned temples, and shape-shifting foxes infiltrated the bedrooms of royal concubines. These creatures persisted into the modern era when nineteenth century tabloids reported the existence of demon-faxes, giant serpents, and vengeful spirits. In the latter half of the eighteenth century, monsters began crossing over into the realm of fiction, and Japanese, Chinese, and Korean popular novels and films continue to crawl with images of traditional dark beasts. The opening contention of this course is that ghosts and monsters signify deviancies from "the normal" as it is constructed in a given culture and time period—they often come to represent transgressions of nature, gender, sexuality, race, morality, or to subvert distinctions such as those between human and animal, man and woman, animate and inanimate, present and past, or living and dead. This course will analyze East Asian ghosts and monsters in their historical cultural context, thinking about how
they come to embody particular cultural fears and desires. We will use a range of East Asian materials in translation—including folktales, medieval bestiaries, short stories, and films, alongside a heavy dose of theory including works by feminist scholars Julia Kristeva, Ilika Quinidau, Susan Sontag and various others who attempt to understand the monstrous and the uncanny. Students will undertake an extended research project on a ghost or monster of their choice and locate it in its broader cultural context. Doing so should put us in a position to explore central themes, such as the connection between the grotesque and the erotic, the cultural performance of gender, the social construction of illness, the trauma of memory, the commodification of the grotesque and the erotic, the cultural performance of gender, the social choice and locate it in its broader cultural context. Doing so should put us in a

COMP 280 History of the Book
Crosslistings: CLAS 200/ASST 200/HIST 392/REL 260/COMP 280
From ancient clay tablets, bamboo strips, and papyrus rolls to modern hardbacks, paperbacks, and e-readers, no object has so broadly and deeply represented the capacity for humans to create, preserve, and transmit knowledge, information, and ideas as the book. Books have been worshiped and condemned, circulated and censored, collected and destroyed. From works of art to ephemeral trash, they have been public and private, sacred and profane, magical and commonplace. Likewise, notions of the book have influenced every subsequent form of communication and transmission, whether we are browsing film and song “libraries” or “scrolling” down “pages” on the web. This course will explore aspects of the material, social, cultural, and intellectual history of the book, from the invention of the earliest writing systems through the modern development of digital media. Our inquiry will span the globe and the millennia, but we will pay special attention to the ancient and medieval Chinese, Greek, and Latin traditions and their enduring influence in the modern world. Topics will include orality and literacy, manuscript production, the invention and spread of printing, typography, reading culture, notions of authorship, libraries and collections, censorship, and the digital book. Through a variety of readings, hands-on exercises, and interactions with our abundant library resources, we will investigate how the changing form and function of the book interact across its long and diverse history. All readings are in translation.

COMP 284 The Concept of Bildung: the Literature and Philosophy of Self-Discovery
This course traces the influential concept of Bildung, or self-discovery, through the literature and philosophy of Germany, England, France, and other traditions, from the Enlightenment to the present. At the time of the French Revolution and amid the general fervor for democratic self-rule that it represented, a handful of German philosophers asked themselves a simple yet profound question: If modern individuals could free themselves from dogmatic belief and from the political and cultural institutions that such belief supported, what new aesthetic, social, and political forms could express and support this freedom, and how might these new forms be discovered and maintained? The famously untranslatable concept of Bildung, whose meaning spans notions of education, cultivation, self-discovery, and self-actualization, was a response to this question that would inform joint projects of scientific discovery, artistic self-expression, and political self-determination well beyond the borders of Germany, and to the present day. Through careful analysis of key texts from this tradition, students will explore how representations of Bildung reflect changing ideas about identity, agency, pleasure, knowledge, and power. Readings will include literary works by writers like Goethe, C. Bonté, Wordsworth, Flaubert, Wilde, Equiano, Fanon, and Coetzee, in combination with critical and philosophical texts by figures like Kant, Hegel, Nietzsche, and Freud.

COMP 285(S) World War II in Russian Culture
Crosslistings: RUSS 220/COMP 285/GBST 220
This course examines how Russian literature and film have depicted World War II since the war period to the present. The enormous impact of the war on the Russian and Soviet population through loss of life and trauma has been definitive for Russian national identity. As living memory of the war's survivors recedes with their passing, literature and film continue to shape the collective memory of our culture and offer an understanding of the war and its consequences for subsequent generations. We will study the complex and varied experiences of the war on the frontlines and in the country's interior; by men, women, and children; by Russians and by people of other ethnicities of the USSR. In assessing the narratives and images of the war in journalism, novels, and film, we will identify their formal achievements within the particular parameters of a given medium or genre. We will also consider the political and ideological dimensions of the war's significance in the USSR and in post-Soviet Russia. The course explores the renewed and contested legacy of the war not only in the evolving genres of fiction and film, but also in recent public celebrations of Russia's victory in the war.
Class Format: seminar

COMP 287(S) Introduction to Post Colonial Studies (D) (W)
Crosslistings: ENGL 227/COMP 287/AFR 227
This course asks: What does the term "postcolonialism" mean? Is it a historical notion or an ideological term? When exactly does the 'postcolonial' begin? What are the theoretical and political implications of using such an umbrella term to designate the ensemble of writings and artworks by those subjects whose identities and histories have been shaped by the colonial encounter? We will situate the “postcolonial” historically, aesthetically, and conceptually across multiple time periods, geographic regions. We will read such authors as Rudyard Kipling, Salman Rushdie, Tsitsi Dangaremba, Chinua Achebe, and Jamaica Kincaid and work with such theorists as Frantz Fanon, Edward Said, Stuart Hall, Homi Bhabha, and Gayatri Spivak. The course will contribute to the College's Exploring Diversity Initiative by examining cultural differences and distributions of power across the world during the colonial, postcolonial, and globalized eras.

COMP 288(S) Insult to Injury: Satire and Comic Abuse in Ancient Greece and Rome (W)
Crosslistings: CLAS 228/COMP 288
Glutton, pervert, demagogue, sycophant, social climber, spendthrift, witch: these insults can tell us a great deal about the social structure, gender norms, values, and anxieties of the societies that use them. In this course, we will consider verbal attacks from ancient Greece and Rome, covering a variety of abuse ranging from the everyday to the most elaborately stylized: graffiti, curse tablets, law-court invective (Lysias, Demosthenes, Cicero), iambic and satric verse (Archilochus, Hipponax, Catullus, Horace, Martial, Juvenal), and abuse on the comic stage ( Aristophanes, Plautus). How do these attacks differ according to genre and performance context? Conversely, what cultural patterns underlie this diverse body of material? Who is targeted, and what behaviors do the insults attempt to police? What does the person casting blame stand to gain? How does the rhetoric of insult intersect with the construction of gender? To what extent is it helpful or misleading to think of Greek and Roman invective in terms of modern genres such as the political campaign attack ad or the rap battle? We will hone our analyses with secondary readings drawn from classics, comparative literature, and anthropology. All readings are in translation.
Class Format: seminar
Requirements/Evaluation: several short papers of varying length (two to five pages) and a longer final paper (eight to ten pages)
Prerequisites: none

COMP 290(F) Shakespeare on Page, Stage and Screen: Text to Performance (W)
Crosslistings: THEA 260/COMP 290/ENGL 270
Four centuries on, Shakespeare still challenges us. How should we weigh the respective claims of our own era's concerns—with matters of gender, sexuality, race, class, or materiality, for instance—against historian attention to the cultural, historical, and theatrical circumstances in which his plays were actually written? And when it comes to realizing the text in dramatic performance, such challenges—and opportunities—multiply further. Critical fidelity to Shakespeare’s times, language and theatrical milieu prioritizes a historical authenticity that can be constraining or even sterilizing, while, at the other extreme, staging the plays with the primary aim of making them “speak to our times” risks revisionary absorption in our own interests. We will focus on six Shakespeare plays, from different genres and periods of his career: Romeo and Juliet, Henry V, Twelfth Night, Hamlet, Antony and Cleopatra, and A Midsummer Night's Dream. Proceeding with each from close reading of the text, we will attend to the demands and opportunities of performance, and assess a range of recent film and stage productions.
Class Format: seminar
Requirements/Evaluation: based on class participation, several short reading responses, and two longer papers
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none
Enrollment Preferences: Theatre and English majors, and prospective majors

COMP 291(F) Humor in Classical Arabic Literature
Crosslistings: ARAB 221/COMP 291
In medieval Arabo-Islamic society, littérateurs and scholars were expected to relate knowledge at parties, literary salons, and banquet of the court as well as in their writings in ways that would entertain their audience. From elegant witticisms and irony to crude jokes and mockery, humor played an important role in winning audience approval; it abounds in literature from the classical period. In this class we will read selections from literary (adab) compilations including works such as al-Khattib al-Baghdadi’s Book of Party-Crashing and Party- Crushers, al-Jahiz’s Book of Misers, al-Ibshihi’s The Precious and Refined in Every Genre and Kind, as well as from the poetry of Abu Nuwas and Abu-i-Qasim al-Zahi. All readings in English, although those with Arabic language competency are invited to make comparisons with the original where possible.
Class Format: seminar
Requirements/Evaluation: class participation, 2 short papers, one long research paper, and weekly responses
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none
Enrollment Preferences: Comparative Literature and Arabic Studies Students
Enrollment Limit: 20

COMP 292(S) Revolutions and Counter-Revolutions: Narratives from the Arab World, Latin America and the Caribbean (D) (W)
Crosslistings: COMP 292/ARAB 292
This course offers a South-South comparative reading of revolutions and counter-revolutions in the second half of the 20th century in the Arab World, Latin America and the Caribbean. Focusing mostly on novels that depict histories of social movements, post-independence revolutions, indigenous
autonomies, dictatorship, and counter-revolutions, our aim is to investigate narratives of people power vs. absolute power, insurgency vs. neocolonialism, utopias and dystopias. To familiarize students with an alternative, yet foundational, canon of modern Arabic, Latin American and Caribbean literatures, we will focus on novels from the post-Sixties generation in the Arab world and the post-Boom Latin American generation. Questions that we will ask: How do these novels configure narratives of the nation and its fragments? What can we learn about the rise and fall of Communist rebellions in Oman and Cuba? How memories of traumatic lives under dictatorship in Syria and Chile shaped the genre of the political novel? How did novels about the ‘revolution’ contribute to the rise of realist experimental literary movements? In addition to selected films and critical essays, the readings for this course may include novels by the following writers: Sahar Khalifeh, (Palestine), Sonallah Ibrahim (Egypt), Dima Wannous (Syria), Sinan Antoon (Iraq), Zoé Valdés (Cuba), Subcomandante Marcos and Patricia Talbo III (México), Roberto Bolano (Chile), and Luisa Valenzuela (Argentina).

**Class Format:** seminar

**Requirements/Evaluation:** active class participation, three short papers (3-5 pages each), and a final 7- to 10-page expansion and rewrite.

**COMP 294T (S) Philosophy and Narrative Fiction (W)**

**Crosslistings:** PHIL 294/COMP 294

What is it for a novel, a story, a play or a film to be a philosophical narrative? It is not enough for it merely to be about a character who happens to be a philosopher; nor is it just that philosophical positions are reviewed in the narrative, as in Gaarder’s Sophie’s World. Milan Kundera tried to answer this question by saying that a good philosophical novel does not serve philosophy but, on the contrary, tries to “get hold of a domain that […] philosophy had kept for itself. There philosophy did not belong; it is a literary form of philosophy.”

**Class Format:** seminar

**Requirements/Evaluation:** this is a reading, writing & viewing intensive class; evaluation will be based on class participation, 5 short response papers (about 800 words each), & two 5 pages long papers

**Extra Info:** the second of which will be due after the end of classes; class attendance and Tuesday evening film screenings are mandatory

**Prerequisites:** none; open to first year students

**Enrollment Preferences:** Philosophy majors and intended majors; students especially interested in film; and by seniority

**COMP 301(S) Sublime Confusion: A Survey of Literary and Critical Theory**

**Crosslistings:** COMP 301/ENGL 301

Which is more appealing, a roller coaster or a rose? For much of its history, art and literary theory has conceived itself as a science devoted to explaining and defining “beauty." But running alongside this is an edgier countermovement that workshops something else—an experience of excitement, fear, suspense, or thrilling confusion often described as "the sublime." The sublime interested early critics, from classical rhetoricians to the German Idealists, as a way to make aesthetics more scientific paradoxiacially by identifying the doorway through which art and literature escaped the realm of reason. More recently the notion of literature’s exciting confusion has played a key role in modern critical theory from Russian formalism to new criticism, deconstruction, postmodernism, and posthumanism. (In fact, poststructuralism as such itself has a terrifyingly confusing quagmire to it.) We will take up a cross section of critical theory from classical times to the present, focusing on careful reading of relatively short texts by Plato, Aristotle, Addison, Burke, Schiller, Nietzsche, Shklovsky, I.A. Richards, Barthes, Derrida, Lyotard, Fredric Jameson, Haraway, and others. Case studies ranging from opera to film to intellectual history...
COMP 302T Latino Writing: Literature by U.S. Hispanics (W)
Classlistings: RLSP 306/COMP 302
Writing by U.S. Hispanics constitutes a new voice in American letters. In this tutorial, we will read and discuss work by U.S. Latinos and examine the social backgrounds to their texts. The experiences of immigration and assimilation, and the specific complexities of being both Hispanic and North American will be addressed. Authors to be studied: Jose Antonio Villarrreal, Tomas Rivera, Richard Rodriguez, Rigoberta Menchú, Rudolfo Anaya, Piri Thomas, Oscar Hijuelos, Cristina Garcia, Junot Diaz and historical texts by Carey McWilliams, and Rodolfo Acuña. Given the absence of a critical consensus around these recent titles, our task is to gain some sense of their common traits as a tradition, and place them within the larger body of literature of the Americas and the world. The tutorial will examine one work or set of authors per week. A student will bring, written out in full, an oral presentation focusing on the artistic features and sociocultural content of the assigned reading. Questioning of the presenter, on the part of the second tutee and the tutor, will follow. The course is designed to accommodate both Spanish and English speaking students. A student able to read and speak Spanish will be paired with another student of similar proficiency. Students who neither read nor speak Spanish will be paired together.
Class Format: tutorial
Requirements/Evaluation: five short oral presentations/papers (about 20-25 minutes) and a final longer one (about 40-45 minutes)
Extra Info: may not be taken on a pass/fail basis
Prerequisites: some previous course work in any literature beyond the 100 level is helpful; students selecting the Spanish option for credit toward the Spanish major must have taken at least one 200-level RLSP course or seek permission of the tutor
Enrollment Limit: 10
Distributional Requirements: Division 1

COMP 304 Queer of Color Critique: Race, Sex and Urban Life (D)
Classlistings: WGSS 306/AMST 306/AFR 306/LATS 306/COMP 304
This seminar is an introduction to queer of color critique, a field of scholarship that seeks to intervene in the predominancy white canon of queer studies. We will examine the history of this line of critique, beginning with Black and Chicana feminisms and extending into present day issues and activism highlighting intersectionality, exploring how and why QOCC became a necessary intervention into the then still emerging field of queer studies. Our texts include scholarly works as well as science fiction novels, plays, films, diaries, and graphic novels. Methodologically, we draw on many fields of study, including anthropology, literary studies, feminist studies, and ethnic studies. We focus primarily but not by means exclusively on US contexts, paying particular attention to the role that urban environments have served for queer communities of color. Topics include: feminisms of color, inter-racial desire and fetishization, orientalism and colonial fantasy, black queer science fiction, trans-disciplinary subcultures, and the political economy of sexual desire. A key feature of this course will also be the inclusion of numerous and diverse authors to appear on Skype or in person to answer questions about their work as we read it in class.
Class Format: discussion/lecture
Requirements/Evaluation: mid-term exam, choice of final exam essay or 8-10 page research paper, responses to performance/special events
Prerequisites: none
Enrollment Preferences: Women's Gender & Sexuality Studies majors or prospective majors
Enrollment Limit: 15
Expected Class Size: 15

COMP 305(F) Dostoevsky: Context and Interpretation
Classlistings: RUSS 305/COMP 305
This course examines the life and works of Fyodor Dostoevsky in the context of Russian political, cultural and intellectual history. Readings include Dostoevsky's short stories and novellas, such as Poor Folk, The Double, Notes from Underground, The Dream of a Ridiculous Man and his novels Raw Youth, and The Brothers Karamazov. We will situate the spiritual quandaries of his characters in the author's contemporary social paradigm with its ideological schisms. We will also analyze his works from the perspective of various psychological, political and philosophical conceptions of selfhood, agency, and power. Attention will be paid to questions of interpretation as Dostoevsky's theories have given rise to a number of prominent readings, most notably by Mikhail Bakhtin, who have had a lasting influence on literary theory. Key works of literary criticism will be assigned and discussed alongside Dostoevsky's texts. All readings will be in English.
Class Format: seminar
Requirements/Evaluation: active class participation, 3 short papers, and a final research project
Prerequisites: none
Enrollment Preferences: American Studies majors
Enrollment Limit: 15
Expected Class Size: 15

COMP 306 Tolstoy and His Age
Classlistings: RUSS 306/ENGL 388/COMP 307
This course examines the life and works of the great Russian writer Lev Tolstoy in the context of Western intellectual history. Readings will include Tolstoy's two major novels, War and Peace and Anna Karenina, as well as a number of shorter works, such as The Kreutzer Sonata and Hadji Murat. We will also examine some of Tolstoy's aesthetic and didactic works. Ultimately, we will develop an understanding of the writer's environment and his impact on the numerous social movements calling for change in the second half of the nineteenth century. All readings will be in English.
Class Format: lecture/discussion
Requirements/Evaluation: active class participation, 3 short papers, and a final research project

COMP 309(S) Complexion Complexities: Colorism in Literature, Lyrics & Everyday Life

Crosslistings: AFR 302/COMP 309

Often viewed as the "dirty laundry" of the Black American past, colorism, or skin color bias, is a pervasive force within modern global society. Although it is not a new issue, its impact is far reaching and continues to have damaging effects on people of color-especially members within the African Diaspora. From skin bleaching creams like "Whitenicious" to rap music's fetishization of light-skinned women, colorism is a very real and present issue affecting Black life. From the literary works of Wallace Thurman and Toni Morrison, to the lyricity of blues composer Big Bill Broonzy and rapper Lil Wayne, we will analyze the many ways that the politics of color influence standards of beauty and attractiveness, perceptions of behavior and criminality, and economic attainment and stability.

Class Format: seminar

Requirements/Evaluation: evaluation in this course will be based upon class participation, research papers, one 6- to 8-page paper, and a formal class presentation

COMP 311 Experimental African American Poetry

Crosslistings: AMST 307/COMP 311/AFR 301/ENSL 327

Contemporary African American poets in various cities and towns across the nation—from New York City to Los Angeles, from Berkeley to Durham, N.C.—are currently producing a vibrant and thriving body of formally experimental work, yet this poetry is largely unknown to readers both within and outside the academy. This formally innovative poetry defamiliarizes what we normally expect of "black writing" and pushes us to question our assumptions and presuppositions about black identity, "identity politics," the avant-garde (for example, is it implicitly raced?), formalism, socially "relevant" writing, the (false) dichotomy of form versus content, the black "community," digital poetics, and other issues of race and aesthetics. We will examine the writings of living poets, who range widely in age, and those of their avant-garde predecessors in the twentieth century. We will also be making links between this poetry and African American music and visual art.

Class Format: seminar

Requirements/Evaluation: two papers (6-8 pp., 8-10 pp.), short response papers, oral presentation, and class participation

COMP 312 Francograpic Islands (D)

Crosslistings: RLFR 312/COMP 312/AFR 312

Utopia, paradise, shipwreck, abandonment, exile, death. Man's fascination and obsession with the island as place of discovery, beauty and imprisonment stretches across the centuries. In this class, we will read French literary and imagined islands alongside islands constructed by Francophone Caribbean, Indian Ocean and non-Western writers in French. What does the island symbolize in individual, community, national, and imperial imaginations? And how does the island become an agent in discussions of gender, race, modernity and history? Readings will include works by Paul Gauguin, Pierre Loti, Aimé Césaire, Michel Tournier, Ananda Devi, Maryse Condé, Patrick Chamoiseau and Edouard Glissant. Conducted in French.

Class Format: tutorial

Requirements/Evaluation: active class participation, weekly response papers, midterm essay and final essay

Prerequisites: open to students who have taken a literature course in RLFR at Williams, or the beginning of instructor

Enrollment Preferences: French majors and certificate candidates, Comparative Literature majors, and Africana Studies concentrators

COMP 314T Enlightenment and its Discontents (W)

Crosslistings: GERM 306/COMP 314

"Saper aude," declared Immanuel Kant in his essay "What is Enlightenment?" (1784): "Have the courage to make use of your own capacity to reason." Kant's exhortation sums up the mood of the high Enlightenment, a trend in Western thought that gave birth to most of the ideals that we still hold dear: the freedom and universality of reason, the autonomy of the individual, the educative and restorative powers of the nuclear family. Today we are confronted daily with the tensions and gaps hidden inside Enlightenment thinking, in fact, the fissures in the edifice of the Enlightenment were subtly present from the beginning. This course will trace the development of Enlightenment assumptions through German literature and theory. Our reading will move through various stations of the development of Enlightenment thinking, from its most fervent proponents (Kant, Lessing), through those who put it to a severe test (Kleist, Hoffmann, Büchner), to the outright subversion of its premises (Nietzsche, Freud, Kafka). Readings and discussion in German for those who know German, in English for those who do not.

Class Format: tutorial

Requirements/Evaluation: 5-page papers or 2-page written commentaries every other week

Extra Info: may not be taken on a pass/fail basis

Prerequisites: for German students, GERM 201 or the equivalent; for non-German students, one college literature course; not open to first-year students, except with permission of instructor

COMP 316 An American Family and "Reality" Television (W)

Crosslistings: ARTH 310/WGSS 312/AMST 333/COMP 316

An American Family was a popular documentary series that featured the Loud family from Santa Barbara, California, whose everyday lives were broadcast on national television. The series generated an enormous amount of media attention, commentary, and controversy when it premiered on PBS in 1973. Today, it is regarded as the origin of so-called "Reality TV." In addition to challenging standard rules for television programming, the show challenged social conventions and asked viewers to think seriously about family relations, sexuality, domesticity, and the "American dream." Documenting the family's life over the course of eight months, the series chronicled the dissolution of the Louds' marriage and broadcast the "coming out" of eldest son Lance Loud, the first star of reality television.

In this class, we will view the An American Family series in its entirety, research the program's historical reception, and analyze its influence on broadcast and film media, particularly on "reality" television. A final 16- to 20-page research paper will be prepared in stages, including a 6- to 8-page midterm essay that will be revised and expanded over the course of the semester.

Class Format: seminar

Requirements/Evaluation: class presentations, research assignments, and final 16- to 20-page research paper

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

COMP 318(F) Twentieth-Century French Novel: From Adversity to Modernity
Crosslistings: RLFR 318/COMP 318

In his futurist novel Paris in the Twentieth Century (1863), Jules Verne envisions an era of technological superiority, complete with hydrogen cars and high-speed trains, televisions and skyscrapers, computers and the internet. But in Verne’s vision of modernity, technological sophistication gives way to intellectual stagnation and social indifference, in a world where poetry and literature have been abandoned in favor bureaucratic efficiency, mechanized surveillance, and the merciless pursuit of profit. To contest or confirm this dystopian vision, we will examine a broad range of twentieth-century novels and their focus on adversity and modernity. In a century dominated by the devastation of two World Wars, the atrocities of colonial empire, and massive social and political transformation, the novel both documented and articulated France’s engagement with race and ethnicity, gender and sexuality, colonialism and immigration. Within this historical context, we will discuss the role of the novel in confronting war and disease, challenging poverty and greed, and exposing urban isolation and cultural alienation in twentieth-century France. Readings to include novels by Colette, Genet, Camus, Duras, Ernaux, Guibert, Begar, Lectures to include discussions of Gide, Proust, Sartre, Beauvoir, Cixous, Foucault, Jelloun, Djébar. Films to include works by Fassbinder, Annaud, Lloret, Ducastel, Martineau, Tchélin, Charef. Conducted in French

Class Format: seminar
Requirements/Evaluation: active class participation, midterm exam, and two three papers
Prerequisites: a 200-level course; or by placement test; or permission of instructor
Enrollment Preferences: French majors and certificate students; Comparative Literature majors; and those with compelling justification for admission; seniors returning from study abroad (in France or other Francophone countries) are particularly welcome
Enrollment Limit: 20

COMP 319 Black Migrations: African American Performance at Home and Abroad
Crosslistings: AFR 317/COMP 319/DANC 317/ENGL 317/THEA 317/A

In this course, students will investigate, critique and define the concepts of migration and diaspora with primary attention to the experiences of African Americans in the United States and Europe. Drawing on a broad definition of performance, students will explore everything from writing and painting to sports and dance to inquire how performance reflects, critiques and negotiates migratory experiences in the African diaspora. For example, how did musician Sidney Bechet’s migration from New Orleans to Chicago to London influence the early jazz era? How did Katherine Dunham’s dance performances in Germany help her shape a new black dance aesthetic? Why did writer James Baldwin go all the way to Switzerland to write his first novel on black, religious culture in Harlem. What drew actor/singer Paul Robeson to Russia, and why did the U.S. revoke his passport in response to his speeches abroad? These questions will lead students to investigate multiple migrations in the African American experience. From Sterling Brown and Zora Neale Hurston to John Edgar Wideman and Suzan Lori-Parks, many African American authors have drawn on music to take political stands, shape creative aesthetics, and articulate black identity. In this course, students will explore the work of these authors and more, investigating music’s ability to represent and critique African American culture in their literature. Texts will cover a range of literary forms including poetry, plays, short stories and novels alongside theoretical and critical essays. Students will discuss such key issues as assimilation into mainstream culture, authenticity claims on black music, and music used as a tool for protest. Additionally, class assignments will include musical examples in spirituals/gospel, blues, jazz, and rock/rhythm and blues. While this class requires students to practice in-depth literary and performance analysis skills, students are not required to have technical musical knowledge.

Class Format: lecture/discussion
Requirements/Evaluation: evaluation will be based upon class participation, in-class student performances, several 2-page performance response papers, one 10- to 12-page research paper, a final performance with a 3-page report
Extra Info: may not be taken on a pass/fail basis
Prerequisites: none; open to all
Enrollment Limit: 20
Expected Class Size: 15

COMP 322(F) Comic Lives: Graphic Novels & Dangerous Histories of the African Diaspora
Crosslistings: AFR 323/AMST 323/ARTH 223/COMP 322/ENGL 356

This course explores how the graphic novel has been an effective, provocative and at times controversial medium for representing racialized histories. Drawing on graphic novels such as Jeremy Love’s Bayou and Ho Che Anderson’s King; A Comic Biography, this course illustrates and critiques multiple ways the graphic novel conveys image and word to create and challenge visual and sensorial access into ethnic traumas, challenges and interventions in critical moments of resistance throughout history. Students will practice analyzing
graphic novels and comic strips, with the help of critical essays, reviews and film; the chosen texts will center on Africanas cultures, prompting students to consider how the graphic novel may act as a useful alternate history for marginalized peoples. During the course, students will keep a journal with images, themes and reflections and will use Comic Life software and ipads to create their own graphic short stories based on historical and/or autobiographical narratives.

Class Format: seminar

Requirements/Evaluation: evaluation will be based upon class participation, weekly written responses, student-led facilitation, one 3-page graphic analysis, one 6- to 8-page essay, and a final project (producing a graphic short story with Comic Life)

Extra Info: may not be taken on a pass/fail basis, not available for the fifth course

COMP 323T Reason, Unreason and Anti-Reason from the Enlightenment to the Third Reich (W)

Crosslistings: GERM 323/COMP 323

From its inception in the eighteenth century, modern German art and thought have professed the nature of human reason. At every turn, the celebration of rationality as triumphing over the irrational has brought with it a resistance to the rational: Lessing's Enlightenment dramas find their counterpart in those of the Sturm und Drang movement; Kleist's preoccupation with reliable justice and predictable happiness can't hide an unblinking knowledge of life's randomness; Freud's search for ultimate knowledge is constantly shadowed by the unknowable; in the acts and "theories" of the Nazis, we see the ultimate horror of rationality reduced to rigid mechanics, in the service of the unthinkable. The course will involve reading closely and writing intensively about texts by, among others, Lessing, Goethe, Kleist, Büchner, Nietzsche, Freud, Kafka, and the Nazi propagandists.

Offered in English or German. Reading, discussion and writing will be in German for German-speakers, in English for non-German speakers.

Class Format: tutorial

Requirements/Evaluation: two seminar meetings with the entire group; five 5-page papers, five 2-page critiques of the partner's papers

Extra Info: may not be taken on a pass/fail basis

Prerequisites: for students taking the tutorial in German: GERM 201 or the equivalent; for students taking the course in English: one college-level literature course

COMP 325(F) American Social Dramas (W)

Crosslistings: SOC 326/AMST 328/COMP 325/THEA 328

As Shakespeare wrote memorably in As You Like It, "All the world's a stage, and all the men and women merely players." Sociologists have heeded Shakespeare's wisdom, arguing that social and political events are "performances" that take shape in accordance with familiar cultural scripts, and indeed that social actors implicitly interpret real-world events using plot structures from literary and dramatic genres such as romance, irony, comedy, and tragedy. We will explore this thesis through the lens of contemporary American political events, including the Clinton-Lewinsky scandal, September 11, Hurricane Katrina, the 2012 presidential election, and current debates over Confederate symbolism. We will also pay careful attention to the unfolding drama associated with the current post-election, and how social performances and struggles to "control the narrative" shape the meanings and outcomes of political events? Are they merely "spectacles," or wellsprings for genuine civic participation? What role do political comedy, satire, and social media play in shaping the trajectory of contemporary events? Major authors will include Victor Turner, Clifford Geertz, J.L. Austin, Erving Goffman, and Jeffrey Alexander. Throughout the semester, each student will develop a significant project on a political event of his or her choosing.

Class Format: see above

Requirements/Evaluation: active participation, five 2-page response papers, a 12-page paper that will go through draft and revision stage, and a presentation

Prerequisites: none

Enrollment Preferences: Anthropology and Sociology majors

COMP 326T(S) Queer Temporalities (W)

Crosslistings: REL 326/LATS 426/WGS 326/COMP 326

Birth, childhood, adolescence, college, adulthood, career, marriage, family, mid-life, old age, death, afterlife. How are all these facets of being human imagined as stages in time, as axes on certain progressive lines that delineate human social relations? How do we experience and represent time, and what factors might account for both our experiences and our representations? What are some of the ways that people experience and mark the passing of time? What are some of the different ways that people have made sense of time and their relationship to it? How have our conceptions of time and our demarcations of lifecycles shifted historically? How do people whose experiences do not align with dominant cultural social stages negotiate ideas of lifecycle and timing? Especially for individuals and peoples who have been denied self-representation and narratives of place, how do competing notions of history, space, and location get negotiated? In this course, drawing from within the broad corpus of queer theory (including theorists such as Gloria Anzaldúa, Elizabeth Freeman, J. Halberstam, and José Esteban Muñoz) we will examine some non-linear, non-normative, and interruptive approaches to making sense of time, space-time, and self within time.

Class Format: tutorial

Requirements/Evaluation: evaluation will be based on class attendance, analytical essays, responses, and revised essays

Extra Info: Pairs will meet with the instructor for one hour each week. Almost every week, one student from the pair will write a 5-page analysis of the week's reading. The other student will respond orally with a 2-page response to their partner's paper. Pairs will also prepare a midterm synthesis, students will revise two of their 5-page analytical papers: one from the first half of the semester, one from the second half due at the end of the semester.

Prerequisites: none

COMP 327 Theory after Postmodernism: New Materialisms and Realism

Crosslistings: REL 327/COMP 327

Since the 1970s much of the academy has labored under a particular form of linguistic skepticism (often called postmodernism or poststructuralism) that is directed at the destruction of stable conceptions of subjectivity and meaning. It is often said that everything is a text and that all knowledge is power. But just as the typewriter has given way to the computer and disco to dubstep, as we exit postmodernity new philosophies are appearing on the conceptual horizon. This course will layout this challenge to postmodernism by exploring the work of contemporary thinkers including Malabou, Quentin Meillassoux and Bernard Stiegler.

While the relevance of these movements to the study of religion will be discussed, this course is intended for students of any major who wish to study critical, political, or philosophical theory.

Class Format: seminar

Requirements/Evaluation: regular participation and attendance, regular short writing assignments, 10- to 15-page final paper

Extra Info: may not be taken pass/fail or fifth course

Prerequisites: none, although prior coursework in critical theory, political theory, or continental philosophy is strongly recommended

Enrollment Preferences: Religion, Philosophy and Comparative Literature majors

Enrollment Limit: 15

Expected Class Size: 10

Distribution Notes: meets Division 2 requirement if registration is under REL: meets Division 1 requirement if registration is under COMP

Distributional Requirements:
COMP 328(F) California: Myths, Peoples, Places (W)
Crosslistings: LATS 318/AMST 318/REL 318/COMP 328/ENVI 318
Crosslisting Between Paradise and Hell, between environmental disaster and agricultural wonderland, between Reagan and Berkeley, between a land of all nations and a land of multiracial enmity, a diversity of myths have been inscribed onto and pursued within the space we call California. How did certain narratives of California come to be, who has imagined California in certain ways, and why? What is the relationship between certain myths, the peoples who have imagined them, and the other peoples who have shared California dreams? In this course, we will examine some of the myths that surround California by looking at a few specific moments of interaction between the peoples who have come to make California home and the specific places in which they have interacted with each other. Of special interest will be imaginations of the Spanish missions, the Gold Rush, agricultural California, and wilderness California, as "sprawling multicultural dystopia," and California as "west of the west."
Class Format: seminar
Requirements/Evaluation: this course will be mostly discussion oriented, with grading based upon participation, short writing exercises, one 3-page review essay with mandatory revision, one 5- to 8-page midterm review essay, and a final 10- to 15-page comparative review essay

COMP 329(F) PoliticalRomanticism
Crosslistings: ENGL 322/COMP 329/PSCI 234
What is Romanticism, and how does it relate to the world-changing political upheavals that emerge along with it? Romantic literature emerged around the time of the French and Haitian Revolutions, and many Romantic authors were deeply sympathetic to the democratic principles of freedom and equality that inspired such political uprisings. Yet many also questioned revolutionaries' attempts to realize such ideas by forcibly seizing control of governments. These authors became interested in art and literature as alternative means of bringing about social and political change. In so doing, they invented ideas about the political power of art that are still very much with us today. This seminar examines these ideas through readings of works of Romantic literature and the philosophy that brought them into the world, while also considering how arguments subsequently developed for and against political Romanticism inform today's heated debates about the relationship between art and politics. Authors may include Burke, Kant, Rousseau, Wordsworth, Schiller, C. Smith, P.B. Shelley, Hegel, Heine, Marx, and Carl Schmitt.
Class Format: seminar
Requirements/Evaluation: evaluation based on two papers, 6 and 8-10 pages in length, weekly posts, and general participation
Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

COMP 330 New Orleans as Muse: Literature, Music, Art, Film and Theatre in the City
Crosslistings: THEA 330/COMP 330/AMST 331
This course will look at the representation of a city and how it has influenced artists. Students will read, listen to, and view a selection of the literature, music, film and art that represent the city from both pre-flooding and current re-building. Reading selections will include examples such as Harper's Weekly (Lafacadio Hearn), The Awakening (Kate Chopin), A Streetcar Named Desire (Tennessee Williams), The Moviegoer (Walker Percy), Why New Orleans Matters (Tom Piazza), A Confederacy of Dunces (John Kennedy O'Toole), New Orleans Sketches (William Faulkner), One Dead in the Attic (Chris Rose).
Film examples such as A Streetcar Named Desire, An Interview with a Vampire, The Curious Case of Benjamin Britton, When the Levees Broke, Treme, Waiting for Godot (in the 9th Ward). Music selections from examples such as Louis Moreau Gottschalk, Jelly Roll Morton, Louis Armstrong, Fats Domino, The Meters, Kermit Ruffins and the Rebirth Brass Band. Art selections will come from a variety of sources such as THE OGDEN Museum of Southern Art and Prospect 1, 2, & 3.
Class Format: seminar
Requirements/Evaluation: will be on active participation, weekly response essays on film viewings, 2 short essays on class topics, a final paper and a contemporary creative project/performance

COMP 331T The Brothers Karamazov (W)
Crosslistings: RUSS 331/COMP 331/ENGL 371
Widely hailed as one of the greatest novels ever written, Dostoevsky's The Brothers Karamazov contains a series of enigmas, not the least of which is precisely who murdered the Karamazov father. In addition to exploring the shared guilt of all four of the brothers Karamazov in the crime of patricide, Dostoevsky poses the most probing questions of his day: Are families tied together merely by blood or by deeper spiritual bonds? Is religious faith possible in an age of reason, science, and technology? Can man's earthly laws ever carry out divine justice? Is humanity prepared to bear the burden of responsibility that comes with freedom? This tutorial will spend an entire semester exploring Dostoevsky's masterwork, and we will read a variety of secondary sources alongside The Brothers Karamazov, including history, philosophy, and literary theory. Our goal will be to understand Dostoevsky's answers to these so-called "accursed questions" through the unique artistic form of The Brothers Karamazov.
Class Format: tutorial
Requirements/Evaluation: evaluation will be based on completion of weekly reading and writing assignments, as well as active engagement during tutorial sessions
Extra Info: may not be taken on a pass/fail basis
Prerequisites: at least one 200-level literature class
Enrollment Preferences: students majoring or considering a major in Russian, Comparative Literature, or English

COMP 333T Narrative Strategies
Crosslistings: ARTS 333/COMP 333
In this tutorial, we will examine the use of narrative in a range of fine art practices, which could include painting, drawing, video, sculpture, installation, public art, and sound art. Students who are interested in telling or referencing stories in their work in some way will be given the opportunity to develop their ideas and skills in a challenging studio class. In addition to intensive projects, we will look at and discuss the work of contemporary artists such as Simpson, Joe Sacco, Lydia Davis, Raymond Pettibon, Todd Solondz, Sophie Calle, Jenny Holzer, and Omer Fast among others. One of the aims of this course is to challenge traditional notions and expectations of narrative. For instance, what could minimally constitute a narrative piece? How do different mediums allow for time to unfold in unexpected ways? How does omission play a powerful role in a narrative? How might the role of the narrator (often so powerful and present in novels and short stories) change in a visual arts context?

This is a studio tutorial with an emphasis on demanding, weekly projects. Students will work both in mediums of their choice and be asked to experiment with new, unfamiliar formats. Readings and screenings will be required in addition to tutorial hours

Class Format: studio tutorial with an emphasis on demanding, weekly projects; students will work both in mediums of their choice and be asked to experiment with new, unfamiliar formats; readings and screenings will be required in addition to tutorial hours

Requirements/Evaluation: evaluation based on assignments, studio performance, class participation, and attendance

COMP 334 Imagining Joseph (W)  
**Crosslistings:** ANTH 334/COMP 334/JWST 334/REL 334

Beloved son, rival brother, faithful servant, dreamer, seer, object of desire, lover, husband, bureaucrat, Joseph is one of the most fully-limned and compelling figures in the Jewish, Christian, and Muslim scriptural traditions. The story of Joseph unfolds over fourteen chapters in the Hebrew Bible, and is the subject of the fourth longest sura in the Qur'an. Through millennia, the story of Joseph has inspired a wealth of interpretations, commentary, apocrypha, re-tellings, and back-story, including an apocryphal book of scripture about Joseph and his wife, Asenath, Sufi poetry about Joseph and Zuleikha (Potiphar’s wife), a trilogy by the 20th century German novelist Thomas Mann, a musical by Andrew Lloyd Weber, and many expressions in Western visual art. The course will explore these various expressions, looking to them for the ways in which Joseph has captured the imaginations of peoples and cultures across time and space. The course will be organized as a collaborative seminar in which the class will read the foundational scriptures together, followed by thematic discussions to which students will contribute insights from their own readings of particular peripheral texts. Students will learn the pleasures of close and intense exegetical reading in approaching the Hebrew Bible and Qur’an, as well as the more expansive pleasures of linking post-scriptural expressions together.

**Class Format:** seminar

COMP 335T Two American Poets: Wallace Stevens and John Ashbery (W)  
**Crosslistings:** AMST 336/ENGL 320/COMP 335

This tutorial focuses on the work of two major American poets who are known for their “difficult” poetry. In some respects, Stevens (1879-1955) and Ashbery (b. 1927) book-end twentieth-century poetry. Stevens is a major Modernist poet, perhaps the most philosophically oriented American poet of the twentieth century, and Ashbery is considered by most critics to be the most important American poet alive. Students will do close readings of their poems (and one play, “Three Travelers Watch a Sunrise”, by Stevens), as well as read their writing on poetry and art. We will discuss the overlaps between Stevens’ and Ashbery’s work and lives—their having grown up in the Northeast and attended Harvard, what some see as the abstractness of their writing, their mastery of tone, among others—but also the differences: Ashbery’s sexuality, his having lived in France, the supposedly more “avant-garde” nature of Ashbery’s work, and so on. Along the way, we will ask questions about the nature of poetic difficulty, of abstraction, of the (lyric) poetic speaker in their works, of poetic tone, of the link between the poem and the world (e.g., in description), of the thinking and philosophizing that poems do. We will also ask about their links to major poetry “movements” (Modernism, the New York School) and pose questions that are rarely asked about their poetry, such as “What are the politics, implicit and explicit, in their poems?” “What are their views about the United States and American society and culture?” “What assumptions about race, gender and class are embedded in their poetry?” And, always, we will be paying close attention to the question of form and language in Stevens’ and Ashbery’s poetry.

**Class Format:** tutorial

The political stakes of creative expression through interdisciplinary methods. This EDI course will critically engage with diversity from the heterogeneous discourses that universalize human experience and asks: how do we resist performance studies and offer an interdisciplinary approach to scholarship in José Esteban Muñoz. This course will engage foundational texts to studies, including readings by scholars including J.L. Austin, Judith Butler, and performance artists including Adrian Piper, Nao Bustamante, and Yoko Ono. Discussions and readings on the performance of everyday life via the work of The Shipment.

This spring course will begin with readings of dramatic literature including Suzan-Lori Park's Venus, David Henry Hwang's M. Butterfly, and Young Jean Lee's The Shipments to analyze literary and staged performance, then continue to discussions and readings on the performance of everyday life via the work of The Shipment.

The course will involve close readings of theoretical and literary texts, which will be presented in-class participation, partnered presentation, and a final paper. All readings in English.

COMP 344 From Hermeneutics to Post-Coloniality and Beyond (D)

Crosslistings: REL 304/COMP 344

This course explores and critiques some of the resources offered by "Theory" for making sense of our contemporary situation, focusing on the nature of interpretation and its role in the construction of the self in a global world. We start with Gadamer's hermeneutics, which offers a classical formulation of the philosophy of liberal arts education, stressing the importance of questioning one's prejudices. Although this approach offers important resources for understanding ourselves in a world of cultural differences, it also has limitations, which we explore through the works of Derrida, Foucault and Said. In this way, we question some of the notions central to understanding modernistic submissive such as identity and difference, suggesting some of the difficulties in the ever more important yet problematic project of knowing oneself. We also suggest that representation is not innocent but always implicated in the world of power and its complexities, particularly within the colonial and postcolonial contexts explored by Said. We conclude with a critique of the constructivist paradigm central to this course done from the point of view of cognitive studies and suggest that the future of "Theory" may well be in a dialogue with the emerging mind sciences. This course, which theorizes the possibilities of cross-cultural understanding, is part of the Exploring Diversity Initiative.

COMP 345 Museums, Memorials, and Monuments: The Representation and Politics of Memory

In the past 25 years, we have seen an extraordinary boom in museum, memorial and monument building around the world. In this class, we will explore what this growth means to cultural practices of memory and global politics. We will explore questions posed by leading scholars in museum and cultural studies such as: Why is there a "global rush to commemorate atrocities" (Paul Williams)? Why do we live in a "voracious museal culture" and how does this impact our ability to imagine the future (Andrew Huyssen)? We look back at history and recent museum controversies. We will analyze debates surrounding memorials and monuments. In addition to our work on institutions, we will also read a number of novels that claim to do the work of museums (Orhan Pamuk's The Museum of Innocence) and that interrupt processes of memorialization (Amy Waldman's The Submission).

Class Format: seminar

Requirements/Evaluation: response papers, case studies and a final essay

Prerequisites: none

SEM   Instructor: Katarzyna Pieprzak

COMP 347T Silence, Loss and (Non)Memory in Twentieth-Century Austria (D) (W)

Crosslistings: GERM 331/COMP 347

Think of Austria and glittering Klimt paintings come to mind, or the majestic Alps of The Sound of Music, or perhaps a melody from Mozart or Strauss plays in the ear. And no wonder: tourism is one of the largest industries in Austria; the nation lives on being seen and heard. But a great deal is invisible and inaudible to the tourist in Austria. In this course we will explore the hidden core of Austrian identity from 1938 on, the so-called Anschluss (annexation) by the Nazis, and the (non)memory of the horrors that ensued. We will probe the idiosyncratic mixture of trauma and guilt that characterizes Austria today through the work of contemporary authors and filmmakers, focusing on three: Elisabeth Reichtar, whose fiction sensitively but relentlessly uncovers secrets that have become part of the fabric of forgetting in the Austrian psyche; Marcus Carney, born to an Austrian mother and an American father, who unblinkingly documents his mother's and grandmother's attempts (or non-attempts) to come to terms with their family's Nazi past, not looking away from his own complex relationship to all involved; and finally, Gerhard Roth, the author of the seven-text series The Archives of Silence, a monumental collection of photos, essays and novels demonstrating the fact, as Roth confessed to in an interview, that "we all are just as blind and deaf to the whole picture as the blind and deaf are to the usual communications of our society." Psychoanalytic theory from Freud to recent discussions of the transgenerational transmission of trauma and perpetrator guilt will provide a conceptual framework for the literary works.

The tutorial may be taken in German or English. For those who do it in German, all literary readings and at least 3 of the papers will be in German. This tutorial will fulfill the Exploring Diversity Initiative, because it involves a close examination of critical perspectives on the exercise and denial of power, namely complicity in the Holocaust and resistance to acknowledging that complicity. The investigation of Austria's curious combination of guilt and trauma can be extended to our own context; in fact, the Allies in 1944 published a declaration that Austria was the "first victim of Hitler," clearly demonstrating the continuing principle that not looking at the transgressions of oneself and one's own kind is a feature of those in power.

Class Format: tutorial

Requirements/Evaluation: five 5-page papers, one revision, discussion

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

TUT   Instructor: Gail Newman

Crosslistings: AMST 342/COMP 348

We often discuss US history in terms of leaving home: the escape from an old world and the discovery of a new one, the journey from a civilized east to a western frontier, the violent displacement of indigenous peoples and Africans from their native lands. In contrast to these narratives, this course is about staying home. It will explore homes as both actual structures and imaginary places in the work of several nineteenth-century American novelists, poets, and playwrights. We will think about the home as a real space whose walls, windows, and doors organized domestic life—how and when individuals worked, ate, slept, had sex, were enslaved, raised children, cared for the sick, and died—and study the home's functions as a metaphor for big, abstract ideas about privacy and politics, individualism and nationhood, escape and return, freedom and oppression. Through careful examination of fiction and personal narratives, as well as poetry, photographs, and domestic manuals, the class will consider what it meant to be "at home," what it meant to be imprisoned there, and what it meant to run away. The syllabus will include writing by J.H. Banka, Gustave de Beaumont and Alexis de Tocqueville, Emily Dickinson, Frederick Douglass, Charlotte Perkins Gilman, Harriet Jacobs, Herman Melville, Florence Nightingale, Edgar Allan Poe, Jacob Riis, Henry David Thoreau, Mark Twain and Edith Wharton, as well as secondary materials by Gaston Bachelard, Russ Castronovo, Michel Foucault, Diana Fuss, Caleb Smith, and others (decoration).

COMP 349(S) Max Weber & Critical Theory or Rationalization & Its Discontents
Crosslistings: REL 350/SOC 350/COMP 349
We live in an age characterized by unprecedented technological and scientific progress—we have unraveled the building blocks of life, witnessed the birth of stars at the edge of the galaxy, and harnessed the power of the atom—and yet modern life often appears fundamentally meaningless and lacking in ultimate value—we work, we eat, we excrete, we die, perhaps in the interim, shuffling paperwork, sucking up to our boss, and asking ourselves, "What kind of dining set defines me as a person?" Few thinkers have explored the roots of this modern ennui as thoroughly as Max Weber, a German sociologist often regarded as the single most important social theorist of the twentieth century. Weber wanted to know why it was European civilization in particular that gave rise to this rationalization produced not just mastery over nature, but also "the disenchantment of the world", the dehumanization of the professions, and the secularization of religion. The second half of the course will follow in Weber's footsteps by studying his theory of rationalization and by exploring it in different social spheres, such as the economy, the law, the professions, and the secularization of religion. The second half of the course will look at Weber's legacy in Critical Theory. It will show how thinkers such as Theodor Adorno, Georges Bataille, Jürgen Habermas, Max Horkheimer, Michael Löwy, and Alasdair MacIntyre suggested various lines of thought in psychology, law, sociology, and philosophy. 

Class Format: seminar
Requirements/Evaluation: active participation in class discussions, an oral final presentation, several short writing assignments, a midterm paper and a final paper

COMP 354(F) The Literary Afterlife
Crosslistings: ENGL 319/COMP 354
What do writers mean when they say that they will live on after death through their books? In this course, we will explore the long history of thinking about literature as a way to compensate for mortality, and we will compare the literary afterlife to religious and philosophical versions of eternity. Many of the writers on our syllabus were anxious about the compatibility of the pursuit of worldly fame and eternal salvation. We will study how the sense of a conflict between the two afterlives changed over time: from the recovery of pagan antiquity during the Renaissance, across the theological transformations of the Reformation, to the consequences of print. The course deals with some of literature's greatest ambitions—to cheat death, to make a lasting contribution to human culture—but we will often find ourselves caught in an undertow of skepticism. Is writing any less susceptible to decay than human bodies are? If so, is literary accomplishment worth the risk of one's soul? Authors and texts will include Sappho, Ovid, Lucrèce, Ecclesiastes, Augustine, Petrarch, Julian of Norwich, Montaigne, Shakespeare's Hamlet and Richard II, Jonson, Donne, and Milton.

Class Format: seminar
Requirements/Evaluation: one 7-page paper, one 12-page paper, in-class presentations, thoughtful participation in discussions
Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Language exam, or a score of 6 or 7 on the Higher Level IB English exam

COMP 350 Cervantes' "Don Quixote" in English Translation
Crosslistings: COMP 350/RLSP 303
A close study of one of the most influential and early European novels. Don Quixote by Miguel de Cervantes (1547-1616 C.E) was a hit in its day in the seventeenth century, and has continued to influence artists and thinkers since. Moving between humorous and serious tones, Cervantes takes on several issues in the Quixote: the point of fiction in real life, the complications of relationships between men and women, the meaning of madness, the experiences of religious existence, the shapes of friendship, and the task of literary criticism, just to name a few. We will read the book in a fine modern English language translation, and set it in several relevant contexts to better understand its original intellectual horizon—seventeenth-century Spain—as well as the reasons for continuing relevance.

Class Format: seminar
Requirements/Evaluation: active participation, three short papers, and a final project designed in consultation with the instructor
Extra info: may not be taken on a pass/fail basis
Prerequisites: any 200-level literature course in foreign languages, COMP, or ENGL, or permission of the instructor.

COMP 352 Writing after the Disaster: The Literature of Exile
Crosslistings: COMP 352/JWST 352/RLSP 352
This course will consider different kinds of works (poetry, memoirs, fiction, essays) written by authors forced to live in exile because of political and/or religious persecution. Our point of departure will be the paradigmatic expulsion and subsequent diaspora of the Jews of Spain and Portugal. Most assignments, however, will be drawn from twentieth century texts written during, or in the wake of, the massive destruction and displacements brought about by the Spanish Civil War and World War II. How is the life lost portrayed? How are the concepts of home and the past intertwined? What kind of life or literature are possible for the deracinated survivor? We will discuss the role of writing and remembrance in relation to political history, as well as in the context of individual survival. Readings might include works by Nuñez de Reinoso, León, Cernuda, Semprún, Benjamin, Nancy, and Blanchot.

Class Format: seminar
Requirements/Evaluation: active participation in class discussions, an oral final presentation, several short writing assignments, a midterm paper and a final paper

COMP 355(S) Contemporary Theatre and Performance
Crosslistings: THEA 345/ENGL 349/COMP 355/AMST 345
As Gertrude Stein once remarked, "The hardest thing is to know one's present moment." What is going on in theatre and performance today? What are the hot topics? Who are the writers, performers, and directors of our recent past and present? This seminar course will consider both experimental and mainstream drama and performance and mainstream performance and performance primarily in the U.S. from the past twenty years, focusing on topics such as: postmodern performance, theatre of images, auteur-directors, new realism, identity theatre, eco-theatre, performance art, postdramatic theatre, devised performance, virtuosic theatre, immersive theatre, social practice, neo-collectivism, and more. As part of the seminar, students will conduct individual research on selected topics and present their findings through oral reports. We will take a trip to New York to see a show and speak with contemporary theatre makers. Artists and groups concerned may include: The Wooster Group, Richard Foreman, Robert Wilson, Meredith Monk, Edward Albee, Maria Irene Fornes, Sam Shepard, Caryl Churchill, Tony Kushner, Suzan-Lori Parks, Sarah Kane, Will Eno, Richard Maxwell, Young Jean Lee, Annie Baker, Branden Jacobs-Jenkins, Quiara Alegria Hudes, Anne Washburn, Elevator Repair Service, Nature Theatre of Oklahoma, The Civilians, and many others. As a final project, students will work individually or in small groups to create a script or short performance that addresses the question: "What is the most important story to be telling right now?"

Class Format: seminar
Requirements/Evaluation: evaluation will be based on written and dramaturgical-based assignments, an oral presentation, as well as in-class discussions and a final creative writing and/or performance project
Prerequisites: an introductory course in THEA, ENGL, ARTH, COMP, or other

Enrollment Preferences: Theatre, Art History English or Comparative Literature majors
Enrollment Limit: 18
Expected Class Size: 16
class Notes: meets Division 1 requirement if registration is under THEA, COMP or ENGL; meets Division 2 requirement if registration is under AMST.

COMP 358(S) Across the Oceans, Across the Seas (D) (W)
Crosslistings: ENGL 358/COMP 358/AFR 358

This course will consider literature that depicts the circulation of peoples and commodities (and often people as commodities) across the world's oceans in the 19th and 20th centuries. We will consider such issues as the microcosm of the ship, the slave trade and the Middle Passage, indentured servitude and the Indian Ocean, the ocean as a space of flux and transformation, and figures such as the maroon, the castaway, the lascar, and the pirate. We will read texts by Herman Melville, Claude McKay, Derek Walcott, Kamau Brathwaite, and Amitav Ghosh. Secondary and theoretical texts will include works by Paul Gilroy, C.L.R. James, Edward Said, and Khal Torabully. The course will contribute to the College's Exploring Diversity Initiative by exploring cultural encounters and transformations in the transitional, transnational space of the world ocean.

Class Format: seminar
Requirements/Evaluation: participation in discussion and in a class blog, and 20 pages of writing distributed over three papers
Extra Info: may not be taken on a pass/fail basis
Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam
Enrollment Preferences: English majors
Enrollment Limit: 25
Expected Class Size: 20
Distribution Notes: meets Division 1 requirement if registration is under ENGL or COMP; meets Division 2 requirement if registration is under AFR

COMP 360 The Body as Book: Memory and Reenactment in Dance & Theater
Crosslistings: THEA 360/DANC 303/COMP 360

What does it mean to conceive of the body as a book? This unique interdisciplinary studio/seminar course examines how dance and theater channel, preserve and transmit stories and cultural memory through individual and collective bodies. Dance and theater are traditionally defined as ephemeral arts, bounded by the limits of linear time and space. Yet, as Rebecca Schneider writes, “time is decided, folded and fraught.” Repetition and reenactment are forms of remembering, and performance is often not what disappears but what remains. How do we pass on knowledge in visceral and affective ways? What is a “repertoire”? What are the benefits and risks of continuity over time?

Taught as part of the Books Unbound curricular initiative, and in conjunction with the opening of the Sawyer-Stetson Library, the course will complete a project in which the class “embodies” material, first by exploring stories embodied by individual members of the class, and then by translating them through performance by the collective, culminating in dance/theatre pieces performed in the new library. Over the term, we will also study modern and contemporary American artists, such as: Martha Graham, The Wooster Group, Alvin Ailey, Meredith Monk, Anne Bogart, Ralph Lemon, Elevator Repair Service, Bill T. Jones, Marina Abramovic, Jose Limon, and Suzan-Lori Parks. We will also collaborate with professional artists invited to Williams to create and present dance and theatre pieces in the new library.

Class Format: studio/seminar
Requirements/Evaluation: Evaluation will be based on collaborative-based project work, individual research, writing and final performances
Prerequisites: no prior dance or theatre training is required
Enrollment Preferences: students majoring in Dance, Theatre, American Studies and Art
Enrollment Limit: 14
Expected Class Size: 10

STU Instructor: Amy Holzapfel

COMP 362T(S) Story, Self, and Society (W)
Crosslistings: SOC 362/COMP 362

From The Moth to StoryCorps to Williams College’s own Storytime, stories are ubiquitous in contemporary culture. Indeed, sociologists have argued that social life is itself “storytold”—that we locate ourselves within familiar narrative structures, using them to “construct” identities and “tell” our lives. Stories, in this view, are not only the stuff of literature, but also the very fabric of social life: the foundation for individual and collective identities. This tutorial will grapple with the role of stories and storytelling in modern social life. What role do stories play in constituting personal identity? What cultural templates structure the stories we tell? Why are memoirs so popular, and how can we explain the more recent resurgence of interest in oral forms of storytelling? Specific topics will include illness narratives, confessional culture, digital stories, oral history, and memoir. As a capstone exercise, each student will construct a narrative analysis focused on a memoir of his/her choosing. The course will conclude with a final seminar meeting during which each student will tell a story of his/her own, and we will work together to consider how the theories we have encountered throughout the semester might illuminate our own narratives.

Class Format: tutorial
Requirements/Evaluation: 5-page paper every other week; comments on the partner’s paper in alternate weeks
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none
Enrollment Preferences: Anthropology and Sociology majors
Enrollment Limit: 10

COMP 363(F) Thinking Critically: Major Debates in Modern Arab Thought (W)
Crosslistings: ARAB 330/COMP 363

The aim of this course is to introduce students to some of the major debates in Arab intellectual history in the 20th century and the ways in which they have shaped Arabic Studies as a discipline. We will read a range of texts from History, Religion, Politics, Anthropology, Cultural Studies, Literature, Gender, Sexualities and Women Studies, in order to gain a deeper insight into critical debates about nationhood, modernity, post-coloniality, democracy, feminism, social, political and religious movements, Orientalism and post-Orientalism, and the making of modern Arab subjectivities. In addition to a course packet with selected texts and essays, students are required to read the following books: Ibrahim Abu-Rabi’, Contemporary Arab Thought: Studies in Post-1967 Arab Intellectual History (2004), Elizabeth Suzanne Kassab, Contemporary Arab Thought: Cultural Critique in Comparative Perspective (2010) & Tank Sabry, Arab Cultural Studies: Mapping the Field (2012).

Class Format: seminar
Requirements/Evaluation: active class participation, three short papers (3-5 pages), and a final 7- to 10-page expansion and rewrite
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none
Enrollment Preferences: majors or prospective majors in Arabic Studies and Comparative Literature
Enrollment Limit: 19
Expected Class Size: 15

COMP 370 Displaying, Collecting and Preserving the Other: Museums and French Imperialism
Crosslistings: RLF/AFR 370/COMP 370

This course will explore relationships between culture and imperialism in France by examining how the colonial “Other” has been conceived, displayed and collected in French museums, world’s fairs and galleries from the 19th century to the present. Through readings in museum history and theory, we will explore the imperial histories of the Louvre and the Musée de l’Homme, the colonial fairs of Paris and the Colonial Exposition of 1931 at the World Fair in Paris and the Musée du Quai Branly, the Institut du Monde Arabe and the Cité nationale de l’histoire de l’immigration. In addition to readings and discussion, the class will engage in a semester-long group project to design a new museum of French history and identity. The group will present all aspects of their museum including location, design, exhibit concept, narrative, and more. This course will be conducted in English. For students seeking RLF credit, select readings will be in French, and written work will be in French.

Class Format: seminar
Requirements/Evaluation: active class participation, response papers, 2 short essays and a final group project
Prerequisites: for students taking the course as RLF: RLF 201 or above, or permission of instructor; for students taking the course as COMP or AFR: no prerequisites
Enrollment Preferences: French and Comparative Literature majors, and Africana Studies concentrators
Enrollment Limit: 15
Expected Class Size: 15
Distribution Notes: meets Division 1 requirement if registration is under RLF, or COMP; meets Division 2 requirement if registration is under AFR

COMP 374 Shadows of Plato's Cave: Image, Screen, and Spectacle

Crosslistings: PSCI 374/COMP 374/ARTH 505

In Book VII of the Republic, Socrates famously asks his interlocutors to picture people living in a cave; bound in chains and able to see only shadows on the wall. Thus begins the presentation of perhaps the most influential metaphor in the history of philosophy. One might even claim that when Plato deployed the metaphor in an extended allegory, he constituted the fields of both philosophy and political theory. In repeatedly examining the allegory over the centuries, later thinkers have elaborated their approaches not only to Plato but also to the nature of politics and the tasks of thinking. This class begins with the Republic's cave and other key Platonic discussions of appearances, visual representation, and (literal and metaphoric) seeing, asking how Plato's approaches to image, politics, and theory/philosophy shape each other.

Building on those inquiries, we next take up important twentieth and twenty-first century returns to the cave, engaging such figures as Heidegger, Strauss, Arendt, Derrida, Irigaray, Rancière, and Badiou. Finally, we examine recent theories of screen and spectacle—read both for their resonances with and departures from debates over the Platonic legacy—and case studies in the politics of both military and racial spectacles in the U.S. The question of what is an image and what images do will run from the beginning of course to the end. Beyond the authors mentioned, readings may include such authors as Allen, Bruno, Clark, Debord, Friedrich, Goldsby, Josellit, Mitchell, Nightengale, Rodowick, Rogn, Silverman, and Virilio. Insofar as it fits student interest, we will also explore the cave's considerable presence in visual culture, ranging from Renaissance painting through such recent and contemporary artists as Kelley, Demand, Hirschhorn, Kapoor, Sugimoto, and Walker, to films such as The Matrix.

Class Format: seminar
Requirements/Evaluation: regular glow posts and three 7- to 8-page essays or one 20-page final paper
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: one prior course in political theory, art history, cultural/literary theory, or philosophy or permission of the instructor
Enrollment Preferences: majors in political science, comparative literature, and art history, as well as students (up to 4) in the graduate program in art history

COMP 375 New Asian American, African American, Native American, and Latina/o Writing (D)

Crosslistings: AMST 403/COMP 375/ENGL 375/AFR 403/LATS 403

Critics reading minority writing often focus on its thematic—i.e., sociological—content. Such literature is usually presumed to be inseparable from the "identity/body of the writer and read as autobiographical, ethnographic, representative, or exceptional. At the other end of the spectrum, avant-garde writing is seen to concern itself "purely" with formal questions, divorced from the socio-historical (and certainly not sullied by the taint of race). In the critical realm we currently inhabit, in which "race" is opposed to the "avant-garde," an experimental minority writer can indeed seem an oxymoron. In this class we will closely read recent work by Asian American, African American, Native American and Latina/o writers which challenges conceptions about ethnic literature, avant-garde writing, genre categorization, among other things. The writing done by these mostly young, mostly urban, poets and fiction writers is some of the most exciting being written in the United States today; their texts push the boundaries of aesthetic form while simultaneously engaging questions of culture, politics, and history. Reading them forces us to re-think our received notions about literature. Authors to be read include Will Alexander, Shinwéh Bitsui, Monica de la Torre, Sesshu Foster, Renee Gladman, Bhanu Kapil, Tan Lin, Tao Lin, Ed Roberson, James Thomas Stevens, Roberto Tejada, and Edwin Torres.

Class Format: seminar/discussion
Requirements/Evaluation: evaluation will be based on either one 16- to 18-page seminar paper or two shorter papers (one 7-8 pages and one 9-10 pages), short response papers, participation, and quizzes.
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

COMP 397 (F) Independent Study: Comparative Literature

Crosslistings: AMST 397/COMP 397

What is an historical event, and how do such events differ from one another? How are historical events remembered? How do they shape the world? This seminar will attempt to answer these questions through readings of works of philosophy, poetry, history, prose fiction, film, photography, and cultural criticism that reflect upon the nature of history. Though answers will be multiple, course reading and discussion will in general strive to determine the consequences of understanding history as a site in which reading and writing, experience and narration, and action and interpretation interpenetrate. Readings may include works by Burke, Hegel, Charlotte Smith, de Tocqueville, Marx & Engels, Woolf, and Benjamin.

Class Format: seminar
Requirements/Evaluation: three papers (two 6 and one 8-10 page) and weekly posts
Extra Info: may not be taken on a pass/fail basis
Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

COMP 380 Literary and Critical Theory in the Twentieth Century

Crosslistings: ENGL 380/ENGL 370

From the rise of modern literary criticism around 1900 to the explosion of high theory in the 1980s and 1990s, the twentieth century witnessed an international flowering of new ideas about how to interpret art and literature: Russian Formalism, American New Criticism, French Structuralism and Poststructuralism, and the postcolonial, the posthuman. What are the ideas associated with these different movements, and how are they connected? Does each represent a radical break with previous ways of reading, or do they actually build on one another and evolve in a systematic way? The course will focus on a very careful reading of essays representing major 20th-century critical schools (and a couple of their earlier precursors), by critics like Plato, Schiller, Shklovsky, Richards, Barthes, Derrida, De Man, Beauvoir, Butler, and Said. Written assignments will encourage you to parse these theories carefully and apply them to the literary texts that most interest you: prose or poetry from any time and place; film, visual art, or architecture; music, new media, or digital media, etc.

Class Format: seminar
Requirements/Evaluation: attendance and active participation, several short response assignments, final project consisting of a scripted oral presentation and a 15-page final paper
Extra Info: may not be taken on a pass/fail basis
Prerequisites: any 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Expected Class Size: 15
Distributional Requirements: Division 1

Other Attributes: ENGL Literary Histories B
COMP 401(F) Senior Seminar: Stories, Silence, and Power (W)
A study carried out by political scientists at Dartmouth and Exeter confirms the centrality of narrative to our way of understanding the world. “We all have any number of stories we tell ourselves about the world,” they write, “and our dependence on those stories is so strong that we actively resist anything that might turn a fall theme into one of our own.” (qtd in Chronicle of Higher Education 1/27/16)

What kinds of stories become our master narratives? Perhaps more importantly, what is the nature of the hold they have over us? Finally, is it possible to change our master narratives? The seminar will examine all of these questions through close readings of literary texts from multiple traditions, as well as narratological, psychoanalytic, and post-colonial theory.

The course will move from the individual level—including the stories that “hysterical” bodies tell and stories that enact the transmission of trauma across generations—to a larger-group level, including the narratives of superiority that are told in the interest of domination and those that resist them. Finally, we will engage with the silences that exist between the lines of our prevailing stories. Silence can be “holding a secret—a tacit lie;” it can be a “maleness caused by trauma,” or a “silence due to not learning to speak.” It can also be “the only sane response” to catastrophe, or a silence that exists “so that the un-said can be” (John Muller, personal communication).

Isak Dinesen famously wrote, “Where does one read a deeper tale than on the perfectly printed page of the most precious book? Upon the blank page.”

Class Format: seminar
Requirements/Evaluation: active participation in discussion, some short writing assignments, and a 5-page conference paper that will be revised into a 10-page final paper
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: one 300- or 400-level literature course
Enrollment Preferences: Comparative Literature majors
Enrollment Limit: 16
Expected Class Size: 10

COMP 402 Before We Were Queer: Gay and Lesbian Lives before 1990 (D)
Crosslistings: WGSS 404/COMP 402
Reclaimed by activists in the 1990s as an expression of defiance and pride, the word queer has come to be identified with a wide range of lesbian, gay, bisexual, and transgender identities, as well as entire fields of intellectual theory, popular culture, and political engagement. The past 25 years of queer studies, media, and activism (1990-2015) have led to unprecedented visibility and great advances for many LGBT people, especially in North America and Western Europe; from breakthroughs in the treatment of HIV/AIDS, to victories for Gays in the Military, Employment Non-Discrimination, and Marriage in 16 US states and another 16 countries around the world. For many, however, this new era of queer life during the past 2 decades has eclipsed the time before, when those who were pejoratively labeled as queer struggled with homophobic discrimination, isolation, and violence, by seeking one another out in major cities, specific neighborhoods, underground bars, and in the narrative spaces of novels and films. As a result, many young people born after 1990 are largely unaware of these struggles that predate their lives, the internet, and social media, and several LGBT leaders worry that this has left many 18-25 year olds with a false sense of security, a decreasing interest in political engagement, alarming new rates of sexually transmitted infections, and a growing disinterest in queer social spaces beyond the virtual. In this course, we will explore the literary, cinematic, and cultural history of gay and lesbian lives before the 1990s, and consider what has been gained and lost.

Topics to include the early twentieth-century isolation of the closet, (1890s-1950s), the formation of clandestine gay and lesbian communities during and after World War II (1940s-60s), the Stonewall riots and the first decade of Gay Liberation (1969-1979), and the devastating losses and community responses to AIDS (1979-1995). For its critical engagement with cultural diversity, comparative investigation of gender, sexuality, and ethnicity, and historical analysis of queer identities, this course fulfills the goals of the Exploring Diversity Initiative.

Class Format: seminar
Requirements/Evaluation: active participation, two short papers, an oral presentation, and a final paper
Extra Info: may not be taken on a pass/fail basis
Prerequisites: WGSS 101 or 202, or another 200-level or 300-level course in WGSS, COMP, HIST, ENGL, or AMST, or other courses focusing on gender and sexuality. Email Prof. Martin (bmartin@williams.edu) to inquire
Enrollment Preferences: Women's Gender & Sexuality Studies and Comparative Literature majors, as well as History, English, and American Studies majors. Other sophomores, juniors, and seniors may email Prof Martin (bmartin@williams.edu) and explain your interest in the course
Enrollment Limit: 16
Expected Class Size: 16

COMP 403(F) Topics in Advanced Arabic I: Contemporary Arab Cinema
Crosslistings: ARAB 401/COMP 403
The Arab world is a fascinating region with rich traditions and vibrant societies. Through an exploration of contemporary Arab cinema, this course will introduce you to issues in modern Arab societies that represent the diversity of the region as well as the shared concerns and challenges. We will analyze select movies and texts, exploring how Arab filmmakers represent social, political, and economic change and realities in their societies. Some topics include nationalism and national identity, gender identities, civil wars, religion, social justice, and the recent revolts. The course will be conducted in Arabic, and we will employ linguistic and paralinguistic analyses of the movies as a means to explore modern Arab thought and cultures.

COMP 410(F) Black Literary and Cultural Theories
Crosslistings: AMST 410/COMP 410/ENGL 410/AFR 410
This course will examine the writings of black twentieth- and twenty-first-century Anglophone and Francophone literary and cultural theorists in the African diaspora. We will begin with Sojourner Truth and W.E.B. Du Bois and end with current debates between the "Afro-Pessimists" and "Afro-Optimists." We will be reading writers from the United States, Britain, Africa, the Caribbean, and Europe, moving through the writings of the Harlem Renaissance, Ngritude, Pan-Africanism, the Black Arts Movement and Black Panthers, the Black Atlantic, and black feminism and queer studies. We will come to see that there is no easy separation between questions of politics (e.g., anti-colonialist, anti-racist, anti-capitalist) and those of aesthetics and poetics.

Class Format: seminar
Requirements/Evaluation: midterm, participation (attendance, discussions, GLOW posts), short paper (4-5 pp.), two response papers (2-3 pp. papers), final project (10-12 pp.: analytical paper)

COMP 465 Race and Abstraction
Crosslistings: AMST 465/AFR 362/COMP 465/ENGL 326
Minority artists—writers and visual artists mainly and, to a lesser degree, musicians—face a difficult "double bind" when creating works of art. the expectation is that they, like their racially marked bodies, will exhibit their difference by means of concrete signifiers (details, tropes, narratives, themes) of racial difference. Thus, the work is judged primarily in terms of its embodied sociological content (material, empirical) and not by "abstract" standards of aesthetic subtlety, philosophical sophistication, and so on. At the same time, in the popular and academic imaginary, minority subjects and artists poets occupy a single abstract signifying category—homogeneous, undifferentiated, "other," marginalized, non-universal—while racially "unmarked" (white) artists occupy the position of being universal and individual at once. The irony, of course, is that, say, an African American poet's being read as an abstract signifier does not mean that the black subject or writer is seen as capable of engaging in abstract ideas. This course will ask questions about the problem of race and abstraction by looking at the work of various African American and Asian American writers, visual artists and musicians—including Will Alexander, Mei-mei Benssenbrugge, David Hammons, Yayoi Kusama, Tan Lin, Nathaniel Mackey, and Cecil Taylor—as well as critics. We will pay particular attention to formally experimental works. This course will ask questions about the problem of race and abstraction by looking at the work of various African American and Asian American writers, visual artists and musicians—including Will Alexander, John Keene, Mei-mei Benssenbrugge, John Yau, Cecil Taylor, David Hammons, and Yoko Ono—as well as critics. We will pay particular attention to formally experimental works.

COMPUTER SCIENCE (DIV III)
Chair: Associate Professor BRENT HEERINGA

Computers and computation are pervasive in our society. They play enormously important roles in areas as diverse as education, science, business, and the arts. Understanding the nature of computation and exploring the great potential of computers are the goals of the discipline of computer science. A sample of the areas of research investigated by the Williams Department of Computer Science alone illustrates the vast range of topics that are of interest to computer scientists and computing professionals today. This includes: the use of computer-generated graphic images in the arts and as a tool for visualization in the sciences and other areas; the protocols that make transmission of information over the Internet possible; the design of revolutionary new computer languages that simplify the process of constructing complex programs for computers; the development of machine learning algorithms that can extract useful and even novel information from data that is too complex for humans to analyze; algorithms that can solve problems that were previously too hard to solve in a reasonable amount of time, just by giving up a little bit of optimality in the solution; the investigation of machine architectures and specific hardware aimed at making computing fast.

The department recognizes that students’ interests in computer science will vary widely. The department attempts to meet these varying interests through: (1) the major; (2) a selection of courses intended for those who are interested primarily in an introduction to computer science; (3) recommended sequences for the non-major who wants a more extensive introduction to computer science in general or who seeks to develop some specific expertise in computing for application in some other discipline.

MAJOR

The goal of the major is to provide an understanding of algorithmic problem solving as well as the conceptual organization of computers and complex programs running on them. Emphasis is placed on the fundamental principles of computer science, building upon the mathematical and theoretical ideas underlying these principles. The introductory and core courses build a broad and solid base for understanding computer science. The more advanced courses allow students to sample a variety of specialized areas including graphics, artificial intelligence, computer architecture, networks, compiler design, and operating systems. Independent study and honors work provide opportunities for students to study and conduct research on topics of special interest.

The major in Computer Science equips students to pursue a wide variety of career opportunities. It can be used as preparation for a career in computing, for graduate school, or to provide important background and techniques for the student whose future career will extend outside of computer science.

MAJOR REQUIREMENTS

Required Courses in Computer Science
A minimum of 8 courses is required in Computer Science, including the following:

Introductory Courses
Computer Science 134 Introduction to Computer Science
Computer Science 135 Diving into the Deluge of Data
Computer Science 136 Data Structures and Advanced Programming

Core Courses
Computer Science 237 Computer Organization
Computer Science 256 Algorithm Design and Analysis
Computer Science 334 Principles of Programming Languages
Computer Science 361 Theory of Computation

Elective Courses
Two or more electives (bringing the total number of Computer Science courses to at least 8) chosen from 300- or 400-level courses in Computer Science. At least one of these must be a course designated as a PROJECT COURSE. Computer Science courses with 9 as the middle digit (reading, research, and thesis courses) will normally not be used to satisfy the elective requirements. Students may petition the department to waive this restriction with good reason.

Required Courses in Mathematics
Mathematics 200 Discrete Mathematics
and any other Mathematics or Statistics course at the 200-level or higher
Students considering pursuing a major in Computer Science are urged to take Computer Science 134 or 135 and to begin satisfying their mathematics requirements early. Note in particular that Discrete Mathematics covers material complementing that in the introductory courses (Computer Science 134/135 and 136) and is a prerequisite for many advanced courses.

Students who take Computer Science 102T, 107, or 109 may use that course as one of the two electives required in Computer Science. Those who count Computer Science 109 toward the major must select an elective different from Computer Science 371 (Computational Graphics) for their project course. Computer Science 102T, 107, 109, 134, and 135 are not open to students who have taken a Computer Science course numbered 136 or higher.

To be eligible for admission to the major, a student must normally have completed Computer Science 136 as well as Discrete Mathematics by the end of the sophomore year. A second Mathematics course at the 200-level or higher must be completed by the end of the junior year. Students are urged to have completed two of the four core courses (Computer Science 237, 256, 334, and 361) by the end of the sophomore year and must normally have completed at least three out of the four core courses by the end of the junior year.

All computer science majors must attend at least twenty Computer Science Colloquia. Juniors and seniors are encouraged to attend at least five during each semester they are present on campus.

With the advance permission of the department, two appropriate mathematics or statistics courses may be substituted for one Computer Science elective. Appropriate mathematics classes are those numbered 300 or above, and appropriate statistics courses are those numbered 200 or above. Other variations in the required courses, adapting the requirements to the special needs and interests of the individual student, may be arranged in consultation with the department.

LABORATORY FACILITIES

The Computer Science Department maintains two departmental computer laboratories for students taking Computer Science courses, as well as a lab that can be configured for teaching specialized topics such as robotics. The workstations in these laboratories also support student and faculty research in computer science.

THE DEGREE WITH HONORS IN COMPUTER SCIENCE

The degree with honors in Computer Science is awarded to students who have demonstrated outstanding intellectual achievement in a program of study extending beyond the requirements of the regular major. The principal considerations in recognizing a student for the degree with honors will be: mastery of core material, ability to pursue independent study of computer science, originality in methods of investigation, and creativity in research. Honors study is highly recommended for those students with strong academic records in computer science who wish to attend graduate school, pursue high level industrial positions in computing, or who would simply like to experience research in computer science.

Prospective honors students are urged to consult with their departmental advisor at the time of registration in the spring of the sophomore or at the beginning of the junior year to arrange a program of study that could lead to the degree with honors. Such a program normally consists of Computer Science 493 and 494 and a WSP of independent research under the guidance of a Computer Science faculty member, culminating in a thesis that is judged acceptable by the department. The program produces a significant piece of written work and often includes a major computer program. All honors candidates are required to give an oral presentation of their research in the Computer Science Colloquium in the spring of the senior year.

Students considering honors work should obtain permission from the department before registering in the fall of the senior year. Formal admission to candidacy occurs at the beginning of the spring semester of the senior year and is based on the promise that the student will complete the necessary units of honors work. Recommendations for the degree with honors will be made for outstanding performance in the three honors courses. Highest honors will be recommended for students who have displayed exceptional ability, achievement, or originality.

INTRODUCTORY COURSES

Computer Science 134 and 135 provide an introduction to computer science with a focus on developing computer programming skills. These skills are essential to most upper-level courses in the department. As a result, Computer Science 134 and 135 together with Computer Science 136, are required as a prerequisite to most advanced courses in the department. Those students intending to take several Computer Science courses are urged to take 134 or 135 early.

Those students interested in learning more about exciting new ideas in computer science, but not necessarily interested in developing extensive programming skills, should consider electing Computer Science 102 (The Socio-Techno Web, 107 Creating Games, or 109 The Art and Science of Computer Graphics).

Students with significant programming experience should consider electing Computer Science 136 (see “Advanced Placement” below). Students are always welcome to contact a member of the department for guidance in selecting a first course.

STUDY ABROAD

Study abroad can be a wonderful experience. Students who hope to take computer science courses while abroad should discuss their plans in advance with the chair of the department. Students who plan to study away but do not expect to take courses toward the major should work with the department to create a plan to ensure that they will be able to complete the major. While study abroad is generally not an impediment to completing the major, students should be aware that certain computer science courses must be taken in a particular sequence as one of the two electives for the major in Computer Science. Students who wish to discuss their plans are invited to meet with any of the faculty in Computer Science. You can find general study away guidelines for Computer Science here.

ADVANCED PLACEMENT

Students with an extensive background in computer science are urged to take the Advanced Placement Examination in Computer Science. A score of 4 or better on the exam is normally required for advanced placement in Computer Science 136.

Students who wish to be placed in Computer Science 136 but who have not taken the Advanced Placement Examination should consult with the department. Such students should have had a good course in computer science using a structured language such as Java.

PLANS OF STUDY FOR NON-MAJORS

The faculty in Computer Science believes that students can substantially enrich their academic experience by completing a coherent plan of study in one or more disciplines outside of their majors. With this in mind, we have attempted to provide students majoring in other departments with options in our department’s curriculum ranging from two-course sequences to collections of courses equivalent to what would constitute a minor at institutions that recognize such a concentration. Students interested in designing such a plan of study are invited to discuss their plans in detail with a member of the faculty. To assist students making such plans, we include some suggestions below.

Students seeking to develop an extensive knowledge of computer science without majoring in the department are encouraged to use the major requirements as a guide. In particular, the four core courses required of majors are intended to provide a broad knowledge of topics underlying all of computer science. Students seeking a concentration in Computer Science are urged to complete at least two of these courses followed by one of our upper-level electives. Such a program would typically require the completion of a total of five Computer Science courses and one course in discrete mathematics.

There are several sequences of courses appropriate for those primarily interested in the applications of computer science to other fields. For general programming, Computer Science 134 or 135 followed by 136 and 256 will provide students with a strong background in algorithm and data structure design together with an understanding of issues of correctness and efficiency. Students taking these courses are encouraged to take Computer Science 134 or 135 at a minimum, and should also consider Computer Science 136 and 256. The sequence of courses Computer Science 109 and 134 or 135 would provide sufficient competence in computer graphics for many students interested in applying such knowledge either in the arts or sciences. For students requiring more expertise in the techniques of computer graphics, Computer Science 136 and 371 could be added to form a four-course sequence.

The options, of course, many other alternatives. We encourage interested students to consult with the department chair or other members of the department’s faculty.

GENERAL REMARKS

Divisitional Requirements

All Computer Science courses may be used to satisfy the Division III distribution requirement.

Alternate Year Courses

Computer Science 102T, 107, 109, 205, 336T, 337T, 339, 354, 356T, 371, 372, 373, 374T, 432, and 434T are each normally offered every other year. All other Computer Science courses are normally offered every year.

Course Numbering

Thereto course numbers 100, through 200 and 300, to 400 indicates in most instances an increasing level of maturity in the subject that is expected of students. Within a series, numeric order does not indicate the relative level of difficulty of courses. Rather, the middle digit of the course number (particularly in upper-level courses) generally indicates the area of computer science covered by the course.

Course Descriptions

Brief descriptions of the courses in Computer Science can be found below. More detailed information on the offerings in the department is available at http://www.cs.williams.edu/.

Courses Open on a Pass-Fail Basis

Students taking a Computer Science course on a pass-fail basis must meet all the requirements set for students taking the course on a graded basis. With the permission of the department, any course offered by the department may be taken pass-fail. Students who have taken courses graded with the pass-fail option may not be used to satisfy any of the major or honors requirements. However, with the permission of the department, courses taken in the department beyond those requirements may be taken on a pass-fail basis.

CSCI 102T The Socio-Techno Web (Q)
This course introduces many fundamental concepts in computer science by examining the social aspects of computing. As more and more people use the technologies and services available via the Internet, online environments like Facebook, Amazon, Google, Twitter, and blogs are flourishing. However, several of the problems related to security, privacy, and trust that exist in the real world transfer and become amplified in the virtual world created by the ubiquity and pervasiveness of the Internet. In this course, we will investigate how the social, technological, and natural worlds are connected, and how the study of networks sheds light on these connections. Topics include the structure of the Social Web and networks in general; issues such as virtual identity, personal and group privacy, trust evaluation and propagation, and online security, and the technology, economics, and politics of Web information and online communities. No background in computer science or programming is required or expected.

Class Format: tutorial
Requirements/Evaluation: evaluation will be based on tutorial discussions, presentations, problem sets and labs, a midterm exam, and a final project or paper
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Enrollment Preferences: first-year students and sophomores who have not previously taken a computer science course
Enrollment Limit: 10
Expected Class Size: 10

Distributional Requirements: Division 3
Quantitative/Formal Reasoning
Other Attributes: SCST Related Courses

Not Offered Academic Year 2017

TUT Instructor: Jeannie Albrecht

CSCI 107(S) Creating Games (Q)
Crosslistings: CSCI 107/ARTS 107
The game is unique as the only broadly-successful interactive art form. Games communicate the experience of embodying a role by manipulating the player's own decisions, abstraction, and discrete planning. Those three elements are the essence of computation, which makes computer science theory integral to game design. Video games also co-opt programming and computer graphics as new tools for the modern artist. As a result, games are collaborative interdisciplinary constructs that use computation as a medium for creative expression. Students analyze and extend contemporary video and board games using the methodology of science and the language of the arts. They explore how computational concepts like recursion, state, and complexity apply to interactive experiences. They then synthesize new game elements using mathematics, programming and both digital and traditional art tools. Emphasis is on the theory of design in modern European board games. Topics covered include experiment design, gameplay balance, minimax, color theory, pathfinding, game theory, composition, and computability.
Class Format: lecture and studio
Requirements/Evaluation: evaluation will be based on participation, studio work, and quizzes
Prerequisites: none; no programming or game experience is assumed
Enrollment Preferences: first-year students
Enrollment Limit: 19
Expected Class Size: 19

Dept. Notes: not open to students who completed a Computer Science course numbered 136 or above; does not count toward the Art Major
Materials Fee: fee of $25 will be added to the student term bill
Distribution Notes: meets Division 3 requirement if registration is under CSCI; meets Division 1 requirement if registration is under ARTS
Distributional Requirements: Division 3
Quantitative/Formal Reasoning
Other Attributes: FMST Core Courses

Spring 2017
LEC Section: 01 TR 08:30 AM 09:45 AM Instructor: Morgan McGuire
LAB Section: 02 R 01:00 PM 04:00 PM Instructor: Morgan McGuire

CSCI 109(F) The Art and Science of Computer Graphics (Q)
This course provides an opportunity to develop an understanding of the theoretical and practical concepts underlying 2- and 3-dimensional computer graphics. The course will emphasize hands-on studio/laboratory experiences with student work focused around completing a series of projects. Students will experiment with modeling, color, lighting, perspective, and simple animation. As the course progresses, computer programming will be used to control the complexity of the models and their interactions. Lectures, augmented by guided viewings of state-of-the-art computer generated and enhanced images and animations, will be used to deepen understanding of the studio experience.
Class Format: lecture/laboratory
Requirements/Evaluation: evaluation will be based on progress in project work and two examinations
Prerequisites: this course is not open to students who have successfully completed a CSCI course numbered 136 or above
Enrollment Preferences: first-year students and sophomores who have not previously taken a computer science course
Enrollment Limit: 36
Expected Class Size: 36

Distributional Requirements: Division 3
Quantitative/Formal Reasoning
Other Attributes: FMST Related Courses

Fall 2016
LEC Section: 01 TR 08:30 AM 09:45 AM Instructor: Duane Bailey
LAB Section: 02 R 01:00 PM 02:25 PM Instructor: Duane Bailey
LAB Section: 03 R 02:35 PM 04:00 PM Instructor: Duane Bailey

CSCI 134(F,S) Introduction to Computer Science (Q)
This course introduces fundamental ideas in computer science and builds skills in the design, implementation, and testing of computer programs. Students implement algorithms in the Java programming language with a strong focus on constructing correct, understandable, and efficient programs. Students explore the material through specific application and abstract problems. Covered include object-oriented programming, control structures, arrays, recursion, and event-driven programming. This course is appropriate for all students who want to create software and have little or no prior computing experience. More details are available on the department website, http://www.cs.williams.edu

Class Format: lecture/laboratory
Requirements/Evaluation: evaluation will be based on weekly assignments, first three homework assignments will be due on the first three Fridays of the semester
Prerequisites: none, except for the standard prerequisites for a (Q) course; previous programming experience is not required
Enrollment Preferences: first year students and sophomores
Enrollment Limit: 30

Expected Class Size: 30

Dept. Notes: students with prior experience with object-oriented programming should discuss appropriate course placement with members of the department
Distributional Requirements: Division 3
Quantitative/Formal Reasoning
Other Attributes: BGNP Recommended Courses
COGS Interdepartmental Electives

Fall 2016
LEC Section: 01 MWF 09:00 AM 09:50 AM Instructors: Stephen Freund, Andrea Danyluk
LEC Section: 02 MWF 10:00 AM 10:50 AM Instructors: Andrea Danyluk, Stephen Freund
LAB Section: 03 M 07:00 PM 10:00 PM Instructors: Stephen Freund, Andrea Danyluk
LAB Section: 04 T 01:00 PM 04:00 PM Instructors: Andrea Danyluk, Stephen Freund
LAB Section: 05 T 08:30 AM 11:20 AM Instructors: Andrea Danyluk, Stephen Freund

Spring 2017
LEC Section: 01 MWF 09:00 AM 09:50 AM Instructor: Thomas Murtagh
LEC Section: 02 MWF 10:00 AM 10:50 AM Instructor: Thomas Murtagh

LAB Section: 05 M 01:00 PM 04:00 PM Instructor: Thomas Murtagh

CSCI 135(F,S) Diving into the Deluge of Data (Q)
We are surrounded by information: weather forecasts, twitter feeds, restaurant reviews, stock market tickers, music recommendations, among others. This course introduces fundamental computational concepts for representing and manipulating data. Using the programming language Python, this course explores effective ways to organize and transform information in order to solve problems. Students will learn to design algorithms to search, sort, and manipulate data in application areas like text and image processing, social networks, scientific computing, databases, and the World Wide Web. Programming topics covered include object-oriented and functional programming, control structures, types, recursion, arrays, lists, streams, and dictionaries. This course is appropriate for all students who want to create software and learn computational techniques for manipulating and analyzing data. More details are available on the department website, http://www.cs.williams.edu

Class Format: lecture/laboratory
Requirements/Evaluation: evaluation will be based on weekly assignments, programming projects, and examinations
Prerequisites: some experience programming in any computer language; not open to students who have successfully completed CSCI 134 or above
Enrollment Preferences: first year and sophomore students
Enrollment Limit: 30

Expected Class Size: 30

Dept. Notes: students with substantial prior programming experience should discuss appropriate course placement with members of the department; this course may be taken in place of CSCI 134 & fulfills a CSCI 134 prerequisite for other courses
Distributional Requirements: Division 3
Quantitative/Formal Reasoning

Fall 2016
LEC Section: 01 MWF 09:00 AM 09:50 AM Instructor: Brent Heeringa
LEC Section: 02 MWF 11:00 AM 11:50 AM Instructor: Bill Jannen

CSCI 136(F,S) Data Structures and Advanced Programming (Q)
This course builds on the programming skills acquired in Computer Science 134. It couples work on program design, analysis, and verification with an introduction to the study of data structures. Data structures capture common ways in which to store and manipulate data, and they are important in the construction of sophisticated computer programs. Students are introduced to some of the most important and frequently used data structures: lists, stacks, queues, trees, hash tables, graphs, and files. Students will be expected to write several programs, ranging from very short programs to more elaborate systems. Emphasis will be placed on the development of clear, modular programs that are easy to read, debug, verify, analyze, and modify.
Class Format: lecture/laboratory
Requirements/Evaluation: evaluation will be based on programming assignments, homework and/or examinations
Prerequisites: CSCI 134 or equivalent; MATH 200 is recommended, but not required
Enrollment Preferences: first-year and sophomore students
Enrollment Limit: 36-F 48-S
Expected Class Size: 36-48

Fall 2016

LEC Section: 01  MW 10:00 AM 10:50 AM  Instructor: William Lenhart
LEC Section: 02  MW 09:00 AM 09:50 AM  Instructor: William Lenhart

CSCI 205 Cinematography in the Digital Age (D)
Crosslistings: ENGL 203/CSCI 205/ARTH 205
In this course we study the language of modern cinema as shaped by two forces. The first is the aesthetics of cinematic authorship, as contributed by many cultures. The second is digital film production, which has proved both empowering and constraining. The modern filmmaker succeeds only through understanding both forces. The structure of the course is similar to a writing workshop. We begin with close reading of isolated scenes from influential films, which we compare and critique in writing and discussion. We augment this with cinematic and image processing theory, solidified through experiments in Photoshop and Premiere that reveal how digital technology shapes a director's choices. We then create our own short scenes using these tools and consumer video recorders. We refine our film fragments in the context of group critique. Topics covered include: framing and composition, pace, storyboarding, blocking, lighting, transitions, perspective, sensors, quantization, compression, visual effects, Internet streaming, and color spaces. Studied films include those by Georges Méliès, Stanley Kubrick, Joris Ivens, Barbara Kopple, Martin Scorsese, Sarah Polley, Orson Welles, David Lynch, Fritz Lang, Michael Haneke, Hayao Miyazaki, Spike Lee, Sophia Coppola, and Ken Burns. This course explores diversity through comparative study of how different cultures variously render similar themes, and through a larger investigation of film's ability to make audiences identify with potentially alien points of view.
Class Format: studio
Requirements/Evaluation: video production activity, computational exercises in Photoshop, script and storyboarding exercises, participation in discussions, and essays
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: a 100 level English course, or a score of 5 on the AP Exam in English Literature or a 6 or 7 on the International Baccalaureate; or permission of instructor
Enrollment Preferences: sophomores; Computer Science and English majors
Enrollment Limit: 36
Expected Class Size: 30
Distribution Notes: meets Division 1 requirement if registration is under ENGL or ARTH; meets Division 3 requirement if registration is under CSCI
Distributional Requirements: Division 1
Exploring Diversity
Other Attributes: FMST Core Courses

CSCI 315T Computational Biology (Q)
Crosslistings: PHYS 315/CSCI 315
This course will provide an overview of Computational Biology, the application of computational, mathematical, statistical, and physical problem-solving techniques to interpret the rapidly expanding amount of biological data. Topics covered will include database searching, DNA sequence alignment, clustering, RNA structure prediction, protein structural alignment, methods of analyzing gene expression, networks, and genome assembly using techniques such as string matching, dynamic programming, hidden Markov models, and expectation-maximization.
Class Format: lab three hours per week plus weekly tutorial meeting
Requirements/Evaluation: evaluation will be based on weekly programming assignments, problem sets, a few quizzes and a final project
Extra Info: may not be taken on a pass/fail basis, not available for the fifth course option
Prerequisites: programming experience (e.g., CSCI 136), mathematics (PHYS/MATH 210 or MATH 150), and physical science (PHYS 142 or 151, or CHEM 151 or 153 or 155), or permission of instructor
Enrollment Preferences: based on seniority
Enrollment Limit: 10
Expected Class Size: 8
Distributional Requirements: Division 3
Quantitative/Formal Reasoning
Other Attributes: BGNP Recommended Courses

Not Offered Academic Year 2017
Experience for the Genomics, Proteomics, and Bioinformatics program, What can computational biology teach us about cancer? In this capstone colon tumor cells.

Mass spectrometry will be used to study networks of interacting proteins in modeling of protein network dynamics in single cells. Flow cytometry and Proteomic analysis will introduce the students to de novo structural prediction aberrantly altered by siRNA knockdown of putative regulatory components. Colon cancer cell lines, students will uncover regulatory mechanisms that are techniques to reconstruct the evolution of gene families by focusing on the gene duplication events and gene rearrangements that have occurred over the course of eukaryotic speciation. By utilizing high through-put approaches to investigate genes involved in the MAPK signal transduction pathway in human colon cancer cell lines, students will uncover regulatory mechanisms that are aberrantly altered by siRNA knockdown of putative regulatory components. This functional genomic strategy will be coupled with independent projects using phosphorylation-state specific antisera to test our hypotheses. Proteomic analysis will introduce the students to de novo structural prediction and threading algorithms, as well as data-mining approaches and Bayesian modeling of protein network dynamics in single cells. Flow cytometry and mass spectrometry will be used to study networks of interacting proteins in colon tumor cells.

Class Format: two afternoons of lab, with one hour of lecture, per week

Requirements/Evaluation: lab participation, several short homework assignments, one lab report, a programming project, and a grant proposal

Prerequisites: BIOL 202; students who have not taken BIOL 202 but have taken CSCI 101 and CSCI 315 or PHYS 315, may enroll with permission of instructor. No prior computer programming experience is required.

Enrollment Preferences: seniors, then juniors, then sophomores

Expected Class Size: 12

Dept. Notes: does not satisfy the distribution requirement in the Biology major

Distributional Requirements: Division 3 Quantitative/Formal Reasoning

Prerequisites: BIOL 202; students who have not taken BIOL 202 but have taken CSCI 101 and CSCI 315 or PHYS 315, may enroll with permission of instructor. No prior computer programming experience is required.

Enrollment Preferences: seniors, then juniors, then sophomores

Expected Class Size: 12

Dept. Notes: does not satisfy the distribution requirement in the Biology major

Distributional Requirements: Division 3 Quantitative/Formal Reasoning

Fall 2016

LAB Section: 03  Canceled

CSCI 326 Software Methods (Q)

Sophisticated software systems play a prominent role in many aspects of our lives, and while programming can be a very creative and exciting process, building a reliable software system of any size is no easy feat. Moreover, the ultimate outcome of any programming endeavor is likely to be incomplete, unreliable, and unmaintainable unless principled methods for software construction are followed. This course explores those methods. Specific topics include: software processes; specifying requirements and verifying correctness; software architectures: concurrent, parallel, and scalable systems design; testing and debugging; and performance evaluation.

Class Format: lectures

Requirements/Evaluation: homework, programming assignments, group work, presentations, exams

Prerequisites: CSCI 136 and 237

Enrollment Preferences: current or expected Computer Science majors; those who have not yet taken a project course

Enrollment Limit: 18

Expected Class Size: 18

Distributional Requirements: Division 3 Quantitative/Formal Reasoning

CSCI 336(S) Principles of Programming Languages (Q)

This course examines the concepts and structures governing the design and implementation of programming languages. It presents an introduction to the concepts behind compilers and run-time representations of programming languages; features of programming languages supporting abstraction and polymorphism; and the process of functional, object-oriented, and concurrent programming paradigms. Programs will be required in languages illustrating each of these paradigms.

Class Format: lecture

Requirements/Evaluation: evaluation will be based on weekly problem sets and programming assignments, a midterm examination and a final examination

Prerequisites: CSCI 136

Enrollment Preferences: current or expected Computer Science majors

Enrollment Limit: 40

Expected Class Size: 40

Distributional Requirements: Division 3 Quantitative/Formal Reasoning

CSCI 337(F) Integrative Bioinformatics, Genomics, and Proteomics Lab (Q)

Crosslistings: BIOL 319/MATH 319/CHM 319/PHYS 319/CSCI 319

What can computational biology teach us about cancer? In this capstone colon tumor cells.

Mass spectrometry will be used to study networks of interacting proteins in modeling of protein network dynamics in single cells. Flow cytometry and Proteomic analysis will introduce the students to de novo structural prediction aberrantly altered by siRNA knockdown of putative regulatory components. Colon cancer cell lines, students will uncover regulatory mechanisms that are techniques to reconstruct the evolution of gene families by focusing on the gene duplication events and gene rearrangements that have occurred over the course of eukaryotic speciation. By utilizing high through-put approaches to investigate genes involved in the MAPK signal transduction pathway in human colon cancer cell lines, students will uncover regulatory mechanisms that are aberrantly altered by siRNA knockdown of putative regulatory components. This functional genomic strategy will be coupled with independent projects using phosphorylation-state specific antisera to test our hypotheses. Proteomic analysis will introduce the students to de novo structural prediction and threading algorithms, as well as data-mining approaches and Bayesian modeling of protein network dynamics in single cells. Flow cytometry and mass spectrometry will be used to study networks of interacting proteins in colon tumor cells.

Class Format: two afternoons of lab, with one hour of lecture, per week

Requirements/Evaluation: lab participation, several short homework assignments, one lab report, a programming project, and a grant proposal

Prerequisites: BIOL 202; students who have not taken BIOL 202 but have taken CSCI 101 and CSCI 315 or PHYS 315, may enroll with permission of instructor. No prior computer programming experience is required.

Enrollment Preferences: seniors, then juniors, then sophomores

Expected Class Size: 12

Dept. Notes: does not satisfy the distribution requirement in the Biology major

Distributional Requirements: Division 3 Quantitative/Formal Reasoning

Not Offered Academic Year 2017

LEC

Spring 2017

LEC Section: 01  TR 09:55 AM 11:10 AM Instructor: Stephen Freund

CSCI 336T Computer Networks (Q)

This course explores the design and implementation of computer networks. Topics include wired and wireless networks; techniques for efficient and reliable transmission of data; addressing schemes and routing mechanisms; resource allocation for bandwidth sharing; and security issues. An important unifying themes is the distributed nature of all network problems. We will examine the ways in which these issues are addressed by current protocols such as IP and 802.11 WiFi.

Class Format: lecture

Requirements/Evaluation: evaluation will be based on problem sets, programming assignments, and midterm and final examinations

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: CSCI 136 and 237

Enrollment Preferences: current or expected Computer Science majors

Enrollment Limit: 24

Expected Class Size: 24

Dept. Notes: project course

Distributional Requirements: Division 3 Quantitative/Formal Reasoning

Not Offered Academic Year 2017

TUT  Instructor: Thomas Murtagh

CSCI 337T Digital Design and Modern Architecture (Q)

This tutorial course considers topics in the low-level design of modern architectures. Course materials will review problems of designing effective architectures including instruction-level parallelism, branch-prediction, caching strategies, and advanced ALU design. Readings will be taken from recent technical literature. Labs will focus on the development of custom CMOS circuits to implement projects from gates to bit-sliced ALUs. Final group projects will develop custom logic demonstrating concepts learned in course meetings.

Class Format: tutorial

Requirements/Evaluation: evaluation will be based on microprocessor design projects, participation in tutorial meetings, and examinations

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: CSCI 237

Enrollment Preferences: current or expected Computer Science majors

Enrollment Limit: 10

Expected Class Size: 10

Distributional Requirements: Division 3 Quantitative/Formal Reasoning

Not Offered Academic Year 2017

TUT  Instructor: Duane Bailey

CSCI 339 Distributed Systems (Q)

This course studies the key design principles of distributed systems, which are collections of independent networked computers that function as single coherent systems. Covered topics include communication protocols, processes and threads, naming, synchronization, consistency and replication, fault tolerance, and security. Students also examine some specific real-world distributed systems case studies, including Google and Amazon. Class discussion is based on readings from the textbook and research papers. The goals of this course are to understand how large-scale computational systems are built, and to provide students with the tools necessary to evaluate new technologies after the course ends.

Class Format: lecture/laboratory

Requirements/Evaluation: evaluation will be based on homework assignments, programming projects, and exams

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: CSCI 136 or equivalent programming experience, and CSCI 237, or permission of instructor

Enrollment Preferences: current or expected Computer Science majors

Enrollment Limit: 30

Expected Class Size: 30

Dept. Notes: project course

Distributional Requirements: Division 3 Quantitative/Formal Reasoning

Not Offered Academic Year 2017

LEC  Instructor: Jeannie Albrecht

CSCI 356T(F) Advanced Algorithms (Q)

This course explores advanced concepts in algorithm design, algorithm analysis and data structures. Areas of focus will include algorithmic complexity, randomized and approximation algorithms, geometric algorithms, and advanced data structures. Topics will include combinatorial algorithms for packing, and covering problems, algorithms for proximity and visibility problems, linear programming algorithms, approximation schemes, hardness of approximation, search, and hashing.

Class Format: tutorial
CSCI 361(F) Theory of Computation (Q)
Crosslistings: CSCI 361/MATH 361
This course introduces a formal framework for investigating both the computability and complexity of problems. We study several models of computation including finite automata, regular languages, context-free grammars, and Turing machines. These models provide a mathematical basis for the study of computability theory—the examination of what problems can be solved and what problems cannot be solved—and the study of complexity theory—the examination of how efficiently problems can be solved. Topics include the halting problem and the P versus NP problem.

CSCI 371(F) Computational Graphics (Q)
PhotoShop, medical MRIs, video games, and movie special effects all programmatically create and manipulate digital images. This course teaches the fundamental techniques behind these applications. We begin by building a mathematical model of the interaction of light with surfaces, lenses, and images. We then study the data structures and the processor architectures that allow us to efficiently evaluate that physical model. Students will complete a series of programming assignments for both photorealistic image creation and real-time 3D rendering using C++, OpenGL, and GLSL. These assignments culminate in a multi-week final project. Topics covered in the course include: projective geometry, ray tracing, bidirectional surface scattering functions, binary space partition trees, matting and compositing, shadow maps, cache management, and parallel processing on GPUs.

CSCI 374T(F) Machine Learning (Q)
This tutorial examines the design, implementation, and analysis of machine learning algorithms. Machine Learning is a branch of Artificial Intelligence that aims to develop algorithms that will improve a system's performance. Improvement might involve acquiring new factual knowledge from data, learning to perform a new task, or learning to perform an old task more efficiently or effectively. This tutorial will cover examples of supervised learning algorithms (including decision tree learning, support vector machines, and neural networks), unsupervised learning algorithms (including k-means and expectation maximization), and possibly reinforcement learning algorithms (such as Q learning and temporal difference learning). It will also introduce methods for the evaluation of learning algorithms, as well as topics in computational learning theory.

CSCI 375(F,S) Natural Language Processing (Q)
Natural language processing is a branch of computer science that studies how does it work? This course introduces theories and computational techniques that serve as a foundation for the study of artificial intelligence. Potential topics include the following: Problem solving by search, Logic, Planning, Constraint satisfaction problems, Uncertainty and probabilistic reasoning, Bayesian networks, and Automated Learning.

CSCI 377(F,S) Artificial Intelligence (Q)
Artificial Intelligence (AI) has become part of everyday life, but what is it, and how does it work? This course introduces theories and computational techniques that serve as a foundation for the study of artificial intelligence. Potential topics include the following: Problem solving by search, Logic, Planning, Constraint satisfaction problems, Uncertainty and probabilistic reasoning, Bayesian networks, and Automated Learning.

Spring 2017
IND Section: 01  TBA  Instructor: Brent Heeringa

CSCI 432(S) Operating Systems (Q)
This course explores the design and implementation of computer operating systems. Topics include historical aspects of operating systems development, systems programming, process scheduling, synchronization of concurrent processes, virtual machines, memory management and virtual memory, I/O and file systems, system security, os/architecture interaction, and distributed operating systems.
Class Format: lecture/laboratory
Requirements/Evaluation: evaluation will be based on several implementation projects that will include significant programming, as well as written homework and exams
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: CSCI 237 and either CSCI 256 or 334
Enrollment Preferences: current or expected Computer Science majors
Enrollment Limit: 24
Expected Class Size: 24
Dept. Notes: project course
Distributional Requirements:

CSCI 434T(F) Compiler Design (Q)
This tutorial covers the principles and practices for the design and implementation of compilers and interpreters. Topics include all stages of the compilation and execution process: lexical analysis; parsing; symbol tables; type systems; scope; semantic analysis; intermediate representations; run-time environments and interpreters; code generation; program analysis and optimization; and garbage collection. The course covers both the theoretical and practical implications of these topics. As a project course, students will construct a full compiler for a simple object-oriented language.
Class Format: tutorial
Requirements/Evaluation: evaluation will be based on presentations, problem sets, a substantial implementation project, and two exams
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: CSCI 237 and 361 (concurrent enrollment is acceptable); CSCI 334 is recommended, but not required
Enrollment Preferences: current or expected Computer Science majors
Enrollment Limit: 10
Expected Class Size: 10
Dept. Notes: project course
Distributional Requirements:
Division 3
Quantitative/Formal Reasoning

Fall 2016

LAB Section: T2  Cancelled

CSCI 493(F) Research in Computer Science
This course provides highly-motivated students an opportunity to work independently with faculty on research topics chosen by individual faculty. Students are generally expected to perform a literature review, identify areas of potential contribution, and explore extensions to existing results. The course culminates in a concise, well-written report describing a problem, its background history, any independent results achieved, and directions for future research.
Class Format: independent study

Requirements/Evaluation: evaluation will be based on class participation, presentations, and the final written report
Enrollment Preferences: open to senior Computer Science majors with permission of instructor
Dept. Notes: this course (along with CSCI 494 and CSCI 494) is required for students pursuing honors, but enrollment is not limited to students pursuing honors
Distributional Requirements:
Division 3

Fall 2016

CONTRACT MAJOR
Contract Major Advisor: RASHANDA BOOKER

Students with the talent and energy for working independently and with the strong support of two primary faculty sponsors may undertake a Contract Major: a coherent study of an interdisciplinary subject not covered by a regularly offered major. Such a major must be in an area suitable to the talents of the faculty in residence and cannot consist of minor modifications to an existing major. A Contract Major also must conform to the structure and have the coherence of a departmental or program major—i.e., it must embody a disciplined cumulative study that moves from an elementary to an advanced level and culminates in a synthesis similar to a senior major course. Hence, a Contract Major usually consists of a program of existing courses, sometimes supplemented by courses of independent study and the senior course. The process of constructing a proposal for a Contract Major is both interesting and demanding. As part of that process, students should consider carefully the advantage of working within existing majors or programs, taking note of the considerable intellectual pleasures involved in sharing similar educational experiences with other students working within the same field. Students might also consider whether their interests could be met by completing a regular major and coordinate program, or two majors, or simply by working outside a major field in courses of special interest. Because the Contract Major represents an exceptional opportunity provided for students whose interests cannot be met through existing departmental and interdepartmental majors and programs, it cannot be pursued in conjunction with another major.

Students who wish to explore or propose a Contract Major should consult with the Contract Major Advisor and with potential faculty sponsors as early as possible in the fall semester of the sophomore year, and then—during the sophomore year—follow these procedures:

1) The student must initiate discussion with at least two members of the faculty from differing departments who expect to be in residence during the student’s senior year and who are willing to endorse the Contract Major and undertake a central role in supervising its implementation, criticism, evaluation, and ultimate validation. Since in essence faculty sponsors substitute for the student’s major department, they are expected to play an important role in the Contract Major.

2) The student must develop, in conjunction with the faculty sponsors, a written proposal (forms and guidelines are available in the Dean’s Office) which should contain:
   a) a description of the proposed major area of study and an explanation of the reasons for proposing the Contract Major. A sound and persuasive rationale for the major is crucial for obtaining approval from the Committee on Educational Policy (C.E.P.).

   Students with the talent and energy for working independently and with the strong support of two primary faculty sponsors may undertake a Contract Major: a coherent study of an interdisciplinary subject not covered by a regularly offered major. Such a major must be in an area suitable to the talents of the faculty in residence and cannot consist of minor modifications to an existing major. A Contract Major also must conform to the structure and have the coherence of a departmental or program major—i.e., it must embody a disciplined cumulative study that moves from an elementary to an advanced level and culminates in a synthesis similar to a senior major course. Hence, a Contract Major usually consists of a program of existing courses, sometimes supplemented by courses of independent study and the senior course. The process of constructing a proposal for a Contract Major is both interesting and demanding. As part of that process, students should consider carefully the advantage of working within existing majors or programs, taking note of the considerable intellectual pleasures involved in sharing similar educational experiences with other students working within the same field. Students might also consider whether their interests could be met by completing a regular major and coordinate program, or two majors, or simply by working outside a major field in courses of special interest. Because the Contract Major represents an exceptional opportunity provided for students whose interests cannot be met through existing departmental and interdepartmental majors and programs, it cannot be pursued in conjunction with another major.

Students who wish to explore or propose a Contract Major should consult with the Contract Major Advisor and with potential faculty sponsors as early as possible in the fall semester of the sophomore year, and then—during the sophomore year—follow these procedures:

1) The student must initiate discussion with at least two members of the faculty from differing departments who expect to be in residence during the student’s senior year and who are willing to endorse the Contract Major and undertake a central role in supervising its implementation, criticism, evaluation, and ultimate validation. Since in essence faculty sponsors substitute for the student’s major department, they are expected to play an important role in the Contract Major.

2) The student must develop, in conjunction with the faculty sponsors, a written proposal (forms and guidelines are available in the Dean’s Office) which should contain:
   a) a description of the proposed major area of study and an explanation of the reasons for proposing the Contract Major. A sound and persuasive rationale for the major is crucial for obtaining approval from the Committee on Educational Policy (C.E.P.).
b) a list of all courses in the proposed major and an explanation for each course choice. A minimum of nine semester courses, one of which must be designated the senior major course (and taken during the senior year), must be completed for a Contract Major. Normal rules governing course grades and grade point average apply for entry into and continuation in a Contract Major.

c) a list of other courses taken or anticipated to meet College distribution requirements, including grades received in courses already completed.

d) a list of completed courses toward a backup major(s) in case the contract major is not approved.

3) No later than mid-November, the student must meet with the Contract Major Advisor to discuss and further develop the proposal.

4) By the end of the second week of spring semester classes, the student must submit a complete draft of the proposal to the Contract Major Advisor for feedback.

5) No later than MARCH 15th, the student must submit the final proposal to the Contract Major Advisor. By this date also, the two faculty sponsors must submit their endorsement forms to the Contract Major Advisor. The student must also notify students and sponsors before the spring registration deadline. In making its decisions, the Committee on Educational Policy. The C.E.P., after consultation with departments and programs substantially affected by a proposal, will vote on each proposal individually and will notify students and sponsors of the decision before the spring registration deadline. In cases where there have been changes, the Contract Major Advisor has determined that there has been substantial alteration of the original program, the Contract Major Advisor will forward the student’s written request along with the endorsements from their two faculty sponsors to the C.E.P. for reconsideration.

6) The Contract Major Advisor then conveys the proposal, the two faculty sponsors’ endorsement forms, and recommendations regarding the feasibility and substance of the proposal, for approval by the Committee on Educational Policy. The C.E.P., after consultation with departments and programs substantially affected by a proposal, will vote on each proposal individually and will notify students and sponsors before the spring registration deadline. In making its decisions, the C.E.P. considers the student’s academic record, the coherence and feasibility of the plan of study, and the degree of support expressed by the faculty sponsors and, if appropriate, program chairs.

Subsequent changes to a Contract Major must be requested in writing by the student and approved by the two faculty sponsors as well as by the Contract Major Advisor. Before making changes in the courses originally proposed for the junior and senior years, the new courses need to be approved by the two faculty sponsors and the Contract Major Advisor. During the fall of both the junior and senior years, contract majors should be in touch with their two faculty sponsors and the Contract Major Advisor about their progress in the major and the courses they are taking even if there have not been changes. Where the Contract Major Advisor has determined that there has been substantial alteration of the original program, the Contract Major Advisor will forward the student’s written request along with the endorsements from their two faculty sponsors to the C.E.P. for reconsideration.

THE DEGREE WITH HONORS IN THE CONTRACT MAJOR

The route to the degree with honors in the Contract Major is a senior thesis that is to continue as an honors candidate. If not admitted to honors candidacy, the student may elect not to continue further independent study. If admitted to honors candidacy, the student shall submit the finished written thesis or mini-thesis in the spring, no later than the third Monday after the last day of spring break. After the thesis has been completed, the student presents his or her work. The readers shall determine Highest Honors, Honors or no honors.

CRITICAL LANGUAGES (DIV I)
Coordinator: JANE CANOVA

The Critical Languages Program enables students to study important foreign languages relevant to their academic interests but not taught in regular courses at Williams. The program can field a limited number of courses per year, and it has offered one-year of elementary Hebrew, Hindi, Korean and Swahili thus far. Students work independently with standard language textbooks and audio materials for roughly ten hours per week and attend biweekly group review sessions with tutors who are native speakers. Language faculty from other institutions provide the course syllabus, conduct the exams, and determine the final grades. An organizational meeting for enrolled students is held the first week of each semester.

Interested students must present an application and have it approved before registering for a course. Applications are available during the first two weeks of April and can be obtained from the Coordinator at the Center for Foreign Languages, Literatures, and Cultures, Hollander 230.

To be eligible for this 200-level Critical Languages course, the student must:
- have attained sophomore standing or higher;
- demonstrate proven capability for independent work and previous success in foreign language study;
- explain how the study of the language integrates with his/her major or other academic interests;
- present a letter of support from a Williams faculty member;
- have at least a 3.0 GPA; in some cases, take a placement test.

Note that like other elementary language courses, the Critical Languages courses are hypenated, meaning no credit is given for the first semester until the second semester is successfully completed. Students must normally begin a course in the fall semester. It cannot be taken Pass/Fail. An organizational meeting will be held the first week of each semester.

A consecutive year of intermediate language study will be considered only upon petition of those students completing a full year of elementary study within the Critical Languages Program and as long as a minimum of two students are enrolled to continue their language study.

All courses adhere to the guidelines of the National Association of Self-instructional Language Programs (NASILP).

* A Critical Languages course will be scheduled only if and when at least two students are accepted for study and provided a native tutor and outside examiner have been contracted.

CRHE 201(F) Hebrew
Elementary Hebrew.
Class Format: independent study
Extra Info: may not be taken on a pass/fail basis
Prerequisites: sophmore or higher standing with a GPA of 3.0 or higher; application to the Critical Languages Department in early April

DANC 100(F) Foundations in Dance
This course is an introduction to the fundamentals of dance history and techniques focusing on Ballet, Modern dance and African dance and music genres. Regular physical work that provides experience in dance technique, reading, discussion about cultural context and significant dance innovators, viewing media, live performance and writing about dance are required. This course may not be taken for PE credit.

Class Format: studio/lecture/discussion

Requirements/Evaluation: Evaluation will be based on active participation and progress in the techniques, quality of written assignments and project presentations
Extra Info: may not be taken for PE credit

Prerequisites: none; experienced dancers who wish to enroll in Dance Department courses may waive this course by taking the department's advanced placement class or by permission of the faculty

Enrollment Preferences: beginning dancers and students with no prior experience

Enrollment Limit: 25

Expected Class Size: 20

Distributional Requirements:
Division 1

Fall 2016
STU Section: 01 MR 01:10 PM 02:25 PM Instructors: Sandra Burton, Janine Parker

DANC 125 Music and Social Dance in Latin America (D)
Crosslistings: MUS 125/DANC 125
This course offers a full-spectrum introduction to the sounds, movements, and social characteristics of a number of Latin American social dance forms, including samba, salsa, tango, and the Afro-Surinamese genre, awasa. Through critical listening and viewing assignments, performance workshops, and readings from disciplines spanning ethnomusicology, anthropology, dance studies, Latin American studies and history, students will combine a technical
understanding of the musical and choreographic features of these genres with a consideration of their social impact. Among the questions that will drive class discussions are the following: How do sound and movement interrelate? What aspects of gender, sexuality, class, race and ethnicity arise in the performance and consumption of Latin American genres of social dance? How do high political, economic, and personal stakes emerge through activities more commonly associated with play and leisure? No prior music or dance training is necessary, however this course does require regular engagement in interactive and performance-based assignments and workshops.

Class Format: semester/studio
Requirements/Evaluation: one performance/analysis project, one group project, one paper (10-12 pages)
Extra Info: may not be taken on a pass/fail basis
Prerequisites: none
Enrollment Preferences: upperclassmen, Music majors, and Latina/o Studies concentrators
Enrollment Limit: 20
Expected Class Size: 15
Not Offered Academic Year 2017
SEM Instructor: Corinna Campbell

DANC 201(F) African Dance and Percussion
Crosslistings: DANC 201/AFR 201/MUS 221
This course focuses on selected dance and music forms from the African continent for example, Kpanlogo from Ghana, Lamban from Guinea, Senegal and Mali or Bira from Zimbabwe. We will examine their origins (people, history and cultures) and influence beyond geographic perimeter to more fully understand the function of these forms in contemporary times. Students will study movement and percussion and are evaluated on the quality of progress with the selected forms throughout the semester. Forms may not be the same every semester.
This course can be taken for academic and/or PE credit
Class Format: studio/lecture/discussion
Requirements/Evaluation: participation in assignments that include research and performance projects and short papers; students enrolled for PE credit only are not required to do short paper or research assignments; all students must participate in all performance projects.
this course may be taken for academic and/or PE credit; see description for more details
Prerequisites: DANC 100 or permission of instructor
Enrollment Preferences: students who have taken Dance 100 or advanced placement
Enrollment Limit: 25
Expected Class Size: 20
Dept. Notes: MUS World Music/Ethnomusicology
Distribution Notes: meets Division 1 requirement if registration is under DANC or MUS; meets Division 2 if registration is under AFR
Distributional Requirements: Division 1
Other Attributes: GBST African Studies Electives
MUS World Music/Ethnomusicology

DANC 203(S) Beginning/Intermediate Ballet: Technique, Variations and History
This course is designed for dancers who have achieved a beginning/intermediate level of Ballet, and are serious about continuing to build their strength, artistry and understanding of classical ballet. Students will have technique class twice a week, and beginning pointe work might be introduced to some students as well as specific steps traditionally performed by male dancers. All students will learn and rehearse excerpts from major ballets specific to that semester's focus. Assigned readings and/or viewings will introduce students to various phases of ballet history; students will submit written responses to these assignments. When applicable the class will go on one or two field trips to attend performances by professional ballet companies and will write response papers about the experience.
This course may be taken for academic and/or physical education credit and MAY BE REPEATED for academic credit. PE-only participants must attend the ballet technique portion of the class two times per week for credit.
Class Format: studio/lecture/discussion
Requirements/Evaluation: participation and progress throughout the semester; quality of responses to weekly assignments; response papers, when applicable; 1st and 2nd quarter quizzes; and individual performance in midterm and final showings
Prerequisites: experience in ballet techniques and permission of instructor
Enrollment Preferences: students with demonstrated prior experience
Enrollment Limit: 16
Expected Class Size: 8
Distributional Requirements: Division 1

DANC 204 African Dance and Diaspora (D)
This course will examine the social and cultural histories of dance from Africa and diaspora communities, focusing on their position in specific contexts and the role of dance in creating and maintaining social, cultural, and political identities. Students will explore how dance has been used to negotiate and resist colonization, slavery, and other forms of oppression. The course will also consider the ways in which dance has been used to construct and challenge cultural and political identities. Students will engage in interactive and performance-based assignments designed to promote critical thinking and analysis.
Class Format: studio/lecture/discussion
Requirements/Evaluation: participation in assignments that include research and performance projects and short papers; students enrolled for PE credit only are not required to do short paper or research assignments; all students must participate in all performance projects.
Prerequisites: none
Enrollment Preferences: students who have taken DANC 100, DANC 201 or permission of the instructor
Enrollment Limit: 20
Expected Class Size: 20
Dept. Notes: MUS World Music/Ethnomusicology
Distribution Notes: meets Division 1 requirement if registration is under DANC or MUS; meets Division 2 requirement if registration is under AFR
Distributional Requirements: Division 1
Other Attributes: GBST African Studies Electives

DANC 205 Modern Masterworks
In this course students will examine select masterworks and philosophies of key artists in the development of modern dance while simultaneously studying modern dance technique. Students will develop a critical framework for understanding dance by examining works both loved and misunderstood in their respective times. This semester will focus on Martha Graham and a reconstruction of her dance “Celebration.” By what criteria does a culture define a masterwork? What does the work reflect about its time, its creator, and the place of dance in society? We will examine topics suggested by the works, such as how the body is constructed/deconstructed in, and by, the work, religion and spiritual practice in relation to dance-making, the social identity of the creator and the performers, the uses of music/sound in relation to movement expression, and how we “read” dances as individuals. Weekly viewings, critical and historic readings and discussion will be required along with studio practice.
Class Format: seminar and studio
Requirements/Evaluation: based upon class participation, written response, and a final research presentation
Prerequisites: none
Enrollment Limit: 20
Expected Class Size: 15
Distributional Requirements: Division 1

DANC 208(F) Dance and Diaspora (D)
Both dance and migration involve human bodies in motion, making dance a powerful lens through which to view the experience of diaspora. In this course, we will analyze both continuity and creative reinnovation in dance traditions of multiple diasporas, focusing in particular on the African and South Asian diasporas. We will analyze dance as a form of resistance to slavery, colonialism, and oppression; as an integral component of community formation; as a practice that shapes racial, gendered, religious, and national identity; and as a commodity in the global capitalist marketplace. We will explore these topics through readings, film viewings, discussion, attendance at live performances, and in-class movement workshops, which will happen approximately once every two or three weeks in lieu of discussion. Evaluation is based on participation in discussion, reading responses, two short papers, and a final project, which can be either a research paper or a creative project. Your dancing abilities are not evaluated; no previous dance experience is required.
Class Format: studio/lecture/discussion
Requirements/Evaluation: participation, reading responses, two short papers, and a final project, which can be either a research paper or a creative project.
Prerequisites: none
Enrollment Limit: 20
Expected Class Size: 20
Distributional Requirements: Division 1
Exploring Diversity

Fall 2016
SEM Section: 01 Cancelled
DANC 210(F) LET'S MAKE A DANCE: Dance Making and Re-Making

This course is designed for first-time dance makers as well as more experienced dance students who seek the opportunity to practice dance making in a structured, intimate setting in which students present work-in-progress in dialogue with others. Any genre or style of dance may be explored. Projects are designed primarily to empower the creator to clarify the intent and vision for their work. Central to the course is the process of giving and receiving feedback, which will follow Liz Lerman's Critical Response Process (CRP). Using the CRP system's adaptable nature during the course of the semester, groups will likely evolve their own procedures unique to their group. Projects will include solo and group work, site-specific dance making, and creating in collaboration. Students are expected to rigorously build upon and revise their work(s) by making active use of CRP sessions in three possible roles: artist, responder, and facilitator. Studying creative thinking by looking at process texts, films, and other documentation of dance makers in a variety of genres will give further context to our work. Weekly presentation of assignments, active participation in CRP sessions, identifying to the group one's intended goal(s) for the week, written reflection on sessions, and final showing will be required. Three seminar sessions will be included in the class.

Class Format: tutorial

Requirements/Evaluation: weekly presentation of assignments, participation in CRP sessions, identifying to the group one's intended goal, written reflection on sessions, and final showing

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: none

Enrollment Limit: 10

Expected Class Size: 10

Distributional Requirements: Division 1

Fall 2016

TUT Section: T1 TBA Instructor: Erica Dankmeyer

DANC 212(T) From Stage to Page: Writing about Dance (W)

This is a movement course designed for creative thinkers, such as dancers, actors, musicians, and visual artists. The body is the sole mediator of human experience and the site where all creative work resides, so we must integrate movement as a source and resource in our work. We will engage the body as an expressive tool in support of artistic craft and technique and build confidence in our ability to translate creative impulses through physical action. We will focus on the kinetic application of movement in the art-making process, using core energy, dynamics, breath connection, strength, flexibility, stamina, and relaxation techniques in order to integrate our creative output. We will also examine how movement informs creative work across disciplines through readings, films, and museum visits.

Class Format: studio and seminar

Requirements/Evaluation: students will be assessed individually based on active class participation, journals, and final project

Prerequisites: experience in dance, acting, music, or the visual arts, or by permission of the instructor

Enrollment Limit: 12

Expected Class Size: 12

Distributional Requirements: Division 1

Not Offered Academic Year 2017

DANC 226(S) Gender and the Dancing Body in America

Crosslistings: DANC 226/WGS 226/AMST 226

This course posits that the dancing body is a particularly rich site for examining the history of gender and sexuality in America. Starting off the semester with the Puritans' anti-dance treatises and finishing with controversies about twerking, we will analyze how various Americans have used dance to construct and challenge normative values about gender and sexuality. We will pay particular attention to the intersections of race and gender with, for example, looking at how working-class white men danced in drag and blackface in minstrelsy performance in the mid-19th century, and how a moral panic arose when upper-class women attended "tango teas" in New York to dance with working-class immigrant men. We will examine a wide range of dance genres, from stage performance to popular forms to dance on television, and attend live dance performances in the area. No previous dance experience required.

Class Format: seminar

Requirements/Evaluation: participation, reading responses, viewing responses, short midterm paper, final paper

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: none

Enrollment Preferences: WGS majors

Enrollment Limit: 20

Expected Class Size: 10-15

Distribution Notes: meets Division 1 requirement if registration is under DANC; meets Division 2 requirement if registration is under WGS or AMST

Distributional Requirements: Division 1

Spring 2017

DANC 300(F) Intermediate/Advanced Ballet: Technique, Variations and History

This course is designed for dancers who have achieved an intermediate/advanced level of ballet technique. Students will have technique class twice a week, followed by men's work and pointe work (students who are not on pointe will be able to do the work in regular ballet slippers). Both male and female students will be taught and coached in variations from existing ballets in a third session and partnering if applicable. Assignments will include readings, viewing of media and performance; students will submit written responses to the assignments. The class may go on one or two field trips to attend performances and will write response papers when applicable.

This course may be taken for academic and/or PE credit and MAY BE REPEATED for academic credit. PE-only participants must attend the ballet technique portion of the class two times per week for credit.

Class Format: studio/lecture/discussion

Requirements/Evaluation: based on participation and progress throughout the semester, the quality of assignment responses, and the rehearsal and performance of ballet variations taught during the semester

Prerequisites: a minimum of three years prior training in ballet, and/or successful completion of DANC 203 and a demonstrated ability to safely keep up with this level of technique; all students must contact instructor for permission to enroll in class

Enrollment Preferences: students with demonstrated ability and desire to continue rigorous study

Enrollment Limit: 10

Expected Class Size: 8

Distributional Requirements: Division 1

Fall 2016
STU Section: 01  MWF 11:00 AM 12:50 PM  Instructor: Janine Parker

DANC 301 Creative Process in Dance
This course examines the methods used to make dances. It is intended for the experienced mover who is ready to focus on theory, methods and the history of composing dance in various traditions. Students will be asked to identify their own methods and engage in research and regular presentations of their compositions for critical feedback. The class will also study innovative professional choreographers such as Pina Bausch, Ping Chong, George Balanchine, Eiko and Koma, Rennie Harris, Alvin Ailey, Martha Graham, Ronald K. Brown, Lucinda Childs and Merce Cunningham. To more fully understand the context in which these works were created, the class will read essays by dance scholars such as Louis Horst, Liz Lerman, Deborah Jewitt, Sally Banas, and Susan Leigh Foster.

Class Format: seminar/studio
Requirements/Evaluation: Evaluation will be based on the quality of participation, assigned projects and presentations
Prerequisites: a minimum of 1-2 years experience as a dancer or choreographer prior to college or 1-2 years experience in a Williams College dance company or permission of instructor
Enrollment Preferences: students who have experience in the process of making dances or using movement as part of making theater and other kinds of performance
Expected Class Size: 12
Distributional Requirements: Division 1

Not Offered Academic Year 2017

SEM

DANC 303 The Body as Book: Memory and Reenactment in Dance & Theater
Crosslistings: THEA 360/DANC 303/COMP 360
What does it mean to conceive of the body as a book? This unique interdisciplinary studio-seminar course examines how dance and theater channel, preserve and transmit stories and cultural memory through individual and collective bodies. Dance and theater are traditionally defined as ephemeral arts, bounded by the limits of linear time and space. Yet, as Rebecca Schneider writes, “time is decidedly folded and fraught.” Repetition and reenactment are forms of remembering, and performance is often not what disappears but what remains. How do we pass on knowledge in visceral and affective ways? What is a “repertoire”? What are the benefits and risks of continuity over time? Taught as part of the Books Unbound curricular initiative, and in conjunction with the opening of the Sawyer-Stetson Library, the course will complete a project in which the class “embodies” material, first by exploring stories embodied by individual members of the class, and then by translating them through performance by the collective, culminating in dance/theatre pieces performed in the new library. Over the term, we will also study modern and contemporary American artists, such as: Martha Graham. The Wooster Group, Alvin Ailey, Meredith Monk, Anne Bogart, Ralph Lemon, Elevator Repair Service, Bill T. Jones, Marina Abramovic, Jose Limon, and Suzan-Lori Parks. We will also collaborate with professional artists invited to Williams to create and present dance and theater pieces in the new library.

Class Format: studio/seminar
Requirements/Evaluation: evaluation will be based on collaborative-based project work, individual research, writing and final performances
Prerequisites: no prior dance or theater training is required
Enrollment Preferences: students majoring in Dance, Theatre, American Studies and Art
Enrollment Limit: 14
Expected Class Size: 10
Distributional Requirements: Division 1

Not Offered Academic Year 2017

STU  Instructor: Amy Holzapfel

DANC 305 Choreographies
By unpacking the idea of choreography, this course will be a laboratory for deepening a student's thinking, writing and practice of performance. Choreography will be our flexible methodology for personalizing an approach to movement, text and objects as well as our lens for discussing cultural phenomena such as protests, public ceremonies and performance. Gleaning cues from these public spectacles, morning class exercises will focus on a skill or aspect of performance such as physicality, image, affect, duration, obstructions, objects, speech, timing and place. Afternoon sessions will be composition accompanied by a writing practice as each student navigates matters such as identity, representation and social space. How does choreography operate in society at large? What is the line between representing and doing something with oneself, body? How might performance question or transgress notions of identity? How can writing further perform as an expanded field of thought and action? The semester will culminate in a series of choreographies installed on campus, in locations chosen by the students.
We will consider the work of established and emerging artists including: Vito Acconci, Marina Abramovic, Banksy, luciana achugar, William Pope L., David Hammons, Trisha Brown, Jen Rosenblit, Guerrilla Girls, Stuart Sherman, Jerome Bel and Visual AIDS. We will also read texts by Andre Lepecki, Michel Foucault, Douglas Crimp, Jennifer Doyle, Jose Limon, Marxist, Spanberg, Fred Moten, Jenn Joy, Judith Butler, Adrienne Edwards and Gilles Deleuze.

Evaluation will be based on class participation, 2 short response papers, a longer paper and a final choreography.
Class Format: seminar/studio
Requirements/Evaluation: evaluation will be based on class participation, 2 5-page short response papers, a longer 10-page paper and a final choreography
Prerequisites: At least one course in creative writing, dance, voice, music, theater, studio art and prior experience with live performance. Contact instructor with further questions.
Enrollment Preferences: Division I majors
Enrollment Limit: 10
Distributional Requirements: Division 1

Not Offered Academic Year 2017

STU  Instructor: Will Rawls

DANC 317 Black Migrations: African American Performance at Home and Abroad
Crosslistings: AFR 317/CMP 319/DANC 317/ENGL 317/THEA 317/A
In this course, students will investigate, critique and define the concepts migration and diaspora with primary attention to the experiences of African Americans in the United States and Europe. Drawing on a broad definition of performance, students will explore everything from writing and painting to speaking and dance to inquire how performance reflects, critiques and narrates migratory experiences in the African diaspora. For example, how did musician Sidney Bechet's migration from New Orleans to Chicago to London influence the early jazz era? How did Katherine Dunham's dance performances in Germany help her shape a new black dance aesthetic? Why did writer James Baldwin go all the way to Switzerland to write his first novel on black, religious culture in Harlem? What drew actor/singer Paul Robeson to Russia, and why did the U.S. revoke his passport in response to his speeches abroad? These questions will lead students to investigate multiple migrations in the African diasporic experience and aid our exploration of the reasons for migration throughout history and geography. In addition to critical discussions and written analysis, students will explore these topics through their own individual and group performances in class. No prior performance experience is necessary.

Class Format: seminar/discussion
Requirements/Evaluation: evaluation will be based upon class participation, in-class student performances, several 2-page performance response papers, one 10- to 12-page research paper, a final performance with a 3-page report
Extra Info: may not be taken on a pass/fail basis
Prerequisites: none, open to all
Enrollment Limit: 12
Expected Class Size: 10
Distribution Notes: meets Division 2 requirement if registration is under AFR or AMST, meets Division 1 requirement if registration is under COMP, DANC, ENGL or THEA
Distributional Requirements: Division 2
Other Attributes: AFR Core Electives
AMST Arts in Context Electives
AMST Comp Studies in Race, Ethnicity, Diaspora
AMST Space and Place Electives

Not Offered Academic Year 2017

SEM  Instructor: Rashida Braggs

DANC 330(5) Modern Folklore: Postcolonial Dance and Music in Africa
Crosslistings: DANC 330/MUS 330/AFR 330
“Folklore is a mixture of traditions, poems, songs, dances and legends of the people, it can be no other than the reflection of the life of the country and if that country develops, there is no reason why the folklore which is the living expression, should not develop as well. Modern folklore in present Africa is as authentic as the Africa of old.” —Keita Fodeba, founding Artistic Director of Les Ballet Africain, Guinea, West Africa. This course will involve intensive dance and musical practice that is rooted in traditional and contemporary/forms from the African continent and the Diaspora. We will examine the international impact of countries who achieved independence from the 1950s to the late 1980s such as Les Ballets Africains, National Dance Company of Senegal, Bembeya Jazz, Ghana Dance Ensemble, and the national dance and music companies of Zimbabwe, Jamaica, and Cuba. Our study will include the impact of artists such as James Brown, Miriam Makeba, Michael Jackson, and Youssou N’Dour, as well as Hip Hop culture and the emergence of new forms of music and dance or modern folklore.

Class Format: studio
Requirements/Evaluation: student progress with music and dance material taught, quality of assigned short papers, quality of research and performance mid-term and final projects
Prerequisites: Any of the following courses offer students preparation or permission of the instructors
Enrollment Preferences: students who have taken DANC 201, 202 or any of the courses listed in the prerequisites
Enrollment Limit: 12
Expected Class Size: 10
Materials/Lab Fee: Occasional fees to attend concerts; fee range free-$35
Distribution Notes: meets Division 1 requirement if registration is under DANC, MUS; meets Division 2 requirement if registration is under AFR
Distributional Requirements: Division 1
DANC 397(F) Independent Study: Dance
This course is intended for students who are juniors or seniors with continued study in department courses and or participation in Dance Department companies (CoDa, Kusika, Sankofa or Zambesi). Students must propose a project that deepens their learning and creativity. The intention is to support research in a historical period that can include cultural, political and economic impact of dance and other modes of performance. Students must meet with faculty to discuss project prior to submitting the proposal.

Class Format: Independent study
Requirements/Evaluation: quality of research and presentations
Prerequisites: permission of department and minimum of 2-3 years as a student in the department
Enrollment Limit: 3
Expected Class Size: 1-3
Distributional Requirements: Division 1

Fall 2016
IND Section: 01 TBA Instructor: Sandra Burton

This course is intended for students who are juniors or seniors with continued study in department courses and or participation in Dance Department companies (CoDa, Kusika, Sankofa, Zambezi). Students must propose a project that deepens their learning and creativity. The intention is to support research in a historical period that can include cultural, political and economic impact of dance and other modes of performance. Students must meet with faculty to discuss their project prior to submitting the proposal.

Class Format: Independent study
Requirements/Evaluation: based on the quality of research and final presentation
Prerequisites: permission of the department and a minimum of 2-3 years as a student in the department
Enrollment Limit: 3
Expected Class Size: 1-3
Distributional Requirements: Division 1

Spring 2017
IND Section: 01 TBA Instructor: Sandra Burton

ECONOMICS (DIV II)
Chair: Professor KENNETH KUTTNER

Visiting Professors: N. BIRDSALL, M. FORTUNATO, P. HELLER.

GENERAL INFORMATION
The primary objectives of the economics major are to develop an understanding of how individuals, organizations and societies meet their material needs. The introductory courses present the fundamental principles of economics at a level that is useful for understanding a wide range of social and policy issues. The core theory courses provide a more rigorous grounding in the tools used in analyzing individual choice, the functioning of markets, and the behavior of output, employment, and inflation. The econometrics course familiarizes students with the methods used to analyze economic data, and equip them with the tools necessary to critique and conduct empirical research. The electives draw on the skills developed in the introductory and core courses to gain a richer understanding of specific aspects of economic behavior and public policy.

The economics major and business careers. The analytical and critical thinking skills taught in economics classes are useful for many careers, including business. The major is not designed to provide pre-professional training in business or management, however. Students from a wide variety of majors, including the sciences and humanities, have gone on to successful business careers. We therefore advise those interested in business to acquire a broad exposure to the arts, social science, and natural sciences, and to major in a subject that engages their interest even if that subject is something other than economics.

Planning for a possible economics major. Given the hierarchical structure of the economics major, students considering the economics major should try to start with ECON 110 during their first year. Since ECON 255 requires that a prior statistics course (preferably STAT 201 but STAT 101 is acceptable), prospective economics majors should complete the statistics requirement relatively early in their college careers. Students considering the economics major should avoid enrolling in STAT 202 and instead take ECON 255 or talk to a faculty member in the department for curricular advice. Since the 400-level electives typically require at least two of the intermediate core courses (ECON 251, 252, or 255), students are strongly encouraged to complete the core courses by the end of junior year. We prefer that the three intermediate core classes be taken at Williams so students planning on studying abroad as juniors should aim to complete these courses before departure if possible.

Preparation for graduate school. Graduate study in economics requires considerably more mathematical training than that necessary for the economics major. We advise students who are considering a Ph.D. to take at a minimum MATH 150 or 151, MATH 209, MATH 250, and MATH 350. We also advise students to consider electives such as ECON 451, 471, 472, or 475 that present advanced perspectives on contemporary economic theory or econometrics. As graduate schools look for evidence of research aptitude, we also encourage those interested in graduate school to pursue the Honors program.

MAJOR REQUIREMENTS
Except for those receiving AP, IB, or A-level credit (see below), nine courses are required for the economics major. These are:

Introductory Courses
• Economics 110 Principles of Microeconomics
• Economics 120 Principles of Macroeconomics. Prerequisite: ECON 110

Passing the quantitative studies exam or the equivalent is a prerequisite for both classes. Both are suitable for non-majors. Electives numbered 200-299 will require one or both as prerequisites.

Core Courses
• Economics 251 Price and Allocation Theory. Prerequisites: MATH 130 and ECON 110
• Economics 252 Macroeconomics. Prerequisites: MATH 130, ECON 110 and ECON 120
• Economics 255 Econometrics. Prerequisites: MATH 130 plus either STAT 101 or 201. The combination of STAT 201 and 346 will satisfy the ECON 255 requirement, although not all upper-level electives and seminars accept STAT 201/346 as a prerequisite in lieu of ECON 255. POEC 253 may not substitute for ECON 255 in fulfilling the major requirements, although some electives may accept POEC 253 as a prerequisite in lieu of ECON 255.

The three core classes may be taken in any order. All of the 300- and 400-level electives will require at least one of the core classes, and many of the 400-level seminars require ECON 255.

Elective Courses
Students must complete at least four economics electives in addition to the introductory and core classes listed above. At least two must be advanced electives numbered 350 to 395. At least one must be a seminar numbered 450-480, and a second seminar may be taken in lieu of a 300-level elective. Enrollments preference for 400-level classes is given to those who have not already taken a seminar. Note that some of the advanced electives may have specific requirements beyond the core economics courses and MATH 130. Juniors and seniors majoring in Economics or Political Economy may, with the permission of the instructor, enroll in 500-level graduate courses given by the Center for Development Economics. These courses can substitute for advanced electives numbered 350-395, unless otherwise noted in the course description.

Credit for AP, IB and A-level Exams
The ECON 110 requirement will be waived for students who earned a 5 on the microeconomics AP exam, and the ECON 120 requirement will be waived for those who received a 5 on the macroeconomics AP exam. Students who did not receive advanced placement will receive major credit for the course and may complete the major with either eight or seven additional courses, depending on whether they place out of one or both introductory courses. These would include the introductory course for which no advanced placement was granted, the three core classes, and four electives.

Students who received an A on the A-level exam in economics or earned a 6 or 7 in the higher economics IB exam will receive credit for both ECON 110 and 120, and may complete the major with only seven additional courses. These would include the three core classes and four electives.

A score of 5 on the statistics AP exam, a 6 or 7 on the statistics IB exam, or an A on the A-level statistics exam will satisfy the statistics prerequisites for ECON 255.

STUDY ABROAD AND TRANSFER CREDIT
Students may receive credit for college courses taken at other institutions, including those taken as part of a study abroad program. Most economics courses taken elsewhere will qualify for 200-level elective credit. Some may be able to count towards a specific departmental requirement, including the introductory core courses or, qualify as a 300-level elective. In order to receive the appropriate credit, courses must be approved ahead of time by the Department’s Coordinator for Transfer/Study Abroad Credit. (The department’s web site will indicate which faculty member is serving as the Coordinator.) You can find general study away guidelines for Economics here.

THE DEGREE WITH HONORS IN ECONOMICS
Graduating with Honors requires the completion of a substantial piece of independent research. Those with an economics GPA of at least 3.5 are encouraged to apply. In addition, theses typically make use of
empirical methods, those considering writing a thesis are strongly advised to complete Econ 255 before the end of junior year.

The honors program involves working closely with a faculty adviser on a subject related to the faculty member's area of expertise. The first step in pursuing honors is therefore to develop a thesis proposal in consultation with a faculty adviser. The proposal is then submitted to the Department for approval.

The Department offers both a half-year and a full-year honors program:
- The half-year program entails enrolling in a one-semester seminar plus a WSP class. Students may either enroll in Econ 491 in the fall semester and Econ 492 in the spring. Proposals for a fall semester thesis are due in May of the junior year, while those doing a spring thesis will submit their proposals in December of the senior year. Those choosing the half-year option often base their projects on research that had been initiated in an advanced elective or a seminar, although this is not a requirement.
- The full-year program involves taking Econ 493 in the fall, Econ 31 during winter study, and Econ 494 in the spring. Proposals are due in May of the junior year.

Both programs require students to remain on campus during winter study.

Prospective honors students considering studying abroad during their junior year should plan to complete the core courses and at least one 300-level elective by the end of their sophomore year. They are also urged to begin their collaboration with their intended adviser prior to departure, and to consult with the Director of Research on the options for pursuing honors. (The Department’s web site will indicate which faculty member is serving as the Director of Research.)

Details on the two routes, the application procedure and deadlines are contained in memos sent to economics majors in the spring and fall semesters. The information is also available on the Department's website. In addition to completing the research project, the College Bulletin states that in order to graduate with honors, students must take at least one course in addition to the minimum number required for the major. Students in the full-year program may substitute Econ 493 for an upper-level elective (excluding those numbered 400-490). Students enrolled in the half-year program may not substitute Econ 491 or 492 for one of their electives.

GRADUATE COURSES IN DEVELOPMENT ECONOMICS
Graduate courses given by the Center for Development Economics are open to undergraduates. Students who have not taken the prerequisite, although in most cases, permission of instructor is also required. Unless otherwise specified in the course description, these courses can substitute for electives numbered 350-359 or 360-365 in the major.

ECON 110(F,S) Principles of Microeconomics (Q)
This course is an introduction to the study of the forces of supply and demand that determine prices and the allocation of resources in markets for goods and services, markets for labor, and markets for natural resources. The focus is on how and why markets work, why they may fail to work, and the policy implications of both their successes and failures. The course focuses on developing the basic tools of microeconomic analysis and then applying those tools to topics of public policy interest such as minimum wage legislation, pollution control, competition policy, international trade policy, discrimination, tax policy, and the role of government in a market economy.

Class Format: lecture/discussion
Requirements/Evaluation: problem sets, several short papers, at least one quiz, and midterm and final exam
Prerequisites: open only to juniors and seniors who have not taken an ECON course
Enrollment Limit: 30
Expected Class Size: 30

ECON 120(F,S) Principles of Macroeconomics (Q)
This course provides an introduction to the study of the aggregate national economy. It develops the basic theories of macroeconomics and applies them to topics of current interest. Issues to be explored include: the causes of inflation, unemployment, recessions, and depressions; the role of government fiscal and monetary policy in stabilizing the economy; the determinants of long-run economic growth; the long- and short-run effects of taxes, budget deficits, and other government policies on the national economy; the role of financial frictions in amplifying recessions; and the workings of exchange rates and international finance.

Class Format: lecture/discussion
Requirements/Evaluation: problem sets, short essays, midterm, final exam,
Prerequisites: ECON 110
Enrollment Limit: 40
Expected Class Size: 40
Distributional Requirements: Division 2
Quantitative/Formal Reasoning

ECON 204(F) Economics of Developing Countries
This course uses economic analysis to explore how gender differences can lead to differences in economic outcomes, in both households and the labor market. Questions to be considered include: How does the family function as an economic unit? How do individuals allocate time between the labor market and the household? How have changes in family structure affected women's employment, and vice-versa? What are possible explanations for gender differences in labor force participation, occupational choice, and earnings? What is the role of government in addressing gender issues in the home and the workplace? How influential are government policies that primarily affect women (e.g., comparable worth policies, AFDC/TANF, subsidization of child care)? The course will focus on the current experience of women in the United States, but will place these gender differences in a historical and cross-cultural context.

Class Format: lecture/discussion
Requirements/Evaluation: weekly discussion papers, two midterms, and a final paper and presentation
Prerequisites: ECON 100
Enrollment Limit: 25
Expected Class Size: 25
Distributional Requirements: Division 2

ECON 206(F) Introduction to Economics and Its Applications (Q)
This course is intended for students who do not wish to major in economics but who would like to learn something about the discipline and to develop a greater understanding of the ways in which economics can be used to explain behavior and to inform policy. Our focus will be on providing some very basic tools of economic analysis and important institutional background regarding the US and international economies, and then using those tools and institutional knowledge to analyze current policy issues.

Class Format: lecture/discussion
Requirements/Evaluation: problem sets, several short papers, at least one quiz, and midterm and final exam
Prerequisites: open only to juniors and seniors who have not taken an ECON course
Enrollment Limit: 30
Expected Class Size: 30

ECON 210(F,S) Principles of Microeconomics (Q)
This course is an introduction to the study of the forces of supply and demand that determine prices and the allocation of resources in markets for goods and services, markets for labor, and markets for natural resources. The focus is on how and why markets work, why they may fail to work, and the policy implications of both their successes and failures. The course focuses on developing the basic tools of microeconomic analysis and then applying those tools to topics of public policy interest such as minimum wage legislation, pollution control, competition policy, international trade policy, discrimination, tax policy, and the role of government in a market economy.

Class Format: lecture/discussion
Requirements/Evaluation: problem sets, several short papers, at least one quiz, and midterm and final exam
Prerequisites: open only to juniors and seniors who have not taken an ECON course
Enrollment Limit: 30
Expected Class Size: 30

Fall 2016

ECON 203(F) Gender and Economics
Crosslistings: ECON 203/WGSS 205
This course uses economic analysis to explore how gender differences can lead to differences in economic outcomes, in both households and the labor market. Questions to be covered include: How does the family function as an economic unit? How do individuals allocate time between the labor market and the household? How have changes in family structure affected women’s employment, and vice-versa? What are possible explanations for gender differences in labor force participation, occupational choice, and earnings? What is the role of government in addressing gender issues in the home and the workplace? How influential are government policies that primarily affect women (e.g., comparable worth policies, AFDC/TANF, subsidization of child care)? The course will focus on the current experience of women in the United States, but will place these gender differences in a historical and cross-cultural context.

Class Format: lecture/discussion
Requirements/Evaluation: weekly discussion papers, two midterms, and a final paper and presentation
Prerequisites: ECON 100

ECON 204(F) Economics of Developing Countries
Crosslistings: ECON 204/ENVI 234

Fall 2016
LEC Section: 01 MW 11:00 AM 12:15 PM Instructor: Lucie Schmidt
The leaders of poor countries almost universally proclaim "economic development" to be their eventual destination, but it is not easy to visualize the journey. Is rapid economic growth sufficient to generate development, or do governments need to pro-actively invest in health and education? When does globalization facilitate development? Is it true that corruption is major obstacle? Has the climate crisis upended our traditional models to the point where we need to rethink the notion of development? The class will introduce this set of issues, as analyzed by economists.

Class Format: lecture/discussion
Requirements/Evaluation: short essays, mid-term examination, 15-page final paper
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: one ECON class at Williams or prior course deemed equivalent by the Economics Department
Enrollment Preferences: first-year and sophomore students
Enrollment Limit: 25

ECON 209(S) Labor Economics
Employment—finding it (or looking for but not finding it), its compensation, and the conditions under which it occurs—is a key concern for most residents of advanced economies throughout their adult lives. Work is the main source of income for the vast majority of working-age adults in these economies, and work-related issues and policies reliably top national policy agendas. Labor economics is the study of these issues—how the level and distribution of skills, wages, employment, and income are determined in the market for labor and how various policies affect this market and its outcomes. In this course we will apply the tools of microeconomics to analyze labor force participation, the allocation of time to market work, migration, labor demand, investment in human capital (education and on-the-job training), discrimination, unions and unemployment. We will also examine the impact of government programs and mandates such as employment-based tax credits, unemployment insurance, antipoverty programs, and minimum wages on the labor market. We will devote particular attention to topics of current U.S. policy interest, including immigration, income inequality, and education.
Class Format: lecture/discussion
Requirements/Evaluation: problem sets, short writing assignments, midterm and final exam
Prerequisites: Econ 110
Enrollment Preferences: Economics and Political Economy majors and sophomores

ECON 211 Gender in the Global Economy
Crosslistings: WGSS 211/ECON 211
This course will present a feminist economic analysis of the global economy, and some of the urgent issues facing women in poor countries. The course will start by developing theoretical resources: these will include feminist critiques of economics theory, work on care labor and the shifting boundaries between markets, governments and households, theories of household bargaining, and discussions of intersectionality and difference. Then we will discuss a series of intertwined issues which may include the contradictory effects of structural adjustment and its successors; the informal sector and the 'invisible assembly line'; the economics of sex work and global sex trafficking; microcredit; the economics of the HIV/AIDS pandemic. We will finish by looking at community-based activism, non-governmental organizations, and the possibilities for first-world/third-world alliances.
Class Format: lecture/discussion
Requirements/Evaluation: reaction papers, midterm exam, research paper(s), participation in class discussion will count for part of the grade
Extra Info: additional requirements: two oral responses to seminar papers; two 2-page seminar response papers; one response to a peer's final paper
Prerequisites: none
Enrollment Preferences: Women's, Gender and Sexuality Studies majors
Enrollment Limit: 30

ECON 219(F) Global Economic History (W)
Why did Western Europe—and not China, India, or the Middle East—first experience the Industrial Revolution? Why did Latin America fall behind in the 20th century, while Japan and eventually China booming? What explains the historical success of the US economy? And why has African economic growth been relatively slow for so long? These and other questions will guide our
exploration of global economic development over the past several millennia. We will draw on micro and macroeconomic theory to help explain and interpret the historical roots of the modern global economy. Our focus will be broadly comparative across space and time, with an emphasis on how institutions, resource endowments, culture, technology, and market developments help explain economic differences and change around the world. Throughout the course, we will draw on micro and macroeconomic theories and concepts to help explain, frame, and interpret the historical roots of modern global economy. Class Format: tutorial; weekly one hour meetings in groups of two
Requirements/Evaluation: evaluation will be based on five 5- to 7-page papers, critiques of fellow students' papers, a longer version of a paper, and engagement in discussion
Extra Info: may not be taken on a pass/fail basis, not available for the fifth course option
Prerequisites: ECON 110 and ECON 120 or equivalent courses subject to instructor approval
Enrollment Preferences: first-year students and sophomores intending to major in Economics and/or History
Enrollment Limit: 10

ECON 222 Economics of the Arts and Culture
What economic forces influence the creation, presentation, preservation and ownership of art and culture? Should support for the arts be provided through private patronage, philanthropy, or public sector support? How does the mechanism of support for art affect the productivity and creativity of the artist? Does art make a good investment for an individual? How do art markets function and what determines the price of art? Why do some art museums and performing arts organizations require donations and public support and operate as non-profit enterprises, while other types of culture production and preservation operate as for-profit enterprise? What are the impacts on economic vitality and local economic development of cultural and arts organizations? When these impacts arise, how can (or should) they be used for public policy? This course will use the tools of economic analysis to present a framework for discussion and analysis of these and related questions.
Class Format: lecture/discussion
Requirements/Evaluation: midterm and final exam, two policy memoranda

ECON 225T Global Financial Crisis and African Economic Development (W)
Will the global financial crunch create a development crisis for Africa? Just two years ago the International Monetary Fund published the most optimistic growth projections for Africa in decades, predicting rapid growth driven by higher commodity prices, stronger agricultural output and the dividends of years of difficult economic reforms. Today, economic analysts are downgrading African growth forecasts in the face of growing poverty and macroeconomic challenges. Food prices have more than doubled in some countries—increasing hunger for the most vulnerable groups. Fuel costs—and subsidy policies in some countries—are creating macroeconomic imbalances, and the global financial crisis is depressing demand for Africa's exports. Private capital flows, which reached record levels until 2007, are expected to decline by $300-400 billion over the next two years, with bank lending falling, portfolio investment declining, and foreign direct investment decreasing. This triple-F crisis—food, fuel and financial—is posing renewed challenges to African leaders trying to tackle the imperatives of economic development and pro-poor and inclusive economic growth. This crisis is raising the costs of reforms in countries reliant on exports and international capital for growth. Successful strategies must combine policies more efficiently than ever—to balance the necessary reforms with initiatives that offset the costs for the most vulnerable. This tutorial will analyze critical questions posed by the emerging crisis: Which countries will be hit the hardest, and how deeply and for how long? Through which channels does the contagion afflict national economies? And perhaps most importantly, what coordinated strategies can African nations develop in order to foster effective responses? This tutorial will explore how policy-makers in Africa are working to build successful inclusive growth strategies, with fiscal, monetary, industrial, trade market policies reinforcing each other rather than working at cross purposes.
Class Format: tutorial, will meet weekly for one hour in groups of two
Requirements/Evaluation: evaluation will be based on five short papers and on—the student's oral presentations and commentary on the work of his/her colleagues
Extra Info: may not be taken on a pass/fail basis

ECON 227 Acquiring Art: Selecting and Purchasing Objects For WCMA Crosslistings: ARTH 327/ECON 227/ARTH 527
How do museums acquire art? Factors considered in selecting objects include: the museum’s existing collection, its mission, the availability of suitable objects, evaluation of the art historical importance of potential purchases, and the available budget. How can objects be identified and obtained at the most reasonable cost? How do auctions work and what strategies are best for purchasing works at auction? Is it more economical to purchase art at auction or to work with dealers or (for contemporary works) directly with artists? Do museums consider value in the same way as private collectors? What role does an object’s history and condition play in the purchase process? In this course students will work as teams to identify and propose objects for addition to the collection of the Williams College Museum of Art (WCMA). A significant budget will be made available for the acquisition. We will discuss approaches for identification, acquisition, and evaluation of objects. Student teams will be responsible for identifying a set of objects that would make appropriate additions to the WCMA collection, and a strategy for acquiring one or more of those objects. Working with the advice of WCMA curatorial staff, one or more of these objects will be acquired using the agreed strategy and the object will join the WCMA permanent collection. Graduate students will participate in all aspects of the class but may be required to undertake different assignments.
Class Format: seminar
Requirements/Final Exam: three papers of 10-15 pages each and class participation; student teams will make proposals for objects; each student will be required to submit three papers, dealing with the objects, the likely cost, and the best strategy
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: ECON 110 or permission of instructor
Enrollment Preferences: senior majors in Art History, Economics and Political Economy; graduate students will be admitted only by permission of instructors
Enrollment Limit: 20
Expected Class Size: 20
Distribution Notes: meets Division 1 requirement if registration is under ARTH; meets Division 2 requirement if registration is under ECON

Division 1
Not Offered Academic Year 2017
SEM Instructor: Kevin Murphy, Stephen Sheppard
ECON 228T(S) Water as a Scarce Resource (W) Crosslistings: ECON 228/ENVI 228
For a variety of reasons including environmental pollution, urbanization, changes in agricultural techniques, resource mismanagement, and the consequences of climate change, water is becoming a scarce resource even in places where it was relatively plentiful in the past, and it is likely to become an increasingly scarce resource over the coming decades. In this course we will use basic economic models to consider policy issues relating to water: access to water a basic human right, and if so, what market and non-market mechanisms should play a role in water allocation? Does public ownership of
water improve the way it is provided and used? Why do societies differ in their approaches to allocating water and are some systems better than others? What does it mean to have a property right to water? Could private property rights to water help address the water pollution problem? How can societies change their water-related property rights, regulations and social institutions when individuals have implicit or explicit rights to the institutional status quo? Who has the right to water that crosses international boundaries? How should societies allocate water across generations?

Class Format: tutorial, meeting with the instructor in pairs for an hour each week; a 5- to 7-page paper every other week (5 in all), prepare and present a written critique of their partners’ papers in alternate weeks, and revise and re-write one of their five papers

Requirements/Evaluation: evaluation will be based on the quality of the papers and on the quality of the student’s oral presentations and commentary on the work of his/her colleagues

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: ECON 110 or equivalent

Enrollment Preferences: first-year students and sophomores intending to major in Economics and/or major or concentrate in Environmental Policy or Environmental Science or Environmental Studies, and to students who are already major or concentrators in those subjects

ECON 229 Law and Economics (Q)

This course applies the tools of microeconomic analysis to private (i.e., civil) law. This analysis has both positive and normative aspects. The positive aspects deal with how individuals respond to the incentives created by the legal system. Examples include: how intellectual property law encourages the creation of new knowledge while simultaneously restricting the dissemination of intellectual property; how tort law motivates doctors to avoid malpractice suits; and how contract law facilitates agreements. The normative aspects of the analysis ask whether legal rules enhance economic efficiency (or, more broadly, social welfare). Examples include: what legal rules are most appropriate for mitigating pollution, ensuring safe driving, and guaranteeing workplace safety? The course will also cover the economics of legal systems; for example, what are the incentives for plaintiffs to initiate lawsuits and what role do lawyers play in determining outcomes. The course will also consider potential reforms of the legal system. In the 2014-15 academic year, the course will place more emphasis on intellectual property law as part of the campus-wide initiative, “The Book Unbound,” associated with the opening of the new library.

Class Format: lecture/discussion

Requirements/Evaluation: evaluation will be based on class participation, problem sets, short papers based on actual court cases and possible legal reforms, a midterm exam, and a final exam

Prerequisites: ECON 110

ECON 230 The Economics of Health and Health Care (W)

In recent years, the intersection between health and economics has increased in importance. The costs of health care have been rising, although more slowly in the past few years. A substantial fraction of the United States population lacks health insurance, with the implementation of the Affordable Care Act intended to remedy that problem. In the United States and around the world the rising elderly population is putting increasing pressure on health spending. Globally, the HIV/AIDS pandemic is causing severe economic hardship, and many people lack access to basic health care. More positively, advances in health care have widened the scope of possible treatments. Given the importance of good health for individual well-being, it is not surprising that health, health care and how to pay for it are sources of anxiety for individuals and policymakers worldwide. In this course we will analyze the economics of health by applying standard microeconomic techniques to the problems of health and health care markets. The course focuses on three broad issues: the inputs to health and the demand for health care, the structure and consequences of public and private health insurance, and the supply of health care. Special attention will be devoted to topics of current public policy, including the problems of rising costs and cost containment, health insurance reform, the changing nature of health care provision, changing public policies in the Medicare and Medicaid programs, hospital competition, and the determinants and consequences of technological change in medicine.

Class Format: lecture/discussion

ECON 232(S) Financial Markets, Institutions and Policies (Q)

This course first explores the role of the financial system and financial markets, and how they interact with the economy. What does finance do? How are asset prices determined, and how are these prices related to interest rates? Are financial markets efficient, and what are the implications of their efficiency or lack thereof? What does the financial system help with the management of risks faced by society? Second, it analyzes the role of the central bank and the conduct of monetary policy. How do central banks set monetary policy and how do those policies affect the economy? How does monetary policy change when interest rates are (virtually) zero? Third, it studies the complexities associated with managing and regulating modern financial instruments and markets. Why are financial crises so common, and why has regulation not succeeded in preventing them?

Class Format: lecture

Requirements/Evaluation: problem sets, midterm, a debate and/or presentation, and a final exam

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

ECON 233(F) Behavioral Economics and Public Policy

In many ways, the fields of psychology and economics both study the same phenomena: the incentives that influence our decision-making across different contexts. This course provides a survey of the ways in which these two fields intersect, i.e. behavioral economics. Topics include how individual responses to economic incentives can be influenced by heuristics, framing, social norms, and other cognitive or social incentives. Concurrently, the course will review how these concepts can be (or are already being) applied to firm strategy, development, and public policy contexts. These include the role of behavioral economics in programs geared towards reducing poverty, increasing environmental conservation, and encouraging education investment, among others. The course will also discuss whether and how we ought to judge which behaviors are socially desirable and worth encouraging through policy.

ECON 235 Urban Centers and Urban Systems (Q)

Cities, systems of cities, and the interactions between cities are the outcome of human decisions and reflect their social structure and desire for interaction. The form of these urban areas is determined by the choices made by the people who reside in, work in, and travel between cities. Economic forces influence and constrain these choices, and economic models of decision-making can help us to explain and predict the patterns that result. These models help us to comprehend the structure of urban areas. This course will introduce the ideas and some of the analytic tools that assist in understanding the economic foundations of urban centers and urban systems. Topics addressed in the course will include the determinants of land use, location of firms, choice of transportation mode, flows of capital investment into real estate, housing prices and housing availability and regulation of housing markets, movement of population from one city to another, and public policies designed to deal with urban problems.

Class Format: lecture/discussion

Requirements/Evaluation: two "policy memoranda" on assigned topics, midterm, and final exam

Prerequisites: ECON 110

ECON 240T Colonialism and Underdevelopment in South Asia (D) (W)

British colonial rule in South Asia shaped economy and society in fundamental ways. As resistance to colonial rule emerged in the late nineteenth century, "nationalist" writers developed a critique of its economic impact via taxation, fiscal policy, trade, and many other policies. In their turn, supporters of British rule, "apologists," argued that British rule had laid the foundations of economic growth by securing property rights, enforcing contracts, and developing infrastructure. The debate between "nationalists" and "apologists" has never quite ended, but after the recent growth of the Indian economy it has lost some of its emotional charge. We will use this opportunity to not only examine the economic questions, but also how power and resistance have shaped and possible additional assignments

Prerequisites: ECON 110

ECON 252(F,S) Macroeconomics (Q)

A study of aggregate economic activity: output, employment, inflation, and interest rates. The class will develop a theoretical framework for analyzing economic growth and business cycles. The theory will be used to evaluate policies designed to promote growth and stability, and to understand the historical development of capitalism in Western Europe and the United States: the classical liberalism of Adam Smith, Karl Marx's...

Class Format: lecture/discussion

Requirements/Evaluation: problem sets and/or written assignments, midterm(s), and a final exam

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: ECON 110 and 120 and MATH 130 or its equivalent

ECON 255(F,S) Econometrics (Q)

An introduction to the theory and practice of applied quantitative economic analysis. This course familiarizes students with the strengths and weaknesses of the basic empirical methods used by economists to evaluate economic theory against economic data. Emphasizes both the statistical foundations of regression techniques and the practical application of those techniques to empirical research. Computer exercises will provide experience in using the empirical methods, but no previous computer experience is expected. Highly recommended for students considering graduate training in economics or public policy.

Class Format: lecture

Requirements/Evaluation: problem sets, two midterms, group presentations, and possible additional assignments

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: MATH 130 and STAT 101, or STAT 201 or equivalent, plus one course in ECON

ECON 259(F,S) Economic Liberalism and Its Critics

Crosslistings: POEC 250/ECON 299/PSCI 238

Economic liberalism holds that society is better off if people enjoy economic freedom. Its critics point to what they believe this position ignores or what it wrongly assumes, and hence, how it would make bad policy. This course explores the relationship between political and economics by surveying influential works of political economy. Its first part examines major thinkers in relation to the historical development of capitalism in Western Europe and the United States: the classical liberalism of Adam Smith, Karl Marx's...
revolutionary socialism, and the reformist ideas of John Stuart Mill and John Maynard Keynes. The second part considers mid-20th-century writers who revise and critique economic liberalism from a variety of perspectives, including Friedrich Hayek, Milton Friedman, Ronald Coase, Arthur Okun, and Albert O. Hirschman. The third part surveys significant recent contributions relevant to the themes of the course, with applications to current public policy issues, including topics such as: power relations and autonomy in the workplace; asymmetric information and social insurance; economic inequality and distributive justice; equality of opportunity; the economics of health care; positional goods and the moral foundations of capitalism; intergenerational equity and climate change; economic nationalism and new trade theory; behavioral economics; finance and financial crises; and rent-seeking. The combination of the historical focus of the early part of the course with discussion of modern policy issues and debates in the latter part of the course permits you to appreciate the ongoing dialogue between classical and contemporary views of political economy.

**Class Format:** lecture/discussion

**Requirements/Evaluation:** eight essays of 650 words each, several short homework assignments, and a final exam

**Prerequisites:** ECON 110 and 120 or equivalent; PSCI 201, 202, 203, or 204 (may be taken concurrently with POEC 250); open to non-majors

**Enrollment Preferences:** Political Economy majors and sophomores intending a Political Economy major

**Enrollment Limit:** 25

**Expected Class Size:** 35

**Department Notes:**
- Fall 2016
- ECON 351 Tax Policy (Q) (W)

The tax system is a major element of public policy. In addition to raising revenue for government expenditure programs, policymakers use the tax system to redistribute resources and to promote a variety of economic policies. For example, the United States tax system has specific rules to encourage savings, education, and investment. Inherently, many tax policy choices involve trade-offs between equity and efficiency. The purpose of this course is to clarify the goals and possibilities of tax policy, mainly through an examination of U.S. federal tax policy (though the search for possible reforms may lead us to examine policies from other countries). The course will examine the choice of the tax base (income or consumption), portfolios of fiscal transfers in relation to the tax rate structure, the choice to tax corporate income separately from personal income, and a variety of specific tax policy issues (e.g., retirement saving, child care, the "marriage" tax, capital gains taxation, and the taxation of housing).

**Class Format:** discussion/seminar

**Requirements/Evaluation:** several shorter papers, a research paper, and final exam

**Prerequisites:** ECON 251 and preferably some familiarity with statistical analysis

**Enrollment Preferences:** senior Economics majors

**Enrollment Limit:** 19

**Expected Class Size:** 19

**Distributional Requirements:**
- Division 2
- Quantitative/Formal Reasoning

**Writing Intensive:**
- POEC U.S. Political Economy + Public Policy Course

**Not Offered Academic Year 2017**

**LEC Instructor:** Sara LaLumia

**ECON 352(S) Financial Development and Regulation**

Crosslistings: ECON 352/POEC 352

This course focuses on the financial system and its role in economic development. The first part explores the functions of finance, how it contributes to growth, and reviews different models of financial sector development and their influence on how governments viewed the sector. It will examine experiences with financial sector repression and subsequent liberalization, and investigate the causes and impact of financial crises. Then it will study how to make finance effective and how to prevent or minimize crises, analyzing government’s role as agent, supervisor, or regulator, and market forces and their own role. In this final part, we will be devoted to the role of institutions (laws, norms, culture) and incentives in financial sector development.

**Class Format:** lecture/discussion

**Requirements/Evaluation:** midterm, participation in class discussion and debates, and a final research paper

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**Prerequisites:** for undergraduates, POEC 253 or ECON 255; undergraduate enrollment limited and requires instructor’s permission

**Enrollment Limit:** 25

**Expected Class Size:** 20-25

**Distributional Requirements:**
- Division 2

**Other Attributes:**
- POEC International Political Economy Courses

**Not Offered Academic Year 2017**

**SEM Instructor:** Peter Pedroni

**ECON 357(S) The Economics of Higher Education**

This tutorial will utilize economic theory and econometric methods to understand the various issues pertaining to the economics of colleges and universities. In particular, we’ll discuss the logic of non-profit enterprises, the microstructure of a college or university, competition in the market for higher education, policies impacting tuition and financial aid, the individual and societal returns from investments in higher education, and the dynamic features of academic labor markets. Particular attention will be paid to selective liberal arts colleges.

**Class Format:** tutorial; will meet weekly in groups of two

**Requirements/Evaluation:** evaluation will be based on six 5- to 7-page papers and on the quality of the student’s oral presentations and commentary on the work of his/her colleagues

**Extra Info:** not available for the fifth course option

**Prerequisites:** ECON 251 and 255 or STAT 346 or permission of instructor

**Enrollment Preferences:** Economics majors

**Enrollment Limit:** 10

**Expected Class Size:** 10

**Distributional Requirements:**
- Division 2

**Not Offered Academic Year 2017**

**TUT Section:** T1 TBA Instructor: David Zimmerman

**ECON 358 International Trade**

**Crosslistings:** ECON 515/ECON 359

This class will examine the causes and consequences of globalization. We will consider the classic models of international trade and discuss the empirical relevance of these theories. Other global forces such as immigration, foreign direct investment, offshoring, trade policies, and trade agreements will also be examined. Throughout the course we will focus on the factors driving globalization as well as the welfare and distributional implications.

**Class Format:** lecture/discussion

**Requirements/Evaluation:** problems sets, short essays, midterm, and final exam

**Prerequisites:** ECON 251 and ECON 255

**Enrollment Preferences:** senior Economics majors

**Enrollment Limit:** 20

**Expected Class Size:** 20

**Distributional Requirements:**
- Division 2

**Other Attributes:**
- POEC International Political Economy Courses

**Not Offered Academic Year 2017**

**SEM**
rate regimes, capital account regimes, and various types of fiscal policy institutions and policy regimes, including fiscal rules.

**Class Format**: lecture

POEC International Political Economy Courses

**Spring 2017**

SEM Section: 01  MWF 08:30 AM 09:45 AM  Instructor: Peter Montiel

**ECON 360 International Monetary Economics**

This course studies the macroeconomic behavior of economies that trade both goods and assets with other economies; international financial transactions, especially the buying and selling of foreign money, the role of central banks and private speculators in determining exchange rates and interest rates, and the effects of international transactions on the overall performance of an open economy. Additional topics may include the "asset market approach" to exchange rate determination, the nature and purpose of certain international institutions, and important current events.

**Class Format**: lecture

**Requirements/Evaluation**: for first semester: two hour tests and a choice between a 10-page paper or a comprehensive final; requirements for second semester: two exams and a term paper

**Prerequisites**: ECON 251 and 252

**Enrollment Limit**: 25

**Expected Class Size**: 25

**Distributional Requirements**: Division 2

**Other Attributes**: GBST Economic Development Studies Electives

POEC International Political Economy Courses

**Not Offered Academic Year 2017**

**LEC**

**ECON 361 Political Economy and Economic Development**

**Crosslistings**: ECON 361/ECON 524

This course is intended as an introduction to the newly emerging field of political economy of institutions and development. Key questions of interest include how voters behave and how this affects policy and economic outcomes; the nature, evolution and economic implication of corruption, and how it can be controlled; and the economics of conflict. The goal of the course is both to provide students of a sense of the frontier research topics in political economy in developing countries and to introduce them to the methodologies used to investigate these topics.

**Class Format**: lecture/discussion

**Requirements/Evaluation**: problem sets, quizzes, presentation, final exam

**Extra Info**: may not be taken on a pass/fail basis

**Prerequisites**: ECON 110 and (ECON 255 or STAT 346) or permission of instructor

**Enrollment Preferences**: junior and senior majors

**Enrollment Limit**: 25

**Expected Class Size**: 25

**Distributional Requirements**: Division 2

**Other Attributes**: POEC Comparative POEC/Public Policy Courses

**Not Offered Academic Year 2017**

**LEC**  Instructor: Jessica Leight

**ECON 362(F) Global Competitive Strategies**

This course maintains an IO perspective, acknowledging the centrality of large, multinational firms in determining the pattern and success of a nation's international economic activities (which include, but are not limited to, a wide range of licensing, trade, and diverse configurations of foreign direct investment activities, and their implications for employment, profitability, and social welfare at home and abroad.) In this sense, we depart from international economic approaches that focus foremost on the ways in which a country's factor endowments, domestic market characteristics, and government policies promote or impede such activities, although in our treatment we do not neglect these factors, but treat them as constraints upon, or resources supporting, the optimizing behaviors of large firms. During and following a case-based module in which we learn and simulate the strategic decision processes used by executives of multinationals, we examine the actual trade and investment decisions of those firms, compare them to the predictions of international trade and IO theories, and seek to explain divergences where they are identified. Throughout, competitive strategies of domestic and foreign rivals in markets around the world are explored. As well, the types and efficacy of various government policies, and how they interact with the economy. What does finance do? How are asset prices determined, and how are these prices related to interest rates? Are financial markets efficient, and what are the implications of their efficiency or lack thereof? How does the financial system help with the management of risks faced by society? Second, it analyzes the role of the central bank and the conduct of monetary policy. How do central banks set monetary policy and how do those policies effect the economy? How does monetary policy change when interest rates are (virtually) zero? Third, it studies the complexities associated with managing and regulating modern financial instruments and markets. Why are financial crises so common, and why has regulation not succeeded in preventing them?

**Class Format**: lecture and discussion

**Requirements/Evaluation**: problem sets, midterm, a debate and/or presentation, and a final exam

**Prerequisites**: ECON 252

**Enrollment Preferences**: Economics majors

**Enrollment Limit**: 25

**Expected Class Size**: 25

**Distributional Requirements**: Division 2

**Not Offered Academic Year 2017**

**LEC**  Instructor: Kenneth Kuttner

**ECON 364(F) Theory of Asset Pricing (Q)**

What is the price of time? What is the price of risk? How do markets allocate resources across time and uncertain states of the world? This course theoretically studies how markets allocate scarce resource across time and when outcomes are risky. The "goods" in such markets are called "assets" and the prices of "assets" determine the cost of trading resources across time and across uncertain states of the world. We theoretically investigate how equilibrium determines the price of time, then asset price implications; then asset allocations and prices in the presence of risk; finally, implications for new assets.

**Class Format**: lecture

**Requirements/Evaluation**: problem sets and exams

**Extra Info**: may not be taken on a pass/fail basis

POEC International Political Economy Courses
ECON 372(S) Incentives and Development Policy
Crosslistings: ECON 521/ECON 372

Why isn't the whole world developed? This course (and instructor) is of the opinion that the difficulty of getting incentives right is the key source of inefficiency. The course therefore studies how limited enforcement and asymmetric information constrain development, and about innovative development designs that attempt to overcome these constraints. The course readings will be a mix of field studies, empirical evidence and theoretical tools from game theory. Incentive and corruption problems in health, education, the regulation of banks and natural monopolies, privatization, budgeting, debt forgiveness, microfinance, climate treaties and ethnic violence will be studied using a unified framework. Note: this course was developed to address issues that arise in the countries represented at the CDE.

Class Format: seminar
Requirements/Evaluation: two hour-long tests and a final policy project
Extra Info: may not be taken on a pass/fail basis
Prerequisites: undergraduate enrollment limited and requires instructor's permission
Enrollment Preferences: intended for CDE Fellows
Enrollment Limit: 19
Expected Class Size: 19
Distributional Requirements: Division 2

Spring 2017
SEM Section: 01 TR 11:20 AM 12:35 PM Instructor: Ashok Rai

ECON 374(T) Poverty and Public Policy (W)
Since 1965, the annual poverty rate in the United States has hovered between 10% and 15%, though far more than 15% of Americans experience poverty at some point in their lives. In this course, we will study public policies that, explicitly or implicitly, have as a goal improving the well-being of the poor in this country. These policies include safety net programs (Aid to Families with Dependent Children/Temporary Assistance to Needy Families, Supplemental Nutrition Assistance Program/Food Stamps, Medicaid/Children's Health Insurance Program, and housing assistance), education programs (Head Start and public primary and secondary education), and parts of the tax code (the Earned Income Tax Credit). We will explore the design and functioning of these programs, focusing on questions economists typically ask when evaluating public policy: Does the policy achieve its goals? Does the design of the policy lead to unintended effects (either good or bad)? Could it be redesigned to achieve its goals in a more cost-effective manner? Through in-depth study of these programs, we hope to learn how economists bring theoretical models and empirical evidence to bear on important questions of public policy.

Class Format: tutorial
Requirements/Evaluation: evaluation will be based on six 5- to 7-page papers and on the quality of the student's oral presentations and commentary on the work of his/her colleagues
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: ECON 253 or ECON 255 or STAT 346 or permission of instructor
Enrollment Preferences: Economics majors, Political Economy majors

ECON 377 Inspiration/Perspiration: The Economics of Innovation and Technological Change
From agriculture, to the steam engine, to modern biotechnology, technological change drives economic growth and rising living standards. Whether we are talking about great inventions or small inventions, the tools of economics can help us understand how new technologies emerge, spread, and become obsolete. In this course, we will first take a microeconomic approach to examining the creation of new knowledge, the translation of ideas into practical applications, and the adoption of new technologies by producers and consumers. We will study the incentives that potential innovators face, how these are affected by patents and other forms of intellectual property rights, and how different market structures can influence the resulting trajectory of technological change and utilization. We will also confront the macroeconomic implications of innovation, and discuss how government policies can foster technological change and address its consequences. Throughout the course, we will explore historical and contemporary case studies of the creation, exploitation, and consequences of innovation.

Class Format: lecture
Requirements/Evaluation: reading responses, problem sets, quizzes, class discussions, two small research projects; students will undertake a group project and write their own 8- to 10-page research paper on the economics of a particular innovation of their choosing
Prerequisites: ECON 251 and (ECON 255 or POEC 253 or STAT 346)
Enrollment Preferences: junior and senior Economics majors
Enrollment Limit: 25
Expected Class Size: 25

ECON 378(F) Long-Run Perspectives on Economic Growth (Q)
The world today is characterized by vast differences in the standard of living, with about a 30-fold difference in per-capita incomes between the poorest country and the most affluent. What explanations do long-run growth economists have to offer for these differences in levels of prosperity across nations? Are the explanations to be found in underlying differences between countries over the past few decades, the past few centuries, or the past few millennia? If contemporary differences in living standards have "deep" historically-rooted origins, what scope exists for policies to reduce global inequality today? Can we expect global inequality to be reduced gradually over time, through natural processes of economic development, or are they likely to persist unless action is taken to reduce them? This course will present a unified theory of economic growth for thinking about these and related questions. Examples of issues to be covered include: the Neoclassical growth model and its inefficiency for answering questions about development over long time horizons; Malthusian stagnation across societies during the pre-industrial stage of economic development; the importance of the so-called demographic transition and of human capital formation in industrialization; the persistent influence of colonialism, slavery, and ethnic fragmentation in shaping the quality of contemporary politico-economic institutions; and the long-lasting effects of geography on comparative development, through its impact on the emergence of agriculture in early human societies and its influence in shaping the genetic composition of human populations across the globe.

Class Format: lecture/discussion
Requirements/Evaluation: at least one exam, a research paper and a class presentation
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: ECON 251 and ECON 252 or permission of instructor, prior exposure to econometrics (either ECON 255 or STAT 346) is highly recommended but not essential
Enrollment Preferences: junior and senior Economics majors

ECON 379(S) Program Evaluation for International Development (Q)
Crosslistings: ECON 523/ECON 379
Development organizations face strict competition for scarce resources. Both public and private organizations are under increasing pressure to use rigorous program evaluation in order to justify funding for their programs and to design more effective programs. This course is an introduction to evaluation methodology and the tools available to development practitioners, drawing on examples from developing countries. It will cover a wide range of evaluation techniques and discuss the advantages and disadvantages of each. The course is a mix of applied econometrics and practical applications covering impact evaluation, estimation, analysis, and interpretation. You will learn to be an active reader of evaluations, and to develop your own plan to evaluate an existing program of your choice.

Class Format: seminar
Requirements/Evaluation: problem sets, midterm exam and one 7- to 10-page essay
Extra Info: may not be taken on a pass/fail basis
Prerequisites: one program economics course or microeconomics course (ECON 504 or ECON 110), and one empirical methods course (POEC 253 or ECON 255, 502, or 503)
Enrollment Preferences: CDE Students, but undergraduates with the prerequisites are welcome

ECON 380 Population Economics
Crosslistings: ECON 380/ECON 519
This course is an introduction to the economic analysis of demographic behavior and the economic consequences of demographic change. An important aim is to form an understanding of the cross-temporal trends in fertility, mortality, migration, and family composition, and the implications of these trends for the economy. The course demonstrates the application of microeconomic theory to demographic behavior, including fertility, marriage, and migration. Students are introduced to basic techniques of demographic measurement and mathematical demography. Selected topics include the economic consequences of population growth in developing countries, the
economics of fertility and female labor force participation, the effects of an older age structure on the social security system, and the relationship between population growth and natural resources.

Class Format: lecture/discussion
Requirements/Evaluation: at least one exam, a research paper and a class presentation

ECON 381(S) Global Health Policy Challenges (Q)

Poor health is both a cause and a consequence of poverty. It can trap individuals in poverty, prevent them from engaging in economic growth. This course will be structured around major global health challenges, including maternal health, HIV/AIDS, tuberculosis, malaria, diarrheal disease, nutritional deficiencies and obesity. For each topic, we will first examine the prevalence of the problem. Then, we will turn to the evidence about the costs, benefits, and effectiveness of existing policy solutions. Finally, we will use this information to debate policy alternatives and develop policy recommendations that take into account budgetary, political, and social constraints.

Class Format: lecture
Requirements/Evaluation: three policy memoranda, a midterm exam and a substantive research paper that includes some analysis of existing data
Extra Info: may not be taken on a pass/fail basis
Prerequisites: ECON 251 and (POEC 253 or ECON 255 or STAT 346) or permission of instructor

ECON 383 Cities, Regions and the Economy

Cities and urbanization can have significant impacts on the economy. In many developed economies, a process of regional decline is associated with older, industrial cities. In developing countries, the process of economic growth is generally associated with increasing urbanization. Urbanization, with its increasing centralization of population and production, puts particular pressure on markets to allocate resources for provision of land, housing, transportation, labor and public goods. Urbanization can alter the productivity of land, labor, and capital in ways that can improve the welfare of residents and the performance of the broader economy. In this course we will examine these conflicting economic forces and examine some recent research that contributes to our understanding of the difference between regional growth and decline, and the role that the urban structure plays in these processes. We will examine the function of land, housing, transportation, and labor markets in the urban context, and the scope for public policies to improve the performance of the regional economy.

Class Format: lecture/discussion

ECON 386 Environmental and Natural Resource Policy (Q)

Crosslistings: ECON 386/ENVI 386/ECON 516

Economic activity often damages the environment significantly, especially in developing countries. Firms may clear-cut valuable forests, while consumers may drive high-pollution vehicles with little thought for the environmental consequences. Economists have proposed a variety of policy remedies, from pollution taxes to tradable permit schemes and restrictions on the quantity of pollution. This course first examines the relative merits of these policies from a theoretical perspective. When pollution damage is uncertain, is it better to use a pollution tax or a quantity restriction? Is it worse to set a pollution tax too high than to set it too low? It then proceeds to the practical issues that attend policy implementation, particularly where state capacity is limited. What is the best policy when inspectors can be bribed or bribed? When resource extraction is hard to monitor? Case studies will likely include policies aimed at deforestation, mineral ownership and extraction, particulate air pollution from industry and transportation, and carbon emissions from electricity generation. In evaluating policies we will think about both efficiency and the distribution of costs and benefits. What if environmental regulation only benefits the wealthiest people in a country? We will also examine the environmental consequences of policies aimed at other problems, like poverty and low education.

Class Format: seminar
Requirements/Evaluation: problem sets, paper, brief presentation, a midterm, and a final exam
Prerequisites: ECON 251, familiarity with statistics
Enrollment Preferences: senior Economic majors and CDE fellows

ECON 387(S) Economics of Climate Change (Q)

Crosslistings: ECON 387/ECON 522/ENVI 387

This course introduces the economic view of climate change, including both theory and examples. Given the substantial use, inputs implied by the current stock of greenhouse gases (GHGs) in the atmosphere, we will begin by looking at impacts on agriculture, health, income, and migration in both wealthy and poor countries. Next we will study adaptation, including capital investments and behavioral changes, and insurance. We will examine the sources of climate change, especially electricity generation and transportation, and think about optimal policies. What is the socially optimal amount of climate change?
difficulties? In considering policy, we will employ not only theoretical
predictions, but also the growing body of evidence from attempts to regulate
GHGs. Examples include China’s pilot cap-and-trade programs, the EU ETS,
and the US Clean Power Plan. We will pay particular attention to the political
economy of regulation and ways in which policy results have departed from
theoretical predictions. Finally, we will discuss the political economy of
tackling climate change, pointing out questions on which economic theory
provides little guidance.

Class Format: lecture

ECON 388 Urbanization and Development
Crosslistings: ECON 388/ECON 517/ENVI 388
At current rates of growth, the combined population of urban areas in
developing countries will double in the next 30 years. The land area devoted
to urban use is expected to double even more quickly. The costs of providing
housing and infrastructure to accommodate this growth are enormous, but the
failures of housing development are even larger. The decisions made in response to
these challenges will affect the performance of these countries and the health and welfare of
the urban residents. By affecting global patterns of energy use, these decisions will have
broader impacts on the entire planet. This course will focus on these challenges.
What are the economic forces that drive the process of urbanization, and how does the level of urbanization affect economic
development? How are policies towards housing, transportation, public finance and development affected by urbanization? What policy choices are available, and which are most likely to succeed in dealing with the challenges of urban growth?

Class Format: lecture/discussion
Requirements/Evaluation: a midterm and a final exam, plus a paper that evaluates specific problems, policy alternatives, and provides some analysis of relevant data
Prerequisites: ECON 251 plus POEC 253, ECON 255, 502 or 503; undergraduate enrollment limited and requires instructor's permission
Expected Class Size: 20
Distributional Requirements:
Division 2
Other Attributes:

ECON 389(S) Tax Policy in Emerging Markets (Q)
Crosslistings: ECON 514/ECON 389
Taxes are half of what government does. So if you are interested in what
government policy can do to promote efficiency, equity, and economic
development, you should be interested in tax policy. Governments must raise
tax revenue to finance critical public goods, address other market failures and
distributional issues, and to avoid problems with debt and inflation. Taxes
typically take up anywhere from ten to fifty percent of a country’s income, they
profoundly shape the incentives to undertake all varieties of economic activity,
and the government expenditures that they finance have potentially large
consequences for human welfare. So the stakes involved in improving tax
policy are quite large. All of these issues are of great importance in emerging
markets (developing and transition economies), but in these nations taxation is
especially challenging because of serious problems with tax evasion and
administration. This class provides an in-depth exploration of tax policy, with
an emphasis on the challenges and issues most relevant in emerging markets.
Topics addressed in the class include: how basic economic principles can be
applied to help one think about the efficiency and equity consequences of tax
policies; how personal income taxes, corporate income taxes, and value-
added taxes are designed and administered and how they influence the
economy; ideas for fundamental reforms of these taxes; theory and evidence
in the debate over progressive taxes versus “flat” taxes; how various elements of
tax design affect incentives to save and invest; how market failures and administrative problems may influence the optimality of different tax policies; the implications of global capital flows and corporate tax avoidance for the
design of tax policy; tax holidays and other special tax incentives for
investment; empirical evidence on the influence of taxes on economic growth,
foreign direct investment, labor supply, and tax evasion; tax policy towards
natural resources such as minerals and oil; case studies of efforts to reform
tax administration and reduce tax evasion and corruption; taxes on land and
property; taxes on imports and exports; presumptive taxation; and the informal
economy and its implications for tax policy.

Class Format: seminar
Requirements/Evaluation: midterm exam, problem sets, two 7- to 10-page essays
Prerequisites: one public economics course or microeconomics course (ECON 504 or ECON 110), and one empirical methods course (POEC 253 or ECON 255, 502 or 503); students who have previously taken ECON 351 will not be enrolled
Enrollment Preferences: CDE students, but undergraduates with the prerequisites are welcome
Enrollment Limit: 15

ECON 390T Financial Crises: Causes and Cures (W)
Crosslistings: ECON 390/ECON 536
Financial crises have been with us for as long as banking has existed. What are crises such as a regular fixture of societies, and what can be done to prevent them, or at least reduce their cost? Topics examined include bubbles and
swindles, especially when these spillover to the broader macroeconomy; the
role of information in banking in normal times and in bank runs; boom-bust cycles in asset markets; international contagion; crisis resolution techniques; and the extensive history of attempts to improve regulation so as to reduce the frequency and cost of crises. Crises in developing and developed economies from the South Sea Bubble to the Euro Crisis will be examined, and the role of political economy factors in their run-up and resolution will be featured.

Class Format: tutorial
Requirements/Evaluation: students will write 5-6 papers during the term, and will prepare and deliver formal comments on 5-6 papers written by other students
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: ECON 252 and 255
Enrollment Preferences: Economics majors
Enrollment Limit: 10

Not Offered Academic Year 2017
TUT Instructor: Gerard Caprio

ECON 391(F) Economic Analysis of Housing Markets (W)
Housing is one of the most basic of human needs and the housing market is
one of the largest, most important and most heavily regulated markets in
economic analysis around the world. At various times economists, policy
makers and the general public have regarded the housing market as irrational
and malfunctioning in a variety of ways. Why? In this course we will explore
and analyze the workings of the housing market. In what ways can housing and housing
conditions serve as an indicator of quality of life? How do housing markets
affect the sustainability of cities? These and other questions will be the focus of reading and discussion for the course.

Class Format: tutorial
Requirements/Evaluation: each student will write a paper every other week, and comment on his/her partner's work in the other weeks
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: ECON 251 and 255 or permission of instructor
Enrollment Preferences: Economics majors
Enrollment Limit: 25
Expected Class Size: 10

ECON 393 International Macroeconomics
This model based course examines the workings and interactions among
national economies in the global arena and the implications for
macroeconomic policy analysis. Topics include analysis of international
financial asset markets, international capital flows and the transmission of
business cycles internationally. A series of both factual and counterfactual
ECON 394(F) European Economic History
Economic history directly informs our understanding of the process of economic development. In this mind, this course will explore a series of questions related to the economic development of Europe from the early modern period until today. Why did modern economic growth first occur in Europe, and not in China or the Middle East? Why did the Industrial Revolution occur in Britain and not France? What was the role of colonialism in the acceleration of European growth? What explains the rise and fall of the Soviet economy? What are the causes and consequences of European economic integration since World War II? To answer these and other questions, we will investigate how institutional changes, the evolution of technology, aspects of globalization, and various forms of government intervention have impacted economic growth and living standards in European history, and how those developments have affected the rest of the world. Drawing on a wide variety of empirical and theoretical readings, the course will focus on how economic historians marshal evidence and construct arguments in ways that borrow from and contribute to other fields of economics.

Class Format: lecture/discussion
Requirements/Evaluation: class participation, reading responses, short assignments, and a final research paper
Prerequisites: ECON 251 or ECON 252 AND (ECON 255 or POEC 253 or STAT 346)
Enrollment Limit: 25
Expected Class Size: 25
Distributional Requirements: Division 2

Fall 2016
LEC Section: 01 Cancelled

ECON 397(S) Independent Study: Economics
Students are invited to apply to undertake independent study on subjects of their own choosing. Interested students should consult with a faculty member about designing an appropriate project well in advance of spring registration.

Class Format: independent study
Prerequisites: consent of an instructor and of the department chair
Dept. Notes: with permission of the department, an approved project may count as one of the two advanced electives required for the major
Distributional Requirements: Division 2

Spring 2017
IND Section: 01 TBA Instructor: Kenneth Kuttner

ECON 451(F) Topics in Macroeconomics
This seminar explores some of the central topics in macroeconomics, including economic growth, saving and investment, business cycle fluctuations, monetary policy, and financial crises. The first part of the course focuses on long-run economic growth. Using economic theory and evidence, we will attempt to answer some of the most important questions in all of economics. Why are some countries poor and other countries rich? What can governments do to achieve faster and environmentally sustainable rates of growth? What are the growth consequences of sustained budget deficits? Understanding the behavior of the economy in the long run is one of the key tasks of macroeconomics. But as we have seen during the recent financial crisis, the short run matters as well. In the second part of the class, we will turn our attention to economic downturns and financial crises. Using historical work on past crises and the accumulating evidence on the current one, we will study a host of short-run topics, including financial markets, the effectiveness of fiscal and monetary policies, consumer expectations, asset prices, employment, and productivity. Because this is an advanced class in macroeconomics, we will approach these issues as practicing economists working with the best possible models and empirical techniques. Students will have the opportunity to apply these methods in a required end-term research paper.

Class Format: seminar
Requirements/Evaluation: midterm, final, class participation and research paper
Prerequisites: ECON 251, ECON 252, and (ECON 255 or STAT 346)
Enrollment Preferences: senior Economics majors
Enrollment Limit: 19
Expected Class Size: 19
Distributional Requirements: Division 2

Fall 2016
SEM Section: 01 Cancelled

ECON 453 Research in Labor Economics (Q)
The labor market plays a crucial role in people's lives worldwide. In industrialized countries, most households contain at least one wage earner, and income from working represents the largest component of total income. Thus analyses of the labor market are fundamentally relevant to both public policy and private decision-making. This seminar will explore the structure and functioning of the labor market using theoretical and empirical tools. Topics to be covered include labor supply and demand, minimum wages, labor market effects of social insurance and welfare programs, the collective bargaining relationship, discrimination, human capital, immigration, wage distribution, and unemployment. As labor economics is an intensely empirical subject, students will be expected to analyze data as well as study the empirical work of others.

Class Format: seminar
Requirements/Evaluation: a series of short papers and empirical exercises, constructive contributions to class discussion, class presentations, and a 15- to 20-page original empirical research paper (written in stages)
Extra Info: may not be taken on a pass/fail basis
Prerequisites: ECON 251 and ECON 255 or POEC 253
Enrollment Preferences: senior Economics majors
Enrollment Limit: 19
Expected Class Size: 19
Distributional Requirements: Division 2

Quantitative/Formal Reasoning
Other Attributes: POEC Comparative POEC/Public Policy Courses

Not Offered Academic Year 2017
SEM Instructor: Lara Shore-Sheppard

ECON 455 Research in Economic History
Historical approaches to understanding economic development and current economic policy issues are increasingly in vogue. This seminar will focus on how economic historians have marshaled evidence and utilize the empirical tools of economics to investigate questions of a historical nature that often have direct implications for modern society. Possible topics to be covered include the role of political change in economic development, trade and migration, education and human capital accumulation, technology and innovation, and the evolution and workings of domestic and global factor markets. Students will be expected to not only analyze recent scholarship in economic history, but they will also produce and present their own original research over the semester.

Class Format: seminar
Requirements/Evaluation: short reading responses and empirical exercises, constructive contributions to class discussion, class presentations, and a 15- to 20-page original research paper (written in stages)
Extra Info: may not be taken on a pass/fail basis
Prerequisites: ECON 251 and (ECON 255 or POEC 253 or STAT 346)
Enrollment Preferences: senior Economics majors
Enrollment Limit: 19
Expected Class Size: 19
Distributional Requirements: Division 2

Quantitative/Formal Reasoning
Other Attributes: POEC Comparative POEC/Public Policy Courses

Not Offered Academic Year 2017
SEM Instructor: Steven Naftziger

ECON 456 Income Distribution
This course examines the distribution of income in the U.S., with emphasis on how it is affected by taxes, transfers, and other government programs. Questions to be addressed may include the following: How have wage inequality and the skill premium evolved over time? What factors explain a rising skill premium? How does income differ with race and gender? How is poverty measured, and what are the factors associated with living in poverty? How do government programs change the distribution of income? How much income mobility is there across generations? Students will become more critical readers of current economic literature, and will apply their skills in conducting empirical research.

Class Format: discussion/seminar
ECON 457(S) Public Economics Research Seminar
In this class, students will learn how to read, critically evaluate, and begin to produce empirical research on important and interesting public policy questions. Topics will be selected from across the spectrum of public economics issues and may vary from year to year. Examples of specific topics that may be covered include education, environmental policy, taxation, income inequality, anti-poverty policy, health care policy, the economics of crime and corruption, and the implications of behavioral economics and psychology for public policy (we will typically only cover a subset of these topics). Applications will be drawn mostly from the United States but we will also consider some issues and evidence from other industrialized and developing countries. The course will especially emphasize the critical analysis of empirical evidence on public policy questions.

Class Format: a mix of lecture, seminar discussion, and time in a computer lab learning to work with data and estimate econometric models

Requirements/Evaluation: a 15- to 20-page research paper (written in stages) that is a combination of a research proposal and an original empirical analysis of data, a series of short papers and empirical exercises, and regular constructive contributions to class discussion

Prerequisites: ECON 255, ECON 251, and ECON 120

Enrollment Preferences: senior Economics majors

Enrollment Limit: 19

Expected Class Size: 19

Dept. Notes: ideal preparation for seniors (or juniors, if offered in the spring) interested in writing an ECON thesis, or for students who want a taste of the kind of original empirical research one would do for a thesis without actually having to commit to a thesis

Distributional Requirements:
Division 2

ECON 459 Economics of Institutions (Q) (W)
This course is an introduction to the economic development of China in the post-1978 period. It seeks to provide an overview of the process by which China grew from an economic backwater to the second largest economy in the world, with a particular focus on rural development and the growing gap between rural and urban incomes; human capital and education; and health and gender in the Chinese context. In addition, the course has the goal of familiarizing students with current economics research on Chinese topics and enabling them to be informed consumers of this research.

Class Format: seminar

Requirements/Evaluation: in-class quizzes, literature critique, individual project comprising a presentation and final paper

Extra Info: may not be taken on a pass/fail basis

Prerequisites: ECON 251 and 255

Enrollment Preferences: senior Economics majors

Enrollment Limit: 19

Expected Class Size: 19

Distributional Requirements:
Division 2

ECON 460 Economic Development of China Crosslistings: ECON 460/ASST 460

ECON 461 Computable General Equilibrium (CGE) Modeling Crosslistings: ECON 461/ECON 526
The Computable General Equilibrium (CGE) model is an important tool for applied policy work. CGE models are the primary tool for many government organizations when evaluating policy alternatives and are also used extensively by various NGO’s when deciding aid and policy recommendations. The great advantage of these models is that they capture the general equilibrium feedback effects of policy proposals on various sectors of the economy. This is of great importance to applied work, as this allows the identification of the winners and losers from potential policies. The class will begin with a general overview of CGE models. This overview will be rigorous and mathematical. This course will use the free programming package GAMS and MPSGE to implement various CGE models using real world data. While no previous computer experience is required, some familiarity with Excel is recommended. During the latter part of the course, students will create a CGE model for a country of their choice and conduct policy experiments using their model. Interested students could continue this project as a potential thesis topic.

Class Format: lecture/discussion

Requirements/Evaluation: evaluation will be based on problem sets, two midterms, final project and presentation

Prerequisites: MATH 150 and ECON 251

Enrollment Preferences: senior Economics majors and CDE fellows

Enrollment Limit: 19

Expected Class Size: 19

Distributional Requirements:
Division 2
ECON 463(S) Financial History (W)
What can we learn from financial history to understand the successes and failures of finance today, and how finance and politics interact? This course opens with a brief survey of some of the major characteristics, issues, and challenges of financial systems today, and then examines earlier experience with these phenomena. Topics to be examined include: the role of finance in economic development historically, including in the financial revolutions from Northern Italy, the Netherlands, Britain and the U.S.; the relationship between finance and government, and the extent to which it has changed over time; the lessons from early asset bubbles for modern financial systems; the effect of institutions (laws, norms, and culture) and political systems in shaping the impact of finance, as illustrated by comparisons between Mexico and the U.S., among other cases; and lessons from U.S. financial history for policies today.

The course also examines the tools that were developed in earlier epochs to deal with different risks, evaluates their efficacy, and considers lessons for modern financial regulation.

Class Format: seminar
Requirements/Evaluation: evaluation will consist either of 6 short papers or 3 short papers and one research paper (student choice), at least one oral presentation, and contributions to class discussions
Extra Info: may not be taken on a pass/fail basis
Prerequisites: ECON 251, ECON 252, and (ECON 255 or STAT 346)
Enrollment Preferences: senior Economics majors
Enrollment Limit: 19
Expected Class Size: 19
Distributional Requirements: Division 2
Writing Intensive

Spring 2017
SEM Section: 01  TF 02:35 PM 03:50 PM  Instructor: Gerard Caprio

ECON 465(F) Pollution and the Labor Market
If your home town has polluted air, does that reduce your wage? Do you work less? Are you less likely to finish high school? These are specific versions of an important general question: how does pollution affect labor market outcomes? The answer matters for individual decisions (where to live) and government policies (air pollution regulations). This seminar begins from theories of optimizing worker behavior in the presence of pollution. Building on this foundation we will critically evaluate new empirical research into the impacts of pollution on human capital, labor supply, and productivity. We will also study the impact of pollution regulations on wages and employment. Included papers will cover both developed and developing countries.

Class Format: seminar
Requirements/Evaluation: class discussion, presentation of reading, 15- to 20-page empirical paper (written in stages) and accompanying short presentation
Extra Info: not available for the fifth course option
Prerequisites: ECON 251 and ECON 255
Enrollment Preferences: Economics majors, seniority
Enrollment Limit: 15
Expected Class Size: 15
Dept. Notes: STAT 201/346 acceptable in place of ECON 255 prerequisite with instructor permission
Distributional Requirements: Division 2

ECON 467T Development Successes (W)
Crosslistings: ECON 467/ECON 531
Although living standards in most of the developing world have increased noticeably behind those of the rich industrial countries, a relatively small number of countries that were quite poor in the middle of the last century have achieved dramatic improvements in their incomes since then. These development successes include countries such as Japan, the four dragons (Hong Kong, Korea, Singapore, and Taiwan), the MIT economies (Malaysia, Indonesia, and Thailand), the Asian giants of China and India, the MINT economies (Mexico, Indonesia, and Thailand), the Asian giants of China and India, as well as non-Asian economies as diverse as Botswana, Chile, and Turkey. This tutorial will explore why these countries have apparently succeeded where many other poor countries have failed. A particular focus of the course will be on extracting insights from the experiences of these success cases about the broad development strategies that have been advocated over the past 50 years by scholars as well as by the international financial institutions.

Class Format: tutorial
Requirements/Evaluation: studies will write five papers during the term, and prepare and deliver formal comments on five papers written by other students
Extra Info: may not be taken on a pass/fail basis
Prerequisites: ECON 204 or 501
Enrollment Preferences: senior Economics majors
Enrollment Limit: 10
Expected Class Size: 10

ECON 468 Your Money or Your Life: Health Disparities in the United States
A 25-year-old man living in a high-income household can expect to live 10 years longer than his low-income counterpart. There are also stark differences in mortality and health by education, employment status, race, immigrant status, region, and gender. This course will explore many of the potential explanations for health disparities, including access to insurance and health care, health behaviors, stress, environmental exposure, and intergenerational transmission of health. We will emphasize causal inference and focus on assessing the quality of evidence. We will also investigate how government policies contribute to or ameliorate health disparities in the U.S.

Class Format: seminar, including frequent small group meetings, a computer lab, and a poverty simulation
Requirements/Evaluation: evaluation includes class discussion, oral presentations, 4-6 short response papers, two 5-page critiques of published articles, and one 15-page original empirical research paper
Prerequisites: ECON 251 and ECON 255 or equivalent, or permission of instructor
Enrollment Preferences: senior Economics majors
Enrollment Limit: 19
Expected Class Size: 19
Distributional Requirements: Division 2

ECON 470(S) The Indian Economy: Development and Social Justice (D)
The Indian economy has grown rapidly in the last two decades, but poverty has declined relatively slowly. Is this the persistence of long-standing historical disadvantages such as those faced by Scheduled Castes and Tribes? Does this reflect failures in policy, in areas such trade or labor law? Or is the quality of governance, especially the level of corruption, primarily to blame?

We will use the traditional theoretical and quantitative methods of an economist to consider these questions, and, consistent with the goals of the Exploring Diversity Initiative, consider how they are shaped by power, privilege, and the social location of the narrator.

Class Format: seminar
Requirements/Evaluation: five short response papers (5 pages), and empirical research project
Prerequisites: ECON 251 and 255, or equivalent, or permission of instructor
Enrollment Preferences: junior and senior majors
Enrollment Limit: 19
Expected Class Size: 15
Distributional Requirements: Division 2
Exploring Diversity

ECON 471(F) Topics in Advanced Econometrics (Q)
The course uses both a practical and conceptual/theory based approach, with emphasis on methods of structural identification of dynamics in VARs and cointegration analysis, both in conventional time series and panel time series which contain spatial dimensions. The course is Well suited for students considering empirically oriented honors theses in fields that employ these techniques, such as macro, finance, growth, trade and development. It is also well suited for students majoring in economics, statistics or mathematics who simply wish to expand their econometrics training and understanding to a more advanced level, or wish to pursue an econ honors thesis in econometrics.

Class Format: seminar
Requirements/Evaluation: periodic homework assignments, midterm exam, term paper
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: ECON 252 and ECON 255 (or equivalent)
Enrollment Preferences: students with strong math backgrounds, and to students interested in writing an honors thesis
Enrollment Limit: 10
Expected Class Size: 10
Distributional Requirements: Division 2

Quantitative/Formal Reasoning
ECON 472(F) Macroeconomic Instability and Financial Markets (Q)
This advanced course in macroeconomics and financial theory attempts to explain the role and the importance of the financial system in the global economy. The course will provide an understanding of why there is financial intermediation, how financial markets differ from other markets, and equilibrium consequences of financial activities. Rather than separating off the financial world from the rest of the economy, we will study financial equilibrium as a critical element of economic equilibrium. An important topic in the course will be studying how financial market imperfections amplify and propagate shocks to the aggregate economy. The course may cover the following topics: the determination of asset prices in general equilibrium; consequences of limited asset markets for economic efficiency; theoretical foundations of financial contracts and justifications for the existence of financial intermediaries; the roles of financial frictions in magnifying aggregate fluctuations and creating persistence and instability; the role of leverage and financial innovation in fueling financial crises.
Class Format: seminar
Requirements/Evaluation: evaluation will be based on problem sets, exams, and potentially student presentations
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: ECON 251 and ECON 252
Enrollment Preferences: Economics majors
Enrollment Limit: 19
Expected Class Size: 15
Distributional Requirements: Division 2
Quantitative/Formal Reasoning

ECON 473 Microfinance (D) (Q)
Crosslistings: ECON 473/ECON 520
Unequal access to finance (loans, savings, insurance) contributes to the persistence of poverty in developing countries. We review evidence that the entrepreneurial poor lack access to loans, and discuss how repayments can be enforced even when borrowers do not have collateral. We discuss how recent innovations in micro-insurance can reduce vulnerability. We will study the role of governments and donors in equalizing financial access through subsidies or targeting. Finally, we shall explore how microfinance can empower women within the household. Readings include current empirical microeconomics textbooks, including how these differences add to our understanding of the psychological processes that underlie economics. The material will also introduce the many methods that behavioral economists use in order to empirically verify these models, including laboratory experiments, biological measures (e.g. fMRI), field experiments, and observational data. Class discussions will cover applications of these behavioral models to many disparate contexts such as consumer marketing, public sector policy, asset markets, and managerial decision-making. Students will be expected to analyze academic papers that are appropriate for advanced undergraduate economics students.
Class Format: seminar
Requirements/Evaluation: an original research paper, multiple short writing assignments, oral presentation(s), class participation
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: ECON 251 and (ECON 255 or STAT 346)
Enrollment Preferences: Economics majors, Economics and Psychology double majors, seniority
Enrollment Limit: 19
Expected Class Size: 15
Distributional Requirements: Division 2

Fall 2016
SEM Section: 01  MR 01:10 PM 02:25 PM  Instructor: Matthew Chao
ECON 477(S) Economics of Environmental Behavior (Q)
Crosslistings: ECON 477/ENVI 376
A community maintains a fishery; a firm decides whether to get a green certification; you choose to fly home or stay here for spring break: behaviors of people and firms determine our impact on the environment. We'll use economics to model environmental behavior and to consider how policies can help or hurt the environment. Topics we'll study include: voluntary conservation, social norms and nudges, firm responses to mandatory and voluntary programs, and boycotts and divestment.
Class Format: seminar
Requirements/Evaluation: short essays and empirical exercises, class participation, oral presentation(s), and a final original research paper using an experiment, existing data, or theory
Extra Info: may not be taken on a pass/fail basis

ECON 501(F) Economic Growth and Development
This course introduces some of the major theories and ideas about economic growth and development. Motivated by a number of stylized facts from cross-country data, we will begin by posing a series of questions: Why are some countries rich and others poor? Why have some countries grown at high rates over extended periods of time, while others have experienced little or no growth? Do all economies face comparable challenges to achieving sustained economic growth? Will poor countries catch up to rich countries or are they doomed to stagnate in a poverty trap? To answer these "big" questions, we will explore the underlying mechanisms of economic growth: What role is played by savings and investment (i.e., the accumulation of physical capital)? What is the influence of population growth? How important are investments in human capital (i.e., education and population health)? How important are technological differences across countries? How much significance should we ascribe to differences across countries in geographical characteristics? How much should we ascribe to differences in the quality of institutions? For each question, we will explore different theoretical and empirical strategies developed by economists to answer the question, ranging from formal models so as to provide explanations of what can go wrong when the government tries to create high quality public goods, to more informal models so as to explain how sometimes the government fails to deliver quality public goods and services. We will then turn to the general question of how to make the government work better, addressing questions such as the following. When is it better to have the government own and produce things, and when is it better to privatize? What are the incentives of politicians and government employees, and how does the design of political and budgetary institutions affect the degree to which they serve the public interest? How should responsibilities be divided up between the central government and local governments, and what are the advantages and disadvantages of "political decentralization"? What can be done to improve the delivery of basic services? For example, how might one address problems of corruption and absenteeism? Throughout the course, we will consider examples of empirical research, and to facilitate this, we will occasionally introduce econometric tools that are particularly useful for microeconomic policy evaluation.

Class Format: lecture/discussion
Requirements/Evaluation: problem sets, one 10-page paper, a midterm, and a final exam
Prerequisites: ECON 251, ECON 252, and (either ECON 255 or STAT 346); undergraduate enrollment limited and requires instructor's permission

ECON 502(F) Statistics/Econometrics
This course focuses on basic methods of bringing economic theory and data together to provide empirical guidance for policy formulation, including use of computers in econometric analysis. This course covers techniques of econometric analysis using a moderate level of mathematical exposition.

Class Format: lecture/discussion
Requirements/Evaluation: problem sets, midterm and final exam
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: ECON 251, ECON 252, and (either ECON 255 or STAT 346); undergraduate enrollment limited and requires instructor's permission

Distributional Requirements:
Division 2

Enrollment Preferences: limited to CDE students

Fall 2016
SEM Section: 01 TR 09:55 AM 11:10 AM Instructor: Lara Shore-Sheppard

ECON 503(F) Statistics/Econometrics: Advanced Section
The course introduces students to the statistical methods used by economists, including those studying policy questions. The focus is on applications. Students will also work with Stata, a software widely used by economists.

Class Format: lecture/discussion
Requirements/Evaluation: problem sets, midterm exam, and a final exam
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: admission depends on previous background in statistics and mathematics

Enrollment Preferences: limited to CDE students

Expected Class Size: 15

Distributional Requirements:
Division 2

Fall 2016
LEC Section: 01 TR 11:20 AM 12:35 PM Instructor: Kenneth Kuttner

ECON 504(F) Public Economics in Developing Countries
This course is about microeconomic and empirical analysis of government expenditure programs in developing and transitional countries. It provides tools for understanding the effects of government policies, as well as a useful conceptual framework for analyzing normative questions such as "what role should the government play in the economy" and "what is the right role for government?" The course begins by considering the efficiency of market economies, and rationales for government intervention in the market, such as public goods, externalities, information-based market failures, imperfect competition, and equity. We also consider cases that human behavior might deviate from perfect rationality, and what that might imply for policy. Along the way, we apply these concepts to various examples of policy issues, including, among other things, the environment, education, health, infrastructure, security, social insurance, and aid to the poor. We then turn to the general question of how to make the government work better, addressing questions such as the following. When is it better to have the government own and produce things, and when is it better to privatize? What are the incentives of politicians and government employees, and how does the design of political and budgetary institutions affect the degree to which they serve the public interest? How should responsibilities be divided up between the central government and local governments, and what are the advantages and disadvantages of "political decentralization"? What can be done to improve the delivery of basic services? For example, how might one address problems of corruption and absenteeism? Throughout the course, we consider examples of empirical research, and to facilitate this, we will occasionally introduce econometric tools that are particularly useful for microeconomic policy evaluation.

Class Format: lecture/discussion
Requirements/Evaluation: problem sets, one 10-page paper, a midterm, and a final exam
Prerequisites: ECON 110; in addition, an empirical methods course (POEC 253, ECON 255, 502 or 505, or STAT 346) must be taken before or concurrently with this class; undergraduate enrollment limited and requires instructor's permission

ECON 505(F) Developing Country Macroeconomics
The macroeconomic structures of developing countries tend to be very different from those in high-income countries, and their macroeconomic policy environments also differ in important ways from those in rich countries. This course is intended to introduce students to a set of models that is particularly suitable for analyzing macroeconomic performance in developing countries, as well as to some analytical tools that help us understand why such countries have often experienced a variety of macroeconomic crises, including sovereign debt, currency, and banking crises.

Class Format: lecture
Requirements/Evaluation: two hour tests and a comprehensive final exam
Extra Info: not available for the fifth course option
Prerequisites: ECON 251 and 252; undergraduate enrollment limited and requires instructor's permission

Expected Class Size: 25-30

ECON 506(F) Fundamentals of Developing Country Macroeconomics
This is a practically oriented course in macroeconomic theory and policy. It begins with a review of core concepts and definitions. It then discusses the contributions of households and firms to aggregate production and spending. Next is an introduction to monetary and fiscal policy. It goes on to develop a complete macro model, which is then used to discuss some of the monetary, fiscal and exchange rate policy issues faced by developing and emerging market economies. The course is offered as an alternative to Econ 505 for those not intending to specialize in macroeconomics. Consequently, it does not qualify as a prerequisite for Econ 515.

Class Format: lecture
Requirements/Evaluation: two hour tests and a comprehensive final exam
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none; enrollment limited to CDE students

Enrollment Limit: none
Expected Class Size: 10

Distributional Requirements:
Division 2

Fall 2016
LEC Section: 01 TR 11:20 AM 12:35 PM Instructor: Kenneth Kuttner
ECON 510(S) Financial Development and Regulation

Crosslistings: ECON 510/ECON 352

This course focuses on the financial system and its role in economic development. The first part explores the functions of finance, how it contributes to growth, and reviews different models of financial sector development and their influence on how governments viewed the sector. It will examine how experiences with financial sector repression and subsequent liberalization, and investigate the causes and impact of financial crises. Then it will study how to make finance effective and how to prevent or minimize crises, analyzing government’s role as regulator, supervisor, standard setter, and enforcer of the law. The final part, attention will be devoted to the role of institutions (laws, norms, culture) and incentives in financial sector development.

Class Format: lecture/discussion
Requirements/Evaluation: midterm, participation in class discussion and debates, and a final research paper
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: for undergraduates, POEC 253 or ECON 255; undergraduate enrollment limited and requires instructor's permission
Enrollment Limit: 25
Expected Class Size: 20-25
Distributional Requirements: Division 2

ECON 511 Institutions and Governance

Over the last two decades economists have become increasingly aware of the importance of the “social infrastructure” at various levels of economic activity: capable and honest government officials must be available to formulate and implement policies, markets must be supported by suitable institutional frameworks, property rights must be secure, and contracts reliably enforced. Even the structure of the household, the smallest institution analyzed by economists, has been shown to have an important influence on economic development. This course will survey the growing literature on institutions and governance.

Class Format: lecture and discussion
Requirements/Evaluation: evaluation will be based on several short assignments, and a longer final paper
Prerequisites: at least one among POEC 253, ECON 255, 502, 503, or STAT 346; requires permission of instructor; students who have previously taken ECON 459 will not be enrolled
Enrollment Limit: 19

SEM Instructor: Anand Swamy

ECON 513 Empirical Methods in Macroeconomics (Q)

Crosslistings: ECON 513/ECON 356

Macroeconomics and related fields in international finance and development have evolved specialized empirical techniques, known generally as macroeconometrics, which are designed to meet the practical challenges that the data and the empirical questions pose in these fields. The course will introduce the theory and application of these techniques, and students will learn how to implement these techniques using real world data to address practical questions drawn from the fields of macro, international finance and development. Topics to which these techniques will be applied include business cycle analysis, sources of exchange rate volatility and determinants of long run economic growth. The course is also available to undergraduates with permission of the instructor. Undergraduates with strong math backgrounds may wish to enroll directly in ECON 471 in lieu of this course. However, those seeking a transition course may wish to enroll in this course prior to taking ECON 471.

Class Format: seminar
Requirements/Evaluation: short empirical projects, midterm, term paper
Prerequisites: ECON 252, ECON 255 or equivalent, and ECON 393 (ECON 381 may substitute for 393); not open to students who have taken ECON 471
Enrollment Preferences: Economics majors and CDE fellows
Enrollment Limit: 19
Expected Class Size: 19
Distributional Requirements: Division 2
Quantitative/Formal Reasoning

Not Offered Academic Year 2017
SEM Instructor: Peter Pedroni

ECON 514(S) Tax Policy in Emerging Markets (Q)

Crosslistings: ECON 514/ECON 389

Taxes are half of what government does. So if you are interested in what government policy can do to promote efficiency, equity, and economic development, you should be interested in tax policy. Governments must raise tax revenue to finance critical public goods, address other market failures and distributional issues, and to avoid problems with debt and inflation. Taxes typically take up anywhere from ten to fifty percent of a country’s income, they profoundly affect the incentives to undertake all varieties of economic activity, and the government expenditures that they finance have potentially large consequences for human welfare. So the stakes involved in improving tax policy are quite large. All of these issues are of great importance in emerging markets (developing and transition economies), but in these nations taxation is especially challenging because of serious problems with tax evasion and administration. This course provides an in-depth exploration of tax policy, with an emphasis on the challenges and issues most relevant in emerging markets. Topics addressed in this class include: how basic economic principles can be applied to help one think about the efficiency and equity consequences of tax policies; how personal income taxes, corporate income taxes, and value-added taxes are designed and administered and how they influence the economy; ideas for fundamental reforms of these taxes; theory and evidence in the debate over progressive taxes versus “flat” taxes; how various elements of tax design affect incentives to save and invest; how market failures and administrative problems may influence the optimality of different tax policies; the implications of global capital flows and corporate tax avoidance for the design of tax policy; tax holidays and other special tax incentives for investment; empirical evidence on the influence of taxes on economic growth, foreign direct investment, labor supply, and tax evasion; tax policy towards natural resources such as minerals and oil; case studies of efforts to reform tax administration and reduce tax evasion and corruption; taxes on land and property; taxes on imports and exports; presumptive taxation; and the informal economy and its implications for tax policy.

Class Format: seminar
Requirements/Evaluation: midterm exam, problem sets, two 7- to 10-page essays
Prerequisites: one public economics course or microeconomics course (ECON 504 or ECON 110), and one empirical methods course (POEC 253 or ECON 255, 502, or 503); students who have previously taken ECON 351 will not be enrolled
Enrollment Preferences: CDE students, but undergraduates with the prerequisites are welcome
Enrollment Limit: 19

ECON 515(S) Developing Country Macroeconomics II

Crosslistings: ECON 515/ECON 359

Developing countries do not find it difficult to initiate rapid growth, but do find it difficult to sustain it. Growth spurts are often derailed by macroeconomic shocks. As developing countries become increasingly open to trade and financial interactions with the rest of the world, such shocks may become more frequent, and potentially more severe. This course examines the types of macroeconomic institutions and policy regimes that can help developing countries withstand such shocks and sustain economic growth. We will examine central bank independence, the design of monetary and exchange rate regimes, capital account regimes, and various types of fiscal policy institutions and policy regimes, including fiscal rules.

Class Format: lecture
Requirements/Evaluation: two midterms and a final project
Extra Info: not available for the fifth course option
Prerequisites: ECON 505; undergraduate enrollment limited and requires instructor's permission

ECON 517 Urbanization and Development
Crosslistings: ECON 387/ENVI 388

At current rates of growth, the combined population of urban areas in developing countries will double in the next 30 years. The land area devoted to urban use is expected to double even more quickly. The costs of providing housing and infrastructure to accommodate this growth are enormous, but the costs of failing to accommodate urban development may be even larger. The decisions made in response to these challenges will affect the economic performance of these countries and the health and welfare of the urban residents. By affecting global patterns of energy use, these decisions will have broader impacts on the entire planet. This course will focus on these challenges. What are the economic forces that drive the process of urbanization, and how does the level of urbanization affect economic development? How are policies towards housing, transportation, public finance and development affected by urbanization? What policies are most likely to succeed in dealing with the challenges of urban growth?

Class Format: lecture/discussion
Requirements/Evaluation: a midterm and a final exam, plus a paper that evaluates specific problems, policy alternatives, and provides some analysis of relevant data
Prerequisites: ECON 251 plus POEC 253, ECON 255, 502 or 503; undergraduate enrollment limited and requires instructor's permission

ECON 518 Environmental and Natural Resource Policy (Q)
Crosslistings: ECON 386/ENVI 386/ECON 518

Economic activity often damages the environment significantly, especially in developing countries. Firms may clear-out valuable forests, while consumers may drive high-pollution vehicles with little thought for the environmental consequences. Economists have proposed a variety of policy remedies, from pollution taxes to tradable permit schemes and restrictions on the quantity of pollution. This course first examines the relative merits of these policies from a theoretical perspective. When pollution damage is uncertain, is it better to use a pollution tax or a quantity restriction? Is it worse to set a pollution tax too high than to set it too low? It then proceeds to the practical issues that attend policy implementation, particularly where state capacity is limited. What is the best policy when inspectors can be threatened or bribed? When resource extraction is hard to monitor? Case studies will likely include policies aimed at deforestation, mineral ownership and extraction, particulate air pollution from industry and transportation, and carbon emissions from electricity generation. In evaluating policies we will think about both efficiency and the distribution of costs and benefits. (What if environmental regulation only benefits the wealthiest people in a country?) We will also examine the environmental consequences of policies aimed at other problems, like poverty and low education.

Class Format: seminar
Requirements/Evaluation: problem sets, paper, brief presentation, a midterm, and a final exam
Prerequisites: ECON 251, familiarity with statistics
Enrollment Preferences: senior Economic majors and CDE fellows

ECON 519 Population Economics
Crosslistings: ECON 387/ENVI 389

This course is an introduction to the economic analysis of demographic behavior and the economic consequences of demographic change. An important aim is to familiarize students with historical and contemporary trends in fertility, mortality, migration, and family composition, and the implications of these trends for the economy. The course demonstrates the application of microeconomic theory to demographic behavior, including fertility, marriage, and migration. Students are introduced to basic techniques of demographic measurement and mathematical demography. Selected topics include the economic consequences of population growth in developing countries, the economics of fertility and female labor force participation, the effects of an older age structure on the social security system, and the relationship between population growth and natural resources.

Class Format: lecture/discussion
Requirements/Evaluation: at least one exam, a research paper and a class presentation

Extra Info: may not be taken on a pass/fail basis
Prerequisites: ECON 251; POEC 253 or ECON 255 or permission of instructor

ECON 520 Microfinance (D) (Q)
Crosslistings: ECON 473/ECON 520

Unequal access to finance (loans, savings, insurance) contributes to the persistence of poverty in developing countries. We review evidence that the entrepreneurial poor lack access to loans, and discuss how repayments may be enforced even when borrowers do not have collateral. We discuss how recent innovations in micro-insurance can reduce vulnerability. We will study the role of governments and donors in equalizing financial access through subsidies or targeting. Finally, we shall explore how microfinance can empower women within the household. Readings include current empirical and theoretical research in development economics. This course is an EDI course because it critically analyzes how microfinance interventions can reduce inequality both within and across households.

Class Format: seminar
Requirements/Evaluation: evaluation will be based on a midterm, a series of short papers and a longer final paper
Extra Info: may not be taken on a pass/fail basis
Prerequisites: ECON 251 and ECON 255

Quantitative/Formal Reasoning

Not Offered Academic Year 2017
SEM Instructor: Ashok Rai

ECON 521(S) Incentives and Development Policy
Crosslistings: ECON 521/ECON 372

Why is the welfare of people in developing countries so important? This course (and instructor) is the opinion that the difficulty of getting incentives right is the key source of inefficiency. The course therefore studies how limited enforcement and asymmetric information constrain development, and about innovative development designs that attempt to overcome these constraints. The course readings will be a mix of field studies, empirical evidence and theoretical tools from game theory. Incentive and corruption problems in health, education, the regulation of banks and natural monopolies, privatization, budgeting, debt forgiveness, foreign aid, microfinance, climate treaties and ethnic violence will be studied using a unified framework. Note: this course was developed to address issues that arise in the countries represented at the CDE.

Class Format: seminar
Requirements/Evaluation: two hour-long tests and a final policy project
Extra Info: may not be taken on a pass/fail basis
Prerequisites: undergraduate enrollment limited and requires instructor's permission
Enrollment Preferences: intended for CDE Fellows
Enrollment Limit: 19
Expected Class Size: 19

ECON 522(S) Economics of Climate Change (Q)
Crosslistings: ECON 387/ECON 522/ENVI 387

This course introduces the economic view of climate change, including both theory and empirical evidence. Given the substantial changes implied by the current stock of greenhouse gases (GHGs) in the atmosphere, we will begin by looking at impacts on agriculture, health, income, and migration in both wealthy and poor countries. Next we will study adaptation, including capital investments and behavioral changes, and insurance. We will examine the sources of climate change, especially electricity generation and transportation.
and think about optimal policies. What is the socially optimal amount of climate change? (Probably not zero.) Why have countries had such a hard time agreeing on GHG emissions reductions, and how might we overcome such difficulties? In considering policy, we will employ not only theoretical predictions, but also the growing body of evidence from attempts to regulate GHGs. Examples include China’s pilot cap-and-trade programs, the EU ETS, and the US Clean Power Plan. We will pay particular attention to the political economy of regulation and ways in which policy results have differed from theoretical predictions. Finally, we will discuss the limits of the economic approach to climate change, pointing out questions on which economic theory provides little guidance.

ECON 531 Development Successes (W)

Crosslistings: ECON 487/ECON 531

Although living standards in most of the worlds poor countries have increasingly fallen behind those of the rich industrial countries, a relatively small number of countries that were quite poor in the middle of the last century have achieved dramatic improvements in their incomes since then. These development successes include countries such as Japan, the four dragons (Hong Kong, Korea, Singapore, and Taiwan), the MIT economies (Malaysia, Indonesia, and Thailand), the Asian giants of China and India, as well as non-Asian economies as diverse as Botswana, Chile, and Turkey. This tutorial will explore why these countries have apparently succeeded where many other poor countries have failed. A particular focus of the course will be on extracting insights from the experiences of these success cases about the broad development strategies that have been advocated over the past 50 years by scholars as well as by the international financial institutions.

Class Format: tutorial

Requirements/Evaluation: students will write five papers during the term, and will prepare and deliver formal comments on five papers written by other students

Extra Info: may not be taken on a pass/fail basis

ECON 532T(S) Inclusive Growth: The Role of Social Safety Nets

Designing and implementing effective national strategies to promote inclusive economic growth can require difficult policy reforms, sometimes with adverse short-term impacts for vulnerable groups within society. Social safety nets provide a pro-poor policy instrument that can balance trade and labor market reform, fiscal adjustments (such as reduced general subsidies) and other economic policies aimed at enabling better market performance. In addition, social safety nets help the poor to cope with shocks to their livelihoods, promoting resilience, human capital development and sometimes high-return risk-taking. This tutorial will offer students the opportunity to explore the role of social safety nets in promoting inclusive economic growth, drawing on case studies from Africa, Asia, Latin America and Eastern Europe. The first part of the tutorial will define social safety nets within the broader context of social protection, examining the diversity of instruments and their linkages to economic growth. The second part will delve more deeply into the design and implementation of effective interventions, assesses costs to their livelihoods, affordability, targeting, incentives and other issues. The third part will analyze the role of social safety nets in supporting economic growth strategies, drawing on international lessons of experience.

Class Format: tutorial

Requirements/Evaluation: students will write five papers during the term, and will prepare and deliver formal comments on five papers written by other students

ECON 535T(S) International Financial Institutions

This tutorial will explore the role of official international financial institutions in the global economic and financial system, their relations with members, proposals for how they might be reformed, and issues that they face. The focus will be principally on the International Monetary Fund, and to a lesser extent the World Bank, the Bank for International Settlements and Financial Stability Board. Topics and readings will focus on such issues as: the roles and governance reform of the IMF and World Bank; lessons from their performance in international crises; initiatives of the Fund and Bank; the global adjustment process; financial system stability; governance reform; lending programs; the management of international reserves; and provision of advice to members. Participants will meet in pairs with the faculty member. Each week, one student will prepare a policy paper and submit the paper to the professor and to the other student in advance of the meeting. During the meeting, the student who has written the paper will present an argument, evidence, and conclusions. The other student will provide a critique of the paper based on concepts and evidence from the readings and his own research and experience. The professor will participate in the discussion after each participant has presented and asked questions that highlight or illustrate critical points.

Class Format: tutorial
Requirements/Evaluation: each participant will write and present 5 or 6 policy papers and a like number of critiques
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: intended for CDE Fellows; undergraduate enrollment limited, and only with permission of instructor

ECON 536T Financial Crises: Causes and Cures (W)

Crosslistings: ECON 390/ECON 536

Financial crises have been with us for as long as banking has existed. Why are crises such a regular fixture of societies, and what can be done to prevent them, or at least reduce their cost? Topics examined include bubbles and swindles, especially when these spillover to the broader macroeconomy; the role of information in banking in normal times and in bank runs; boom-bust cycles in asset markets; international contagion; crisis resolution techniques; and the extensive history of attempts to improve regulation so as to reduce the frequency and cost of crises. Crises in developing and developed economies from the South Sea Bubble to the Euro Crisis will be examined, and the role of political economy factors in their run-up and resolution will be featured.

Class Format: tutorial
Requirements/Evaluation: students will write 5-6 papers during the term, and will prepare and deliver formal comments on 5-6 papers written by other students
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: ECON 252 and 255
declared majors must meet with a faculty member to discuss the Major Plan. Declared majors will be assigned a permanent advisor shortly after they declare the major.

MAJOR

Major Plan. Shortly after declaring the major, all English majors must complete a short written plan for how they intend to complete the major. In this plan, students must consider how they can most fruitfully explore the broad range of genres, historical periods, and national and cultural traditions that literature in English encompasses, and how they wish to focus upon a particular intellectual interest within English. Students are encouraged to begin developing, revising, and discussing a Major Plan with a faculty advisor as they become interested in the major; junior majors must meet with faculty advisors to revisit Major Plans as they register for courses. There will also be informational meetings and web resources available to assist new majors in developing the Major Plan.

Students majoring in English must take at least nine courses, including the following:

- Any 100-level English class. Students exempted by the department from 100-level courses will substitute an elective course.

At least one 200-level Gateway course (grouped at the end of the 200-level courses). Gateway courses are designed for first- and second-year students contemplating the major or intending to pursue more advanced work in the department; these courses focus on analytical writing skills while introducing students to critical methods and historical approaches that will prove fruitful as they pursue the major. (Note: a Gateway course can fulfill a Literary Histories or Criticism requirement as well as the Gateway requirement.)

At least one Criticism course (identified in parentheses at the end of the course description). A course fulfilling the criticism requirement entails a sustained and explicit reflection on problems of critical method, whether by engaging a range of critical approaches and their implications or by exploring a particular method, theorist, or critic in depth. (Please note that when a Criticism course is also listed as satisfying the Literary Histories requirement, the course may be used to satisfy either requirement, but not both.)

At least three courses at the 300-level or above.

At least three courses designated as Literary Histories. Literary Histories courses concern the emergence or development of a specific literary tradition or problem and/or its transformation across multiple historical periods. Literary Histories are identified by LH-A, LH-B, or LH-C in parentheses at the end of the course description.

LH-A: courses dealing primarily with literature written before 1800.
LH-B: courses dealing primarily with literature written between 1800 and 1900 but not included in LH-A (courses on literature from 1800-1900 and some surveys).
LH-C: courses dealing primarily with literature written after 1900.

Of the three Literary Histories courses required for the major, at least two must focus on literature before 1800 (LH-A or LH-B), with at least one of these focusing primarily on literature before 1800 (LH-A).

For further clarification, please see the English Department webpage at http://web.williams.edu/English/.

Courses Outside the Department

The department will give one elective course credit toward the major for a course taken in literature of a foreign language, whether the course is taught in the original language or in translation. Such a course may not be used to satisfy the department’s Literary Histories, Criticism, or Gateway requirements.

STUDY AWAY

Majors who plan to study abroad should be proactive in understanding how this will affect their plans for completing major requirements. Such plans should be discussed in advance with the student’s advisor as well as the department’s academic assistant. Approval of departmental credit for courses taken off-campus must be obtained in advance from the department chair. You can find general study away guidelines for English here.

THE DEGREE WITH HONORS IN ENGLISH

The English Department offers three routes toward honors: a creative thesis, a critical thesis, and a critical specialization. Students majoring in English must take at least nine courses, including the following:

- English W30 or W31 (Senior Thesis, winter study) during senior year.
- English 493 and English 494 (fall Honors Colloquium and spring Honors Thesis) and English W30 (Senior Thesis: Specialization Route, winter study) during senior year.

Creative Writing Thesis

The creative writing thesis is a significant body of (usually) fiction or poetry completed during the fall semester and winter study of the senior year, and usually results from a well-revised draft prepared during the fall semester. (With the permission of the honors committee, the thesis may be undertaken during the winter study period and the spring semester of the senior year.) Requirements for admission include outstanding work in an introductory and an advanced workshop and, in addition, a substantial body of work in place of an advanced workshop, a recommendation from one of the creative writing teachers (who will then act as thesis advisor), and the approval of the departmental honors committee. A creative thesis begun in the fall is due on the last day of winter study; essays begun in winter study are due the third Monday after spring break. The methods of evaluation are identical to those for critical projects (but their page limits do not apply).

Critical Thesis

The critical thesis is a substantial critical essay written during both semesters as well as the winter study period of the senior year. It must consider critical and/or theoretical as well as literary texts. The thesis is normally about 15,000 words (45 pages); in no case should it be longer than 25,000 words (75 pages). The proposal, a 3-page description of the thesis project, should indicate the subject to be investigated and the arguments to be considered, along with a bibliography. The finished thesis is due on the third Monday following spring break. After the critical thesis has been completed, the student publicly presents his or her work.

Critical Specialization

The critical specialization route is a series of forays into a broad area of interest related to work undertaken in at least two courses. At least one of these courses must be in the English Department, and both need to have been taken during the fall term in senior year. The specialization route entails: (1) a set of three 10-page essays which together advance a flexibly related set of arguments; (2) an annotated bibliography (5 pages) of secondary sources, explaining their importance to the area of specialization; (3) a meeting with the three faculty evaluators (one of whom is the advisor) during the last two weeks in February to discuss the trio of essays and the annotated bibliography; (4) a fourth essay of 12 pages, considering matters that arose during the faculty-student meeting and reflecting on the outcome of the specialization. The 3-page proposal for the specialization should specify the area and range of the study, the issues likely to be explored, and the methods to be used for their investigation. It should also describe the relation between previous course work and the specialization, and include a brief bibliography of secondary works. The first two papers are due by the end of fall semester; the third paper is due at the end of winter study; the bibliography is due mid-February; and the final paper is due the third Monday after spring break.

Applying to the Honors Program

All students who wish to apply to the honors program are required to consult with a prospective faculty advisor and the director of honors before April of the junior year. Prior to preregistration in April, candidates for critical theses and specializations submit a 3-page proposal that includes an account of the proposed project and a bibliography. Students applying to creative writing honors submit a brief proposal describing the project they wish to pursue. Decisions regarding admission to the honors program will be made by the end of May. Admission to the honors program depends on the department’s assessment of the qualifications of the student, the feasibility of the project, and the availability of an appropriate advisor.

In April, students who wish to apply to critical honors should register for the Honors Colloquium as one of their four courses.

Progress and Evaluation of Honors

While grades for the fall and winter study terms are deferred until both the honors project and review process are completed, students must do satisfactory work to continue in the program. Should the student’s work in the fall semester not meet the standard, the course will convert to a standard independent study (English 397), and the student will register for a regular winter study project. A student engaged in a year-long project must likewise perform satisfactorily in winter study (English W30 or W31) to enroll in English 493 in the spring semester. When such is not the case, the winter study course will be converted to an independent study “99.”

Students are required to submit one electronic copy to the department academic assistant at pmalanga@williams.edu. Students should also give a final hard copy to their thesis advisor. Both the electronic copy and the hard copy are due on the dates applicable to the type of project pursued (see the above descriptions of each type of project for the due dates). All honors projects are evaluated by the advisor and two other faculty members. The advisor determines the student’s semester grades in honors, while the two external readers recommend to the department that the project receive Highest Honors, Honors, or no Honors. Honors of any kind are contingent upon satisfactory completion of courses in the major during the senior year. Highest Honors are normally awarded only to students whose performance in both the honors program and regular courses in the major has been exceptional.

COURSES 100-LEVEL COURSES
At the introductory level, the department offers a range of writing-intensive 100-level courses which focus on interpretive skills-techniques of reading as well as skills in writing and argumentation. English 150 and 154 will focus more directly on basic expository writing skills than the other 100-level classes. All 100-level courses are designed primarily for first-year students, although they are open to interested sophomores, juniors, and seniors. A 100-level course is required for admission to most upper-level English courses, except in the case of students who have placed out of the introductory courses by receiving a score of 5 on the Advanced Placement examination in English Literature or a 6 or 7 on the International Baccalaureate.

ENGL 104(S) Creative Non-fiction (W)
In this course we will read some of the most prominent practitioners of creative non-fiction—writers like John McPhee, Joan Didion, Edward Abbey, Malcolm Gladwell, Ryszard Kapuscinski, Susan Orlean, Tobias Wolff, Ta-Nehisi Coates, and Michael Pollan. Students will also write in a variety of non-fiction modes—explainers, tick-ticks, profiles, essays, memoirs. We will probe the border between invention and fact and consider the ways that narratives are constructed.

Class Format: seminar
Requirements/Evaluation: frequent short exercises and longer writing assignments, revision totaling at least 20 pages
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none
Enrollment Preferences: first-year students who have not taken or placed out of a 100-level ENGL course
Enrollment Limit: 14
Expected Class Size: 14
Distributional Requirements:
Division 1
Writing Intensive

ENGL 105(F) American Girlhoods (D) (W)
Crosslistings: ENGL 105/WGSS 105/AMST 105
The image of the girl has captivated North American writers, commentators, artists, and creators of popular culture for at least the last two centuries. What metaphors, styles of writing, ideas of "manners and morals" does literature about girls explore? What larger cultural and aesthetic concerns are girls made to represent? And how is girlhood articulated alongside and/or in opposition to other identities and identifications, such as race, ethnicity, class, and sexuality? These are some of the issues we will explore in this course. We will read works by such authors as Emily Dickinson, Louisa May Alcott, Harriet Jacobs, Henry James, Gwendolyn Brooks, Toni Morrison, and Michelle Truong, as we discuss such popular phenomena as Barbie and the American Girl Doll Company, Girl Scouts, and Riot Grrrls.
This course meets the requirements of the Exploring Diversity Initiative in that it focuses on empathetic understanding, power and privilege, especially in relation to class, gender, sexuality, race and ethnicity within a U.S. context.
Class Format: seminar
Requirements/Evaluation: several short papers totaling at least 20 pages; active class participation; participation in other short writing assignments
Extra Info: may not be taken on a pass/fail basis
Prerequisites: none
Enrollment Preferences: first-year students who have not taken or placed out of a 100-level ENGL course; WGSS majors
Enrollment Limit: 19
Expected Class Size: 19

SEM Section: 01 TF 02:35 PM 03:50 PM Instructor: Kathryn Kent

ENGL 107(F) Temptation (W)
Crosslistings: ENGL 107/AMST 107
We want most those things we can’t—or shouldn’t—have. Or, to put it another way, it is when limitations are placed on our actions by law, religion, or the facts of our own biology that we experience desire most acutely. In this course, we will examine short fiction, narratives, lyric poems, and philosophical meditations in which people are tempted to act against their better judgement. Free will, ambition, temptation, suspense, despair, and repression will be our conceptual preoccupations. We will get to know such writers and artists as Homer, Euripides, Ovid, Augustine, Shakespeare, Donne, Milton, Laoclos, Mozart, Freud, Frotz, and Scornese.
Class Format: seminar
Requirements/Evaluation: four-five page-paper, in-class presentation, thoughtful participation in discussions
Extra Info: may not be taken on a pass/fail basis
Prerequisites: none
Enrollment Preferences: first-year students who have not taken or placed out of a 100-level ENGL course
Enrollment Limit: 19
Expected Class Size: 19

ENGL 108(F) Everyday Stories (W)
We—human beings—consume stories every day, and we currently have a dazzling, even astonishing wealth of choices, every day. Most of these stories are Action Packed: this Thing blows up, Heart throbs with passion, that Organizer carries out some evil plot, this Person figures it out. We will examine the world of everyday storytelling across many mediums, from poetry to comic books to television, and across time, from the mid-19th century to the present.
Class Format: seminar
Requirements/Evaluation: class participation, and 5-6 writing assignments amounting to 20 pages all told
Extra Info: may not be taken on a pass/fail basis
Prerequisites: none
Enrollment Preferences: first-year students who have not taken or placed out of a 100-level ENGL course
Enrollment Limit: 19
Expected Class Size: 19
Distributional Requirements:
Division 1
Writing Intensive

Fall 2016
SEM Section: 01 MW 12:00 PM 12:50 PM Instructor: Peter Murphy

ENGL 109(F) Science Fiction of the African Diaspora (D) (W)
Crosslistings: ENGL 109/AMST 120/AFR 120
Publishers, authors, academics, and critics often assume that science fiction and fantasy readers are all or mostly white, an assumption driven, perhaps, by the scarcity of black writers inside the genre—the science-fiction creative-writing classes I teach at Williams, for example, are depressingly undiverse. And for a long time, among professional science-fiction writers, Samuel R. Delany and Octavia Butler represented pretty much the entire deal. The last fifteen years, however, have witnessed the emergence of a number of black science fiction and fantasy authors from the Americas and Africa. In this course we will read a sample of this fiction, paying particular attention to these questions: In what new ways (if any) do these authors use or imply themes of social hierarchy or race? In what ways (if any) do the standard science-fiction devices of imagined futures, interplanetary colonization, or contact with alien life allow black writers a new metaphorical vocabulary to talk about their own experience? In what ways (if any) are they constrained by readers’ expectations, while white writers are not? This is a discussion-based class. Assignments will include original creative writing, imitative or parodic writing, and of course that old stand-by, interpretive essays on assigned texts. We will be reading well-weathered classics by Charles Chesnutt, Paulina Hopkins, Amos Tutuola, W.E.B. DuBois, George Schuyler, Delany, and Butler, but also newer works by Pam Noles, Nalo Hopkinson, NK Jemisin, Tananarive Due, Steven Barnes, Nisi Shawl, Sofia Somatar, Kuni Ibura Sakaam, and Nnedi Okorafor, among others. This course fulfills the EDI requirement, as it engages questions of power and privilege, and the coded representation of racial or ethnic otherness. Any story that involves the clash of sentient species, for example, or a nostalgic or disruptive reinterpretation of the social hierarchies of the past, partakes implicitly of this coded language.
Class Format: seminar
Requirements/Evaluation: evaluation will be based on substantial, weekly writing assignments of graduated length totaling 20 pages over the course of the semester and active participation in classroom discussion
Extra Info: may not be taken on a pass/fail basis
Prerequisites: none
Enrollment Preferences: first-year students who have not taken or placed out of a 100-level English course
Enrollment Limit: 19

ENGL 111(S) Poetry and Politics (W)
"Poets are the unacknowledged legislators of the world" wrote Shelley in his 1821 "Defence of Poetry," countering the widely held view of poetry's airy irrelevance to the material progress of humanity. His claims are echoed a century and a half later in Audre Lorde's "Poetry is Not a Luxury," in which she argues that poetry is a vital and essential part of her own political struggle as a Black lesbian feminist. But when W.B. Yeats himself a very politically involved poet writes in 1917 that "from the quarrel with others comes rhetoric; from the quarrel with ourselves comes poetry," he implies that poetry would suffer from too much involvement with the "quarrel with others" that is politics, becoming, perhaps, something more like advertising jingles for political dogma. And when W. H. Auden writes in 1939 that "poetry makes nothing happen," he appears...
to locate poetry's value precisely in its irrelevance to politics as such. This course will focus on the vexed relationship between poetry and political struggle, reading predominantly poetry and poetics (writings about poetry) of the last two centuries in an effort to answer the questions: what can poetry do for politics? what does politics do for (or to) poetry? Is poetry essential to political struggle, or do poetry and politics mix only to the detriment of both, producing, on the one hand, bad poetry, and on the other, mere distractions from the "real" work of politics? The primary goal of the course is to make students better readers of poetry, and better readers and writers of argumentative prose.

Class Format: discussion/seminar
Requirements/Evaluation: active class participation and 20 pages of writing in the form of frequent short papers
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none; no prior experience with poetry (or politics!) is expected
Enrollment Preferences: first-year students who have not taken or placed out of a 100-level ENGL course
Enrollment Limit: 19
Expected Class Size: 19

ENGL 112(F) Introduction to Literary Criticism (W)
What determines meaning? How we interpret is inevitably influenced by our own priorities and preoccupations, by the contexts in which we read, by the literary and other elements that we bring to our writings as well as derive from the historical and personal circumstances of its composition, as well as deriving from the particular words of a text and from the mutable life of language itself. So how to go about the task of reading literature well, and reading critically? This course will focus on key introductory methods and critical approaches, and is intended to develop your skills in reading, writing about, discussing and interpreting literary texts. Our readings—mainly short fiction and poetry, along with selected introductory key introductory methods and critical approaches, and is intended to develop your skills in reading, writing about, discussing and interpreting literary texts. In the last weeks of the course, we will read longer texts, including at least one play and one novel.

Class Format: seminar
Requirements/Evaluation: four papers ranging from 2 to 6 pages, regular short reading response papers, and contributions to class discussions
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none
Enrollment Preferences: first-year students who have not taken or placed out of a 100-level ENGL course

ENGL 117(F,S) Introduction to Cultural Theory (W)
Crosslistings: ENGL 117/COMP 117
This course has a clear purpose. If you had signed up for a course in biology, you would know that you were about to embark on the systematic study of living organisms. If you were registered for a course on the American Civil War, you would know that there had been an armed conflict between the northern and southern states in the 1860s. But if you decide you want to study "culture," what exactly is it that you are studying? The aim of this course is not to come up with handy and reassuring definitions for this word, but to show you why it is so hard to come up with such definitions. People fight about what the word "culture" means, and our main business will be to get an overview of that conceptual brew. We will pay special attention to the conflict between those thinkers who see culture as a realm of freedom or equality or independence or critical thought and those thinkers who see culture as a special form of bondage, a prison without walls. The course will be organized around short theoretical readings by authors ranging from Matthew Arnold to Constance Penley, but we will also, in order to put our new ideas to the test, watch several films (Ferris Bueller's Day Off, Silence of the Lambs, The Lord of the Rings) and listen to a lot of rock & roll. Why do you think culture matters? Once you stop to pose that question, there's no turning back.

Class Format: discussion/seminar
Requirements/Evaluation: five short papers totaling about 20 pages, class attendance and participation
Extra Info: may not be taken on a pass/fail basis
Prerequisites: none
Enrollment Preferences: first-year students who have not taken or placed out of a 100-level ENGL course
Enrollment Limit: 19

ENGL 120(F) Nature of Narrative (W)
Crosslistings: COMP 111/ENGL 120
This course examines the nature and workings of narrative using texts drawn from a wide range of literary traditions, media, and genres. Readings will include Greek and Chinese classics ( Homer and others), 19th-century French, German, and Russian fiction (Zola, Kleist, Lemmontov), Latin American magic realism (Marquez), and visual literature from stage drama to film and graphic memoir (Oscar Wilde, Sam Mendes, Alison Bechdel). We will also read some short works of literary theory from around the world to help us broaden our idea of what literature can be and do. All readings in English.

Class Format: seminar
Requirements/Evaluation: regular attendance and participation, ungraded creative project, several short response assignments, two 4- to 5-page papers, and one paper rewrite
Extra Info: may not be taken on a pass/fail basis
Prerequisites: none
Enrollment Preferences: students considering a major in Comparative Literature
Enrollment Limit: 19
Expected Class Size: 19
Distributional Requirements:

Fall 2016
SEM Section: 01  TF 01:10 PM 02:25 PM  Instructor: Christian Thome

ENGL 120(S) The Nature of Narrative (W)
Crosslistings: COMP 111/ENGL 120
This course focuses on the nature and function of narrative using a wide range of texts from different periods, traditions and genres. We will analyze the ways in which several first-rate works of fiction communicate their concerns, in other words: how do they do what they say? And why does "how" matter as much as, if not more than, "what"? We will also look at film, blogs, and articles, and accompany the readings with a few pertinent theoretical texts. The authors we will study may include Marie de France, Cerervas, Austen, Gogol, Faubert, Kafka, Zweig, García Márquez, Farhad;All readings in English, although those with foreign language competency are invited to make comparisons with the original where possible.

Class Format: seminar
Requirements/Evaluation: meaningful class participation, two short papers, and a final paper of 10 pages, which will consist of a draft and a final version
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none
Enrollment Preferences: students considering a major in Comparative Literature and who have studied a foreign language
Enrollment Limit: 19
Expected Class Size: 19

ENGL 125(F) Theater and Politics (W)
This seminar traces the surprisingly close and controversial relationship between theater and politics from ancient Greek tragedy to modern literature, contemporary film and philosophy. When Plato kicked off political philosophy by outlining his ideal city-state, one of his first moves was to ban theatrical performance on the grounds that play-acting would make men poor governors of themselves. In more recent times, however, the work of artists and playwrights as diverse as Bertolt Brecht and Antonin Artaud have provocatively suggested that theater itself could remedy the ills that Plato thought it caused. In today's age of global spectatorship, writers, artists, and activists continue to pose: who are the real actors and spectators of today's digital world-stage, when governments and other powerful institutions have increasingly sophisticated tools for gathering information about and controlling the on-looking masses, but revolutions are nevertheless organized via social media or triggered by cell phone images? May include works by Euripides, Melville, Woolf, Warhol, and Michael Haneke.

Class Format: seminar
Requirements/Evaluation: three papers and a portfolio of interpretive questions, totaling 20 pages of written work
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none
Enrollment Preferences: first-year students who have not taken or placed out of a 100-level ENGL course

ENGL 128(S) Reading Asian American Literature (W)
Crosslistings: AMST 128/ENGL 128/COMP 128
Though the category and term “Asian American” came about as a result of political struggle in the 1960s, what we now call Asian American writing in English began in the nineteenth century and has played a significant role in every American literary “movement” from Modernism, realism, protest literature to various avant-gardes, the graphic novel, and digital poetries. This writing-intensive course closely reads a sampling of texts in a variety of genres and styles—produced by writers from various Asian American ethnic groups—from the late nineteenth century to the present and contextualizes them historically, both domestically and globally. We will examine the material, cultural, political, and psychic intersections of larger structural forces with individual writers and texts. Along the way, we will interrogate the notion of “Asian American”—its contradictions, heterogeneous nature, and our assumptions—and its relation to the idea of “American.” Some questions we will ask: “Why have Asian Americans and Asian American writers and writing so often been viewed as ‘foreign’ or ‘alien’ to the American body politic and the English-language literary tradition?” “How might Asian American writing be linked to other English-language texts in the Asian diaspora?”

Class Format: seminar
Requirements/Evaluation: six 2-3 pp. papers, participation (attendance, discussion, GLOW posts), and a final project (the final project is 7-9 pages: either a creative project or an analytical paper)
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none
Enrollment Preferences: prospecitive AMST or ENGL majors
Enrollment Limit: 15
Expected Class Size: 15

ENGL 129(F) Twentieth-Century Black Poets (D) (W)
Crosslistings: ENGL 129/AFR 129
From Langston Hughes to contemporary poets such as Angela Jackson and Claudia Rankine, African American poets have been preoccupied with the relations of poetry to other traditions. Vernacular speech, English poetry, jazz and other musical forms, folk humor, and African mythology have all been seen as essential sources for black poetry. This course will survey major poets such as Hughes, James Weldon Johnson, Countee Cullen, Robert Hayden, Gwendolyn Brooks, Amiri Baraka, Jackson, and Yusef Komunyakaa, reading their poems and their essays and interviews about poetic craft. We will ask how black poetry has been defined and whether there is a single black poetic tradition or several.

Class Format: seminar
Requirements/Evaluation: several short papers, a 15-page final paper
Extra Info: may not be taken on a pass/fail basis
Prerequisites: none
Enrollment Preferences: first-year students who have not taken or placed out of a 100-level ENGL course
Enrollment Limit: 19

Fall 2016
SEM Section: 01 MWF 11:00 AM 12:15 PM Instructor: David Smith

ENGL 133(S) New Poetry (W)
In this class we will read and otherwise experience a range of poetry being produced right now in the U.S. Some of this poetry doesn’t immediately seem to “fit” in the classroom: it’s too new, too weird, too raw, too cerebral, too multimedia, too performance-oriented. The premise of the course is that by engaging with the landscape of contemporary US poetry we will come up with ways of talking about it that in the process we will take up some big interesting questions: What is poetry? How is it defined? How does poetry aim to affect us? Does one need “expertise” to appreciate it? And: is poetry important? Does it matter—who, politically, socially, and culturally? The course is aimed at lovers of poetry, those who dislike poetry, those who are intimidated by the idea of it, and those who can’t see why we should bother. Readings will include work of poets who will be at Williams during the semester, and may also include some “old poetry” (for purposes of comparison), critical articles, and manifestos; we will also watch documentaries or listen to more performance-oriented work (e.g., slam, spoken word).

Class Format: discussion/seminar
Requirements/Evaluation: based on class participation; four short (3-6pp.) essays, each of which must be revised; participation in writing groups / tutorials; and occasional short GLOW postings
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none
Enrollment Preferences: first-year students who have not taken or placed out of a 100-level ENGL course
Enrollment Limit: 19
Expected Class Size: 19

ENGL 150(S) Expository Writing (W)

Writing Intensive
Writing clearly is the most important skill you can learn in college. Do you suffer from writer’s block? Do you receive consistent criticism of your writing without also learning strategies for how to improve? This course is for students who want to learn how to write a well-argued, intelligible essay based on close, critical analysis of texts. We will derive our method for mastering the complex art of writing from Atul Gawande’s bestselling book, The Checklist Manifesto. In addition to sharpening your skills in reading, note-taking and literary analysis, this class will give you tools for generating drafts, peer editing, revising, and polishing your writing. The majority of the readings for this course will be literary essays, mostly contemporary, mostly American. (This course and English 152 focus more directly on basic expository writing skills than the other 100-level classes in the English department.)

**Class Format:** seminar

**Requirements/Evaluation:** five essays totaling at least 20 pages, including drafts and revisions; class participation; peer-editing

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**Prerequisites:** none

**Enrollment Preferences:** priority is given to first-year students, but all students will need help with their writing are eligible; email instructor for permission to enroll

**Enrollment Limit:** 12

**ENGL 152(F) Other People’s Lives: Contemporary American Memoir (W)**

The goal of this course is to teach you how to write a clear, well-argued, intelligible and interesting analytical paper. We will spend most of our class time actively engaged in a variety of techniques to improve your critical reasoning and analytical skills, both written and oral. Though the skills you learn will be applicable to other disciplines, and a central purpose of the course is to improve all aspects of your writing, this is a literature class, designed partly to prepare you for upper level courses in the English Department, so we will, therefore, spend equal time on the interpretation of literature. In this case, contemporary American memoir, examining the ways in which recent American memoirists represent themselves through prose and how their readers, and how do they go about achieving them?

**Class Format:** seminar

**Requirements/Evaluation:** several short essays, with drafts and revisions, in-class presentations, written comments on published and student work, active participation in discussions

**Extra Info:** may not be taken on a pass/fail basis

**Prerequisites:** none

**Enrollment Preferences:** first-year students with evidenced need for writing instruction

**Enrollment Limit:** 12

**Expected Class Size:** 12

**Distributional Requirements:**
Division 1
Writing Intensive

---

**ENGL 202(S) Modern Drama**

Crosslistings: ENGL 229/ENGL 202/COMP 202

An introduction to major plays and key movements in European and American theatre since the late nineteenth century. Our focus will be on close reading, with attention also to questions of performance and production. Plays to be discussed will likely include: Ibsen, Chekhov, Uncle Vanya; Pirandello, Six Characters in Search of an Author; Brecht, Mother Courage; Beckett, Waiting for Godot; Miller, Death of a Salesman; Hansberry, A Raisin in the Sun; Pinter, Betrayal, Churchill, Cloud Nine; and Stoppard, Arcadia.

**Class Format:** lecture

**Requirements/Evaluation:** two 5-page papers, regular journal entries or postings, and active participation in class discussions

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**Prerequisites:** none

**Enrollment Preferences:** English and Theatre majors and students who have taken an English or Theatre course

**Enrollment Limit:** 19

**Expected Class Size:** 19

**Department Notes:** satisfies the THEA 248 requirement for Theatre major

**Distributional Requirements:**
Division 1

**Other Attributes:** ENGL Literary Histories C

---

**ENGL 203 Cinematography in the Digital Age (D)**

Crosslistings: ENGL 203/COMP 203/ARTH 203

In this course we study the language of modern cinema as shaped by two forces. The first is the aesthetics of cinematography, as contributed by many cultures. The second is digital film production, which has proved both empowering and constraining. The modern filmmaker succeeds only through understanding both forces.

The structure of the course is similar to a writing workshop. We begin with close reading of isolated scenes from influential films, which we compare and contrast in writing and discussion. We augment this with cinematic and image processing theory, solidified through experiments in Photoshop and Premiere that reveal how digital technology shapes a director’s choices. We then create our own short scenes using these tools and consumer video recorders. We refine our film fragments in the context of group critique.

Topics covered include: framing and composition, pace, storyboarding, blocking, lighting, transitions, perspective, sensors, quantization, compression, visual effects, Internet streaming, and color spaces. Studied films include those by Georges Méliès, George Lucas, Orson Welles, David Lynch, Michael Haneke, Hayao Miyazaki, Spike Lee, Sophia Coppola, and Ken Burns. This course explores diversity through comparative study of how different cultures variously render similar themes, and through a larger investigation of film’s ability to make audiences identify with potentially alien points of view.

**Class Format:** studio

**Requirements/Evaluation:** video production activity, computational exercises in Photoshop, script and storyboarding exercises, participation in discussions, and essays

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**Prerequisites:** a 100 level ENGL course, or a score of 5 on the AP Exam in English Literature or a 6 or 7 on the International Baccalaureate; or permission of instructor

**Enrollment Preferences:** sophomores; Computer Science and English majors

**Enrollment Limit:** 36

**Expected Class Size:** 30

**Distribution Notes:** meets Division 1 requirement if registration is under ENGL or ARTH; or ANTH; or ART; or AMST; or FMST in the second semester if registration is under CSCI

**Distributional Requirements:**

**ENGL 204(F) Hollywood Film**

Crosslistings: ENGL 204/COMP 221

For almost a century, Hollywood films have been the world’s most influential art form, shaping how we dress and talk, how we think about sex, race, and power, and what it means to be American. We’ll examine both the characteristic pleasures provided by Hollywood’s dominant genres—including action films, horror films, science fiction and fantasy, thrillers and romantic comedies—and the complex, sometimes unsavory fantasies they mobilize. We will do this by looking carefully at a dozen or so iconic films, probably including Psycho; The Godfather; Schindler’s List; The Lord of the Rings: The Return of the King; Bridesmaids; and 12 Years a Slave. In addition to the assigned reading, students will be required to attend free screenings of course films on Sunday evenings at Images Cinema.

**Class Format:** lecture

**Requirements/Evaluation:** mandatory attendance at free Sunday 8pm film screenings at Images, several short writing exercises, two editing exercises, two midterms, and a final exam

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**Prerequisites:** a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

**Enrollment Limit:** 90

**Expected Class Size:** 90

**Distributional Requirements:**
Division 1

**ENGL 211(F,S) English Literature from 1000 to 1600**

One of the oldest surviving works in English, Beowulf tells the story of a monster and his mom. In this class we will read key texts from the medieval and early modern periods, starting with Beowulf and ending with Shakespeare’s equally bloody Titus Andronicus. Other readings will include selections from The Canterbury Tales, Sir Gawain and the Green Knight, sonnets by Sidney and Donne, and Marlowe’s The Jew of Malat. We will discuss the conflicting, often self-contradictory claims that writers in these periods made for the importance of literature and the anxieties that these new

ENGL 216(S) Introduction to the Novel

This was a time when novels as we understand them didn't exist; then there was a time — centuries — when novels were overwhelmingly the dominant storytelling and literary mode in English. This lecture course will follow the cultural arc of the novel, but most of our time—and this is a time-consuming course—will be spent making and critiquing each other's pieces. Students will produce five or six pieces total, at least two of which must develop out of interviews with strangers.

Class Format: lecture
Requirements/Evaluation: midterm and final exams, one critical essay, and some short writing assignments
Prerequisites: a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam, or permission of instructor
Enrollment Preferences: students who have pre-registered for the course: thereafter, seniors, then juniors, sophomores, and first-years
Enrollment Limit: 100

ENGL 217 Experimental Asian American Writing

Crosslistings: AMST 217/COMP 217
Asian American literature did not begin in the 1980s with Amy Tan's The Joy Luck Club. Nor has the writing primarily been confined to autobiographical accounts of generation, a series of conflict, divided identities, and glimpses of Chinatown families. Asian American literature in English began with poetry in the late nineteenth century, and has encompassed a variety of aesthetic styles across the last century—from Modernism to New York School poetry to protest poetry to digital poetics. This course will explore Asian American writings that have pushed formal (and political) boundaries in the past 100+ years, with a particular focus on avant-garde writers working today. We will look at such authors as Jose Garcia Villa, Chuang Hua, Wong May, Theresa H., Cha, John Yau, Mei-mei Berssenbrugge, Tan Lin, Prageeta Shamma, Bhanu Kapil, and Tao Lin.

Class Format: seminar
Requirements/Evaluation: papers (6-8 pp. and 10-12 pp.) plus in-class presentation, brief response papers, and class participation
Prerequisites: none
Enrollment Preferences: if the course is over-enrolled, preference will be given to American Studies majors
Enrollment Limit: 15
Expected Class Size: 15

ENGL 223 Thirteen Ways of Looking at Jazz (D) (W)

Crosslistings: AFR 156/COMP 156/AMST 156/ENGL 223
Taking its title from the Wallace Stevens poem, "Thirteen Ways of Looking at a Blackbird," which interprets the blackbird in different ways, this course similarly

250
explores a more complex, multi-layered perspective on jazz, from jazz and American democracy to jazz in visual art. Accordingly, the course introduces students to several genres, including historical documents, cultural criticism, music, literature, film, photography and art. The course does not draw on a musicological method but rather a socio-cultural analysis of the concept, music and its effect—so students are not required to have any prior musical knowledge or ability. In this writing intensive course, students will write and revise short close analyses of multiple types of media, ultimately honing their writing skills on one form of media for a polished, original analysis that weeds their increased critical thinking skills. This EDI course explores the musical expressions of the culturally diverse peoples of African descent in the New World, as well as the myriad ways in which representations of jazz signify on institutional power, reaffirm dominant U.S. and/or European hierarchies of race, gender and class, and signal inequality in order to contest it.

Class Format: lecture
Requirements/Evaluation: evaluation will be based upon class participation, 1 quiz, several 2-page response essays, one 3-page essay, one 5-page essay, one oral presentation/formance with 3-page critcal report, totaling approximately 20 pages of written work.
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none
Enrollment Preferences: none
Enrollment Limit: 19
Expected Class Size: 19

ENGL 224T American Drama: Hidden Knowledge (W)
Crosslistings: THEA 275/COMP 275/ENGL 224/AMST 275

The Buddha is said to have identified three things that cannot stay hidden: the sun, the mirror, and the truth. What’s the secret? Who is lying? Who is breaking the rules? American drama abounds with hidden knowledge and false representations. (This is not surprising: theatre is always on some level a deceptive practice, a place where one person pretends to be another, and where what is spoken is always open to skeptical scrutiny. We might say, theatre is always lying as much as lying is always theatre.) This tutorial course will examine what lies hidden in American plays from the late nineteenth century to the early twenty-first. Beginning with excerpted critical and historical writings on secrecy and lying (The Adventures of Pinocchio, Macchivelii’s ‘The Prince’, Thomas Carlson’s ‘Lying and Deception: Theory and Practice’, among others), we will proceed to a set of American plays from across a wide spectrum of playwrights, including Edward Albee, Suzan-Lori Parks, Sarah Ruhl, Sam Shepard, Eugene O’Neill, Arthur Miller, David Mamet, Amy Herzog, and others. Student papers will explore how hidden knowledge structures dramatic action, how different characters create and respond to untruths, and what we can learn in particular from American drama about a national relationship to honesty and its opposites.

Class Format: tutorial
Requirements/Evaluation: weekly papers/response papers; weekly meeting with instructor and tutorial partner
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none
Enrollment Preferences: Theatre majors, English majors

ENGL 231(F,S) Literature of the Sea (W)
Crosslistings: MATS 231/ENGL 331

Taking advantage of our maritime museum, coastal setting, and three field seminars, we study canonical and lesser-known novelists, short-story writers, dramatists, and poets who set their works in the watery world, often in the exact place where the texts were written as a class. We read, for example—depending on fall or spring semester—Ernest Hemingway when sailing on the Straits of Florida, John Steinbeck when exploring Cannery Row on Monterey Bay, and Mark Twain on a steamboat on the Mississippi. We read Kate Chopin on the sands of the Gulf of Mexico, Rudyard Kipling out on Georges Bank, and Herman Melville’s masterpiece Moby-Dick aboard Mystic Seaport’s historic whaleship, the Charles W. Morgan, a vessel nearly identical to the vessel he climbed aboard at age twenty-one. In the classroom we examine these works through a mixture of lecture, small-group discussion, and writing. To further appreciation and analysis, this interdisciplinary course uses students’ emerging knowledge of maritime history and marine science.

Class Format: small group tutorials with weekly lectures, including coastal and near-shore field trips and ten days at sea
Requirements/Evaluation: regular papers, class participation, journal-writing, and a final paper.
Extra Info: offered only at Mystic Seaport

ENGL 234 The Modern Theatre: Plays and Performance
Crosslistings: THEA 248/COMP 248/ENGL 234

This seminar will examine major trends in global theatre and performance from the turn of the nineteenth century through the postwar period. We will explore a variety of national traditions, comparing and positioning works in the context of revolutionary transformations of theatre practice. Artists to be considered may include: Strindberg, Ibsen, Wilde, Chekhov, Shaw, Pirandello, Treadwell, Artaud, O’Neill, Hughes, Stein, Williams, Hansberry, Al-Hakim, Begin, Bennett, Abe, Genet, Soyinka, Pinter, Albee, Wilson, Gambard, and Forne. Although emphasis will be given to textual analysis and close reading, we will also consider trends in acting, directing, design, theatre architecture and the actor/audience relationship whenever possible.

Class Format: seminar
Requirements/Evaluation: two five-page papers; two “deep-reading” responses; active participation in class discussion; attendance at selected Theatre Department and Center Series productions
Prerequisites: none
Enrollment Preferences: Theatre, English and Comparative Literature majors
Enrollment Limit: 18
Expected Class Size: 10

ENGL 236(S) Fields of Barley, Streets of Gold: Utopia in Fiction (W)
Each of the gates was a single pearl; And the street of the city was pure gold, As it were transparent glass.

Revelations 21:21

It makes us happy to think of the future in apocalyptic terms, partly because we love to say I told you so. You didn’t listen, and now look. Fort Lee is on fire, and zombies are smashing down your parents’ door. Catastrophe satisfies us on many levels; by contrast, the utopian vision provides a more delicate thrill. For a writer, the task is to provide a fiction that will not feel like a moral lesson or the illustration of some theory about how we should behave. This course will consider different utopian stories in turn, moving from Plato’s Republic through the invented worlds of Thomas More, Margaret Cavendish, Edward Bellamy, and H.G. Wells, and then into the more contemporary science fiction of Kim Stanley Robinson, Ursula LeGuin, John Crowley, and others. Implicit in any kind of alternate reality is its creators’ rejection of the place they live, and their corresponding longing for something new, which in all cases is as interesting as the way a story might work as a model for social improvement. In addition to the occasional critical essay, students will invent a personal utopian fiction of about twenty to twenty-five pages, to be read and discussed by the class.

Class Format: seminar
Requirements/Evaluation: various short assignments and one 20-page project
Prerequisites: none
Enrollment Limit: 19
Expected Class Size: 18

ENGL 241(F) Introduction to Comparative Literature
Crosslistings: COMP 110/ENGL 241

Comparative literature involves reading and analyzing literature drawn from different times, movements, cultures, and media. In this class, we will study English translations of texts from eras spanning the ancient to the contemporary; literary movements including romanticism, realism, and postmodernism; national traditions arising in Western and Eastern Europe, Asia, and Latin America; and media including prose fiction, graphic memoir, and film. Throughout the course, we will consider what it means to think about
all these different works as literary texts. To help with this, we will also read selections of literary theory that define literature and its goal in abstract or philosophical terms. Assignments will focus on close, creative reading of relatively short texts by authors like Homer, Sei Shônagon, Kleist, Lermontov, Zola, Borges, Wilde, Mamet, Bechdel, and others. All readings will be in English.

Class Format: lecture
Requirements/Evaluation: lecture attendance, participation, two 5-page papers, a few short responses, midterm exam
Extra Info: may not be taken on a pass/fail basis
Prerequisites: none
Enrollment Preferences: students considering a major in Comparative Literature
Enrollment Limit: 40
Expected Class Size: 35
Distributional Requirements: Division 1

Fall 2016
LEC Section: 01 Cancelled

ENGL 250(S) Americans Abroad (D) (W)
Crosslistings: COMP 242/ENGL 250/AMST 242
This course will explore some of the many incarnations of American experiences abroad between the end of the 19th century and the present day. Materials will be drawn from novels, short stories, films, and nonfiction about Americans in Europe in times of war and peace. We will compare and contrast the experiences of novelists, soldiers, students, war correspondents, jazz musicians, and adventurers. What has drawn so many Americans to Europe? What is the difference between a tourist, an expat, and an émigré? What are the profound, and often comic, gaps between the traveler’s expectations and the reality of living in, say, Paris or a rural village in Spain? What are the misadventures and unexpected rewards of living, working, writing, or even falling in love in translation? Authors may include: Henry James, Langston Hughes, Martha Gellhorn, Ernest Hemingway, Elaine Dundy, Richard Wright, and Ben Lerner.

Additional reading will be drawn from historical and critical works. All readings will be in English.

This comparative course fulfills the EDI requirement because it is designed to highlight the challenges and benefits of cultural immersion abroad. It will focus on the linguistic, emotional, intellectual, and social adaptation skills that are required to understand others, and oneself, in new contexts.

Class Format: seminar
Requirements/Evaluation: each student will give an in-class presentation and complete 3 writing assignments totaling 20 pages; one of these writing assignments will be a personal travel narrative based on the student’s own experiences.
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: any literature course at Williams or permission of instructor
Enrollment Preferences: students interested in, or returning from, study abroad; and/or students studying abroad at Williams
Enrollment Limit: 18
Expected Class Size: 18

ENGL 251 Introduction to Latina/o Literatures (D)
Crosslistings: LATS 208/AMST 207/COMP 211/ENGL 251
This discussion course serves as an introduction; the reading list is not meant to be exhaustive or comprehensive, but will rather provide a sampling or range of texts for students to engage. We will explore a number of readings across different genres (the novel, play, poem, short story, graphic novel). Students will endeavor to understand how each author defines Latinidad. What characterizes Latina/o for each of these writers and how do their works articulate with the historical conditions out of which they emerge? How is Latina/o literature marked by notions of language, nationality, gender, sexuality, class, race, politics, form, and genre? The readings will provide both a survey of general ideas in the study of Latina/o literatures as well as specific case studies and historical examples from which we will extrapolate about the larger field. Readings include works by Tómas Rivera, Cristina Garcia, Cristy C. Road, Oscar Zeta Acosta, Junot Diaz, Alisa Valdes-Rodriguez, and more. This course fulfills the Exploring Diversity Initiative requirements as it offers students a comparative study of cultures and societies by examining the U.S. racial project of constructing a Latina/o people out of various peoples. Additional attention is given, under the rubric of power and privilege, to the specific economic and political institutions that structure Latina/o cultural production.

Class Format: lecture
Requirements/Evaluation: students will be evaluated based on weekly online discussion forum posts, two short papers, a midterm exam, a final comprehensive project, as well as classroom participation
Prerequisites: none

Enrollment Preferences: Latina/o Studies concentrators, American Studies and Comparative Literature majors
Enrollment Limit: 30
Expected Class Size: 20

ENGL 253(F) Gender, Sexuality and Modern Performance (D) (W)
Crosslistings: THEA 250/ENGL 253/WGSS 250/COMP 247
This interdisciplinary tutorial explores aspects of gender, sexuality, performativity, race, class, and representations of the body in modern theatre and performance in America. While attention will be given to the still understudied role of women in the arts, we will focus primarily on the transsecentialities of social identities under intersected systems of oppression. Close analysis of works by dramatists—such as Adrienne Kennedy, Caryl Churchill, Wendy Wasserstein, Nozake Shange, Tony Kushner, Naomi Iizuka, Paula Vogel, Szu-Lor-Parks, David Henry Hwang, Tarell McCraney, Gina Gionfriddo, and Taylor Mac—will occur alongside consideration of works by artists such as Karen Finley, Ron Athey, Tim Miller, E. Patrick Johnson, and Young Jean Lee. Our approach to this varied material will be comparative and will be enriched by readings of critical works by writers such as: Judith Butler, bell hooks, Cherrie Moraga, Gloria Anzaldúa, Eve K. Sedgwick, Jill Dolan, José Esteban Muñoz, David Román, and Donna Haraway. This course meets the criteria of the Exploring Diversity Initiative as it draws focus towards the diversity of race, class, and ethnicity represented by the subjects of our study as well as towards the political power of theatre and performance.

Class Format: tutorial
Requirements/Evaluation: students will meet with instructor in pairs for an hour each week; they will write a 5- to 7-page paper every other week (five in all), and comment on their partner’s papers in alternate weeks
Extra Info: emphasis will be placed on developing skills in reading, interpretation, critical argumentation, and critical written and oral response may not be taken on a pass/fail basis; not available for the fifth course option

ENGL 259 Ethics of Jewish American Fiction (W)
Crosslistings: REL 259/ENGL 259/JWST 259
After the Second World War, Jewish American writers who wrote about Jewish characters and Jewish themes were increasingly celebrated as central figures in American fiction. Isaac Bashevis Singer, Bernard Malamud, Saul Bellow, Cynthia Ozick and Philip Roth are among those who gained prominence in this period. These writers were literary innovators and often addressed broad humanistic themes. But they also struggled with profound questions that arose in the postwar period about Jewishness, the legacy of the Holocaust, and what it means to be an American. In this course we will read the above authors and others. We will focus, in particular, on the distinctive ethical and political ideas, emotions and aspirations that animate their work. The course will begin with a study of theoretical approaches that will provide the basis for our ethical criticism: we will read, for instance, Lionel Trilling, Wayne Booth, Martha Nussbaum, and Noël Carroll. Then we will delve into the fiction, following a trail that begins in the postwar period and continues in fictions by Erica Jong, Rebecca Goldstein, Michael Chabon, Gary Shteyngart, and others. Can we find a distinctive Jewish American ethics in Jewish American fiction?

Class Format: seminar
Requirements/Evaluation: class participation, one take-home exam on theoretical approaches to ethical criticism; four short essays
Extra Info: not available for the fifth course option
Prerequisites: none
Enrollment Preferences: Religion majors, Jewish Studies concentrators, and English majors
Enrollment Limit: 19
Expected Class Size: 18
Distribution Notes: meets Division 2 requirement if registration is under REL or JWST; meets Division 1 requirement if registration is under ENGL

252
The text contains course descriptions, distributional requirements, and other attributes for various courses. Here is a structured representation of the information:

### ENGL 260 Beyond Tonto: American Indians in Film (D)
- **Crosslistings:** AMST 257/HIST 357/ARTH 260/ENGL 260/COMP 273
- **Description:** In 1983, Terri Christenson unveiled the kinetoscope and allowed audience members to glimpse the Hoop Snake Dance by peeking into the device’s viewing window. Since the birth of the motion picture, films portraying Native Americans (often with non-Native actors in redface) have drawn upon earlier frontier mythology, art, literature, and Wild West performances. These depictions in film have embedded romanticized and stereotyped ideas about American Indians in the imaginations of audiences throughout the United States and around the world. In this course, we will critically examine representations of American Indians in film, ranging from the origins of the motion picture industry to the works of contemporary Native filmmakers who challenge earlier paradigms.

### ENGL 261T(S) Adultery in the Nineteenth-Century Novel (W)

The text also includes details on course attributes, enrollment limits, and specific requirements for different academic years and sections. It highlights the importance of understanding the historical and cultural contexts of the works studied, as well as the evolution of media representations. The courses cover a range of topics from postmodernism to Shakespeare’s works, reflecting the dynamic and evolving nature of the field of English studies.
ENGL 284 Arab and Anglophone: Narratives Beyond Nation and Diaspora
Crosslistings: ARAB 256/COMP 256/ENGL 284
This course takes a close look at contemporary Anglophone Arab writings. The objective is to familiarize students with major Arab writers, and/or writers of Arab descent who live in the Anglo-Saxon diaspora, especially the UK, North America and Australia. We will investigate the work of these writers with special attention to the history of Arab migration to these geographies, and the emergence of hyphenated Arab identities and literatures. At the heart of this course is a desire to not only shed light on what it means to be an Arab or an immigrant producing English literature, but also to understand the multiple ways in which we conceptualize and seek to define what transnational literature means. Texts for this course may include novels by the following writers: Rabih Alameddine (Lebanon/USA), Mohja Khaf (Syria/USA), Leila Abouleila (Sudan/UK), Hisham Matar (Libya/UK), and Randa Abdel-Fattah (Palestine-Egypt/Australia). There will also be a course reader that includes critical essays, poems, as well as a number of films and selections of music that shed light on the different articulations of being Arab and Anglophone.

Class Format: seminar
Requirements/Evaluation: active class participation, 4 short response assignments (2-3 pages), and final paper (5-7 pages)
Extra Info: may not be taken on a pass/fail basis
Prerequisites: none
Enrollment Preferences: majors or prospective majors in Comparative Literature or Arabic Studies
Enrollment Limit: 25
Expected Class Size: 15
Distributional Requirements: Division 1
Other Attributes: ARAB Arabic Studies Electives
GBST Borders, Exiles + Diaspora Studies Electives
GBST Middle Eastern Studies Electives

ENGL 287(S) Bloody Vampires: From Fiction to Film and Fashion (W)
Crosslistings: COMP 246/ENGL 287
This course explores the phenomenon of the vampire and seeks to explain the popular appeal such a fictive creature has been enjoying for over two centuries. What kind of fears and fantasies does it crystallize? And what kind of discourse about sexuality, death, and disease does it validate? What does its mere existence reveal about gender and ethnicity? We will examine the emergence of the vampire in gothic literature of the late 18th and 19th centuries, its omnipresence in cinema in the 20th century and investigate its resurgence in 21st-century pop culture. In order to gain a deeper understanding of the figure of the vampire, we will read and discuss literature by August Bürger and Goethe, the first vampire story by John Polidori, novels by Sheridan LeFanu and Bram Stoker, and contemporary vampire fiction by Anne Rice and Stephenie Meyer. We will also discuss music video clips by Lady Gaga and Marilyn Manson, and fashion shows by Alexander McQueen, John Galliano and Vivienne Westwood.

Class Format: seminar
Requirements/Evaluation: three 5-page papers and a 10- to 12-page final rewrite
