200-LEVEL GATEWAY COURSES
200-level "gateway" courses are designed for first- and second-year students contemplating the major or intending to pursue more advanced work in the department; these courses focus on analytical writing skills while introducing students to critical and historical approaches that will prove fruitful in later courses. (note: a gateway course can fulfill a period or criticism requirement as well as the gateway requirement. Students contemplating the English major are strongly urged to take a gateway course by the end of sophomore year.)

ENGL 209(F) Theories of Language and Literature (W)
Crosslistings: ENGL 209/COMP 265
This course is made up of questions: What is literature and why would anyone want to study it? What can you find out by examining language that you can’t figure out by studying history or psychology? Do students of literature have distinctive ways of asking questions about the world? Why do we call some language literary? Can any language be literary? Can novels do things that plays and poetry cannot? Why does anyone read poetry anyway?

Class Format: seminar
Requirements/Evaluation: four short papers totaling 20 pages, formal weekly writing, class attendance and participation
Extra Info: may not be taken on a pass/fail basis
Prerequisites: none
Enrollment Preferences: first-years and sophomores considering the English major
Enrollment Limit: 19
Expected Class Size: 19
Distributional Requirements: Division 1
Writing Intensive
Other Attributes: English Majors Course

ENGL 219(F) "Get Back to Where You Once Belonged": Immigration in Cultural Context (D) (W)
This course is centered on the idea of "immigrant literature" and the various forms it has taken across historical and geographical contexts. We will inquire into formal and topical differences between American immigrant narratives and their European counterparts. We will also consider the figure of the "immigrant" as a literary trope, in comparison to the "migrant," the "refugee," the "exile," the "foreigner," and the "stranger." We will work with the works of Joseph Conrad, Saul Bellow, Chang Rae Lee, Jhumpa Lahiri, Sam Selvon, Zadie Smith, and Tahar Ben Jelloun, and such films as La Haine and Head-On. The course will contribute to the College’s Exploring Diversity Initiative by examining the mythic productive and volatile cultural encounters that are inherent to the phenomenon of immigration.

Class Format: seminar
Requirements/Evaluation: participation in discussion and a class blog, and 20 pages of writing distributed over four papers
Extra Info: may not be taken on a pass/fail basis
Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam
Enrollment Preferences: first- and second-year students and English majors who have yet to take a Gateway course
Enrollment Limit: 19
Expected Class Size: 19
Distributional Requirements: Division 1

ENGL 220(S) Introduction to African American Literature (W)
Crosslistings: ENGL 220/AMST 220/AFR 220
What does it mean, socially, culturally, historically, personally, and spiritually, to be African American? No single, simple answer suffices, but African American literature as a genre is defined by its ongoing engagement with this complex question. This course will examine a series of texts that in various ways epitomize the fraught literary grappling with the entailments of American blackness.

Readings will include texts by Frederick Douglass, Booker T. Washington, Zora Neale Hurston, Langston Hughes, Richard Wright, Ralph Ellison, Amiri Baraka, Toni Morrison, and Ishmael Reed.

Class Format: seminar
Requirements/Evaluation: writing assignments for the course will total 20 pages, distributed over 4 papers
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam, or permission of instructor
Enrollment Preferences: first- and second-year students and English majors who have yet to take a Gateway course
Enrollment Limit: 19
Expected Class Size: 19
ENGL 227(S) Introduction to Post Colonial Studies (D) (W)

Crosslistings: ENGL 227/COMP 287/AFR 227

This course asks: What does the term "postcolonialism" mean? Is it a historical notion or an ideological term? When exactly does the 'postcolonial' begin? What are the theoretical and political implications of using such an umbrella term to designate the ensemble of writings and artworks by those subjects whose identities and histories have been shaped by the colonial encounter? We will situate the "postcolonial" historically, aesthetically, and conceptually across multiple time periods, geographic regions. We will read such authors as Frantz Fanon, Edward Said, Stuart Hall, Homi Bhabha, and Gayatri Spivak. The course will contribute to the College's Exploring Diversity Initiative by examining cultural difference and distributions of power across the world during the colonial, postcolonial, and globalized eras.

Class Format: seminar

Requirements/Evaluation: evaluation through participation in discussion and a class blog, and approximately 20 pages of writing distributed over four papers

Extra Info: may not be taken on a pass/fail basis

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Preferences: first- and second-year students and English majors who have yet to take a Gateway course

Enrollment Limit: 19

Expected Class Size: 19

Distribution Notes: meets Division 1 requirement if registration is under ENGL or COMP; meets Division 2 requirement if registration is under AFR

ENGL 228(S) The Renaissance in England and the European Continent: Self and World (D) (W)

Crosslistings: ENGL 228/COMP 230

At the same time as the individual human being in possession of a distinctive personality was taking on enormous importance in politics, philosophy, literature, and the visual arts, early modern Europeans were witnessing unprecedented levels of cultural diversity. In this interdisciplinary course, we will consider these two developments both separately and together. As Renaissance humanists were acquiring a sophisticated understanding of the diversity between the present and various European pasts (the recent medieval past and the remote history of antiquity), they were also coming into contact with non-European cultures in Africa, the Americas, and Asia via trade and economic development, imperial expansion, and religious conversion. Always at stake in these encounters was the question of who counted as an individual; the self was not considered to be intrinsic to human nature but rather the product of historical and cultural developments. Themes will include religious pluralism, the sacred and the secular, vernacularity, exploration and empire, the relationship between mind and body, slavery, trade, wealth, gender, self-fashioning, and style. We will consider such English writers as the Pearl poet, More, Marlowe, Spenser, Shakespeare, Browne, and Milton; such continental artists as Michelangelo, Velázquez, Bruegel, and Rembrandt. The course will contribute to the College's Exploring Diversity Initiative by examining the role of historical and cultural difference within and beyond Europe at the very beginning of globalization.

Class Format: seminar

Requirements/Evaluation: five 4-page papers, in-class presentation, thoughtful participation in discussions

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Preferences: first- and second-year students and English majors who have yet to take a Gateway course

Enrollment Limit: 19

Expected Class Size: 19

Distribution Requirements: Division 1

ENGL 239(S) Imagining Immigrants (D) (W)

Crosslistings: ENGL 239/COMP 239

The goal of this writing-intensive gateway course is to advance our abilities as rigorous, subtle, and imaginative interpreters of literature and to become sensitive readers of the conflicts, anxieties, and vulnerabilities faced by today's immigrants. Moving physically from one culture to another but remaining imaginatively torn between their adopted country and their country of origin, feeling at times like a stranger to both, immigrants face questions that concern us all in our increasingly global society, questions of identity, liminality, alienation, empathy, and language. Bombardeed by a language that is not their own, immigrants are constantly thinking about what words mean both literally and symbolically. Why this word rather than another? How do humor and irony work in a foreign culture? How do writers reconcile the pressures of the present moment with the stream of memories from the old country? How is one person's point of view, or one society's point of view, different from another's? How can images and metaphors convey the experience of constantly seeing an object, or an entire world, in terms of another?

Class Format: seminar

Requirements/Evaluation: active participation in discussion, four 5-page papers and journal entries

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Preferences: sophomores and first-year students who have not yet taken an ENGL Gateway course

Enrollment Limit: 19

Expected Class Size: 19

Distribution Requirements: Division 1

ENGL 240(F) The Novel in Theory (W)

Crosslistings: ENGL 240/COMP 239

What is a novel? Where did it come from? Why would anyone invent such a thing in the first place? In spite of its title, this is not a course about more theoretical novels, unwritten or dreamily imagined works of fiction. Rather, this is an introduction to the ways literary critics have attempted to give a genre as hard-to-pin down as the novel a theoretical framework. For a long time, nobody thought the novel needed a theory—too popular, too loose and baggy to be thought of as one thing. Today, novel theory is legion. To only name a few, one can find theories of the novel that identify themselves as formalist,
move back and forth from the theory of the novel to its practice in order to see
either the novel or its theories, this course will use two or three novels as a
trans-national development. Rather than try for an encyclopedic survey of
as accounts that emphasize sexuality and gender, for example, or the novel's
academic and popular fortunes relate to its theoretical accounts.

Theorists are likely to include Henry James, Shklovsky, Benjamin, Lukacs,
Barthes, Watt, McKeon, Jameson, Franco, Eve Sedgwick, Edward Said, &
Franco Moretti. Novellists may include Austen, Dickens, Conrad.

Class Format: seminar
Requirements/Evaluation: 4-5 papers totaling about 20 pages; regular,
substantial, and intensive participation in class
Extra Info: may not be taken on a pass/fail basis; not available for the fifth
course option
Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English
Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

ENGL 246(S) The Love of Literature (W)
If love “makes the world go ‘round,” then literature, love’s chronicler, may
contain the key for understanding this world-formative passion. In this
seminar, we will explore representations of love in works of poetry, drama,
and prose fiction from antiquity to the present. From the philosophical love
extolled in Plato’s dramatic dialogue The Symposium to the courtly love of
Christien de Troyes’ errant knights; the jealous love of Shakespeare’s Othello;
the literally induced lust of Flaubert’s Madame Bovary and beyond, we will see
how love, like literature, at once reflects and produces historically significant
changes in the ways that human beings relate to one another, to themselves,
and to the world in which they live. In addition to the authors already
mentioned, readings may include works by Augustine, Dante, Goethe,
Wordsworth, Woolf, and Mann.

Class Format: seminar
Requirements/Evaluation: evaluation based on three papers of 4, 6, and 8
pages; weekly posts and general participation
Prerequisites: none
Enrollment Preferences: those interested in majoring in English
Enrollment Limit: 19

Expected Class Size: 19

ENGL 265(F) Topics in American Literature: Freedom and Captivity (D) (W)
Crosslistings: ENGL 265/AMST 266
Letters from prison are as central to American literature as are dreams of
freedom. This course explores the persistent concern in American literature
and culture with forms of freedom and captivity. How have writers witnessed
and imagined the experience of dispossession, displacement, interment,
diaspora, and emancipation? The course will be weighted toward the 19th
century, but will make constant reference to contemporary works as we
explore the American carceral imagination in the shift from a slavery
democracy to a penal democracy. This course contributes to the College’s
Exploring Diversity Initiative by focusing on how cultures and peoples within
American society have interacted and responded to one another in the past. In
addition to works by Frederick Douglass, Harriet Jacobs, Lydia Maria Child,
Zitcasa-Sa, Charles Johnson and Julie Otsuka, we will view contemporary
films that represent slavery and emancipation (Twelve Years a Slave,
Daughters in the Dust, and the 2016 Birth of a Nation), as well as
contemporary visual art in the collection of the Williams College Museum of
Art.

Class Format: seminar
Requirements/Evaluation: three 5- to 7-page papers and one 10-page final
essay; weekly short responses.
Extra Info: may not be taken on a pass/fail basis
Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English
Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Preferences: first-year students, sophomores, and English
majors who have yet to take a Gateway course

ENGL 267(F) "Ain’t I a Woman?": An Introduction to Black Women’s
Writing in America (D) (W)
Crosslistings: ENGL 267/WGSS 267/AFR 267/AMST 267
This Gateway course offers a survey of African American women’s writing
from the nineteenth century to the present day with an equal emphasis on
primary literary texts and feminist criticism. We will trace the development of
a black woman/feminist tradition across various genres and disciplines,
beginning with the work of abolitionists such as Frances Ellen Watkins Harper
and Sojourner Truth and working our way through key texts of the Harlem
Renaissance, the civil rights movement, and post-60s Black Feminist writing.
Our discussions will focus on the black feminist tradition’s engagement with
race, gender, class, and sexuality as intersecting axes of difference. Writers
that we will read include: Zora Neale Hurston, Toni Morrison, Suzan-Lori
Parks, bell hooks, Audre Lorde, Hortense Spillers, Kimberlé Williams
Crenshaw. This course fulfills the EDI requirement by examining the
intersection of different minorizing processes in the experiences and writing
of African American women in the US.

Class Format: seminar
Requirements/Evaluation: 3 short response papers (approx. 4 pages each)
and one final 7-8-page paper; in-class presentations, participation in class
discussions

ENGL 268(S) American Law, Race, and Narrative (D) (W)
Crosslistings: ENGL 268/AFR 268/AMST 268
This course examines how American and African American writers engaged
with legal definitions of race, personhood, and citizenship in the nineteenth
and twentieth century. The key junctures in the formation of these narratives
were the Declaration of Independence, the Fugitive Slave Act, Dred Scott v.
Sandford in the ante-bellum period, Ferguson v Plessy in the late nineteenth
century and Brown v Board of Education in the mid-twentieth century. Authors
we will read include: Frederick Douglass, Herman Melville, Martin Delany,
Mark Twain, Charles Chesnutt, Jean Toomer, Bebe Moore Campbell, Ntozake
Shange, and Natasha Trethaway. As a course that focuses on the legal and
literary constructions of race in the US, this course fulfills the EDI requirement.

Class Format: seminar
Requirements/Evaluation: 3 short response papers (approx. 4 pages each)
and one final 7-8-page paper; in-class presentations and participation in class
discussions

ENGL 272(S) American Postmodern Fiction (W)
Crosslistings: ENGL 272/AMST 272
American fiction took a turn at World War II: from modernism to postmodernism. The most obvious mark of postmodern narration is its self-consciousness. Already a paradox emerges: why would World War II make narratives self-reflexive? The best text for this paradox is Heller's Catch-22.

Class Format: seminar
Requirements/Evaluation: four papers totaling about 20 pages; participation in class discussions
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Language literature exam, or a score of 6 or 7 on the Higher Level IB English exam

ENGL 289(F) Graphic Storytelling (W)
In the 1890s an author/artist put words and pictures together in boxes, ordered the boxes along a (short) narrative arc featuring a continuing character, published it in a newspaper, and graphic storytelling as we know it was born. 15 years later (in the form of comic strips) it had already become one of the most important storytelling modes in American culture. In this course we will follow the development of this quirky and important American contribution to world culture from comic strips through graphic novels to the "graphic novel." Along the way we will consider all kinds of interesting general subjects: for instance, the relationship between commerce and creativity, the difference between good and bad culture, and the pervasive human need to tell and experience stories.

Class Format: seminar
Requirements/Evaluation: active class participation and five or six short essays, totaling about 20-25 pages
Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Language literature exam, or a score of 6 or 7 on the Higher Level IB English exam
Enrollment Preferences: sophomores and first-year students who have not yet taken an ENGL Gateway course

300-LEVEL COURSES

ENGL 301(S) Sublime Confusion: A Survey of Literary and Critical Theory
Crosslistings: COMP 301/ENGL 301
Which is more appealing, a roller coaster or a rose? For much of its history, art and literary theory has conceived itself as a science devoted to explaining and defining “beauty.” But running alongside this is an edgier countercurrent that worships the beauty of experience, the horror of the sublime. We will take in a cross section of critical theory from classical times to the present, focusing on careful reading of relatively short texts by Plato, Aristotle, Addison, Burke, Schiller, Nietzsche, Shklovsky, I.A. Richards, Barthes, Derrida, Lyotard, Fredric Jameson, Haraway, and others. Case studies ranging from opera to video game design to the web will illustrate and complicate the theoretical issues. Weekly discussion in an online forum; two short papers (5-7 pages), and a 10-page final paper or project

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none

SEM Section: 01 M 07:00 PM 09:40 PM Instructor: Kelly Josephs

ENGL 308(S) Tragic Stages
Crosslistings: ENGL 308/THEA 310
The earliest surviving tragedies were composed for Athens' theater of Dionysus. Performed as part of a religious festival, they played on an outdoor stage that seated 12,000 spectators. When tragedy was revived some 2000 years later, it addressed itself to a new audience. The gods were dispelled. Choruses and masks dropped away in favor of sword fights and pig's blood. In this course we will consider both tragedy's production and its reinvention. What happens when human suffering, once staged for ritual purposes, becomes a
subject of mass entertainment? Works will include plays by Sophocles, Euripides, Seneca, Marlowe, Shakespeare, and Racine.

**Class Format:** seminar

**Requirements/Evaluation:** papers and short exercises

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**ENGL 314(F) Groovin’ the Written Word: The Role of Music in African American Literature**

**Crosslistings:** AFR 314/AMST 314/COMP 321/ENGL 314

In an interview with Paul Gilroy, Toni Morrison once said, "Music provides a key to the whole medley of Afro-American artistic practices." Morrison is not the only one who believes that music speaks to numerous aspects of the African American experience. From Sterling Brown and Zora Neale Hurston to John Edgar Wideman and Suzan-Lori Parks, many African American authors have drawn on music to take political stands, shape creative aesthetics, and articulate black identity. In this course, students will explore the work of these authors and more, investigating music's ability to represent and critique African American culture in their literature. Texts will cover a range of literary forms including poetry, plays, short stories and novels alongside theoretical and critical essays. Students will discuss such key issues as assimilation into mainstream culture, authenticity claims on black music, and music used as a tool for protest. Additionally, class assignments will include musical examples in spirituals/gospel, blues, jazz, and rock/rhythm and blues. While this class requires students to practice in-depth literary and performance analysis skills, students are not required to have technical musical knowledge.

**Class Format:** lecture/discussion

**Requirements/Evaluation:** evaluation will be based upon class participation, short weekly reading responses and/or learning assignments, one 3-page paper, one 6- to 8-page paper comparing two works, one in-class spoken word performance with 2-page report, final presentation

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**ENGL 316(F,S) Blackness, Theater, Theatricality (D)**

**Crosslistings:** ENGL 316/AFR 336

Representations of African American life have pervaded the various genres and tiers of American culture, embodying a carnival of competing attitudes and perspectives. Many oddities and ironies result from this curious history. For example, African Americans as theatrical figures enter American consciousness via the minstrel stage, where white entertainers wearing burm cork lampooned Negroes to amuse white audiences. Eventually, black performers created their own versions of minstrelsy, black playwrights created dramas more sympathetic to black life, and representations of black life proliferated in every noteworthy medium. This course will consider how attitudes about blackness have informed or deformed theatrical representations of African American life. It will examine major texts by African American writers, considering both their social importance and their aesthetic experiments and innovations. It will range from politically oriented works of social realism such as Theodore Ward's Big White Fog and Lorraine Hansberry's A Raisin in the Sun to expressionist protest works like Amiri Baraka's Dutchman and Slave Ship and Ntozake Shange's For Colored Girls Who Have August Wilson's earliest histories and the post-modern satires of Adrienne Kennedy and Suzan-Lori Parks. Alongside these, we will also consider a variety of comic traditions, ranging from minstrelsy to Spike Lee's film Bamboozled and characters created by comedians such as Jackie "Moms" Mabley and Richard Pryor. And how should we assess Porgy, a play by the white writer Dubose Heyward, which evolved into America's greatest opera, Porgy and Bess? This course will be an ongoing inquiry into the riotous theatricality of American blackness.

**Class Format:** seminar

**Requirements/Evaluation:** journal, a 15-page final paper

**ENGL 317 Black Migrations: African American Performance at Home and Abroad**

**Crosslistings:** AFR 317/COMP 319/DANC 317/ENGL 317/THEA 317/A

This course will investigate, critique and define the concepts migration and diaspora with primary attention to the experiences of African Americans in the United States and Europe. Drawing on a broad definition of performance, students will explore everything from writing and painting to sports and dance to inquire how performance reflects, critiques and negotiates migratory experiences in the African diaspora. For example, how did musician Sidney Bechet's migration from New Orleans to Chicago to London influence the early jazz era? How did Katherine Dunham's dance performances in Germany help her shape a new black dance aesthetic? Why did writer James Baldwin go all the way to Switzerland to write his first novel on black, religious culture in Harlem? What did jazz education’s influence to expressionistic protest works like Amiri Baraka's Dutchman and Slave Ship and Ntozake Shange's For Colored Girls Who Have

**Class Format:** seminar/discussion

**ENGL 319(F) The Literary Afterlife**

**Crosslistings:** ENGL 319/COMP 354

What do writers mean when they say that they will live on after death through their books? In this course, we will explore the long history of thinking about literature as a way to compensate for mortality, and we will compare the fictional afterlife and philosophical versions of eternity. Many of the writers on our syllabus were anxious about the compatibility of the pursuit of worldly fame with the desire for Christian salvation. We will study how their sense of a conflict between the two afterlives changed over time: from the recovery of pagan antiquity during the Renaissance, across the theological transformations of the Reformation, to the consequences of print. The course deals with some of literature's greatest ambitions—to cheat death, to make a
lasting contribution to human culture—but we will often find ourselves caught in an undertow of skepticism. Is writing any less susceptible to decay than human bodies are? If so, is literary accomplishment worth the risk of one’s soul? Authors and texts will include Sappho, Ovid, Lucretius, Ecclesiastes, Richard II, Jonson, Donne, and Milton.

Class Format: seminar
Requirements/Evaluation: one 7-page paper, one 12-page paper, in-class presentation, thoughtful participation in discussions
Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam
Enrollment Preferences: English majors
Enrollment Limit: 25

ENGL 320T Two American Poets: Wallace Stevens and John Ashbery (W)
Crosslistings: AMST 336/ENGL 320/COMP 335
This tutorial focuses on the work of two major American poets who are known for their “difficult” poetry. In some respects, Stevens (1879-1955) and Ashbery (b. 1927) book-end twentieth-century poetry: Stevens is a major Modernist poet, perhaps the most philosophically oriented American poet of the twentieth century, and Ashbery is considered by most critics to be the most important American poet alive. Students will do close readings of their poems (and one play, Three Days of the Condor) by Stevens, as well as practice their writing on poetry and art. We will discuss the overlaps between Stevens’ and Ashbery’s work and life—their having grown up in the Northeast and attended Harvard, what some see as the abstractness of their writing, their mastery of tone, among others—but also the differences: Ashbery’s sexuality, his having lived in France, the supposedly more “avant-garde” nature of Ashbery’s work, and so on. Along the way, we will ask questions about the nature of poetic difficulty, of abstraction, of the (lyric) poetic speaker in their works, of the role of tone between the poem and the world (e.g., in description), of the thinking and philosophizing that poems do. We will also ask about their links to major poetry “movements” (Modernism, the New York School) and pose questions that are rarely asked about their poetry, such as “What are their views about the United States and American society and culture?” “What assumptions about race, gender and class are embedded in their poetry?” And, always, we will be paying close attention to the question of form and language in Stevens and Ashbery’s poetry.
Class Format: tutorial
Requirements/Evaluation: typical tutorial format; papers every other week
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none
Enrollment Preferences: ENGL majors, COMP majors, AMST majors; preference will be given to students who have already taken at least one literature class

ENGL 322(F) Political Romanticism
Crosslistings: ENGL 322/COMP 243/PSCI 234
What is Romanticism, and how does it relate to the world-changing political upheavals that emerge along with it? Romantic literature emerged around the time of the French and Haitian Revolutions, and many Romantic authors were deeply sympathetic to the democratic principles of freedom and equality that inspired such political uprisings. Yet many also questioned revolutionaries’ attempts to realize such ideas by forcibly seizing control of governments. These authors became interested in art and literature as alternative means of bringing about social and political change. In so doing, they invented ideas about the political power of art that are still very much with us today. This seminar examines these ideas through readings of works of Romantic literature and the philosophy that brought them into the world, while also considering how arguments subsequently developed for and against political Romanticism. We will inform today’s heated debates about the relationship between art and politics. Authors may include Burke, Kant, Rousseau, Wordsworth, Schiller, C. Smith, P.B. Shelley, Hegel, Heine, Marx, and Carl Schmitt.
Class Format: seminar
Requirements/Evaluation: evaluation based on two papers, 6 and 8-10 pages in length, weekly posts, and general participation
Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

ENGL 323T(F) A Novel Education (W)
All novels are conscious of their readers; eighteen-century novels are obsessed with them. In the century when the genre first flourished, readers are the ultimate objects of novelists’ plots. We are addressed, teased, flattered, made fun of, praised, chided, solicited, warned, reminded, rebuked, asked for sympathy, and—always—closely watched. Eighteenth-century novelists—and their narrators—carefully educate their readers, not only teaching us how to interpret the novel itself, but also demanding that we self-consciously question the powers of mind and habits of heart we bring to the process of interpreting a book, ourselves, and our world. In this seminar course, we will explore the narrative and rhetorical strategies of two of the century’s greatest novelists use in creating, shaping, and finally educating their readers. We will focus principally on Henry Fielding’s Tom Jones (1749) and Laurence Sterne’s Tristram Shandy (1760-67)—long, brilliantly intricate novels that go about their work in very different ways, but that are equally committed to the project of giving their readers a novel education. We will consider—much more briefly—Fielding’s Joseph Andrews and Bunyan’s Pilgrim’s Progress. We will also read criticism by such “reader response” theorists as Stanley Fish and Wolfgang Iser, and—in the individualized setting of a tutorial—students will be asked to develop and articulate their own theories of reading by examining critically the ways in which texts affect and educate them. Emphasis will be placed on developing skills not only in reading and interpretation, but also in constructing critical arguments and responding to them in written and oral critiques.
Class Format: tutorial; students will meet with the instructor in pairs for an hour each week
Requirements/Evaluation: a 5- to 6-page paper every other week, and comment on their partners’ papers in alternate weeks
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

ENGL 326 Race and Abstraction
Crosslistings: AMST 465/AFR 362/COMP 465/ENGL 326
Minority artists—writers and visual artists mainly and, to a lesser degree, musicians—face a difficult “double bind” when creating works of art: the expectation is that they, like their racially marked bodies, will exhibit their difference by means of concrete signifiers (details, tropes, narratives, themes) of racial difference. Thus, the work is judged primarily in terms of its embodied sociological content (material, empirical) and not by “abstract” standards of aesthetic subtlety, philosophical sophistication, and so on. At the same time, in the popular and academic imaginary, minority subjects and artists poets occupy a single abstract signifying category—homogeneous, undifferentiated, “other,” marginalized, non-universal—while racially “unmarked” (white) artists occupy the position of bringing universal and individual alike.
In this course, we will ask questions about the problem of race and abstraction by looking at the work of various African American and Asian American writers, visual artists and musicians—including Will Alexander, Mei-mei Berssenbrugge, David Hammons, Yayoi Kusama, Tan Lin, Nathaniel Mackey, and Ceci Taylor—as well as critics. We will pay particular attention to formally experimental works.
Class Format: seminar
Requirements/Evaluation: two papers (one 6-8 pages and the other 10-12 pages), brief five-minute presentations, and regular participation
Prerequisites: none if registering under AMST, AFR, or COMP; though a previous lit, art or music class would be helpful; if registering under ENGL, 100-level ENGL course, or 5 on AP English Lit exam or 6 or 7 on the Higher Level IB English exam will be required
Enrollment Limit: 13
Expected Class Size: 13
ENGL 327 Experimental African American Poetry
Crosslistings: AMST 307/COMP 311/AFR 301/ENGL 327
Contemporary African American poets in various cities and towns across the nation—from New York City to Los Angeles, from Berkeley to Durham, N.C.—are currently producing a vibrant and thriving body of formally experimental work, yet this poetry is largely unknown to readers both within and outside the academy. This formally innovative poetry defamiliarizes what we normally expect of “black writing” and pushes us to question our assumptions and presumptions about black identity, “identity politics,” the avant-garde (for example, is it implicitly raced?), formalism, socially “relevant” writing, the (false) dichotomy of form versus content, the black “community,” digital poetry, and other issues of race and aesthetics. We will examine the writings of living poets, who range widely in age, and those of their avant-garde predecessors in the twentieth century. We will also be making links between this poetry and African American music and visual art.
Class Format: seminar
Requirements/Evaluation: two papers (6-8 pp., 8-10 pp.), short response papers, oral presentation, and class participation
Prerequisites: none, though at least one previous literature course preferred

ENGL 328(S) Austen, Eliot, Woolf
Crosslistings: ENGL 328/WGSS 328
At roughly fifty-year intervals, Britain produced three brilliant female novelists—Jane Austen, George Eliot, and Virginia Woolf—who would each become renowned, in her own way, for her ability to combine minutely detailed social observation with a rich depiction of the inner lives of her characters. This course will examine some of their major fiction—with an emphasis on Austen and Eliot—with special attention to the nature and implications of their narrative methods for representing the consciousness of characters, and of the authorial narrative voices that mediate among them. Questions to be considered: how is our understanding of novelistic characters and consciousness shaped by our real-life experience in interpreting the thoughts and character of other and vice versa? Do “omniscient” narrators lay claim to a privileged kind of knowing presumed to be unavailable either to their character or to readers, or are they modelling humanly available interpretive stances toward a world of others? How do these authors’ preoccupations with interior thought relate to their focus on women’s experience? Possible texts may include Austen’s Emma and Persuasion, Eliot’s Middlemarch, Daniel Deronda, and The Lifted Veil, and Woolf’s The Waves.
Class Format: seminar
Requirements/Evaluation: one six-eight-page and one ten-twelve-page essay
Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam
Enrollment Preferences: English majors
Enrollment Limit: 25

ENGL 334(S) When Harlem was in Vogue (D)
Crosslistings: ENGL 334/AFR 335/AMST 344
This course will examine the aesthetics and politics of the first modern African American cultural movement, known today as the Harlem Renaissance. In our readings of key literary texts by authors such as Alain Locke, Jessie Fauset, Zora Neale Hurston, Eric Walrond, Langston Hughes, Claude McKay, Nella Larsen, and Jean Toomer, we will discuss both the national and global contexts of so-called “New Negro Writing.” Furthermore, we will trace the heated debates between Harlem’s leading intellectuals and artists on the definitions of Black art, the themes and language most appropriate to “race literature” (as well as those seen as least appropriate to it), the responsibilities of the Black artist and his or her position vis-à-vis American and world literature. This course fulfills the EDI requirement by examining the relationship between race and canon-making in the early twentieth century.
Class Format: seminar
Requirements/Evaluation: 3 response papers (4-5, 5-6 and 6-7 pages) during the course of the semester; students will also prepare in-class presentations and participate in discussion
Extra Info: may not be taken on a pass/fail basis

CANCELLED
This course examines the development of various overlapping African American and Afro-Caribbean protest traditions in the past two hundred years, such as Abolitionism, early reparations movements, the civil rights movement, the Black Panthers, black feminism, and Black Lives Matter. We will read a variety of speeches, essays, poems, songs, sermons, and pamphlets by writers, activists, and artists such as David Walker, Robert Wedderburn, Anna Julia Cooper, Ella Baker, Martin Luther King Jr, Malcolm X, Amiri Baraka, Angela Davis, George Jackson, and the Combahee River Collective. We will also examine the documents and online-syllabi of the Black Lives Matter movement. This course fulfills the EDI requirement as its points of focus are race formation in the US and the black liberation tradition that developed in opposition to racial legal and social norms both at home and abroad.

**Class Format:** seminar

**Requirements/Evaluation:** 3 response papers (4-5, 5-6 and 6-7 pages) during the course of the semester. Students will also prepare in-class presentations and participate in discussion.

**ENGL 337(S) The Social Life of Renaissance Poetry**

What is the relationship between interior life and the public sphere? Many of the accomplishments of Renaissance poetry are inward-facing: psychological intensity, religious devotion, eroticism, the discovery of nature as a space of retreat. This writing was not produced by solitary geniuses, however, but rather by men and women whose texts were embedded in social networks. We will consider social spaces of poetic production, including court, country house, city, and coterie, as well as transnational spaces created by literary influence, cultural exchange, and travel. Authorship, style, commerce, patronage, privacy, sexuality, marriage, censorship, and the history of the book will be our conceptual preoccupations. Poets will include Petrarch, Wyatt, Elizabeth I, Sidney, Spenser, Donne, Shakespeare, Jonson, Marvell, and Milton.

**Class Format:** seminar

**Requirements/Evaluation:** one 7-page paper, one 12-page paper, in-class presentation, thoughtful participation in discussions.

**ENGL 338(F) The American Renaissance**

**Crosslistings:** ENGL 338/AMST 338

"The American Renaissance" is the name given to US literature from 1830-1860. The explosive cultural energy of this period was provided by expanding optimism, religious and spiritual experientialization, the horror of slavery and the looming Civil War. If you don't read the spiritual and existential exploration of Emerson, Thoreau, and Whitman, or the existential despair of Poe, Hawthorne, Dickinson and Melville, all in the light of the brilliant escaped slave autobiography of Harriet Jacobs, then you won’t grasp much of the cultural history of the United States in the two following centuries.

**Class Format:** seminar

**ENGL 340(S) Transparency and Opacity**

**Crosslistings:** ARTS 340/ENGL 340

"Transparency" and "opacity" are metaphors—evoking openness and corruption, for example—and they are also material properties. In this course, students will consider transparency and opacity as formal devices alongside related tools, such as symmetry, reflectivity, reflexivity, and perspective. An intensive program of reading and looking will situate our investigation within discourses of political theory, literary criticism, psychology, architecture, and more; authors include philosopher Edouard Glissant, architectural theorist Alejandro Aravena, and novelist Tom McCarthy, among others. We will investigate visual artists whose work uses transparent, translucent, and opaque materials, including Marcel Duchamp, Donald Judd, Josiah McElheny, Michaelangelo Pistoletto, David Hammons, Joseph Kosuth, Paul Chan, and Demetrius Oliver. Our research will inform a sequence of demanding independent studio exercises; creative work and group critique are important components of this course. Assessable tasks include response papers, studio exercises, and a studio project.

**Class Format:** studio

**Requirements/Evaluation:** evaluation will be based on full and active participation and quality of studio work

**Extra Info:** may not be taken on a pass/fail basis

**ENGL 341(S) American Genders, American Sexualities (D)**

**Crosslistings:** ENGL 341/WGSS 342/AMST 341

This course investigates how sexual identities, desires, and acts are represented and reproduced in American literary and popular culture. Focusing on two culturally rich periods—roughly 1880-1940 (when the terms “homosexual” and “heterosexual” came to connote discrete sexual identities), and the contemporary context of the "postmodem" 21-century—we will explore what it means to read and theorize “queerly.” Among the questions we will ask: What counts as “sex” or “sexual identity” in a text? Are there different ways of being “bisexual”, “queer” or “transgender” writing styles or cultural practices? What does sexuality have to do with gender? How are sexual subjectivities intertwined with race, ethnicity, class, and other identities and identifications? Why has “queerness” proven to be such a powerful and sometimes powerfully contested concept? We will also explore what impact particular historical events, such as the rise of sexology, the Harlem Renaissance, and the emergence of a transgender movement have had on queer cultural production. Readings may include works by the following authors: Butler, Cather, Diaz, Ferguson, Fitzgerald, Foucault, Freud, Hammond, Hughes, James, Larsen, Lorde, Muñoz, Rich, Rodríguez, Sedgwick, and Stein, and as well as screenings of contemporary videos and films. This course meets the requirements of the Exploring Diversity Initiative in that it focuses on empathetic understanding, power and privilege, and critical theorization, especially in relation to class, gender, sexuality, race and ethnicity within a U.S. context.

**Class Format:** discussion/seminar

**Requirements/Evaluation:** active class participation, several short writing assignments, two 5-page papers, and one 8- to 10-page paper

**ENGL 343(F) Whitman and Dickinson in Context (W)**

In this tutorial, we will read closely the works of two of the most influential and fascinating poets in the U.S., Walt Whitman and Emily Dickinson. In addition to studying in depth their poems and other writings-in Whitman’s case, his essays, in Dickinson’s, her letters- we will delve into some of the major critical debates surrounding their work, both individually and when compared to one another. For example, Whitman is often viewed as perhaps the most public nineteenth-century American poet, whereas Dickinson is regarded as perhaps the most "private." We will interrogate this assumption, exploring how each poet represents publicly and privacy in his/her work, as well as their efforts to "perform" and/or reform the American self. We will also examine how each poet engages questions of gender and sexuality, as well as contemporary debates surrounding such issues as abolition/slavery, women's suffrage, temperance, and territorial expansion. Finally, we will explore Whitman and Dickinson’s relation to significant literary and philosophical movements of the
ENGL 349(S) Contemporary Theatre and Performance

Crosslistings: THEA 345/ENGL 349/COMP 355/AMST 345

As Gertrude Stein once remarked, "The hardest thing is to know one's present moment." What is going on in theatre and performance today? What are the hot topics? Who are the writers, performers, and directors of our recent past and present moment? This seminar course will consider both experimental and mainstream drama and performance mainly in the U.S. from the past fifteen years, focusing on topics such as: postmodern performance, theatre of images, auteur-directions, new realism, identity theatre, eco-theatre, performance art, postdramatic theatre, devised performance, virtuosic theatre, immersive theatre, social practice, neo-collectivism, and more. As part of the seminar, students will conduct individual research on selected topics and present their findings through oral reports. We will take a trip to New York to see a show and speak with contemporary theatre makers. Artists and groups considered may include: The Wooster Group, Richard Foreman, Robert Wilson, Meredith Monk, Edward Albee, Maria Irene Fornes, Sam Shepard, Caryl Churchill, Tony Kushner, Suzan-Lori Parks, Sarah Kane, Will Eno, Richard Maxwell, Young Jean Lee, Annie Baker, Brando Jacobs-Jenkins, Quiara Alegria Hudes, Anne Washburn, Elevator Repair Service, Nature Theatre of Oklahoma, The Civilians, and many others. As a final project students will work individually or in small groups to create a script or short performance that addresses the question: "What is the most important story to be telling right now?"

Class Format: seminar

Requirements/Evaluation: evaluation will be based on written and dramaturgical-based assignments, an oral presentation, as well as in-class discussions and a final creative writing and/or performance project

ENGL 355(F) The Brontës

Crosslistings: ENGL 355/WGSS 353

Around 1845, three sisters in a remote town in Yorkshire effectively converted their father's humble parsonage into a family writers' colony. In 1847, each published her first novel—two of which would go on to become major classics. Within 8 years, all three sisters were dead, but by then they had produced seven of the most formally innovative, socially challenging, and powerful works in English fiction. We will read them all, from Charlotte's best-selling love story, Jane Eyre, to the underrayed Anne's brilliant and disturbing anatomy of an abusive marriage, The Tenant of Wildfell Hall, to Emily's singular masterpiece Wuthering Heights, as well as their poetry and selections from the voluminous fantasy fiction they created together as children. We will also read Elizabeth Gaskell's acclaimed 1857 Life of Charlotte Bronte, "the first full-length biography of a woman novelist by a woman novelist" which began the process of making the Brontës the cult figures they remain today. Reading these works together in the bicentennial year of Charlotte's birth, we will consider how their shared efforts helped all three sisters to push through boundaries for other women writers had dared to challenge. In a similar spirit of collaboration, we will mix critical and creative writing in our responses to these works.

Class Format: seminar

Requirements/Evaluation: discussion, two critical essays and two short creative pieces

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

ENGL 356(F) Comic Lives: Graphic Novels & Dangerous Histories of the African Diaspora

Crosslistings: AFR 323/AMST 323/ARTH 223/COMP 322/ENGL 356

This course explores how the graphic novel has been an effective, provocative and at times controversial medium for representing racialized histories. Drawing on graphic novels such as Jeremy Love's Bayou and Ho Che Anderson's King: A Comic Biography, we will consider multiple ways the graphic novel comingles word and image to create more sensorial access into ethnic traumas, challenges and interventions in critical moments of resistance throughout history. Students will practice analyzing graphic novels and comic strips, with the help of critical essays, reviews and film; the chosen texts will center on Africana cultures, prompting students to consider how the graphic novel may act as a useful alternate history for
marginalized peoples. During the course, students will keep a journal with images, themes and reflections and will use Comic Life software and ipads to create their own graphic short stories based on historical and/or autobiographical narratives.

Class Format: seminar
Requirements/Evaluation: evaluation will be based upon class participation, weekly written responses, student-led facilitation, one 3-page graphic analysis, one 6- to 8-page essay, and a final project (producing a graphic short story with Comic Life)
Extra Info: may not be taken on a pass/fail basis, not available for the fifth course option

ENGL 358(S) Across the Oceans, Across the Seas (D) (W)
Crosslistings: ENGL 358/COMP 358/AFR 358

This course will consider literature that depicts the circulation of peoples and commodities and (often people as commodities) across the world's oceans in the 19th and 20th centuries. We will consider such issues as the microcosm of the ship; the slave trade and the Middle Passage; indentured servitude and the Indian Ocean; the ocean as a space of flux and transformation, and figures such as the maroon, the castaway, the lascar, and the pirate. We will read texts by Herman Melville, Claude McKay, Derek Walcott, Kamau Brathwaite, and Amitav Ghosh. Secondary and theoretical texts will include works by Paul Gilroy, C.L.R. James, Edouard Glissant, and Khal Torabully. The course will contribute to the College's Exploring Diversity Initiative by exploring cultural encounters and transformations in the transitional, transnational space of the world ocean.

Class Format: seminar
Requirements/Evaluation: participation in discussion and a class blog, and 20 pages of writing distributed over three papers
Extra Info: may not be taken on a pass/fail basis
Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam
Enrollment Preferences: English majors
Enrollment Limit: 25
Expected Class Size: 20
Distribution Notes: meets Division 1 requirement if registration is under ENGL, or COMP; meets Division 2 requirement if registration is under AFR
Distributional Requirements: Division 1

ENGL 360(S) James Joyce's "Ulysses"
This course will explore in depth the demanding and exhilarating work widely regarded as the most important novel of the twentieth century. James Joyce's Ulysses, which both dismantled the traditional novel and revitalized the genre by opening up new possibilities for fiction. We will discuss the ways in which compelling issues of character and theme (e.g., questions of heroism and betrayal, sexuality and the politics of gender, civic engagement and artistic isolation, British imperialism and Irish nationalism) are placed in counterpoint with patterns drawn from myth, theology, philosophy, and other literature, and will consider the convergence of such themes in an unorthodox form of comedy. In assessing Ulysses as the outstanding paradigm of modernist fiction, we will be equally attentive to its radical and often funny innovations of structure, style, and narrative perspective. In addition to Joyce's novel, readings will include its epic precursor, Homer's Odyssey, as well as critical essays. Students unfamiliar with Joyce's short novel A Portrait of the Artist as a Young Man, which introduces characters later followed in Ulysses, are urged to read it in advance of the course.

Class Format: seminar
Requirements/Evaluation: active participation in class discussions, several group reports, a midterm exam, a 5-page paper, and an 8- to 10-page paper
Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam
Enrollment Preferences: English majors
Enrollment Limit: 20
Expected Class Size: 20

ENGL 361(F) Nabokov and Pynchon

After a brief comparative study of their short stories, the course will focus on selected novels by each author. Texts include: Pnin, Lolita, and Pale Fire by Nabokov; and, by Pynchon, The Crying of Lot 49, and Gravity's Rainbow (to which a substantial portion of the latter part of the course will be devoted).

Class Format: seminar
Requirements/Evaluation: midterm and final papers (roughly 15-18 pages total), and a take-home final exam
Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam
Enrollment Preferences: English majors, not open to first-year students
Enrollment Limit: 25
Expected Class Size: 25

ENGL 362(T) Approaches to W. B. Yeats (W)
We will read the poetry and selected prose and plays of William Butler Yeats. Widely regarded as one of the most influential English-language poets of the twentieth century, Yeats was also a novelist, playwright, critic, autobiographer, and a founder of the Irish national theater. We will consider how his writings were shaped by, and responded to, the literary and political contexts of his time; how he conceived of authorial selfhood, its construction in language, and the functions of literature; and his transactions with his contemporaries (from Wilde to Pound to Auden). Applying a range of critical and theoretical approaches to his writings, and giving particular attention to textual materialism, we will study closely Yeats's compositional process and his habits of repeated revision of published works, as well as his formal techniques.

Class Format: tutorial
Requirements/Evaluation: 5-7 page papers every other week, assessment of partner's essays, tutorial performance, and one substantial revision
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: a 100-level English course, except 150
Enrollment Preferences: preference given to English majors
Enrollment Limit: 10
Expected Class Size: 10
Distributional Requirements:

Division 1

TUT Section: T1 TBA Instructor: James Pethica

ENGL 363 Literature and Psychoanalysis (W)
Crosslistings: COMP 340/ENGL 363

The British psychoanalyst D. W. Winnicott once wrote: "It is a joy to be hidden, and a disaster not to be found." This course will explore the many ways in which writing enacts this paradox, examining in the process several main strands of psychoanalytic thought in relation to literature that precedes, accompanies, and follows it in history. Approximately the first two-thirds of the course will involve close readings of theoretical and literary texts, which will be shared in a seminar format. In the latter portion of the course, students will work with each other and with the instructor on analyzing the processes of reading and writing as they produce original psychoanalytic readings of texts of their choice. All readings in English.

Class Format: lecture/discussion
Requirements/Evaluation: active engagement with the material and with each other, plus two 5-page papers, one 8-page paper, and a symposium presentation
Prerequisites: one previous course in either COMP or ENGL, or permission of instructor

ENGL 365 Literature and Psychoanalysis (W)
Crosslistings: COMP 340/ENGL 363
ENGL 367(S) Documentary Fictions
Crosslistings: ENGL 367/ARTH 367
Documentary Fictions investigates the history of reality-based film and video. Using readings drawn from cultural studies, film history and literary theory, we will consider films ranging from Nanook of the North through Grizzly Man and Citizenfour. How do contemporary technologies of representation (medical imaging, FaceTime, video surveillance) inflect our sense of the world, and of ourselves?
Class Format: seminar
Requirements/Evaluation: several written exercises; two or three media exercises; two film screenings
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course
Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam, or permission of the instructor
Enrollment Preferences: English majors; Art History majors; prospective English majors

ENGL 368 Ireland in Film
In 1909, James Joyce was briefly the manager of one of Dublin's first cinemas. The medium of film has long attracted Irish writers: as a means to explore and represent the country's political and cultural history, to interrogate the very notion of "Irishness", and to promote their work to a wider audience. In turn, Ireland has long provided a rich subject for Hollywood fantasy, often being portrayed by non-Irish directors as either a mythic space for emerald-green romanticism, or, more darkly, as a place of political terror and enduring ideological rivalries. In this course we will view and discuss major films from the canon of Irish cinema, with the main aim of assessing the achievement of indigenous filmmakers and the newly ascendant film movement in Ireland. We will consider the impact of commercial considerations on Irish cinema, and the powerful influence of British and American films (and especially those offering competing representations of Ireland) on Irish filmmakers. We will also read the literary texts on which some films were based, so as to consider the strengths and limitations of the medium as a resource for writers who initially worked only in print. This course will introduce participants to the technical vocabulary of film art, as well as to major themes in modern Irish history and culture. Films to be viewed may include: Man of Aran, The Informer, The Quiet Man, Eat the Peach, In the Name of the Father, Butcher Boy, Intermission, The Playboys, Into the West, The Field, The Crying Game, Michael Collins, Ondine and In Bruges and we will also assess one or more short independent films such as Budawanny and Adam and Paul. Special attention will be given to the work of Neil Jordan, Jim Sheridan and Terry George.
Class Format: seminar
Requirements/Evaluation: two 7-page papers, regular reading responses, and active participation in class discussions
Extra Info: may not be taken on a pass/fail basis
Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam; not open to first-year students

ENGL 371T The Brothers Karamazov (W)
Crosslistings: RUSS 331/COMP 331/ENGL 371
Widely hailed as one of the greatest novels ever written, Dostoevsky's The Brothers Karamazov contains a series of enigmas, not the least of which is precisely who murdered the Karamazov father. In addition to exploring the shared guilt of all four of the brothers Karamazov in the crime of patricide, Dostoevsky poses the most probing questions of his day: Are families tied together merely by blood or by deeper spiritual bonds? Is religious faith possible in an age of reason, science, and technology? Can man's earthly laws ever carry out divine justice? Is humanity prepared to bear the burden of responsibility that comes with freedom? This tutorial will spend an entire semester exploring Dostoevsky's masterwork, and we will read a variety of secondary sources alongside The Brothers Karamazov, including history, philosophy, and literary theory. Our goal will be to understand Dostoevsky's answers to these so-called "accursed questions" through the unique artistic form of The Brothers Karamazov.
Class Format: tutorial
Requirements/Evaluation: evaluation will be based on completion of weekly reading and writing assignments, as well as active engagement during tutorial sessions
Extra Info: may not be taken on a pass/fail basis
Prerequisites: at least one 200-level literature class
Enrollment Preferences: students majoring or considering a major in Russian, Comparative Literature, or English
Enrollment Limit: 10
Expected Class Size: 10
Distributional Requirements: Division 1
Writing Intensive
Other Attributes: JLIST Interdepartmental Electives
Not Offered Academic Year 2017

ENGL 375 New Asian American, African American, Native American, and Latina/o Writing (D)
Crosslistings: AMST 403/COMP 375/ENGL 375/AFR 403/LATS 403
Critics reading minority writing often focus on its thematic—i.e., sociological—content. Such literature is usually presumed to be inseparable from the "identity"body of the writer and read as autobiographical, ethnographic, representational, exotic. At the other end of the spectrum, avant-garde writing is said to concern itself "purely" with formal questions, divorced from the socio-historical (and certainly not sullied by the taint of race). In the critical realm we currently inhabit, in which "race" is opposed to the "avant-garde," an experimental minority writer can indeed seem an oxymoron. In this class we will closely read recent work by Asian American, African American, Native American and Latina/o writers which challenges preconceptions about ethnic literature, avant-garde writing, genre categorization, among other things. The writing done by these mostly young, mostly urban, poets and fiction writers is some of the most exciting being written in the United States today; their texts push the boundaries of aesthetic form while simultaneously engaging questions of culture, politics, and history. Reading them forces us to re-think our received notions about literature. Authors to be read include William Alexander, Sherwin Bitsui, Monica de la Torre, Sesshu Foster, Renee Gladman, Bhanu Kapil, Tan Lin, Tao Lin, Ed Roberson, James Thomas Stevens, Roberto Tejada, and Edwin Torres.
Class Format: seminar
Requirements/Evaluation: evaluation will be based on either one 16- to 18-page seminar paper or two shorter papers (one 7-8 pages and one 9-10 pages); short response papers; participation
Prerequisites: those taking this as an ENGL class must have previously taken a 100-level ENGL course
Enrollment Preferences: American Studies majors
ENGL 388 Asian American Writing and the Visual Arts (D)
Crosslistings: AMST 304/ENGL 388/COMP 307
This course examines the intersection of Asian American writing and the visual arts in a range of works: graphic novels, art criticism, collaborative projects between poets and visual artists, works that combine textual and visual elements, ekphrastic poems, projects, video, work, digital poetry, among others. Writers and artists to be discussed include Mei-mei Benssenbrugge, Theresa Cha, Patty Chang, Mel Chin, Bhanu Kapil, Janice Lee, Tan Lin, Yoko Ono, Adrian Tomine, and John Yau.

Class Format: seminar
Requirements/Evaluation: two papers, short assignments, presentation, participation
Prerequisites: none
Enrollment Preferences: American Studies majors
Enrollment Limit: 15
Expected Class Size: 15
Distribution Notes: meets Division 2 requirement if registration is under AMST; meets Division 1 requirement if registration is under ENGL or COMP

ENGL 389(F) Fiction of Virginia Woolf
Crosslistings: ENGL 389/WGSS 389
"Let us record the atoms as they fall upon the mind in the order in which they fall, let us trace the pattern, however disconnected and inchoherent in appearance, which each sight or incident scores upon the consciousness. Let us not take it for granted that life exists more fully in what is commonly thought big than in what is commonly thought small" ("Modern Fiction"). Virginia Woolf's fiction represents a self-conscious and highly experimental challenge to the conventions of Victorian and Edwardian fiction, in an effort to re-center the novel on lived experience. This course will explore the evolution of the innovative fictional forms by which she tried to bridge the gap between the experience of consciousness and its representation in language. We will also consider the links between Woolf's concern with the fluidity of consciousness and her interest in gender fluidity and androgyny. We will read most of the major novels, probably including The Voyage Out, Jacob's Room, Mrs. Dalloway, To the Lighthouse, Orlando, The Waves, and Between the Acts, together with selected short fiction and critical essays.

Class Format: seminar
Requirements/Evaluation: discussion, weekly journal, 3-4 to 6-page essays
Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam
Enrollment Preferences: English majors, WGSS majors, seniors
Enrollment Limit: non
Expected Class Size: 25
Distribution Notes: meets Division 1 requirement if registration is under ENGL; meets Division 2 requirement if registration is under WGSS
Distributional Requirements: Division 1
Other Attributes: ENGL Literary Histories C

ENGL 395(S) Signs of History
Crosslistings: ENGL 395/COMP 395/HIST 395
What is an historical event, and how do such events differ from other occurrences? How are historical changes reflected in or produced by literature, art and other cultural forms? Who or what makes history and what is the nature of historical agency? Is history always "written by the victors," as one says, or are there ways of challenging dominant accounts of the past? This seminar will attempt to answer these questions through readings of works of philosophy, poetry, history, prose fiction, film, photography, and cultural criticism that reflect upon the nature of history. Though answers will be multiple, course reading and discussion will in general strive to determine the consequences of understanding history as a site in which reading and writing, experience and narration, and action and interpretation interpenetrate. Readings may include works by Burke, Hegel, Charlotte Smith, de Tocqueville, Marx & Engels, Woolf, and Benjamin.

Class Format: seminar
Requirements/Evaluation: three papers (two 6 and one 8-10 page) and weekly posts
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam
Enrollment Limit: 15

Distributional Requirements: Division 2
Other Attributes: ENGL Criticism Courses

ENGL 410(F) Black Literary and Cultural Theories
Crosslistings: AMST 410/COMP 410/ENGL 410/AFR 410
This course will examine the writings of black twentieth- and twenty-first-century Anglophone and Francophone literary and cultural theorists in the African diaspora. We will begin with Sojourner Truth and W.E.B. Du Bois and end with current debates between the "Afro-Pessimists" and "Afro-Optimists." We will be reading writers from the United States, Britain, Africa, the Caribbean, and Europe, moving through the writings of the Harlem Renaissance, Ngritude, Pan-Africanism, the Black Arts movement and Black Panthers, the Black Atlantic, and black feminism and queer studies. We will come to see that there is no easy separation between questions of politics (e.g., anti-colonialist, anti-racist, anti-capitalist) and those of aesthetics and poetics.

Class Format: seminar
Requirements/Evaluation: midterm, participation (attendance, discussions, GLOW posts), short paper (4-5 pp.), two response papers (2-3 pp. papers), final project (10-12 pp.: analytical paper)
Extra Info: may not be taken on a pass/fail basis
Prerequisites: none
Enrollment Preferences: AMST majors
Enrollment Limit: 15
Expected Class Size: 10
Distribution Notes: meets Division 2 requirement if registration is under AMST or AFR; meets Division 1 requirement if registration is under COMP or ENGL
Distributional Requirements: Division 2
Other Attributes: AMST Critical and Cultural Theory Electives

ENGL 445 World's End: Literary Ecologies of the Limit
Consciousness of the world's finitude in a time of environmental degradation and headlong global capitalism prompts restraint, a harboring of resources. But beyond the economic logic of conservation and expenditure, might imagining the world from the vantage point of its limit provoke a more profound rethinking of ourselves and the things of the world? Does it change what it means to possess, or even what an experience of the world is? Does it change human relationship? This course explores these questions in part by reaching back to the early modern period, when the boundedness of nations and worlds first came to view in a meaningful way. But the course will have a long arc, from Shakespeare to Godard. Primary works may include: Shakespeare, King Lear; Marvell, "Upon Appleton House"; Browne, Um Burial; Bentley, Sacred Theory of the Earth; Defoe, Robinson Crusoe; Verne, Journeys to the Center of the Earth; Godard, Weekend and Goodbye to Language; Tarkovsky, Solaris; Delillo, White Noise; Atwood, Oryx and Crake. Theoretical texts include: Nixon, Slow Violence; Agamben, The Time that Remains; Heidegger, Question Concerning Technology; Latour, An Inquiry into Modes of Existence; Nancy, After Fukushima, Derrida, "On an Apocalyptic Tone..." and Beast and the Sovereign.

Class Format: seminar
Requirements/Evaluation: one 5-page paper and one final 15-page paper
Prerequisites: none
Enrollment Preferences: English Majors using the course to fulfill a requirement
Enrollment Limit: 15
Expected Class Size: 15
Distributional Requirements:
Moby-Dick, Ellison invokes a sermon that appears briefly in the opening chapter of Herman Melville's story, "Benito Cereno." In the prologue to Invisible Man, Ellison invokes a sermon that appears briefly in the opening chapter of Moby-Dick. In his essays on comedy and American culture, Ellison comments trenchantly on Adventures of Huckleberry Finn. Melville and Mark Twain were, in many obvious ways, as different as two writers can be. Nonetheless, they also have many surprising similarities, and it is not difficult to understand why both are so important to Ellison. This course will examine the novels, stories, and essays of these three writers, with particular attention to the themes that they have in common and to the traits that make each of them distinctive. Race, slavery, epistemology, and the nature of American democracy are among those themes.

Class Format: Seminar
Requirements/Evaluation: Journal, final 15 page paper
Prerequisites: A 100-level ENGL course, or a score of 5 or 6 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

ENGL 569(S) Topics in Critical Theory: Marx and Marxism
This course is for students of any major who wish to continue studying critical, cultural, or literary theory. Students will give close attention to a single theorist or philosophical school or perhaps to a single question as taken up by several theorists. Prior coursework in critical theory or continental philosophy, no matter the department, is strongly recommended. The subject of this semester's seminar is Marxism and Marxism. Everybody knows that Marx was the great enemy of capitalism, but just saying that doesn't tell you much. So what is the second thing you want to say about Marx? Is there, for instance, anything distinctive about his reasons for not liking capitalism? Is everyone who opposes capitalism a Marxist? Is capitalism Marx's sole and exclusive concern? Or is there perhaps a Marxist method, maybe even a Marxist philosophy, that could be directed towards objects other than capitalist ones? We will spend the summer trying to grapple with the specificity of Marx's thought. What is unusual about how Marx thinks about capitalism? And could we think that way about other things, too?

Class Format: Seminar
Requirements/Evaluation: Regular attendance, informal weekly writing, 25-page seminar paper
Extra Info: May not be taken on a pass/fail basis
Prerequisites: None
Enrollment Limit: 15
Expected Class Size: 15
Distributional Requirements: Division I

ENGL 313(F) Description: A Craft Course for Writers of Poetry and Prose
Why do we describe things? Why do writers put so much care into their descriptions of objects and inner states? What kind of authority do they draw from precise descriptive language? What is an "exactly perceived" detail? How can a phrase carry sensory information? How do colors have speeds? This class explores the power of description in capturing physical perceptions and making pictures of the world more felt, more real. To better understand the range of expressive possibilities and technical strategies involved in description, we will devote the semester to reading and imitating the acute sensory visions of Li Po, Tu Fu, Basho, Issa, Hopkins, Rilke, Williams, Bishop, Elizabeth Bowen, Pascale Monnier, and various contemporary African writers. Each week the reading will serve as a springboard for imitations and other written exercises.

Class Format: Seminar
Requirements/Evaluation: Class participation, and a final portfolio comprised of weekly writing exercises
Extra Info: May not be taken on a pass/fail basis
Prerequisites: A 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam or permission of instructor

MATTHEW CHAO, Assistant Professor of Economics
MIA S. COOK, Associate Professor of Geosciences
DAVID P. DETHIER, Professor of Geosciences*
JOAN EDWARDS, Professor of Biology
LAURA EPHRAIM, Assistant Professor of Political Science
MICHAEL EVANS, Assistant Director of the Zilkha Center for Environmental Initiatives
JESSICA M. FISHER, Assistant Professor of English
ANTONIA FOIAS, Professor of Anthropology and Sociology
JENNIFER L. FRENCH, Professor of Spanish
SARAH S. GARDNER, Lecturer in Environmental Studies
MATTHEW GIBSON, Assistant Professor of Economics
LISA GILBERT, Associate Professor of Geosciences and Marine Sciences
GLENN GORDINIER, Academic Chair, Williams-Mystic Maritime Studies Program
CATHERINE HALL, Lecturer, Williams-Mystic Maritime Studies Program
JACQUELINE HIDALGO, Associate Professor of Latina/o Studies and Religion
NICOLAS HOWE, Assistant Professor of Environmental Studies
SARAH JACOBSON, Associate Professor of Economics
Studies.

Concentration in Environmental Studies and a Concentration in Maritime Environmental Studies. The new curriculum offers just one major, Environmental Policy, with three separate tracks in each, each with its own curriculum, ENVI offered two different majors, Environmental Science and restructuring of the Environmental Studies curriculum. Under the previous in Environmental Studies or Maritime Studies may do so under this category who feel that this creates problems for them may request an accommodation from the Chair or Associate Director of Environmental Studies. Starting with the Class of 2019, students who wish to pursue a major in either Environmental Studies or Maritime Studies that may do so under the new curriculum. Students in the Class of 2018 who declared a major in either Environmental Studies or Maritime Studies that may do so under the new curriculum. The new curriculum offers just one major, Environmental Studies (see below for a complete description), as well as a Concentration in Environmental Studies and a Concentration in Maritime Studies.

The Major: Students in the Class of 2017 who declared a major in either Environmental Science or Policy are “grandparented” to the earlier curriculum. Students in the Class of 2018 who declared a major in Environmental Studies in Spring 2016 will pursue their major under the new curriculum, though students in this category who feel that this creates problems for them may request an accommodation from the Chair or Associate Director of Environmental Studies. Starting with the Class of 2019, students who wish to pursue a major in either Environmental Studies or Maritime Studies that may do so under the new curriculum. The Concentrations: Students in the Class of 2017 who wish to pursue a Concentration in Environmental Studies or Maritime Studies or may do so under the requirements of the previous curriculum. Students in the Class of 2018 who declared a Concentration in Environmental Studies or Maritime Studies in Spring 2016 will pursue their major under the new curriculum, though students in this category who feel that this creates problems for them may request an accommodation from the Chair or Associate Director of Environmental Studies. Starting with the Class of 2019, students who wish to pursue a Concentration in Environmental Studies or Maritime Studies or may do so under the new curriculum. Because there are some students whose requirements will be those of the new curriculum and some whose requirements are set by the earlier curriculum, we provide the following descriptions below, CES is one of the focus of a varied set of activities in which students lead and participate, often with other members of the Williams community. CES offers extensive resources including databases, funding for student-organizations, and student initiated activities, work-study sites and a laboratory, and where passive-recreation opportunities may be found in all seasons. CES also operates the Environmental Analysis Laboratory in Morley Science Center. The Maritime Studies concentration builds on the three course offerings of the Williams-Mystic Maritime Studies Program at Mystic Seaport.

Overview of the Major and Concentrations for Classes of 2018 and Subsequent Classes

The Program in Environmental Studies offers three curricular options: students may pursue either a major in Environmental Studies or, alternatively, a concentration in Environmental Studies or Maritime Studies that complements a major in a different subject.

The Environmental Studies major is an eleven course major. The major has a “core” of six courses. All majors are required to take two of these courses: ENVI 101 and ENVI 102. ENVI 101, Nature and Society, is a broad introduction to the field, emphasizing the humanities and social sciences. ENVI 102, Environmental Science, introduces students to the interdisciplinary study of environmental systems through the synthesis of physical, chemical, biological, and geological perspectives. All majors are also required to take, in the senior year (or junior year under special circumstances), one 400-level Environmental Studies capstone research practicum that involves either collaborative research on a specific environmental problem or classroom team projects on issues of immediate environmental significance in the Berkshire region; we plan to offer students at least two such courses in each year between which to choose. The remaining component of the “core” is comprised of three courses, one each in each of the three concentrations, with each list representing the three main branches of the environmental curriculum (environmental humanities, environmental social science/policy, and environmental science). Students choose, in consultation with their major advisor, the course(s) from each of the three concentrations.

Building on this six-course foundation, each ENVI major devises a five-course cluster of electives that together comprise a disciplinary or thematic specialization sequence—for example, climate change policy, environmental justice, sustainable cities, environmental ethics, etc. Students are responsible for designing their own specialization cluster in consultation with a faculty advisor and the CES Advisory Board in the spring semester of their sophomore year. One of these five electives in the cluster must be among those listed by the Program as a research methods course.

The study of living systems is an integral component of environmental studies, and therefore all students majoring in environmental studies will need to complete at least one course designated by the Program as a “living systems” course (this may be within their specialization cluster or as one of their 200-level foundational courses).

The Environmental Studies concentration is a six course concentration in which students take an intermediate-level core courses while pursuing another major. In addition to the core of ENVI 101, ENVI 102 and one of the 400-level ENVI capstone practicum courses, students pursuing the concentration will take one elective each from each of three lists of courses, each representing a broad category of human-environmental, humanities, arts, and social sciences; and environmental policy.

The Maritime Studies concentration is a seven course concentration that builds on course work completed during the Williams-Mystic Maritime Studies Program and includes an intermediate-level core courses. Williams-Mystic, students pursuing the Maritime Studies concentration will also take the interdisciplinary introductory course GEOS 104 (Oceanography), an elective, and one of the 400-level ENVI capstone practicum courses. Students may petition the Williams-Mystic Maritime Studies concentration to have completed other study-away programs that emphasize marine studies or to have completed other study-away programs that emphasize marine studies and that the student wishes to substitute for ENVI 102.

Submitting your Proposed “Course Cluster” and “Plan of Study” to the Major

Students intending to major in environmental studies must meet with a prospective advisor chosen in consultation with the Environmental Studies Chair to develop their proposed five-course cluster and plan of study through the major. We encourage all students interested in the major to meet with a faculty member in Environmental Studies at least one week prior to spring Pre-registration to discuss their proposed cluster and plan of study. The proposals must be submitted to the program Chair on or before the final day of pre-registration in the spring of the sophomore year. Application materials and instructions are available from Environmental Studies faculty and on the CES website (ces.williams.edu). The proposals will be reviewed by the CES Advisory Board.

Credit for AP, IB, A-levels and other pre-Williams courses: At this time, students are not allowed to place out of ENVI 101. Students who have received an AP score of 5 in Environmental Science or a grade of 6 or higher in the IB Environmental Science course may submit a petition to the Chair or Associate Director of Environmental Studies requesting credit for ENVI 101 and ENVI 102. Students may petition the Williams-Mystic Maritime Studies concentration to have completed other study-away programs that emphasize marine studies, etc. for the course(s) that the student wishes to substitute for ENVI 102.

Substituting laboratory science courses taken at Williams for ENVI 102: Students who have taken two or more laboratory science courses at Williams in BIOL, CHEM, or GEOS may in some circumstances be excused from the requirement to take ENVI 102. Requests should be submitted to the Chair or Associate Director of Environmental Studies prior to the spring of the junior year.

Planning for prerequisites on your path through the Environmental Studies major: While ENVI 101 or ENVI 102 are recommended starting points for the major, and are prerequisites for many other ENVI course offerings, please note that some of the course options for the major may have prerequisite courses that are taken away from the Environmental Studies major. For example, ENVI/ECON 213 (Intro to Environmental and Natural Resource Economics) has a prerequisite of ECON 110 (Principles of Microeconomics). We strongly suggest that you do advance planning to avoid being blocked from taking a relevant course. For example, should you want to design a cluster that emphasizes environmental economics, ENVI/ECON 387 (Economics of Climate Change) has a prerequisite of...
ECON 251 (Price and Allocation Theory), which in turn has a pre-requisite of ECON 110. Conversely, should you design a cluster that emphasizes resource conservation, ENVI 312 (Communities and Ecosystems) has a prerequisite of ENVI/BIOI 203 (Ecology) or ENVI/BIOI 220 (Field Botany and Plant Natural History). Students interested in the program are encouraged to consult with members of the Environmental Studies Program and to contact the Environmental Studies Director or Associate Director.

Study Away: Many study away options are available to students in Environmental Studies, including the Williams-Mystic Maritime Studies Program. Furthermore, the Williams-Mystic Program is the foundation of the Maritime Studies concentration. Students considering either a semester or year away and who intend to major or concentrate in Environmental Studies should consult the Chair or Associate Director of Environmental Studies and the Dean in charge of study abroad as early as possible to discuss their options. Students are required to two courses for the major, and three for concentrations offered by CES. All incoming majors and concentrators will choose a faculty advisor in the spring of their sophomore year.

Advising: Majors and concentrators (or those interested in the major or concentrations offered by CES) are encouraged to talk at any time with the Chair or Associate Director of Environmental Studies, or any other members of CES or Maritime Studies for advice. All incoming majors and concentrators will choose a faculty advisor in the spring of their sophomore year.

Advisors for 2016-17: Ralph Bradburd, Sarah Gardner, Nicolas Howe, Pia Kohler, Mea Cook, Jennifer French, James Manigault-Bryant, Henry Art

HONORS IN ENVIRONMENTAL STUDIES (MAJOR OR CONCENTRATION)

Candidates for honors in Environmental Studies will complete a thesis in their senior year. A student earns honors by successfully completing a rigorous independent project under the supervision of a member of the CES faculty. The thesis may either be a one-semester plus winter study project, or a full year project (two semesters plus winter study). Students who are majoring in environmental studies, and who opt to complete a year-long thesis project, need only complete a four-course specialization cluster. Honors will be awarded on the basis of the academic merit and originality demonstrated by the student in the completed thesis.

Because most theses will require sustained field, laboratory or archival work that is difficult to combine with conventional coursework, students are strongly encouraged to spend the summer before senior year and/or their senior year Winter Study doing honors research. Funds to support student research are available from endowment funds of the CES, and an open competition is held each year to allocate summer funding resources. Some other departments also provide limited support for summer thesis research. Students and their faculty sponsors should plan the thesis with the expectation of such research in mind.

Juniors who wish to apply to pursue honors should submit a 5-page proposal to their intended advisor and the Chair of Environmental Studies by the end of the week following spring break. If a student wishes to work with a faculty member not affiliated with CES, the student must also identify a co-advisor from within the program. Environmental Studies concentrations may undertake an honors thesis and submit it to both their major department and Environmental Studies; petitions for a joint honors project should be submitted to the department chair and the Chair of Environmental Studies by the end of the junior year. Students will be notified by the end of the spring semester whether or not their proposal has been approved.

Students and their specializations should plan the thesis process itself (including deadlines and requirements for progress reports and for presenting the final project) and are available on the CES website.

HONORS IN MARITIME STUDIES

Candidates for honors in Maritime Studies will complete a thesis in their senior year. The project will involve original research (archive, museum, field, or laboratory) followed by on-campus analysis and write-up of results. The thesis may either be a one-semester plus winter study project, or a full year project (two semesters plus winter study). In either case, data collection during the summer before the senior year may be necessary. In some cases, the thesis project may be in the continuation and expansion of the student’s Williams-Mystic research project. Honors will be awarded if the thesis shows a high degree of scholarship, originality, and intellectual insight.

WINTER STUDY AND INDEPENDENT STUDY

In addition to courses fulfilling the environmental studies major and concentration requirements, the following courses are offered: ENVI 397, 398 Independent Study of Environmental Problems MAST 397, 398 Independent Study: Maritime Studies ENVI 493-W31-494 Honors Thesis and Senior Research MAST 493-494 Senior Thesis: Maritime Studies

Winter study courses play an important role in the program, offering opportunities to learn about aspects of environmental studies with which they would like to become more familiar. We encourage students to bear in mind the interests of the environment and maritime studies when reviewing each year’s Winter Study offerings.

THE MAJOR IN ENVIRONMENTAL STUDIES

The Environmental Studies major is an eleven course major, distributed according to the requirements detailed below.

Introductory required courses (2 courses):
ENVI 101 Nature and Society: An Introduction to Environmental Studies ENVI 102 Introduction to Environmental Science

200-level foundational courses required for all ENVI majors (3 courses, 1 from each category):

Culture/Humanities
ENVI 217 Environmental Humanities: Theory and Practice EnVI 244 Environmental Ethics
ENVI 209 Ecologies of Place

Social Science/Policy:
ENVI/ECON 213 Introduction to Environmental and Natural Resource Economics (ECON 110 prerequisite)
ENVI 270 Environmental Problems: Social Causes, Consequences and Policy Solutions

Environmental Science (with lab):
ENVI 203 Ecology
ENVI 205 Geomorphology
ENVI 215 Climate Changes

Specialization (5-course) Cluster (including a “methods course” and one “living systems” course)

In the spring of the sophomore year, at the same time that the major declaration is due, each student planning to major in Environmental Studies is required to submit a detailed proposal for a specialization cluster comprised of five elective courses built around a disciplinary or thematic focus. The proposed specialization must include one course identified as a “methods” course, that is, a course providing substantial training in a relevant method of inquiry (see list below for indicative list of courses that might fulfill that designation).

To help students get a better idea of what the “cluster” entails, we have provided examples of specialization clusters on the CES website, including on the following themes (not intended to be an exhaustive list): climate change policy, environmental economics, environmental justice, environmental intercultural studies, environmental geosciences, environmental planning and design, urban environmental studies, water and energy, sustainable food and agriculture, environmental justice.

The student’s specialization sequence will be developed under guidance of an adviser from the CES faculty, and formally approved by the CES Advisory Board, and will be examined in the broader context of the student’s proposed route through the major (including their choice of 200-level foundational courses and choice of research practicum). One of the courses in the student’s proposed route through the major must be from a designated list of “living systems” courses (below).

Courses taken abroad may be included in the specialization with the approval of the Chair or Associate Director. Additional courses from the 200-level group requirements (culture/humanities; social science/policy; and environmental science) or from among the research practicum courses may also be included in the specialization.

One “methods course” requirement:
ENVI 214 /GEOS 214 Geographic Information Systems
or STAT 211 Statistics and Data Analysis
or ENVI 230/COMP 238 Introduction to Ecocriticism: North-South Dialogues on Nature and Culture
or POEC 253 Empirical Methods in Political Economy or ECON 255 Econometrics
or STAT 346 Regression and Forecasting or CHEM 364/ENVI 364 Instrumental Methods of Analysis or MATH 410/Biol 214 Mathematical Ecology

This is not intended to be an exhaustive list. Students are expected to make the case for how their designated methods course complements their proposed specialization.

One “living systems course” requirement:
BIOL 203/ENVI 203 Ecology
BIOL 134/ENVI 134 The Tropics: Biology and Social Issues
BIOL 220/ENVI 220 Field Botany and Plant Natural History
BIOL 231/MAST 311 Marine Ecology
GEOS 210/MAST 211 Oceanic Processes
BIOL 302/ENVI 312 Communities and Ecosystems

The Environmental Studies program will consider requests from students to substitute another course that focuses on living systems for one of the courses listed above. These requests should be submitted to the Chair or to Sarah Gardner, Associate Director.

Senior Practicum (1 course chosen from the list below):

In the senior year—or, under special circumstances during the spring semester of the junior year—the student will take a 400-level practicum that serves as a capstone experience for the major and concentrations. The student can choose among three courses, each of which focuses on a different domain of environmental problem-solving. These courses are interdisciplinary, issue-based and project-driven. Offered every fall semester, the practicum Environmental Planning Workshop engages students in team-based work on community-based projects in the Berkshires involving urban
and rural land use planning and sustainable design. Offered every other spring in rotation with the Culture and Society Practicum, the Science and Policy Practicum engages students in broadly collaborative research on a policy-related theme at regional, national, and international scales. The Culture and Society Practicum engages students in broadly collaborative research on the cultural and social dimensions of a local, regional, or national environmental problem.

ENVI 302/411 Practicum: Environmental Planning Workshop or ENVI 412 Practicum: Environmental Science and Policy or ENVI 413 Practicum: Environmental Culture and Society

CONCENTRATION IN ENVIRONMENTAL STUDIES

The Environmental Studies concentration provides students with an opportunity to explore how humans interact with the environment, including physical, biological, political, and social elements. The concentration is designed so that students will understand the complexity of issues and perspectives that inhere in environmental problems and will appreciate that most environmental issues lack distinct disciplinary boundaries. The goal of the concentration is to educate students to be well-informed, environmentally literate citizens who have the capacity to become active participants in the local and global community. To this end, the concentration is designed to develop the capability to think in interdisciplinary ways and to use synthetic approaches to environmental problems while incorporating the knowledge and experiences gained from majoring in other departments at the College. The concentration in Environmental Studies consists of six courses: three core courses and one elective course from each of the three categories below: The Natural World, Humanities, Arts and Social Sciences; and Environmental Policy.

Required Courses (3 courses)

ENVI 101 Nature and Society: An Introduction to Environmental Studies
ENVI 102 Introduction to Environmental Science

One from among the offered Environmental Research Practicum courses:

ENVI 302/411 Practicum: Environmental Planning Workshop
ENVI 412 Practicum: Environmental Science and Policy
ENVI 413 Practicum: Environmental Culture and Society

Distribution Courses (3 courses, 1 from each group)

In order to earn the concentration a student must take one course from each of the following three groups. Courses may be counted both toward the concentration in Environmental Studies and toward a disciplinary major. (It is not possible to major in Environmental Studies while also concentrating in Environmental Studies).

Students may check with the Chair or Associate Director of Environmental Studies to see if other courses not listed here might count as electives, such arrangements must be approved in writing.

CONCENTRATION IN MARITIME STUDIES

The Maritime Studies concentration provides students with an opportunity to explore how humans interact with the environment, including the maritime environment. Understanding the oceans and our interactions with them is of increasing importance in this era of climate change, sea-level rise, fisheries crises, and the internationalization of the high seas. We encourage students to investigate our WaterWorld from the perspectives of the humanities, social sciences, and physical sciences. Maritime Studies is an interdisciplinary, cross-disciplinary program that includes the literature, history, policy issues, and science of the ocean. Candidates for the concentration in Maritime Studies must complete a minimum of seven courses: the interdisciplinary introductory course (Geos 104 Oceanography), four intermediate core courses (at Williams-Mystic, and the senior seminar).

Students who have completed other study-away programs that emphasize maritime studies should consult with the CES chair about the possibility of completing the Maritime Studies concentration

Required Courses (7 courses)

Introductory Course

Mast/Envi/Geos 104 Oceanography
Note: Students who take Mast 211/Geos 210 (Oceanographic Processes) at Williams-Mystic can substitute an extra elective in lieu of Geos 104

Capstone Course

One Practicum course:

Envi 302/Envi 311/Geos 311 Practicum: Environmental Planning Workshop or Envi/Mast 412 Practicum: Environmental Science and Policy or Envi/Mast 413 Practicum: Environmental Culture and Society

Core Courses (taken as part of Williams-Mystic program at Mystic Seaport):

Mast/Engl 231 Literature of the Sea
Mast 311/Biol 231 Marine Ecology OR Mast 211/Geos 210 Oceanographic Processes
Mast/Envi 351/Psci 319 Marine Policy
Mast/Hist 352 America and the Sea, 1600-Present
Elective Courses

Elective courses are listed based on either a clear maritime statement in the course description or broad practical/theoretical applicability to maritime studies. Concentrators will take a minimum of one course from the list below. If concentrators find other courses in the catalog that they believe meet the requirements for a MAST elective, they may bring them to the attention of the Chair or Associate Director.

Maritime History
HIST 127 The Expansion of Europe
HIST/AFR 248 The Caribbean: From Slavery to Independence
HIST/JAP/ASST 321 History of U.S.-Japan Relations
HIST/ASST/INST 391 When India was the World: Trade, Travel and History in the Indian Ocean

Marine Literature
CLAS 101/COMP 107 The Trojan War

Marine Policy
ECON/ENVI 213 Introduction to Environmental and Natural Resources
ECON 280 The Whale
ECON/ENVI 396 ECON 518 Environmental and Natural Resource Policy
ENVI 307/PSCI 317 Environmental Law
ENVI 340 Climate Change Law
PSCI 223 International Law
PSCI 229 Global Political Economy
ENVI/PSCI 328 Global Environmental Politics

Marine Science
Biol 124/BIOL 211 Paleobiology
GEOS 212/ENVI 215 Climate Changes
GEOS/ENVI/MAST 226 The Oceans and Climate
GEOS 302 Sedimentology
GEOS/ENVI/MAST 314 Sediment Records of Climate Change

For the Class of 2017 (or Class of 2018, with permission of the department), the requirements for the Environmental Policy Major, Environmental Science Major, and the Environmental Studies Concentration can be found here.

COURSES IN ENVIRONMENTAL STUDIES

ENVI 101(F) Nature and Society: An Introduction to Environmental Studies
This course introduces environmental studies as an interdisciplinary field of learning. It will provide a survey of a broad range of environmental problems, cases, and questions, from climate change to sustainable agriculture, from toxic waste to species extinction. We will also examine the intellectual traditions, authors, and historical developments that have most profoundly shaped our understanding of these issues. Keeping a constant eye on the complexities of life in the twenty-first century, we will explore the many different theories and methods that inform environmental scholarship, activism, and policy-making in a variety of cultural arenas and across geographical scales. Along the way, we will read works by philosophers, economists, journalists, historians, sociologists, and many others.
Class Format: lecture/discussion
Requirements/Evaluation: participation, in-class exercises, several writing assignments and a midterm and final exam
Extra Info: each student will attend only one of the two Friday class meetings (these will emphasize discussion); students will be assigned to one of the two Friday sessions after the start of the semester
Prerequisites: none
Enrollment Limit: 35
Expected Class Size: 35
Dept. Notes: required course for students wishing to complete the Environmental Studies concentration
Distributional Requirements: Division 2
Others Attributes: AMST Space and Place Electives
ENVI Core Courses
ENVI Core Courses
ENVS Core Courses
GBST Urbanizing World Electives
SCST Elective Courses

Fall 2016

LEC Section: 02 MR 01:10 PM 02:25 PM Instructor: Nicolas Howe

ENVI 102(S) Introduction to Environmental Science
Environmental science is the interdisciplinary study of the Earth's systems through the synthesis of physical, chemical, geological, and biological perspectives. This course introduces students to the scientific methods used to assess human impacts on the environment. This is important because with the human population expected to grow to more than nine billion people by 2050, we will continue to struggle to find ways to solve, or at least mitigate, the growing environmental consequences of our activities. In this course, we will take a problem-oriented approach to environmental science, focusing on five key questions: 1) Do we have sufficient material resources for the future world population? 2) How can we feed our growing population? 3) How can this population maintain a clean environment? 4) Do we have sufficient sustainable energy resources for a growing population? and 5) How will this growing population change our planet? Over the course of this semester, we will explore the science necessary to understand the underlying environmental systems involved and to develop effective scientific and policy solutions. We will also touch on how science can (and cannot) influence broader issues associated with complex environmental problems. Field and laboratory exercises will generate data that students will analyze, interpret and compare to historic data sets. Students will design and complete an independent project on an environmental science topic of their choice.
Class Format: two 75-minute lecture/discussion sessions, and one 3-hour field/laboratory session each week
Requirements/Evaluation: lab reports; class participation; reaction papers; quizzes/exam; independent project presentation and paper
Prerequisites: none; no seniors without permission of the instructors
Enrollment Preferences: first-year students
Enrollment Limit: 30
Expected Class Size: 30
Dept. Notes: required course for majors in Environmental Policy & Environmental Science
Distributional Requirements: Division 3
Other Attributes: ENVP Core Courses
ENVS Core Courses
EXPE Experiential Education Courses

ENVI 103(F) Global Warming and Natural Disasters
Crosslistings: GEOS 103/ENVI 103
The destruction caused by recent storms such as Irene and Sandy, devastation of prolonged drought in the African Sahel, catastrophic flooding and mudslides in SE Asia and sea level encroachment on the Alaska coast are all visible examples of natural disasters that may be modulated by climate change. Global climate change, together with environmental degradation and the explosive growth of urban areas, has the potential to increase the severity and impact of natural disasters. In this course we globally examine geological and climatological processes that "set up" natural disasters such as hurricanes, floods, landslides, droughts, extreme temperatures, and coastal surges, as well as the processes that condition availability of water resources. We study in detail the causes and anticipated consequences of human alteration of climatology and its impact on the spectrum of natural hazards and resources. During laboratory sessions we use local field sites and computer models to analyze recent disasters/hazards, trends in weather and climate and options for mitigating future impacts.
Class Format: lectures, 3 hours per week; laboratory, 2 hours per week
Requirements/Evaluation: evaluation based on written reports from laboratories, class participation, two half exams and a final exam
Prerequisites: none
Enrollment Preferences: first-year and sophomore students
Enrollment Limit: 40
Expected Class Size: 20
Distributional Requirements: Division 3
Other Attributes: ENVI Natural World Electives

ENVI 104(S) Oceanography
Crosslistings: GEOS 104/ENVI 104/MAST 104
The oceans cover about 72% of Earth's surface, yet we know the surface of Venus better than our own ocean floors. Why is that? This integrated introduction to the oceans covers formation and history of the ocean basins; the composition and origin of seawater; currents, tides, and waves; ocean-atmosphere interactions; oceans and climate; deep-marine environments; coastal processes; productivity in the oceans; and human impacts. Coastal oceanography will be investigated on an all-day field trip, hosted by the Williams-Mystic program in Connecticut.
Class Format: lecture/discussion, three hours per week; laboratory, two hours per week in alternate weeks/one all-day field trip
Requirements/Evaluation: evaluation will be based on two hour exams, lab work, participation in the field trip, and a final exam
Extra Info: may not be taken on a pass/fail basis
Prerequisites: none
Enrollment Preferences: first-year and sophomore students
Enrollment Limit: 48
Expected Class Size: 48
Distributional Requirements: Division 3

ENVI 105(F) The Co-Evolution of Earth and Life
Crosslistings: GEOS 101/ENVI 105

Our planet is about 4.6 billion years old and has supported life for at least the last 3.5 billion of those years. This course will consider the inter-related nature of Earth and the life that inhabits it, starting with the first living organisms and progressing to the interaction of our own species with the Earth today. Students will investigate the dynamic nature of the Earth-life system, examine many of its feedbacks, and learn about the dramatic changes that have occurred throughout the history of the Earth. We will ask questions such as: How did the Earth facilitate biologic evolution, and what effects did those biologic events have on the physical Earth? When did photosynthesis evolve, how can we detect that in the rock record, and how did this biological event lead to profound changes in the environment? How and why did animals evolve and what are the potential consequences for the human population and the history of animal life? How did the rise and radiation of land plants affect world climate? How do plate tectonics, glaciation, and volcanism influence biodiversity and evolutionary innovation? What caused mass extinctions in the past and what can that teach us about our current extinction crisis? Labs will involve hands-on analysis of rocks, fossils, and real-world data as well as conceptual and analytical exercises; field trips will contextualize major events in Earth history and will help students learn to read the rock record. Through these investigations, the class will provide a comprehensive overview of Earth history, with special attention paid to the geological and paleontological history of the northeastern United States.

Class Format: lecture; one laboratory per week plus one all-day field trip
Requirements/Evaluation: evaluation will be based on lab work, short quizzes, midterm and final exam
Prerequisites: none
Enrollment Preferences: underclassmen
Expected Class Size: 30
Distributional Requirements: Division 3
Other Attributes: ENVI Natural World Electives

ENVI 108(F) Energy Science and Technology (Q)
Crosslistings: PHY 108/ENVI 108

Energy use has skyrocketed in the United States and elsewhere in the world, causing significant economic and political shifts, as well as concerns for the environment. This course will address the physics and technology of energy generation, consumption, and conservation. It will cover a wide range of energy sources, including fossil fuels, hydropower, solar and wind energy, and nuclear energy. We will discuss energy use in transportation, manufacturing, building heating, and building lighting. Students will learn to analyze the efficiencies and environmental impacts of various energy sources and uses.

Class Format: lecture twice a week, except five Thursdays when the class will break into two conference sections
Requirements/Evaluation: evaluation will be based on weekly assignments, two-hour tests, and a final project; all of these will be substantially quantitative
Prerequisites: high school physics, high school chemistry, and mathematics at the level of MATH 130
Enrollment Limit: 40
Expected Class Size: 40
Distributional Requirements: Division 3
Quantitative/Formal Reasoning
Other Attributes: ENVI Natural World Electives

ENVI 110T(S) The Anthropocene: Nature and Culture in the Human Age (W)

In 2016, a group of scientists appointed by the International Commission on Stratigraphy, the body that keeps the official timescale of earth's history, will decide whether the planet has entered a new age known as the Anthropocene. Their questions are epochal: Has humanity become a geological force as powerful as those that have shaped the planet's deep past, such as ice sheets and asteroids? Have we truly entered "the human age," and if so, when did it begin and what does it all mean? This course will ask how researchers from different fields have sought to answer these questions. Just as important, it will ask how they became questions in the first place. Where did the idea of the Anthropocene come from? What are its social, political, and ethical implications? How have we arrived at this new understanding of our planet and ourselves? And what can this major intellectual shift—a shift that has already begun to send waves far beyond the academy into the worlds of art, literature, politics, and religion—tell us about the contemporary environmental sciences? Topics will include climate change, mass extinction, urbanization, and deforestation. Our focus throughout will remain on ways of knowing, imagining, and representing global environmental change in an era of ever-expanding human influence.

Class Format: tutorial
Requirements/Evaluation: each week each student will either write a 5- to 7-page essay on assigned readings or offer a 2-page critique of their partner's paper

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none
Enrollment Preferences: first years, sophomores and those with demonstrated interest in environmental studies
Enrollment Limit: 10
Expected Class Size: 10
Distributional Requirements: Division 2
Writing Intensive
Other Attributes: AMST Space and Place Electives

Spring 2017
TUT Section: T1 TBA Instructor: Nicolas Howe

ENVI 112(S) Observing Writing (W)
Crosslistings: GEOS 108/ENVI 112

There are many ways to write stories about the planet that we live on. Beautiful ideas can be expressed in fiction, in journalism, and in formal scientific writing. In this course we will investigate the earth by reading about it, by writing about it, and by analysing the writings of others. We will think about the ways in which fiction can be true, how journalism can be both clear and correct, and how scientific articles can be made accessible and interesting. All these things are in the hands of the writer. We will focus on both the act of writing (writing about observations) and analysis of the writings of others (observations about writing). We will write in and about the natural world, thinking about how to do so in ways that are evocative, interesting, and true. And we will read the writings of others, asking ourselves whether and how the writers have succeeded in being evocative, interesting, and true.

Class Format: seminar
Requirements/Evaluation: continuous assessment of drafts and rewrites, and class participation
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: a piece of writing should be submitted to instructor, describing the student's interests
Enrollment Preferences: first years, especially prospective Environmental Science majors
Enrollment Limit: 10
Expected Class Size: 10
Distributional Requirements: Division 3
Writing Intensive

ENVI 134 The Tropics: Biology and Social Issues (D)
Crosslistings: BIOL 134/ENVI 134

Intended for the non-scientist, this course explores the biological dimensions of social issues in tropical societies, and focuses on specifically on the people and cultures of tropical regions in Africa, Asia, Latin America, Oceania, and the Caribbean. Tropical issues have become prominent on a global scale, and many social issues in the tropics are inextricably bound to human ecology, evolution, and physiology. The course begins with a survey of the biodiversity and environmental aspects of humans, including major climatic and habitat features. The next section focuses on human population biology, and emphasizes demography and the role of disease particularly malaria and AIDS. The final part of the course covers the place of human societies in local and global ecosystems including the challenges of tropical food production, the importance of organic diversity, and the interaction of humans with their supporting ecological environment. This course fulfills the EDI requirement. Through lectures, debates and readings, students confront social issues in the tropics from the perspective of biologist. This course builds a framework for lifelong exploration of human diversity.

Class Format: lecture/debate, three hours per week
Requirements/Evaluation: evaluation will be based on two hour exams, a short paper, panel preparation, and a final exam

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none
Enrollment Preferences: seniors, juniors, sophomores, and first-year students—in that order

272
ENVI 203(F) Ecology (Q)  
Crosslistings: BIOL 203/ENVI 203  
This course combines lectures with field and indoor laboratory exercises to explore factors that determine the distribution and abundance of plants and animals in natural systems. The course begins with an overall view of global patterns and then builds from the population level to the ecosystem level. An emphasis is given to basic ecological principles and relates them to current environmental issues. Selected topics include population dynamics (competition, predation, mutualism); community interactions (succession, food chains and diversity) and ecosystem function (biogeochemical cycles, energy flow).  
Class Format: lecture/laboratory, six hours per week  
Requirements/Evaluation: evaluation will be based on problem sets, lab reports, hour exams, and a final exam  
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option  
Prerequisites: BIOL 101 and 102, or ENVI 101 or 102, or permission of instructor  
Enrollment Limit: none  
Expected Class Size: 35  
Dept. Notes: required for the majors in Environmental Policy & Environmental Sciences; Environmental Studies concentration; satisfies the distribution requirement in the Biology major

ENVI 205(F) Geomorphology  
Crosslistings: GEOS 201/ENVI 205  
This course is designed for Geosciences majors and for environmental studies students interested in surficial geologic processes and their importance in shaping the physical environment. Geomorphology is the study of landforms, the processes that shape them and the rates at which surface processes change the landscape. This class emphasizes the influence of climatic, tectonic, and volcanic forces on landform evolution over relatively short periods of geologic time, generally thousands to a few millions of years. At this time scale, the influence of human activity and climate change on landforms may be strong, perhaps dominant, in many geologic environments. Many of our examples analyze human interaction—planned or unplanned—with geomorphic processes. Labs focus on field measurements of channels and landscapes in the Willamette Valley area as well as on the analysis of topographic maps and stereo air photos.  
Class Format: lecture/discussion, three hours per week; laboratory, three hours per week/student projects; weekend field trip to the White Mountains  
Requirements/Evaluation: evaluation will be based on two hour exams, a project, lab work and class participation  
Prerequisites: any 100-level GEOS course or permission of instructor  
Enrollment Limit: 18  
Expected Class Size: 15

ENVI 206(F) Renewable Energy and the Sustainable Campus  
Crosslistings: GEOS 206/ENVI 206  
Rising oil and electricity costs disrupt the economy and help fuel global insecurity. Extraction of fossil fuels degrades the environment. Clearer understanding of how fossil-fuel consumption contributes to global climate change is increasing the demand for renewable sources of energy and for more sustainable campus environments. What sources of energy will supply Williams College and nearby areas in the twenty-first century? How will campus buildings, old and new, continue to be attractive spaces while making fair use of efficiency use of heat and light? How can the College's operations and purchasing become more sustainable? This course is a practical introduction to renewable sources of energy, including conservation, principles of sustainability, and to their application to the campus environment. Topics covered include: biological sources of energy (biomass, biogas, wind energy), geothermal and solar energy, energy efficiency and the environmental impacts of using renewable energy. Lectures, field trips and individual projects emphasize examples from the campus and nearby area.  
Class Format: seminar, three hours per week  
Requirements/Evaluation: evaluation will be based on an hour exam, class participation that includes a seminar presentation, and a research project that investigates some aspect of campus energy use and greenhouse-gas emissions  
Enrollment Preferences: sophomores  
Enrollment Limit: 20  
Expected Class Size: 20

ENVI 207 Earth Resources  
Crosslistings: GEOS 205/ENVI 207  
The metal in your soda can, the plastic in your Nalgene, the components of your computer, the glass in your window, the hydrocarbons being burned to keep you warm in the winter or to transport you in cars or aircraft, the cars and aircraft themselves: all are made of materials mined from the Earth. Right now there are more people building more houses, paving more roads, making more vehicles, more electronics, and more plastic packaging—all with geologic materials. As demand soars in both established and growing economies, and as we realize the environmental damage that can result from resource extraction and processing, the importance of understanding Earth's resources increases. Finding new deposits and managing those we have requires insight into the geology that underlies the location and origin of strategic Earth materials. This class introduces the geologic processes that control formation, distribution, and extent of materials reserves: dimension stone and gravel, base and precious metal ores, gemstones, petroleum, nuclear energy sources, and specialty materials for medical, technological, and military uses.  
Class Format: lecture  
Requirements/Evaluation: one hour exam, a final exam, lab exercises, and class participation  
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option  
Prerequisites: one 100-level GEOS course or permission of instructor  
Enrollment Preferences: sophomores and Geosciences majors  
Enrollment Limit: 18

ENVI 208 Science and Politics in Environmental Decision Making (D)  
This course explores the relationship between science and politics in environmental decision-making. How do legislators know when a species is endangered and warrants protection? What precautions should be applied in allowing genetically modified foods onto our plates? Can we, and should we, weigh the risks of malaria against the impacts of pesticides used to control those mosquitoes that transmit the disease? How has the global community come together to understand the risks from global climate change, and how has this understanding shaped our policy responses? What are some of the limits of science in shaping policy outcomes? In addressing these and other questions, we will pay particular attention to how power relations and existing institutions shape what knowledge, and whose knowledge, is taken on board in decision-making, be it at the local, national or global level. We will delve into these dynamics shape policy outcomes and we will examine novel approaches for incorporating the knowledge of traditionally disempowered groups, including indigenous and local communities.  
Class Format: lecture/discussion with some role-play exercises  
Requirements/Evaluation: several shorter writing assignments and a final project  
Prerequisites: none  
Enrollment Limit: 19  
Expected Class Size: 15  

273
ENVI 209 Ecologies of Place: Culture, Commodities and Everyday Life
Crosslistings: ENVI 209/ANTH 209/AMST 209
This course will explore the environmental implications of everyday life in modern America. It will ask how cultural, political, economic, and ecological systems interact to produce ordinary places and vernacular landscapes, from campuses to cul-de-sacs, farms to forests, nation-states to national parks. Combining approaches from cultural geography, environmental history, and political ecology, it will focus on the hidden lives of "things"—the commodities and technologies that form the basic building blocks of place: food, oil, water, wood, machines. With strong emphasis on local-global relations, it will look beneath the surface of the ordinary to reveal the complex networks of power, meaning, and matter that connect "here" to "there," "now" to "then," and "us" to "them." In so doing, it will pursue parallel goals: to understand the socio-spatial processes shaping today's global environment; and to explore the cultural systems through which those processes are understood and contested. Topics will include the bottled water controversy, factory farming and meatpacking, and the historical and material geography of gentrification, toxic waste sites, and Dixie Dumping in the South. After outlining some of the landmark texts in Environmental Justice, we will turn to cultural productions—like literature, film, and music—to understand how people of color respond to environmental injustice and imagine the natural world.
Class Format: lecture/discussion
Requirements/Evaluation: three 5- to 7-page essays and several shorter writing assignments
Prerequisites: none; open to first-year students
Enrollment Limit: 20
Expected Class Size: 20

ENVI 211(S) Race and the Environment (D)
Crosslistings: AFR 211/ENVI 211/SOC 211/AMST 211
In contemporary societies, race remains an enduring impediment to the achievement of equality. Generally understood as a socially meaningful way of classifying human bodies hierarchically, race manifests itself in a number of arenas, including personal experience, economic production and distribution, and political organization. In this course, we will explore how race emerges in local and global environmental issues, like pollution and climate change. We will begin with a review of some of the landmark texts in Environmental Studies that address "environmental racism," like Robert Bullard's Dumping in Dixie and David Pelto's Garbage Wars. We will examine how and to what extent polluting facilities like landfills, oil refineries, and sewage treatment plants are disproportionately located in communities of color; we will also pay attention to how specific corporations create the underlying rationale for polluting industrial sites. After outlining some of the core issues raised in this scholarly tradition, we will turn to cultural productions—like literature, film, and music—to understand how people of color respond to environmental injustice and imagine the natural world.
Class Format: lecture/discussion
Requirements/Evaluation: evaluation will be based on class participation, 2-3 short papers (5-7 pages), and a self-scheduled final exam
Prerequisites: none
Enrollment Limit: 20
Distributional Requirements: Division 2 Exploring Diversity

ENVI 213(S) Introduction to Environmental and Natural Resource Economics (Q)
Crosslistings: ECON 213/ENVI 213
We'll use economics to learn why we harm the environment and overuse natural resources, and what we can do about it. We'll talk about whether and how we can put a dollar value on nature and ecosystem services. We'll study cost-benefit analysis, pollution in general, climate change, natural resources (like fisheries, forests, and fossil fuels), and energy. We will take an economic approach to global sustainability, and study the relationship between the environment and economic growth and trade.
Class Format: lecture
Requirements/Evaluation: problem sets, short essays, paper(s); exam(s) are possible
Prerequisites: ECON 110
Enrollment Preferences: sophomores if course is overenrolled
Enrollment Limit: 40

ENVI 214(S) Remote Sensing and Geographic Information Systems
Crosslistings: GEOS 214/ENVI 214
This class provides a practical look at fast-evolving methods used to integrate information about the Earth's surface with spatial data collected by disciplines such as archaeology, economics, the field sciences, history and political science. Remote sensing involves the collection and processing of data from satellite and airborne sensors to yield environmental information about the Earth's surface and lower atmosphere. Remote sensing allows regional mapping of rock materials, analysis of vegetation cover and measurement of urban areas and land-use change over time. A Geographic Information System (GIS) links satellite-based environmental measurements with spatial data such as topography, transportation networks, and political boundaries, allowing display and quantitative analysis at the same scale using the same geographic reference. This course covers concepts of remote-data capture and geographic rectification using a Global Positioning System (GPS), as well as principles of remote sensing, including linear and non-linear image enhancements, convolution filtering, and image classification. Principles of GIS include display and classification, spatial buffers, logical overlays and techniques of spatial analysis. Weekly labs focus on training in the application of techniques using data from the region and other areas of North America.
Class Format: lecture, three hours per week; laboratory, three hours per week
Requirements/Evaluation: based on weekly lab exercises, two take-home exams and a final project
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: at least one introductory course in BIOL, ENVI, or GEOS

Spring 2017

ENVI 215(S) Climate Changes (Q)
Crosslistings: GEOS 215/ENVI 215
In recent years, there has been a growing public and scientific interest in the Earth's climate and its variability. This interest reflects both concern over future climate changes resulting from anthropogenic increases in atmospheric greenhouse gases and an increasing recognition of the economic impact of "natural" climate variability (for example, El Niño events), especially in the developing world. Efforts to understand the Earth's climate system and predict future climate changes require both study of parameters controlling present day climate and detailed studies of climate changes in the past. In this course, we will review the processes that control the Earth's climate, like insolation, the greenhouse effect, ocean circulation, configuration of continents, and positive and negative feedbacks. At the same time, we will review the geological record of climate changes in the past, examining their causes.
Laboratory exercises and problem sets will emphasize developing problem solving skills and using quantitative analyses to assess if a given explanation is possible and reasonable. These exercises will include developing and applying numerical models of the radiative balance of earth and the carbon cycle.

**Class Format:** lecture, three hours per week; one three-hour lab per week

**Requirements/Evaluation:** evaluation will be based on lab exercises and problem sets (25%), three hour exams (50%), and a final project (25%) where students will collect, analyze, and interpret data

**Prerequisites:** 100-level course in GEOS, CHEM, or PHYS or permission of instructor

**Enrollment Preferences:** Geosciences majors

**Enrollment Limit:** 20

**Expected Class Size:** 20

**ENVI 221(F) Introduction to Urban Studies: Shaping and Living the City**

**Crosslistings:** LAT 220/AMST 221/ENVI 221

- Generally, cities have been described either as vibrant commercial and cultural centers or as violent and decaying urban slums. In an effort to begin to think more critically about cities, this course introduces important topics in the interdisciplinary field of Urban Studies. Specifically, we will discuss concepts and theories used to examine the peoples and places that make up our cities, including the roles of race, ethnicity, class, and gender in understanding and interpreting
urban communities. Texts include works by anthropologists, historians, sociologists, cultural critics, cultural geographers, and literary writers.

Class Format: lecture/discussion

Requirements/Evaluation: evaluation will be based on attendance and class participation, several short writing assignments (1-2 pages), two creative project groups and presentations, a midterm essay (5-7 pages) and final essay (8-10 pages)

Extra Info: may not be taken on a pass/fail basis, not available for the fifth course option

Prerequisites: none

Enrollment Preferences: first and second year students as well as American Studies majors and Latin/Italian Studies concentrators

Enrollment Limit: 20

ENVI 227 Utopias and Americas
Crosslistings: REL 227/LATS 227/AMST 227/ENVI 227
Where does the term "new world" come from? What do we mean by "utopia," "utopian," and "utopianism?" What relationships exist between the people who imagine utopias and the lands they inhabit? This course considers the relationship between utopian imaginations and the imaginations of the lands and peoples in the Western hemisphere. We will spend some time studying utopian theory, ancient proto-utopias, and utopias in Latin America, though our main focus will be on particular examples of utopianism in the U.S.A. We will attend to particular instances of utopian social dreaming that re-imagine time, space, environment, gender, family, education, and power. While the U.S.A. is the main focus of the class, students are encouraged to pursue and bring to class utopian perspectives from other parts of the Americas. Students are also strongly encouraged to take questions from class and engage utopian images not listed on this syllabus but pertinent to our classroom learning.

Class Format: seminar
Requirements/Evaluation: evaluation will be based on class participation, short weekly writing assignments, a 5-page midterm paper, and a 10- to 15-page final research paper examining an American utopia
Prerequisites: none
Enrollment Limit: 19
Expected Class Size: 12

ENVI 228(S) Water as a Scarce Resource (W)
Crosslistings: ECON 228/ENVI 228
For a variety of reasons including environmental pollution, urbanization, changing agricultural techniques, resource mismanagement, and the consequences of climate change, water is becoming a scarce resource even in places where it was relatively plentiful in the past, and it is likely to become an increasingly scarce resource over the coming decades. In this course we will use basic economic models to consider policy issues relating to water: Is access to water a basic human right, and if so, what market and non-market mechanisms should play a role in water allocation? Does public ownership of water improve the way it is provided and used? Why do societies differ in their approaches to allocating water and are some systems better than others? What does it mean to have a property right to water? Could private property rights to water help address the water pollution problem? How can societies change their water-related property rights, regulations and social institutions when individuals have implicit or explicit rights to the institutional status quo? Who has the right to water that crosses international boundaries? How should societies allocate water across generations?
Class Format: tutorial/discussion, meeting with the instructor in pairs for an hour each week; a 5- to 7-page paper every other week (5 in all), prepare and present a written critique of their partner's papers in alternate weeks, and revise and rewrite one of their five papers
Requirements/Evaluation: evaluation will be based on the quality of the papers and on the quality of the student's oral presentations and commentary on the work of his/her colleagues
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: ECON 110 or equivalent
Enrollment Preferences: first-year students and sophomores intending to major in Economics and/or to major or concentrate in Environmental Policy or Environmental Science or Environmental Studies, and to students who are already major or concentrators in those subjects
Enrollment Limit: 10

ENVI 233 The Industrial Animal
This class is inspired by a January 2015 New York Times exposé written by the food journalist Michael Moss. "At a remote research center on the Nebraska plains," he wrote, "scientists are using surgery and breeding techniques to re-engineer the farm animal to fit the needs of the 21st-century meat industry. The potential benefits are huge: animals that produce more offspring, yield more meat and cost less to raise. There are, however, some complications." There are always complications. In this class, we examine the historical development of the industrial animal. Exploring the physical, scientific, and political infrastructures that support American industrial meat production, we pay critical attention to the biological complications that have animal consumption social life fit to the needs of the modern factory. We examine the methods—from synthetic vitamins and artificial light to antibiotics and artificial insemination—industrial producers use to overcome the obstacles of biology. Finally, we consider the industrialization of the meat animal in the context of the intensification of feedstuffs crops like corn and soy, changing US consumption patterns, local and national food policies, and the human labor that makes it all possible.

ENVI 234(F) Economics of Developing Countries
Crosslistings: ECON 234/ENVI 234
The leaders of poor countries almost universally proclaim "economic development" to be their eventual destination, but it is not easy to visualize the journey. Is rapid economic growth sufficient to generate development, or do governments need to pro-actively invest in health and education? When does globalization facilitate development? Is it true that corruption is major obstacle? Has the climate crisis upended our traditional models to the point where we need to rethink the notion of development? The class will introduce this set of issues, as analyzed by economists.
Class Format: lecture
Requirements/Evaluation: short essays, mid-term examination, 15-page final paper
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: one ECON class at Williams or prior course deemed equivalent by the Economics Department

ENVI 235(S) Survival and Resistance: Environmental Political Theory (W)
Crosslistings: PS CI 235/ENVI 235
Contemporary struggles to reverse environmental destruction and establish sustainable communities have prompted some political theorists to rethink longstanding assumptions about politics and its relationship to nature. Does the environment have "rights", What, if anything, is the difference between an ecosystem and a political community? Is democracy dangerous to the planet's health? Are environmental protections compatible with political freedom? How is the domination or conquest of nature connected with domination and conquest within human societies? What does justice demand in an age of climate change? In this class, we will consider the promise and limits of political theory to illuminate present day environmental crises and foster movements to overcome them. We will engage classic texts that helped to establish political theory's traditional view of nature as a resource, as well as contemporary texts that offer alternative, ecological understandings of nature and its entwines with politics. Class will be driven primarily by discussion. Students will have significant responsibility for setting the agenda for discussions through informal writing submitted prior to class. As a writing intensive course, attention to the writing process and developing an authorial voice will be a recurrent focus of our work inside and outside the classroom.
Class Format: seminar
ENV 236 Demigods: Nature, Social Theory, and Visual Imagination in Art and Literature, Ancient to Modern

Crosslistings: ARTH 236/ENVI 236

This course traces the obscure history of demigods (satyrs, centaurs, nymphs, Pan, etc.) from its origins in ancient Greek art and poetry until today. We pay special attention to three points: the relationship between the mythology of demigods and ancient visual representations; the relationship between the mythology and evolving conceptions of the environment, and the capacity of the visual arts to generate and transmit mythology that has a limited literary counterpart.

Individual demigods occasionally interact with gods or heroes, and end up in the pages of a book. But animal-human hybrids are usually envisioned en masse and exist primarily in visual art, where they thrive to this day. The interpretation of demigods has changed over time, keeping up with developments in ethics and evolving hierarchies of genre and taste. Demigods have been subordinated to the status of decoration, or banished altogether. In antiquity, they are hardly ornamental. Embodied in satyrs, nymphs, Pan, and the others is a collective vision of an alternate evolutionary trajectory and cultural history. In this parallel world, humans and animals not only talk to each other, they live similar lives, intermarry, and create new species. The distinction between nature and culture is not meaningful. Male and female are more or less equal. The industrial revolution never happens. How much of the ancient or notional framework influencing the representation of demigods survives along with the visual imagery? We will examine the origins and mythology of the demigods in works of ancient art, including sculpture and painted vases, such as the François vase and the Parthenon, and ancient texts, such as Hesiod's Theogony and Ovid's Metamorphoses. We will contextualize the representations within ancient intellectual history via texts ranging in genre from Old Comedy and political theory to theology, religious history, philosophy, and ethics (e.g., Aristophanes, Demokritos, and Lucretius). We will investigate the survival of the ancient myth of evolutionary alterity. This will include consideration of the imagery of fifteenth- and sixteenth-century Italian painters such as Piero di Cosimo, Dosso Dossi, and Titian, the revaluation of nature by the Romantics, Nietzsche's Birth of Tragedy and twentieth-century artists such as Picasso. We will also explore the function of demigods in modern literature from C. S. Lewis and J. K. Rowling.

Students who have some knowledge of the history of art (e.g., ARTH 101-102) will be well prepared to take this course. But it is designed to be comprehensible and meaningful to students with no background in art history. The requirements of the course include: attendance, preparing and answering questions for discussion; one midterm, one final exam, and one final paper.

Prerequisites: none

LEC Instructor: Guy Hedren

ENV 239 Introduction to Ecocriticism: North-South Dialogues on Nature and Culture (D)

Crosslistings: ENVI 239/COMP 238

This course will introduce students to the study of the relationship between literature and the environment, often referred to as 'ecocriticism,' through careful examination of Jean de Lely's 1577 History of a Voyage to the Land of Brazil and related texts. Lely's fascinating account of a yearlong stay among the 'cannibals' of Brazil gets at many of the themes and debates taken up by ecocritics today: How do political, economic and philosophical factors influence individual and collective conceptions of 'nature' and its value? How do acts of reading and writing inform (or deform) our understanding of the 'natural world'? What is the role of aesthetics in environmental politics, and how can unspoken assumptions about race, gender, and cultural difference influence representations of global environmental issues like deforestation and global warming? ENVI 239/Comp 238 fulfills the goals of the Exploring Diversity Initiative by contextualizing current questions of international environmental policy within the long history of colonialism, challenging students to think about cultural diversity as well as economic inequality as relevant to contemporary debates about the value and distribution of natural resources. In addition to Lely's History, we will also read landmarks of ecocritical theory by scholars including Lawrence Buell, William Cronon, Candace Slater and Jorge Marcone, as well as more recent literary interventions into environmental issues in the Americas.

Class Format: lecture/discussion

Requirements/Evaluation: three 5- to 7-page essays and several shorter writing assignments

Prerequisites: none

Enrollment Preferences: majors in Environmental Policy, Environmental Science and Comparative Literature majors, Environmental Studies concentrators; other students interested are welcome

Enrollment Limit: 20

ENV 244(T) Environmental Ethics (W)

Crosslistings: ENVI 244/PHIL 244

What ethical standards should guide our individual and societal choices when those choices affect current and future environmental conditions? This course will introduce students to fundamental concepts, methods, and issues in environmental ethics. Initial tutorial meetings will focus on theoretical materials that will background discussions and will include classic readings from the environmental ethics literature (e.g., Leopold, Taylor, Rolston).

Subsequent sessions will pair readings about key concepts with specific cases that raise complex ethical issues, including the concept of moral standing, the question of non-human individuals, species, and complex living systems; the concept of moral responsibility and complicity in environmentally damaging practices; the legitimacy of cost-benefit analysis as an environmental policy tool; and the valuation of human lives.

Class Format: tutorial

Requirements/Evaluation: one 5- to 7-page essay every other week (6 in all) and carefully prepared oral responses to partners' essays in alternate weeks; evaluation will be based on essays, oral critiques, and quality of discussion

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

ENVI 239 Introduction to Ecocriticism: North-South Dialogues on Nature and Culture (D)

Crosslistings: REL 247/LATS 247/AMST 247/ENVI 247

From the "Land of Enchantment" of New Mexico in the far reaches of the desert to the sacred temples on the West Coast that overlook Pacific Ocean, this course examines the peoples and the "sacroscrapes" of the American West. Historian Patricia Limerick regards this region as an extraordinary site of cultural complexity where Penitentes maintained a sacred establishment while generally overlooking the Pueblo Revolt in modern-day New Mexico which occurred in that same century and marked the temporary suspension of Spanish encroachment. How do scholars of religion and history account for these renditions between the past and present? Most mainstream religious histories treat religious experience and identity in the U.S. West as additive rather than complementary to or constitutive of its mainstream
narratives. Contemporary historians of religion note the need for new “sights,” “cites,” and “sites” in order to deconstruct and reconstruct this incomplete meta-narrative, taking into account such factors as migration, gender, region, and the environment. In this EDI course we will use tools of critical theory and historism to examine this region, compare religious cultures, and interrogate ways in which religious practices (de)construct notions of race.

Class Format: lecture/discussion

Requirements/Evaluation: student participation, weekly reflection papers (up to half page), midterm primary source paper (up to 5 pages), and a final research paper on Religion and the Environment (8-10 page paper with a media/visual component)

ENV 258(S) Coastal Processes and Geomorphology

Crosslistings: GEOS 258/ENVI 258/MAST 258

Can people live in harmony with the coastal environment? Is it possible to "produce" animal flesh? To "invent" an organism? To patent life? It has been just 40 years since a contributor to the journal Hog Farm Management infamously declared that farmers should "forget the pig is an animal," and "treat him just like a machine in a factory." In that time, challenging questions over the legal and ethical status of farmed and laboratory animals have only grown more urgent and complex, as courts in the U.S. multiply the rights of firms to alter and patent living organisms, and accelerating biotechnologies expand the ways in which capital and biology intersect. This course examines the culture and politics of industrial animal husbandry and the production of animal biocapital. We will explore the legal structures that enable (and occasionally limit) the ownership of life, and we will seek alternative views on the human-animal relationships that remain (for now) at the center of the factory farm. Contemporary and historical accounts of the industrial hog and broiler chicken industries will serve as primary case studies, along with recent developments in industrial aquaculture and military bioengineering.

Class Format: seminar
Requirements/Evaluation: several shorter writing assignments and a final project

ENV 273 Politics without Humans? Crosslistings: PSCI 273/ENVI 273

Are human beings the only beings who belong in politics? And is political involvement a unique or defining aspect of what it means to be human? Such questions are increasingly complex as the boundaries of "the human" become blurred by the rise of artificial intelligence, robotics, and brain implants: shifting attitudes towards both animal and human bodies; and the automation of economic and military decisions (buy! sell! attack! retreat!) that used to be the prerogative of human actors. How do visions of politics without humans and humans without politics impact our thinking about longstanding questions of
freedom, power, and right? Can and should the link between humans and politics survive in an age in which "posthuman" or "transhuman" entities become central characters in the drama of politics? This class will consider these questions through readings, films and artifacts that bring political theory into conversation with science fiction, popular literature on the so-called "singularity" (the merger of humans with computers), science and technology studies, evolutionary anthropology, "new materialist" philosophy, and feminist theory.

Class Format: lecture/seminar
Requirements/Evaluation: class participation, three 6- to 8-page papers
Extra Info: please note that this is an introductory-level course with no prerequisites. First year students and those with no background in political theory are welcome, as are more experienced students

ENVI 283 Dirty Politics: Regulating Hazardous Chemicals and Wastes Crosslistings: ENVI 283/PSCI 283

Since consumers were first introduced to the promise of "better living through chemistry," society has had to wrestle with the impacts, often far removed in place and time, resulting from a rapid proliferation of hazardous chemicals and wastes. Policy responses, be they at the local, national or global scale, are often limited to reactionary efforts to counter releases into the environment, are constrained by the web of use of the technologies in question, and further bring to the fore key challenges of environmental justice and risk management. How then are we to regulate DDT without adversely affecting our fight against mosquito-borne malaria? How might we preserve the ozone layer while still maintaining the benefits of food preservation through refrigeration? How can we reap the benefits of the electronic age without condoning the steady flow of electronic waste affecting workers' health and environments in developing countries? Emphasis will be placed on understanding the politics that bring about, and allow us to address, these problems. We will be examining in particular novel policy responses, including Europe's precautionary safe use law, citizen science initiatives and consumer-driven certification schemes.

ENVI 287 The Dynamics of Globalization: Society, Religion and the Environment (D)
Crosslistings: REL 287/ENVI 287

This course offers a theoretical reflection on the social, cultural and environmental dynamics of globalization and their consequences for the nature and place of religion. Rather than argue for or against globalization, we first examine the nature of this new configuration and its relation to postmodernity, asking questions such as: What are the cultural and social dynamics of globalization? What are the effects on the nature of the state and the political practices that take place in the global world? What are its environmental consequences? We then shift to examining the role of religion, arguing that its renewed relevance is a function of the socio-cultural transformations that globalization brings about, particularly the loss of community and the increasing atomization of individuals. We conclude by examining some of the perspectives created by the new religious expressions that attempt to respond to this situation, from personal spiritual quests as manifested in interest in Buddhism, ecology or mountain climbing, to various forms of fundamentalism, such as Evangelicalism, the fastest growing religious movement in the Americas, and the most radical forms of Islamism. Reading list: Harvey, The Condition of Postmodernity; Bauman, Globalization; Kivisto, Multiculturalism in a Global Society; Casanova, Public Religions in the Modern World; Orttner, Life and Death on Mt. Everest; Matthews, Global Cultural Individual Identity; Shuck, Mark of the Beast; Roy, Globalized Islam.

ENVI 291 Religion and the American Environmental Imagination (W)
Crosslistings: ENVI 291/REL 291/SOC 291

This course examines the relationship between religious and environmental thought in modern America. Exploring a broad range of practices and beliefs, we will examine the religious (and anti-religious) roots of contemporary environmental discourse. Drawing widely on both religious studies and the environmental humanities, we will examine the works of famous environmental thinkers such as Henry David Thoreau and Wendell Berry, as well as a number of lesser-known writers from non-Christian backgrounds. We will read these writers alongside recent scholarship on religion and ecology to understand how they were influenced by social and environmental trends such as urbanization, industrialization, immigration, and globalization. We will also ask how religion has intersected with gender, race, class, and ethnicity to shape environmental politics in the twenty-first century, with particular emphasis on agrarianism, wilderness preservation, and climate justice.

Class Format: seminar
Requirements/Evaluation: a 15- to 18-page research paper and several shorter writing assignments

ENVI 302(F) Practicum: Environmental Planning Workshop Crosslistings: ENVI 302/AMST 302/ENVI 411

This interdisciplinary, experiential workshop course introduces students to the field of planning through community-based projects. Environmental Planning encompasses many fields pertaining to the natural and built landscape such as city planning, sustainable design, natural resource planning, landscape design, agricultural planning, climate planning, transportation planning, and community development. Students working in conjunction with a client in the region and under supervision of the course instructor will gain direct experience working on the planning process in the Berkshire region. The course is organized into two parts. Part 1 focuses on reading and discussion of the planning literature: history, theory, policy, ethics, and legal framework. Part 2 focuses on project work in which students apply concepts learned to tackle an actual community problem. Small teams of students, working in conjunction with a client in the region and under supervision of the
instructor, conduct a planning project using all the tools of a planner, including research, interviews, survey research, mapping, and site design. The project work draws on students' academic training and extracurricular activities, and applies creative, design thinking techniques to solve thorny problems. The midterm assignment is a creative landscape/site design project. The lab sections include field trips, GIS mapping labs, project-related workshop sessions, public meetings, and team project work. The course includes several class presentations and students will gain skills in public speaking, preparing presentations, interviewing, survey research, hands-on design, and team work. The class culminates in a public presentation of each team's planning study.

Class Format: seminar discussion/group workshop/project lab

Requirements/Evaluation: short written exercises, class discussion, class presentations, final group report

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option.

Prerequisites: ENVI 101 or permission of instructor; open to juniors and seniors only

Enrollment Preferences: Environmental Studies majors, Environmental Policy majors, Environmental Science majors and Environmental Studies concentrators

Enrollment Limit: 16

Expected Class Size: 16

Dept Notes: required course for students wishing to complete the majors in Environmental Studies, Environmental Policy, Environmental Science and the Environmental Studies concentration

Distribution Notes: does not meet division 1, 2, or 3 requirements

Distribution Requirements: Non-divisonal

ENVI 303(F,S) Cultures of Climate Change (W)

Crosslistings: ENVI 303/SOC 303

This course asks why people think and talk about climate change in such very different ways. Climate change is a physical phenomenon that can be observed, quantified, and measured. But it is also an idea, and as such it is subject to the vagaries of cultural interpretation. Despite scientific agreement about its existence and its causes, many people do not see climate change as a serious problem, or as a problem at all. Many others see it as the most serious problem our species has ever faced. What are the sources of this disparity? Why can't we agree about climate change? How does something as complex and confusing as climate change become a "problem" in the first place? This course will explore a broad array of factors, from religion to race, class to colonialism. It will focus especially closely on the communication of scientific knowledge, risk perception, and environmental ethics, and it will apply a range of theories from the social sciences and humanities to a set of concrete case studies.

Class Format: seminar

Requirements/Evaluation: a 15- to 18-page research paper and several shorter writing assignments

Prerequisites: ENVI 101 or permission of instructor

Enrollment Preferences: Environmental Policy & Environmental Science majors and Environmental Studies concentrators first; Anthropology and Sociology majors second

ENVI 306 A History of an African City

Crosslistings: HIST 307/AFR 313/ENVI 306

The city of Nairobi was founded solely to serve the needs of white colonials and settlers. Fifty years later—in the 1960s—it had become dominated by Africans and is now, in the 21st Century, a major global city with over 4 million people. This course will trace the history of Nairobi from the 19th century to the present. We will focus on the city's political and economic development, its racial conflicts, as well as the daily experience of various groups of city dwellers. We will also look at the growth of the city's physical infrastructure—its transportation, housing, trade, and labor networks. Students will also get a chance to read about the various artistic movements in Nairobi, focusing especially on music, theater, and street performances.

Class Format: lecture

Requirements/Evaluation: two 7-page papers and one 12- to 15-page paper

Prerequisites: none

Enrollment Preferences: seniors; History majors

ENVI 307(F) Environmental Law

Crosslistings: ENVI 307/PSCI 317

We rely on environmental laws to make human communities healthier and protect the natural world, while allowing for sustainable economic growth. Yet, despite 40 years of increasingly varied and complex legislation, balancing human needs and environmental quality has never been harder than it is today.

Environmental Studies 307 analyzes the transformation of environmental law from fringe enterprise to fundamental feature of modern political, economic and social life. ENVI 307 also addresses the role of community activism in environmental law, from local battles over proposed industrial facilities to national campaigns for improved corporate citizenship. By the completion of the semester, students will understand both the successes and failures of modern environmental law and how these laws are being reinvented, through innovations like pollution credit trading and “green product” certification, to confront globalization, climate change and other emerging threats.

Class Format: seminar

Requirements/Evaluation: based on several short writing assignments, a term research project, and active participation in class.

Extra Info: may not be taken on a pass/fail basis

ENVI 311 History of the Chemical Revolution in US Agriculture

Where do fertilizers, pesticides, and other agricultural chemicals come from? How are they made and why are they used? Why does the United States use among all branches of agriculture following WWII, paying particular attention to the relationships between seed technology, chemical warfare, mechanization, labor, government institutions, and petroleum-based organic chemicals. We conclude by turning our historical understanding of US agricultural development toward the current state of US agriculture and examine the rationales and policies that support the ongoing consumption of industrial chemicals across the entire US agricultural complex.

ENVI 318(F) California: Myths, Peoples, Places (W)
Crosslistings: LATS 318/AMST 318/REL 318/COMP 328/ENVI 318
Crosslisting Between Paradise and Hell, between environmental disaster and agricultural wonderland, between Reagan and Berkeley, between a land of all nations and a land of multiracial enmity, a diversity of myths have been inscribed onto and pursued within the space we call California. How did certain narratives of California come to be, who has imagined California in certain ways, and why? What is the relationship between certain myths, the peoples who have imagined them, and the other peoples who have shared California dreams? In this course, we will examine some of the myths that surround California by looking at a few specific moments of interaction between the peoples who have come to make California home and the specific places in which they have interacted with each other. Of special interest will be imaginations of the Spanish missions, the Gold Rush, agricultural California, wilderness California, California as “sprawling multicultural dystopia,” and California as “west of the west.”

Class Format: seminar
Requirements/Evaluation: this course will be mostly discussion oriented, with grading based upon participation, short writing exercises, one 3-page review essay with mandatory revision, one 5- to 8-page midterm review essay, and a final 10- to 15-page comparative review essay
Prerequisites: none
Enrollment Preferences: none
Enrollment Limit: 19
Expected Class Size: 15

ENVI 322(F) Trash
Crosslistings: ANTH 322/ENVI 322/GBST 322
What is waste? What is filth? Why do titles or categories of sanitation workers—“garbage man,” for instance—bear such charged social and sometimes moral significance in many societies? In this seminar we will critically examine the production of waste and its role in the production of value, meaning, hierarchy, and the environment. Readings will be of three types. First we will consider theoretical inquiries into the relations between filth and culture. Second, we will examine studies of the political and environmental field experiments of systems of waste management historically and in the present, with a focus on the Middle East, South Asia and the United States. Third, we will read ethnographies of sanitation labor and social hierarchy with the same regional focus - work on Cairo, Dhaka, and New York, respectively. There is also a fieldwork component to this class. In groups, students will conduct ethnographic micro-studies of elements of the systems of waste production and management in Berkshire County (e.g., cafeterias, retail outlets, homes, dorms, recycling facilities, sewage treatment plants). Students will post field notes to a class blog, and each group will present its findings in the form of a short film, multimedia presentation, or paper.
Class Format: lecture/discussion
Requirements/Evaluation: regular posting of critical response papers and an ethnographic final project
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none
Enrollment Preferences: seniors and juniors
Enrollment Limit: 30

ENVI 328 Global Environmental Politics (W)
Crosslistings: ENVI 328/FSCI 328
In the last two weeks of our Fall 2015 semester, world leaders will gather in Paris with the aim of finalizing an arduously negotiated global agreement on climate change. This new treaty will determine whether we, as a global
community, can still be on track to avoid catastrophic climate change. In the first ten weeks of this writing-intensive course, we will turn to a broad array of case studies to examine how, by whom, and to what effect global environmental governance is shaped and implemented. Case studies will build on original documents, scholarship from a variety of disciplines, and class visits by practitioners and negotiators and will include chemicals management, atmospheric pollution, species protection, transboundary movement of genetically modified organisms, forest management, and environmental rights. By building on the last four decades of international efforts to regulate the environmental commons, we will develop research projects to complete as we engage in a “virtual field-trip” to the Paris Climate Summit in the last two weeks of the semester.

Class Format: seminar

Requirements/Evaluation: participation, several shorter writing assignments, and a research paper to be completed in stages over the course of the semester.

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option.

Prerequisites: ENVI 101 or permission of instructor

Enrollment Preferences: Environmental Policy majors, Environmental Science majors, Environmental Studies concentrators and Political Science majors

ENVI 341(S) Toxicology and Cancer
Crosslistings: CHEM 341/ENVI 341

What is a poison and what makes it poisonous? Paracelcus commented in 1537: "What is not a poison? All things are poisons (and nothing is without poison)." The dose alone keeps a thing from being a poison. Is the picture really this bleak; is modern technology-based society truly swimming in a sea of toxic materials? How are the nature and severity of toxicity established, measured and expressed? Do all toxic materials exert their effect in the same manner, or can materials be poisonous in a variety of different ways? Are the safety levels set by regulatory agencies low enough for a range of common toxic materials, such as mercury, lead, and certain pesticides? How are poisons metabolized and how do they lead to the development of cancer? What is cancer and what does it take to cause it? What biochemical defense mechanisms exist to counteract the effects of poisons? This course attempts to answer these questions by surveying the fundamentals of modern chemical toxicology and the induction and progression of cancer. Topics will range from description and quantitation of the toxic response, including risk assessment, to the basic mechanisms underlying toxicity, mutagenesis, carcinogenesis, and DNA repair.

Class Format: lecture, three times per week

Requirements/Evaluation: evaluation is based on two hour tests, a class presentation and paper, participation in discussion sessions, a self-exploration of the current toxicological literature, and a final exam

Extra Info: may not be taken on a pass/fail basis

Prerequisites: CHEM 156; may be taken concurrently with CHEM 251/255; a basic understanding of organic chemistry

Enrollment Limit: 30

ENVI 346(F) Environmental Psychology
Crosslistings: PSYC 346/ENVI 346

This is a course in social psychology as it pertains to the natural environment. We will consider how the environment influences aspects of human psychology (e.g., the psychological implications of humans’ disconnect with nature), as well as how human psychology influences the environment (e.g., why some people engage in environmentally destructive behaviors despite holding proenvironmental attitudes). At the core of this course is an attempt to examine various ways in which research and theory in social psychology can contribute insights to understanding (and encouraging) environmentally responsible behavior and sustainable practices, both here at Williams and globally. Because human choice and behavior play such an important role in environmental problems, a consideration of human psychology may therefore be an important part of the solution.

Class Format: seminar

Requirements/Evaluation: a series of papers, two essay exams, written and oral reports of research

Prerequisites: PSYC 242 recommended, PSYC 201, or a comparable course in statistics and research methodology, is also recommended.

Enrollment Preferences: Psychology majors and Environmental Studies concentrators

Spring 2017

LEC Section: 01 TBA Instructor: Catherine Hall

ENVI 364(S) Instrumental Methods of Analysis
Crosslistings: CHEM 364/ENVI 364
This course provides the student an understanding of the applicability of current laboratory instrumentation both to the elucidation of fundamental chemical phenomena and to the measurement of certain atomic and molecular parameters. Student will gain knowledge and understanding of the theory and practical use of a variety of instrumental techniques; including, but not limited to, chromatography, mass spectrometry, thermal methods, electroanalytical techniques, atomic and molecular absorption and emission spectroscopy, X-ray diffraction, and optical and electron microscopies, with examples drawn from the current literature. Analytical chemical and instrumental techniques will be developed in the lecture and extensively applied in the laboratory. These skills are useful in a wide variety of scientific areas. Through exploration of primary literature and review articles we will discuss recent developments in instrumental methods and advances in the approaches used to address modern analytical questions.

Class Format: lecture, three hours per week; laboratory, four hours per week
Requirements/Evaluation: evaluation is based on class participation, problem sets, oral presentation and discussion of selected topics, laboratory work, and an independent project
Extra Info: may not be taken on a pass/fail basis
Prerequisites: CHEM 155 or 256 and 251/255; may be taken concurrently with CHEM 256 with permission of instructor

ENVI 368(F) Technology and Modern Society
Crosslistings: SOC 368/ENVI 368
With widespread use of new social media, controversial developments in such bio-technical practices as the cloning of mammals, rapid advances in various forms of telecommunication, and the increasing sophistication of technological weaponry in the military, the triumph of technology remains a defining feature of modern life. For the most part, modern humans remain unflinchingly confident in the possibilities technology holds for continuing to improve the human condition. Indisputably, technology has benefited human life in innumerable ways. However, as with other features of modernity, technology has also had significant, albeit largely unanticipated, social consequences. Working within a sociological paradigm, this course will focus on the less often examined latent functions of technology in modern society. It will consider, for example, the social effects of technology on community life, on privacy, and on how people learn, think, understand the world, communicate, and organize themselves. The course will also examine the effects of technology on medicine, education, criminal law, and agriculture and will consider such counter-cultural reactions to technology as the Ludlittte movement in early nineteenth century England. Amish agrarian practices, and the CSA (community supported agriculture) movement.

ENVI 386 Environmental and Natural Resource Policy (Q)
Crosslistings: ECON 386/ENVI 386/ECON 518
Economic activity often damages the environment significantly, especially in developing countries. Firms may clear-cut valuable forests, while consumers may drive high-pollution vehicles with little thought for the environmental consequences. Economists have proposed a variety of policy remedies, from pollution taxes to tradable permit schemes and restrictions on the quantity of pollution. This course first examines the relative merits of these policies from a theoretical perspective. When pollution damage is uncertain, is it better to use a pollution tax or a quantity restriction? Is it worse to set a pollution tax too high than to set it too low? It then proceeds to the practical issues that attend policy implementation, particularly where state capacity is limited. What is the best policy when inspectors can be threatened or bribed? When resource extraction is hard to monitor? Case studies will likely include policies aimed at deforestation, mineral ownership and extraction, particulate air pollution from industry and transportation, and carbon emissions from electricity generation. In evaluating policies we will think about both efficiency and the distribution of costs and benefits. (What if environmental regulation only benefits the wealthiest people in a country?) We will also examine the environmental consequences of policies aimed at other problems, like poverty and low education.
Class Format: seminar

ENVI 387(S) Economics of Climate Change (Q)
Crosslistings: ECON 387/ECON 522/ENVI 387
This course introduces the economic view of climate change, including both theory and empirical evidence. Given the substantial changes implied by the current stock of greenhouse gases (GHGs) in the atmosphere, we will begin by looking at impacts on agriculture, health, income, and migration in both wealthy and poor countries. Next we will study adaptation, including capital investments and behavioral changes, and insurance. We will examine the sources of climate change, especially electricity generation and transportation, and the abatement opportunities. What is the socially optimal amount of climate change? (Probably not zero.) Why have countries had such a hard time agreeing on GHG emissions reductions, and how might we overcome such difficulties? In considering policy, we will employ not only theoretical predictions, but also the growing body of evidence from attempts to regulate GHGs. Examples include China’s pilot cap-and-trade programs, the EU ETS, and the US Clean Power Plan. We will pay particular attention to the political economy of regulation and ways in which policy results have departed from theoretical predictions. Finally, we will discuss the limits of the economic approach to climate change, pointing out questions on which economic theory provides little guidance.
Class Format: lecture
Requirements/Evaluation: weekly problem sets, one or two midterms, final exam
Prerequisites: ECON 251, familiarity with statistics

ENVI 388 Urbanization and Development
Crosslistings: ECON 388/ENVI 388
At current rates of growth, the combined population of urban areas in developing countries will double in the next 30 years. The land area devoted to urban use is expected to double even more quickly. The costs of providing housing and infrastructure to accommodate this growth are enormous, but the costs of failing to accommodate urban development may be even larger. The decisions made in response to these challenges will affect the economic performance of these countries and the health and welfare of the urban residents. By affecting global patterns of energy use, these decisions will have broader impacts on the entire planet. This course will focus on these challenges. What are the economic forces that drive the process of urbanization, and how does the level of urbanization affect economic development? How do urbanization, economic development, and government fiscal and development affected by urbanization? What policy choices are available, and which are most likely to succeed in dealing with the challenges of urban growth?
Class Format: lecture/discussion
Requirements/Evaluation: a midterm and a final exam, plus a paper that evaluates specific problems, policy alternatives, and provides some analysis of relevant data
Prerequisites: ECON 251 plus POEC 253, ECON 255, 502 or 503; undergraduate enrollment limited and requires instructor's permission

ENVI 402(S) Senior Seminar: Perspectives on Environmental Studies
Crosslistings: ENVI 402/MAST 402
The Environmental Studies and Maritime Studies programs provide students with an opportunity to explore the myriad ways in which humans interact with diverse environments at scales ranging from local to global. As the capstone course for Environmental Studies and Maritime Studies, this seminar will bring together students who will have specialized in the humanities, social studies and/or the sciences and will provide an opportunity for exchange across these disciplinary streams. Readings and discussion will be organized around the common theme of climate change. Over the course of the seminar, students will develop a sustained independent research project on a topic of their choice.
Class Format: seminar
Requirements/Evaluation: evaluation is based on active participation, discussion leading, several smaller assignments and capstone project
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: ENVI 302 or MAST 351 Maritime Policy or permission of instructor
Enrollment Preferences: limited to Senior Environmental Policy and Environmental Science majors and Environmental Studies and Maritime Studies concentrators
Enrollment Limit: 20
Expected Class Size: 19
Dept. Notes: required course for students wishing to complete the Environmental Policy & Environmental Science majors and the Environmental Studies or the Maritime Studies concentrations
Distribution Notes: no division 1, 2 or 3 credit
Distributional Requirements: Non-divisional
Other Attributes: ENVI Core Courses
ENVP Core Courses
ENVS Core Courses

SEM Section: 01  MR 01:10 PM 02:25 PM  Instructor: Pia Kohler
ENVI 405 Geochemistry: Understanding Earth's Environment
Crosslistings: GEOS 405/ENVI 405
Rocks, water, air, life: what comprises these interconnected components of the Earth system? How do they interact today, and how did these interactions differ in the past? In this course we will study how chemical elements are distributed in the Earth, cycle through the Earth system, and act together to produce a planet that is habitable. Earth and the life they harbor, have evolved through time, they have left an imprint in the geological record that we can read using geochemical tools such as molecular fossils, elemental ratios, and stable and radioactive isotopes. Topics include the synthesis of elements in stars, the formation and differentiation of planet Earth; radiometric dating; the major constituents of the atmosphere, rain, rocks, rivers and the ocean; how they're linked by chemical weathering and biological activity, and reconstruction of past environments. Students will examine the Earth system through lecture; reading and discussing articles from the scientific literature; and collecting, analyzing and interpreting data from environmental samples.
Class Format: seminar/lab
Requirements/Evaluation: evaluation will be based on seminar discussions, papers, labs and final project
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: two 200-level GEOS courses and at least one of GEOS 302, 303 or 311; or permission of instructor
Enrollment Preferences: senior Geosciences majors
Enrollment Limit: 10
Expected Class Size: 10
Distributional Requirements: Division 3
Other Attributes: ENVI Natural World Electives
ENVS Group EB-B Electives
ENVS Group EG-C Electives
Not Offered Academic Year 2017
SEM Instructor: Mea Cook
ENVI 411(F) Practicum: Environmental Planning Workshop
Crosslistings: ENVI 411/AMST 302/ENVI 411
This interdisciplinary, experiential workshop course introduces students to the field of planning through community-based projects. Environmental Planning encompasses many fields pertaining to the natural and built landscape such as city planning, sustainable design, natural resource planning, landscape design, agricultural planning, climate planning, transportation planning, and community development. Students will get out of the classroom and gain direct experience working on the planning process in the Berkshire region. The class is organized into two parts. Part 1 focuses on reading and discussion of the planning literature: history, theory, policy, ethics, and legal framework. Part 2 focuses on project work in which students apply concepts learned to tackle an actual community problem. Small teams of students, working in conjunction with a client in the region and under supervision of the instructor, conduct a planning project using all the tools of a planner, including research, interviews, survey research, mapping, and site design. The project work draws on students' academic Year 1 seminar discussions, and applies creative, design thinking techniques to solve thorny problems. The midterm assignment is a creative landscape/site design project.
The lab sections include field trips, GIS mapping labs, project-related workshop sessions, public meetings, and team project work. The course includes several class presentations and students will gain skills in public speaking, preparing presentations, interviewing, survey research, hands-on...
ENVI 412 Practicum: Environmental Science and Policy
This interdisciplinary seminar will examine the science and policy of global climate change. Over the course of the seminar, students will examine the production of global knowledge about climate change as well as examine the variety of policy responses being deployed at the global scale. Students will undertake sustained projects in small teams over the course of the semester.

Class Format: seminar discussion/project lab
Prerequisites: ENVI 101 and ENVI 102
Enrollment Preferences: seniors majoring or concentrating in environmental studies, juniors majoring/concentrating in environmental studies may be admitted with instructor permission
Enrollment Limit: 16
Expected Class Size: 16
Distributional Requirements: Non-divisional

ENVI 419 Going to Ground: Considering Earth in the Arts of Africa (D) (W)
Crosslistings: ARTH 419/AFR 419/ENVI 419
Drawing its inspiration from the landmark exhibition Earth Matters: Land as Material and Metaphor: Art of the African Earth (National Museum of African Art, 2013), this seminar explores how earth has been conceptualized and integrated into African artistic thought as material, metaphor, geography, environment, and intervention, and how this interpretive flexibility has allowed it to become a symbol of power and presence in African art-making from prehistory to the present. The seminar will also focus on how the ways in which earth has been used in contemporary art towards addressing the growing problems of pollution, unsustainable development, and the widespread depletion of earth-based natural resources in Africa. Over the course of this seminar, students will develop a knowledge base of earth-related issues that have been addressed in African artistic production, and engage with various cross-disciplinary methodologies to critically analyze the conceptual and aesthetic approaches taken in these works. Students will also have the opportunity to interact with specialists from diverse disciplines and fields towards fleshing out their knowledge base. This course fulfills EDI requirements through its exploration of the effects of globalization and modernization in the African natural environment, and its engagement with diverse cultural legacies, socio-political systems, and economic realities on the continent as contributors to art-making strategies deployed by contemporary African environmental artists. Students will also explore the ways in which African artists have internalized the various conditions and situations of their contexts as individuals defined by gender, sexual orientation, religious affiliation, etc. as well as members of distinctive cultures and communities.

Class Format: seminar
Requirements/Evaluation: 2-page reading response papers, 2-page paper proposal, draft and final paper (15 pages) with presentation
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: some coursework in ARTH and/or AFR would be useful
Enrollment Preferences: seniors and majors
Enrollment Limit: 19
Expected Class Size: 19
Distribution Notes: meets Division 1 requirement if registration is under ARTH or ENVI; meets Division 2 requirement if registration is under AFR
Distributional Requirements: Division 1
Exploring Diversity
Writing Intensive
Other Attributes: ARTH post-1600 Courses
GBST African Studies Electives

Not Offered Academic Year 2017
SEM Instructor: Michelle Apotsos

ENVI 420(F) Architecture and Sustainability in a Global World (W)
Crosslistings: ARTH 420/ENVI 420/GBST 420/EXPR 420
What does it mean to create a sustainable built environment? What do such environments look like? Do they look the same for different people across different times and spaces? This course takes these questions as starting points in exploring the concept of architectural sustainability, defined as “minimizing the negative impact of built form on the surrounding landscape,” and how this concept can be interpreted not only from an environmental point of view, but from cultural, political, and social perspectives as well. Over the course of the class, students will explore different conceptualizations of sustainability and how these conceptualizations take form in built environments in response to the cultural identities, political agendas, social norms, gender roles, and religious values circulating in society at any given moment. In recognizing the relationship between the way things are constructed (technique of assembly, technology, materials, process) and the deeper meanings behind the structural languages deployed, students will come to understand sustainability as a fundamentally context-specific ideal, and its manifestation within the architectural environment as a mode of producing dialogues about the anticipated futures of both cultural and architectural worlds.

Class Format: seminar
Requirements/Evaluation: response papers on class readings (2 pages), leading class discussions, and final project/paper (15-20 pages) and presentation
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none, although a course in art/architectural history would be advantageous
Enrollment Preferences: Art History majors, Environmental Studies majors
Enrollment Limit: 19
Expected Class Size: 19
Materials/Lab Fee: $100
Distribution Notes: meets Division 1 requirement if registration is under ARTH or ENVI or EXPR; meets Division 2 requirement if registration is under GBST
Distributional Requirements: Division 1
Writing Intensive

ENVI 421(F) Ecology of Sustainable Agriculture
Crosslistings: BIOL 422/ENVI 422
A seminar/field course investigating patterns, processes, and concepts of sustainability in human-dominated, food production ecosystems. As a capstone course, the course will draw upon the experiences that students have had in biology and environmental studies courses. Topics will include: the relationships among diversity, ecosystem function, sustainability, resilience, and stability of food production, distribution systems, nutrient pools and processing in human dominated ecosystems. Two extensive field trips will be taken to agricultural operations in the region. Each student will present a seminar on a topic requiring extensive reading of primary resources and is responsible for leading the discussion that ensues. Reading question paper assignments will be due prior to the seminar. Criticism paper assignments will be made at approximately bi-weekly intervals and due two days after the seminar to which they relate.

Class Format: seminar; two 75 minute sessions per week
Requirements/Evaluation: evaluation will be based on writing assignments, seminar participation, and course participation
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: BIOL/ENVI 203 or BIOL 302 or permission of instructor
Enrollment Preferences: open to juniors and seniors
Enrollment Limit: 19
Expected Class Size: 12
Dept. Notes: Satisfies the distribution requirement in Biology; the ENVS biology track; the Natural World distributional requirement of the Environmental Studies program
Distributional Requirements: Division 3

Not Offered Academic Year 2017
SEM Instructor: Henry Art

ENVI 424(T) Conservation Biology (W)
Crosslistings: BIOL 424/ENVI 424

Fall 2016
SEM Section: 01 MWF 08:30 AM 09:45 AM Instructor: Henry Art

ENVI 425 Conservation Biology (W)
This tutorial examines the application of population genetics, population ecology, community ecology, and systematic to the conservation of biological diversity. While the focus of this tutorial is on biological rather than social, legal, or political issues underlying conservation decisions, the context is to develop science-based recommendations that can inform policy. Topics include extinction, the genetics of small populations, habitat fragmentation, the impact of invasive species, restoration ecology, design of reserves and conservation strategies.

Class Format: tutorial/field trip, one to three hours per week. Requirements: evaluation will be based on 5 writing assignments, tutorial presentation, performance in the role of paper critic, and course participation.

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option.

Prerequisites: none

Enrollment Preferences: History majors and students with previous coursework in History.

Class Format: independent study

Extra Info: this is part of a full-year thesis (493-494)

Prerequisites: approval by the Chair of Environmental Studies.

Distributional Requirements: Non-divisional.

TUT Instructor: Joan Edwards

Not Offered Academic Year 2017

ENVI 478(F) Cold War Landscapes

Crosslistings: HIST 478/ENVI 478/AMST 478

The Cold War between the United States and the Soviet Union set in motion dramatic changes to the natural and built environments of many nations between 1945 and 1991. Nuclear test and missile launch sites, naval installations, military production operations, and border securitizations are just a few of the most obvious ways in which the stand-off between the two countries altered rural and urban landscapes around the world. But one can also see the Cold War as setting in motion less immediately direct but nonetheless profound changes to the way that many people saw and planned for the environments around them, as evidenced, for instance, by the rise of the American suburb, the reconstruction of postwar Europe, and agricultural and industrial initiatives in many developing nations. We will begin this seminar by exploring several distinct "Cold War landscapes" in the United States, then move on to examining others in Europe and the Soviet Union. We will spend the final weeks of the semester discussing examples from other parts of the world. Our approach to our topics will be interdisciplinary throughout the semester, and students are welcome to write their research papers on any geographical area of the world.

Class Format: seminar

Requirements/Evaluation: evaluation will be based on class participation, weekly critical writing, and a final 20- to 25-page research paper

Prerequisites: none

Enrollment Preferences: History, Environmental Policy, and Environmental Science majors if over-enrolled

Enrollment Limit: 10

Expected Class Size: 15

Distributional Requirements: Division 2

ENVI 491T The Suburbs (W)

Crosslistings: HIST 491/ENVI 491/AMST 490

The suburbs transformed the United States. At the broadest level, they profoundly altered spatial residential geography (especially in terms of race), consumer expectations and behavior, governmental policies, cultural norms, and assumptions, social connections, and Americans’ relationship to nature. More specifically, the different waves of post-World War II suburban development have both reflected large-scale shifts in how power and money have operated in the American political economy; and set in motion deep-seated changes in electoral politics, in Americans’ understandings of how their income should be used, and in how the built landscape should be re-imagined. This tutorial will explore the rich historical literature that has emerged over the last twenty years to provide students with a history of the suburbs, to see the suburbs as more than just collections of houses that drew individual homeowners who wanted to leave urban areas. We will focus most of our attention on the period from 1945 through the 1980s. Some of the questions we will consider will include: how did the first wave of suburban development bring together postwar racial and Cold War ideologies? Is it possible, as one historian has argued, that suburbs actually created the environmental movement of the 1960s? And how have historians understood the role that suburbs played in America’s conservative political turn, leading to the election of Ronald Reagan?

Class Format: tutorial

Requirements/Evaluation: typical tutorial format; every other week, students will write and present orally a 5- to 7-page essay on the assigned readings; on alternate weeks, students will write a 2-page critique

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option.

Prerequisites: none

Enrollment Preferences: first-year and sophomore students

COURSES IN MARITIME STUDIES

MAST 104(S) Oceanography

Crosslistings: GEOS 104/ENVI 104/MAST 104

The oceans cover about 72% of Earth’s surface, yet we know the surface of Venus better than our own ocean floors. Why is that? This integrated introduction to the oceans covers formation and history of the ocean basins; the composition and origin of seawater; currents, tides, and waves; ocean-atmosphere interactions; oceans and climate; deep-marine environments; coastal processes; productivity in the oceans, and human impacts. Coastal oceanography will be investigated on an all-day field trip, hosted by the Williams-Mystic program in Connecticut.

Class Format: lecture/discussion, three hours per week; laboratory, two hours per week in alternate weeks/one all-day field trip

Requirements/Evaluation: evaluation will be based on two hour exams, lab work, participation in the field trip, and a final exam

Extra Info: may not be taken on a pass/fail basis

Prerequisites: none

Enrollment Preferences: first-year and sophomore students
**MAST 211(F,S) Oceanographic Processes**

**Crosslistings:** MAST 211/GEOS 210

This course examines ocean and coastal environmental science issues including carbon dioxide and the ocean's role in climate, El Niño and other ocean-atmosphere oscillations that influence our weather, coastal erosion and other hazards, coastal pollution, and fisheries. The focus is on controlling processes with regional comparisons. Blue water oceanography is conducted in the Atlantic and comparative coastal oceanography includes trips to southern New England shores, and the West and Gulf coasts of the US as part of the Williams-Mystic program.

**Class Format:** lecture/laboratory, including coastal and near-shore field trips, 11 days offshore, and a laboratory or field research project

**Requirements/Evaluation:** two tests, a research project, and a presentation

**Extra Info:** offered only at Mystic Seaport

**Distributional Requirements:** Division 3

**MAST 226T The Oceans and Climate (W)**

**Crosslistings:** GEOS 226/ENVI 226/MAST 226

The oceans are a fundamental part of Earth’s climate system. Ocean currents redistribute heat and carbon vapor around the globe, controlling temperature and precipitation patterns. Marine phytoplankton blooms and air-sea gas exchange modulate the atmospheric carbon dioxide concentration. The dynamic interaction of the atmosphere and the sea surface results in multi-year climate variations such as the El Niño-Southern Oscillation. This course will examine gradual and abrupt climate shifts from Earth’s history and the ocean’s role in driving, amplifying or dampening the changes, the ocean’s response to anthropogenic greenhouse gas emissions, and the projected impacts of continued emissions and climate change on the ocean in the coming decades and millennia. We will analyze articles from the scientific literature that lay out the theory on the ocean’s influence on climate, reconstruct past climate and ocean changes, test the mechanisms responsible for these changes, and write knowledge, project the consequences of continued anthropogenic greenhouse gas emissions. Topics may include the climate effects of opening and closing seaways with plate tectonics, ocean feedbacks that amplify climate change, the instability of ocean climate effects of opening and closing seaways with plate tectonics, ocean feedbacks that amplify climate change, and near-shore field trips and ten days at sea.

**Requirements/Evaluation:** regular papers, class participation, journal-writing, and a final paper

**Extra Info:** offered only at Mystic Seaport

**Distributional Requirements:** Division 1

**Writing Intensive**

**Other Attributes:** AMST Arts in Context Electives, ENVI Humanities, Arts + Social Science Electives, ENVP SC-B Group Electives

LEC Section: 01 TBA Instructor: Mary Bercaw Edwards

**MAST 258(S) Coastal Processes and Geomorphology**

**Crosslistings:** GEOS 258/ENVI 258/MAST 258

Can people live safely along the coast? Recent events like Superstorm Sandy and the Tohoku Tsunami have shown us how the ocean can rise up suddenly and wreak havoc on our lives and coastal infrastructure. Only educated geoscientists can evaluate the risks and define informed strategies to prevent future coastal catastrophes. Currently almost half the global population lives within 100 km of the coast, with a large percent of those living in densely populated cities (e.g., New York, New Orleans, Los Angeles, Shanghai, Hong Kong, Cape Town, Sydney, Mumbai). Despite the growing risks and challenges associated with climate change and rising sea levels, the coastal population continues to grow rapidly. Helping these growing populations to live safely along the coast requires a detailed understanding of the processes that shape the coastal zone. These processes act across a variety of scales, from deep-time geologic processes that dictate coastal shape and structure, to decadal-scale processes that determine shoreline position and evolution, to weekly and daily processes such as storms and tides. This course will provide an in-depth look at the forces-wind, waves, storms, and people-that shape the coastal zone, as well as the geologic formations-sandy beaches, rocky cliffs, barrier islands, deltas, and coral reefs-that are acted upon and resist these forces. Coastal dynamics are strongly affected by human interventions, such as seawalls, dredged channels, and sand dune removal, as well as sea level rise and changes in storm frequency and magnitude associated with climate change. Finally, the course will provide students with a perspective on how the U.S. seeks to manage its coastal zone, focusing on sea level rise and coastal development. This course will include all expenses-paid Spring Break field trip to the Outer Banks in North Carolina to collect oceanographic and geomorphologic data in conjunction with researchers at the U.S. Army Corps of Engineers Field Research Facility. Labs in the course will focus on analysis of the data collected during the field trip, and data collected previously at the Facility.

**Class Format:** lecture; will likely be a combination of lectures and discussions

**Requirements/Evaluation:** problem sets/lab reports, two short tests, and a research project

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**Prerequisites:** GEOS 104, GEOS 210 or permission of instructor

**Enrollment Preferences:** sophomores and juniors

**Enrollment Limit:** 10

**Expected Class Size:** 10

**Distributional Requirements:** Division 3

**Spring 2017**

LEC Section: 01 MWF 08:30 AM 09:45 AM Instructor: Alex Aptsos

**MAST 311(F,S) Marine Ecology**

**Crosslistings:** MAST 311/BIOL 231

Using the principles of evolutionary biology and experimental ecology, this course examines the processes that control the diversity, abundance and distribution of marine organisms. Major marine communities, including estuaries, the rocky shore, sandy beaches, salt marshes, coral reefs, and the deep sea are discussed in detail.

**Class Options:** lecture/demonstration, including coastal and near-shore field trips, 10 days offshore, and a laboratory or field research project

**Requirements/Evaluation:** two tests, a research project, and a presentation

**Extra Info:** offered only at Mystic Seaport

**Prerequisites:** BIOL 101 or GEOS/MAST 104, or permission of instructor

**Distributional Requirements:** Division 3

MAST 352(F,S) Americans and the Maritime Environment (W)

Crosslistings: MAST 352/HIST 352
This course examines the impact of the maritime environment (both salt water and fresh) on human affairs from the age of European expansion to the opening decades of the 21st century. Taught using the collections of Mystic Seaport Museum and on several distant field seminars, Americans and the Maritime Environment examines en situ such things as race, gender, revolution, and humankind's changing relationship with the world's oceans. Readings in primary sources and secondary works on the social, economic, and technological implications of maritime activities culminate in an original research paper.

Class Format: lecture/discussion, including coastal and near-shore field trips, 10 days offshore, and an independent, primary source research project

Requirements/Evaluation: two papers, and short presentation, and final exam. Student papers will be a 5-page minimum and a 15-page minimum essay; the 15-page paper will be critiqued in three steps, as a proposal, a draft, and a final paper, with attention to reasoning and style

Extra Info: offered only at Mystic Seaport

Prerequisites: BIOL 101 or GEOS/MAST 104, or permission of instructor

GEOSCIENCES (DIV III)
Chair: Professor Rónadh COX

MAJOR
The Geosciences major offers an understanding of the evolution of our planet and its interacting global systems. In this era of global change, geoscience provides the tools that can help us learn to live sustainably with our environment, and our place within the vastness of Earth history. Forces within the Earth create mountain ranges and ocean basins and drive the movements of continents. Wind, water and ice shape the surface of the Earth, making and changing the landscapes around us. Sedimentary rocks and the fossils within them teach us how life and climate have evolved over the vastness of time.

Geoscience graduates have a wide range of career options, both with and without graduate training. The many choices include environmental consulting, climate assessment, hydrology, geology, the energy and mining industries, outdoor education, and research and teaching in universities, colleges, and secondary schools. Many students choose to double major in fields as diverse as Art, Economics, History, Physics, Mathematics, English, and Philosophy, and often find jobs where they can apply the synergies of their Geosciences double major. No matter what field they enter, all our Geosciences graduates pursue their lives and careers with a deeper appreciation for the natural world and the vastness of Earth.

At least two 200-level courses selected from this group:
GEOS 201 Geomorphology
GEOS 202 Mineralogy
GEOS 205 Earth Resources
GEOS 210/MAST 211 Oceanographic Processes
GEOS 212/BIOL 212 Paleoecology
GEOS 214 Remote Sensing and Geographic Information Systems
GEOS 215 Climate Changes

At least two 300-level courses selected from this group:
GEOS 301 Structural Geology
GEOS 302 Sedimentology
GEOS 303 Igneous and Metamorphic Petrology
GEOS 401 Global Tectonics and the Rise of Mountains
GEOS 405 Geochemistry: Understanding Earth's Environment
GEOS 411 Geobiology

Finally, students must take enough electives to bring the total to a minimum of nine courses.

PREPARATION FOR GRADUATE SCHOOL
Although many of our majors take geoscience jobs after graduation, many choose to go to graduate school, and most graduate programs will expect students to have a background in mathematics as well as a year or so of study in related sciences, in addition to the requirements of the Geosciences major. Students considering graduate work in geosciences should therefore consult with faculty to ensure that they plan wisely. The selection of outside courses will depend on the field in which a student wants to specialize. Graduate programs in solid-earth geosciences commonly expect entering students to have taken courses in chemistry. For those going into environmental geosciences, courses in chemistry, computer science and/or statistics are recommended. For those considering geobiology programs, biology courses are important. For students entering planetary geology, physics is recommended.

THE DEGREE WITH HOMORS IN GEOSCIENCES
The degree with honors in Geosciences provides students with an opportunity to undertake an independent research project under the supervision of a faculty member, culminating in a thesis that demonstrates outstanding achievement of an original and innovative nature. In addition to the major requirements listed above, those who are candidates for the degree with honors take the following sequence in the Fall, Winter Study, and Spring of their senior year:

GEOS 493-031-494 Senior Research and Thesis

The principal considerations in admitting a student to a program of independent research are interest and motivation, mastery of fundamental material and skills, and ability to pursue independent study successfully. Interested students should talk to members of the department about project options at any time, but generally no later than January of the Junior year.

STUDY AWAY

Students planning to study off-campus should meet as early as possible with the Department Chair to plan and to discuss how potential courses might be used in the Geosciences major. Although most study-away programs do not offer geoscience courses, there are some that dovetail well with a Geosciences major. Examples include the Williams-Mystic program, the Frontiers Abroad program at Canterbury University in New Zealand, and the program at the University of Otago in New Zealand. Courses offered at Norwegian Technical Universities and at several universities in the United Kingdom have also been accepted as part of the Geosciences major. The Department Chair is always happy to discuss student plans and ideas for off-campus work. You can find general study away guidelines for the Geosciences [here].

GEOS 101(F) The Co-Evolution of Earth and Life Crosslistings: GEOS 101/ENVI 105
Our planet is about 4.6 billion years old and has supported life for at least the last 3.5 billion of those years. This course will consider the inter-related nature of Earth and the life that inhabits it, starting with the first living organisms and progressing through the evolution of life. For students interested in crossing over to the intersection of our own species with the Earth today, students will investigate the dynamic nature of the Earth-life system, examine many of its feedbacks, and learn about the dramatic changes that have occurred throughout the history of the Earth. We will ask questions such as:

What did the Earth facilitate biologic evolution, and what effects did those biologic events have on the physical Earth? When did photosynthesis evolve, how can we detect that in the rock record, and how did this biologic event lead to profound changes in the environment? What and why did animals evolve, what role did they play in the radiation of animal life? How did the rise and radiation of land plants affect world climate? How do plate tectonics, glaciation, and volcanism influence biodiversity and evolutionary innovation? What caused mass extinctions in the past and what can we do to prevent us from our current extinction crisis? Labs will involve hands-on analysis of rocks, fossils, and real-world data as well as conceptual and analytical exercises; field trips will contextualize major events in Earth history and will help students learn to read the rock record. Through these investigations, the class will provide a comprehensive overview of Earth
The northeastern United States. With special attention paid to the geological and paleontological history of

Class Format: lecture; one laboratory per week plus one all-day field trip
Requirements/Evaluation: evaluation will be based on lab work, short quizzes, midterms, a writing project, and a final exam
Prerequisites: none
Enrollment Preferences: underclassmen
Enrollment Limit: 30
Expected Class Size: 30
Distributional Requirements: Division 3
Other Attributes: ENVI Natural World Electives
ENVS Group EB-B Electives
ENVS Group EG-A Electives

Fall 2016

GEOS 102(S) An Unfinished Planet
The Earth is a work-in-progress, an evolving planet whose vital signs—as expressed by earthquakes, volcanic eruptions, and shifting plates—are still strong. In a geological time frame, nothing on Earth is permanent: ocean basins open and close, mountains rise and fall, continental masses accrete and separate. There is a message here for all of us who live, for an infinitesimally brief time, on the moving surface of the globe. This course uses the plate tectonics model—one of the fundamental scientific accomplishments of the past century—to interpret the processes and products of a changing Earth. The emphasis will be on mountain systems (on land and beneath the oceans) as expressions of plate interactions. Specific topics include the rocks and structures of modern and ancient mountain belts, the patterns of global seismicity and volcanism, the nature of the Earth’s interior, the changing configurations of continents and ocean basins through time, and, in some detail, the formation of the Appalachian mountain system and the geological assembly of New England. Readings will be from a physical geology textbook, a primary source supplement, selected writings of John McPhee, and references about the geology of the Northeast.

Class Format: lecture, three hours per week; lab (several involving field work), two hours per week; one required all-day field trip on the last Monday of the semester to the Connecticut Valley and the highlands of western Massachusetts
Requirements/Evaluation: evaluation will be based on two hour-tests, weekly lab work, and a scheduled final exam
Prerequisites: none
Enrollment Preferences: first-year and sophomore students
Enrollment Limit: 40
Expected Class Size: 40
Distributional Requirements: Division 3
Other Attributes: ENVI Natural World Electives

GEOS 103(F) Global Warming and Natural Disasters
Crosslistings: GEOS 103/ENVI 103
The destruction caused by recent storms such as Irene and Sandy, devastation of prolonged drought in the African Sahel, catastrophic flooding and mudslides in SE Asia and sea level encroachment on the Alaska coast are visible examples of natural disasters that may be modulated by climate change. Global climate change, together with environmental degradation and the explosive growth of urban areas, has the potential to increase the severity and impact of natural disasters. In this course we globally examine geological and climatological processes that “set up” natural disasters such as hurricanes, floods, landslides, droughts, extreme temperatures, and coastal surges, as well as the processes that condition availability of water resources. We study in detail the causes and anticipated consequences of human alteration of global climate and its impact on the spectrum of natural hazards and resources. During laboratory sessions we use local field sites and computer models to analyze recent disasters/hazards, trends in weather and climate and options for mitigating future impacts.

Class Format: lectures, 3 hours per week; laboratory, 2 hours per week
Requirements/Evaluation: evaluation based on written reports from laboratories, class participation, two hour exams and a final exam
Prerequisites: none
Enrollment Preferences: first-year and sophomore students
Enrollment Limit: 40
Expected Class Size: 20
Distributional Requirements: Division 3
Other Attributes: ENVI Natural World Electives

GEOS 103(S) Oceanography
Crosslistings: GEOS 104/ENVI 104/MAST 104
The oceans cover about 72% of Earth’s surface, yet we know the surface of Venus better than our own ocean floors. Why is that? This integrated introduction to the oceans covers formation and history of the ocean basins; the composition and origin of seawater; currents, tides, and waves; ocean-atmosphere interactions; oceans and climate; deep-marine environments; coastal processes; productivity in the oceans; and human impacts. Coastal oceanography will be investigated on an all-day field trip, hosted by the Williams-Mystic program in Connecticut.

Class Format: lecture/discussion, three hours per week; laboratory, two hours per week in alternate weeks/one all-day field trip
Requirements/Evaluation: evaluation will be based on two hour exams, lab work, participation in the field trip, and a final exam
Extra Info: may not be taken on a pass/fail basis
Prerequisites: none
Enrollment Preferences: first-year and sophomore students
Enrollment Limit: 48
Expected Class Size: 48
Distributional Requirements: Division 3
Other Attributes: ENVI Natural World Electives

GEOS 108(S) Observing Writing (W)
Crosslistings: GEOS 108/ENVI 112
There are many ways to write stories about the planet that we live on. Beautiful ideas can be expressed in fiction, in journalism, and in formal scientific writing. In this course we will investigate the earth by reading about it, by writing about it, and by analysing the writings of others. We will think about the ways in which fiction can be true, how journalism can be both clear and correct, and how scientific articles can be made accessible and interesting. All these things are in the hands of the writer. We will focus on both the act of writing (writing about observations) and analysis of the writings of others (observations about writing). We will write in and about the natural world, thinking about how to do so in ways that are evocative, interesting, and true. We will read the writings of others, asking ourselves whether and how the writers have succeeded in being evocative, interesting, and true.

Class Format: seminar
Requirements/Evaluation: continuous assessment of drafts and rewrites, and class participation
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: a piece of writing should be submitted to instructor, describing the student’s interests
Enrollment Preferences: first years, especially prospective Environmental Studies or Geoscience majors
Enrollment Limit: 10
Expected Class Size: 10
Distributional Requirements: Division 3
Writing Intensive

GEOS 201(F) Geomorphology
Crosslistings: GEOS 201/ENVI 205
This course is designed for Geosciences majors and for environmental studies students interested in surficial geologic processes and their importance in shaping the physical environment. Geomorphology is the study of landscapes, the processes that shape them and the rates at which surface processes change the landscape. This class emphasizes the influence of climatic, tectonic, and volcanic forces on landform evolution over relatively short periods of geologic time—millions of years to a few millions of years. At this time scale, the influence of human activity and climate change on landscapes may be strong, perhaps dominant, in many geologic environments. Many of our examples analyze human interaction - planned or unplanned—with geomorphic processes. Labs focus on field measurements of channels and landscapes in the Williamstown area as well as on the analysis of topographic maps and stereo air photos.

Class Format: lecture/discussion, three hours per week; laboratory, three hours per week/student projects; weekend field trip to the White Mountains
Requirements/Evaluation: evaluation will be based on two hour exams, a project, lab work and class participation
Prerequisites: any 100-level GEOS course or permission of instructor
Enrollment Limit: 18
Expected Class Size: 15
Distributional Requirements: Division 3
Other Attributes: AMST Space and Place Electives
GEOS 202(S) Mineralogy

This course could be subtitled "An Introduction to Earth Materials and Analytical Techniques." As the basis for all subsequent solid-earth courses in the major, it provides a systematic framework for the study of minerals—Earth’s building blocks: their physical and chemical properties at all scales and the common analytical methods used to identify and interpret them. The course progresses from hand-specimen morphology and crystallography through element distribution and crystal chemistry to the phase relations compositional variation, and mineral associations within major rock-forming mineral systems. Laboratory work includes the determination of crystal symmetry; mineral separation; the principles and applications of optical emission spectroscopy; wavelength-dispersive spectrochemical analysis; x-ray diffraction; the use of the petrographic microscope; and the identification of important minerals in hand specimen and thin section.

Class Format: lecture, three hours per week; laboratory, three hours per week; independent study of minerals in hand specimen; one afternoon field trip
Requirements/Evaluation: evaluation will be based on one hour test, lab work, and a final exam
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: one 100-level GEOS course or permission of instructor
Enrollment Preferences: sophomores and juniors planning to take GEOS 301, 302 and/or 303 in the subsequent year
Enrollment Limit: 14
Expected Class Size: 12
Distributional Requirements: Division 3
Other Attributes: MTSC Related Courses

GEOS 205 Earth Resources

Crosslistings: GEOS 205/ENVI 207

The metal in your soda can, the plastic in your Nalgene, the components of your computer, the glass in your window, the hydrocarbons being burned to keep you warm in the winter or to transport you in cars or aircraft, the cars and aircraft themselves: all are made of materials mined from the Earth. Right now there are more people building more houses, paving more roads, making more vehicles, more electronics, and more plastic packaging—all with geologic materials. As demand soars in both established and growing economies, and as we realize the environmental damage that can result from resource extraction and processing, the importance of understanding Earth’s resources increases. Finding new deposits and managing those we have requires insight into the geology that underlies the location and origin of strategic Earth materials. This class introduces the geologic processes that control formation, distribution, and extent of materials reserves: dimension stone and gravel, base and precious metal ores, gemstones, petroleum, nuclear energy sources, and specialty materials for medical, technological, and military uses.

Class Format: lecture
Requirements/Evaluation: one hour exam, a final exam, lab exercises, and class participation
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: one 100-level GEOS course or permission of instructor
Enrollment Preferences: sophomores and Geosciences majors
Enrollment Limit: 18
Expected Class Size: 18
Distributional Requirements: Division 3
Other Attributes: ENVI Natural World Electives ENVS Group EG-C Electives

GEOS 210(F,S) Oceanographic Processes

Crosslistings: MAST 211/GEOS 210

This course examines ocean and coastal environmental science issues including carbon dioxide and the ocean’s role in climate, El Niño and other ocean-atmosphere oscillations that influence our weather, coastal erosion and other hazards, coastal pollution, and fisheries. The focus is on controlling processes with regional comparisons. Blue water oceanography is conducted in the Atlantic and comparative coastal oceanography includes trips to southern New England shores, and the West and Gulf coasts of the US as part of the Williams-Mystic program.

Class Format: lecture/laboratory, including coastal and near-shore field trips, 11 days offshore, and a laboratory or field research project
Requirements/Evaluation: two tests, a research project, and a presentation
Extra Info: offered only at Mystic Seaport
Distributional Requirements: Division 3

Spring 2017
LEC Section: 01 TBA Instructor: Lisa Gilbert

GEOS 212(S) Paleobiology

Crosslistings: GEOS 212/BIOL 211

The fossil record is a direct window into the history of life on Earth and contains a wealth of information on evolution, biodiversity, and climate change. This course investigates the record of ancient life forms, from single-celled algae to snails to dinosaurs. In addition to the intellectual discovery of fossils as organic relics and the ways in which fossils have been used to support conflicting views on nature, geologic time, and evolution, we will cover a range of topics central to modern paleobiology. These include: how the fossil record informs our understanding of evolutionary processes including speciation; the causes and consequences of mass extinctions; how fossils help us tell time and reconstruct the Earth’s climatic and tectonic history; statistical analysis of the fossil record to reconstruct biodiversity through time; analysis of fossil morphology to recreate the biomechanics of extinct organisms; and using fossil communities to reconstruct past ecosystems. Laboratory exercises will take advantage of Williams’ superb fossil collections as well as published datasets to provide a broad understanding of fossils and the methods we use to study the history of life on Earth. We will also view a diversity of fossils in their geologic and paleo-environmental context on our field trip to Eastern New York.

Class Format: lecture/laboratory; field trip to the paleoZoic of New York State
Requirements/Evaluation: evaluation will be based on lab assignments, short quizzes and writing assignments, and a final exam
Prerequisites: any 100-level GEOS course or BIOL 102, 203 or 205
Enrollment Preferences: sophomores and juniors
Enrollment Limit: 12
Expected Class Size: 12

GEOS 214(S) Remote Sensing and Geographic Information Systems

Crosslistings: GEOS 214/ENVI 214

Rising oil and electricity costs disrupt the economy and help fuel global insecurity. Extraction of fossil fuels degrades the environment. Clearer understanding of how fossil-fuel consumption contributes to global climate change is increasing the demand for renewable sources of energy and for more sustainable campus environments. What sources of energy will supply Williams College and nearby areas in the twenty-first century? How will campus buildings, old and new, continue to be attractive spaces while making far more efficient use of heat and light? How can the College’s operations and purchasing become more sustainable? This course is a practical introduction to renewable sources of energy, including conservation, principles of sustainability, and to their application to the campus environment. Topics covered include: biological sources of energy (biomass, biogas, liquid fuels), wind energy, geothermal and solar energy, energy efficiency and the environmental impacts of using renewable energy. Lectures, field trips and individual projects emphasize examples from the campus and nearby area.

Class Format: seminar, three hours per week
Requirements/Evaluation: evaluation will be based on an hour exam, class participation that includes a seminar presentation, and a research project that investigates some aspect of campus energy use and greenhouse-gas emissions
Enrollment Preferences: sophomores
Enrollment Limit: 20
Expected Class Size: 20
Distributional Requirements: Division 3
Other Attributes: MAST Interdepartmental Electives
This class provides a practical look at fast-evolving methods used to integrate information about the Earth's surface with spatial data collected by disciplines such as archaeology, economics, the field sciences, history and political science. Remote sensing involves collection and processing of data from satellite and airborne sensors to yield environmental information about the Earth's surface and lower atmosphere. Remote sensing allows regional mapping of rock materials, analysis of vegetation cover and measurement of urban areas, and landform change over time. A Geographic Information System (GIS) links satellite-based environmental measurements with spatial data such as topography, transportation networks, and political boundaries, allowing display and quantitative analysis at the same scale using the same geographic reference system. This course covers concepts of remote-data capture and geographic rectification using a Global Positioning System (GPS), as well as principles of remote sensing, including linear and non-linear image enhancements, convolution filtering, and image classification. Principles of GIS include display and classification, buffer overlays, decision support tools, and techniques of spatial analysis. Weekly labs focus on training in the application of techniques using data from the region and other areas of North America.

Class Format: lecture, three hours per week; laboratory, three hours per week.

Requirements/Evaluation: based on weekly lab exercises, two take-home exams and a final project

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: at least one introductory course in BIOL, ENVI, or GEOS

Enrollment Preferences: Geosciences and Biology majors and Environmental Studies majors and concentrators

Enrollment Limit: 15

Expected Class Size: 15

Distributional Requirements: Division 3

GEOS 21S(C) Climate Changes (Q)

Crosslistings: GEOS 215/ENVI 215

In recent years, there has been a growing public and scientific interest in the Earth's climate and its variability. This interest reflects both concern over future climate changes resulting from anthropogenic increases in atmospheric greenhouse gases and growing recognition of the economic impact of "natural" climate variability (for example, El Niño events), especially in the developing world. Efforts to understand the Earth's climate system and predict future climate changes require both study of parameters controlling present day climate and detailed studies of climate changes in the past. In this course, we will explore the processes that control the Earth’s climate, such as insolation, the greenhouse effect, ocean circulation, configuration of continents, and positive and negative feedbacks. At the same time, we will review the geological record of climate changes in the past, examining their causes. Geoscience exercises and problem sets will emphasize developing problem solving skills and using quantitative analyses to assess if a given explanation is possible and reasonable. These exercises will include developing and applying numerical models of the radiative balance of Earth and the carbon cycle.

Class Format: lecture, three hours per week; one-three hour lab per week

Requirements/Evaluation: evaluation will be based on lab exercises and problem sets (25%), three hour exams (50%), and a final project (25%) where students collect, analyze, and interpret data.

Prerequisites: 100-level course in GEOS, CHEM, or PHYS or permission of instructor

Enrollment Preferences: Geosciences majors

Enrollment Limit: 20

Expected Class Size: 20

GEOS 217T Planets and Moons (W)

Crosslistings: GEOS 217/ASTR 217

We teach the human mind full of wonder. Each planet and each moon is strange: different from our Earth, and different from each other. The recent flood of images and data from Mars constantly reveals new marvels—the rest of the solar system is even stranger. The U.S. put men on the moon; there are robots on Mars; and the Soviet Union landed several times on Venus. The other worlds are known only from flybys and remote images, but it's amazing how much those can teach us. By focusing on recent research, we will examine how the solar system works and delve into its mysteries. Topics may include the possible Late Heavy Bombardment of the moon, runaway greenhouse on Venus, water on Mars, hidden oceans on Europa, and the methane weather cycle on Titan.

Class Format: tutorial

Requirements/Evaluation: six 1500-word papers, discussion & critical analysis; strong focus on polished writing & argument, & papers will be thoroughly edited by the instructor

Extra Info: students will improve writing by integrating into successive papers the editorial comments they receive, & also by editing the writing of their tutorial partners

Prerequisites: any GEOS course, or permission of instructor

Enrollment Preferences: sophomores

Enrollment Limit: 10

Expected Class Size: 10

Distributional Requirements: Division 3

Writing Intensive

Not Offered Academic Year 2017

TUT  Instructor: Ronadh Cox

GEOS 226T The Oceans and Climate (W)

Crosslistings: GEOS 226/ENVI 226/MAST 226

The oceans are a fundamental part of Earth’s climate system. Ocean currents redistribute heat and water vapor around the globe, controlling temperature and precipitation patterns. Marine phytoplankton blooms and air-sea gas exchange modulate the atmospheric carbon dioxide concentration. The dynamic interaction of the atmosphere and the sea surface results in multi-year climate variations such as El Niño-Southern Oscillation. This course will examine gradual and abrupt climate shifts from Earth’s history and the ocean’s role in driving, amplifying or dampening the changes, the ocean’s response to anthropogenic greenhouse gas emissions, and the projected impacts of continued emissions and climate change on the ocean in the coming decades and millennia. We will analyze articles from the scientific literature that lay out the theory on the ocean’s influence on climate, reconstruct past climate and ocean changes, test the mechanisms responsible for those changes, and with that knowledge, project the consequences of continued anthropogenic greenhouse gas emissions. Topics may include the climate effects of opening and closing seaways with plate tectonics, ocean feedbacks that amplify the intensity of ice ages, the instability of ocean circulation during ice-sheet retreat, the evolution of the El Niño-Southern Oscillation with changing carbon dioxide through the geologic past and the next century, ocean heat and carbon dioxide uptake during the last century and into the future, and the impact on sea level, seafloor methane reservoirs, ocean acidification, oxygenation and marine ecosystems.

Class Format: tutorial

Requirements/Evaluation: each student will write five 5-page position papers; evaluation based on the critical analysis of reading from the scientific literature through writing and discussion

Extra Info: may not be taken on a pass/fail basis, not available for the fifth course option

Prerequisites: GEOS 104, GEOS 210 or permission of instructor

Enrollment Preferences: sophomores and juniors

TUT  Instructor: Mea Cook

GEOS 258(S) Coastal Processes and Geomorphology

Crosslistings: GEOS 258/ENVI 258/MAST 258

Can people live safely along the coast? Recent events like Superstorm Sandy and the Tohoku Tsunami have shown us how the ocean can rise up suddenly and wreak havoc on our physical and coastal infrastructure. Only a few geoscientists can evaluate the risks and define informed strategies to prevent future coastal catastrophes. Currently almost half the global population lives within 100 km of the coast, with a large percent of those living in densely populated cities (e.g., New York, New Orleans, Los Angeles, Shanghai, Hong Kong, Cape Town, Sydney, Mumbai). Despite the growing risks and challenges associated with climate change and rising sea levels, the coastal population continues to grow rapidly. Helping these growing populations to live safely along the coast requires a detailed understanding of the processes that shape the coastal zone. These processes act across a variety of scales, from deep-time geologic processes that dictate coastal shape and structure, to decadal-scale processes that determine shoreline position and evolution, to weekly and daily processes such as storms and tides. This course will provide an in-depth look at the forces-land, waves, storms, and people-that shape the coastal zone, as well as the geologic formations-sandy beaches, rocky cliffs, barrier islands, deltas, and coral reefs-that are acted upon and resist these forces. Coastal dynamics are strongly affected by human interventions, such as seawalls, dredged channels, and sand dune removal, as well as by sea
level rise and changes in storm frequency and magnitude associated with climate change. Finally, the course will provide students with a perspective on how the U.S. seeks to manage its coastal zone, focusing on sea level rise and coastal development. This class will include an all-expenses-paid Spring Break field trip to the Outer Banks in North Carolina to collect oceanographic and geomorphologic data in conjunction with researchers at the U.S. Army Corps of Engineers Field Research Facility. Labs in the course will focus on analysis of the data collected during the field trip, and data collected previously at the Facility.

Class Format: lecture; will likely be a combination of lectures and discussions

Requirements/Evaluation: problem sets/lab reports, two short tests, and a research project

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: GEOS 104 or permission of instructor

Enrollment Limit: 10

Expected Class Size: 10

GEOS 303(2S) Sedimentology (W)

Sediments and sedimentary rocks preserve information about the rocks that were eroded to form them, the fluids and forces that transported them, the conditions by which they were deposited, and the processes by which they were lithified. This course introduces the principles of sedimentology, including sediment composition, fluid mechanics, bedform analysis, and depositional environments.

Class Format: lecture/discussion, three hours per week; laboratory, three hours per week

Requirements/Evaluation: eight written critiques (each 350-400 words) of assigned papers from the sedimentological literature—designed to teach clear written expression & careful analytical reading; evaluation based on lab work, written assignments, hour exam & final exam

Extra Info: papers will be thoroughly edited for style, grammar and syntax; each student will compile his/her papers as a growing body of work, and each new paper will be read and edited in the context of the previous submissions may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: GEOS 202 (may be taken concurrently with permission of instructor)

Enrollment Limit: 12

Expected Class Size: 12

GEOS 303(F) Igneous and Metamorphic Petrology

Using plate tectonics and the geologic assembly of New England as a template, this course explores the origin of crystalline rocks—volcanic, plutonic, and metamorphic—that comprise 94% of the Earth's crust. Field and lab studies are the crux of the course, supported by experimental work and thermodynamic principles. Chemical and mineralogical compositions and rock fabrics provide evidence for crystallization environments and tectonic settings, past and present.

Class Format: lecture/discussion, three hours per week; laboratory, three hours per week; several field trips including one full day trip to central New Hampshire

Requirements/Evaluation: evaluation will be based on lab work, one hour test, and a final exam

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

GEOS 401(F) Global Tectonics and the Rise of Mountains

Fifty years after the sea-floor spreading hypothesis was first verified using magnetic anomalies, we have spectacular data sets from paleomagnetics, seismology, volcanism, the Global Positioning System, and digital elevation models that provide rich details into the kinematics and mechanisms of present and past plate motions. After an introduction to the theory of plate tectonics, we will look at the field trips to illustrate how digital elevation models integrated with geologic maps and cross-sections will be used to construct 3D models. We will also explore ways in which tectonics, climate, and erosion affect each other during the evolution of mountain ranges. Class meetings will include lectures and discussions of assigned reading. Labs will include field trips and computer-based projects.

Class Format: lecture/discussion, three hours per week; laboratory, three hours per week; six field trips including one all-day trip

Requirements/Evaluation: participation during class and field trip discussions; six lab reports based on field trips, one computer based laboratory project, 2 four page papers based on journal articles.

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: GEOS 301 or 303 or permission of instructor

Enrollment Preferences: senior Geosciences majors

Distributional Requirements: Division 3

GEOS 405 Geochemistry: Understanding Earth’s Environment

Crosslistings: GEOS 405/ENVI 405

Rocks, water, air, life: what comprises these interconnected components of the Earth system? How do they interact today, and how did these interactions differ in the past? In this course we will study how chemical elements are distributed in the Earth, cycle through the Earth system, and act together to produce a planet that is habitable. As Earth's landscapes and oceans, and the life they harbor, have evolved through time, they have left an imprint in the geological record that we can read using geochemical tools such as molecular fossils, elemental ratios, and stable and radiocative isotopes. Topics include the synthesis of elements in stars, the formation and differentiation of planet Earth; radiometric dating; the major constituents of the atmosphere, rain, rocks, rivers and the ocean; how they're linked by chemical weathering and biological activity; and reconstruction of past environments. Students will explore these topics through lecture; reading and discussing articles from the scientific literature; and collecting, analyzing and interpreting data from environmental samples.

Class Format: seminar/lab

Requirements/Evaluation: evaluation will be based on seminar discussions, papers, labs and final project

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: two 200-level GEOS courses and at least one of GEOS 302, 303 or 311; or permission of instructor

Enrollment Preferences: senior Geosciences majors

Enrollment Limit: 10

Expected Class Size: 10

GEOS 411(F) Geobiology

Geobiology—the study of interactions between earth and life over geologic timescales—is a new and interdisciplinary field that has grown out of exciting advances in inorganic, and biological sciences. During this course we will examine the many ways in which organisms—from bacteria to trees—have left their mark on our planet. Topics include the origin of life, the rise of oxygen in the earth's atmosphere, the evolution of biomineralization, the environmental context for animal evolution, the role of microbial communities in the earth system, the emergence of land plants, and the potential for planet-life interactions elsewhere in our solar system. Geobiology incorporates tools and
STUDY ABROAD
The department strongly encourages students who wish to attain fluency in German to spend a semester or year studying in Germany or Austria, either independently or in one of several approved foreign study programs. German 104 or the equivalent is the minimum requirement for junior-year abroad programs sponsored by American institutions. Students who wish to enroll directly in a German-speaking university should complete at least 201 or the equivalent. In any case, all students considering study-abroad should discuss their language preparation with a member of the department. You can find general study away guidelines for German here.

THE CERTIFICATE IN GERMAN
To enhance a student’s educational and professional profiles, the department offers the Certificate in German. It requires seven courses—three fewer than the major—and is especially appropriate for students who begin study of the language at Williams.

Students who enter Williams with previous training in German may substitute more advanced courses for the 100-level courses; they can also be exempted from up to two of the required courses.

The student must achieve proficiency at the level of a B in German 104 or the equivalent.

Appropriate elective courses can usually be found among the offerings of German, Art History, History, Music, Philosophy, Political Science, and Theatre.

Required Courses
- German 101
- German 102
- German 103
- German 104
- German 201

Elective Courses
at least one course (in German or English) on German cultural history (literature, art, drama, music) at least one course (in German or English) on German intellectual, political, or social history

THE MAJOR
The German major offers students an interdisciplinary approach to German intellectual and cultural history by combining courses in German language and literature with courses in History, Philosophy, Music, and other appropriate fields.

For students who start German at Williams, the major requires a minimum of ten courses: German 101-102, 103, 104, 201 and 202; two 300-level German courses; and two electives from either German courses numbered above 202 or appropriate offerings in other departments.

For students who have acquired intermediate or greater proficiency in the language before coming to Williams, the minimum requirement is nine courses: German 202; two 300-level German courses; and six other courses selected from German courses numbered above 102 and appropriate offerings in other departments.

Examples of appropriate courses in other departments are:
- Art History 287 Art in Germany: 1960 to the Present
- History 239 Modern German History
- History 338 The History of the Holocaust
- Music 108 The Symphony
- Music 117 Mozart
- Music 118 Bach
- Music 120 Beethoven
- Philosophy 309 Kant

Students may receive major credit for as many as four courses taken during study abroad in Germany or Austria in the junior year.

THE DEGREE WITH HONORS IN GERMAN
Students earn honors by completing a senior thesis (German 493-494) of honors quality.

Students interested in honors should consult with the department chair no later than April 15 of their junior year. The usual qualifications for pursuing honors are: (1) an overall GPA of 3.33 or better, (2) a departmental GPA of 3.67 or better, (3) a strong interest in a specific topic for which an appropriate faculty advisor will be available in the senior year.

GERM 101(F) Elementary German
German 101-102 is for students with no previous study of German. The course employs a communicative approach involving all four language skills: listening comprehension, speaking, reading, and writing. We focus initially on practice in understanding the spoken language and then move rapidly to basic forms of dialogue and self-expression. In the second semester, reading and especially writing come increasingly into play.

Class Format: lecture/discussion; meets five days a week

Requirements/Evaluation: active class participation, written homework, short compositions, oral exercises and tests

Extra Info: students registered for GERM 101-102 are required to attend and pass the sustaining program during the winter study period; credit granted only if both semesters (GERM 101 and 102) are taken not available for the fifth course option

Prerequisites: none

Enrollment Limit: 18

Expected Class Size: 15
GERM 102(S) Elementary German
Germain 102 is a continuation of German 101, and will provide you with a further introduction to the language and cultures of German-speaking countries. You will have the opportunity to practice listening, reading, writing, and speaking in German both through in-class activities and homework assignments. During the semester, you will learn about various cultural perspectives, products, and practices of German-speaking countries. Some of the topics that will be addressed this semester include: housing, household; geography and landscape; transportation; travel plans and experiences; food and drink; cooking and ordering food at restaurants; childhood and youth; fairy tales; health and personal hygiene; family, marriage, and partnership; community issues in a multicultural society; literature, music, and film. This language course is conducted in German.
Class Format: seminar
Requirements/Evaluation: active class participation, midterm & final Exams, essays, homework
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: GERM 101 or equivalent
Enrollment Preferences: first-year students
Enrollment Limit: 18
Expected Class Size: 15
Distributional Requirements: Division 1

Spring 2017
SEM Section: 01 M-F 10:00 AM 10:50 AM Instructor: Gail Newman
GERM 103(F) Intermediate German I
In this course students will further develop their German language skills, by discussing a variety of cultural topics and themes in the German-speaking world. Through extensive work on expanding vocabulary, reviewing major grammar topics, conversations and composition exercises, the students will strengthen their language skills and develop cultural competency. The course focuses on real communication in meaningful contexts, to develop and consolidate students' speaking, listening, reading and writing abilities at the intermediate level. Using a variety of media, such as texts, video and audio, students will explore various cultural topics and cultural topics in the German-speaking world. Students will have the opportunity to practice and improve their spoken and written German skills through in-class activities and homework assignments. The course is taught in German. Active and dedicated participation including homework is expected.
Class Format: seminar
Requirements/Evaluation: active class participation, midterm and final Exams, quizzes, essays, homework
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: GERM 102 or equivalent
Enrollment Preferences: first-year students
Enrollment Limit: 18

GERM 120(S) Turbedeutsch: Accelerated Elementary German
An accelerated version of Elementary German, covering nearly all the material of GERM 101-102 in one semester. The course employs a communicative approach involving all four language skills: listening comprehension, speaking, reading, and writing. Best suited to very committed students who have had no previous German, or to students who have had some previous German but who did not place into GERM 103. The course will meet every day, including those three 50-minute periods on MWF and 2 75-minute periods on TR, plus a required TA session at a time to be arranged.
Detlev Buck, and listen to cabaret songs by Marlene Dietrich and electronic music by Ellen Alien.

Conducted in German.

Class Format: seminar

Requirements/Evaluation: midterm, final exam, several short papers

Prerequisites: GERM 201 or equivalent

Enrollment Preferences: German majors

Enrollment Limit: 12

Expected Class Size: 10

GERM 202 Berlin—Multicultural Metropolis Between East and West

We will examine texts and films about Berlin as a center of cultural and social transformations in the late nineteenth and twentieth centuries, with special emphasis on the post-wall period. We will move from the turn of the century (when Berlin’s population had nearly tripled in size) to the establishing of Berlin as a world capital in the 1920s, then through Nazi-era transformations, wartime destruction and the cold war division of the city. We will conclude with the reshaping of the city after the fall of the Berlin wall. Texts and films may include: Walter Benjamin, Berliner Kindheit um 1900, excerpts from Ulrich von der Heyden and Joachim Zeller’s Sinfonie einer Großstadt, Irmgard Keun’s Das kunstseidende Mädchens, Nazi architect Albert Speer’s plans for Berlin as the fascist capital “Germania,” the 1956 East German youth protest film Ecke Schönhauser, short fiction by Reiner Kunze, Aras Oren, Peter Schneider, Bodo Morshäuser, Inna Liebmann. Recent films to be included are: Sonnenallee, Goodbye, Lenin!, Berlin is in Germany, Geschwister.

Class Format: seminar

Requirements/Evaluation: frequent short writing assignments

Prerequisites: GERM 201 or equivalent

GERM 202(S) German Comics (W)

The goal of this advanced course is to study language and culture through the exploration of German-language comics. Despite the boom in the production of comics since the reunification, Germany remains an atypical cultural context for the emergence of new talents. In Germany, comic artists are not in the same way regarded as serious writers, they do not gain the same status as novelists and playwrights. However, comics is a growing and expanding field, with many young and talented artists in the German speaking world. Here, comics remain largely unknown and unrecognized abroad. This course seeks to introduce students to this rich, active genre and to deepen their understanding of it by allowing them to engage with its breadth and the variety of its subjects and styles. The course will address a variety of recent comics ranging from graphic novels by Tim Dinter, Line HovenKati Rickenbach, and Oliva Vieweg to literary comics by Fix, Isabel Kreitz, as well as historical comics by Simon Schwartz, and Elke Steiner, not to forget German mangas Deadly Circus by Jürgen Seebeck. The course will also address a variety of genres such as humor with Der bewegte Mann by Ralf König, biography with Schiller by Horus, and autobiography with Smalltown Boy by Andreas Michalek, and Held by Fix. What are the recurrent themes in German comics? What kind of current political issues do these comics raise and what type of contemporary anxieties do they express? These are some of the questions the course seeks to answer.

This course is conducted entirely in German.

GERM 271 From Kleist to Kafka

Crosslistings: GERM 271/COMP 271

Heinrich von Kleist (1777-1811) and Franz Kafka (1883-1924) wrote some of the most puzzling and intriguing work in European literary history. From Kleist’s drama Penthesilea, which culminates in the consumption of the hero by the heroine (literally!), to Kafka’s “A Hunger Artist,” profiling a man who starves for a living, the texts in the course attempt to access the most profound—and at times bizarre—regions of the human mind. Works we will read include Kleist’s dramas Prince Friedrich of Homburg, Amphitryon, and Penthesilea, and his short stories Marquise of O “…, The Earthquake in Chile, “The Foundling,” “St Cecilia and the Power of Music,” and “The Betrothal in Santo Domingo.” By Kafka we will study “The Judgment,” “The Metamorphosis,” “A Hunger Artist,” “In the Penal Column,” “The Burrow,” “A Country Doctor,” and others. Literary readings will be supplemented by selected letters and essays by Kleist, and by excerpts from Kafka’s diary.

Readings and discussion in English.

Class Format: seminar

Requirements/Evaluation: intensive participation, four 2- to 3-page response papers, one 5- to 7-page paper, final project

Prerequisites: none

Enrollment Preferences: prospective Comparative Literature majors

Expected Class Size: 15

Not Offered Academic Year 2017

SEM Instructor: Gail Newman

GERM 277/COMP 277

Mannweib: Masculine Women in German Culture (W)

The German word “Mannweib” is a literal translation of the Greek androgenous” and is a derogatory term for a woman who acts in a masculine way. This course surveys the use of the term Mannweib in German culture with a particular focus on literary texts, operas, paintings, and films, all crafted at turning points in German history. Why does the Mannweib emerge at times of major political and historical upheavals? How does this atypical masculine woman contribute to the construction of a German national identity? These are some of the key questions this course seeks to address.

We will read the Nibelungenlied epic, poems by Freiligrath, plays by Lessing, Schiller, Goethe, Kleist, and Dürenmatt, as well as short stories by Stifter, watch operas by Wagner, and films by Sternberg and Tykwer. In all these materials featuring a Mannweib as main protagonist, we will look at the way masculine femininity is construed as unnatural and literally constructed to serve either a patriarchal or a patriotic purpose.

We will also examine the misogyny underlying the artistic creation of these masculine women, either enshrined as allegories of virtue or perceived as dangerous agents of socio-political change, and ultimately doomed to rejection from the moment these misfits step out of their assigned role. Conducted in German.

Class Format: seminar

Requirements/Evaluation: oral presentations and three 3- to 5-page papers written in German

Extra Info: may not be taken on a pass/fail basis

GERM 304T(S) Rebels and Conformists: Postwar Germany from The Economic Miracle’ to the Fall of the Wall (W)

Crosslistings: GERM 304/WGSS 304

In postwar West Germany, a thorough examination of the Nazi past took a backseat to economic recovery and repairing the country’s international standing, whereas to some extent the reverse was true for the East. An authoritarian democracy, an emphasis on consumerism and the qualitatively different experiences of young German generations led some to question whether the Federal Republic was a restoration or a new beginning? In the East, the cold war led to an increasingly Stalinist interpretation of communist principles, while communist ideals were upheld as an antidote to Nazism and the new materialism. This tutorial will cover a wide range of social protest as reflected in literature and film of the two Germanies: critical responses to the Holocaust in the two countries, the 1968 student revolution, anti-capitalist terrorism by...

Class Format: tutorial

TUT Section: T1 TBA Instructor: Helga Druexes

GERM 306T Enlightenment and its Discontents (W)
Crosslistings: GERM 306/COMP 314
"Sapere Aude," declared Immanuel Kant in his essay "What is Enlightenment?" (1784). "Have the courage to make use of your own capacity to reason." Kant's exhortation sums up the mood of the high Enlightenment, a trend in Western thought that gave birth to most of the ideas that we still hold dear: the primacy and universality of reason, the autonomy of the individual, the educative and restorative powers of the nuclear family. Today we are confronted daily with the tensions and gaps hidden inside Enlightenment thinking; in fact, the fissures in the edifice of the Enlightenment were subtly present from the beginning. This course will trace the development of Enlightenment assumptions through German literature and theory. Our reading will move through several stations of the development of Enlightenment thinking, from its most fervent proponents (Kant, Lessing), through those who put it to a severe test (Kleist, Hoffmann, Büchner), to the outright subversion of its premises (Nietzsche, Freud, Kafka). Readings and discussion in German for those who know German, in English for those who do not.

Class Format: tutorial
Requirements/Evaluation: 5-page papers or 2-page written commentaries every other week
Extra Info: may not be taken on a pass/fail basis
Prerequisites: for German students, GERM 201 or the equivalent; for non-German students, on permission of instructor

GERM 316 "Wer ist wir?: Recent Debates over Multiculture in Germany (D) (W)
German chancellor Angela Merkel controversially claimed in 2010: "Multikulti ist gescheiteret." (Multiculturalism has failed in Germany). We look at how perceptions of Germany's past and present immigration have changed over time. In the 1960s, government labor contracts brought large numbers of foreign workers into the country and facilitated the "economic miracle." How did the newcomers adapt to life in Germany and what did they hold on to from their home cultures? How did subsequent generations experience life in Germany? What were the major political shifts that took place regarding citizenship and participation in the public sphere? How do popular media portray minorities? How do members of minority groups portray themselves? We will read texts by: Zafer Senocak, Hatice Akyün, Yoko Tawada, Marica Bodrozic, Navid Kermani, Wladimir Kaminer, view feature films and documentaries, and discuss a wide range of social commentary and analyses across the political spectrum from right wing populists to left liberals: Thilo Sarrazin, Kirsten Heisig, Astrid Geisler and Christoph Schultheis, Wilhelm Heitmeyer, Alexander Häusler, Freya Klier, Mark Terkessidis, Rita Süssmuth and others.

Class Format: seminar
Requirements/Evaluation: four 5-page papers in German
Extra Info: may not be taken on a pass/fail basis
Prerequisites: GERM 202 or permission of instructor
Enrollment Preferences: German majors, but open to all with appropriate language skills

GERM 317(F) The New Woman in Weimar Culture (W)
Crosslistings: GERM 317/WGSS 317
This course explores the figure of the New Woman, a professional, political, independent, and modern woman, that rises in Germany right at the end of World War I and thrives during the Weimar Republic. Praised as the epitome of Weimar Modernity, the New Woman is nevertheless greeted with great ambivalence: whether a liberated and emancipated woman for some, or a dangerous and promiscuous woman loathed by others, she is perceived as threatening the patriarchal order. A closer look at artworks by Otto Dix, Christian Schad, and Hannah Höch, films by Fritz Lang and George Wilhelm Pabst, poems by Gottfried Benn, Else Lasker-Schüler, and Kurt Tucholsky, novels by Erich Kästner, Vicky Baum, and Imgrund Keun, as well as plays by Frank Wedekind and Bertolt Brecht, will provide a more precise picture of the New Woman's various incarnations, ranging from actresses (Marlene Dietrich), singers (Margo Lion and Claude Waldorf), and dancers (Anita Berber) to prostitutes, and suggest that the New Woman serves as the vessel of male anxieties and represents the contradictions of modernity, Taught in German.
Class Format: taught seminar style in German for the German students and as a tutorial in English for non German speaking students
Requirements/Evaluation: papers and oral presentations

GERM 321 Lust, Liebe und Gewalt (W)
In the finale of Salome, an opera in German by Richard Strauss, a young Salome kisses the severed head of John the Baptist, while expressing her desire and declaring love to him. No other opera makes the violence of love and lust more explicit; it brings the interplay of Eros and Thanatos to a climax. In this course, we will reflect on the intimate relationship between love, lust, and violence, examining how love and lust do not exclude violence, but rather include—if not provoke—it. In order to gain a better understanding of the dynamics formed by this fascinating triangle, we will read a collection of short stories by Bernhard Schlink, plays by Arthur Schnitzler and Frank Wedekind, poems by Johann Wolfgang Goethe, look at paintings by Gustav Klimt and Oskar Kokoschka, watch movies by Josef von Sternberg and Rainer Werner Fassbinder, and listen to pop songs by Nina Hagen and Rammstein. Conducted in German.
Class Format: seminar
Requirements/Evaluation: 5-page papers every other week, 2-page critiques of the partner's papers in alternate weeks

GERM 323T Reason, Unreason and Anti-Reason from the Enlightenment to the Third Reich (W)
Crosslistings: GERM 323/COMP 323
From its inception in the eighteenth century, modern German art and thought have proved the nature of human reason. At every turn, the celebration of rationality and enlightenment has brought with it a resistance to the rational: Lessing's Enlightenment buries his counterpart in those of the Sturm und Drang movement; Kleist's preoccupation with reliable justice and predictable happiness can't hide an unblinking knowledge of life's randomness; Freud's search for ultimate knowledge is constantly shadowed by his own flaws in methods and 'theories' of the Nazi propagandists. Offered in English or German: Reading, discussion and writing will be in German for German-speakers, in English for non-German speakers. Class Format: seminar
Requirements/Evaluation: two seminar meetings with the entire group; five-page papers, five 2-page critiques of the partner's papers

GERM 331T Silence, Loss and (Non)Memory in Twentieth-Century Austria (D) (W)
Crosslistings: GERM 331/COMP 347
Think of Austria and glittering Klimt paintings come to mind, or the majestic Alps of The Sound of Music, or perhaps a melody from Mozart or Strauss plays in the ear. And no wonder: tourism is one of the largest industries in Austria; the nation lives on being seen and heard. But a great deal is invisible and inaudible to the tourist in Austria. In this course we will explore the hidden core of Austrian culture from 1938 to the present. We'll begin with the tremendous intellectual ferment surrounding Sigmund Freud's elaboration of the unconscious at the turn of the century, from Hofmannsthal's paralysis of language through Schnitzler's streams of consciousness to Kafka's carefully crafted renderings of inner worlds. Then we will turn to an examination of the phenomenon of loss at the end of World War I: loss of empire, loss of relevance, loss of hierarchical certainty. Stefan Zweig documents this phenomenon timelessly. The second half of the course will focus on the driver of Austrian identity from 1938 on, the so-called Anschluss (annexation) by the Nazis, and the (non)memory of the horrors that ensued. We will probe the idiosyncratic mixture of trauma and guilt that characterizes Austria today through the work of contemporary authors and filmmakers, focusing on three: Elisabeth Reichart, whose fiction sensitively but relentlessly uncovers secrets that have become part of the fabric of forgetting in the Austrian psyche; Marcus Carney, born to an Austrian mother and an American father, who unblinkingly documents his mother's and grandmother's attempts (or non-attempts) to come to terms with their family's 'Naz past, not looking away from his own complex relationship to all involved; and finally, Gerhard Roth, the author of the seven-text series The Archives of Silence, a monumental collection of photos, essays and novels demonstrating the fact, as Roth conveyed to me in an interview, that "we all are just as blind and deaf to the whole picture as the blind and deaf are to the usual communications of our society." Psychoanalytic theory from Freud to recent discussions of the transgenerational transmission of trauma and perpetrator guilt will provide a conceptual framework for the literary works.

GLOBAL STUDIES (DIV II)
Chair: Professor GEORGE CRANE

An informed engagement with the world is an indispensable part of the liberal education that is the goal of the Williams experience. The Global Studies Program enables students to achieve this goal through a cross-disciplinary and comparative curriculum. The program offers multiple tracks, on a region of the world or theme, around which students construct their global studies concentration.

**REQUIREMENTS**

To complete the concentration, students must take a section of Global Studies 101; fulfill the requirements of a track; complete a senior exercise; and attend the weekly Global Studies colloquium.

**Global Studies 101**

All students wishing to pursue the concentration should take a section of Global Studies 101 early in their careers. The topics and regions covered will vary and be selective, but all will be designed to place cultural, political, economic and technological issues in conversation with one another to illustrate the necessity of cross-disciplinary and comparative perspectives. On occasion, students may petition to substitute a course equivalent in scope to Global Studies 101 to meet this requirement.

**TRACKS**

After taking Global Studies 101, students are asked to select a track that will structure their global studies curriculum. There are two types of track. The first focuses on a particular region of the world or a contact zone where multiple communities encounter one another. The second type is organized thematically and permits students to explore a cultural, political, economic or technological issue globally and comparatively. Each track is administered by faculty teaching in that track in consultation with the advisory committee. At present the program consists of the following tracks:

- **Area Tracks**
  - African Studies
  - East Asian Studies
  - Latin American Studies
  - Middle Eastern Studies
  - Russian and Eurasian Studies
  - South and Southeast Asian Studies

- **Thematic Tracks**
  - Borders, Exile and Diaspora Studies
  - Economic Development Studies
  - Urbanizing World

To fulfill the requirements of a track, students must complete three approved courses from at least two disciplines, take a comparative course (i.e. a course that might not cover material directly dealing with the track, but would enrich a student’s engagement through comparative inquiry), and address their track in their senior exercise. Faculty in each track may set an additional requirement of a level of language competency for its concentrators. Students may petition to disqualify courses completed on approved study away programs to fulfill elective requirements. Students may not count a course toward more than one requirement in the track.

- **Senior Exercise**
  - All concentrators must complete a senior exercise. The senior exercise will be a substantial piece of writing (20-25 pages) that draws together concentrators’ disciplinary skills and their expertise in their track. It might be work done in the context of a senior capstone course in a relevant department or in the context of a shared seminar sponsored by the Global Studies program. Concentrators will present their final senior exercise in class or in the Global Studies Colloquium.

- **Global Studies Colloquium**
  - Concentrators are required to attend fifteen (15) sessions of the Global Studies colloquia in their senior year, and are urged to do so throughout their careers at Williams. The colloquium meets weekly, on Tuesdays between 2:45 to 3:45 pm, and is designed to feature faculty, students, CDE fellows and outside speakers addressing issues of interest to Global Studies concentrators and faculty.

**HONORS**

A candidate for honors in Global Studies must maintain at least a B+ average in the concentration and be admitted to candidacy by the program faculty. An honors candidate must complete their project in a semester (and Winter Study). An honors candidate will prepare a forty-page thesis or its equivalent while enrolled in the senior thesis course, 491 or 492 (and Winter Study). This course will be in addition to the courses required to fulfill the concentration.

A student wishing to become a candidate for honors in Global Studies should secure a faculty sponsor and inform the program chair in writing before spring registration of her/his junior year.

**STUDY AWAY, RESEARCH AND INTERNSHIPS**

Although not a requirement, study away, research and or relevant internships are an essential component of Global Studies. Where relevant to the curriculum plan of concentrators, the program Chair, in coordination with the Study Away Advisor and the Career Center, will advise students on opportunities in these areas.

You can find general study away guidelines for Global Studies [here](#).

**Students can check with the program chair to see if other courses not listed here might count as electives.**

This survey course addresses the main economic, religious, political and cultural trends in the modern Middle East. Topics to be covered include the cultural diversity of the Middle East, relations with Great Powers, the impact of imperialism, the challenge of modernity, the creation of nation states and nationalist ideologies, the discovery of oil, radical religious groups, and war and peace. Throughout the course these significant changes will be evaluated in light of their impact on the lives of a variety of individuals in the region and especially how they have grappled differently with increasing Western political and economic domination. This course is part of the Exploring Diversity Initiative because it compares the differences and similarities between different cultures and societies in the Middle East and the various ways they have responded to one another in the past.

Class Format: lecture/discussion

Requirements/Evaluation: evaluation will be based on participation, 2 short papers, quizzes, midterm and final exam

Extra info: may not be taken on a pass/fail basis

Prerequisites: none; open to all

Enrollment Preferences: completion of course admission survey if oversubscribed

Enrollment Limit: 40

302
This course will help students understand the US role in the world. US wealth and military power force its leaders to make choices that no other leaders in the world confront. Students will learn to evaluate the decisions that US leaders have made on a wide range of difficult foreign policy issues, including: rising Chinese power; Russian moves in Ukraine; nuclear proliferation to Iran; terrorist threats; humanitarian disasters in Syria and Libya; and long-term challenges like climate change. We will not only describe American involvement in various international issues but also seek to understand the reasons why the US perhaps should or should not be involved, and we will see why such careful reasoning only sometimes gains traction in actual US foreign policy debates. Finally, we will assess whether US foreign policy decisions are coherent - that is, whether the US can be said to follow a "grand strategy." By the end of the course, students will develop their ability to think about foreign policy issues, improving their ability to participate in public life as engaged citizens.

Class Format: lecture

Requirements/Evaluation: papers, participation, and exam

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

GBST 117 Bombay/Mumbai: Making of a Modern Metropolis (W)

Crosslistings: HIST 117/ASST 117/GBST 117

Bombay or Mumbai is India's foremost urban center and is well known today as a truly global city. It is the heart of India's commercial life comparable in vibrancy and multiculturalism with the world's emerging cities like Shanghai, Hong Kong and Sao Paulo.

What are the historical elements that contributed to the making of India's most modern and global metropolis? What are the antecedents of the modernity, the vibrant culture, dark underbelly and economic diversity that characterize Bombay today? What does the history of Bombay tell us about modernity in India and the emerging countries of the third world in general?

This seminar will help students to answer these questions through historical materials on Bombay as well as a wide range of multimedia sources including cinema, photography and literature. With a focus on the 19th and 20th centuries, we will explore themes like the commercial culture of a colonial port city, the modern public sphere, theatre and film, labor migration, public health and prostitution to understand what went into the making of this modern metropolis.

The primary objective of this course is to introduce students to a wide range of historical sources and ways of interpreting them. The other objective is facilitating their understanding of the history of modern India through the history of its most important city.

Class Format: seminar

Requirements/Evaluation: assessment will be based on class participation and weekly responses to readings; 2-3 short papers, leading to an oral presentation and final paper

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

GBST 141 Bandits and Warlords

Crosslistings: PSCI 141/GBST 141/LEAD 141

A leading scholar once quipped that political communities "qualify as our largest examples of organized crime." He wasn't far off: governments are meant to protect their citizenry, but as the #bringbackoursgirls or the KONY 2012 campaigns reveal, sometimes they fail. Bandits at large, racketeers flourish, and warlords replace governments. By looking at Boko Haram, Séléka rebels, Al-Shabaab, Somali pirates and the Lords Resistance Army, this course explores the conditions that lead to the collapse of government protection and its replacement by bandits and warlords. We will then use this understanding to examine prominent examples of banditry and warlordism in Latin America, the Middle East and Europe.

Class Format: lecture

Requirements/Evaluation: class participation, five short papers and a final exam

Extra Info: may not be taken on a pass/fail basis

Prerequisites: none; open only to first-years and sophomores

Enrollment Preferences: first-years

Enrollment Limit: 50

Distributional Requirements:
GBST 213 From Putin to Pussy Riot: Discourses of Post-Soviet Gender (D)
Crosslistings: RUSS 213/GBST 213/WGSS 214/COMP 257
Before 1991, Russians typically appeared in the Western media as macho villains in the nuclear arms race or a James Bond film. Today, however, news from the Former Soviet Union often sounds like a bizarrely gendered media stunt. For example, Russian president Vladimir Putin has been photographed tosples while fishing on vacation in Siberia, while the feminist punk-rock collective Pussy Riot protested Putin’s regime by performing in day-glo balaclavas in Russia’s largest cathedral. This course examines related post-Soviet media spectacles in the attempt to understand the Western press’s fascination with Russia, as well as key social trends defining the post-Soviet era. We will focus on the ways in which gender and sexuality have come to mark post-Soviet culture and discourse as different from those in the West. In addition to Vladimir Putin and Pussy Riot, we will consider the so-called crisis of masculinity in post-Soviet Russia, the trafficking of women from the Former Soviet Union, the Ukrainian feminist collective Femen, the Eurovision Song Contest, and the 2013 legislation in the Russian Federation banning homosexual propaganda among minors. We will try to understand how Soviet media spectacles in the attempt to understand the Western press’s fixation on Russia, as well as key social trends defining the post-Soviet era. We will focus on the ways in which gender and sexuality have come to mark post-Soviet culture and discourse as different from those in the West. In addition to Vladimir Putin and Pussy Riot, we will consider the so-called crisis of masculinity in post-Soviet Russia, the trafficking of women from the Former Soviet Union, the Ukrainian feminist collective Femen, the Eurovision Song Contest, and the 2013 legislation in the Russian Federation banning homosexual propaganda among minors. We will try to understand how masculinity, tolerance of sexual minorities, and performed gender, have been deemed dangerous in the post-Soviet East at the very time they have attained normative status in the West.
This course is part of the Exploring Diversity Initiative because it engages in cultural comparison, explores how power and privilege are allocated differently in post-Soviet societies than in Western liberal democracies, and engages in the critical theorization of post-Soviet culture and discourse. All readings will be in English.
Class Format: seminar
Requirements/Evaluation: active participation in class discussions, response papers based on assignments for class, 2 papers (3-5 pages each) on relevant current events in the post-Soviet world, and a final project

GBST 216T(S) Urbanism in the Ancient World (D) (W)
Crosslistings: ANTH 216/GBST 216
This is a course on cities in the ancient world, which will examine four major ancient urban centers (Nineveh and Nimrud, Iraq, Teotihuacan, Mexico, and Angkor, Cambodia) and end with a sustained, in-depth exploration of urbanism in prehispanic Maya civilization. As more and more people move into cities across the world, human societies are becoming forever transformed. This transformation has bound human roots at the beginning of the first civilizations in Eurasia and the Americas. We will delve into the nature of the urban transformation by first exploring sociological and anthropological definitions of urbanism, and recent studies of modern urbanism. We will look at Nineveh, Nimrud, Teotihuacan, and Angkor to consider how ancient urbanism was distinct from modern cities, while at the same time, ancient urbanites had to deal with similar issues as residents of modern cities. We will then examine in more depth the cities of prehispanic Maya civilization, answering such questions as: how different were Maya cities from other premodern ones? Is there one type of Maya city or many? How different was life in Maya cities from life in Maya villages? What were the power structures of Maya cities? How common were immigrants and slaves in these ancient cities?
This course fulfills the Exploring Diversity Initiative through a comparative study of urban cultures and societies across the world in premodern times, and by theorizing how power and privilege inequalities were manifested and dealt with in these ancient cities.
Class Format: tutorial
Requirements/Evaluation: 5-page papers every other week, oral responses on alternate weeks; tutorial attendance is required

GBST 220(S) World War II in Russian Culture
Crosslistings: RUSS 220/COMP 285/GBST 220
This course examines how Russian literature and film have depicted World War II since the war period to the present. The enormous impact of the war on the Russian and Soviet population through loss of life and trauma has been definitive for Russian national identity. As living memory of the war’s survivors recedes with their passing, literature and film continue to shape the collective memory of the war for subsequent generations. We will study the complex and varied experiences of the war on the frontlines and in the country’s interior; by men, women, and children; by Russians and by people of other ethnicities of the USSR. In assessing the narratives and images of the war in journalism, novels, and film, we will identify their formal achievements within the particular parameters of a given medium or genre. We will also consider the political and ideological dimensions of the war’s significance in the USSR and in post-Soviet Russia. The course explores the renewed and contested legacy of the war not only in the evolving genres of fiction and film, but also in recent public celebrations of Russia’s victory in the war.
Class Format: seminar
Requirements/Evaluation: active class participation, research paper, final exam

GBST 221 The Making of Modern South Asia: 1750-1950 CE
Crosslistings: HIST 221/ASST 221/GBST 221
This course focuses on the history of South Asia with the aim of providing an overview of the political and social landscape of the region from the end of the Mughal Empire through British colonial rule and the Partition of India and Pakistan. We will explore a range of themes including the rise of colonialism, nationalism, religion, caste, gender relations, and the emergence of modern social and political institutions on the subcontinent. In addition to reading key texts and historical primary sources on the specific themes, we will also work with a variety of multimedia sources including films, short stories and website content.
One objective of this course is to introduce students to the different political and social processes that led to the creation of India, Pakistan and Bangladesh; another is to teach students to think critically about the significance of history and history writing in the making of the subcontinent.
Class Format: lecture/discussion
Requirements/Evaluation: class participation, response papers (2-3 pages), two short essays (4-5 pages), midterm and final exams

GBST 222 European Union Politics
European Union Politics focuses on the origins and developments of the European Union (EU). Based on its 28 member states of democratically elected governments, the EU may represent a normative power in European and international politics, but also a more or less coherent foreign policy actor in the areas of democracy, development, humanitarian assistance, security and trade. The EU is rooted in the ashes of the Second World War with the overall purpose to maintain peace and order in Europe. Since then, the EU has widening number of member states, including former post-communist Europe, and deepened to include numerous of policy-areas beyond security. Today, the EU is a unique regional integration project; a hybrid of intergovernmentalism and supranationalism, with capability to coordinate interests and politics of the member states, but also promoting ‘European’ interests and values abound. This course is designed to introduce you to the (a) historical developments of the EU, (b) the EU institutions and decision-making procedures, (c) the EU policy areas and the interests and influences of the EU member-states and (d) the role of the EU in international politics.

Class Format: lecture

GBST 230(F) Who was Muhammad? (D)
Crosslistings: REL 230/ARAB 230/GBST 230
Considered the Messenger of God, Muhammad is a central character of the Islamic tradition and has been the object of love and devotion for centuries. Recent outsiders sparked by controversial cartoons depicting Muhammad have made clear that he remains a revered and controversial figure even today. This course takes a critical historical perspective to the biographies of Muhammad, the founder of Islam. Rather than focus on the ‘facts’ of his life, we will think about the ways in which historical context, political interests, and shifting conceptions of religion have influenced the way in which Muhammad has been imagined and remembered. We will also consider the ways in which Muslim and non-Muslims biographies of Muhammad are intertwined and interdependent, often developing in tandem with one another. By exploring Muslim and non-Muslim, pre-modern and modern accounts of Muhammad’s life, we will think about the many ways in which Muhammad’s life has been told and re-told over the centuries. In this course we will consider some of the following depictions of Muhammad: Muhammad as the object of ritual devotion; Muhammad as statesman and military leader; Muhammad’s polygynous marriages and his young wife, Aisha; Muhammad as social reformer and revolutionary. Course readings will include pre-modern biographies (in translation) as well as contemporary Muslim and non-Muslim biographies.
Class Format: seminar
Requirements/Evaluation: reading responses, 3 short essays (3-4 pages double-spaced), and final exam

GBST 247(F) Altering States: Postsoviet Paradoxes of Identity and Difference (W)
Crosslistings: SOC 248/GBST 247/RUSS 248
Critics and apologists of Soviet-style socialism alike agree that the Soviet ideology was deeply egalitarian. Putting aside for a moment the very reasonable doubts about how justified this perception actually was, it is still worth asking, how did people who lived in the world in which differences in rank, class, gender or ethnicity were not supposed to matter, make sense of their postsocialist condition, one in which new forms of difference emerged, and old ones assumed greater prominence? And how do we account for the differences impacting different societies, such as the Russia-Ukraine conflict or the persistent tensions between East and West Germans? This tutorial will examine new dilemmas through ethnographic studies and documentary films that aim to capture in real time the process of articulating and grappling with newly discovered divides. We will focus especially closely on Russia, but will also read studies on East Germany, Bulgaria, Ukraine and Poland. This course fulfills the EDI requirement by exploring comparatively the ways in which people in different countries made sense of the social, cultural and political heterogeneity of the postsocialist condition.
Class Format: tutorial
Requirements/Evaluation: 5-page paper every other week; comments on the partner’s paper in alternate weeks

GBST 248 Body Politics in South Asia: Gender, Sex, Religion, and Nation (W)
Crosslistings: REL 248/ASST 248/ANTH 248/WGSS 249/GBST 248
This course examines the relationship between body, gender, sex, and society in South Asia, using three countries and religions—India, Sri Lanka, and Bangladesh—and Hinduism, Buddhism, and Islam—as its foil. The course uses the body as a lens by which to unpack South Asian discourses that link body and sexuality with nation, community, and population. In particular, it explores a South Asian sociology that links individual and social bodies in ways that occasion solidarity as well as social suffering, violence as well as communal cohesion. How do bodies come to signify the purity or prosperity of the nation or community and with what social or discursive effects? We begin by unpacking foundational theories of the body as proposed by Mauss, Foucault, Douglas, and Bourdieu in order to better understand how local discourses of the body help produce gender and other social hierarchies in South Asia. By considering how the human body can serve as a map for society and vice versa, we examine both classical discourses and modern interpretive practices of the body including the temple, the monastery, the mosque, and the mendicant, as well as bodily practices such as yoga, celibacy, sex work, and new reproductive technologies. We also analyze how the body has served as a symbol of nation, community, and social health. Throughout, we are interested in the cross-cutting effects of gender and sex in perpetuating structural hierarchies and social suffering around the body in South Asia.
Class Format: seminar
Requirements/Evaluation: the course has weekly writing, more than 20 pages total, and there is student-faculty busy work every weekend including a week dedicated to a one-one writing feedback session between student and instructor

GBST 249 From Beetroot to Zero Grazing: Comparative Response to AIDS in Africa
Crosslistings: PSCI 249/GBST 249
As AIDS in African countries grew from a few cases in the mid-1980s to more generalized levels by the mid-1990s, government policy varied widely. Consider that while Kenyan medical officials denied the existence of AIDS (insisting that the four deaths reported in the press were due to skin cancer), in Senegal, President Diouf openly acknowledged AIDS and launched a national prevention and control program. South African President Mbeki and his health minister questioned whether HIV causes AIDS and suggested a garlic, beetroot, and lemon concoction as treatment, while in Uganda, President Yoweri Museveni developed a successful home-grown ‘Zero Grazing’ campaign. Why did some African governments respond early and aggressively to AIDS, while others did essentially the opposite? What has worked and what hasn’t in the fight against AIDS in African countries? Has political liberalization improved the responsiveness of African governments to AIDS? In this course we aim to better understand how politics and social factors shaped African countries’ responses to AIDS.
Class Format: lecture
Requirements/Evaluation: active participation in class discussions, 4 short papers (4-5 pages), and a final project
Extra Info: may not be taken on a pass/fail basis

GBST 252(F) Pillars of Apartheid—Race and Ethnicity in South Africa
Crosslistings: GBST 252/PSCI 252

A fundamental liberal tenet is that a person is, first and foremost, an individual and everything else about a person follows from that. In contrast, for South Africa's apartheid ideology, a person was primarily a member of a group (racial or ethnic) and this fact alone, defined a person's status in society. As a result, South Africa under apartheid was characterized by a four-fold classification of citizens based on race and ethnicity. In the first place, there was a broad division between blacks and whites. In addition, blacks were further subdivided into a hierarchical structure of colourheads (mixed race), Asians (largely of Indian origins) and Africans (indigenous blacks). This hierarchy defined one's political and economic status. Blacks were further subdivided into nine "tribal" groups. There was political and economic advantage in a descending order, to each group of whites, coloureds, Indians and Africans. This course explores this fundamental principle and its theoretical and practical implications for the South African society. It begins with an analysis of conceptions of race and ethnicity according to various actors in the country. The main thrust of the course is two-fold, namely, the practical application of this principle in the country's political, social and economic policies as well as the response of the oppressed through their liberation movements.

Class Format: lecture

GBST 303(F) A History of Islam in Africa (D)

Crosslistings: HIST 303/REL 303/AFR 303/ARAB 303/GBST 303

This course examines the history of Islam in Africa from the seventh century to the present. We will start off by looking at the spread of Islam in different parts of Africa. We will then analyze the social, political, economic, and cultural impact of Islam on African societies, the interaction between Islam and indigenous African institutions, the Islamic revolutions in the nineteenth century, the impact of European colonial rule on Muslim societies, and the development of Islam in the post-independence period. We will also examine how African Muslims reconstructed and asserted their religious identities by localizing Islamic intellectual traditions, healing practices, music, arts, cultural norms, and formal and informal religious festivals. By the end of the semester, students should be able to appreciate Islam's common framework as well as its diversity and dynamics within that larger framework and over time. This EDI course will explore the experiences and expressions of the culturally diverse peoples of African descent in the New World (and the Old), as well as the myriad ways in which they confront, negotiate, and at times challenge dominant U.S. and/or European hierarchies of race, culture, gender and class.

Class Format: seminar
Requirements/Evaluation: two 7-page papers and one 12- to 15-page paper
Prerequisites: none

GBST 340(S) African Diaspora Religions in the Americas and the Caribbean

Crosslistings: AFR 340/GBST 340/REL 340

Over the last century, historians, social scientists, and religionists have labored to discover the meaning of African dispersal beyond the African continent and its accompanying spiritual lineages. What did it mean to move from the African continent (as opposed to the Australian continent, for example)? What theories of encounter sufficiently adjudicate the synthetic religious cultures of African descended peoples in North America, South America, and the Caribbean? What are the cross-disciplinary methodologies that scholars utilize to understand African religious cultures in the Western Hemisphere? First, this brief introductory course will emphasize African Religious Studies. This background will inform the second and primary objective of the course: privileging knowledge, place, and performance as central lenses for thematizing and exploring West and Central African religious traditions housed in the Americas. We will cover diverse African diaspora religious traditions including Conjure, Dagara, Kumina, New Orleans Voodoo, Spiritual Baptist, Winti, and Yoruba (Candomblé, Ifa, Lucumí, and "Orisha-
Vodu*). We will also explore other African diasporic religious sensibilities that transgress regional and institutional boundaries.

**Class Format:** seminar

**Requirements/Evaluation:** evaluation will be based on class participation, discussion leadership, two scholarly journal entries, and a final seminar paper of 18-20 pages (which will require working in stages on a proposal, an 8-page draft, and a 15-page draft)

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**Prerequisites:** none

**Enrollment Preferences:** Africana Studies concentrators

**Enrollment Limit:** 15

**Expected Class Size:** 15

**Distributional Requirements:** Division 2

---

**GBST 341(S) Caste, Race, Hierarchy (D)**

**Crosslistings:** ANTH 341/AFR 341/ASST 341

Caste in India looms large in global social thought as a kind of benchmark against which hierarchical social systems across the world are measured. This prominence has much to do with British colonial ideologies of rule, but it also has a deeper and different history: the Buddha compared caste to Greek slavery, early modern Jesuits related it to the system of European estates, and since the nineteenth century, anti-caste radicals from Dalit, or "untouchable," backgrounds have drawn a sustained comparison between the forms of oppression they face and those with which African Americans contend in the United States. Reciprocally, thinkers from W.E.B. DuBois to Toni Morrison have deployed the categories of caste in their writings on race. What can the study of caste in postcolonial South Asia contribute to global debates over the persistence of "traditional" forms of social hierarchy? What are the stakes of bringing caste and race into the same conversation, and what are the implications of refusing to do so? In this seminar we will acquire a thorough grounding in the anthropological literature on caste and then investigate the politics of the caste-race comparison over the last hundred years. Assignments include weekly postings of 1-page critical response papers and either a research paper or an interview-based, ethnographic final project, examining "caste" in one's own community. In its engagement with hierarchy in our various communities, and in its critical theorization of the commensurability (or not) of distinctive systems of inequality, the course fulfills the ED requirement.

**Class Format:** seminar

**Requirements/Evaluation:** weekly postings of 1-page critical response papers and research paper or ethnographic final project

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**GBST 343 Spectacles on His Nose and Autumn on his Heart: The Oeuvre of Isaac Babel (D)**

**Crosslistings:** RUS 343/COMP 343/JWST 343/GBST 343

Known alternatively as "master of the short story" and "Russian Maupassant," Isaac Babel was not only one of the most celebrated and intriguing authors of early Soviet Russia, but also a cultural figure of profound national and international significance. For a number of reasons (political, aesthetic, professional, ethical) Babel was not prolific and this will allow us to read almost all of his creative output, something we rarely get to do in the course of a single semester. Babel's writing is extremely varied—it includes sketches, journalistic prose, short stories, plays, movie scripts, one unfinished novel—and richly intertextual. This will afford us the opportunity to read the work of some of his contemporaries and predecessors, from both Russia and abroad, with whom he fashioned brilliant literary conversations, among them Gue de Maupassant, Anton Chekhov, Sholem Aleichem, and Ivan Turgenev. Babel saw self-definition in the core of his writing and as an EID offering, this course will ask students to reflect on what it meant to be a Russian, a Jew, and a non-party author—an outsider, insider, and problematic hybrid rolled into one—whom he highly unsettled, and unsettling, 1920s and 1930s. All course readings will be in translation, but students are highly encouraged to read in the original (Russian, French, Yiddish) whenever possible.

**Class Format:** seminar

**Requirements/Evaluation:** active class participation, frequent short writing assignments, a final project, and an oral presentation

**Prerequisites:** none

**Enrollment Preferences:** Russian and Comparative Literature majors, Jewish Studies and Global Studies concentrators

**Enrollment Limit:** 12

**Expected Class Size:** 10

**GBST 368(S) Miracle?: The Demise of the Apartheid System**

**Crosslistings:** GBST 368

In February 1990, the last apartheid President, F W de Klerk, in a major policy speech in Parliament, announced changes to the apartheid system. Until then, South Africa was locally and globally known for its racist, repressive and authoritarian political system. Four years later, the former white minority system was replaced by a democratic system in which, for the first time, the black majority could participate in a free and fair elections and enjoy rights taken for granted in many democracies. The end of apartheid and the emergency of universal franchise has been described by some commentators as a "South African miracle". This historical process was significant for three reasons. Firstly, it was remarkable that 18 parties, all largely erstwhile enemies with very little in common, agreed to meet and map out the future of the country jointly. Secondly, it is noteworthy that they even agreed on a common agenda. Finally, that an agreement was ultimately reached, leading to elections and the adoption of a national constitution, was in itself, short of remarkable. Was this development a miracle? What explains this atypical and very rare transfer of power from a highly privileged minority to the majority by mutual agreement? This course explores a complex range of international, regional and domestic factors that contributed to this land-mark negotiation process. What were the strengths and vulnerabilities of the various parties? The course concludes with the analysis of the conduct of the negotiators and the agreement reached.

**Class Format:** seminar

**Requirements/Evaluation:** research paper

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**GBST 391 When India was the World: Trade, Travel and History in the Indian Ocean (D)**

**Crosslistings:** HIST 391/ASST 391/GBST 391

What do Ibrahim Ben Yiju, a Jewish merchant from 11th century Yemen, Ibn Batutah, a Muslim scholar from 13th century Morocco and Captain Kidd, a 17th century English pirate have in common? All three men travelled and lived in the Indian Ocean region! This course explores the history of one of the world's oldest maritime highways that has connected the diverse cultures of Asia, Africa and Europe for millennia, thus making it a vital element in the birth of globalization. Moving away from conventional land-centric histories, we will focus instead on understanding the human past through oceanic interactions. South Asian ports and port cities remained the fulcrum of the Indian Ocean world throughout its history; traders, travellers, nobles, scholars, pilgrims and pirates from all over the world travelled to the Indian coast in search of adventure, spices, knowledge and wealth. Thus we will primarily focus on India's role in the Indian Ocean roughly from the rise of Islam in the seventh century CE through the expansion of various European communities in the region and the subsequent rise of the global economy and colonialism in the nineteenth century. Rather than following a strict temporal chronology we will concentrate on themes such as travel and adventure; trade and exchange; trust and friendship; religion and society; pilgrimage, piracy; the culture of port cities; and food across time.

**Class Format:** seminar

**Requirements/Evaluation:** assessment will be based on class participation and weekly responses to readings, 2-3 short papers, an oral presentation and final paper

**Prerequisites:** none; open to all

**Enrollment Preferences:** none

**Enrollment Limit:** 25

**Expected Class Size:** 15-20

GBST 420(F) Architecture and Sustainability in a Global World (W)
Crosslistings: ARTH 420/ENVI 420/GBST 420/EXPR 420

What does it mean to create a sustainable built environment? What do such environments look like? Do they look the same for different people across different times and spaces? This course takes these questions as starting points in exploring the concept of architectural sustainability, defined as "minimizing the negative impact of built form on the surrounding landscape," and how this concept can be interpreted not only from an environmental point of view, but from cultural, political, and social perspectives as well. Over the course of the class, students will explore different conceptualizations of sustainability and how these conceptualizations take form in built environments in response to the cultural identities, political agendas, social norms, gender roles, and religious values circulating in society at any given moment. In recognizing the relationship between the way things are constructed (technique of assembly, technology, materials, process) and the deeper meanings behind the structural languages deployed, students will come to understand sustainability as a fundamentally context-specific ideal, and its manifestation within the architectural environment as a mode of producing dialogues about the anticipated futures of both cultural and architectural worlds.

Class Format: seminar

Requirements/Evaluation: response papers on class readings (2 pages), leading class discussions, and final project/paper (15-20 pages) and presentation

GBST 483T Freedom in Africa (W)
Crosslistings: HIST 483/AFR 483/GBST 483

This course examines the ideas of major figures in the progressive tradition of African political thought. This emancipatory tradition emerged in societies shaped by racial, cultural, and economic exploitation, forcing both African men and women to address questions of identity and political action. Most members of this tradition also considered the ways in which uneven power relations within African communities shaped the personal and political landscapes. The Africans we will examine in this course drew on resources as varied as Pan-Africanism, Nationalism, Classical Liberalism, Social Democracy, Marxism, Black Consciousness, Negritude and Gender theory, yet each participated, at least implicitly, in the African intellectual project: the meaning of Africa and of being African.

Class Format: tutorial; students will meet with the instructor in pairs for an hour each week; a student either will write & present orally a 5- to 7-page essay on the assigned readings or be responsible for offering an oral critique of their partner's work each week

Requirements/Evaluation: evaluation will be based on the quality of the biweekly papers and oral critiques and a final writing exercise

GBST 488 Gandhi: Nationalism, Philosophy, and Legacy (D) (W)
Crosslistings: HIST 488/ASST 488/GBST 488

This course studies the work and ideas of M.K. Gandhi, one of the most influential thinkers of the non-western world. Gandhi is well known today for his philosophy of non-violence and its application in India’s freedom struggle as well as his influence on the work of leaders like Martin Luther King and Nelson Mandela. Hailed as the ‘father of the Indian nation’, however, Gandhi is not only known for his political ideas but also for his deep engagement with the aspect of everyday human behavior and morality: truth, vegetarianism, sex and celibacy, to name just a few of his obsessive concerns which contributed to making his broader philosophy. It is this commitment to a morally pure life that earned him the title of ‘Mahatma’ or Great Soul in India.

The tutorial will focus on three key aspects of Gandhi: his ideas of nationalism, his contemplations on moral philosophy and on his legacy in modern India. The materials will include a combination of Gandhi’s own writings as well as journal articles, monographs and films. The course will probe questions such as: What was the nature of Gandhiian nationalism? Did it help to integrate the Indian nation? How, if at all, was shaped by Gandhi’s engagements with moral philosophy and human behavior? Was Gandhi truly a Great Soul, a saint or a shrewd politician? In what ways is Gandhi received and remembered by the Indian nation today? How does understanding a figure like Gandhi facilitate our understanding of modern nationalism, citizenship and political action?

Class Format: students will meet with the instructor each week for one hour sessions in pairs

Requirements/Evaluation: every other week each student will write and present orally a 5- to 7-page essay on the assigned readings of that week; students not presenting an essay will write and present a 2-page critique of their partners' work; also a final 10-page paper

HISTORY (DIV II)
  - Chair: Professor THOMAS KOHUT
Research Associates: W. GUNDERSHEIMER, P. STARENKO.
GENERAL STATEMENT OF GOALS
The History Department seeks to cultivate a critical understanding and awareness of the past and the development of our students’ intellectual, analytical, and rhetorical abilities. In pursuit of the first objective, through its curricular offerings the department seeks both to expose students to the richness, diversity, and complexities of human history over long periods of time and in different geographic regions to provide students with the opportunity to explore aspects of the past in depth. At the same time, the department endeavors to develop students’ ability to think historically and to foster in them an appreciation of the contested nature and the value of historical knowledge by confronting them with the diversity of ways in which historians have approached and interpreted the past, engaging them in issues that provoke historical debate, and familiarizing them with the nature and uses of historical evidence. By engaging students in the critical study of the past, finally, the department seeks to develop their ability to formulate historically informed analyses and their analytical and rhetorical skills.

COURSE NUMBERS
The course numbering system used by the History Department reflects the different types and objectives of courses offered at each level. The different course levels are distinguished less by degree of difficulty than by the purposes that the courses at each level are intended to serve and the background knowledge they presume.
First-Year Seminars and Tutorials (102-199): These writing-intensive courses give students an opportunity to explore an exciting historical topic in-depth, learn about the discipline of history, and improve their research and writing skills. Because these courses emphasize the acquisition of skills required for the advanced study of history, they are ideal for students contemplating a major in History.
Each 100-level seminar is normally limited to nineteen students and focuses both on training in research skills (such as using the library, navigating on-line resources, formulating a research question and developing a research agenda, and learning how to use different types of evidence) and on the acquisition of reading skills (such as how to interpret different kinds of historical writing and the arguments historians make). These seminars especially emphasize the importance of writing and include varied assignments that stress the mechanics of writing and revision and focus on issues of argumentation, documentation, and style. Enrollment preference in 100-level seminars is normally given to first-year students and then to sophomores. Each 100-level tutorial stresses the importance of interpreting historical evidence and evaluating the arguments made by historians and likewise fulfills the writing-intensive requirement. Enrollment in these courses is limited to ten students, each of whom is expected to write five or six interpretive essays and present five or six oral critiques of another student’s work. First-year students and sophomores will normally be given equal enrollment preference in 100-level tutorials.
Because first-year seminars and tutorials serve as an introduction to the study of history, only one course of each type may count toward the History major; these courses can also be used to meet the department’s group and concentration requirements.
Introductory Survey Courses (202-299): These courses are open to all students and are intended to provide a basic understanding of the history of peoples, countries, and geographic regions over relatively long time-spans. Most of all, they will provide students with the background necessary for more advanced study in history at the 300 and 400 level. They are offered in either small or large formats, depending on the individual course.
Major Seminars (301): Major seminars explore the nature and practice of history, are required for the degree in History, and are normally restricted to junior History majors. Although these seminars vary in topic and approach, each focuses on the discipline of history itself—on the debates over how to approach the past, on questions of the status of different kinds of evidence and how to use them, and on the purpose of the study of history. Focusing on questions of methodology, epistemology, and historiography, these courses ask: What kind of knowledge do historians claim to produce? What does it mean to study the past? How do historians approach the project of studying the past? Each year several major seminars will be offered. Students who plan to study abroad during their junior year may take their major seminar in the spring semester of their sophomore year (space permitting), and those planning to be away for the whole of their junior year are encouraged to do so.
Advanced Electives (302-396): These advanced, topical courses are more specialized in focus than are the introductory survey courses (202-299) and are intended to follow such courses. Enrollment is often limited. Because these courses may presume some background knowledge, the instructor may recommend that students enroll in an appropriate introductory course before registering for an advanced elective.
Advanced Seminars (402-479): These are advanced courses normally limited in enrollment to fifteen students. Each seminar will investigate a topic in depth and will require students to engage in research that leads to a substantial piece of historical writing. All History majors are required to complete either an advanced seminar (402-479) or a tutorial (480-492). Instructors may recommend prior coursework in the area of the seminar. Preference is given to senior History majors, followed by junior History majors.
Advanced Tutorials (480-492): These are advanced reading and writing courses that offer an in-depth analysis of a topic in tutorial format. Tutorials are limited in enrollment to ten students and preference is given to senior History majors. All History majors are required to complete either an advanced seminar (402-479) or a tutorial (480-492). Instructors may recommend prior coursework in the area of the tutorial. The writing of five or six essays and the oral presentation of five or six critiques of another student’s essays are central to tutorials.
Within each of these levels, courses are further divided by geographical area:
Africa: 102-111, 202-211, 302-311, 402-411
Asia: 112-121, 212-221, 312-321, 412-421
Europe and Russia: 122-141, 222-241, 322-341, 422-441
Latin America and the Caribbean: 142-151, 242-251, 342-351, 442-451
United States: 152-191, 252-291, 352-387, 452-471
Transnational/Comparative: 192-199, 292-299, 398-396, 472-479
ADVISING
Both majors and non-majors are encouraged to talk at any time with the department chair, the department administrative assistant, or any other member of the department about the History major.
All incoming majors will choose a faculty advisor in the spring of their sophomore year. All majors must meet with their advisor in the beginning of the fall semester to develop their Course of Study plan (below), and at the time of the spring semester registration period in order to have their courses and plans for the History major approved. Students who are interested in the senior thesis program or graduate school should contact the faculty director of the Thesis Program. Prospective study abroad students should contact the department’s administrative assistant.

THE MAJOR
The major consists of at least nine semester courses as follows:
- Required Courses in the Major
  - One Major Seminar (History 301)
  - At least one Advanced Seminar (History 402-479) or Tutorial (History 480-492)
Elective Courses
Seven (or more) additional semester courses in History, at least one to be chosen from among three of the following groups:
Group A: The History of Africa
Group B: The History of Asia
Group C: The History of Europe and Russia
Group D: The History of Latin America and the Caribbean
Group E: The History of the Middle East
Group F: The History of the United States and Canada
Group G: Global History
In addition, students must take at least one course dealing with the premodern period (designated Group P in the catalog); this may be one of the courses used to fulfill the group requirement (Groups A-G).
A single course can meet the requirement for no more than one of Groups A through G.

CONCENTRATION IN THE MAJOR
All students are required to adopt a concentration within the History major. Students are responsible for designing their own concentration, in consultation with a faculty advisor, in the fall semester of their junior year. Each student’s concentration will be formally approved by the Department’s Curriculum Committee. A concentration will consist of at least three courses linked by common themes, geography, or time period; only one of those courses can be
particular topics may be deemed unfeasible. Final admission to the thesis proposal must be signed by a member of the department about a thesis topic and secures the faculty member with whom the student has worked in the past. The student therefore consults with a member of the department on a thesis topic and secures the faculty member’s agreement to act as his or her thesis advisor, normally a faculty member whom the student has completed. Students should be aware that, while the responsibility of the student to secure the agreement of a member of the Department at this time. Students who will be away during the spring semester are defined as maintaining at least a B+ average in courses taken for the major.

THE DEGREE WITH HONORS IN HISTORY

Application to enter the thesis program is made by spring registration in the junior year and is based on a solid record of work of honors caliber, normally defined as maintaining an average of at least a 3.5+ and have completed two-thirds of the major. Students who intend to write a thesis submit a proposal to the History Department at this time. Students who will be away during the spring semester of their junior year make arrangements to apply before leaving. Normally, it is the responsibility of the student to secure the geographical, as well as the approval of departmental credit for the thesis program.

Final admission to the thesis program depends on the department’s assessment of the qualifications of the student and the feasibility of the project. Once the student has been notified of admission to the thesis program, he or she registers for History 493, Senior Thesis Seminar, in the fall semester, for History 031 during winter study, and for History 494, Senior Thesis Seminar, in the spring. In addition to researching and writing a thesis of approximately 70-100 pages, students attend special presentations under the History Department’s Class of 1960 Scholars Program.

During the fall, students work regularly on their research and consult frequently with their directors. Throughout the semester, thesis writers also present progress reports to the seminar (History 493). Performance in the seminar is considered in determining students’ continued participation in the thesis program and is taken into account in determining their final thesis grades calculated at the end of the year. Students are required to submit one draft thesis chapter to the thesis seminar and the director of the thesis seminar by the end of the fall semester. During the first week of winter study students present their draft chapter to the thesis seminar and members of the history department thesis committee. Students are deemed to be making satisfactory progress on their research and writing at this point are allowed to continue with the thesis. They devote the entire winter study period to thesis work. They normally conclude their research during winter study and must complete a second draft chapter of their thesis for submission to their advisor and the director of the thesis seminar before the end of winter study. By the beginning of spring semester, the thesis committee formally consults with advisors and makes a recommendation to the department on which students are allowed to proceed with the thesis. Those students continuing with a draft chapter of their thesis present their proposal to the thesis seminar and members of the department’s thesis committee during the early weeks of the second semester.

Completed theses are due in mid-April, after which each student prepares and makes a short oral presentation of his or her thesis at the departmental Thesis Colloquium. Another student who has read the thesis then offers a critique of the thesis, after which the two faculty readers of the thesis offer their own comments and questions, followed by a general discussion of the thesis by students and other members of the department.

LANGUAGE

Study of a foreign language is basic to the understanding of other cultures. Particularly those students who might wish to do graduate work in History are encouraged to enroll in language courses at Williams.

STUDY ABROAD

The History Department considers immersion in and familiarity with a foreign culture not only to be valuable in themselves, but also to provide an important way of understanding the past. Students who major in History therefore are encouraged to study a foreign language and to consider studying abroad during their junior year. Students, when taken as part of a study abroad program that is recognized by the college normally can be used to satisfy departmental distribution and general requirements, up to a maximum of three courses (this limit does not apply to tutorials). Students interested in studying abroad during their junior year may take their major seminar in the spring semester of their sophomore year, and those planning to be away the whole of their junior year are strongly encouraged to do so.

Students interested in studying abroad during their junior year should discuss their plans with a member of the department as well as with the department’s administrative assistant. Approval of departmental credit for courses taken abroad normally must be obtained from the chair or from the administrative assistant prior to the commencement of the study abroad program. You can find general study away guidelines for History here.

HIST 104 Travel Narratives and African History (W) Crosslistings: HIST 104/AFR 104

In a way, all historical thinking and writing deals with travel accounts given that, as many scholars have noted, the past can be likened to a foreign country that the historian can view as a traveler in foreign places. Nevertheless, actual travel narratives—narratives about the actual physical visits of writers to distant lands—for example, the careful and critical analysis because they can be seductive, and they can shape the ways we think about the present—and the past—and of distant lands and cultures. This course discusses Arab, Indian, European, African and African American travel narratives about various regions of Africa since the 14th century. We will mine the travel accounts for descriptions of local contexts. We will also explore what these narratives say about the author’s perceptions of self, home, and “other.” Ultimately, we will investigate the authors’ biases and how the narratives influence both our perception of Africa and the writing of African history. This course is highly interdisciplinary and draws heavily on literary, anthropological, geographic, and historical methodologies.

Class Format: seminar
Requirements/Evaluation: evaluation will be based on class participation, oral reports, 1-2 short papers and a research paper
Prerequisites: none
Enrollment Preferences: first-year students, and then sophomores who have not previously taken a 100-level seminar
Enrollment Limit: 19

HIST 107(S) Introduction to Native American and Indigenous Studies (D) Crosslistings: AMST 107/HIST 107/ANTH 107

This course provides an interdisciplinary introduction to the growing field of Native American and Indigenous Studies (NAIS). We will primarily focus on surveying the historical and contemporary Indigenous issues in the United States, but we will occasionally draw upon parallels from settler states around the world. We will critically engage a wide variety of source materials, including historical documents, legal texts, films, essays, novels, and photographs. The course will explore Indigenous social and political experiences, histories of settler colonialism, constructions of Indigenous status and identity, intellectual histories, artistic production, gender and sexuality, decolonization, and self-governance. This course will highlight the intellectual breadth of Indigenous studies, introducing the field’s key paradigms, theories, and methods. Because it focuses on cross-cultural interaction and power relations, this course satisfies the Exploring Diversity Initiative (EDI) requirement.

Class Format: seminar
Requirements/Evaluation: three essays (approximately 7 pages each) and class participation
Extra Info: may not be taken on a pass/fail basis
Prerequisites: none
Enrollment Limit: 25

HIST 110T The Veil: History and Interpretations (D) (W)

Crosslistings: HIST 110/ARAB 215/WGSS 110

This tutorial will consider the history and the changing meanings of the veil (hijab) and its many manifestations (e.g. burqa, chador, niqab), starting with the earliest religious traditions and the status of women in Islamic law. We will then proceed to explore the role of the veil in modern Western discourses, as well as the ways the veil has been imposed on women in the Middle East, the rise of Islamic feminism and finally consider the emergence and return of the veil in recent years in the Middle East, North America, and other parts of the world. The tutorial is part of the Exploring Diversity Initiative (EDI) because it considers the veil across different cultural areas.

Class Format: tutorial
Requirements/Evaluation: each week each student will either write a 5-7 page essay on a topic of interest to them based on their readings or offer a 2-page critique of their partner’s paper; by semester’s end each student will have written a minimum of 40 pages
Extra Info: may not be taken on a pass/fail basis; not available for the fifth year
Prerequisites: none
Enrollment Preferences: first-years, sophomores and those with demonstrated interest in the Middle East
Enrollment Limit: 10
Expected Class Size: 10
HIST 111 Movers and Shakers in the Middle East (D) (W)
Crosslistings: HIST 111/LEAD 150/ARAB 111
This course examines the careers, ideas, and impact of leading politicians, religious leaders, intellectuals, and artists in the Middle East in the twentieth century. Utilizing biographical studies and the general literature on the political and cultural history of the period, this course will analyze how these individuals achieved prominence in Middle Eastern society and how they addressed the pertinent problems of the day, such as war and peace, relations with Western powers, the role of religion in society, and the status of women. A range of significant individuals will be studied, including Gamal Abd al-Nasser, Mustafa Kemal Ataturk, Ayatollah Khomeini, Muhammad Mossadid, Limm Khülthum, Sayyid Qutb, Anwar Sadat, Naguib Mahfouz, and Huda Shaarawi.

Class Format: seminar

Requirements/Evaluation: evaluation will be based on class participation, short essays, and a final paper

Prerequisites: first-year or sophomore standing; juniors or seniors with permission of instructor

Enrollment Preferences: first-year students, and then sophomores who have not previously taken a 100-level seminar

HIST 115 The World of the Mongol Empire (W)
Crosslistings: HIST 115/ASST 115
By the middle of the thirteenth century, Mongol armies led by Genghis Khan had conquered an enormous swath of territory, extending from China westward to Eastern Europe. Further expanded by Genghis's descendants, the Mongol Empire incorporated a vast range of different peoples and cultures, enhancing communications, trade, and exchange among them. In this course we will examine the "world order" of the Mongol Empire from its origins on the Asian steppe through its expansion, consolidation, disintegration, and legacies for later periods. From a wide range of primary and secondary sources, including travelers' accounts, chronicles, art, and literature, we will investigate the diverse experiences of the Mongol world in different places, such as China, Russia, Persia, and Central Asia.

Class Format: seminar

Requirements/Evaluation: evaluation will be based on class participation, several short papers, and a final research paper

HIST 117 Bombay/Mumbai: Making of a Modern Metropolis (W)
Crosslistings: HIST 117/ASST 117/GBST 117
Bombay or Mumbai is India's foremost urban center and is well known today as a truly global city. It is the heart of India's commercial life comparable in vibrancy and multiculturalism with the world's emerging cities like Shanghai, Hong Kong and Sao Paulo. What are the historical elements that contributed to the making of India's most modern and global metropolis? What are the antecedents of the modernity, the vibrant culture, dark underbelly and economic diversity that characterize Bombay today? What does the history of Bombay tell us about modernity in India and the emerging countries of the third world in general?

This seminar will help students to answer these questions through historical materials on Bombay as well a wide range of multimedia sources including cinema, photography and literature. With a focus on the 19th and 20th centuries, we will explore themes like the commercial culture of a colonial port city, the modern public sphere, theatre and film, labor migration, public health and prostitution to understand what went into the making of this modern metropolis.

The primary objective of this course is to introduce students to a wide range of historical sources and ways of interpreting them. The other objective is facilitating their understanding of the history of modern India through the history of its most important city.

Class Format: seminar

Requirements/Evaluation: assessment will be based on class participation and weekly responses to readings, 2-3 short papers, leading to an oral presentation and final paper

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: first-year or sophomore standing

HIST 119 The Japanese Empire (W)
The largest non-Western empire of modern times, Japan extended its reach to Taiwan, Korea, China, Sakhalin, Southeast Asia, and the South Pacific. This course explores the many contentious political, economic, social, and cultural questions that arise from Japan's imperial project. We will ask what drove imperialist expansion; how the Japanese ruled; who won and lost in economic relations; what various aspects of life were like in the empire; how to understand the dynamics between Japanese settlers and the colonized; what effects empire building had at home in Japan; how to explain the nature of wartime conquests; and what legacies Japanese imperialism and empire left in their wake. Throughout the semester, we will make a point of examining these issues from various standpoints, and we will also read theoretical works that place the Japanese empire in a comparative context. Course materials will include political documents, intellectual treatises, films, memoirs, and literature.

Class Format: seminar

Requirements/Evaluation: evaluation will be based on class participation, response papers, short essays, and a final research paper

Prerequisites: first-year or sophomore standing; juniors or seniors with permission of instructor

Long before the US and its allies fought the recent war in Afghanistan (2001-14), Britain fought three Afghan Wars. Now almost forgotten, dusty reminders of Britain’s imperial past, they were crucial moments in the “Great Game”, the rivalry between the British and Russian empires for supremacy in Central Asia and control of land routes to British India. Largely disastrous for the British, the First Afghan War (1839-1842) resulted in the tragic deaths of some 16,000 individuals, the second (1878-1881) generated considerable domestic discord, and the third (1919) basically ended British influence in Afghan affairs. Nevertheless, they exercised the Victorian imagination and led to numerous cultural productions that will be dissected in our class: illustrated tales of British military exploits proliferated in the press; the children’s writer G.A. Henty turned the conflicts into the stuff of imperial adventure; Rudyard Kipling made the Great Game the backdrop for several works of fiction; military officers, government officials, “lady travelers”, and amateur scholars all mapped the landscape and people of Afghanistan, an endless source of fascination for the Victorians. By interpreting the various forms of documentary evidence, we will not only reconstruct the history of Britain’s wars but dissect the stories Britons told themselves about their Empire and about Afghanistan and its people.

HIST 154T The American Way of War: The First Three Centuries (W)

Is there an historically distinct American way of war? How have Americans experienced warfare? From the earliest days of European settlement through the final campaigns against American Indians west of the Mississippi, Americans have often been at war. Long before the United States became a world power those conflicts had determined many of the basic contours of American society, culture, and nationhood. This tutorial will investigate the nature and development of American wars over the period 1600 to 1900. Though some attention will be paid to the American Revolution and the Civil War, the tutorial will concentrate primarily on lesser known but still historically significant wars, including King Philip's War, the Seven Years War, the War of 1812, Jackson’s Indian Wars, the Mexican-American War, the Plains Indians Wars, and the Spanish American War. All but the last were fought to conclusion in North America itself. How did Americans fight these wars? How did American military institutions establish control over such a huge and varied continent? What role did military institutions play in the development of a distinctive American society? Did war abet social mobility, or lend itself to social control? What role did race play in the creation and sustaining of martial goals? What was the relationship between local military institutions and centralist attempts to create a national or professional army? What was the impact of warfare on American culture, on concepts of masculinity, and national or community images? Despite the fact that Americans have often conceived of themselves as a peace-loving people, war from the beginning has played a key role in shaping their society and nation. It is exactly the nature, meaning, and paradoxes of American wars that this tutorial will attempt to unravel.

Class Format: tutorial; students will meet with the instructor in pairs for an hour each week

Requirements/Evaluation: each student will write and present orally a 7-page essay every other week on the readings assigned for that week; in alternate weeks, students will be responsible for offering an oral critique of the work of their partner

HIST 156 From Pocahontas to Crazy Horse: Representations of Native Peoples in Popular Culture (W)

This class, we will explore a variety of media to interrogate depictions of Native peoples in the United States. By examining popular representations of iconic Native Americans (Pocahontas, Squanto, Sacagawea, and Crazy Horse, among others) in film, children’s literature, websites, statuary and portraiture, etc., alongside scholarly interpretations of their lives, we can parse the creation and evolution of stereotypes about Native peoples and consider the cultural work that such imagery performs. For instance, why is it important to some people to imagine that Pocahontas lived happily ever after with John Smith, or that Squanto gave us the first Thanksgiving? Such national myths are based on kernels of historical reality, but they also elide important details and oversimplify the lives of both Native and European protagonists. By learning more about the complex Native individuals behind the stereotypes, we will face our assumptions, identify the cultural work these images perform, and question why certain portrayals of Native peoples continue to thrive. We will also interrogate other timely and recognizable images such as sports mascots and fictional characters to contemplate the ways that myths about Native peoples (and the stereotypes they engender) continue to affect real people living in this country today.

Class Format: seminar

Requirements/Evaluation: brief response papers (1 page each), short papers (3-5 pages each), and a final paper (of approximately 10 pages); particular attention paid to developing students’ drafting and revising processes as well as improving argumentation and style

HIST 157 From Powhatan to Lincoln: Discovering Leadership in a New World (W)

Crosslistings: HIST 157/LEAD 157/AMST 157

The collision of cultures and peoples in colonial North America created a New World that demanded new forms of political leadership. This course explores the history of leadership from the colonial era to the Civil War through the study of consequential individuals whose actions shaped seminal moments in American history. As often as possible, the course will analyze pivotal leaders to understand the many different forms of leadership that existed throughout American history and how historical contexts affected individual decisions. The course opens with Powhatan, whose Native American empire spanned the East Coast of North America, and John Smith, who confronted this Indian empire as he tried to establish England’s first foothold in the New World, and it ends with Abraham Lincoln, who tried to keep together a nation that Jefferson Davis aimed to destroy. In between, the course will explore colonial leaders like John Winthrop, the first governor of the Massachusetts Bay Colony, African American leaders like Gabriel Prosser, who led a slave rebellion, and Richard Allen, a free black abolitionist; presidents like George Washington and Thomas Jefferson; First ladies like Abigail Adams and Dolley Madison; abolitionists like Harriet Beecher Stowe and Frederick Douglass; and leaders like Anthony, and others. Providing a survey of early American history through the study of these individuals, students will have a deeper appreciation of how historical processes shaped leaders—and how leaders have shaped history.

Class Format: seminar

Requirements/Evaluation: evaluation will be based on class participation, weekly writing assignments, three 5-page essay assignments, and a final paper

Prerequisites: first-year or sophomore standing; juniors or seniors with permission of instructor

Enrollment Preferences: first-year students, and then sophomores who have not previously taken a 100-level seminar

Enrollment Limit: 19

HIST 164(S) Slavery in the United States (W)

Crosslistings: HIST 164/AFR 164/AMST 165

Slavery and freedom rose as concomitant ideologies—simultaneously and interrelated—critical to the development of the American colonies and United States. Few areas of American social, political, and economic history have been more active and exciting in recent years than the study of this relationship. This seminar introduces students to the most important aspects of American slavery, beginning with an examination of the international slave trade and traces the development of the “peculiar institution” to its demise with the Civil War.

Class Format: seminar

Requirements/Evaluation: building on several preliminary essays, each student will complete a research project which leads to a final research paper

Extra Info: in addition to reading key books in the field, students will engage in primary source research using the College library’s extensive holdings of microfilm and local records dealing with slavery

Prerequisites: first-year or sophomore standing; juniors or seniors with permission of instructor

Enrollment Preferences: first-year students, and then sophomores who have not previously taken a 100-level seminar

Enrollment Limit: 19

HIST 165(S) The Age of McCarthy: American Life in the Shadow of the Cold War (W)

The Cold War cast a long shadow over American life in the years following World War II. The relationship between domestic and foreign affairs was particularly acute during the Age of McCarthy, an era marked by growing Soviet-American rivalry abroad coupled with dramatic Red bailing and witch hunts at home. This course explores related aspects of American life from the late-1940s to the late-1950s, ranging from the phenomenon of McCarthyism itself to fallout shelters, spy cases, the lavender scare, nuclear families, the Hollywood blacklist, the religious revival and its implications for foreign policy, Spunkl and the space race, and links between the Cold War and Civil Rights.
Using scholarly books and articles, primary sources, novels, music, and films, we will explore interactions between politics, diplomacy, society, and culture in the Age of McCarthy. In this writing-intensive course, we will focus on analyzing sources, writing clearly and effectively, and making persuasive arguments. Students will not only learn about history, but they will learn to think and write as historians.

Class Format: seminar
Requirements/Evaluation: evaluation will be based on class participation, several short essays, in-class presentations, and a final 10- to 12-page research paper
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

HIST 166(S) Politics and Prose: Invisible Man in Historical Context (D) (W)
Crosslistings: HIST 166/AFR 166/AMST 166
"I am an invisible man." So begins Ralph Ellison's treatise on black life in the U.S. in the middle of the 20th century. Ellison's book *Invisible Man* appeared in 1952, won the National Book Award, and sold as many copies in the halls of Congress, movie theaters, and concert halls and rock festivals in the United States. This first-year seminar will examine some of the major events of this time period in America: the assassinations of Martin Luther King, Jr. and Robert Kennedy, the Democratic Convention in Chicago, as well as cultural trends such as the development of the anti-war movement, the push for curricular reforms on college campuses, and the rise of the "counter culture."

Class Format: seminar
Requirements/Evaluation: evaluation will be based on a number of writing assignments: 2-3- to 5-page response papers, a 5- to 7-page oral history, an annotated bibliography, and a final 10-page research paper
Prerequisites: first-year or sophomore standing; juniors or seniors with permission of instructor

HIST 178T Marriage and the American Nation (W)
Crosslistings: HIST 178/WGSS 178
This tutorial explores the transformation of marriage as an institution, idea, and experience from colonial times through the beginning of the twenty-first century. What is marriage? Is it a legal bond or a religious sacrament? A right or a privilege? Who can enter it? Who determines when it is over, and on what grounds? Examining the long history of American debates about these questions, we will consider the complex ways that beliefs and policies regarding marriage have affected national understandings of gender roles, of racial difference, of the meaning of citizenship, and of the function and reach of government. We will explore many of the controversies associated with marriage over the last 400 years, including interracial marriage, polygamy, divorce, domestic violence, property rights, custody, cohabitation, working mothers, and same-sex marriage.

Class Format: tutorial
Requirements/Evaluation: students meet in wkly 1-hr sessions with the instructor & a classmate; each wk, students will alternate between writing a 5- to 7-pg paper on the assigned readings (presented orally in class) & writing & presenting a 2-pg critique of classmate's paper
Extra Info: the course will conclude with a final paper that examines one of the issues raised in class in greater depth may not be taken on a pass/fail basis
Prerequisites: first-year or sophomore standing; juniors or seniors with permission of instructor
Enrollment Preferences: sophomores, and then first-year students who have not previously taken a 100-level tutorial
Evaluation will be based on a number of writing assignments

HIST 193 Black Power Abroad: Decolonization in Africa, the Caribbean and Europe (W)
Crosslistings: AFR 193/HIST 193
Obama's recent successful bid for the Presidency has reminded Americans of the strong links between African-Americans and Africans and of the international dimensions of the struggle for racial justice. This struggle has its roots in the post-World-War II transformation of the world associated with the decolonization struggles led by individuals like C.L.R. James, Aimé Césaire, Kwame Nkrumah, Franz Fanon and Nelson Mandela. This course will examine this movement, focusing on activists in the Caribbean and Africa, the new ideas and cultural movements they inspired (Pan-Africanism, Negritude, and Socialism), their organizational activities in London and Paris, and their success in breaking free of European imperialist only to be confronted with American and Russian Cold War rivalry. By comparing and contrasting different experiences of independence—in the Caribbean, in independent Ghana, and in anti-apartheid South Africa—this course will grapple with the
ways in which racism, political power, and cultural difference affected relations between Blacks, mulattoes, whites, and Indians in these countries as they fought for independence. The comparative and transatlantic scope of this course, combined with its focus on race relations, power, and privilege helps it meet the requirements of the Exploring Diversity Initiative.

**HIST 203(F) Modern African History (D)**

This course surveys the history of 19th and 20th century Africa. The first section of the course focuses on the European conquest of Africa and the dynamics of colonial rule—especially its socio-economic and cultural consequences. The second section looks at how the rising tide of African nationalism, in the form of labor strikes and guerrilla wars, ushered out colonialism. The third section examines the postcolonial states, focusing on the politics of development, recent civil wars in countries like Rwanda and Liberia, and the growing AIDS epidemics. The last section surveys the history of Apartheid in South Africa up to 1994. Course materials include fiction, poetry, memoirs, videos, newspaper articles, and outstanding recent cultural trends in the modern Middle East. Topics to be covered include the cultural diversity of the Middle East, relations with Great Powers, the impact of imperialism, the challenge of modernity, the creation of nation states and nationalist ideologies, the discovery of oil, radical religious groups, and war and peace. Throughout the course these significant changes will be evaluated in light of their impact on the lives of a variety of individuals in the region and especially how they have grappled differently with increasing Western political and economic domination. This course is part of the Exploring Diversity Initiative because it compares the differences and similarities between different cultures and societies in the Middle East and the various ways they have responded to one another in the past.

**Class Format:** lecture/discussion

**Requirements/Evaluation:** evaluation will be based on participation, 2 short papers, quizzes, midterm and final exam

**HIST 209 The Origins of Islam: God, Empire and Apocalypse**

This course surveys the history of Islam from its origins in the seventh century C.E. as a total break with the past. This course will challenge that assumption by placing the rise of Islam in the context of the history of late antiquity (c. 250–700 C.E.). The first portion of the course will examine the impact of Judeo-Christian monotheism in the ancient world, the rise of confessional empires, articulation of new ideas about holiness and its relation to sexuality and the transformations undergone by Judaism, Christianity, Zoroastrianism and Manichaeism. We shall examine the conversation of these traditions with classical paganism and philosophy, the impact of certain traditions to define rules of interpretation, the impact of ascetic, iconoclastic and apocalyptic ideas and, finally, polemics among the traditions. We will then examine the career of Muhammad (PBUH) in the context of Arabia, the spread of the Islamic empire into Christian and Iranian worlds, the impact of apocalyptic expectations, the fixation of religious decision making within the tradition, the process of conversion, the encounter with the Late Antique heritage and religious diversity within the commonwealth of Islam. The course will end with the fall of the Abbasid Caliphate in 1258.

HIST 212(F) Transforming the “Middle Kingdom”: China, 2000 BCE-1600 (D)
Crosslistings: HIST 212/ASST 212
China expanded from scattered Neolithic settlements to become one of the world’s most complex and sophisticated civilizations. During this process, it experienced dramatic transformation as well as remarkable institutional and cultural continuities. This course will examine Chinese history from prehistoric times to the “early modern” seventeenth century. It will address topics such as the creation and transformation of dynastic authority, the reinterpretation of Confucian thought, the transmission of Buddhism, the conquests of the empire proper by “barbarian” peoples, the composition of elites, and change in daily life, popular culture and China’s place in the East Asian and world systems. This course fulfills the Exploring Diversity Initiative requirement in that it demonstrates the idea of a single, stable Chinese identity throughout history, and focuses instead on the variety of cultures and cultural encounters that contributed to what we currently think of as “Chinese” history and culture.
Class Format: lecture/discussion
Requirements/Evaluation: evaluation will be based on class participation, two short papers, a midterm, and a self-scheduled final exam

HIST 213(S) Modern China, 1600-Present (D)
Crosslistings: HIST 213/ASST 213
Observers may be struck by the apparent contradictions of contemporary China: market reforms undertaken by a nominally Communist government, extremes of urban wealth and rural poverty, increasing participation in the international community and intensifying nationalist rhetoric. This course will examine China’s historical engagement with the modern world in order to gain perspective on our current views. It will cover the Qing (1644-1911) dynastic order, encounters with Western and Japanese imperialism, the rise of Chinese nationalism, Republican and Communist revolutions, the “other Chinas” of Taiwan and Hong Kong, economic liberalization, and globalization. This course is part of the Exploring Diversity Initiative in that it requires students to engage with questions of difference through observing the development of the modern Chinese nation-state from the multi-ethnic empire of the Qing and China’s particular experiences of imperialism in the nineteenth and twentieth centuries.
Class Format: lecture/discussion

HIST 219(S) Japanese Culture and History from Courtiers to Samurai and Beyond (D)
Crosslistings: HIST 219/COMP 229/ASST 219/JAPN 219
This course will introduce students to the history, literature, and artistic culture of premodern Japan, from the time of the first recorded histories in the 800s through the abolition of the samurai class in the late 1800s. We will focus on the politics and aesthetic culture of the ruling elites in each period, from the heyday of the imperial court through the rise and eventual decline of the samurai warrior and the growth of Edo (Tokyo), with its new mode of early modern government and new forms of literature, theater, and art. Team taught by faculty from History and Comparative Literature, the course will examine historical texts alongside works drawn from literature, visual culture, and performing arts, and will ask students to consider how these different kinds of texts can shed light on one another. What is the difference between reading history and reading literature, or is it even meaningful to distinguish the two? By critically engaging in various kinds of textual analysis, this ECO course not only considers the relationship between politics, culture, and society in premodern Japan but also explores how we can attempt to know and understand different times and places. Primary texts will include court diaries, novels, letters, and fiction; laws and edicts; essays and autobiographies; noh, kabuki, and puppet theater; and tea ceremony, visual art, and architecture. Students should register under the prefix specific to the Division in which they want to receive credit.
Class Format: lecture/discussion
Requirements/Evaluation: evaluation will be based on class participation, response assignments, two short papers (approximately five pages each), and a final exam

HIST 220 History and Society in India and South Asia: c. 2000 to 1700s CE
Crosslistings: HIST 220/ASST 222

This course is an introduction to the history of India and South Asia from prehistoric times to the emergence of early modernity. During these centuries, the subcontinent emerged as one of the most diverse and complex regions of the world, as it continues to be even today. The course will cover the period between the rise of the Indus Valley civilization to the end of the Mogul Empire and will address topics such as the "discovery of India", the coming of the "Aryans", society and culture in the great epics like the Ramayana, the beginning of Jain and Buddhist thought, politics and patronage under Islamic polities, the formation of Mogul imperial authority through art, architecture and literature, among others. Through the study of social processes, the course will focus on the diversity and connectedness that have defined the subcontinent throughout its history. It will also consider the role of history in the region and how a number of events from the past continue to inform its present.

Class Format: lecture/discussion

HIST 221 The Making of Modern South Asia: 1750-1950 CE
Crosslistings: HIST 221/ASST 221/GBST 221

This course focuses on the history of South Asia with the aim of providing an overview of the political and social landscape of the region from the end of the Mogul Empire through British colonial rule and the Partition of India and Pakistan. We will explore a range of themes including the rise of colonialism, nationalism, religion, caste, gender relations, and the emergence of modern social and political institutions in the subcontinent. In addition to reading key texts and historical primary sources on the specific themes, we will also work with a variety of multimedia sources including films, short stories and website content.

One objective of this course is to introduce students to the different political and social processes that led to the creation of India, Pakistan and Bangladesh; another is to teach students to think critically about the significance of history and history writing in the making of the subcontinent.

Class Format: lecture/discussion

HIST 222 Greek History
Crosslistings: CLAS 222/HIST 222

Ancient Greece has been thought to embody the origins of Western civilization in its institutions, values, and thought; it has been seen as the infancy of modern society, with the attributes of innocence, purity, and the infant's staggering capacity for wonder and learning; it has been interpreted as an essentially primitive, violent culture with a thin veneer of rationality; and it has been celebrated as the rational culture par excellence. The study of ancient Greece indeed requires an interpretive framework, yet Greek culture and history have defied most attempts to articulate one. We will make our attempt in this course by investigating ancient Greece as a set of cultures surprisingly foreign to us, as it so often was to its own intellectual elite. But we will also come to appreciate the rich and very real connections between ancient Greek and modern Western civilization. The course will begin with Bronze Age Greece and the earliest developments in Greek culture, and will conclude with the spread of Greek influence into Asia through the conquests of Alexander the Great. We will explore topics such as theChecklist of topics to be covered in the course include the following:

- The effects of pervasive war Greek society, the competitive spirit in political and religious life, the confrontations with the East, the relationship of intellectual culture to Greek culture as a whole, Greek dependence on slavery, and the diversity of political and social forms in the Greek world. The readings will concentrate on original sources, including historical writings, philosophy, poetry, and oratory.

Class Format: lecture/discussion
Requirements/Evaluation: evaluation will be based on contributions to class discussions, a midterm, a final exam, and a medium-length paper

HIST 223 Roman History
Crosslistings: CLAS 223/HIST 223

This course examines the development of Roman archaeology and material culture from the early Iron Age, ca. 1000 BCE, to the end of the reign of Constantine in 337 CE. We will explore the development of Roman material culture and its relationship to the surrounding world, both in terms of existing traditions and influences from the East. The course will also consider the role of the city of Rome; however, we will also look at other important urban centers, such as Pompeii, Aphrodisias and Lepcis Magna. Roman art and architecture were not the product of any single people or culture, but rather the hybrid synthesis of complex cultural negotiations between the Romans and their colonial subjects (i.e., Greeks, Jews, Celts, etc.). Class discussions will focus on issues related to gender, ethnicity and cultural identity in the Roman Empire. For example, we will explore what it meant to be "Roman" in terms of language, ethnicity and cultural institutions. We will also discuss how Roman elites used material culture to convey political messages and social status in the imperial hierarchy, as well as the legacy of Roman art and architecture in the modern world.

Class Format: lecture/discussion
Requirements/Evaluation: evaluation will be based on contributions to class discussions, a midterm, a final exam, and a medium-length paper
Prerequisites: none; open to all
Enrollment Limit: 25

HIST 224 Roman Archaeology and Material Culture
Crosslistings: CLAS 224/HIST 224/ANTH 235/ARTH 235

This course examines the development of Roman archaeology and material culture from the early Iron Age, ca. 1000 BCE, to the end of the reign of Constantine in 337 CE. The primary goal of the course is to help students understand the social and historical context in which Roman material culture was created and used. We will consider a variety of evidence from across the empire, including monumental and domestic architecture, wall painting, mosaics, sculpture, coins and inscriptions. Special emphasis will be placed on the city of Rome; however, we will also look at other important urban centers, such as Pompeii, Aphrodisias and Lepcis Magna. Roman art and architecture were not the product of any single people or culture, but rather the hybrid synthesis of complex cultural negotiations between the Romans and their colonial subjects (i.e., Greeks, Jews, Celts, etc.). Class discussions will focus on issues related to gender, ethnicity and cultural identity in the Roman Empire. For example, we will explore what it meant to be "Roman" in terms of language, ethnicity and cultural institutions. We will also discuss how Roman elites used material culture to convey political messages and social status in the imperial hierarchy, as well as the legacy of Roman art and architecture in the modern world.

Class Format: lecture/discussion

HIST 225(S) The Medieval World, 300-1500

The European world saw dramatic changes and the creation of new cultures and societies between the ancient and modern periods. This course will survey more than a millennium of history, beginning late in classical antiquity and concluding at the dawn of the modern era. We will concentrate both on developments within Europe, and on European encounters with Islam, the Byzantine East, and pagan cultures. With an approach that is both chronological and thematic, we will place the broader narrative of medieval history alongside special consideration of Europe's neighbors, social organization, medieval women, religion and piety, and education. Lectures and class discussion will receive equal emphasis.

Class Format: lecture/discussion

Requirements/Evaluation: evaluation will be based upon a series of 500-word papers and weekly quizzes.

Prerequisites: none

Enrollment Preferences: History majors

HIST 227 A Century of Revolutions: An Activists’ Survey of 19th Century Europe and Why It Matters Today

This course offers a non-traditional survey, one focused on the relevance of 19th century Europe for us today. The 19th century is intimately linked to our world citizens of today, both in the perils it bequeathed us—most importantly, widespread global environmental destruction—and in the promise it offers us. Through a century of radical political protest aimed at reconfiguring the world in a more equitable and just direction. We will focus on 19th century activists—Karl Marx, 48’ers, communards, anti-imperialists, socialists, anarchists, feminists, trade unionists and pacifists—and on environmentalists and activists today, as we compare and contrast the movements of the 19th century with possibilities for change today.

Class Format: seminar/discussion

Requirements/Evaluation: evaluation will be based on student participation, a take-home mid-term paper, the completion of an original research paper or project, and the study of and/or participation in a contemporary activist movement.

Prerequisites: none; open to all

HIST 228(S) Europe in the Twentieth Century

This course will offer a survey of some of the important themes of twentieth-century European history, from the eve of World War One to the beginning of the twenty-first century. Organized topically and thematically, the course will consider European society in the fin-de-siecle period; imperialism, racism, and mass politics; the impact of the Great War on European thought, culture and society; the Russian Revolution and Stalinist Russia; economic and political stabilization in the 1920s; the Depression; the rise of Fascism and National Socialism; World War II and the Holocaust; the establishment of postwar social democratic welfare states; decolonization; the “economic miracle” of the 1950s; the uprisings of 1968; the development of the European Union; the 1989 revolutions in Eastern Europe; and the recent debates about Islam in Europe. Through a combination of lecture and discussion, the course seeks to introduce students to the major ideologies and institutions that shaped the lives of Europeans in the twentieth century, and to reflect on the role of ordinary people who devised, adapted, embraced, and sometimes resisted the dominant ideas and practices of their time.

Class Format: lecture/discussion

HIST 229 European Imperialism and Decolonization (D)

Crosslistings: HIST 229/AFR 229

This course surveys European imperialism in the nineteenth and early-twentieth centuries, paying important cases such as British India, the Scramble for Africa, and the break-up of the Ottoman Empire following World War I. Issues to be explored include imperialism and its relationship to Christianity, gender, race, and economic profit. In the second half of the course, we will examine some of the most dramatic cases of decolonization, including Gandhi and Nehru’s independence movement in India, Ho Chi Minh’s victory at Dien Bien Phu, and the torturous struggle for independence in Lumumba’s Congo. As a transatlantic and transpacific course focusing on race relations, power and privilege, this course fulfills the EDi requirement.

Class Format: lecture/discussion

Requirements/Evaluation: evaluation will be based on a midterm, a final exam, a 10-page research paper, and class participation

HIST 230 Modern European Jewish History, 1789-1948

Crosslistings: HIST 230/JWST 230

What does it mean to be Jewish? The mixed question of Jewish identity emerged anew at the end of the eighteenth century in Europe and has dominated Jewish history throughout the modern period. Although Jewish emancipation and citizenship followed different paths in different parts of Europe, in general Jews were confronted by unprecedented opportunities for integration into non-Jewish society and unprecedented challenges to Jewish communal life. Focusing primarily on France and Germany, and to a lesser extent on the Polish lands, this course will introduce students to the major social, cultural, religious, and political transformations that shaped the lives of European Jews from the outbreak of the French Revolution to the aftermath of World War II. We will explore such topics as emancipation, Jewish diversity, the reform of Judaism, competing political ideologies, Jewish-gentile relations, the rise of modern anti-Semitism, the role of Jewish women, interwar Jewish life and culture, Jewish responses to Nazism and the Holocaust, and the situation of Jews in the immediate postwar period. In addition to broad historical treatments, course materials will include memoirs, diaries, and a novel.

Class Format: lecture/discussion

Requirements/Evaluation: evaluation will be based on class participation, two papers, and a final exam

Prerequisites: none

HIST 231 Medieval England

Crosslistings: HIST 231/REL 217

Across the entire world of the Middle Ages, no region has captured the modern pop-culture imagination as much as medieval England. From the Battle of Hastings to Magna Carta, from Braveheart to King Arthur, medieval English history and popular knowledge of the medieval past are closely linked.
This course will survey the history of England from the Roman period through the reign of Richard II (AD 43—1399). We will find a great deal to detain us in these thirteen centuries, including the Anglo-Saxon settlement of England and subsequent conversion to Christianity, the Viking raids of the ninth and tenth centuries, the Norman Conquest, the growth of English common law, the murder of Thomas Beckett, Edward I’s campaigns in Wales and Scotland, the Peasants’ Revolt of 1381, and the beginning of the Hundred Years War. We will focus particularly on power and politics, but primary readings will add important social, cultural and religious context. Our meetings will emphasize lectures and discussion equally. No prior knowledge is expected.

**HIST 240 Muscovy and the Russian Empire (W)**

Between the fourteenth and the seventeenth centuries the princes and political elite of Muscovy created an extensive multi-ethnic and multi-religious empire in Eastern Europe and Asia. Over the next 150 years their imperial heirs transformed and extended this empire, to the point that on the eve of the Crimean War (1853-1855) many believed it to be the most powerful state in Europe. But defeat in the war exposed the weakness of the imperial regime and helped to provoke a process of state-led reform that failed to avert, and may well have contributed to, the collapse of the regime in the February Revolution of 1917. Using a combination of primary and secondary sources, this course will explore the character of the Muscovite and the Russian empires and the forces, processes, and personalities that shaped their formation, expansion, and, in the latter case, collapse.

**Class Format:** lecture/discussion

**Requirements/Evaluation:** class discussion, 5 short essays (5-6 pages), 2 group oral presentations, and a map quiz

**HIST 242 Latin America From Conquest to Independence**

This course will examine the processes commonly referred to as the creation of "Latin America" and will do so from numerous perspectives. Starting with the construction of indigenous societies, from small and decentralized groups to huge imperial polities, we will consider the ways that various Latin American social actors shaped the process of colonization, stressing the multiple and conflicting character of European, indigenous, and African perspectives. Thus looking at the Americas from both the outside-in and inside-out, we will focus on the unequal relations of power that came to define cultural, political, and economic life in the colonies, always with an eye on the gendered and racialized nature of those relations. We will also not only compare very different regions of the Iberian Americas but also see how the grand shifts of history intervened in—and perhaps consisted of—the most normal elements of daily life in northern Mexico, the central Andes, coastal Brazil, and other parts of colonial Latin America. Visual as well as more traditional written primary materials, along with secondary texts and films, will serve as the basis for our discussions throughout the course.

**Class Format:** lecture/discussion

**Requirements/Evaluation:** evaluation will be based on class participation, two short papers (4-5 pages), and a take-home final exam

**Enrollment Limit:** 40

**HIST 243(F) Modern Latin America, 1822 to the Present**

This course will examine salient issues in the history of the independent nations of Latin America. The first two sections of the course will focus on the turbulent formation of nation-states over the course of the "long nineteenth century," from the crisis of the Spanish and Portuguese colonial empires in the late eighteenth century to the heyday of liberal political economies at the turn of the twentieth century. In this regard the course will analyze the social and economic changes of the period up to World War I and the possibilities they offered for both political and social order. Key topics addressed will include caudillismo, the role of the Church in politics, economic dependency and development, and the place of indigenous and African Latin-American peoples in new nations, and industrialization and urbanization. The latter two sections will examine the trend toward state-led national developmental in the twentieth century, considering the diverse forms it took and conflicts it generated in different nations and periods. Here we will take up questions the emergence of workers’ and women’s movements and the rise of mass politics; militarism, democracy, and authoritarian government; the influence of the U.S. in the region; and the life and possibly death of revolutionary options. Within this chronological framework of national and regional political economy, we will consider the ways that various Latin American social actors shaped their own lives and collective histories, sometimes challenging and sometimes accommodating the ideals of national elites. General regional trends will be illustrated by selected national cases, including Mexico, Brazil, Argentina, Cuba, Chile, Venezuela, Nicaragua, and Guatemala.

**Class Format:** lecture/discussion

**Requirements/Evaluation:** evaluation will be based on class participation, two short papers (3-5 pages), and a take-home final exam

**Prerequisites:** none

**HIST 244 Latin America in the Contemporary World**

This course will examine Latin America in the contemporary world through the lens of the history of the region, focusing on the United States’ geopolitical interests in the region. The course will focus on four periods: the imperial period to 1822; the ages of revolution, independence, and its aftermath from 1600 to 1822; the ages of nation-state from 1822 to 1940; and the contemporary world from 1940 to the present. The course will examine the history of Latin America through a variety of lenses, including gender, race, and class, and will posit this history as an essential part of World History.

**Class Format:** lecture-discussion

**Requirements/Evaluation:** evaluation will be based on class participation, two short papers (3-5 pages), and a take-home final exam

**Prerequisites:** none

**Enrollment Limit:** 40

**Expected Class Size:** 25

HIST 245 History of Modern Brazil (D)
Crosslistings: HIST 245/AFR 346
Brazil has been “the country of the future” far longer than it has been an independent nation. Soon after Europeans descended on its shores, Brazil was hailed as a land of resources so rich and diverse that they would inevitably produce great wealth and global power for its inhabitants. Although this has often lent a booster-ish quality to its descriptions of the country, it has also brought ambiguity—for if the label suggests Brazil’s potential, it also underlies its country’s failure to live up to that promise. Being an eternal “country of the future” must be as much a troubling as a cheering designation. This course will examine the modern history of that country of the future by taking up major themes from independence to the present. Beginning with what surveys by Latin American standards an easy transition from colony to independent empire, we will analyze the hierarchies that have characterized Brazilian society and their relation to the political and economic evolution of the Brazilian nation-state. The course will give particular attention to the themes of race, gender, and citizenship; national culture and modernity; and democracy and authoritarianism in social and political relations. Combining cultural, political, and social analyses, this course fulfills the Exploring Diversity Initiative requirement by examining a range of written texts and other sources to understand these and other themes in the lives of Brazilians of different social identities and political standings since Independence.

HIST 252(S) From Contact to Civil War: A History of North America to 1865
This course will provide a survey of North American history from Europe’s first expansion into the New World to the American Civil War. Cast as a contest between competing empires and their peoples, the course begins in Europe and the Native North America before contact and studies the expansion of European nations into the New World. The course will emphasize the history of British North America and the interactions between and among the many peoples of colonial North America to the Civil War, and consequence of the American Revolution (or what many at the time considered America’s first civil war). The new nation unleashed massive and far-reaching economic, social and political changes. The last third of the course will explore these changes in the antebellum era and trace how they affected the coming of America’s second civil war.

Carmen Whalen
HIST 262 The United States and the World, 1776 to 1914

From its foundation in 1776 to the beginning of World War I in 1914, the United States developed a complex of ideas for understanding—and methods for securing—its place in the world. During this period, the nation’s diplomacy went through several phases as it made the transition from a young republic struggling to conduct its diplomacy, to an expansionist power in the first half of the twentieth century, to an ally in the Second World War, and then to an imperialist power after the Spanish-American War. Amidst these events, U.S. statesmen and citizens constantly debated the country’s proper diplomatic role and struggled to construct and propagate a unique American ideology, as well as an advantageous geo-strategic position, on the global stage. Debates about foreign relations were imbued with questions of race, nation, independence, religion, economy, gender, and geographic expansion; indeed, defining U.S. foreign relations was a means of defining the nation itself. Through a variety of primary sources and scholarly books and articles, this course will examine U.S. relations with external powers as well as the interactions that occurred between U.S. domestic and foreign policy during this period.

HIST 280 African-American History, 1619-1865 (D)

This course provides an introduction to the history of African Americans in United States during the colonial, early republic, and antebellum eras. The course demonstrates how economically, culturally, and politically, African Americans shaped and were shaped by the historical landscape of the nation. The experience of enslavement necessarily dominates this history, and it is the contours and nuances of slavery—and the development of racial classifications—that give this course its focus. But with a attention centered on African Americans, the course also explores African cultural influences, the significance of gender, the lives of free blacks, and the cultural and intellectual significance of the abolitionist movement. The course closes on the themes that emerge from the war between the states, and on the meaning of freedom and emancipation. Our readings will include primary sources and secondary literature. Class meetings will combine lecture and discussion. Informed participation in class discussion is essential. This EDI course explores the experiences and expressions of the culturally diverse peoples of African descent in the New World (and the Old), as well as the myriad ways in which they confront, negotiate, and at times challenge dominant U.S. and/or European hierarchies of race, culture, gender, and class.

Class Format: lecture/discussion

HIST 283 Introduction to Native American History (D)
Crosslistings: AMST 280/HIST 283
Long ignored and romanticized, Native American history has become a vibrant area of study rich with new scholarship. This course will grapple with the most important issues currently driving inquiry within the field. We will investigate pivotal developments in Native American history and build a foundation for future coursework in Native Studies. Course topics will include: the new worlds that Natives and various newcomers created, competing visions for what is now known as the United States, tribal sovereignty, federal Indian policy, notions of authenticity, structures of settler colonialism, resistance movements, Indigenous governance, cultural revitalization, conflict over natural resources, and urban experiences. We will also examine how stories about the Indigenous past have been politicized, and how Indigenous histories can reshape our broader understandings of American history and culture. This course will satisfy the Exploring Diversity Initiative (EDI) requirement as we examine shifting power relations and cross-cultural interaction in Native America.
Class Format: lecture
Requirements/Evaluation: two short papers and an in-class essay midterm and final
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

HIST 284 Introduction to Asian American History (D)
Crosslistings: HIST 284/AMST 284/ASST 284
This course serves as the introduction to Asian American history, roughly covering the years 1850 to the present. It examines the lives of Chinese, Japanese, Koreans, Filipinos, Indians, and Southeast Asians in America, and the historical reasons why they came to the US and their subsequent interactions with other ethno-racial groups in the United States. Topics include the anti-Asian exclusion movements, the wartime incarceration of Japanese Americans, the increase of Asian immigration after the 1965 Immigration Act and the war in Vietnam, and the impact of the events of September 11, 2001 on Asian American communities. These themes and others will be explored through the use of historical texts, primary documents, novels, memoirs, and films. This is an EDI course because it examines how people from different Asian countries and cultures interacted with each other and those already here in the US. Theirs is a story of immigration, exclusion, resistance, accommodation, and the process of “becoming American.”
Class Format: lecture/discussion
Requirements/Evaluation: evaluation will be based on four response papers, two short critical essay (5-7 pages) and a final oral history/family history of an Asian American (10-15 pages)
Prerequisites: none; open to all
Enrollment Limit: 40
Expected Class Size: 30

HIST 286 Latina/o History, 1848 to the Present (D)
Crosslistings: LATS 286/HIST 286
From 1848 to the present, Latina/o communities have taken shape in the United States through conquest and migration. Why and when have distinct Latina/o groups emerged in communities in different regions of the United States? U.S. imperialism and foreign policies, as well military, political and economic ties between the United States and various countries of origin define the political and economic contexts in which people leave their homes to come to the United States. In their search for low-wage labor, U.S. employers have recruited workers from Latin America and the Hispanic Caribbean. Mexicans, Puerto Ricans, Cubans, Dominicans, Guatemalans, and Salvadorans, as well as others, have responded to labor recruitment and have also relied on networks of family and friends to seek a better life in the United States. What do the histories of these distinct Latina/o groups share and where do their experiences diverge? This EDI course examines the racial dynamics at play in the formation of Latina/o communities, as well as the impact of U.S. hierarchies of race, ethnicity, gender and class on the labor histories of Latinas and Latinos.
Class Format: lecture/discussion
Requirements/Evaluation: evaluation will be based on class participation and group presentations, short writing assignments, two short essays, and a final essay
Prerequisites: none
Enrollment Limit: 40

HIST 301 Approaching the Past: Is History Eurocentric?
The modern historical profession is very much a European creation, originating in the Age of Enlightenment. Championing reason and challenging religious views of the past, the Philosophes linked the new secular study of man and his society to a view of historical progress. Some have argued that the very nature of the historical discipline is Eurocentric, based as it is on Western concepts of reason, science, and historical evolution which privilege European history at the expense of its non-Western counterparts. In this course, we will study some of the important spokesmen for historical progress (Voltaire, Condorcet, Marx, von Ranke) as well as some of their important critics. The first half of the course will survey the history of the historical profession from the Enlightenment to the present. In the second half of the course, we will read some of the great works of history which have attempted to explain the rise of the west, grappling with how and to what extent these interpretations are Eurocentric.
Class Format: discussion
Requirements/Evaluation: evaluation will be based on class participation, two 10- to 12-page papers, and a final exam
Prerequisites: restricted to History majors and sophomores planning to major in History
Enrollment Preferences: senior, then junior, History majors
Enrollment Limit: 19
Expected Class Size: 15-19

HIST 301 Approaching the Past: Westward Expansion in American History
How does historical knowledge evolve? How do historians build on but also repudiate the work of historians that came before them? In this course, we will explore the historiography that has developed over the last 150 years about the Anglo-American settlement of the West, using it as a lens to explore larger questions about shifting perspectives of the historian's craft. This historiography will also illuminate critical conflicts about the meaning of American history. Did the frontier build American character, as Frederick Jackson Turner argued in 1893? Did it establish patterns of conquest that have shaped American policy toward other parts of the world, as later historians would argue? Has the West been an "exceptional" place or representative of the nation at large? The class will meet twice a week, and the discussions will focus intensively on one book, examining the theoretical and historical assumptions of the author and how these assumptions shaped the historian's search for evidence and his or her claims, and the impact they have had on our understanding of the American West.
Class Format: discussion
Requirements/Evaluation: evaluation will be based on class participation, weekly critical writing, a midterm paper, and a final, book review essay
Prerequisites: restricted to HIST majors and sophomores planning to major in HIST
Enrollment Preferences: senior, then junior, History majors

HIST 301 Approaching the Past: Documentary Studies and African American History
Comprised of non-traditional sources—photographs, oral history, narratives, folklore, films, fiction, music, poetry, art and other forms—documentary served historically to expand the progressive agenda by projecting the voices of the voiceless in order to illuminate the need for social change. Some examples include Jacob Riis' photographs of the Lower East Side, Louis Lomax's efforts to record folk music, Stud Terkel's interviews with ordinary Americans. But what documentary producers have produced also provides a way to access information about the past, especially the stories of people whose lives have not been preserved through archival materials. This course examines the historical development of documentary forms and reviews the work of specific documentary historians. It will look at the uses of various types of documentary as primary sources for research in African American history. Familiar formats, from Frederick Douglass' autobiographies to Henry Hampton's "Eyes on the Prize" series, recorded AND told histories that still remain mostly veiled. But in its unprocessed or raw form—collected work songs, sermons, tall tales, blues lyrics, family snapshots, oral history, and the like—documentary provides a store of rich primary sources that access the voices less often heard. This course will explore that material and what historians do with it.

Class Format: seminar
Requirements/Evaluation: evaluation will be based on class participation, weekly written critiques, and a final paper/project
Extra Info: may not be taken on a pass/fail basis
Prerequisites: restricted to History majors and sophomores planning to major in History
Enrollment Preferences: senior, then junior, History majors
Enrollment Limit: 19

HIST 301 Approaching the Past: Modern National, Transnational, and Postcolonial Histories
This course examines the practice of history from the nineteenth century to the present. We will examine the sources, methods, and theoretical assumptions that have shaped the historical craft in this period, as well as the deeper questions that all historians must confront, implicitly or explicitly: What is "history"? Who makes it and how? To address these issues, we will discuss the work of canonical and non-canonical historians from across the world, and from outside as well as inside the academy. The particular focus will be on the production of history from the rise of the nation-state through the spread of new imperialisms in the late nineteenth century and on to the emergence of the "Third World," decolonization, and the "new globalization" over the course of the twentieth century. In weekly seminar meetings we will analyze texts and the meanings of history for different audiences and eras.

Class Format: seminar
Requirements/Evaluation: evaluation will be based on class participation, response papers, short essays, and a final paper
Extra Info: may not be taken on a pass/fail basis
Prerequisites: restricted to History majors and sophomores planning to major in History
Enrollment Preferences: senior, then junior, History majors

HIST 301 Approaching the Past: Remembering American History
Much of what we know and understand about American history is rooted in the received narrative of our national history, a history that is constructed of individual, collective, and a national memory of the past and its meanings. This course will examine some forms through which American historical memory is presented and (re)presented, such as monuments, museums, novels, films, photographs, and scholarly historical writing, by considering a number of pivotal events, institutions, or eras in American history. Potential topics are slavery, race, and the Civil War; westward expansion; the Great Depression; World War II; the Sixties; the war in Viet Nam; and the events and aftermath of September 11, 2001.

Class Format: discussion
Requirements/Evaluation: evaluation will be based on weekly response papers, a book review, an exercise with the Williams College Museum of Art, and a final project to be completed in consultation with the professor; students will be required to lead a class discussion

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: restricted to History majors and sophomores planning to major in History
Enrollment Preferences: senior, then junior, History majors
Enrollment Limit: 19
Expected Class Size: 15-19

HIST 301(F) Approaching the Past: Writing the Past
"History" refers to the aggregate of past events as well as to the branch of knowledge that seeks to understand those past events. Whereas history courses often take as their theme the first of these two meanings of history, focusing on the politics, society, and culture of a particular place in a particular historical era, this course will examine history's often concealed "other" meaning: the practices of historians, their methods and assumptions. In so doing, this course aims to unsettle history majors' own assumptions about what history is and what historians do. How do historians reconstruct the past, and how and why have their approaches to sources, theories, and narrative strategies changed over time? And on a deeper level, how have historians' suppositions changed—if they have changed—about the nature of historical truth, knowledge, and the value of history to the societies in which they wrote? Taking history-writing itself as our object of study, over the course of the semester we will read the work of twelve, quite different historians from the classical to the modern era. Each week in our seminar meetings, we will subject these texts to a careful reading in order to understand and assess these historians' theories and practices.

Class Format: discussion
Requirements/Evaluation: evaluation will be based on class participation, weekly response papers in a required reading, and a final paper
Prerequisites: restricted to HIST majors and sophomores planning to major in HIST
Enrollment Preferences: senior, then junior, History majors
Enrollment Limit: 19
Expected Class Size: 15-19

HIST 301(S) Approaching the Past: Practices of Modern History
What is history? What is it that historians do? In this course, students will explore questions of how and why we historians practice our craft. The first section of the course will examine how historians come to know, think about, and understand the past. Issues of the nature of historical "truth," objectivity and bias, types of sources, and uses of theory will be discussed. Next, we will address the ways in which historians write about the past, considering the influence of modernity, postmodernism, and the "new imperialism" over the course of the nineteenth and twentieth centuries. Finally, we will examine the uses of history, including public history, history education, and the construction of historical memory. The class will meet once a week, and each session will focus on some theoretical material as well as readings that concretely illustrate the methodological issues at stake. These readings will be drawn from a broad range of topics, such as the Great Depression, the Nanking Massacre, and the assassination of JFK.
HIST 301(S) Approaching the Past: Varieties of Historical Thinking
This course is designed to acquaint students with some of the ways historians have thought about the past. Beginning with Thucydides’ The Peloponnesian War, the work of twelve historians will be studied closely and critically over the course of the semester. In the process, students not only will become familiar with various important historical approaches but will also be encouraged to examine their own assumptions about the past and about how and why—or even if—we know it. We will meet weekly to define, understand, and assess the different ways historians considered in the course have thought about the past.

Class Format: seminar
Requirements/Evaluation: in preparation for class discussion, students are required to produce a one-page critical response to the assigned reading each week, which will form the basis for class discussion
Extra Info: in addition to writing eleven critical responses, students are also required to make an oral presentation of approximately twenty minutes on a professor they have taken a seminar with. This option may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: restricted to History majors and sophomores planning to major in HIST
Enrollment Limit: 19
Expected Class Size: 15-19

HIST 302(F) Islamic Law: Past and Present
Crosslistings: REL 243/ARAB 243/HIST 302
From fear of the Sharīa’s to its implementation in so-called “Islamic countries,” Islamic law has perhaps best associated itself with the oppression of women. Islamic law is ever present in our public discourse today and yet little is known about it. This course is designed to give students a foundation in the substantive teachings of Islamic law. Islamic law stretches back over 1400 years and is grounded in the Quran, the life example of the Prophet Muhammad, and juridical discourse. Tetering between legal and ethical discourse, the Sharīa’s moves between what we normally consider law as well as ethics and etiquette.

The course will explore four key aspects of the law: its historical development, its ethical and legal content, the law in practice, and the transformation of Islamic law through colonialism and into the contemporary. Specific areas we will cover include: ritual piety, family and personal status law, criminal law, and dietary rules.

Class Format: seminar
Requirements/Evaluation: weekly responses, four 2- to 3-page essays
Prerequisites: none
Enrollment Preferences: majors
Enrollment Limit: 19

HIST 305 Nationalism and Nation Building in the Middle East (D)
Crosslistings: HIST 305/ARAB 305
In 1932, or twelve years after the establishment of Iraq, King Faisal I lamented that there were “no Iraqi people but only unimaginable masses of human beings, devoid of any patriotic idea, imbued with religious traditions and absurdities, connected by no common tie.” This course will consider how true the King’s statement still holds. Evaluating the various attempts at state and nation building in the Middle East and the challenges of statecraft. After assessing some of the more influential theories of nationalism, we will explore the historical experience of nationalism and identities in Iraq, Israel, Turkey, Palestine, Iran, and Egypt. What has been at the basis of nationhood? How did European concepts of nation translate into the Middle Eastern context? What was the role of religion in these modern societies? How did traditional notions of gender effect concepts of citizenship? We will also explore some of the unresolved issues facing the various nations of the Middle East, such as unfilled nationalist aspirations, disputes over land and borders, and challenges to sovereignty. Finally, we will evaluate the role of foreign powers in nation building in the Middle East and consider whether the modern concept of the nation has any validity in the Middle Eastern context. Because this course is comparative in nature that utilizes theoretical frameworks to better understand cross-cultural interaction and because it focuses on the ways in which governments in the Middle East have used their power to legitimate their actions in the name of nationalism, this course fulfills the requirements of the Exploring Diversity Initiative (EDI).

Class Format: lecture/discussion
Requirements/Evaluation: evaluation will be based on several short papers and a “Magnus” Opus (a.k.a. final research paper)
Prerequisites: none
Enrollment Preferences: History majors and students with a background in Middle Eastern studies
Enrollment Limit: 25

HIST 307 A History of an African City
Crosslistings: HIST 307/AFR 313/ENVI 306

The city of Nairobi was founded solely to serve the needs of white colonials and settlers. Fifty years later—in the 1960s—it had become dominated by Africans and is now, in the 21st Century, a major global city with over 4 million people. This course will trace the history of Nairobi from the 19th century to the present. We will focus on the city's political and economic development, its racial conflicts, as well as the daily experience of various groups of city dwellers. We will also look at the growth of the city's physical infrastructure—its transportation, housing, trade, and labor networks. Students will also get a chance to read about the various artistic movements in Nairobi, focusing especially on music, theater, and street performances.

Class Format: lecture
Requirements/Evaluation: two 7-page papers and one 12- to 15-page paper
Prerequisites: none
Enrollment Preferences: seniors; History majors
Enrollment Limit: 25
Expected Class Size: 25

HIST 308 Gender and Society in Modern Africa
Crosslistings: HIST 308/WGSS 308/AFR 308

This course explores the constructions of feminine and masculine categories in modern Africa. We will concentrate on the particular histories of women's experiences during the colonial and postcolonial periods. In addition, we will examine how the study of history and gender offers perspectives on contemporary women's issues such as female-circumcision, teen pregnancy, wife-beating, and "AIDS." 

Class Format: lecture/discussion
Requirements/Evaluation: evaluation will be based on class participation and three short papers.
Prerequisites: none; open to first-year students with instructors permission
Enrollment Limit: 25
Expected Class Size: 15-20
Distributional Requirements: Division II

HIST 309 Arab Women Memoirs: Writing Feminist History
Crosslistings: ARAB 252/COMP 252/WGSS 251/HIST 309

This course reviews selected autobiographical writings by Arab women writers from the wave of independence in the 20th century to the contemporary Arab uprisings, passing through all the transformations that globalization and the technosphere have instigated. We will examine the role that first-voice narrative plays in shaping literature, history and thought, while providing a space to reclaim cultural, social and political agency. Focusing on the different articulations of self-representation, our discussion will address how these women reflect on the shifting discourses of identities, gender, nationalism, religion, feminism, sexuality, politics, borders and their histories. Questions we will address include: How did these memoirs contribute to the development of Arab feminist consciousness? In addition to the memoirs, we will look at women's blogs and watch films that focus on first-person narrative to discuss related topics, such as, visual testimonies, virtual political participation and feminist resistance in the technosphere. Required texts may include: Fadwa Tuqan (A Mountainous Journey: An Autobiography), Fatima Mernissi (Dreams of Tresspass; Tales of a Harem Girlhood), Leila Ahmed (A Border Passage: From Cairo to America—a Woman's Journey), Fadila Faqir and Shirley Eber (In the House of Silence: Autobiographical Essays by Arab Woman Writers), and Jumanah Haddad (I Killed Scheherazade: Confessions of an Angry Arab Woman), as well as critical essays and selections from autobiographical writings that reflect the diversity of Arab women in the Middle East and the diaspora.

Class Format: seminar
Requirements/Evaluation: active class participation, several short response papers, three short papers (3-5 pages), and a final paper (7-10 pages)
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none
Enrollment Preferences: none
Enrollment Limit: 25
Expected Class Size: 15

HIST 310(S) Iraq and Iran in the Twentieth Century (D)
Crosslistings: HIST 310/ARAB 310

Despite being neighbors, the historical experience of Iran and Iraq has been drastically different. In this course we will begin by exploring the creation of Iraq in 1921 and the Pahlavi government in Iran. We will explore the revolutions of 1956 and 1978-9 and compare the lives and careers of Saddam Hussein and Ayatollah Khomeini. The tragic Iran-Iraq war of 1980-88 will also be discussed. Finally, the political future of these countries will be assessed.

Class Format: lecture/discussion
Requirements/Evaluation: evaluation will be based on class participation, short essays, and a final paper
Prerequisites: none; open to first-year students with instructors permission
Enrollment Limit: 25
Expected Class Size: 20
Distribution Notes: meets Division 2 requirement if registration is under ARAB

HIST 311 The United States and the Middle East
Crosslistings: HIST 311/ARAB 311

At the turn of the twentieth century, the United States was considered a benign superpower in the Middle East. Americans were known as "innocents abroad" for their educational and philanthropic work. From a distance, American society was admired for its affluence and freedom, and Middle Eastern politicians eagerly sought American advice and assistance. Today, however, the situation could hardly be more different. This course will examine the remarkable transformation of American involvement in the Middle East. Significant cultural and political encounters of the latter half of the twentieth century will be assessed in order to identify how the United States has approached the region and consider the multifaceted and sometimes ambivalent reactions of people in the Middle East to increasing U.S. presence. It will also explore the difficulty the United States has experienced in balancing diverse, and sometimes conflicting, foreign policy interests, and will evaluate what may account for the increasing level of antagonism and mistrust on both sides.

Class Format: discussion
Requirements/Evaluation: evaluation will be based on class participation, short papers and a final research paper
Prerequisites: none
Enrollment Preferences: History and Arabic Studies majors
Enrollment Limit: 25
Expected Class Size: 25
Distribution Notes: meets Division 2 requirement if registration is under ARAB

HIST 313(F) The People's Republic: China since 1949
Crosslistings: HIST 313/ASST 313

This course provides a close examination of the six decades of the history of the People's Republic of China, from the 1949 Revolution to the present day. Through readings and discussion, we will explore the multiple political, economic, social, and cultural factors that contributed to the idealism of the "golden age" of Communist Party leadership (1949-65), the political violence of the Cultural Revolution (1966-76), the profound transformation of the Reform Era (1978-present) as well as the motors of change in China today. Course materials will include films, novels, and ethnographies, as well as secondary analyses. Please note that this is a discussion seminar and not a survey course.

Class Format: seminar
Requirements/Evaluation: evaluation will be based on active class participation, several short papers and a final research paper

HIST 319 Gender and the Family in Chinese History (D)
Crosslistings: HIST 319/WGSS 319/ASST 319
Although sometimes claimed as part of a set of immutable "Asian values," the Confucian family has not remained fixed or stable over time. In this course, we will use the framework of "family" to gain insight into gender, generational, and sexual roles in different historical periods. Beginning in the late imperial period (16th-18th Centuries), we will examine the religious, marital, sexual, and childrearing practices associated with the "orthodox" Confucian family. We will then explore the wide variety of "heterodox" practices in imperial China, debates over and critiques of the family system in the twentieth century, and configurations of gender and family in contemporary China. As an EDI course, this class makes use of anthropological and gender studies methods to analyze both the specificities of Chinese ideas and practices regarding family, gender and sexuality as well as the considerable variety among these ideas and practices at different points in time.

Class Format: lecture/discussion
Requirements/Evaluation: evaluation will be based on class participation, several short papers, and a final paper

HIST 321 History of U.S.-Japan Relations (D)
Crosslistings: HIST 321/JAPN 321/ASST 321
An unabating tension between conflict and cooperation has been an undercurrent of U.S.-Japan relations in the past 150 years, at times erupting into clashes reaching the scale of world war and at times allowing for measured collaboration. We will explore the U.S.-Japan relationship from the perspectives of both countries with a focus on how culture, domestic concerns, economic and political aims, international contexts, and race have helped shape its course and nature. This course will fulfill the requirements of the Exploring Diversity Initiative by examining not just the diplomatic relationship between the U.S. and Japan, but also how various types of interactions have influenced the dynamics of power between these two countries and have shaped the ways in which each country has understood and portrayed the other. Topics will include early U.S.-Japan encounters; the rise of both countries as imperial powers; the road to, and experience of, World War II; the politics and social history of the postwar American occupation of Japan; the U.S.-Japan security alliance; trade relations; and popular culture. Contemporary topics will also be discussed.

Class Format: lecture/discussion
Requirements/Evaluation: evaluation will be based on class participation, response papers, two short papers (5 pages), and a self-scheduled final exam or research paper

HIST 323 Leadership, Government, and the Governed in Ancient Greece (W)
Crosslistings: CLAS 323/LEAD 323/HIST 323
Vigilant, opportunistic, tyrant, demagogue, popular champion: concise characterization of influential leaders is often irresistible. But placing leaders in their much less easily encapsulated political, social, and religious contexts reveals them to be far more complicated and challenging subjects. Among the questions that will guide our study of Greek leadership: Was the transformative leader in a Greek city always an unexpected one, arising outside of the prevailing political and/or social systems? To what extent did the prevailing systems determine the nature of transformative as well as of normative leadership? How did various political and social norms contribute to legitimating particular kinds of leader? After studying such leaders as the "tyrants" who prevailed in many Greek cities of both the archaic and classical eras, then Athenian leaders like Solon, Cleisthenes, Cinon, Pericles, Cleon, and Demosthenes, and Spartans like Cleomenes, Leonidas, Brasidas, and Lysander, we will focus on Alexander the Great, whose unique accomplishments transformed every aspect of Greek belief about leadership, national boundaries, effective government, the role of the governed, and the legitimacy of power. Readings will include accounts of leadership and government by ancient Greek authors (e.g. Homer, Solon, Herodotus, Thucydides, Plato, Aristotle, Demosthenes, all in translation) and contemporary historians and political theorists.

Class Format: lecture/discussion
Requirements/Evaluation: evaluation will be based on contributions to class discussions, three short papers (4-6 pages each), a midterm exam, and an oral presentation leading to a significant final paper (15-20 pages)
Prerequisites: none, but a background and/or interest in the ancient world, political systems, and/or Leadership Studies is preferred; open to first-year students with instructors permission
Enrollment Limit: 19
Expected Class Size: 12
Distribution Notes: meets Division 2 requirement if registration is under HIST or LEAD; meets Division 1 requirement if registration is under CLAS

HIST 324 The Development of Christianity: 30-600 C.E. (W)
Crosslistings: REL 212/HIST 324
This course will introduce you to the history, writings, practices, and structures of early Christians between 30-600 CE. Who were "Christians" and how did they understand and define themselves in this time period? What historical and cultural factors influenced the ways in which Christians were perceived, could imagine themselves, and lived? While this class addresses the basic flow of events and major figures in early Christian history, it will also require you to develop a critical framework for the study of history in general. In addition, you will gain significant experience in the critical analysis of primary source materials. Special attention will be paid to the incredible diversity of early Christian thought and practice.

Class Format: lecture/discussion; in-class group work
Requirements/Evaluation: active and informed participation, one reflection paper (1 page), two textual analysis papers (3-4 pages)—at least one to be revised (option to revise both)
Extra Info: additional requirements: one historiographical analysis (5-7 pages), and a take-home final exam
Prerequisites: none
Enrollment Preferences: sophomores considering a major in Religion or History, then senior and junior majors in these departments

Enrollment Limit: 19
Expected Class Size: 19

HIST 326 War in European History
From the ancient world to the twentieth century, war has always played an important part in European history. Europeans have not only constantly been at war with other Europeans, but also with neighboring cultures and, indeed, most peoples around the globe. This course will introduce students to the history of European warfare from its origins in the classical and medieval periods to its maturation in the early modern period (1450-1815), and its disastrous culmination in the nationalist struggles of the nineteenth and twentieth centuries. Has there been a distinctively “European Way of War” from the beginning? How do we explain failure and success in European wars? What exactly happened at the strategic, operational, and tactical levels of war? And what caused changes in the organization and waging of European war from one period to the next?

Requirements/Evaluation: evaluation will be based on class participation, one short research paper, and midterm and final exams
Prerequisites: none; open to first-year students with instructors permission
Enrollment Limit: none
Expected Class Size: 30-40
Distributional Requirements: Division 2
Other Attributes:
- HIST Group C Electives - Europe and Russia
- HIST Group P Electives - Premodern

HIST 327 Law in the Middle Ages
Medieval laws form the foundation for much of our modern legal system. They also constitute crucial but problematic sources for our understanding of medieval society. This course will cover law from the sixth through the fourteenth centuries, with special emphasis on the law of the Roman empire and the law of the Christian church. Through smaller units on Law in Antiquity, Law in the Early Middle Ages, The High Medieval Legal Tradition, and Marriage in Canon Law, we will gain some exposure to the depth and complexity of the medieval legal tradition. We will spend most of our time with the legal sources themselves, concentrating specifically on legislation dealing with marriage, the settlement of disputes, and crime of all kinds. Along the way, we will also study the early history of lawyers and the legal profession. No prior experience with the Middle Ages is expected.

Class Format: lecture/discussion
Requirements/Evaluation: evaluation will be based on three short papers on specific problems presented by our sources, and a final, longer essay
Prerequisites: none
Enrollment Limit: 25
Expected Class Size: 15-20
Distributional Requirements: Division 2
Other Attributes:
- HIST Group C Electives - Europe and Russia
- HIST Group P Electives - Premodern
- JUST Interdepartmental Electives
- JUST Enactment/Applications in Institutions

HIST 328 Witchcraft
Crosslistings: HIST 328/REL 328
A wide variety of human cultures have accepted the existence of the supernatural, the reality of magic, and the possibility of magical transgression. Among the most common supernatural crimes is witchcraft, which societies can invoke to explain natural disasters and disease, and to blame these occurrences on specific individuals, often social outcasts. Witchcraft became a particular focus of fear and fascination in Early Modern Europe, when witch-hunting and trials increased dramatically. In Western Christendom was threatened by a vast, covert conspiracy of witches in league with the devil. Countless “witches”—most of them women—were accordingly tried, tortured and sometimes even executed. Our course will examine these bizarre events in a context of religious, cultural, and intellectual factors that might help explain them. We will begin by investigating the medieval legal and theological developments that enabled and encouraged the persecution of witches, and go on to study some of the most important and sensational witch trials of the later medieval and early modern periods. Throughout, we will encounter many strange and intriguing documents produced by the inquisitors who prosecuted witches, the scholars who imagined their activities, and the laws that defined their crimes. No prior experience with European history is required for this seminar, which will emphasize thoughtful writing and discussion.

Class Format: seminar
Requirements/Evaluation: weekly 500-word essays and one class presentation
Prerequisites: none
Enrollment Limit: 25
Distributional Requirements: Division 2
Other Attributes:
- HIST Group C Electives - Europe and Russia
- HIST Group P Electives - Premodern

HIST 332(S) Queer Europe: Sexualities and Politics since 1850 (D)
Crosslistings: HIST 332/WGSS 331
This course explores the construction, articulation, and politics of queer sexual desire in Europe from the later nineteenth century to the present. By placing queer sexualities within their broader social and political context the course examines the ways in which sexuality has become central to questions of identity, personal and national, in modern European society. Topics include: the role of the new science of sexuality in specifying various "sexual perversions"; the rise of heterosexual undergrounds in the context of European urbanization; the birth of campaigns for "homosexual emancipation"; attempts to regulate and suppress "deviant" sexualities, especially under the fascist regimes in the 1930s; the effects of the postwar consumer revolution on the practices of sexual selfhood; the politics of 1950s homophobic organizing and the 1970s Gay Liberation Movement; and the recent politics of gay marriage. The course will focus primarily on Britain, France, and Germany, but also on Italy and Russia. Readings will be drawn from sexological texts, political tracts, memoirs, and the writings of recent historians. Several films will also be discussed. “Queer Europe” meets the requirements of the Exploring Diversity Initiative insofar as it explores how sexual difference has been constituted, contested, and experienced and how what we assume to be the “sexual norm” has a profoundly political history.

Class Format: seminar
Requirements/Evaluation: evaluation will be based on class discussion, the posting of four 500 word response papers, two 6- to 8-page interpretive essays, and a final research paper of approximately 12-15 pages
Prerequisites: none
Enrollment Preferences: junior and senior History and Women's Gender & Sexualities majors
Enrollment Limit: 25
Expected Class Size: 15-20
Distributional Requirements: Division 2
Other Attributes:
- HIST Group C Electives - Europe and Russia

HIST 333 Postwar Britain: Gender, Race, Sexuality, and Social Change, 1945-1990
Crosslistings: HIST 333/WGSS 332
A major theme in British historiography is the enormous social change that has taken place in Britain since the end of the Second World War. In the 1950s, sociologists argued about the extent to which postwar affluence was leading to the “bourgeoisization” of the working class; in the 1960s, the advent of the so-called “Permissive Society” witnessed the flourishing of a new culture of sex, drugs, and rock ‘n’ roll; in the 1970s, the feminist and gay movements challenged gender roles that earlier had seemed so secure; in the 1980s, Thatcherism sought to halt the nation’s apparent terminal decline, repudiating much of the progressive legislative earlier decades by turning the clock back; finally, throughout this period successive waves of immigration appeared to many to challenge the cultural homogeneity of white Britain. This course will explore these themes, addressing the question of what it meant to be “postwar” in Britain, charting the gradual emergence of a new politics of class, gender, race, and sexuality in Britain that made the nation in 1990, at the end of the postwar period, a radically different place from what it had been in 1945. In attempting to make sense of these complex changes, we will consider a variety of documents and works by recent historians, along with a dozen films, which students will be required to view outside of class.

Class Format: discussion
Requirements/Evaluation: class discussion, two 8-10 page interpretive essays, and a self-scheduled final examination
Prerequisites: none
Enrollment Preferences: junior and senior History and Women's, Gender & Sexuality Studies majors
Enrollment Limit: 25
Expected Class Size: 15-20
Distributional Requirements: Division 2
Other Attributes:

HIST 335(F) Weimar Germany
The Weimar Republic has been examined and re-examined, not only in an effort to account for the failure of democracy and the rise of Hitler in Germany but also for its remarkable artistic achievements. Using a variety of primary documents, including movies, works of art and literature, as well as more traditional historical sources and the writings of historians, this course will
consider the social, political, and cultural history of the Weimar Republic. At issue in the course will be the relationship between the political and social instability and the cultural blossoming that characterized in Germany during the 1920s. We will also consider whether the Weimar Republic in general, and Weimar culture, in particular are better understood as the product of Germany's past or as harbinger of its future.

**Class Format:** discussion

**Requirements/Evaluation:** evaluation will be based upon participation in class discussion, two essays, each of approximately 5 pages, and one 8-page paper due at the end of the semester

**Prerequisites:** none

**Enrollment Preferences:** students with background in European history, or History majors

**Enrollment Limit:** 25

**HIST 336(S) National-Socialist Germany (D)**

This course is a history of National-Socialist Germany based to a considerable extent on primary documents. Students will use the documents to reconstruct the history of the Third Reich and to articulate some of the principal historiographical debates relating to National-Socialist Germany. The course will consider the following topics: the failure of the Weimar Republic and the rise of National Socialism; the consolidation of Nazi rule; the expropriation of the Volksgemeinschaft; the popularity of National Socialism; the wars and the defeat of Third Reich; Nazi culture; Nazi racism and image of the Jew; Gestapo terror; the pre-war persecution of Jews; popular German anti-Semitism; the regime’s euthanasia program; the Nazi Empire; the experience of war in Russia; the implementation of the “Final Solution to the Jewish Problem”; Germany's knowledge and complicity in the "Final Solution"; the experience of "total war" on the home front; resistance to National Socialism; and the collapse of the Third Reich. The course will focus especially on how ordinary Germans experienced and participated in the history through which they lived. We will take an empathetic approach to National-Socialist Germany and to the Germans who lived through this period, attempting to understand why they felt, thought, and acted as they did. We will also consider the epistemological and ethical problems involved in attempting to empathize with Nazis.

**Class Format:** lecture/discussion

**Requirements/Evaluation:** active and effective participation in class discussion, two 5-page analytic essays on two of the topics considered in the course, and a final 7-page interpretative essay

**Extra Info:** the two analytic essays on an assigned course topic (50%); the final interpretative essay (30%); class participation (20%)

**Prerequisites:** none; open to all

**Enrollment Limit:** 25

**HIST 337(A) Envisioning Empire: Geography in the Graeco-Roman World**

In twenty-first century United States, the murder of approximately six million European Jews by Nazi Germany remains a central event in our political, moral, and cultural universe. Nevertheless, the Holocaust still confounds historians’ efforts to understand both the motivations of the perpetrators and the suffering of the victims. In this course, we will study the origins and unfolding of Nazi Germany’s genocidal policies, taking into consideration the perspectives of those who carried out mass murder as well as the experiences and responses of Jews and other victim groups to persecution. We will also examine the Holocaust within the larger context of the history of World War II in Europe and historians’ debates about Germany’s exterminatory war aims. Course materials will include diaries, speeches, bureaucratic documents, memoirs, films, and historical scholarship.

**Class Format:** mostly discussion

**Requirements/Evaluation:** evaluation will be based on class participation, a map quiz, four papers (4 pages) based on class readings, and a final research paper (6-8 pages)

**Prerequisites:** none; open to first-year students with instructors permission

**Enrollment Preferences:** History majors and Jewish Studies concentrators

**Enrollment Limit:** 25

**HIST 339 Marx and His Times (and Marx's Relevance Today)**

Growing economic inequality—at home and in the world—is fuelling powerful new protest movements reminiscent of the times of revolution in which Karl Marx played such an important role. Not surprisingly, activists, journalists, and academics have revived interest in studying Marx—the man, the activist, the theoretician—to discover his continuing relevance today. In this class, we will study Marx by reading some of his major political writings—e.g. The Communist Manifesto, The Civil War in France—in the context of the revolutions he was engaged in (the 1848 revolutions, the Paris Commune of 1871); we will study his activism, particularly the organization of the First International (1864-1876), Marx's disputes with anarchists and social democrats (Critique of the Gotha Programme), and his attitude towards the non-white world, through reading his correspondence and newspaper articles, as well as recent biographies; and we will read excerpts from his major theoretical and philosophical works, e.g., On the Jewish Question, The Economic and Philosophical Manuscripts and Capital, with an eye towards understanding how he changed and developed his ideas over time.

**Class Format:** seminar

**Requirements/Evaluation:** evaluation will be based on class participation, and 2-3 medium sized papers

**HIST 341 Envisioning Empire: Geography in the Graeco-Roman World**

Crosslistings: CLAS 341/HIST 341/ARTH 239

During the first century BCE, successive civil wars divided the Roman Empire among ethnic, geographical and partisan lines. Octavius' victory at battle of Actium in 31 BCE officially brought an end to the Roman civil wars, but it did not in itself signify the end of the Roman Empire. From this point, uncertainty arose the geographical texts of the Augustan age. The genre of universal geography provided a convenient means to reconfigure identity boundaries in post-Augustan world. By delineating stable borders between the peoples and provinces, geographical texts (whether written, sculptural or pictorial) literally mapped out identity boundaries and power relationships to create a new, unified image of the Roman Empire. This course examines the political and cosmological implications geographical sources produced under the Roman Empire, including the Rosse Gestae of Augustus, Strabo's Geography and Tacitus' Germania. We will also look at maps and other visual representations of the Roman world, such as the personification groups depicted on the Roman imperial cult temples at Aphrodisias and Pisidian Antioch. Discussion will focus on such issues as the relationship between geography and ethnography and the differences between modern cartography and the geographical mapping techniques used in the ancient world.

**Class Format:** seminar/lecture/discussion

**Requirements/Evaluation:** evaluation will be based on classroom performance; a midterm and one 12-15 page paper

**HIST 343 Conquistadors in the New World**

Crosslistings: HIST 343, LAT 343

The Spanish conquest of the Americas happened with astonishing rapidity. Christopher Columbus entered the Caribbean in 1492; Hernando Cortes completed the conquest of the Aztecs of central Mexico in 1521; Francisco Pizarro triumphantly entered the Inca capital Cuzco, in Peru, in 1533. Other conquistadors pushed north to the Carolinas and California, south to the Tierra del Fuego and the River Plate, and across the Amazon basin to the Atlantic. “We came," wrote the conquistador Bernal Dias del Castillo, “to serve God, and our King, and to get rich.” Their deeds were legendary, the courage, determination and endurance remarkable. They were also notoriously quarrelsome, greedy, and cruel. Before their onslaught the major civilizations of the New World crumbled—destroyed or changed beyond recognition. Rarely in history have such few conquered so many so swiftly. The conquest of the New World has both excited and appalled the human imagination for more than five centuries. Many questions remain to be answered or are still capable of provoking controversy. Who exactly were the conquistadors? What motivated them? What meaning did they themselves assign to their actions? How could they justify their many misdeeds? How did they develop their sense of the Other? Why did resistance by indigenous peoples and regimes ultimately fail?
Was the conquest somehow preordained? What mixture of human agency, culture, technology, religion, nature, and biology can best explain the results of this encounter between the conquistadors and the Amerindian worlds?

**Class Format:** lecture/discussion

**Requirements/Evaluation:** evaluation will be based on class participation, response papers, two short papers, and a longer (10-12-page) final essay

**Prerequisites:** History majors

**HIST 347(S) Democracy and Dictatorship in Latin America**

The inability—or failure—of Latin American countries to establish stable and democratic governments has frustrated observers across the region and beyond for almost 200 years. This course will examine the historical creation of both democratic and anti-democratic regimes in different national cases, seeking to identify the conditions that have fostered the apparent persistence of dictatorial tendencies in Brazil, Argentina, Mexico, Peru, and the countries of Central America.

In this regard we will look at the social and economic forces as well as the political actors and ideologies that have contributed to distinct, if often parallel, outcomes. At the same time, we will also question the criteria we use to label regimes “democratic” or “dictatorial”—and the implications of our choice of criteria.

**Class Format:** lecture/discussion

**Requirements/Evaluation:** evaluation will be based on class participation, response papers, and a final exam.

**Prerequisites:** none

**Enrollment Limit:** 25

**Expected Class Size:** 15-20

**Distributional Requirements:** Division 2

**HIST 352(F,S) Americans and the Maritime Environment (W)**

This course examines the impact of the maritime environment (both salt water and fresh) on human affairs from the age of European expansion to the opening decades of the 21st century. Taught using the collections of Mystic Seaport Museum and on several field sites, Americans and the Maritime Environment examines en situ such things as race, gender, revolution, and humankind’s changing relationship with the world’s oceans. Readings in primary sources and secondary works on the social, economic, and technological implications of maritime activities culminate in an original research paper.

**Class Format:** lecture/discussion, including coastal and near-shore field trips, 10 days offshore, and an independent, primary source research project

**Requirements/Evaluation:** two papers, short presentation, and final exam. Student papers will be a 5-page minimum and a 15-page minimum essay. The papers will be critiqued in three steps, as a proposal, a draft, and a final paper, with attention to reasoning and style

**Extra Info:** offered only at Mystic Seaport

**Prerequisites:** BIOL 101 or GEOS/MAST 104, or permission of instructor

**Distributional Requirements:** Division 2

**Enrollment Prerequisites:** History majors

**Enrollment Limit:** 25

**Expected Class Size:** 20-25

**Distributional Requirements:** Division 2

---

**HIST 354(F) The Revolutionary Generation: Galaxy of Leaders Crosslistings:** LEAD 285/PSCI 285/HIST 354

The American Revolution produced a galaxy of brilliant politicians, statesmen, and military leaders of extraordinary courage, intellect, creativity, and character. Washington, Hamilton, Jefferson, Madison, Adams. In this seminar, we will study their astounding accomplishments—a successful war of independence, a Constitution and Bill of Rights, enduring democratic political institutions, and a nascent party system. But mostly we will focus on their ideas, for they were thinking revolutionaries. We will examine in depth and in detail their superb writings, their letters and speeches as well as Madison’s and Hamilton’s Federalist essays. We will also read recent interpretations of the founding generation by Gordon Wood, Joseph Ellis, Bernard Bailyn, and others.

**Class Format:** seminar

**Requirements/Evaluation:** evaluation based on three papers, several class presentations, and active participation in all discussions

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**Prerequisites:** none; courses in Leadership Studies or Political Theory or early American History are very helpful for admission to this seminar

**Enrollment Prerequisites:** students with a background in Leadership Studies, American History or American Political Science

**Enrollment Limit:** 12

**Expected Class Size:** 12

**Distributional Requirements:** Division 2

---

**HIST 355 Perspectives on the American Revolution Crosslistings:** HIST 355/LEAD 255

The American Revolution remains one of the most-studied events in American history. Yet, agreement about its main causes, significance, and purpose remains as distant as ever. Some historians argue that political ideas and principles brought about calls for Independence. Others emphasize the economic motives behind revolutionary fervor. Still others argue that British political institutions failed to adapt to the needs of a growing empire, leading colonists to replace British imperial rule with a form of government suited to their local exigencies. Some have told the story through the eyes of the Founding Fathers, while others have explored what the American Revolution meant for the lived experience of average citizens, of free and enslaved African Americans, of Native Americans, and of peoples living beyond North America. Collectively, such a range of studies speaks to the significance of the American Revolution. Individually, however, these varying perspectives provide a fragmented picture of the era and its people. Through readings, lectures, and primary sources, this class will explore these different views of the Revolution and try to create some synthetic unity out of this historical kaleidoscope.

**Class Format:** lecture/discussion

**Requirements/Evaluation:** evaluation will be based on class participation (25%), mid-term (20%) and final (25%) exams, and a final project (35%)

**Prerequisites:** none; open to all

**Enrollment Prerequisites:** History majors and Leadership Studies concentrations

**HIST 357 Beyond Tonto: American Indians in Film (D)**

This course will explore the political, social, and cultural history of British North America from its first colonization to the coming of the American Revolution.
Crosslistings: AMST 257/HIST 357/ARTH 260/ENGL 260/COMP 273
In 1893, Thomas Edison unveiled the kinetoscope and allowed audience members to glimpse the Hopi Snake Dance by peeking into the device's viewing window. Since the birth of the motion picture, films portraying Native Americans (often with non-Native actors in redface) have drawn upon earlier frontier mythology, art, literature, and Wild West performances. These depictions in film have embedded romanticized and stereotyped ideas about American Indians in the imaginations of audiences throughout the United States and around the world. In this course, we will critically examine representations of American Indians in film, ranging from the origins of the motion picture industry to the works of contemporary Native filmmakers who challenge earlier paradigms. We will reflect upon revisionist narratives, the use of film as a form of activism, Indigenous aesthetics and storytelling techniques, reflexivity, and parody. Throughout the semester, we will view and discuss ethnographic, documentary, and narrative films. This course will satisfy the Exploring Diversity Initiative (EDI) requirement as we will examine power relations, cross-cultural interaction, and Indigenous social experiences.

Class Format: seminar
Requirements/Evaluation: attend evening film screenings each week; two short papers; and a 10-page final

HIST 358(S) The Roosevelt Style of Leadership
Crosslistings: LEAD 325/HIST 358
In this seminar, we will study the political and moral leadership of Theodore, Franklin and Eleanor Roosevelt. The three Roosvelts transformed and expanded the role of government in American society, bringing about fundamental and lasting change. What were their leadership strategies and styles? How did TR and FDR differ in their approaches to leadership? Were TR's "Square Deal" and FDR's "New Deal" similar? How did Dr. New Deal become Dr. Win-the-War? How did they balance political deal-making with bold, principled leadership? What kind of leadership role did Eleanor Roosevelt play? In addition to studying biographies, their writings and speeches, we will do research using the Proquest data base of historical newspapers, to see history as it was being made.

Class Format: seminar
Requirements/Evaluation: evaluation based on participation in class discussions, formal reports, two research papers
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

HIST 359 The Politics of Presidential Leadership, 1776-1860
Crosslistings: HIST 359/LEAD 259
This course will trace the development of the presidency from George Washington to Abraham Lincoln. By focusing on the most consequential presidents of the period, the class will explore presidential successes and failures during times of peace and prosperity and during times of war and depression. As often as possible, the class will also examine the tactics of these presidents' political rivals to understand how competing politicians tried to navigate the social and political terrain of their day. Through the study of biography and primary sources, students will offer critical appraisals of presidents and leave the course with a historical understanding of the types of challenges that those who have held the office have often faced. The course will also provide an in-depth survey of United States political history during the tumultuous early years of the nation.

Class Format: lecture/discussion

HIST 360 Leadership and Historical Memory
Crosslistings: LEAD 320/HIST 360
Many Americans know Abraham Lincoln as the unconventional national icon chiseled in marble on the Washington Mall. But Lincoln has also been depicted as the paragon of the American self-made man, a symbol of northern aggression toward the South, an inveterate white supremacist, America's first gay president, and even, in our age of absurdist humor, a vampire hunter. Far from being fixed and static, our historical leaders' images have changed as Americans have deployed those images in new ways to make political and cultural claims, to teach their children, to assert a national identity, and to criticize the nation's current political situation. In this course we will critically examine four of the most famous leaders in American history—Abraham Lincoln, Eleanor Roosevelt, John F. Kennedy, and Martin Luther King, Jr.—each of whose image has served as an important site for cultural and social contestation. As we explore how portrayals of these leaders have changed over time, we will ask: Why do we remember our leaders the way we do? What do our images of our leaders tell us about American society and culture? Why have these images changed so dramatically over time? In what ways is the concept of "leadership" itself a historical construction? Our sources will include literature, film, public memorials, and journalism as well as biography and history.

HIST 361 U.S. Settler Colonialism and Empire (D)
Crosslistings: AMST 416/HIST 361
Colonialism in American history is too often regarded as a finite period ending with independence or the closing of the frontier, but as Patrick Wolfe argues, "settler colonialism is a structure, not an event." This seminar debunks the myth of the US as an "empire of liberty," and delves into a new generation of scholarship that frames settler colonialism and imperialism as deep-seated organizing principles that have characterized the United States since its founding. We approach settler colonialism as an enduring set of power relations and governmental practices that uphold Euro-American domination and seek to eliminate Indigenous power. The course covers topics such as: ideas of Manifest Destiny, military conquests of Native peoples, the shifting ideas of liberal democracy, mass incarceration as a means of social control, the post-9/11 Global War on Terrorism, the colonial present in Indian Country, and Indigenous decolonization movements and their global parallels.

Class Format: seminar
Requirements/Evaluation: evaluation will be based upon participation in discussions of weekly readings, short reviews, and a final paper that is 12-15 pages

HIST 362 The 1980s
This course will consider whether and how the 1980s are coming into view as history. Conventional views of the 1980s as being defined by selfishness, greed, and materialism, but that decade also saw society engaged in serious debates about individual and social responsibility, the relationship between the state and society, and about America's role in the world. Understanding this era involves tackling broader questions about liberal, conservative, the welfare state, the cold war, globalization, the presidency, social movements, identity politics, popular culture, religion, and...
the media in modern U.S. history. This course will address some of these questions, examine the varieties of ways in which individuals and social groups conceived and reconciled their personal and political identities, and explore various methods used to assess contemporary history.

**Class Format:** lecture/discussion

**Requirements/Evaluation:** evaluation will be based on several short writing assignments; two 4- to 5-page essays; and a research paper (12-15 pages)

**Prerequisites:** none; open to first-year students with instructor's permission

**Enrollment Preferences:** determined by instructor

**Enrollment Limit:** 25

**Expected Class Size:** 25

**HIST 363 Cold War Technocultures**

**Crosslistings:** SOC 263/AMST 263/HIST 363/HSIC 263/SCST 263

With the Soviet Union's collapse at the end of the twentieth century and the emergence of the United States as an unchallenged victor and "new world hegemon, have we lost a sense of the drama, fear, and unbridled terror that permeated American life during the Cold War?" In this course we will set out to understand Cold War American culture(s) by examining the intersection of politics, aesthetics, and a range of major technoscientific developments during this period. The course will take shape in three parts. Part I will explore the emergence and role of the computer in shaping the distinctly American style of thought aimed at Soviet "containment". We will furthermore trace historical treads connecting MIT's legendary Whirlwind computer, the SAGE continental air defense system, nuclear wargaming at the RAND Corporation, artificial intelligence, and the advanced technologies, management strategies, and atrocities of the Vietnam War. Part II takes up the symbolic potency of the space race, which we will use as a conduit through which to explore the following events and developments: Sputnik, Yuri Gagarin's spaceflight, the Apollo moon landing, and American civil defense; the postwar science of cybernetics and the emergence of the now iconic cyborg; the Club of Rome's report and the Gaia hypothesis; plans backed by NASA for international attitudes toward the United States over time. The course will analyze the common themes found in the visitors' respective writings about America and will pay particular attention to their insights on religion, democracy, agrarianism, capitalism, and race. This course is part of the Williams College program at the Berkshire County Jail and House of Corrections and will be held at the jail. Transportation will be provided by the college. The class will be composed equally of Williams students and inmates, and one goal of the course will be to encourage students from different backgrounds to think together about issues of common human concern.

**Class Format:** seminar

**Requirements/Evaluation:** several short response pieces; a final paper of 10-15 pages

**HIST 367 Frontiers in Early American History, 1607-1846**

This course will tackle one of the most hotly debated topics in American history: the significance of the frontier to the development of North America. The course will have two core themes: the history and historiography of the early American frontier and the various conceptions of the frontier in popular culture and works of fiction. It will explore the changing nature of the frontier (and scholarly interpretations of it) in early American history, tracing expansion, development, and conflict from its earliest occurrences in Virginia and England to the Mexican-American War of 1846. The course will be interdisciplinary in nature with readings and assignments ranging from scholarly writings to fictional works and from contemporary movies to primary sources. This approach will help address questions that historians and the public alike have struggled to answer: What was life really like on a frontier? How do popular conceptions comport with historical realities of frontier life? What exactly did the frontier mean to American history?

**Class Format:** lecture/discussion

**Requirements/Evaluation:** based on class participation, two papers of moderate length, and a comprehensive final examination

**Prerequisites:** none; open to first-year students with instructor's permission

**HIST 368(F) Development of American Indian Law & Policy (D)**
Crosslistings: AMST 311/HIST 368
In this course, we will conceptualize Native peoples as nations, not merely racial/ethnic minorities. Students will learn about the unique legal landscape in Indian Country by charting the developmental history of tribal governments and the ever-changing body of U.S. law and policy that regulates Indian affairs. We begin by studying Indigenous legal traditions, the European doctrine of discovery, and diplomatic relations between Native nations and European powers. We then shift our focus to treaty-making, the constitutional foundations of federal Indian law, 19th century U.S. Supreme Court decisions, and the growth of the federal bureaucracy in Indian Country. The course devotes considerable attention to the expansion of tribal governmental authority during the 20th century, the contemporary relationship between Indian tribes and the federal/state governments, and the role of federal Indian law as both a tool of U.S. colonial domination and a mechanism for protecting the interests of Indigenous communities. No prior background in law or Native American history is required.

Class Format: lecture
Requirements/Evaluation: evaluation will be based upon short papers, group work, and in-class essay exams
Prerequisites: none
Enrollment Preferences: American Studies majors and History majors
Enrollment Limit: 25

HIST 369 American History in Film
Crosslistings: HIST 369/AMST 369
Film can tell a story in ways that words alone cannot; films about history can "re-enact" the past for the purposes of entertainment. But like words, they can inform or disinform. Because the narrative arc requires resolution, movies may gloss over complexities. And yet, filmmakers also can deploy tools and methods that delve deep into the intimacies of a singular life, the intricacies of a singular experience, or the nuances of a singular interaction. This course uses popular films about 19th and 20th century American history explore the following questions: What do movies about America history (generally and specifically) convey about American culture? How have depictions of ideas, events, and people in American history changed over time? What historical depictions were or are controversial, when, and why? Why have certain films about American history sustained popularity? Films include Birth of a Nation; Gone with the Wind; Casablanca; Tora! Tora! Tora!; Malcolm X; Apocalypse Now; and others.

Class Format: seminar; the class will meet twice weekly, with a separate weekly film screening
Requirements/Evaluation: several reviews and short papers, and a final paper or project
Prerequisites: knowledge of American history strongly recommended
Enrollment Preferences: junior and senior History majors; then sophomores; then first years
Enrollment Limit: 25
Expected Class Size: 20

HIST 370 African American Urban History
Crosslistings: HIST 370/AFR 366
In the mid twentieth century, the concept of "city" became synonymous with poor African Americans living in the urban centers of the industrial North and West. However, urban African American history stretches back to before the Declaration of Independence. African Americans built and dwelled in great cities North and South. This course will explore the history of African Americans in places like New York, Savannah, Chicago, Miami, and Oakland. We will explore such themes as slavery and freedom in cities, migrations to cities in the early 20th century, the shape of Jim Crow in the North, and the complex interplay between the "black" and Caribbean and African migrants came to urban centers after 1960. We will pay particular attention the history of black urban culture and style, reading texts on fashion, music, dance, and leisure. Students will write one book review (2-3 pages), do an oral presentation, and write two papers. One brief research paper (7-10 pages) and one historiographic essay (7-10 pages).

Class Format: seminar
Requirements/Evaluation: one short book review, one brief research project (7-10 pages), and one historiographic essay
Prerequisites: none
Enrollment Preferences: Africana Studies concentrators and History majors
Enrollment Limit: 25
Expected Class Size: 20
Distributional Requirements: Division 2

HIST 371(S) Oral History: Theory, Methods and Practice
Oral history offers a powerful means to document history "from the bottom up," filling gaps in the historical record and creating ways to make new community connections. Using a variety of texts, including transcripts and recorded interviews, students will consider what oral history offers as a source of information; how oral history is produced and analyzed; legal, ethical, and methodological considerations; the impact of digital technologies on oral history; and the ways that memory, context, and identity shape the interview. The class will include a hands-on component and a group final project, giving students the chance to conduct, archive, use and present interviews. Interviews will be added to the Williams College Archives. The final project will focus on a topic related to local history such as the impact of industry and deindustrialization on northern Berkshire County. All students will be expected to complete several short research and writing assignments; travel off campus to conduct recorded interviews; submit written transcriptions; and participate in the final group project. Additional compulsory class sessions may be added for field trips and workshops.

Class Format: seminar
Requirements/Evaluation: 2 transcribed interviews, 2 short papers, participation, final group project; students must travel off campus to conduct two oral history interviews; interviews to be recorded, transcribed, and archived. Also short papers and final group project
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none
Enrollment Preferences: history majors, juniors
Enrollment Limit: 18
Expected Class Size: 12-15

HIST 372(S) The North American West: Histories and Meanings
This course will explore the various and contested histories of the geographical region of North America that Americans often call "the West". With porous boundaries; changing empires and national borders; and an extraordinarily diverse mix of peoples; and most importantly, continuous indigenous presence to the present day, this region both has a remarkably rich history and raises central questions to how we view American history. What if, from the vantage point of the 1870s, we look not at the founding of the United States in the East but at the elaboration of the Spanish mission system in California and other parts of the Southwest? Or what if, instead of understanding "the West" as a place that people migrated to "from the East", we think about "the West" as a place diversely inhabited for hundreds, even thousands, of years that experienced both very sudden and violent forms of military conquest and settler colonialism, as well as waves of migration from many different compass points around the globe? Where and how do Americans' stories of western individualism fit into the histories of massive federal interventions in "the West"? We will take up these and many other questions as we examine topics from the era before Europeans arrived in North America to the present day.

Class Format: seminar
Requirements/Evaluation: evaluation will be based on class participation, 3 short to moderate writing assignments, and one moderate research paper
Prerequisites: none
Enrollment Preferences: History majors
Enrollment Limit: 25
Expected Class Size: 25
Distributional Requirements: Division 2

Other Attributes: AMST Space and Place Electives

HIST 374 American Medical History
This course will cover major themes in American medical history and historiography from the colonial period through to the twentieth century. Every aspect of American "medicine" underwent tremendous transition during the period we will study. Medical education, the medical profession, and notions about cures and care changed fundamentally, as did ideas about the nature of illness and health. Our course of study, in addition to charting ways in which the practice of medicine in America has developed, will make an equal effort to understand how medicine has changed and affected American society. Topics that we will digress include cholera, TB, and childbirth in American society, as well as other medical phenomena.

Class Format: lecture/discussion
Requirements/Evaluation: evaluation will be based on class participation, two short papers, reading quiz, and a final research paper
Prerequisites: none; open to first-year students with instructor's permission

HIST 375 History of American Childhood (D)

This course explores the evolution of American childhood and the ways that race, class, and nationality have complicated the definition and understanding of childhood. We will consider how seemingly gender neutral laws have yielded varied effects for men and women across race and class divides, challenging some differences while naturalizing others. Finally, we will explore the power and shortcomings of appeals to formal legal equality waged by diverse groups and individuals. Throughout the course, we will consider the various methodologies and approaches of the interdisciplinary field of legal history. Topics to be covered will include the Constitution, slavery, marriage, divorce, custody, inheritance, immigration, sexual violence, reproduction, abortion, privacy, surveillance, jury duty, work, and military service.

Class Format: seminar
Requirements/Evaluation: evaluation will be based on two short (4-5 page) papers; one longer (10-12 page) paper; an in-class presentation, and participation in class discussion

HIST 378 The History of Sexuality in America

Crosslistings: HIST 378/WGSS 378

Sex is often thought of as an unchanging need, behavior, or instinct—a form of experience without history. And yet even in the recent past, sexual desires, acts, identities, attitudes and gender roles have undergone profound transformations. This course explores those transformations, tracing the shifting and contested meanings and experiences of sex and sexuality from the pre-colonial period to the present, and examining how and why sexuality has become so central to identities, culture, politics, and history. To understand how sexuality has been regulated by the state and what sexuality meant to ordinary Americans in the past, we will use a wide range of primary sources, including as private letters, law cases, photographs, films, and music. Many of the topics are relevant to contemporary public debates, including controversies over censorship, sexual violence, gay and lesbian sexualities, transgender identities and politics, abortion, and sexually transmitted diseases.

Class Format: lecture/discussion
Requirements/Evaluation: evaluation will be based on class participation, a midterm examination, several short papers, and a 10- to 12-page research paper

HIST 379(S) Black Women in the United States (D)

Crosslistings: HIST 379/AFR 379/WGSS 379

As slaves and free women, activists, domestics, artists and writers, African Americans have played exciting and often unexpected roles in U.S. political, social, and cultural history. In this course we will examine black women's lives from the earliest importation of slaves from Africa and the Caribbean through to the expansion of slavery, the Civil War, freedom, Jim Crow, the Civil Rights movements, and up to the present day. Of central themes, we will explore are the significance of gender in African American history and the changing roles and public perceptions of black women both inside and outside the black community. We will read and discuss a combination of primary and secondary sources, and we will also consider music, art, and literature, as well as more standard "historical" texts. This course meets the requirements of the Exploring Diversity Initiative in that it focuses on empathetic understanding, power and privilege, especially in relation to class, gender, and race within a U.S. context.

Class Format: discussion
Requirements/Evaluation: evaluation will be based on student participation, three papers, and a brief oral presentation

HIST 380 Comparative American Immigration History (D)

This course examines the underlying tension between the notion of American pluralism and the desire for homogeneity through the study of the history of immigration to the United States from Europe, Latin America, the Caribbean, Asia, the Middle East, and Africa. Special attention will be paid to the conditions in the sending countries and the historical ties of those countries to the United States, immigration and labor recruitment, anti-immigrant sentiments, and the development of American immigration policy. This is an EDI course because it examines how people from different countries and cultures interacted with each other and those already in the United States. Theirs is a story of immigration, exclusion, resistance, accommodation, labor and the creation of an American image of pluralism, coupled with the desire for assimilated immigrants.

Class Format: lecture/discussion
Requirements/Evaluation: evaluation will be based on two short critical essay (5-7 pages) and a final oral history/family history 15-20 pages

Focusing on African Americans' demands for the rights and responsibilities of citizenship, and placing their perspectives at the center, this course explores the themes of the black freedom movement as it transpired in the second half of the twentieth century in the United States. The course follows a chronological format that is grounded in post-World War II internationalism and domestic Jim Crow, covers the civil rights and the black power movements of the 1950s and 70s, and then moves toward current issues in black politics. The topics examined include the strategies and organizing principles of legal challenges, direct action protest, black power activism, coalition building, and public intellectual engagement. The class also assesses the intersection between ideology/activism, culture, and local/regional/national perspectives. Finally, the course uses the black freedom movement as a window into other political initiatives of the era.

Class Format: lecture/discussion; second weekly meeting will split into two discussion sections
Requirements/Evaluation: willingness to manage an intensive reading schedule and for their intellectual engagement in class discussions; evaluation will be based on class participation, two short papers, and a take home final exam
Extra Info: course materials incorporate primary, secondary, and documentary sources, including a weekly film

HIST 382 Latina/o Politics (D)
Crosslistings: LATS 382/HIST 382/WGSS 382
This course explores Latina/o politics from World War II to the present. Defining politics broadly, we will examine everything from electoral politics to grassroots activism. We will explore the relationship between Latinas/os and the U.S. political system, as well as the ways in which dynamics internal to Latina/o communities shape political issues and political participation. Specific topics include Mexican Americans and Puerto Ricans struggling for political inclusion in the aftermath of World War II, Cuban exile politics and the impact, the political and social movements of the 1960s and 1970s, key electoral campaigns, the recent appointment in 2008 of the first Latina as a Supreme Court justice, and on-going debates over immigration. With an assessment of power relations at its core, this Exploring Diversity Initiative course explores the ways in which Latinos and Latinas have been excluded from or differentially included in the U.S. political system, as well as how the U.S. political system reflects dominant hierarchies of race, class, and gender. We will also interrogate how Latina/o politics can help us to make U.S. politics more inclusive and at times have struggled to transform U.S. politics.
Class Format: discussion
Requirements/Evaluation: evaluation will be based on class participation including short assignments in preparation for discussion; three short essays based on course readings (3-5 pages each); and a final paper (7-10 pages)
Prerequisites: none

HIST 388 Decolonization and the Cold War

The second half of the twentieth century came to be defined by two distinct, yet overlapping and intertwined phenomena: the Cold War and decolonization. In the two decades that followed the end of WWII, forty new nation-states were born amidst the bipolar struggle for global supremacy between the Soviet Union and the United States. Those new nations were swept up in the Cold War competition in ways that profoundly influenced their paths to independence and their postcolonial orders, but they often had transformative effects on the Soviet-American rivalry as well. In this course, students will focus on two related questions: How did decolonization influence the Cold War and the international behavior and priorities of the two superpowers? And what impact did the Cold War exert on the developing states and societies? Asia, Africa, the Middle East, and Latin America? Course materials will consist of scholarly texts, primary sources, memoirs, films, and fiction.

HIST 389 The Vietnam Wars

Crosslistings: HIST 389/ASST 389/LEAD 389

This course explores Vietnam's twentieth century wars, including an anti-colonial war against France (1946-1954), a massive Cold War conflict involving the United States (1965-1973), and postcolonial confrontations with China and Cambodia in the late-1970s. Course materials will focus primarily on Vietnam's domestic politics and its relations with other countries. Lectures, readings, films, and discussions will explore the process by which Vietnam's anti-colonial struggle became one of the central conflicts of the Cold War, and examine the radicalism, death toll, and complex of ideas that drove the events involved. The impact of these wars can hardly be overstated, as they affected the trajectory of French decolonization, altered America's domestic politics and foreign policy, invigorated anti-colonial movements across the Third World, and left Vietnam isolated in the international community. Students will read a number of scholarly texts, primary sources, memoirs, and novels to explore everything from high-level international diplomacy to personal experiences of conflict and dramatic social change wrought by decolonization and decades of warfare.

Class Format: seminar

HIST 390 Transforming the New World and the Old: The Haitian and French Revolutions

Crosslistings: HIST 390/AFR 390

This course focuses on the radical transformative power of the Haitian and French Revolutions, the ways in which they challenged the hierarchies of the New World—of monarchy, aristocracy, the Church, and even of the bourgeoisie—with long-lasting effect. It will show how the two revolutions were intricately interrelated—even though historians of the French Revolution have usually neglected the Haitian Revolution in their narratives—and what they reassembled. This Africana Studies course meets the EDI requirement because it explores the experiences and expressions of the culturally diverse peoples of African descent in the New World, as well as the myriad ways in which they confronted, negotiated, and challenged the dominant U.S. and European hierarchies of race, culture, gender, and class.

Class Format: seminar

Requirements/Evaluation: short paper (8-10 pages), research paper (15 pages), final exam, and class participation

Prerequisites: none

Enrollment Preferences: History majors and Africana Studies concentrators

Enrollment Limit: 25

Expected Class Size: 25

HIST 391 When India was the World: Trade, Travel and History in the Indian Ocean

Crosslistings: HIST 391/ASST 391/GBST 391

What do Ibrahim Ben Yiju, a Jewish merchant from 11th century Yemen, Ibn Batutah, a Muslim scholar from 15th century Morocco and Captain Kidd, a 17th century English pirate have in common? All three men travelled and lived in the Indian Ocean region! This course explores the history of one of the world's oldest maritime highways that has connected the diverse cultures of Asia, Africa and Europe for millennia, thus making it a vital element in the birth of globalisation. Moving away from conventional land-centric histories, we will focus instead on understanding the human past through oceanic interactions. South Asian ports and port cities remained the fulcrum of the Indian Ocean world throughout its history; traders, travellers, nobles, scholars, pilgrims and pirates from all over the world travelled to the Indian coast in search of adventure, spices, knowledge and wealth. Thus we will primarily focus on India's role in the Indian Ocean roughly from the rise of Islam in the seventh century CE through the expansion of various European communities in the region and the subsequent rise of the global economy and colonialism in the nineteenth century. Rather than following a strict temporal chronology we will concentrate on themes such as travel and adventure; trade and exchange; trust and friendship; religion and society; pilgrimage; piracy; the culture of port cities; and food across time.

Class Format: seminar

Requirements/Evaluation: assessment will be based on class participation and weekly responses to readings, 2-3 short papers, an oral presentation and final paper

HIST 392 History of the Book

From ancient clay tablets, bamboo strips, and papyrus rolls to modern hardbacks, paperbacks, and e-readers, we have so broadly and deeply represented the capacity for humans to create, preserve, and transmit knowledge, information, and ideas as the book. Books have been worshipped and condemned, circulated and censored, censored and destroyed. From works of art to ephemeral trash, they have been public and private, sacred and profane, magical and commonplace. Likewise, notions of the book have influenced every subsequent form of communication and transmission, whether we are browsing film and song "libraries" or "scrolling" down "pages" on the web. This course will explore aspects of the material, social, cultural, and intellectual history of the book, from the invention of the earliest writing...
systems through the modern development of digital media. Our inquiry will span the globe and the millennia, but we will pay special attention to the ancient and medieval Chinese, Greek, and Latin traditions and their enduring influence in the modern world. Topics will include orality and literacy, manuscript production, the invention and spread of printing, typography, reading culture, notions of authorship, libraries and collections, censorship, and the digital book. Through a variety of readings, hands-on exercises, and interactions with our abundant library resources, we will investigate how the changing form and function of the book interact across its long and diverse history. All readings are in translation.

HIST 393(S) Sister Revolutions in France and America
Crosslistings: LEAD 212/HIST 393
In the late-eighteenth century, two revolutions burst forth—they were the most striking and consequential events in modern history, decisive turning-points that transformed society and politics. The American Revolution led to an enduring and stable democratic republic whereas the French Revolution was followed by a turbulent succession of Empires and restorations of the monarchy. France did not have a sustainable republic until 1870. We will analyze in detail and in depth the ideas and theories of the leaders of both revolutions in order to understand why the American Revolution took a moderate course and why the French Revolution took a more radical course and plunged into violence and terror. We will read the writings of Washington, Jefferson, Madison, Hamilton, Rousseau, Robespierre, Saint-Just, Tocqueville, Edmund Burke and others.

Class Format: seminar
Requirements/Evaluation: evaluation will be based on three papers, several class presentations, and active participation in class discussions
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

HIST 395(S) Signs of History
Crosslistings: ENGL 395/COMP 395/HIST 395
What is an historical event, and how do such events differ from other occurrences? How are historical changes reflected in or produced by literature, art and other cultural forms? Who or what makes history and what is the nature of historical agency? Is history always "written by the victors," as one says, or are there ways of challenging dominant accounts of the past? This seminar attempts to answer these questions through readings in works of philosophy, poetry, history, prose fiction, film, photography, and cultural criticism that reflect upon the nature of history. Though answers will be multiple, course reading and discussion will in general strive to determine the consequences of understanding history as a site in which reading and writing, experience and narration, and action and interpretation intermingle. Readings may include works by Burke, Hegel, Charlotte Smith, de Tocqueville, Marx & Engels, Woolf, and Benjamin.

Class Format: seminar
Requirements/Evaluation: three papers (two 6 and one 8-10 page) and weekly posts
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

HIST 396 Muslims and Europe: From the Conquest of Algeria to the Present (D)
This course will explore Europe's tumultuous relationship with North Africa, focusing on French and British colonialism and its aftermath in the nineteenth and twentieth centuries. Topics to be covered include Napoleon's Egyptian Campaign, the collapse of the Ottoman Empire, Anglo-French rivalry over the Canal and the Suez crisis of 1956, the Algerian Revolution and the anti-Islamic coup in 1991-2, and the migration of North Africans and Indian/Pakistani Muslims to Europe in the post 1945 period. Racial tensions, battles over headscarves, French hip-hop music, and Jewish-Muslim relations in contemporary France are among the topics to be explored with an eye to examining how Europe is coming to terms with its new multicultural identity. By comparing and contrasting Muslim and European societies, and by showing the ways in which colonial power and racial privilege affected these cultures, this course meets the Exploring Diversity Initiative requirement as it seeks to develop an empathetic understanding of the position of Muslims in Europe today.

Class Format: discussion
Requirements/Evaluation: evaluation will be based on class participation, a few short papers, and a longer research paper
Prerequisites: none; open to first-year students with instructor's permission

HIST 403 Making it in Africa: Business in African History
Crosslistings: HIST 403/AFR 404/LEAD 403
Although Africa has come to be known as a continent that relies heavily on foreign aid, that aid rarely reaches ordinary people. In fact, recent studies have suggested that foreign aid has not helped develop Africa. In spite of the staggering problems that ordinary Africans face, many see Africa—now more than ever before—as a place bursting with promise and opportunity, even if that opportunity may require challenges to conventional economic and political thinking. Increasingly, an innovative class of entrepreneurs is emerging in Africa that is hustling in the formal and informal economy in order to accumulate capital. This seminar will trace the social and cultural history of entrepreneurship in Africa from the 19th century to the present. We will explore the individual journeys of several entrepreneurs, the values and objectives they nurtured, the changes in the strategy and structure of the businesses they created, and the dynamic environments in which they each lived and worked. The course will also consider the effects of entrepreneurship innovation and market evolution on African communities and governments. Readings will include histories, biographies, autobiographies, ethnographies, and novels.

Class Format: seminar
Requirements/Evaluation: evaluation will be based on participation in discussion, several short papers, and a final research paper

Almost all discussions of contemporary Taiwan reference the fierce debate over its sovereignty and international status: is the island of Taiwan an independent nation, or an "inalienable part" of the much larger and more powerful People's Republic of China? Part of the argument for Taiwan's separate nationhood derives from its claim to a unique history different from that of the P.R.C.. In this tutorial course, we will look closely at the distinctive aspects of Taiwan's history that underlie this claim, including its aboriginal populations, maritime history, experience of Japanese colonialism, settlement by mainland Chinese after World War II, role in the Cold War, and the development of a Taiwanese ethnic and political identity in the postwar period. The goal of the course is neither to debate nor resolve the "Taiwan question", but to explore the history and historical arguments that inform it.

As the expression "Chindia" in the title of a recent book suggests, contemporary commentators find it difficult to resist conflating the rise of China and India as economic powers in the early 21st century. There are, however, both significant parallels between the two national histories and important distinctions that shape their contemporary viewpoints and roles. This seminar will examine various historical dimensions of entrepreneurial activity in China and India from the early modern period through the twentieth century. It will focus on topics such as indigenous forms of merchant organization, the impact of nineteenth-century imperialism, the adoption of Western business forms and methods, and the relationship of entrepreneurial elites to the modern state.

HIST 433 The Justice of Violence? Histories of Terrorism in Europe
Crosslistings: HIST 433/JWST 433
The word "terrorism" entered the English language in 1795, an import from France that referred to the use of violence and intimidation by the ruling party during one phase of the French Revolution. Over the ensuing two centuries, terrorism has come to refer to the employment of violence, not only as a means of governing, but also and more often as a means of undermining the authority of those in power. This seminar examines a series of episodes of terrorism in Europe from the "terror" of the French Revolution to the late twentieth century. It also explores various interpretations of the legitimacy and ethics of political violence and the phenomenon of terrorism in different historical contexts. In addition to common readings, students will conduct independent research on some aspect of the history of terrorism that will culminate in a 20-page paper.

Class Format: seminar
Requirements/Evaluation: evaluation will be based on class participation, several short papers, oral presentations, and a 20-page research paper.

HIST 434 The Meaning of Diaspora and the Jews of Europe
Crosslistings: HIST 434/JWST 434
Dispersal, exile, migration, statelessness are all aspects of diaspora. And in the study of diasporic peoples and cultures, the Jews have long figured as the archetype. As a result, Jewish political figures, intellectuals, social activists and scholars have played a central role in discussions of the meaning of diaspora, including debates about its political and social implications, its economic value, and cultural significance. In the first half of the semester, in discussions of common readings, the seminar examines various interpretations of Jews' diasporic existence from the nineteenth century to the present, both as a cultural practice and as a form of group identity from which political claims have been made. We will test the proposition that "The Modern Age is the Jewish Age," that is, that the meaning of diaspora in modern Jewish history has direct relevance to students of human identity not just of Jewishness. Throughout the second half of the semester, students will conduct independent archival research on some aspect of the history of the Jewish diaspora that will culminate in a 20-page paper. The seminar will continue to meet weekly as a research colloquium, to provide a forum for students to present their research and drafts in progress and provide feedback on fellow students' work.

Class Format: seminar

HIST 438 Religion and Secularism in Modern Europe and Russia (W)
This course will explore the complex and changing interplay between religion and secularity in modern Europe and Russia through an examination of selected topics from the Enlightenment to the present, including the interrelationships between religion on the one hand and politics, revolution, secularism, anti-Semitism, and Islamophobic ideologies, the formation of imperial and national polities and identities, social and economic change, women and gender, and the rise of consumerism on the other. The influence and fate of religion in modern Europe present a complex and contradictory pattern. Increased religious tolerance and pluralism have coexisted with intense anti-clericalism, militant secularism, virulent anti-Semitism, and Islamophobia; religious revival and innovation have coexisted with skepticism, secularization, and dechristianization; both religion and irreligion have served as bases for political mobilization and powerfully shaped personal, national, and transnational identities. Demonstrating a long-term trajectory toward secularism, Europe for some scholars reflects the inexorable process of modernization; other scholars reject this claim and contend that Europe’s experience is unique in a global context. As evidence, some point to the apparent vitality of religion in imperial Russia and the revival of religious profession and identity in post-communist Russia. In addition to exploring the complex and changing interplay between religion and secularity in modern Europe and Russia through an examination of selected topics from the Enlightenment to the present, including the interrelationships between religion on the one hand and politics, revolution, secularism, anti-Semitism, and Islamophobic ideologies, the formation of imperial and national polities and identities, social and economic change, women and gender, and the rise of consumerism on the other.

Class Format: seminar
Requirements/Evaluation: weekly 2-page responses to readings, two oral presentations, and a research paper
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

HIST 440/LEAD 440 The Russian Revolution at 100 (W)
Crosslistings: HIST 440/LEAD 440
100 years ago the February Revolution of 1917 began a process of revolution through which a new type of political regime attempted to create a modern communist society, economy, and culture. By the 1930s this process of revolutionary transformation had developed into the Stalinist system, characterized by a hypertrophic state, rapid industrialization and the destruction of peasant agriculture, radical social and cultural change combined with traditionalism, and extensive state welfare combined with unprecedented state violence, all presided over by the towering figure of Joseph Stalin. The purpose of this seminar is to enable students to explore the sources and dynamics of this revolutionary process and to assess its meaning and significance in light of the past 100 years through both common readings and a substantial independent research project. Class meetings therefore will be devoted both to the discussion of common readings intended to familiarize students with the main aspects and interpretations of the Revolution, as well as with some of the sources on which these interpretations are based, and to helping students with their research. Research topics can focus on any aspect of the Revolution, defined broadly as the period between 1900 and 1939.

Class Format: seminar
Requirements/Evaluation: short response papers, 2-3 oral presentations, substantial 18- to 25-page research paper, and class discussion
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none, but some familiarity with modern Russian or European history or background in Russian studies would be helpful
Enrollment Preferences: History majors, Leadership Studies concentrators, and students with some background in modern Russian/European history or Russian studies
Enrollment Limit: 14

HIST 444 The Black Republic—Haiti in History and Imagination (D)
Crosslistings: AFR 444/HIST 444

This senior Africana capstone course/History seminar explores the central role of Haiti in the American and the transnational pan-African imaginations. As home to the world's only successful slave rebellion, Haiti has been a role model of tremendous importance, stimulating slave rebellions in America and throughout the Caribbean, playing an instrumental role in the liberation of South America from the Spanish, and inspiring decolonization movements in Africa and the Caribbean in the 20th century. Not surprisingly, it has had tenuous relations with both its colonial occupiers, France, and its most powerful neighbor, the United States. From isolation and sanctions, to occupation and U.S. supported dictatorship, this seminar traces the historical silencing suffered by Haiti at the hands of western historians, the vivid images Haitians evoke in the American imagination—from boat people and carriers of Aids, to practitioners of voodoo and creators of a uniquely African-Caribbean art—and the role of the French and American governments in the recent coup against President Jean-Bertrand Aristide. Film, dance, literature, music, history, anthropology and religion will be explored in this interdisciplinary course, with an eye towards helping students produce an original work of their own as the final project. By examining Haiti's fraught racial relations—particularly between Haitian blacks and mulattoes—and her early and unique black power movement—horticulture—this class fulfills the requirements of the Exploring Diversity Initiative.

Class Format: seminar
Requirements/Evaluation: evaluation to be based on student participation, a short paper, and the completion of an original research paper or project
Extra Info: all projects will have some written component, but may include a dance performance, spoken word, fieldwork etc.
Prerequisites: none

HIST 456/AFR 456/AMST 456

Aids, to practitioners of voodoo and creators of a uniquely African-Caribbean art—and the role of the French and American governments in the recent coup against President Jean-Bertrand Aristide. Film, dance, literature, music, history, anthropology and religion will be explored in this interdisciplinary course, with an eye towards helping students produce an original work of their own as the final project. By examining Haiti's fraught racial relations—particularly between Haitian blacks and mulattoes—and her early and unique black power movement—horticulture—this class fulfills the requirements of the Exploring Diversity Initiative.

Class Format: seminar
Requirements/Evaluation: evaluation to be based on student participation, a short paper, and the completion of an original research paper or project
Extra Info: all projects will have some written component, but may include a dance performance, spoken word, fieldwork etc.
Prerequisites: none
Enrollment Preferences: Africana Studies concentrators and History majors
Enrollment Limit: 15
Expected Class Size: 15
Distributional Requirements: Division 2
Extra Info: the past twenty-five years. This course will consider these conflicts in a comparative context, and will examine when, why, and how appeals to religion, tradition and/or culture have been used to carve out exceptions to otherwise generally applicable laws.

Class Format: seminar
Requirements/Evaluation: 20-page research paper, which students will write
Enrollment Preferences: Women's, Gender and Sexuality Studies majors and History majors
Enrollment Limit: 15
Expected Class Size: 15
Distributional Requirements: Division 2
Writing Intensive
Other Attributes: HIST Group F Electives - U.S. + Canada

HIST 457 Gender, Law, and Politics in U.S. History
Crosslistings: HIST 457/WGSS 457

This seminar explores the legal history of the United States as a gendered system. It examines how women have shaped the meanings of American citizenship through pursuit of political rights and obligations such as suffrage, jury duty, and military service; how those political struggles have varied across race, religion, and class; and how the legal system has shaped gender relations for both women and men through regulation of such issues as marriage, divorce, work, reproduction, and the family. While we will read some court cases, the focus of the seminar is on the broader relationship between law and society. Readings will address not only the history of statutory law, and of the lawsuits and trials testing those laws, but also the social history of the impact of the law and the political history of efforts to change laws.

Class Format: seminar
Requirements/Evaluation: evaluation will be based on an extensive (20-25 page) research paper that makes use of primary and secondary sources, brief papers on the weekly readings, and class participation
Prerequisites: none
Enrollment Preferences: senior History majors
Enrollment Limit: 15
Expected Class Size: 10-15
Distributional Requirements: Division 2
Extra Info: the past twenty-five years. This course will consider these conflicts in a comparative context, and will examine when, why, and how appeals to religion, tradition and/or culture have been used to carve out exceptions to otherwise generally applicable laws.

HIST 459 Jim Crow: American Apartheid (D)
Crosslistings: HIST 459/AFR 459
Between 1865 and 1965 while Americans developed and deployed a set of practices that sanctioned racial discrimination. Jim Crow—as this American system of apartheid was called—is one of the least studied aspects of U. S. History. This course explores the law, cultural, economic, and politics of Jim Crow; the dynamics of racialized power; and the roles of media and history in sustaining racial inequality. Informed by how segregation operated to construct and sustain differences, it qualifies as an Exploring Diversity Initiative course by linking the issue of diversity to the issue of power relations, investigating how American institutions enabled and maintained racial disparities despite constitutional guarantees, and considering how the legacy of racial discrimination affects current domestic issues like public education, affirmative action, and the persistence of poverty. In addition to covering race theory in historical context, the course suggests that current scientific ideas about race—that there are no consequential biological differences among humans—is a recent discovery. Finally, the course examines the discrete development of black communities, institutions, politics, and racial destiny.
Class Format: seminar
Requirements/Evaluation: evaluation will be based on class participation and two shorter assignments leading up to a longer research paper
Enrollment Preferences: junior and senior History majors
Enrollment Limit: 15
Expected Class Size: 10-15

HIST 460(S) Modern American Indian Social and Political History (D)
Crosslistings: AMST 460/HIST 460
Popular narratives of American Indian history often conclude with the 1890 Wounded Knee Massacre and fail to acknowledge the endurance and resurgence of modern Indigenous nations. In this readings seminar, we will historicize modern social and political issues in Native America and examine the processes of resistance, renewal, accommodation, and change from the reservation era to the present. Course topics will include: treaty rights and tribal sovereignty, federal Indian policy, social movements, reservation governance, economic development, cultural revitalization, conflict over natural resources, identity and belonging, and urban experiences. We will also reflect upon the various interdisciplinary sources and interdisciplinary methods of Indigenous studies.
Class Format: seminar
Requirements/Evaluation: attendance/participation in discussion, two short 5-page papers, and a 12- to 15-page final paper
Extra Info: may not be taken on a pass/fail basis
Prerequisites: none
Enrollment Preferences: American Studies majors and History majors
Enrollment Limit: 15
Expected Class Size: 10

HIST 464 The United States and the Vietnam War
Crosslistings: HIST 464/LEAD 464
U.S. involvement in Vietnam affected nearly every aspect of American life, including the country’s overall foreign policy, its military strategy, the relationship between various branches of government, the nation’s political trajectory, the role of media in society, youth culture, race relations, and more. This seminar explores America’s war in Vietnam and its dramatic ramifications at home and abroad. We will evaluate the Vietnam War era as a turning point in U.S. history—and in the role of the U.S. in the world—by reading and discussing a number of scholarly works on domestic and international aspects of the conflict. Students will develop an original research topic and research and write a 20- to 25-page paper, based in primary sources, on one aspect of America’s Vietnam War.
Class Format: seminar
Requirements/Evaluation: evaluation will be based on class participation, several short papers, and a 20- to 25-page research paper
Enrollment Preferences: advanced History majors
Enrollment Limit: 15
Expected Class Size: 10-15
Distributional Requirements: Division 2

HIST 465 War and Remembrance in Vietnam (W)
Crosslistings: HIST 465/ASST 465
This seminar, which includes a required spring break field trip to Vietnam, examines how that country’s twentieth century wars for independence have been remembered, memorialized, and represented by the Vietnamese state, by citizens and scholars, and by the ever-growing number of international tourists who visit Vietnam each year. All class members are eligible to participate in the spring break field trip at no cost. In the weeks leading up to the trip, students will read a number of scholarly works on war and memory that will prepare them to think critically and knowledgeably about the representations of Vietnam’s recent past that they encounter inside the country’s borders. Students will consider the following questions: What factors influence representations of war in Vietnam? What cultural assumptions underlie them? What political, social, or economic purposes might they serve? How do official memorials in state-run museums and monuments differ from other perspectives? How do Vietnamese memories and representations of the Vietnam Wars differ from American memories and representations, and for what reasons? These questions will serve as the basis for a research paper or final project on one aspect of war and remembrance in Vietnam that students will complete during the second half of the semester, based in part on observations recorded during the trip.
Class Format: seminar
Requirements/Evaluation: class participation, several short writing assignments, and a substantial final research paper or other approved final project
Extra Info: may not be taken on a pass/fail basis
Prerequisites: none
Enrollment Preferences: History and Asian Studies majors; students with prior coursework related to the Vietnam Wars
Enrollment Limit: 10
Expected Class Size: 10
Dept. Notes: this course can only accommodate 10 students due to the required field trip to Vietnam, funded by the Global Initiatives Fund
Distributional Requirements: Division 2

HIST 469 Notions of Race and Ethnicity in American Culture (D)
Crosslistings: HIST 469/AMST 469
While “race” and “ethnicity” have always played fundamental roles in shaping the course of American culture and the definition of who is or who can be an “American,” our understanding of these concepts of race and ethnicity has often been less than clear. The purpose of this seminar is to examine how Americans have defined and articulated the concepts of race and ethnicity at various points in our history and how these ideas have been expressed in art, politics, practice, and theory. This course fulfills the Exploring Diversity requirement because it examines various dynamics of power structures based on race and ethnic politics, as well as class and gender relations.
Class Format: seminar
Requirements/Evaluation: evaluation will be based on weekly response papers, an exercise with the Williams College Museum of Art, an annotated bibliography, and a final research paper of 20-25 pages; students will also be required to lead a class discussion
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: previous upper division HIST courses
Enrollment Preferences: senior History majors
Enrollment Limit: 15

HIST 471(S) Comparative Latina/o Migrations (D) (W)
Crosslistings: LATS 471/HIST 471
Since the 1970s, policymakers, scholars, the media, and popular discourses, have used the umbrella terms “Hispanic” and “Latina/o” to refer to Mexicans, Puerto Ricans, Cubans, Dominicans and more recent immigrants from Central and South American countries. As a form of racial/ethnic categorization, however, these umbrella terms can mask widely divergent migration histories and experiences in the United States. In this course, we develop theoretical perspectives and comparative analyses to untangle a complicated web of similarities and differences among Latino groups. How important were their time of arrival and region of settlement? How do we explain differences in socioeconomic status? How fruitful and appropriate are comparative analyses with other racial/ethnic groups, such as African Americans or European
immigrants? Along the way, we explore the emergence of Latina/o Studies as an interdisciplinary and comparative field of study, as well as methods used in Latino and Latina history, specifically oral histories, government documents, newspapers, and interdisciplinary approaches. In this EDI course, we ask whether the history and processes of racialization in the United States has created similarities and/or differences in each group's experiences, and to what extent the field of Latina/o Studies offers an alternative to racial biases embedded in the dominant academic discourses.

**Class Format:** discussion/seminar

**Requirements/Evaluation:** evaluation will be based on class participation and presentations, a proposal, an annotated bibliography, a short historiographical essay, and a research paper based in part on primary sources.

**Prerequisites:** none

**Enrollment Preferences:** Latina/o Studies concentrators

**Enrollment Limit:** 15

**Expected Class Size:** 8-15

**HIST 475 Modern War and Military Leadership**

**Crosslistings:** HIST 475/LEAD 475

From the early nineteenth to the twenty-first century, modern history has been marked by numerous wars fought by nation states. Some of these wars were enormously destructive. Some changed history decisively on a continental or global scale. This modern period of warfare witnessed rapid and dramatic changes in the manner military forces were organized, armed, and led, and in their scale and lethality. From the smoothbore musket to the machine gun, sailing warships to dreadnaught battleships, how-pulled artillery to the atomic bomb, submarines under the oceans and airplanes in the skies, to rockets and smart weapons, war rapidly evolved and continues to evolve today. This course will study these developments, concentrating on conflicts like the Napoleonic wars, the American Civil War, World War I and World War II, with special emphasis upon the evolution of military leaders like Napoleon, Grant and Lee, Moltke, Churchill and Roosevelt, Stalin and Hitler, Nelson and Doenitz, Eisenhower and MacArthur. Is it leadership that provides the key to our understanding of modern warfare? Or is it technology? Or certain "timeless" military principles that transcend local historical contexts? Can history help us foresee the future of warfare?

**Class Format:** seminar

**Requirements/Evaluation:** evaluation will be based on a substantial (no upper limit) research paper on a topic of the student's choice, growing out of some aspect of the course

**Extra Info:** participants will also, in teams of two or three, lead class discussion at least once, as well as give class reports on the course readings may not be taken on a pass/fail basis.

**HIST 4817 America in the 1970s (D) (W)**

The first general history of the 1970s was titled It Seemed Like Nothing Happened. During the last decade, however, a wave of new scholarship has reinterpreted the 1970s, and has redefined it as the "pivotal decade" when the forces that have shaped U.S. history for the past forty years took shape. This course will introduce students to that new scholarship, and will help them to understand and study those forces. Examining a range of topics related to the political, economic, cultural, social and intellectual history of the 1970s, we will pay special attention to the evolving status and meanings of liberalism and conservatism in that decade. This course will also consider the two methodological assumptions embedded in its title—what are the limits and benefits of using a decade as a category of analysis? And what are the limits and benefits of studying that decade through a national lens as opposed to a transnational one?

**Class Format:** Tutorial

**Requirements/Evaluation:** Every other week, students will write and present orally a 5- to 7-page essay on the assigned readings of that week; on alternate weeks, students will write a 2-page critique of their instructor’s paper

**Extra Info:** May not be taken on a pass/fail basis

**Prerequisites:** None

**HIST 483T Freedom in Africa (W)**

Crosslistings: HIST 483/AFR 483/GBST 483

This course examines the ideas of major figures in the progressive tradition of African political thought. This emancipatory tradition emerged in societies shaped by racial, cultural, and economic exploitation, forcing both African men and women to address questions of identity and political action. Most members of this tradition also considered the ways in which uneven power relations within African communities shaped the personal and political landscapes. The Africans we will examine in this course drew on resources as varied as Pan-Africanism, Nationalism, Classical Liberalism, Social Democracy, Marxism, Black Consciousness, Negritude and Gender theory, yet each participated, at least implicitly, in a common African intellectual project: the meaning of Africa and of being African.

**Class Format:** Tutorial; students will meet with the instructor in pairs for an hour each week; a student either will write & present orally a 5- to 7-page essay on the assigned readings or be responsible for offering an oral critique of their partner’s work each week

**Requirements/Evaluation:** Evaluation will be based on the quality of the biweekly papers and oral critiques and a final writing exercise

**Extra Info:** May not be taken on a pass/fail basis; not available for the fifth course option

**HIST 484 (F) Victorian Psychology from the Phrenologists to Freud (W)**

Although the Victorian era has traditionally been considered a psycho-social model of emotional, physical, and sexual prudery, recent studies, by scholars in various disciplines, have demonstrated that this characterization grossly oversimplifies the attitudes toward emotional and sexual life held by Europeans and Americans in the second half of the nineteenth century. This research seminar will investigate professional and popular ideas about human psychology during the Victorian era. We will attempt to define and understand what people thought and felt about insanity, the unconscious, dreams, sexuality, the relationship between natural impulses and civilized society, child psychology and development, the psychological differences between men and women, the relationship between the physical and the psychical. The course has two principal aims. First, students will concentrate on the close reading and analysis of primary documents, including: professional literature in what we would today call psychiatry; philosophical texts, manuals on child rearing, education, sexual practice, and living the wholesome life; and cultural documents. Second, students will produce a substantial research paper investigating one of the topics considered in the course or on one or more of the authors whom we will be reading in the seminar. This project starts from the premise that Victorian ideas about the psyche reveal much about the psyches of Victorians, their hopes and fears, their preoccupations, their attitudes about themselves and the world in which they lived. Setting the work of Sigmund Freud in the context of Victorian psychology is central to this seminar, for many of the ideas associated with Freud derived from assumptions about the psyche characteristic of the Victorian era.

**Class Format:** Seminar

**Requirements/Evaluation:** Weekly reading response papers and a 20-page research paper
HIST 485T After Rome (W)

Crosslistings: HIST 485/CLAS 485

What happened to the Western Roman Empire? Did barbarians destroy it, did internal weakness undermine it, or did its participants voluntarily set it aside in favor of new cultural, social and political ideas? How did the evaporation of imperial political and military structures change the cultural and religious fabric of Europe? And above all, what is it that divides the ancient from the medieval world?

Few questions in European history have occupied historians as insistently as these, and yet for all the lengthy books, ponderous documentaries, and political polemics, we are no closer to a consensus view. This tutorial will approach these timeless questions, first, through a comparative survey of the post-Roman Mediterranean, considering North Africa, Spain, Italy, Gaul, and the Byzantine East in turn. We will consult key primary sources for each region, including tax records, laws, narrative histories, letters, religious texts and archeological finds, as they are variously available. This first-hand experience with the problems of post-Roman history will prepare us to engage with secondary scholarship on the late imperial and early medieval worlds. Alongside the classic catastrophist readings of post-Roman history, which see the centuries after 476 CE as a period of severe economic and social dislocation, we will explore recent arguments that seek to circumvent the problem of Rome's fall by positing an era of economic, cultural and intellectual continuity from the fifth through the eighth centuries.

Class Format: tutorial

Requirements/Evaluation: six essays (5-7 pages each) and six critiques, together with a longer, final essay (ca. 10 pages)

Extra Info: may not be taken on a pass/fail basis

HIST 486T The Pacific War in Japanese Historical Memory (W)

Crosslistings: HIST 486/JAPN 486/ASST 486

Almost seven decades after Japan's surrender, the enduring question of how to remember the Pacific War continues to provoke controversy both within Japan and between Japan, South Korea, and China. This tutorial will explore how the Pacific War has been remembered in postwar Japan, and how and why these memories have changed from 1945 to the present. Our focus will be on certain sites of memory—museums, shrines, literature, textbooks, and films—and how they have expressed and shaped memories of various aspects of the war from the atomic bombings of Hiroshima and Nagasaki to military comfort women and the Nanking massacre. Key issues include how various Japanese have tried to make sense of death and personal sacrifice in the name of a lost war; the implications of Japan's unique position as both perpetrator of wartime atrocities and victim of atomic bombings; the relationship between memory and nationalism; and what it means to come to terms with pasts contested both within and between countries.

Class Format: tutorial; students will meet with the instructor in pairs for an hour each week; a student either will write and present orally a 5- to 7-page essay on the assigned readings or be responsible for offering an oral critique of the work of their partner;

Requirements/Evaluation: students will be evaluated on these essays and critiques, and there will be a final paper (12-15 pages) on the themes of the course

Extra Info: may not be taken on a pass/fail basis

HIST 488T Gandhi: Nationalism, Philosophy, and Legacy (D) (W)

Crosslistings: HIST 488/ASST 488/GBST 488

This course studies the work and ideas of M.K. Gandhi, one of the most influential thinkers of the non-western world. Gandhi is well known today for his philosophy of non-violence and its application in India's freedom struggle as well as his influence on the work of leaders like Martin Luther King and Nelson Mandela. Hailed as the 'father of the Indian nation', however, Gandhi is not only known for his political ideas but also for his deep engagement with aspects of everyday human behavior and morality: truth, vegetarianism, sex and celibacy, to name just a few of his obsessive concerns which contributed to making his broader philosophy. It is this commitment to a morally pure life that earned him the title of 'Mahatma' or Great Soul in India.

The tutorial will focus on three key aspects of Gandhi: his ideas of nationalism, his contemplations on moral philosophy, and his legacy in modern India. The materials will include a combination of Gandhi's own writings as well as journal articles, biographies and films. The course will probe questions such as: What was the nature of Gandhian nationalism? Did it help to integrate the Indian nation? How, if at all, was shaped by Gandhi's engagements with moral philosophy and human behavior? Was Gandhi truly a Great Soul, a saint or a shrewd politician? In what ways is Gandhi received and remembered by the Indian nation today? How does understanding a figure like Gandhi facilitate our understanding of modern nationalism, citizenship and political action?

Class Format: tutorial; students will meet with the instructor each week for one hour sessions in pairs

Requirements/Evaluation: every other week each student will write and orally present a 5- to 7-page essay on the assigned readings of that week; students not presenting an essay will write and present 2 page critique of their partners' work; also a final 10-page paper

Extra Info: may not be taken on a pass/fail basis
HIST 489T Ideology, Culture, and Identity: The "New Diplomatic History" (W)

This course explores a recent wave of historical scholarship on the roles of ideology, culture, and identity in American foreign relations. The proliferation of scholarship in this area has contributed to the revival of the once moribund subfield of diplomatic history and restored it to the mainstream of the historical profession. Yet this "cultural turn" has not come without controversy, as some traditional diplomatic historians insist that it dilutes the subfield and discourages young scholars from engaging in necessary research on high-level diplomacy. Students will read several important "state of the field" essays alongside some of the most exciting contributions to this new trend and consider the following questions: What do these new works add to our understanding of U.S. history and the history of the United States in the World? What roles do ideology, culture, and identity play in the policymaking process? In what ways do these studies complement traditional diplomatic histories that privilege the study of power in the international arena and to what extent are they a separate venture all together? What can "the new diplomatic history" contribute to other historical subfields and vice versa?

Class Format: tutorial
Removed/Evaluation: every other week the student will write and present orally a 5- to 7-page essay on the assigned readings of that week; students not presenting an essay will produce a 2-page critique of their fellow students' work
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none
Enrollment Preferences: History majors and students with some prior course work in foreign relations and/or international history
Distributional Requirements: Division 2
Writing Intensive

HIST 490T(S) Memory, History, and the Extermination of the Jews of Europe (W)

Crosslistings: HIST 490/JWST 490

The atrocities committed by Nazi Germany during the Second World War continue to trouble historians in their attempts to understand and represent them in all their magnitude and horror. Beyond historians, the complicity of segments of European societies in perpetrating those atrocities continues to raise thorny questions for postwar European nations about what their responsibilities toward that past. This tutorial will focus on a series of questions relating to the historicization and memorialization of the extermination of European Jews. They include: Is the Holocaust unique? Is it a Jewish story or a universal story? Does the Holocaust raise different issues for the historian than other historical events? How should the Holocaust be represented and what are the implications of different means of representing it? What role, if any, did European Jews play in their own destruction? Has Germany faced up to its past? Were Germans also victims of World War II? Who were the "bystanders" as compared to the "perpetrators"? Were the postwar trials of perpetrators a travesty of justice? How appropriate are the different uses that Israel and the United States have made of the Holocaust? By the end of the course, students will have grappled with the ongoing controversies that have arisen among scholars, governments, and lay people about the meaning (and meaninglessness) of the Holocaust for the postwar world. In a world in which extraordinary acts of violence continue to be perpetrated, and more and more nations' pasts are marked by episodes of extreme criminality and/or trauma, exploring the manner by which one such episode has been remembered, avenged, and adjudicated should prove relevant for future consideration of other societies' efforts to confront their own traumatic pasts.

Class Format: tutorial; class time consists of weekly one-hour sessions with the instructor and a fellow student
Removed/Evaluation: every other week the student will write and present orally a 5- to 7-page paper on the assigned readings of that week
Extra Info: additional requirements on alternate weeks, the student will write a 2-page critique of the fellow student's paper; a final written exercise, a thought piece on the issues raised in the tutorial, will cap off the semester's work; may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: permission of instructor
Enrollment Preferences: History majors and Jewish Studies concentrators
Distributional Requirements: Division 2
Writing Intensive

TUT Section: T1 TBA Alexandra Garbarini

HIST 491 The Suburbs (W)

Crosslistings: HIST 491/ENVI 491/AMST 490

The suburbs transformed the United States. At the broadest level, they profoundly altered spatial residential geography (especially in terms of race), consumer expectations and behavior, governmental policies, cultural norms and assumptions, societal connections, and Americans' relationship to nature. More specifically, the different waves of post-World War II suburban development have both reflected large-scale shifts in how power and money have operated in the American political economy; and set in motion deep-seated changes in electoral politics, in Americans' understandings of how their income should be used, and in how the built landscape should be re-imagined. This tutorial will explore the rich historical literature that has emerged over the last twenty years to provide students with a history of the suburbs, to see the suburbs as more than simply collections of houses that drew individual homeowners who wanted to leave urban areas. We will focus most of our attention on the period from 1945 through the 1980s. Some of the questions we will consider include: how did the first wave of suburban development break from traditional and Cold War ideologies? Is it possible, as one historian has argued, that suburbs actually created the environmental movement of the 1960s? And how have historians understood the role that suburbs played in America's conservative political turn, leading to the election of Ronald Reagan?

Class Format: tutorial
Requirements/Evaluation: typical tutorial format; every other week, students will write and present orally a 5- to 7-page essay on the assigned readings; on alternate weeks, students will write a 2-page critique
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none
Enrollment Preferences: History majors and students with previous coursework in History
Distributional Requirements: Division 2
Writing Intensive

TUT Section: T1 TBA Roger Kittleson

HIST 493(F) Senior Thesis: Research Seminar

This seminar is intended solely for writers of senior theses. Although each student's major work for the year will be the writing of a thesis in consultation with an individual advisor, students are also required to meet in the context of
the thesis seminar in order to present and critique each other’s proposals and
drafts and to discuss common problems in the research and design of a long
analytical essay. For students proceeding to W31 and HIST 494, performance
in the fall semester will be factored into the thesis grade calculated at the end
of the year. The quality of a student’s performance in the seminar segment of
History 493, as well as his or her performance in all aspects of the May
colloquium at which theses are presented and critiqued, figure in the overall
grade the student earns for History 493-494 and the departmental decision to
award Honors or Highest Honors at Commencement.

Class Format: seminar
Requirements/Evaluation: evaluation will be based on class participation
and completed written work, and will determine if a student will continue in the
thesis program
Extra Info: may not be taken on a pass/fail basis; not available for the fifth
course option
Prerequisites: limited to seniors accepted into the History Department’s
Thesis Program
Distributional Requirements:

HIST 494(S) Senior Thesis: Writing Seminar
This seminar is a continuation of HIST 493 and is required of all senior thesis
writers. Students will meet to discuss draft thesis chapters and prepare for the
Thesis Colloquium in May at which theses will be presented and assessed.
For students proceeding to W31 and HIST 494, performance in fall semester
will figure into the thesis grade calculated at the end of the year. The quality of a student’s performance in the colloquium segment of History 493, as well as his or her performance in all aspects of the May colloquium at which theses are presented and critiqued, will figure into the overall grade the student is
given for History 493-494 and the departmental decision to award Honors or
Highest Honors at Commencement.

Class Format: seminar
Requirements/Evaluation: evaluation will be based on class participation
and completed written work, and will determine if a student will continue in the
thesis program
Extra Info: may not be taken on a pass/fail basis; not available for the fifth
course option

HISTORY OF SCIENCE
(DIV II & III, see course descriptions)
Chair: Professor JOSEPH CRUZ

A major in the History of Science is not offered, but the occasional Contract
Major in it or a related interdisciplinary field is possible. Courses in the History of
Science are designed primarily to complement and strengthen work in other
major fields. Although any of the courses may be taken separately, studying
related courses in other departments will enhance their value, because by
nature, History of Science is interdisciplinary.

The following will serve as examples: the 101 course is an introduction to
science and technology studies, and concentrates on key aspects of
contemporary science and technology relevant to many issues of living in a
technological society. Scientific Revolutions (HSCI 224) deals with the
emergence of modern science in the 1600s and 1700s, and with subsequent
revolutions in scientific thought; such as it complements courses related to
modern European history. History of Science 240 traces the influence of
science and invention in the shaping of American culture, and complements
offering in American Studies and American History. HSCI 320, an historical
overview of the ideas, practice, and organization of medicine, provides context
for related coursework in History, Philosophy, and the Premed and Modern
Health Programs.

Courses of Related Interest
PHIL 209 Philosophy of Science
SOC 368 Technology and Modern Society

HSCI 101(S) Science, Technology, and Human Values
Crosslistings: SCST 101/HSCI 101/SOC 201
This course offers an introduction to science and technology studies, or STS.
A radically interdisciplinary field of inquiry, the roots of STS stretch through the
philosophy, history, and sociology/anthropology of science and technology.
Students will become acquainted with major STS schools, methodological
strategies, and the student exercises through intensive reading and analysis of
classical and contemporary works in the field. Considerable attention will be
devoted to exploring the nature of science and technology, their relationships
to and interactions with one another, society and the natural world, and the
influence that these interactions exert on shaping what humans value. A
fundamental goal of the course is to cultivate awareness and understanding of
the social organization of technology and scientific knowledge production, and
the technoscientific structuring of modern public life broadly. The course as
such is aimed at attracting from all divisions those students who are
intellectually adventurous and inclined to think critically about the place and
prominence of science and technology in the modern world.

Class Format: seminar
Requirements/Evaluation: two or three short exercises, two papers (3-5
pages and 5-7 pages), and two hour exams
Prerequisites: none
Enrollment Preferences: first-years and sophomores
Enrollment Limit: 20-25
Expected Class Size: 20
Distributional Requirements:
Division 2

Spring 2017
SEM Section: 01 TR 08:30 AM 09:45 AM Instructor: Grant Shoffstall

HSCI 263 Cold War Technocultures
Crosslistings: SOC 263/AMST 263/HIST 363/HSCI 263/SCST 263
With the Soviet Union's collapse at the end of the twentieth century and the
emergence of the United States as an unchallenged victor and “new world”
hegemon, how we frame the Cold War and the transition to the Global
Economy will figure into the thesis grade calculated at the end of the year. The quality of a student's performance in the colloquium segment of History 493, as well as his or her performance in all aspects of the May colloquium at which theses are presented and critiqued, will figure into the overall grade the student is
given for History 493-494 and the departmental decision to award Honors or
Highest Honors at Commencement.

Class Format: seminar
Requirements/Evaluation: evaluation will be based on class participation
and completed written work, and will determine if a student will continue in the
thesis program
Extra Info: may not be taken on a pass/fail basis; not available for the fifth
course option
Prerequisites: successful completion of HIST 493; limited to seniors accepted
into the History Department’s Thesis Program
Distributional Requirements:
Division 2

Not Offered Academic Year 2017
SEM Instructor: Grant Shoffstall

HSCI 300 Measuring Truth
Crosslistings: MATH 300/HSCI 300/REL 301/SOC 300
We will examine specific case studies of measuring truth—the emergence of
science and technology in American colleges and universities; the prevalence
of scientific methods in social science and humanities; the ways alternative
methodologies in the humanities critique and historicize scientific approaches
to reaching truth; and the possible tension between scientific modes of
thinking and the aims of the liberal arts.

Class Format: seminar
Requirements/Evaluation: five 2-page papers and a final 15-page paper
Extra Info: may not be taken on a pass/fail basis
Prerequisites: any 200-level course
Enrollment Preferences: at the discretion of the instructors
Enrollment Limit: 20
Expected Class Size: 20
Distributional Notes: meets Division 3 requirement if registration under MATH;
meets division 2 if registration under AFR, HSCIREL or SOC
Distributional Requirements:
Division 3
HSCI 309(F) Environmental Politics and Policy (W)
Crosslistings: ENVI 309/HSCI 309/SCST 309/FSI 301
This course will provide an overview of environmental policy-making, with an emphasis on the ways in which policies are developed and implemented at the local, state and national level. Special attention will be paid to the variety of factors that shape environmental outcomes, including legislators, administrators, the science community, civil society and the private sector. Following an examination of different models of environmental policy-making, this course will focus on several case studies, including on the management of public lands, air and water pollution, climate change and endangered species protection.

Class Format: seminar
Requirements/Evaluation: evaluation is based on several shorter writing assignments, a semester-long research project, and participation
Prerequisites: ENVI 11 or permission of instructor
Enrollment Preferences: Environmental Policy & Environmental Science majors & Environmental Studies concentrators; but other students interested in public policy are welcome
Enrollment Limit: 19
Expected Class Size: 19
Dept. Notes: required course for the Environmental Policy major and the Environmental Studies concentration
Distributional Requirements:
Division 2

HSCI 336 Science, Pseudoscience, and the Two Cultures (W)
Crosslistings: ASTR 336/HSCI 336
A famous dichotomy between the sciences and the humanities, and public understanding of them, was laid down by C. P. Snow and has been widely discussed, with ignorance of the second law of thermodynamics compared with ignorance of Shakespeare. In this seminar, we will consider several aspects of science and scientific culture, including how scientific thinking challenges the claims of pseudoscience. We will consider C. P. Snow and his critics as well as the ideas about the Copernican Revolution and other paradigms invented by Thomas Kuhn. We will discuss the recent "Science Wars" over the validity of scientific ideas. We will consider the fundamental origins of modern science, including Tycho, Kepler, Galileo, and Newton, viewing their original works in the Chapin Library of rare books and comparing their interests in science with what we now call pseudoscience, like alchemy. We will review the history and psychology of astrology and other pseudosciences, Building on the work of Martin Gardner in Fads and Fallacies in the Name of Science, and using the current journal The Scientific Review of Alternative Medicine, we consider from a scientific point of view what is now called complementary and alternative medicine, including both older versions such as chiropractic and newer nonscientific practices. We will discuss the current global-climate-change deniers and their effects on policy. We consider such topics as GM (genetically modified) foods, the safety and regulation of dietary supplements, and the validity of government and other recommendations relevant to the roles of dietary salt and fat in health. We consider the search for extraterrestrial intelligence (SETI) and reports of UFO's and aliens. We consider the possible effects that superstitious beliefs have on the general public's cooperation in vaccination programs and other consequences of superstition. We also consider the recently increased range of dramas that are based on scientific themes, such as Tom Stoppard's Arcadia and Michael Frayn's Copenhagen.

Class Format: seminar
Requirements/Evaluation: evaluation will be based on biweekly 5-page papers, participation in discussions, and a 15-page final paper
Prerequisites: none
Enrollment Preferences: juniors and seniors and to those with backgrounds in science, history of science, or philosophy.
Enrollment Limit: 12
Expected Class Size: 12
Dept. Notes: non-major course; does not count toward ASPH, ASTR or PHYS major

HSCI 340 Great Astronomers and Their Original Publications (W)
In the 2014-15 academic year of the study of the book, honoring the new library and the expansion of the Chapin Library of Rare Books, we study many of the greatest names in the history of astronomy, consider their biographies, assess their leadership roles in advancing science, and examine and handle their first-edition books and other publications. Our study includes the original books published as follows: 16th-century, Nicolaus Copernicus (heliocentric universe), Tycho Brahe (best pre-telescopic observations); 17th-century, Galileo (discoveries with his first astronomical telescope, 1610; sunspots, 1613; Dialogo, 1632), Johannes Kepler (laws of planetary motion, 1609, 1619), Johannes Hevelius and Elisabeth Hevelius (atlases of stars and of the Moon, 1647 and 1687); Isaac Newton (laws of universal gravitation and of motion, 1687); 18th-century, Edmond Halley (Miscellanea curiosa, eclipse maps, 1715, 1724); John Flamsteed and Margaret Flamsteed (Atlas Coelestis, 1729); William Herschel and Caroline Herschel (1781, 1798). In more recent centuries, the original works are articles: 20th-century: Albert Einstein (special relativity, 1905; general relativity, 1916); Marie Curie (radioactivity); Cecilia Payne-Gaposchkin (hydrogen dominating stars, 1929), Edwin Hubble (Hubble's law, 1929); Vera Rubin (dark matter, 1970s); Jocelyn Bell (pulsar discovery, 1967); 21st-century: Wendy Freedman (Universe's expansion rate, 2000s). We will also read biographies and recent novels dealing with some of the above astronomers. With the collaboration of the librarians, we will meet regularly in the Chapin Library of Rare Books and also have a session at the library of the Clark Art Institute to see its rare books of astronomical interest.

Class Format: seminar
Requirements/Evaluation: class participation, two 5-page intermediate papers, and a final 15-page paper
Enrollment Preferences: if over enrolled, preference by written paragraph of explanation of why student wants to take the course
Enrollment Limit: 15
Division Notes: meets Division 3 requirement if registration is under ASTR; meets Division 2 requirement if registration is under HSCI or LEAD

SEM Instructor: Jay Pasachoff

HSCI 371(S) Medicine, Technology, and Modern Power
Crosslistings: SOC 371/HSCI 371/SCST 371
Medicalization: processes by which previously non-medical problems, once defined as ethical-religious, legal or social (e.g. drug and alcohol addiction, shyness, obesity), are brought within the purview of medical science and redefined as medical problems, usually in terms of "illness" or "disorder." Part I: The history of the medicalization thesis; medicalization as a technical process; modern medicine as a form of social control; critiques of the medicalization thesis. Part II: From medicalization to biomedicalization; from the management of human life to the transformation of "life itself" by way of post-World War II technoscientific interventions aimed at "optimizing" human vitality. Empirical cases for consideration will be drawn from those technoscientific developments having made possible the work of optimization that defines biomedicalization: molecular biology, pharmacogenomics, biotechnologies, imaging techniques, robotics, and transplant medicine, among others. Finally, a consideration of how processes of biomedical optimization have produced new ways of seeing, knowing, and imagining human bodies, such that biology is increasingly less representative of "destiny" than it was in the past. The course will end with this conclusion and engage with a survey of emerging issues in speculative technoscience and the ethics and politics of human enhancement.

Class Format: lecture
Requirements/Evaluation: weekly discussion précis, science-fiction book review essay, class presentations, and a take-home midterm
Extra Info: may not be taken on a pass/fail basis
Prerequisites: none
Enrollment Preferences: preference will be given to Anthropology and Sociology students
Enrollment Limit: 25

INTERDISCIPLINARY STUDIES

(DIV II, with some exceptions as noted in course descriptions)
Chair: Professor PETER JUST

Advisory Committee: Professors: W. DARROW**, P. JUST, B. ZIMMERBERG***, Associate Professor: J. CRUZ. Assistant Professor: S. HAMMERSCHLAG.

This program is designed to facilitate and promote innovations in curricular offerings in relation both to interdisciplinary conceptual focus and experimental pedagogical form. It provides support for faculty and student efforts to develop a curriculum that creatively responds to intellectual needs and modes of teaching/learning that currently fall outside the conventional pattern.

EXPR 245 (Re)presenting Sex: Shakespeare on Page and Stage
Crosslistings: EXPR 245, THEA 245, WGS 245
This experimental course approaches the question of how sex and sexual identity are portrayed in Shakespeare from two different directions-close reading focused on the page and acting centered on the stage. These two critical modes—reading the text versus performing the script—are often treated in compartmentalized fashion as separate, even incompatible activities. Our goal is to take up the challenge of bringing the two perspectives together within the framework of a single, integrated course. The teaching method is to bridge the gap between the two modes not by magically dissolving, but by actively engaging, the tensions between them. For example, no performance can include all the possible interpretations; performance decisions raise questions about what alternatives have been left out. Similarly, when all interpretive possibilities are held in imaginative suspension, the specifics of bodily movement and face-to-face interaction whose meanings emerge when enacted are lost. We propose to put the two orientations in a productive and innovative dialogue that enables students to experience the tension from both sides, to articulate the opportunities and limits of each side, and to combine their respective strengths. The mix of assignments (papers and scene work) will vary depending on whether students designate themselves as primarily scholars or actors, but some overlap will be built in to ensure that scholars gain understanding of acting and actors gain access to scholarship. All students will be expected to demonstrate versatility in traversing the full spectrum from interpretation through reading to interpretation through performance. The specific topic that will bring these theoretical issues into focus is the matter of sex and sexual identity, as illuminated through the analysis of language, psychology, and theatrical embodiment. Six plays will be studied in depth: The Merchant of Venice, Twelfth Night, Othello, King Lear, Antony and Cleopatra, and The Winter’s Tale.

Class Format: lecture/discussion, with additional periods set aside for scene presentation
Requirements/Evaluation: evaluation will be based on several short papers and a final exam. All students will take the final. "scholar" students will have rigorous expectations in the writing of papers; "actor" students will have intensive (graded) performance expectations
Prerequisites: none; students wishing to enroll as Acting Students should consult with instructors
Enrollment Limit: 20
Expected Class Size: 15

LEC   Instructor: Robert Baker-White

EXPR 420(F) Architecture and Sustainability in a Global World (W)
Crosslistings: ARTH 420, ENVI 420, GBST 420, EXPR 420
What does it mean to create a sustainable built environment? What do such environments look like? Do they look the same for different people across different times and spaces? This course takes these questions as starting points in exploring the concept of architectural sustainability, defined as "minimizing the negative impact of built form on the surrounding landscape," and how this concept can be interpreted not only from an environmental point of view, but from cultural, political, and social perspectives as well. Over the course of the class, students will explore different conceptualizations of sustainability and how these conceptualizations take form in built environments in response to the cultural identities, political agendas, social norms, gender roles, and religious values circulating in society at any given moment. In recognizing the relationship between the way things are constructed (technique of assembly, technology, materials, process) and the deeper meanings behind the structural languages deployed, students will come to understand sustainability as a fundamentally context-specific ideal, and its manifestation within the architectural environment as a mode of producing dialogues about the anticipated futures of both cultural and architectural worlds.
Class Format: seminar
Requirements/Evaluation: response papers on class readings (2 pages), leading class discussions, and final project/paper (15-20 pages) and presentation
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none, although a course in art/architectural history would be advantageous

Enrollment Preferences: Art History majors, Environmental Studies majors
Enrollment Limit: 19

INTR 160 Mathematical Politics: Voting, Power, and Conflict (Q)
Crosslistings: MATH 115/INTR 160
Who should have won the 2000 Presidential Election? Do any two senators really have equal power in passing legislation? How can marital assets be divided fairly? While these questions are of interest to many social scientists, a mathematical perspective can offer a quantitative analysis of issues like these and more. In this course, we will discuss the advantages and disadvantages of various types of voting systems and show that, in fact, any such system is flawed. We will also examine a quantitative definition of power and the principles behind fair division. Along the way, we will enhance the critical reasoning skills necessary to tackle any type of problem mathematical or otherwise.
Class Format: lecture/discussion
Requirements/Evaluation: evaluation will be based primarily on projects, homework assignments, and exams
Prerequisites: MATH 102 (or demonstrated proficiency on a diagnostic test) or permission of instructor
Enrollment Limit: 30
Expected Class Size: 30
Distributional Requirements:
Division 3
Quantitative/Formal Reasoning

Not Offered Academic Year 2017
LEC   Instructor: Allison Pacelli

INTR 210 Culture and Incarceration
Crosslistings: PSCI 210/AFR 210/AMST 210/WGSS 210/INTR 210
This seminar examines incarceration, immigration detention centers, and the death penalty from historical and contemporary perspectives. Students will study and examine interdisciplinary texts as well primary sources (legislatures and criminal codes and writings by the incarcerated). The emphasis will be on the study of social attitudes concerning ethnic groups, gender/sexuality and class as they pertain to a "penal culture" in the United States.
Class Format: seminar
Requirements/Evaluation: attendance and active participation (10%); collective/group presentations (30%); four 5-page double spaced e-papers (80%)
Prerequisites: none
Enrollment Preferences: juniors and seniors, or sophomores with permission of instructor
Enrollment Limit: 15
Distributional Requirements:

INTR 219(F) Women in National Politics (W)
Crosslistings: INTR 219/PSCI 219/WGSS 219
This tutorial focuses on the writings and memoirs of women who have shaped national political and electoral/campaign culture in the 20th and early 21st centuries. Women studied include: Fannie Lou Hamer, Barbara Jordan, Shirley Chisholm, Lani Guinier, Madeleine Albright, Hillary Clinton, Condoleezza Rice, Sarah Palin, Nancy Pelosi.
Class Format: tutorial

Not Offered Academic Year 2017

INTR 223(S) Image, Imaging, and Imagining: The Brain and Visual Arts
Crosslistings: PSYC 316/INTR 223/NSCI 318
This course will study the intersections of neuroscience and art. The brain interprets the visual world and generates cognitive and emotional responses to what we see. It is also responsible for creating mental images and then directing the artist's motor output. We will first examine the neural mechanisms of how we perceive what we see. We will investigate how visual artists have used or challenged perceptual cues in their work. Understanding how the brain perceives faces will be used to analyze portraiture. We will consider the influence of neurological and psychological disorders on artistic work. We will examine neuroimaging studies questioning whether the brains of visual artists are specialized differently from non-artists. Finally, we will work. We will examine neuroimaging studies questioning whether the brains of visual artists are specialized differently from non-artists. Finally, we will explore how contemporary artists are using brain images in their artwork, and how "outsider" artists have portrayed brain syndromes and mental states.
Students will conduct an empirical laboratory project that will explore their own experimental question in response to the course material. The class will include field trips to local museums.
Class Format: seminar and empirical lab course
Requirements/Evaluation: evaluation will be based on a midterm, participation in class discussions, and a poster presentation of the empirical project.
Extra Info: satisfies one semester of Division III requirement may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: PSYC 101, an ARTH or ARTS course, or permission of instructor
Enrollment Preferences: Studio Art majors; Psychology majors and Neuroscience concentrators
Enrollment Limit: 12
Expected Class Size: 12
Distribution Notes: meets Division 3 requirement if registration is under PSYC
Introduction of the course, students will be expected a) to photograph extensively outside of scheduled class hours b) to participate in class discussion and in both oral and written critique, c) to present one paper, and d) to exhibit their work at the end of the semester.
Prerequisites: 200 level; students from all disciplines are welcome; previous photography experience is desirable, but not essential; permission of instructor is required
Enrollment Preferences: portfolio review; permission of the instructor
Enrollment Limit: 10
Expected Class Size: 10

INTR 252 The Human Image: Photographing People and Their Stories
Crosslistings: INTR 252/ARTS 252
The single most photographed subject is the human form. The motivations and strategies for imaging faces and bodies, both individual and aggregate, are as varied as the subjects themselves. In this course, we will examine some of the many approaches used to photograph people. We'll start by exploring self-portraiture, and progress to photographing others—both familiar and strangers, in the studio and in less controlled environments. We'll end with a consideration of "documentary" photography and other visual narratives. In each case, we'll examine our reasons for making an image, and the methods available for achieving these goals. Thus, the class will have a significant technical component, dealing with the creative use of camera controls, the properties and uses of light, and digital capture and processing. We will also examine the conceptual and scientific bases for how we perceive and evaluate images. Students will initially use school-supplied digital cameras, and later have the option of using film.
Class Format: studio/lecture
Requirements/Evaluation: students will be expected a) to photograph extensively outside of scheduled class hours b) to participate in class discussion and in both oral and written critique, c) to present one paper, and d) to exhibit their work at the end of the semester.

INTR 252 The Human Image: Photographing People and Their Stories
Crosslistings: INTR 252/ARTS 252
The single most photographed subject is the human form. The motivations and strategies for imaging faces and bodies, both individual and aggregate, are as varied as the subjects themselves. In this course, we will examine some of the many approaches used to photograph people. We'll start by exploring self-portraiture, and progress to photographing others—both familiar and strangers, in the studio and in less controlled environments. We'll end with a consideration of "documentary" photography and other visual narratives. In each case, we'll examine our reasons for making an image, and the methods available for achieving these goals. Thus, the class will have a significant technical component, dealing with the creative use of camera controls, the properties and uses of light, and digital capture and processing. We will also examine the conceptual and scientific bases for how we perceive and evaluate images. Students will initially use school-supplied digital cameras, and later have the option of using film.
Class Format: studio/lecture
Requirements/Evaluation: students will be expected a) to photograph extensively outside of scheduled class hours b) to participate in class discussion and in both oral and written critique, c) to present one paper, and d) to exhibit their work at the end of the semester.
Prerequisites: 200 level; students from all disciplines are welcome; previous photography experience is desirable, but not essential; permission of instructor is required
Enrollment Preferences: portfolio review; permission of the instructor
Enrollment Limit: 10
Expected Class Size: 10
Materials/Lab Fee: lab fee of $250 to be added to the student's term bill
Distribution Notes: meets Division 1 requirement if registration is under INTR

INTR 343(T) Representations of Racial-Sexual Violence from Enslavement to Emancipation (D) (W)

Crosslistings: INTR 343/WGSS 343/AFR 343/AMST 343

This tutorial examines representations of and resistance to racial-sexual violence from enslavement to post-emancipation and contemporary culture in the United States. Texts include: legal articles; historical analyses such as D'Emilio et al., Intimate Matters; Hartman, Scenes of Subjection; Smith, Killers of the Dream; McVie, At the Dark End of the Street; and films such as Griffith, Birth of a Nation; Micheaux, Within Our Gates; Gerima, Bush Mama. The primary focus is on black life, vulnerability to violence and mobilization for freedom during antebellum, postbellum/Reconstruction years of the 19th century; and 20th century convict prison lease system, Jim Crow segregation mass incarceration.

INTR 361(F) Writing about Bodies (W)

Crosslistings: ARTH 361/INTR 361/WGSS 361/THEA 361

The goal is to think about describing bodies from a variety of disciplinary approaches and genres of writing. Its focus is on living bodies, or bodies that were once alive, with an emphasis on bodies that move i.e., performing bodies—actors, dancers, singers—and what makes them unique. We will also consider objects associated with bodies, and the ways they are animated, including how they are animated when the person who had them dies. The course is meant for juniors, seniors, and graduate students who wish to analyze bodies from different disciplinary formations—art, theatre, literature, anthropology, philosophy—and who have a particular interest in writing. We will read scholarly writing, fiction, New Yorker profiles, as well as memoir/autobiography, and take each as a model through which to write about a person or an object redolent of a person. Among possible readings: Roland Barthes on cultural theory and representation; Claudia Rankine and Robin Coste Lewis on black bodies; Tamar Garb on portraiture; Elaine Scarry on the body in pain; Joan Aoccella, Hilton Als, Judith Thurman and other writers on the arts; Judith Butler and Peggy Phelan on the performative body; Marvin Carlson and Terry Castle on hauntology; and Bill Brown and Mark Doty on things. In addition to readings, assignments include performances at the '62 Center and works on view at WCMA, as well as selected tapes of live performances as well as films.

Class Format: seminar

Requirements/Evaluation: alternating weekly essays (4-5 pages) and responses (2-4 pages) as well as discussion; one to two group meetings

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: none; open to first-year students

JEWISH STUDIES (DIV II)
Chair: Professor EDAN DEKEL
Advisory Committee: Professor: M. BERNHARDSO. S. FOX, A. GARBARINI. Associate Professors: E. DEKEL. Assistant Professor: J. ISRAEL.

THE PROGRAM IN JEWISH STUDIES
Jewish Studies is an interdisciplinary field that encompasses the texts, history, languages, philosophy, and culture of Jews and Judaism as they have changed over three millennia and throughout the world. The program offers courses in multiple disciplines including but not limited to Religion, Classics, History, Philosophy, Anthropology, Sociology, and Comparative Literature. Across these disciplines, the program examines topics such as religious belief and practice, textual interpretation, the development of Zionism, life in the Diaspora, the historicization and memorialization of the Holocaust, and historical, political and philosophical questions surrounding Jewish identity. Investigating the foundations and development of these various Jewish topics, as well as their interaction with and influence on other traditions, provides an opportunity to explore the continuities and diversity of Jewish life and thought. Students will gain exposure to a common body of knowledge and scholarly approaches through which to engage in their own rich and varied intellectual explorations of Jewish and related topics.

CONCENTRATION IN JEWISH STUDIES
The concentration in Jewish Studies requires five courses with at least two different prefixes: one gateway course, two core courses, one elective, and one capstone course. Senior concentrators should consult with the chair about arrangements for a capstone course.

Gateway Courses (can also count as core courses):
REL 201/COMP 201 JWST 201 The Hebrew Bible
REL 203/JWST 101 Judaism: Before the Law

Core Courses
ANTH 334/COMP 334/JWST 334/REL 334 Imagining Joseph

REL 259/ENGL 259/JWST 259 Ethics of Jewish American Fiction
REL 330/PSCI 375/JWST 492 Modern Jewish Political Theory

Elective Courses
Students may meet the elective requirement with a course partially related to Jewish Studies or another core course. In an elective course partially related to Jewish Studies, a student will normally focus at least one of the major writing assignments on a topic relevant to Jewish Studies or approximately one-third of the course will be devoted to Jewish subjects. The list of relevant electives changes regularly, so the course catalog should be checked for details. Listed below are examples of courses partially related to Jewish Studies. Students may meet the elective requirement with a course not listed here, subject to the approval of the Chair of Jewish Studies.

JWST 201(F) The Hebrew Bible
Crosslistings: REL 201/COMP 201/JWST 201
The Hebrew Bible is perhaps the single most influential work in the history of Western philosophy, literature, and art. But the overwhelming presence of the text in nearly every aspect of modern culture often obscures the sheer brilliance of its narrative technique as well as the complex interplay between law, history, prophecy, and poetry. This course offers a comprehensive introduction to the literary, historical, and theological aspects of the Hebrew Bible with an eye towards developing a sophisticated understanding of the text in its ancient context. Through the close reading of substantial portions of the Hebrew Scripture in translation and the application of various modern critical approaches to the literature, students will explore fundamental questions about the social, ritual, and philosophical history of ancient Israel, as well as the fundamental power of storytelling that has resonated across two millennia.

Class Format: lecture/discussion

JWST 202 Moses: Stranger in a Strange Land
Crosslistings: REL 202/JWST 202/COMP 214
As chieflain, priest, prophet, and lawgiver all in one, Moses occupies the central place in the history of Israelite and Jewish leaders. However, he is a somewhat unlikely candidate for such an important role. He is God's chosen leader among the enslaved Israelites, but he is raised as an Egyptian prince. He is a spokesman for his people, but he is slow of speech. He is the lawgiver and first judge of his nation, yet he is quick-tempered and impatient. The story of the most revered figure in the Jewish tradition, who nevertheless remains an outsider to the very end, has fascinated commentators and inspired countless artistic and literary interpretations. This course will engage in a close study of the figure of Moses by examining the biblical narrative of his life and career from Exodus through Deuteronomy with an eye towards understanding the complex and often contradictory portrait of this self-described "stranger in a strange land." We will also examine some of the ancient legendary and folkloric accounts about Moses, as well as philosophical and allegorical treatments in Hellenistic Jewish, early Christian, and Muslim biographies. We will then proceed to investigate key modern reconfigurations and critiques of Moses in several genres, which may include religious, historical, and political contexts. The first ten chapters of Genesis present a tantalizingly brief overview of the entire history of existential literature. At the same time, the sheer poetic force of the story has inspired some of the greatest artistic and literary meditations in the Western tradition. This course will engage in a close reading of the Book of Job in its full cultural, religious, and historical context with special attention to its literary, philosophical, and psychological dimensions. We will then proceed to investigate key modern works in several genres that involve Joban motifs, themes, and text both explicitly and implicitly. These texts will include Franz Kafka's The Trial, Archibald MacLeish's J.B., Robert Frost's "Masque of Reason," Carl Jung's Answer to Job, and William Blake's Illustrations to the Book of Job. All readings are in translation.

JWST 206(S) The Book of Job and Joban Literature (W)
Crosslistings: REL 206/COMP 206/JWST 206
The Book of Job has often been described as the most philosophical book of the Hebrew Bible. The story of one man's struggle to understand the cause of his suffering and his relationship to God represents the finest flowering of the Near Eastern wisdom literature tradition. Through its exploration of fundamental issues concerning human suffering, fate and divinity, and the nature of philosophical self-examination, Job has served as a touchstone for the entire history of existential literature. At the same time, the sheer poetic force of the story has inspired some of the greatest artistic and literary meditations in the Western tradition. This course will engage in a close reading of the Book of Job in its full cultural, religious, and historical context with special attention to its literary, philosophical, and psychological dimensions. We will then proceed to investigate key modern works in several genres that involve Joban motifs, themes, and text both explicitly and implicitly. These texts will include Franz Kafka's The Trial, Archibald MacLeish's J.B., Robert Frost's "Masque of Reason," Carl Jung's Answer to Job, and William Blake's Illustrations to the Book of Job. JWST 207 From Adam to Noah: Literary Imaginative and the Preemval History in Genesis
Crosslistings: REL 207/COMP 250/JWST 207/CLAS 207
How long did Adam and Eve live in the Garden of Eden? What was the mark of Cain? Why did Enoch not die? Who was Noah's wife? How did Giants survive the Flood? These are only a few of the fascinating questions that ancient readers and interpreters of the Book of Genesis asked and attempted to answer. The first ten chapters of Genesis present a tantalizingly brief narrative account of the earliest history of humankind. The text moves swiftly from the Creation to the Flood and its immediate aftermath, but this masterful economy of style leaves many details unexplained. This course will explore the rich and varied literary traditions associated with the preemval history in the Genesis. Through a close reading of ancient noncanonical sources such as the Book of Enoch, Jubilees, and the Life of Adam and Eve, as well as Jewish traditions represented in Josephus, Philo, and Rabbinic literature and other accounts presented in early Christian and Gnostic texts, we will investigate the ways in which the elliptical style of Genesis generated a massive body of ancient folklore, creative exegesis, and explicit literary re-imagining of the early history of humankind. We will then turn to several continuations of these variant traditions in medieval and early modern literature, with particular attention to the extensive material on the figures of Cain and Noah. All readings are in translation.

JWST 205 Ancient Wisdom Literature
Crosslistings: REL 205/CLAS 205/COMP 217/JWST 205
The Biblical books of Proverbs, Ecclesiastes, and Job are often grouped together under the Hebrew category of hokhmah, 'wisdom.' Although these books are very different in content, they can all be interpreted as meditations on ethical and practical philosophy. In this way, they represent the Hebrew Bible's canonical embrace of a widespread Near Eastern literary phenomenon. From the instructional literature of Egypt and Mesopotamia to Greek didactic poetry and fables, ancient Mediterranean cultures offer a wide range of texts that engage the issues of personal behavior, leadership, and justice. Starting with the central wisdom books of the Hebrew Bible and moving through relevant material from the Apocrypha, New Testament, and the Egyptian and Babylonian traditions, this course will examine the literature of wisdom throughout the ancient world with an eye toward understanding its various social, political, and philosophical contexts. We will then consider the Greek wisdom tradition in such texts as Socrates' works and Days, Aesop's fables, and fragments from the pre-Socratic philosophers. Finally, we will explore the influence of these ancient sources on later expressions of wisdom in medieval European literature, as well as more recent examples such as Benjamin Franklin's Poor Richard's Almanack. All readings are in translation.

JWST 259 Ethics of Jewish American Fiction (W)
Crosslistings: REL 259/ENGL 259
JWST 259
After the Second World War, Jewish American writers who wrote about Jewish
characters and Jewish themes were increasingly celebrated as central figures
in American fiction. Isaac Bashevis Singer, Bernard Malamud, Saul Bellow,
Cynthia Ozick, and Philip Roth are among those who gained prominence in
this period. These writers were literary innovators and often addressed broad
humanistic themes. But they also struggled with profound questions that arose in
the postwar period about Jewishness, the legacy of the Holocaust, and what it
meant to be an American. In this course we will read the above authors and
others. We will focus, in particular, on the distinctive ethical and political ideas,
emotions, and aspirations that animate their work. The course will begin with a
study of theoretical approaches that will provide the basis for our ethical
criticism: we will read, for instance, Lionel Trilling, Wayne Booth, Martha
Nussbaum, and Noël Carroll. Then we will delve into the fiction, following a

JWST 334 Imagining Joseph (W)
Crosslistings: ANTH 334/COMP 334/JWST 334/REL 334
Beloved son, rival brother, faithful servant, dreamer, seer, subject of desire, lover, husband, bureaucrat. Joseph is one of the most fully-imagined and
compelling figures in the Jewish, Christian, and Muslim scriptural traditions.
The story of Joseph unfolds over fourteen chapters in the Hebrew Bible, and is
beloved son, rival brother, faithful servant, dreamer, seer, subject of desire, lover, husband, bureaucrat. Joseph is one of the most fully-imagined and
compelling figures in the Jewish, Christian, and Muslim scriptural traditions.
The story of Joseph unfolds over fourteen chapters in the Hebrew Bible, and is
the subject of dozens of accounts in rabbinic and midrashic sources. In the
second millennium, the story of Joseph has inspired a wealth of interpretations, commentaries, apocrypha, re-tellings, and back-story, including an apocryphal book of scripture about Joseph and his wife, Asetnah, a novel by Joseph and Zuleika (Potiphar's wife), a trilogy by the 20th century German novelist
Thomas Mann, a musical by Andrew Lloyd Weber, and many expressions in
Western visual art. The course will explore these various expressions, looking
to them for the ways in which Joseph has captured the imaginations of
peoples and cultures across time and space. The course will be organized as
a collaborative seminar in which the class will read the foundational scriptures
together, followed by thematic discussions to which students will contribute
insights from their own readings of particular peripheral texts. Students will
learn the pleasures of close and intense exegetical reading in approaching the
Hebrew Bible and Qur'an, as well as the more expansive pleasures of linking
post-scriptural expressions together.

JWST 338(F) The History of the Holocaust
Crosslistings: HIST 338/JWST 338/REL 296
In twenty-first century United States, the murder of approximately six million European Jews by Nazi Germany remains a central event in our political, moral, and cultural universe. Nevertheless, the Holocaust still confounds historians’ efforts to understand both the motivations of the perpetrators and the suffering of the victims. In this course, we will study the origins and unfolding of Nazi Germany’s genocidal policies, taking into account the perspectives of those who carried out mass murder as well as the experiences and responses of Jews and other victim groups to persecution. We will also examine the Holocaust within the larger context of the history of World War II in Europe and highlight Germany’s exterminationary war aims. Course materials will include readings, diaries, bureaucratic documents, memoirs, films, and historical scholarship.
Class Format: mostly discussion

JWST 343 Spectacles on His Nose and Autumn on his Heart: The Oeuvre of Isaac Babel (D) (W)
Crosslistings: RUSS 343/COMP 343/JWST 343/GBST 343
Known alternately as “master of the short story” and “Russian Maupassant,” Isaac Babel was not only one of the most celebrated and intriguing authors of early Soviet Russia, but also a cultural figure of profound national and international significance. For a number of reasons (political, aesthetic, professional, ethical) Babel was not prolific and this will allow us to read almost all of his creative output, something we rarely get to do in the course of a single semester. Babel’s writing is extremely varied—it includes sketches, journalistic prose, short stories, plays, movie scripts, one unfinished novel— and richly intertextual. This will afford us the opportunity to read the work of some of his contemporaries and predecessors, from both Russia and abroad, with whom he fashioned brilliant literary conversations, among them Guey de Maupassant, Anton Chekhov, Sholem Aleichem, and Ivan Turgenev. Babel saw self-definition as the core of his writing and as an EDI offering, this course will ask students to reflect on what it meant to be a Russian, a Jew, and a non-party author—an outsider, insider, and problematic hybrid rolled into one—in the highly unsettled, and unsettling, 1920s and 1930s. All course readings will be in translation, but students are highly encouraged to read in the original (Russian, French, Yiddish) whenever possible.
Class Format: seminar

JWST 352 Writing after the Disaster: The Literature of Exile
Crosslistings: COMP 352/JWST 352/RLSP 352
This course will consider different kinds of works (poetry, memoirs, fiction, essay) written by authors forced to live in exile as a consequence of political and/or religious persecution. Our point of departure will be the paradigmatic expulsion and subsequent diaspora of the Jews of Spain and Portugal. Most assignments, however, will be drawn from twentieth century texts written during, or in the wake of, the massive destruction and displacements brought about by the Spanish Civil War and World War II. How is the life lost portrayed? How are the concepts of home and the past intertwined? What kind of light or literature are possible for the deracinated survivor? We will discuss the role of writing and remembrance in relation to political history, as well as in the context of individual survival. Readings might include works by Núñez de Reinoso, León, Cemuda, Sepurén, Benjamin, Nancy, and Blanchot.
Class Format: seminar
Requirements/Evaluation: active participation in class discussions, several short writing assignments, a midterm paper and a final paper
Prerequisites: COMP 111 or an equivalent ENGL course
Enrollment Preferences: Comparative Literature majors

JWST 410 Kings, Heroes, Gods, & Monsters: Historical Texts and Modern Identities in the Middle East (D) (W)
Crosslistings: HIST 410/ARAB 410/JWST 410/REL 405
What role does ancient history play in modern societies? What is the role of myths and fables in the creation of national identities? This course will address the use and abuse of ancient history and archaeology in the modern Middle East. The first part will focus on some of the primary ancient texts, with special focus on Ferdowsi’s epic Shahnameh (Book of Kings); we will compare its themes and world view with those of the Icelandic sagas that share many similarities with the Iranian canon. In the second part of the course we will explore how ancient history, archaeology, and epic texts helped forge national identities in the modern Middle East. Our primary attention will be Iran and its relationship with the Shahnameh. But we will also consider the relationship of Biblical history to the establishment of modern Israel and Israeli nationalism, how contemporary Egypt relates to its Pharaonic past, the obsession with pre-Islamic history in modern Turkey, and the relationship between archaeological artifacts and ancient Mesopotamian history and 20th century Iraqi politics. Because of its comparative focus, this course is part of the Exploring Diversity initiative.
Class Format: seminar
Requirements/Evaluation: a final, 25-page research paper on the relationship between ancient history and a modern Middle Eastern country, shorter papers, and group work
Prerequisites: previous upper division work in HIST or courses on the Middle East
Enrollment Preferences: History majors, Jewish Studies concentrators, Arabic Studies majors, and other students with a strong background in Middle East studies

JWST 433 The Justice of Violence? Histories of Terrorism in Europe
Crosslistings: HIST 433/JWST 433
The word "terrorism" entered the English language in 1795, an import from France that referred to the use of violence and intimidation by the ruling party during one phase of the French Revolution. Over the ensuing two centuries, terrorism has come to refer to the employment of violence, not only as a means of governing, but also and more often as a means of undermining the authority of those in power. This seminar examines a series of episodes of terrorism in Europe from the "Terror" of the French Revolution to the late twentieth century. It also explores various interpretations of the legitimacy and ethics of political violence and the phenomenon of terrorism in different historical contexts. In addition to common readings, students will conduct independent research on some aspect of the history of terrorism that will culminate in a 20-page paper.
Class Format: seminar
Requirements/Evaluation: evaluation will be based on class participation, several short papers, oral presentations, and a 20-page research paper
Prerequisites: none
Enrollment Preferences: History majors
Enrollment Limit: 15
Expected Class Size: 15
Distributional Requirements: Division 2
JWST 434 The Meaning of Diaspora and the Jews of Europe Crosslistings: HIST 434/JWST 434
Dispersal, exile, migration, statelessness are all aspects of diaspora. And in the study of diasporic peoples and cultures, the Jews have long figured as the archetype. As a result, Jewish political figures, intellectuals, social activists and scholars have played a central role in discussions of the meaning of diaspora, including debates about its political and social implications, economic value, and cultural significance. In the first half of the semester, in discussions of common readings, this seminar examines various interpretations of Jews' diasporic existence from the nineteenth century to the present, both as a cultural practice and a form of group identity from which political claims have been made. We will test the proposition that "The Modern Age is the Jewish Age," that is, that the meaning of diaspora in modern Jewish history has direct relevance to students of human identity not just of Jewishness. Throughout the second half of the semester, students will conduct independent archival research on some aspect of the history of the Jewishness. Throughout the second half of the semester, students will conduct independent archival research on some aspect of the history of the Jewish diaspora that will culminate in a 20-page paper. The seminar will continue to meet weekly as a research colloquium, to provide a forum for students to present their research and drafts in progress and provide feedback on fellow students' work.
Class Format: seminar
Requirements/Evaluation: evaluation will be based on class participation, several short papers, oral presentations, and a 20-page research paper
Extra Info: may not be taken on a pass/fail basis
Prerequisites: none

JWST 480T(F) Interpretations of the Israeli-Palestinian Conflict (D) (W) Crosslistings: HIST 480/ARAB 480/JWST 480
This tutorial addresses the powerful, competing, and bitterly contested historical narratives that underpin the Israeli-Palestinian conflict. Both Israelis and Palestinians appeal to history to legitimize their territorial claims and to justify contemporary action. Special attention will be paid to the interpretations of key historical moments, especially the 1948 and 1967 wars, and on the contrasting views of some of the core issues of the conflict (Jerusalem, refugees, settlements, terrorism).
Class Format: tutorial
Requirements/Evaluation: 5- to 7-page essays or 2-page critiques due each week and a final report (3-4 pages) at the end of the semester
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none
Enrollment Preferences: History majors as well as Arabic Studies majors and Jewish Studies concentrators
Enrollment Limit: 10
Expected Class Size: 10

JWST 490T(S) Memory, History, and the Extermination of the Jews of Europe Crosslistings: HIST 490/JWST 490
The atrocities committed by Nazi Germany during the Second World War continue to trouble historians in their attempts to understand and represent them in all their magnitude and horror. Beyond historians, the complicity of segments of European societies in perpetrating those atrocities continues to raise thorny questions for postwar European nations about what their responsibilities are toward that past. This tutorial will focus on a series of questions relating to the historicization and memorialization of the extermination of European Jews. They include: Is the Holocaust unique? Is it a Jewish story or universal story? Does the Holocaust raise different issues for the historian than other historical events? How should the Holocaust be represented and what are the implications of different means of representing it? What role, if any, did European Jews play in their own destruction? Has Germany faced up to its past? Were Germans also victims of World War II? Who were the "bystanders" as compared to the "perpetrators"? Were the postwar trials of perpetrators a travesty of justice? How appropriate are the different uses that Israel and the United States have made of the Holocaust? By the end of the course, students will have grappled with the ongoing controversies that have arisen among scholars, governments, and lay people about the meaning (and meaningfulness) of the Holocaust for the postwar world. In a world in which extraordinary acts of violence continue to be perpetrated and more and more nations' pasts are marked by episodes of extreme criminality or trauma, exploring the manner by which one such episode has been remembered, avenged, and adjudicated should prove relevant for future consideration of other societies' efforts to confront their own traumatic pasts.
Class Format: tutorial; class time consists of weekly one-hour sessions with the instructor and a fellow student
Requirements/Evaluation: every other week the student will write and present orally a 5- to 7-page paper on the assigned readings of that week.
Extra Info: in addition to the weekly requirements on alternate weeks, the student will write a 2-page critique of the fellow student's paper; a final written exercise, a thought piece on the issues raised in the tutorial, will cap off the semester's work may not be taken on a pass/fail basis; not available for the fifth course option

JWST 492 Modern Jewish Political Theory (W)
Crosslistings: REL 330/PSCI 375/JWST 492
By the late 19th century, Jews across Europe were faced with an urgent political problem. Amidst bourgeoning national self-consciousness throughout the continent, despite the libaritary promises of the Enlightenment, Jews remained a vulnerable, segregated, and stigmatized minority population. Jews had to decide where to pin their hopes. Should they ally themselves with the liberals or the communists? Should they embrace nationalism or cosmopolitanism? Should they, perhaps, abandon Europe altogether and reconstitute themselves somewhere else? If so, should they focus their efforts on relocation to the historical land of Israel? Or could they go anywhere? Wherever they might go, should they aspire to build a modern Jewish nation-state, a semi-autonomous Jewish community, or some other arrangement? Should this coincide with the cultivation of a distinctively Jewish modern language? If so, should it be Hebrew or Yiddish? In this course we will assess various answers to these questions proffered by Jewish political thinkers in the modern period. We will pay particular attention to the construction of "Jews" and "Judaism" in these arguments. And we will ask persistently: what constitutes a "Jewish justification" for a political claim in modern Jewish political theory? Coverage will include: Jewish liberalism, political Zionism, Yiddishist autonomism, messianic quietism, and other views. We will read many others.
Class Format: seminar
Requirements/Evaluation: six short (1-2 pages) response papers; two 6- to 8-page papers, each analyzing a different view in depth;
Extra Info: a final 18- to 20-page paper that incorporates the two previously submitted 6-8 page papers, but also compares the two views and adjudicates between them may not be taken on a pass/fail basis
Prerequisites: none
Enrollment Preferences: Religion majors, Jewish Studies concentrators, and Political Science students on the "Theory" track
Enrollment Limit: 19

Not Offered Academic Year 2017
SEM Instructor: Jeffrey Israel
Justice and Law is an interdepartmental program designed to give students a background in and framework for understanding the ways that philosophers, government officials, and others think about justice, and the related ways in which societies marshal power and implement law. This liberal arts program provides tools for thinking critically and arguing about what justice might entail, how it works in practice, and how rules, aspirations, laws, and norms evolve over time and in different parts of the world.

The Concentration

The concentration in Justice and Law consists of six courses: an interdisciplinary introductory course, four electives taken from at least two departments, and a senior seminar. Electives are listed below. Students may declare program concentrations at any point during their academic careers.

Four Electives

Four elective courses are required to complete a concentration in Justice and Law. These courses must be taken from at least two departments. Other courses, not listed below, may be approved by the Chair.

Senior Seminar

In 2016-17, students will have a choice of two senior seminars: JLST 401 ("The Unwritten Constitution") and JLST 402 ("Trials and Transitions") (cross-listed PSCI 325).

Enrollment Limit: 10

Expected Class Size: 10

Distributional Requirements:

Division 2
challenging some differences while naturalizing others. Finally, we will
examine the various methodologies and approaches of the interdisciplinary
field of legal history. Topics to be covered will include the Constitution, slavery,
marriage, divorce, custody, inheritance, immigration, sexual violence,
reproduction, abortion, privacy, suffrage, jury duty, work, and military service.
Class Format: seminar
Requirements/Evaluation: evaluation will be based on two short (4-5 page)
papers; one longer (10-12 page) paper; an in-class presentation, and
participation in class discussion
Extra Info: may not be taken on a pass/fail basis

JLST 401(S) The Unwritten Constitution
“The eight thousand words of America’s written constitution only begin to map
out the basic ground rules that actually govern our land.” So begins Akhil
Amar’s book The Unwritten Constitution. Amar recasts the debate over
whether America has a “living Constitution.” That debate usually revolves
around whether change in constitutional meaning requires resort to the formal
amendment process or can be achieved through judicial interpretation. Amar
supports a living Constitution, but proposes something far-reaching: history itself
effectively amends the Constitution. Thus, for example, he argues that
Martin Luther King’s “I Have a Dream” speech, and precedents set by George
Washington, not to mention the daily activities and assumptions of ordinary
Americans, have become constitutional subtext which must be taken into
account by judges and anyone else (i.e., politicians and citizens) interpreting
the Constitution. Is that notion convincing? Preposterous? A healthy way of
understanding the inevitable intersection of law, history, and politics? A
transparent excuse to read one’s own views into the Constitution? Is the idea of
an unwritten constitution democratic or undemocratic? Through a close
reading of Amar, and some of his important critics and allies, we will probe
different ways of thinking about the Supreme Law of the Land.
Class Format: seminar

JLST 402(S) International and Transitional Justice (W)
Crosslistings: PSCI 325/JLST 402
Before the 1990s, the world saw only occasional, discrete war crimes trials
after major-power catastrophes. In the last two decades, trials expanded
dramatically in number, scope, and philosophy. Separate Ad Hoc Tribunals for
crimes in Yugoslavia and those in Rwanda, in Sierra Leone and in Cambodia
are giving way to a permanent International Criminal Court, which has begun
to hand down indictments and refine its jurisdiction. The UN Security Council,
alongside national governments, decides on legitimacy and punishment. At
the same time, worries about residual impunity or the effect that punishment
might have on societies’ futures has led to the development of national and
social courts, as well as national military tribunals, to complement those at
the international level. Meanwhile, national activists look to international apologies
and reparations for models of what to demand. Examples Models cut of
internationalized transitional justice abound. This capstone seminar examines
the intent, process, meaning and consequence of these new institutions,
particularly in terms of national constitutions, international law, and principles
of justice.
Class Format: seminar
Requirements/Evaluation: four papers, longer final paper, class participation
Prerequisites: Political Science major or permission of instructor
Enrollment Preferences: Political Science majors concentrating in International Relations
Enrollment Limit: 14
Expected Class Size: 14
Distributional Requirements:

LATINA/O STUDIES (DIV II)
Chair: Professor CARMEN WHALEN
Professors: M. E. CEPEDA, O. CHAVOYA, M. RÚA, C. WHALEN*.
Associate Professors: J. HIDALGO.

Latina/o Studies is an interdisciplinary and comparative field of study that
explores the histories, representations, and experiences of Latinas and
Latinos in the United States. Latinas and Latinos include peoples who come
from or whose ancestors come from Latin America and the Spanish-speaking
Caribbean. The program seeks to cover the widest range of experiences,
encapsuring Mexican-Americans, Puerto Ricans, Cubans, and Dominicans,
as well as more recent migrations from a wide variety of Central and South
American countries. Courses, most of which use a comparative approach,
seek to provide students with the tools to continue their work in areas of their
particular interest. Focusing on a diverse group with a long history in
the United States, which is also one of the fastest growing populations in
the contemporary era, provides an opportunity to explore complex dynamics
globally and within the context of the United States. The program examines
topics such as the political and economic causes of migration, the impact of
globalization, economic incorporation, racialization, the formation
and reformulations of identities and communities, the uses of urban spaces,
inter-ethnic relations, artistic expression, aesthetics, and visual and popular culture.

THE CONCENTRATION
The concentration in Latina/o Studies requires five courses. Students are
required to take the introductory course (LATS 105), one 400-level Latina/o
Studies seminar, and three electives. Two electives must be core electives,
and one elective can be a related course in Comparative Race and Ethnic
Studies or in Countries of Origin and Transnationalism. The three electives
must include two different areas of study, and at least one elective must be
at the 300 or 400 level. Additional courses may be approved by the Chair.
Students, especially those considering graduate work or professional careers
in the field, are encouraged to enroll in Spanish language courses at Williams.

Required course:
LATS 105 Latina/o Identities: Constructions, Contestations, and Expressions

One of the following 400-level seminars:
ARTH 464/LATS 464 Latina/o Visual Culture: Histories, Identities, and
Representation
LATS 408/AIST 408 Envisioning Urban Life: Objects, Subjects, and Everyday People
LATS 409/AMST 411/WGSS 409 Transnationalism and Difference: Comparative Perspectives
LATS 427/AMST 327/ REL 314/AFR 427 Racial and Religious Mixture
LATS 471/HIST 471 Comparative Latina/o Migrations

Students can check with the program chair to see if other courses not
listed here might count as electives.

Two of the following core electives:
LATS 106/AMST 106 Coming of Age in the City: Growing Up and Growing
Older in Communities of Color
LATS 203/ARTH 203/WGSS 203/AMST 205 Chicana/o Film and Video
LATS 208/AMST 207/COMP 211/ENGL 251 Introduction to Latina/o
Literatures
LATS 209/RLLSP 209 Spanish for Heritage Speakers: Introduction to
Latina/o Cultural Production
LATS 220/AMST 221/ENVI 221 Introduction to Urban Studies: Shaping and
PLiving the City
LATS 224/AMST 224/REL 224 U.S. Latina/o Religions
LATS 231/AMST 231/WGSS 232 Approaches to Media Studies: Analyzing
Mediated Difference
LATS 240/AMST 240/COMP 210 Latina/o Language Politics; Hybrid Voices
LATS 258/ARTH 258 Latina/o Installation and Site Specific Art
LATS 286/HIST 286 Latina/o History, 1848 to the Present
LATS 312/AMST 312/ENVI 313 Chicago
LATS 318/AMST 318/REL 318/COMP 328/ENVI 318 California: Myths, Peoples, Places
One additional related course from either of the following subcategories OR from the core electives above:

**Countries of Origin and Transnationalism**
- AMST 241/SOC 241 The Carribean from Slavery to Independence
- ARTH 271/COMP 272 The Brazilian Avant-garde of the 1960s
- ENVI 239/COMP 238 Introduction to Ecocriticism: North South Dialogues on Nature and Culture
- HIST 143 Soccer and History in Latin America: Making the Beautiful Game
- HIST 243 Modern Latin America, 1822 to the Present
- HIST 245/AFR 346 History of Modern Brazil
- HIST 343/LATS 343 Conquistadors in the New World
- HIST 347 Democracy and Dictatorship in Latin America
- HIST 492 Revolutionary Thought in Latin America
- MUS 126 Cuban Popular Music and Culture
- PSCI 266 The United States and Latin America
- PSCI 349 Cuba and the United States
- REL 309/AFR 309/LATS 309 Scriptures and Race
- REL 326/LATS 426/WGSS 326/CMP 326 Queer Temporalities

**Comparative Race and Ethnic Studies**
- AFR 200 Introduction to Africana Studies
- LATS 231/WGSS 322/AMST 231 Approaches to Media Studies: Analyzing Mediated Difference
- LATS 313/AMST 313/WGSS 313/AFR 326 Gender, Race, and the Power of Personal Aesthetics (D)
- AMST 403/COMP 375/ENGL 375/AFR 403/LATS 403 New Asian American, African American, Native American, and Latina/o Writing
- ARTH 462/AMST 462/LATS 462/ARTH 562 Art of California: Pacific Standard Time
- HIST 380 Comparative American Immigration History
- HWS 240/AMST 241/LATS 241/TEA 241 Performing Masculinity in Global Popular Culture
- WGSS 306/AMST 306/LATS 306/COMP 304 Queer of Color Critique: Race, Sex and Urban Life

**LATS 105(F)** Latina/o Identities: Constructions, Contestations, and Expressions

**LATS 106(T)** Coming of Age in the City: Growing up and Growing Older in Communities of Color (D) (W)

**Crosslistings:** LATS 106/AMST 106

This tutorial explores urban life in communities of color through the lens of aging. We will focus on the political and economic dimensions of cities that have deeply affected the daily collective lives of certain populations from childhood to old age. Taking into account how age and age relations are highly differentiated by race, class, and gender, we will also consider the ways in which cities are organized and arranged to create and recreate categories and ideas associated with age. This EDI tutorial foregrounds the significance of age across race, class, and gender, in explorations of urban inequality.

**Class Format:** tutorial

**Requirements/Evaluation:** five to six five-page papers, five to six two-page responses, oral presentations of papers; discussion

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course offering

**Prerequisites:** none

**Enrollment Preferences:** first- and second-year students, students considering an American Studies major or Latina/o Studies concentration

**Enrollment Limit:** 10

**Expected Class Size:** 10

**Instructor:** Merida Rua

**LATS 203 Chicana/o Film and Video (D)**

**Crosslistings:** LATS 203/ARTH 203/ENGL 203/AMST 205

Hollywood cinema has long been fascinated with the border between the United States and Mexico. This course will examine representations of the U.S.-Mexico border, Mexican Americans, and Chicana/os in both Hollywood film and independent media. We will consider how positions on nationalism, race, gender, identity, migration, and history are represented and negotiated through film. We will begin by analyzing Hollywood "border" and gang films before approaching Chicana/o-produced features, independent narratives, and experimental work. This course will explore issues of film and ideology, genre and representation, nationalization and feminist critiques, queer theory and the performative aspects of identity. Through a focus on Chicana/o representation, the course explores a wide spectrum of film history (from the silent era to the present) and considers numerous genres. By introducing various interdisciplinary approaches and theoretical methods related to race, representation, and the media, the course fulfills the Exploring Diversity Initiative’s themes of critical theorization and power and privilege.

**Class Format:** film screenings will be scheduled as a lab

**Requirements/Evaluation:** evaluation will be based on one short paper, midterm exam, final exam and take home essays

**Prerequisites:** none

**Enrollment Limit:** 30
LATS 208 Introduction to Latina/o Literatures (D)
Crosslistings: LATS 208/AMST 207/COMP 211/ENGL 251
This discussion course serves as an introduction; the reading list is not meant to be exhaustive or comprehensive, but will rather provide a sampling or range of texts for students to engage. We will explore a number of readings across different genres (the novel, play, poem, short story, graphic novel). Students will endeavor to understand how each author defines Latinidad. What characterizes Latina/os for each of these writers and how do their works articulate the historical conditions out of which they emerge? How is Latina/o literature marked by notions of language, nationality, gender, sexuality, class, race, politics, form, and genre? The readings will provide both a survey of general ideas in the study of Latina/o literatures as well as specific case studies and historical examples from which we will extrapolate about the larger field. Readings include works by Tomás Rivera, Cristina Garcia, Creisy Guzman, Road, Oscar Zeta Acosta, Junot Díaz, Alisa Valdes-Rodriguez, and more. This course fulfills the Exploring Diversity Initiative requirements as it offers a comparative study of cultures and societies by examining the U.S. racial project of constructing a Latina/o people out of various peoples. Additional attention is given, under the rubric of power and privilege, to the specific economic and political institutions that structure Latinata/o cultural production.
Class Format: lecture
Requirements/Evaluation: students will be evaluated based on weekly online discussion forum posts, two short papers, a midterm exam, a final comprehensive project, as well as classroom participation.
Enrollment Limit: 20
Expected Class Size: 20

LATS 220(U) Introduction to Urban Studies: Shaping and Living the City
Crosslistings: LATS 220/AMST 221/ENVI 221
Generally, cities have been described either as vibrant commercial and cultural centers or as violent and decaying urban slums. In an effort to begin to think more critically about cities, this course introduces important topics in the interdisciplinary field of Urban Studies. Specifically, we will discuss concepts and theories used to examine the peoples and structures that make up cities: In what ways do socio-cultural, economic, and political factors affect urban life and development? How are cities planned and used by various stakeholders (politicians, developers, businesses, and residents)? How do people make meaning of the places they inhabit? We will pay particular attention to the roles of race, ethnicity, class, and gender in understanding and interpreting urban communities. Texts include works by anthropologists, historians, sociologists, cultural critics, cultural geographers, and literary writers.
Class Format: lecture/discussion
Requirements/Evaluation: evaluation will be based on attendance and class participation, several short writing assignments (1-2 pages), two creative group projects and presentations, a midterm essay (5-7 pages) and final essay (8-10 pages)
Extra Info: may not be taken on a pass/fail basis, not available for the fifth course option
Prerequisites: none

LATS 224 U.S. Latina @ Religions (D)
Crosslistings: LATS 224/AMST 224/REL 224
In this course, we will engage aspects of Latin@ religious experiences, practices, and expressions in the United States of America. We examine moments where religious expressions intersect with politics, popular culture, and daily life in the U.S.A. Given the plurality of Latin@ communities and religious lives in the U.S.A., we will engage certain selected religious traditions and practices—such as popular Catholic devotions to Guadalupe, crypto-Judaism, curanderismo, Latin@ Muslims, and Santería—by focusing on particular moments of religious expression as elucidated in specific historiographies, ethnographies, art, literature, and film. We will also consider, though more briefly, historical contexts in Iberia and Latin America, as well as questions of how one studies Latin@ religions. Rooting ourselves in the social, political, cultural, and historical contexts in which particular Latin@ religious formations developed, this EDI course examines issues of social and institutional power relations that influence particular religious formations.
Class Format: discussion
Requirements/Evaluation: based upon class participation, short writing exercises, a 5- to 8-page take-home midterm essay, and a 10- to 15-page final review essay.
Prerequisites: none

**LATS 231(S) Approaches to Media Studies: Analyzing Mediated Difference (D)**

**Crosslistings:** LATS 231/AMST 231/WGSS 232

Media's influence in 21st century life is pervasive, and encompasses visual, sonic, and discursive formats. This course introduces students to a variety of qualitative approaches to the study of contemporary media. Simultaneously, we will explore questions of ethno-racial identity, gender, and sexuality. Structured around a series of hand-on exercises designed to provide experience in the areas of textual analysis, in-depth interviews, virtual ethnography, and participant observation, this class will provide students with interdisciplinary training that enhances their understanding of everyday media and its interaction with multiple categories of identity.

This course is a comparative Ethnic Media Studies class that encourages students to employ media as a lens for theorizing the intersections between ethno-racial identity, gender, and sexuality. We review materials focusing on a wide range of minority communities. According to the EDI framework this class engages in the comparative study of cultures and societies, examines questions of power and privilege, and aims to sharpen students' critical theorization of difference in the media.

**Class Format:** seminar

**Requirements/Evaluation:** participation; four 3- to 5-page papers; student papers will be based on hands-on exercises using various current media Studies methods

**LATS 240(F) Latina/o Language Politics: Hybrid Voices (D)**

**Crosslistings:** LATS 240/AMST 240/COMP 210

In this course we will focus on issues of language and identity in the contemporary cultural production and lived experience of various Latina/o communities. As such, how are cultural values and material conditions expressed through Latina/o language and literature? How does Latina/o identity challenge traditional notions of the relationship between language, culture, and nation? In what ways might Latina/o literary and linguistic practices serve as tools for social change? Departing from an overview of common linguistic phenomena such as code-switching (popularly known as "Spanglish") and Latina/o English, we will examine bilingual education, recent linguistic legislation, and the English Only movement. Throughout the course we will survey texts culled from a variety of literary genres as well, including theatre, autobiography, novels, and poetry. Both directly and/or indirectly, these texts address Latina/o language politics, as well as the broader themes of power, community, ethno-racial identity, gender, sexuality, class, and hybridity.

**Class Format:** seminar

**Requirements/Evaluation:** participation, two essays, final take-home examination

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**LATS 241(S) Performing Masculinity in Global Popular Culture (D)**

**Crosslistings:** WGSS 240/AMST 241/LATS 241/THEA 241/SOC 240

This course examines popular cultural contexts, asking what it means to be a man in contemporary societies. We focus on the manufacture and marketing of masculinity in advertising, fashion, TV/film, theater, popular music, and the shifting contours of masculinity in everyday life, asking: how does political economy change the ideal shape, appearance, and performance of men? How have products - ranging from beer to deodorant to cigarettes — had their economy change the ideal shape, appearance, and performance of men? We will pay particular attention to racialized, queer, and subaltern masculinities. Some of our case studies include: the short half-life of the boy band in the US and in Asia (e.g., J/K-Pop), hip hop masculinities at home and abroad and the curious blend of chastity and homoeroticism that constitutes masculinity in the contemporary vampire genre. Through these and other examples, we learn to recognize masculinity as a performance shaped by the political economy of a given culture. The course includes a field trip to a drag performance in Northampton.

**Class Format:** seminar

**Requirements/Evaluation:** masculinity journal, mid-term essay, visual analyses of pop culture artifact, choice of final essay or 8-10 page final paper, short field trip reaction essay

**Extra Info:** includes 8-10 page paper based on primary and secondary sources and interactive component: video, map, photographs, material cultures exhibit plan, etc.

**Prerequisites:** none

**Enrollment Preferences:** in the event of over-enrollment, a short statement of interest will be solicited

**Enrollment Limit:** 20

**Expected Class Size:** 20

**Distribution Notes:** meets Division 2 requirement if registration is under AMST, LATS, SOC or WGSS; meets Division 1 requirement if registration is under THEA

**Distributional Requirements:** Division 2

**LATS 234(F) Religion and Migration (D)**

**Crosslistings:** LATS 234/REL 234/AMST 234

This course is concerned with the ways in which migrants groups have altered the religious landscape of the U.S. and how they innovatively reproduce practices from their places of origin. Crossing into the U.S. from the eastern seaboard, the Pacific Rim, and the southern border with Mexico, migrants bring their new ways of creating sacred space and negotiated religious life. We will seek to understand the multifaceted relationship between religion and migration. How have migrants negotiated the role of religion in their private and public lives? What have been the social consequences pertaining to gender, praxis, respectability? The course take into account earlier iterations of migration from the nineteenth century but case studies in this course will draw heavily from the third wave of American immigration, characterized by twenty-first-century "internal migrations" of African Americans, Latinos/Hispanics, Native Americans, and rural dwellers into the urban environment. We will conclude by examining the ways in which forces of modern globalization have changed the nature of religious diversity in the U.S. In this EDI course, we will extensively compare migrant cultures as we interrogate power and privilege pertaining to race and religion. The cultural production of these migrant groups that we will examine will offer students an empathetic understanding of diverse cultures and their form of belonging.

**Class Format:** seminar

**Requirements/Evaluation:** student participation, weekly reflection papers (up to half page), midterm primary source write up (up to 5 pages), and a final project on "Representing Religious Migrations"

**Extra Info:** includes 8-10 page paper based on primary and secondary sources and interactive component: video, map, photographs, material cultures exhibit plan, etc.

Course may require a field trip may not be taken on a pass/fail basis; not available for the fifth course option

**Prerequisites:** none

LATS 247(S) Religion, Environment, and the American West (D)
From the "Land of Enchantment" of New Mexico in the far reaches of the desert to the sacred temples on the West Coast that overlook Pacific Ocean, this course examines the peoples and the "sacroscapes" of the American West. Historical research by Patricia and other scholars of religion and history account for the relationships between the past and present? Most mainstream religious historical treat religious practice and identity in the U.S. West as additive rather than complementary. How do scholars of religion and history account for these relationships? How and why do Peoples employ alternative religious practices to resolve their conflicts with orthodox forms of religious authority? This EDI course examines the racial dynamics at play in the formation of Latina/o communities, as well as the impact of U.S. hierarchies of race, ethnicity, gender, and class on the labor histories of Latinas and Latinxs.
Class Format: lecture/discussion
Requirements/Evaluation: evaluation will be based on class participation and group presentations, short writing assignments, two short essays, and a final essay

LATS 258 Latina/o Installation and Site-Specific Art Crosslistings: LATS 258/ARTH 258
This course will explore the various forms of installation and site-specific artworks created by Latina/o artists for museums and public space. We will examine the ways in which Latina/o artists have used space as a medium to express the production of artworks and how this impacts the works' meanings and the viewer's experience. Within the context of U.S. Latina/o culture and history, we will connect notions of space with ideas about cultural citizenship, civil rights, and social justice. We will study, from traditional to experimental, including murals, sculpture, performance, video, and multimedia, interactive, or participatory projects. While establishing a historical lineage and theoretical frameworks for analyzing this growing genre, we will pay particular attention to how these works engage urban space and often challenge the institutional assumptions of museums and curatorial practice. Likewise, we will examine the important debates associated with various public art and museum installation controversies. 
Class Format: lecture/discussion
Requirements/Evaluation: two short papers, periodic research reports, final research paper, and presentation
Prerequisites: LATS 105 or ARTH 101-102 or permission of instructor

LATS 286 Latina/o History, 1848 to the Present (D)
Crosslistings: LATS 286/HIST 286
From 1848 to the present, Latina/o communities have taken shape in the United States through conquest and migration. Why and when have distinct Latina/o groups come to harbor sizable communities in different regions of the United States? U.S. imperialism and foreign policies, as well military, political and economic ties between the United States and the various countries of origin define the political and economic contexts in which people leave their homes to come to the United States. In their search for low-wage labor, U.S. employers have recruited workers from Latin America and the Hispanic Caribbean. Mexicans, Puerto Ricans, Cubans, Dominicans, Guatemalans, and Salvadorans, as well as others, have responded to labor recruitment and have also relied on networks of family and friends to seek a better life in the United States. What do the histories of these distinct Latina/o groups share and what makes them distinct? This EDI course examines the racial dynamics at play in the formation of Latina/o communities, as well as the impact of U.S. hierarchies of race, ethnicity, gender, and class on the labor histories of Latinas and Latinxs.

LATS 306 Queer of Color Critique: Race, Sex and Urban Life (D)
Crosslistings: WGSS 306/AMST 306/AFR 306/LATS 306/COMP 304
This seminar is an introduction to queer of color critique, a field of scholarship that seeks to intervene in the predominantly white canon of queer studies. We will examine the history of this line of critique, beginning with Black and Chicana feminisms and extending into present day issues and activism highlighting intersectionality, exploring how and why QOCC became a necessary intervention into the then still emerging field of queer studies. Our texts include scholarly works as well as science fiction novels, plays, films, diaries, and graphic novels. Methodologically, we draw on many fields of study, including anthropology, literary studies, feminist studies, and ethnic studies. We focus primarily but by no means exclusively on US contexts, paying particular attention to the role that urban environments have served for queer communities of color. Topics include: feminisms of color, inter-racial desire and fetishism, orientalism and colonial fantasy, black queer science fiction, transgender subjectivities, and the political economy of sexual desire. A key feature of this course will also be the inclusion of numerous and diverse authors to appear on Skype or in person to answer questions about their work as we read it in class.
Class Format: discussion/lecture
Requirements/Evaluation: mid-term essay, choice of final exam essay or 8-10 page research paper, responses to performance/special events

LATS 309 Scriptures and Race Crosslistings: REL 309/AFR 309/LATS 309
This course focuses on the relationships between constructions of race in the post-1492 American world and "Christian scriptures." The big questions of the course will be how the representations of power are intertwined with the meaning of, interpretation, and transformation of sacred texts. Both scriptures and race are conceptual constellations of human social imagination, and yet their conceptualization has often been imbued in the hopes and traumas of everyday life in the Americas. How and why did these two terms come to have any relationship to each other? How and why do peoples engage "scriptures"? In what ways have "scriptures" informed how peoples imagine themselves, their communities, and their relationship to religious and racial "others"? How do scriptures and "race" inform each other in modern colonialisms and imperialisms? In this course, we will examine the ways that scriptures have been employed in order to understand and develop notions of race, and we will examine how ideas about and lived experiences of race have informed the concept of scriptures as well as practices of scriptural interpretation.
Class Format: lecture/discussion
LATS 312(S) Chicago
Crosslistings: LATS 312/AMST 312/ENVI 313
"The city of big shoulders has plenty of room for diversity," reads the official visitor's website for the City of Chicago. Focusing on this claim, this course asks students to think critically about what kind room has been made for diversity—social, spatial, and ideological. Additionally we examine the ways in which diverse social actors have shouldered their way into the imagined and physical landscape of the city. Working with ethnography, history, literature, critical essays, and popular culture, we will explore the material and discursive constructions of hi-end versus low-end, and the mass media and the everyday are the everyday functions of personal style among women of color? Is it transnational media play in the development and circulation of popular American" or "Asian American" female aesthetic exists? What role do "God-talk" broadly termed "liberation theologies" that critiqued and challenged social relationships of class, colonization, race, culture, gender, sexuality, (dis)ability, and ecology. These theologies were borne out of and in turn deeply shaped struggles against oppressive regimes and structures in the Americas, and as such we will focus on some specific theological writings—such as those of Gutierrez—and their relationship to distinct social movements and struggles over land, economy, and political power, especially in Brazil, El Salvador, Mexico, and the United States of America between 1960-2000. This EDI course examines issues of social and institutional power relations that influence particular religious formations as well as the way religious formations respond to and are shaped by social and institutional power relations
Class Format: discussion
Requirements/Evaluation: evaluation will be based on attendance and class participation, group presentations and discussions, 5 critical briefs (2-pages) and a book review essay (12-15 pages)

LATS 313(S) Gender, Race, and the Power of Personal Aesthetics (D)
Crosslistings: LATS 313/AMST 313/WGSS 313/AFR 326
This course focuses on the politics of personal style among women of color in an era of viral video clips, the 24-hour news cycle, and e-commerce sites dedicated to the dermatological concerns of "minority" females. With a comparative, transnational emphasis on the ways in which gender, sexuality, ethno-racial identity, and class inform standards of beauty, we will examine a variety of materials including commercial websites, histories, personal narratives, ethnographies, sociological case studies, and feminist theory. Departing from the assumption that personal aesthetics are intimately tied to issues of power and privilege, we will engage the following questions: What are the everyday functions of personal style among women of color? Is it feasible to assert that an easily identifiable "African American," "Latina," "Arab American" or "Asian American" female aesthetics exist? What role do transnational media play in the development and circulation of popular aesthetic forms? How might the belief in personal style as activist strategy challenge traditional understandings of feminist political activity?
Class Format: seminar
Requirements/Evaluation: participation, one student-led discussion period, two written essays of 5-7 pages, final take-home exam

LATS 335 Race, Gender, and Performance from Literature to Social Media (D)
Crosslistings: WGSS 330/COMP 339/AMST 332/LATS 335/THEA 322
How can contemporary performance expand ideas and practices of belonging in the United States, as figured through race, gender, and sexuality? This spring course will begin with readings of dramatic literature including Suzan-Lori Parkes's Venus, David Henry Hwang's M. Butterfly, and Young Jean Lee's The Shipment to analyze literary and staged performance, then continue to discussions and readings on the performance of everyday life via the work of performance artists including Adrian Piper, Nao Bustamante, and Yoko Ono. We will develop shared vocabulary and methodologies of performance studies, including readings by scholars including J.L. Austin, Judith Butler, and José Esteban Muñoz. This course will engage foundational texts to performance studies and offer an interdisciplinary approach to scholarship in gender and sexuality studies, critical ethnic studies, and performance studies from the 1970s to the present. This course recognizes a suspicion for diversity discourses that universalize human experience and asks: how do we resist normativizing forces without reinforcing the regulating logics of those forces? This EDI course will critically engage with diversity from the heterogeneous and multiple perspectives of racial, sexual, and gender minorities, asking
students not only to examine the diversity of human experience but to explore the political stakes of creative expression through interdisciplinary methods and forms.

**LATS 338 Latina/o Musical Cultures: Sounding out Gender, Race, and Sexuality (D) (W)**

**Crosslistings:** LATS 338/AMST 339/WGSS 338

In this class we will investigate a wide variety of Latina/o popular musical and dance forms, with particular emphasis on questions of gender, sexuality, and ethno-racial identity. Employing interdisciplinary materials and approaches, this course focuses on the sonic and visual analysis of contemporary Latina/o popular music and the identities of its producers, performers, and audiences. We will focus on the following questions, among others: How are the various facets of Latina/o identities expressed through popular music and dance? In what ways do gender, sexuality, and ethno-racial identity inform the performance and interpretation of particular Latina/o musical forms? What unique role does sound play in our understanding of popular music and identity?

**LATS 343 Conquistadors in the New World**

**Crosslistings:** HIST 343/LATS 343

The Spanish conquest of the Americas happened with astonishing rapidity. Christopher Columbus entered the Caribbean in 1492; Hernando Cortes completed the conquest of the Aztecs of central Mexico in 1521; Francisco Pizarro triumphantly entered the Inca capital Cuzco, in Peru, in 1533. Other conquerors pushed north to the Carolinas and California, south to the Tierra del Fuego and the River Plate, and across the Amazon basin to the Atlantic. "We came," wrote the conquistador Bernal Dias del Castillo, "to serve God, and our King, and to get rich." Their deeds were legendary, the courage, daring, and endurance remarkable. They were also notoriously quarrelsome, greedy, and cruel. Before their onslaught the major civilizations of the New World crumbled—destroyed or changed beyond recognition. Rarely in history have so few conquered so many so quickly. The conquest of the New World has both excited and appalled the human imagination for more than five centuries. Many questions remain to be answered or are still capable of provoking controversy. Who exactly were the conquerors? What motivated them? What meaning did they themselves assign to their actions? How could they justify their many misdeeds? How did they develop their sense of the Other? Why did resistance by indigenous peoples and regimes ultimately fail? Was the conquest somehow preordained? What mixture of human agency, culture, technology, religion, nature, and biology can best explain the results of this encounter between the conquerors and the Amerindian worlds?

**LATS 382 Latina/o Politics (D) (W)**

**Crosslistings:** LATS 382/HIST 382/WGSS 382

This course explores Latina/o politics from World War II to the present. Defining politics broadly, we will examine everything from electoral politics to grassroots activism. We will explore the relationship between Latinas/os and the U.S. political system, as well as the ways in which dynamics internal to Latina/o communities shape political issues and political participation. Specific topics include Mexican Americans and Puerto Ricans struggles for political inclusion in the aftermath of World War II, Cuban exile politics and their impact, the political and social movements of the 1960s and 1970s, key electoral campaigns, the recent appointment in 2008 of the first Latina as a Supreme Court justice, and on-going debates over immigration. With an assessment of power relations at its core, this Exploring Diversity Initiative course explores the ways in which Latinos and Latinas have been excluded from or differentially included in the U.S. political system, as well as how the U.S. political system reflects dominant hierarchies of race, class, and gender. We will also interrogate how Latinas/os have sought to make U.S. politics more inclusive and at times have struggled to transform U.S. politics.

**Class Format:** discussion

**Requirements/Evaluation:** evaluation will be based on class participation including short assignments in preparation for discussion; three short essays based on course readings (3-5 pages each); and a final paper (7-10 pages)

**LATS 386 Latinas in the Global Economy: Work, Migration, and Households (D)**

**Not Offered Academic Year 2017**

**LEC Instructor:** James Wood

---

363
An increasingly global economy, from 1945 to the present, has affected Latinas in their home countries and in the United States. The garment industry, one of the first industries to go global, has relied extensively on Latina workers in their home countries and in the United States. Domestic work, a traditional field of women's work, also crosses borders. Challenging the myth that labor migration is a male phenomenon and that women simply follow the men, this course explores how the global economy makes Latinas labor migrants. What impact has the global economy and economic development had on Latinas' work and their households in their home countries? How have economic changes and government policies shaped Latinas' migrations and their incorporation in the changing U.S. economy? How have Puerto Rican, Mexican, Cuban, Dominican, Salvadoran, and Guatemalan women confronted the challenges created by a globalizing economy and balanced demands to meet their households' needs? This EDI course explores the impact of U.S. hierarchies of race, ethnicity, gender and class on Latinas' labor migrations and economic incorporation in the United States, as well as the myriad ways in which they confront, negotiate, and at times challenge those dominant U.S. hierarchies.

LATS 408 Envisioning Urban Life: Objects, Subjects, and Everyday People (D) (W)
Crosslistings: LATS 408/AMST 408

What is the relationship between real life in urban communities and the multiple ways in which they are imagined? What does it mean to be "urban," to live in an "urban community," or to be the product of an "urban environment"? Who do we think the people are who populate these spaces? This course takes a critical look at specific populations, periods, and problems that have come to dominate and characterize our conceptions of the quality, form, and function of U.S. urban life. A few of the topics we may cover include historical accounts of the varied ways in which poverty and "urban culture" have been studied; race, class, and housing; the spatial practices of urban youth and the urban elderly; and gendered perspectives on social mobility and community activism. Finally, this course will explore how diverse social actors negotiate responses to their socio-spatial and economic circumstances, and, in the process, help envision and create different dimensions of the urban experience. The course fulfills the Exploring Diversity Initiative requirement as it explores how various forms of urban inequality affect the collective experience of social actors in diverse race and class categories. It focuses on the complex and contradictory ways in which urban residents confront and negotiate, and at times challenge social and structural inequalities and the changing political economy of U.S. cities.

Class Format: seminar

LATS 409(F) Transnationalism and Difference: Comparative Perspectives (D) (W)
Crosslistings: LATS 409/AMST 411/WGSS 409

In the age of satellite television, e-mail, and mobile applications such as WhatsApp and Skype, transnational living has rapidly emerged as the norm as opposed to the exception. However, what does it really mean to "be transnational"? How are the lived experiences of transnational individuals and communities shaped by categories of difference such as gender, ethnic-racial identity, sexuality, and class? What impacts do the growing number of transnational citizens and residents in the U.S. have on our understanding of "American" identity in the local, national, and global contexts? In this interdisciplinary, comparative course we will analyze recent theories regarding the origins and impacts of transnationalism. Particular attention will be paid throughout the semester to the interplay of gender, ethnic-racial identity, sexuality, and class in connection with everyday transnational dynamics. The broad range of case studies examined includes China, Colombia, the Dominican Republic, Haiti, Mexico, the Philippines, Puerto Rico, and Middle East.

Class Format: seminar
Requirements/Evaluation: evaluation to be based on student participation, an original 12-15 page research paper conducted in stages, and peer editing
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: LATS 105, WGSS 101 or AMST 201; junior or senior standing

Class Format: seminar
Requirements/Evaluation: evaluation will be based on class participation, presentations, annotated bibliography, short writing assignments, writing workshop participation, and a 20- to 25-page research paper
Prerequisites: none
Enrollment Preferences: seniors, concentrators, majors, those with prior relevant coursework
Enrollment Limit: 19
Expected Class Size: 10
Distributional Requirements: Division 2
Extra Info: Pairs will also prepare a midterm synthesis, students will revise two of their 5-page analytical papers: one from the first half of the semester, one from the second half due at the end of the semester.
Not Offered Academic Year 2017
SEM Instructor: C. Ondine Chavoya
LATS 462 Art of California: Pacific Standard Time (D) (W)
Crosslistings: ARTH 462/AMST 462/LATS 462/ARTH 562
Not Offered Academic Year 2017
SEM Instructor: Jacqueline Hidalgo
LATS 462 Art of California: Pacific Standard Time (D) (W)
Crosslistings: ARTH 462/AMST 462/LATS 462/ARTH 562
In this course, we will study the visual arts and culture of California after 1960 and consider the region’s place in modern art history. We will focus on a series of recent exhibitions organized as part of a Getty initiative entitled Pacific Standard Time. Diverse in scope, these shows explored important developments in postwar art in California, including feminist art, African American assemblage, Chicano collectives, Modernist architecture, craft, and conceptualism. In this seminar, we will pursue research projects directly related to the art exhibitions we study, and examine Southern California conceptualism, photography, performance, painting, sculpture (including assemblage and installation), and video by artists both canonical and lesser known. Student projects will analyze the critical responses to the exhibitions, while also exploring the roles of archives, art criticism, and curatorial practice in contemporary art history. This course fulfills the Exploring Diversity Initiative requirement as it offers students a comparative study of cultures and societies and provides various interdisciplinary perspectives on the art and visual culture of a specific region.
Class Format: seminar
Requirements/Evaluation: evaluation will be based on several short writing assignments, oral presentations, class participation, and a final research paper of 16-20 pages written in stages over the course of the semester.
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: ARTH 102
Enrollment Preferences: senior Art major and senior Latina/o Studies concentrators
Enrollment Limit: 15
Expected Class Size: 15
Distribution Notes: meets Division 1 requirement if registration is under ARTH; meets Division 2 requirement if registration is under AMST or LATS
Distributional Requirements: Division 1
Other Attributes: AMST Arts in Context Electives
LATS 464 Latina/o Visual Culture: Histories, Identities, and Representation (D) (W)
Crosslistings: ARTH 464/LATS 464
This course examines the contemporary history of Latina/o visual culture and explores the various relations between cultural expression, identity formation, and public representation. We will begin by considering the critical and aesthetic practices that emerged in the context of civil rights actions and nationalist movements, which often focused on issues of visibility, self-representation, and autonomy. The topics of immigration, transnationalism, and the “Latinization” of the United States will then be analyzed in depth as we examine representations of and representations by Latinas/os in film and television, the visual arts, advertising, and other forms of popular media. Throughout the course, we will investigate the role of visual culture in determining taste and trends as well as shaping notions of belonging and cultural citizenship.
Class Format: seminar
Requirements/Evaluation: evaluation will be based on class participation, a research presentation, several short writing assignments (1-2 pages), and a final research paper
Prerequisites: LATS 105 or ARTH 101-102 or permission of instructor
Enrollment Preferences: Latina/o Studies and Art History seniors and juniors
Enrollment Limit: 12
Expected Class Size: 12
Distribution Notes: meets Division 1 requirement if registration is under ARTH; meets Division 2 requirement if registration is under LATS
Distributional Requirements: Division 1
Other Attributes: AMST Arts in Context Electives

Not Offered Academic Year 2017
SEM Instructor: C. Ondine Chavoya
LATS 471(S) Comparative Latina/o Migrants (D) (W)
Crosslistings: LATS 471/HIST 471
Since the 1970s, policymakers, scholars, the media, and popular discourses have used the umbrella terms “Hispanic” and “Latina/o” to refer to Mexicans, Puerto Ricans, Cubans, Dominicans and more recent immigrants from Central and South American countries. As a form of racial/ethnic categorization, however, these umbrella terms can mask widely divergent migration histories and experiences in the United States. In this course, we develop theoretical perspectives and comparative analyses to untangle a complicated web of...
immigrants? Along the way, we explore the emergence of Latina/o Studies as an interdisciplinary and comparative field of study, as well as methods used in Latino and Latina history, specifically oral histories, government documents, newspapers, and interdisciplinary approaches. In this EDI course, we ask whether the history and processes of racialization in the United States has created similarities and/or differences in each group’s experiences, and to what extent the field of Latina/o Studies offers an alternative to racial biases embedded in the dominant academic discourses.

Class Format: discussion/seminar

Requirements/Evaluation: evaluation will be based on class participation and presentations, a proposal, an annotated bibliography, a short historiographical essay, and a research paper based in part on primary sources

Prerequisites: none

Enrollment Preferences: History majors and Latina/o Studies concentrators

LEADERSHIP STUDIES (DIV II)
Chair: Associate Professor JUSTIN CROWE

Advisory Committee: Professors: M. BERNHARDSSON, S. DUNN, J. MCALLISTER, N. MELLOW, J. WOOD**. Associate Professor: J. CROWE.

Stanley Kaplan Distinguished Visiting Professor: R. MCMAHON. Visiting Professor: C. GIBSON. Visiting Lecturer: G. CHANDLER**. Stanley Kaplan Postdoctoral Fellow: G. JACKSON.

Leadership Studies focuses on the universal phenomenon of leadership in human groups. Leadership Studies asks what leadership means within a wide variety of social contexts—whether in a family, a team, a theatre company, a philanthropy, a university, a multinational corporation, or a nation state waging war. It seeks to understand the dynamics of the relationship between leaders and followers. It studies authority, power, and influence. It seeks to grasp the bases of legitimacy that leaders claim, and followers grant, in all of these relationships.

Through a wide range of courses in the social sciences and the humanities, a number of questions are addressed through the curriculum. How have men and women defined leadership and what are the bases of leaders’ legitimacy in different historical contexts? How do leaders in different contexts emerge? Through tradition, charisma, or legal sanction? How do different types of leaders exercise and maintain their domination? What are the distinctive habits of mind of leaders in different historical contexts? What are the moral dilemmas that leaders in different contexts face? What are the typical challenges to established leadership in different historical contexts? How does one analyze the experiences of leaders in widely disparate contexts to generate systematic comparative understandings of why history judges some leaders great and others failures? How and why do these evaluations about the efficacy of leaders shift over time?

To meet the requirements of the concentration, students must complete one of the two sequences outlined below (6 courses total). Additional and/or substitute electives are offered each year; students should consult the course offerings in the catalog (below the description of the tracks) for the full list of elective offerings in a given year.

LEADERSHIP STUDIES — TRADITIONAL TRACK

The introductory course:
LEAD/PSCI 125 Power, Leadership and Legitimacy: An Introduction to Leadership Studies

One required course on ethical issues related to leadership, typically:
PHEL 119 Introduction to Moral and Political Philosophy: Plato with Footnotes
PSCI 203 Introduction to Political Theory

Two core courses dealing with specific facets or domains of leadership, such as:
CLAS 323/LEAD 323/HIST 323 Leadership, Government, and the Governed in Ancient Greece
HIST 111/LEAD 150/ARAB 111 Movers and Shakers in the Middle East
HIST 241/LEAD 241 The Rise and Fall of the Soviet Union
HIST 326 War in European History
HIST 381/AFR 381 From Civil Rights to Black Power
HIST 475/LEAD 475 Modern Warfare and Military Leadership
LEAD 212/HIST 393 Sister Revolutions in France and America
LEAD 250/PSCI 205 Political Leadership
LEAD 285/PSCI 285/HIST 354 The Revolutionary Generation: Galaxy of Leaders
LEAD 295 Leadership and Management
PSCI 206/LEAD 206 Dangerous Leadership in American Politics
PSCI 216/LEAD 216 American Constitutionalism I: Structures of Power
PSCI 217/LEAD 217 Modern Constitutionalism II: Rights and Liberties
PSCI 218/LEAD 218 The American Presidency
PSCI 309/LEAD 309 Problems and Progress in American Democracy
PSCI 311/LEAD 311 Congress
PSCI 314 Leadership in American Political Development
PSCI 345 Cosmology and Rulership in Ancient Chinese Political Thought
SOC 387 Propaganda

One leadership studies winter study course (listed separately in the catalogue):

Capstone Course
LEAD 402 The Art of Presidential Leadership

LEADERSHIP STUDIES — KAPLAN PROGRAM IN U.S. FOREIGN POLICY TRACK

An introductory course:
HIST 262 The U.S. and the World, 1776-1914
PSCI/LEAD 120 America and the World or LEAD/PSCI 125 Power, Leadership and Legitimacy: An Introduction to Leadership Studies

One required course on issues related to American domestic leadership, such as:
LEAD 250/PSCI 205 Political Leadership
LEAD 285/PSCI 285/HIST 354 The Revolutionary Generation: Galaxy of Leaders
LEAD 402 The Art of Presidential Leadership
PSCI 218/LEAD 218 The American Presidency
PSCI 309/LEAD 309 Problems and Progress in American Democracy

Three required courses dealing with specific facets of American foreign policy leadership, such as:
HIST 262 The United States and the World, 1776 to 1914
HIST 263 The United States and the World, 1914 to the Present
HIST 388 Decolonization and the Cold War
HIST 389/ASST 389/LEAD 389 The Vietnam Wars
HIST 464/LEAD 464 The United States and the Vietnam War
PSCI 225 International Security
PSCI 262/LEAD 262 America and the Cold War
PSCI 263/LEAD 242 America and the Vietnam War
PSCI 266 The United States and Latin America
PSCI 312/LEAD 362 The Wilsonian Tradition in American Foreign Policy
SOC 202 Terrorism and National Security

Capstone Courses
PSCI/LEAD 365 U.S. Grand Strategy (W) or LEAD 402 Domains of Leadership: The Roosevelt Style of Leadership or PSCI 420 Henry Kissinger: Detente and the End of the Cold War
 STUDY AWAY

You can find general study away guidelines for Leadership Studies here.

LEAD 120(S) America and the World
Crosslistings: PSCI 120/LEAD 120/GBST 101
This course helps students understand the US role in the world. It provides insights into American involvement in various international issues, including: rising Chinese power; Russian moves in Ukraine; nuclear proliferation; terrorism; humanitarian disasters in Syria and Libya; and the challenges of climate change.

We will not only describe American involvement in various international issues but also seek to understand the reasons why the US often chooses, or should not be involved, and we will see why such careful reasoning sometimes gains traction in actual US foreign policy debates. Finally, we will assess whether US foreign policy decisions are coherent - that is, whether the US can be said to follow a "grand strategy." By the end of the course, students will develop their ability to think about foreign policy issues, improving their ability to participate in public life as engaged citizens.

Class Format: lecture
Requirements/Evaluation: papers, participation, and exam
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none
Enrollment Preferences: first-years and sophomores
Enrollment Limit: 35
Expected Class Size: 30

LEAD 125(F) Leadership, Power and Legitimacy: An Introduction to Leadership Studies
Crosslistings: LEAD 125/PSCI 125
Leadership has long been a central concept in the study of politics. Philosophers from Plato to Machiavelli have struggled with the question of what qualities and methods are necessary for effective leadership. Social scientists throughout the twentieth century have struggled to refine and advance hypotheses about leadership in the areas of economics, psychology, and sociology, among others. Nevertheless, despite all of this impressive intellectual effort, the study of leadership remains a contested field of study. Social scientists throughout the twentieth century have struggled to refine and advance hypotheses about leadership in the areas of economics, psychology, and sociology, among others. Nevertheless, despite all of this impressive intellectual effort, the study of leadership remains a contested field of study. It is precisely because universal answers to the major questions in leadership studies have proven to be elusive. This course is designed to introduce students to many of the central issues and debates in the area of leadership studies.

Class Format: lecture/discussion
Requirements/Evaluation: class participation and several brief (1 page) response papers, a short mid-term paper, and a longer final paper
Prerequisites: none
Enrollment Preferences: first-year students and sophomores
Enrollment Limit: 25

LEAD 135T The Great War, 1914-1918 (W)
Crosslistings: HIST 135/LEAD 135
During the nineteenth and early twentieth century Europeans and their immediate offspring created the modern world. European industry, science, trade, warfare, and culture dominated the globe. After a century of general peace the continual "progress" of Western Civilization seemed assured. Then, in August, 1914, the major European powers went to war with one another. After four years of unprecedented carnage, violence, and destruction, Europe was left exhausted and bitter, its previous optimism replaced by pessimism, its world position undermined, and its future clouded by a deeply flawed peace settlement.

What were the fundamental causes of the Great War? How and why did it break out when it did and who was responsible? Why was it so long, ferocious, wasteful, and, until the very end, indecisive? Why did the Allies, rather than the Central Powers, emerge victorious? What did the peace settlement settle? How was Europe changed? What is the historical significance of the conflict?

Class Format: tutorial
Requirements/Evaluation: paper or critique every week
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: first-year or sophomore standing; juniors or seniors with permission of instructor
Enrollment Preferences: first-year students, and then sophomores, who have not previously taken a 100-level tutorial
Enrollment Limit: 10
Expected Class Size: 10

LEC Instructor: Magnus Bernhardsson

LEAD 157 From Powhatan to Lincoln: Discovering Leadership in a New World (W)
Crosslistings: HIST 157/LEAD 157/AMST 157
The collision of cultures and peoples in colonial North America created a New World that demanded new forms of political leadership. This course explores
the history of leadership from the colonial era to the Civil War through the study of consequential individuals whose actions shaped seminal moments in American history. As often as possible, the course will analyze how leaders to stand the many different forms of leadership that existed throughout American history and how historical contexts affected individual decisions. The course opens with Powhatan, whose Native American empire spanned the East Coast of North America, and John Smith, who confronted this Indian empire as he tried to establish England's first toehold in the New World, and it ends with Abraham Lincoln, who tried to keep together a nation that Jefferson aimed to destroy. In between, the course will explore colonial leaders like John Winthrop, the first governor of the Massachusetts Bay Colony; African American leaders like Gabriel Prosser, who led a slave rebellion, and Richard Allen, a free black abolitionist; presidents like George Washington and Thomas Jefferson; First ladies like Abigail Adams and Dolley Madison; advocates for women's rights like Elizabeth Cady Stanton and Susan B. Anthony, and others. Providing a survey of early American history through the study of these individuals, students will have a deeper appreciation of how historical processes shaped leaders—and how leaders have shaped history.

**Class Format:** Seminar

**Requirements/Evaluation:** Evaluation will be based on class participation, weekly writing assignments, three 5-page essay assignments, and a final paper.

**Prerequisites:** First-year or sophomore standing; juniors or seniors with permission for instructor.

**Enrollment Preferences:** First-year students, and then sophomores who have not previously taken a 100-level seminar.

**Enrollment Limit:** 15-19

**Not Offered Academic Year 2017**

**SEM** Instructor: Patrick Spero

**LEAD 206(T) Dangerous Leadership in American Politics (W)**

*Donald Trump, Hillary Clinton, Ted Cruz, Bernie Sanders. What do Americans want from their political leaders? A common assumption is that those who do it well—whether in the presidency, the parties, social movements, organizations, or local communities—are just and legitimate agents of democratic change, and those most celebrated are those who have helped to move policy toward its ideals. Yet to rest on this is too simple as it is, in part, an artifact of historical construction. Assessing leadership in the moment is complicated because leaders press against the bounds of political convention—as do ideologues, malcontents, and lunatics. Indeed, a central concern of the founders was that democracy would invite demagoguery, and it would be convincing not to be the nation to ruin. Complicating things further, the nature of democratic competition is such that those vying for power have incentive to portray the opposition's leadership as dangerous. How do we distinguish desirable leadership from dangerous leadership? Can they be the same thing? Many who today are recognized as great leaders were, in their historical moment, branded dangerous. Others, whose ambitions and initiatives arguably undermined progress toward American ideals, were not recognized as dangerous at the time. In this tutorial, we will explore the concept of dangerous leadership in American history, from inside as well as outside of government. What constitutes dangerous leadership, and what makes a leader dangerous? Is it the person or the context? Who decides? How do we distinguish truly dangerous leadership from the perception of dangerous leadership? Does dangerous leadership describe the means or the ends of leadership? Does it matter? Is leadership that privileges desirable ends, such as justice or security, at the expense of democratic means acceptable? Is democratic leadership in service of "dangerous" goals acceptable, and what are these goals?*

**Class Format:** Tutorial

**Requirements/Evaluation:** Six 5-page essays; six 2-page response papers; and one 5-page rewritten essay.

**Extra Info:** May not be taken on a pass/fail basis; not available for the fifth course option.

**LEAD 207(F) The Modern Middle East (D)**

*This survey course addresses the main economic, religious, political, and cultural trends in the modern Middle East. Topics to be covered include cultural diversity of the Middle East, relations with Great Powers, the impact of imperialism, the challenge of modernity, the creation of national states and nationalist ideologies, the discovery of oil, radical religious groups, and war and peace. Throughout the course these significant changes will be evaluated in light of their impact on the lives of a variety of individuals in the region and especially how they have grappled differently with increasing Western political and economic domination. This course is part of the Exploring Diversity initiative because it compares the differences and similarities between different cultures and societies in the Middle East and the various ways they have responded to one another in the past.*

**Class Format:** Lecture/discussion

**Requirements/Evaluation:** Participation will be based on participation, 2 short papers, quizzes, midterm and final exam.

**Extra Info:** May not be taken on a pass/fail basis.

**Enrollment Preferences:** Open to all students.

**LEAD 212(S) Sister Revolutions in France and America**

*Crosslistings: LEAD 212/HIST 393*

*In the late-eighteenth century, two revolutions burst forth—they were the most striking and consequential events in modern history, decisive turning-points that transformed society and politics. The American Revolution led to an enduring and stable democratic republic whereas the French Revolution was followed by a turbulent succession of Empires and restoration of the monarchy. France did not have a sustainable republic until 1870. We will analyze in detail and in depth the ideas and theories of the leaders of both revolutions in order to understand why the American Revolution took a moderate course and plunged into violence and terror. We will read the writings of Washington, Jefferson, Madison, Hamilton, Rousseau, Robespierre, Saint-Just, Jacquelin, Edmund Burke and others.*

**Class Format:** Seminar

**Requirements/Evaluation:** Evaluation will be based on three papers, several class presentations, and active participation in class discussions.

**Extra Info:** May not be taken on a pass/fail basis; not available for the fifth course option.

**Enrollment Preferences:** Students with backgrounds in American history, French history or Political Science.

**LEAD 216 American Constitutionalism I: Structures of Power**

*Crosslistings: PSCI 216/LEAD 216*

*How has the American Constitution been debated and understood over time? What are the relations between constitutional and political change? This course examines the historical development of American constitutional law and politics from the Founding to the present. Our focus is on structures of power—the limits on congressional lawmaking, growth of presidential authority, establishment of judicial review, conflicts among the three branches of the federal government, and boundaries between the federal and state and local governments. The specific disputes under these rubrics range from secession to impeachment, gun control to child labor, waging war to sparring concerning the historical periods to be covered include the Marshall and Taney Court years, the Civil War and Reconstruction, the Progressive Era, the New Deal, the Warren Court, and the conservative ascendency of the late twentieth century. Readings are drawn from Supreme Court opinions, presidential addresses, congressional debates and statutes, political party platforms, key tracts of American political thought, and secondary scholarship on constitutional development. Throughout the semester, our goal will be to no longer elaborate doctrinal rules and multi-part constitutional "tests" than to understand the changing nature of, and changing relationship between, constitutional power and constitutional meaning in American history.*

**Class Format:** Lecture/discussion

**Requirements/Evaluation:** Three 5- to 7-page essays, a final exam, and class participation.

**Enrollment Preference:** None.
The October Revolution of 1917 brought to power in the debris of the Russian Empire a political party committed to the socialist transformation of society, culture, the economy, and individual human consciousness. Less than seventy-five years later, the experiment appeared to end in failure, with the stunning collapse of the Soviet Union in December 1991. Using a combination of primary and secondary sources, this course will explore the nature and historical significance of the Soviet experiment, the controversies to which it has given rise, and the forces, processes, and personalities that shaped the formation, transformation, and ultimate collapse of the Soviet Union.

**Class Format:** lecture/discussion

**Requirements/Evaluation:** evaluation will be based on class participation, a map quiz, several short papers based on class readings, and a final self-scheduled exam

**LEC Instructor:** William Wagner

**LEAD 242 America and the Vietnam War (W)**

Crosslistings: PSCI 263/LEAD 242

Every American president from Franklin Roosevelt to John F. Kennedy sought to avoid a commitment of ground forces to Vietnam. Lyndon Johnson also feared the consequences of a massive American commitment, but he eventually sent over half a million men to Vietnam. Richard Nixon hoped to conclude a peace with honor when he assumed the presidency, but the war lasted for another four years with many additional casualties. This course examines the complex political processes that led successive American presidents to get involved in a conflict that all of them deeply wished to avoid. We will examine both the international and domestic context of the war, as well as pay close attention to both South and North Vietnamese perspectives on the war. In addition, we will examine the long-standing arguments among both historians and political scientists over how to explain and interpret the longest and most controversial war in American history.

**Class Format:** seminar

**Requirements/Evaluation:** two 7-page papers, one 8- to 10 page paper, and active class participation

**Prerequisites:** none

**Enrollment Preferences:** sophomore and junior Political Science majors and Leadership Studies concentrators

**SEM Instructor:** James McAllister

**LEAD 250 Political Leadership**

Crosslistings: LEAD 250/PSCI 205

This course will examine the leadership strategies of American political leaders with an emphasis on the importance of communication strategies for public communication and the changes that new media has brought to the practice of politics and government. We will then explore the tenets of political strategy—both in campaigns and governing. This segment of the course will take a look at the tools used in crafting a strategy and how to put together a winning coalition. The final classes in the course will explore the challenges and opportunities facing select sub-groups of political leaders: women, celebrity candidates and officeholders and high-achieving young political leaders—operatives and elected officials.

**Class Format:** seminar

**Requirements/Evaluation:** three short papers and a final research paper

**Extra Info:** not available for the fifth course option

**Prerequisites:** none

LEAD 255 Perspectives on the American Revolution

Class Format: lecture/discussion
Requirements/Evaluation: evaluation will be based on class participation (20%), mid-term (20%) and final (25%) exams, and a final project (35%)
Prerequisites: none; open to all
Enrollment Preferences: History majors and Leadership Studies concentrators
Enrollment Limit: 25
Expected Class Size: 20-25
Distributional Requirements: Division 2
Other Attributes: HIST Group F Electives - U.S. + Canada

Not Offered Academic Year 2017
LEC  Instructor: Patrick Spero

LEAD 259 The Politics of Presidential Leadership, 1776-1860

Crosslistings: HIST 359/LEAD 259

This course will trace the development of the presidency from George Washington to Abraham Lincoln. By focusing on the most consequential presidents of the period, the class will explore presidential successes and failures during times of peace and prosperity and during times of war and depression. As often as possible, the class will examine the tactics of these presidents' political rivals to understand how competing politicians tried to navigate the social and political terrain of their day. Through the study of biography and primary sources, students will offer critical appraisals of the presidents of the period, the class will explore presidential successes and failures during times of peace and prosperity and during times of war and depression.

Requirements/Evaluation: evaluation will be based on class participation (25%), class presentation (10%), group presentation (5%), two essay assignments (each 15%), and a final project (30%)
Prerequisites: none
Enrollment Preferences: History majors and Leadership Studies concentrators
Enrollment Limit: 25

LEAD 261(F) The United States and the World, 1914 to the Present

Crosslistings: HIST 263/PSCI 261/LEAD 261

This course explores America's engagement with the world from 1914 to the present. The First World War ushered in a new era for U.S. foreign relations. The self-identified isolationist power became a principal player on the world stage and by the end of the Second World War emerged as one of the two global superpowers, poised to compete with the Soviet Union in a protracted Cold War. After the Cold War ended in 1991, some spoke of the United States as a "hyperpower," but how should it exercise its unrivaled power was far from clear. Through a mixture of lecture and discussion, this course introduces students to the key events of America's most powerful century and to the new wave of scholarly literature being written about the United States and the World. Readings will reflect current trends in the sub-field, which focuses not only on high-level diplomacy, but also on a range of other factors that influence foreign relations, including ideology, race, gender, culture, domestic politics, and the roles of individual personalities.

Class Format: lecture/discussion
Requirements/Evaluation: evaluation will be based on class participation, short papers, a midterm exam, and a final exam
Prerequisites: none; open to all
Enrollment Limit: 40
Expected Class Size: 25-30
Distributional Requirements: Division 2
Other Attributes: HIST Group F Electives - U.S. + Canada

LEAD 262(F) America and the Cold War

Crosslistings: PSCI 262/LEAD 262/HIST 261

This course examines the rise and fall of the Cold War, focusing on four central issues. First, why did America and the Soviet Union become bitter rivals shortly after the defeat of Nazi Germany? Second, was one side primarily responsible for the length and intensity of the Cold War in Europe? Third, why did the Cold War end long before the collapse of the Soviet Union in 1989? Political scientists and historians continue to argue vigorously about the answers to all these questions. We examine both traditional and revisionist explanations of the Cold War, as well as the new findings that have emerged from the partial opening of Soviet and Eastern European archives. The final section of the course examines how scholarly interpretations of the Cold War continue to influence how policymakers approach contemporary issues in American foreign policy.

Class Format: lecture/discussion
Requirements/Evaluation: one medium length paper, an in-class midterm and final exam, and a series of term papers
Prerequisites: none; PSCI 202 is recommended but not required
Enrollment Preferences: Political Science majors and Leadership Studies concentrators
Enrollment Limit: 19

LEAD 285(F) The Revolutionary Generation: Galaxy of Leaders

Crosslistings: LEAD 285/PSCI 285/HIST 354

The American Revolution produced a galaxy of brilliant politicians, statesmen, and military leaders of extraordinary courage, intellect, creativity, and character: Washington, Hamilton, Jefferson, Madison, Adams. In this seminar, we will study their astounding accomplishments—a successful war of independence, a Constitution and Bill of Rights, enduring democratic political institutions, and a nascent party system. But mostly we will focus on their ideas, for they were thinking revolutionaries. We will examine in depth and in detail their superb writings, their letters and speeches as well as Madison's and Hamilton's Federalist essays. We will also read recent interpretations of the founding generation by Gordon Wood, Joseph Ellis, Bernard Bailyn, and others.

Class Format: seminar
Requirements/Evaluation: evaluation based on three papers, several class presentations, and active participation in all discussions
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none; courses in Leadership Studies or Political Theory or early American History are very helpful for admission to this seminar
Enrollment Preferences: students with a background in Leadership Studies, American History or American Political Science
Enrollment Limit: 12
Expected Class Size: 12

LEAD 293(S) Leadership and Political Change

Crosslistings: LEAD 293/PSCI 293

Primary Crosslisting

This course will examine the foundations of effective political leadership — both transformational and evolutionary. It will balance theory and practice, case studies and student exploration to better understand how political change and policy reform is enacted in a representative democracy. The course begins with a framework to evaluate leadership, transitions to examining the
importance of vision in effecting political change, moves to an in-depth look at effective communicative strategies and mobilization techniques required to realize that change, and concludes with an assessment of the prospects for leadership in the current political landscape. We will cover presidential, congressional, and military leadership and include prominent guest speakers from the world of American politics.

**Class Format:** lecture

**Requirements/Evaluation:** two 5-7 page analytic essays, final exam, and class participation

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

LEAD 314 Leadership in American Political Development (W) Crosslistings: PSCI 314/LEAD 314
From the Founding to the present, the American political order has undergone incredible, cataclysmic and thoroughgoing transformations, yet it has also proven to be remarkably enduring. How can this be? Where do we find continuities and where upheavals? What accounts for the continuities, and what for the changes? What sorts of transformations have been possible, and who or what has made them possible? Finally, what are the costs of change (and of continuity)—and who pays them? The goal of this course is to assess American political change, or lack of it, and to gain a sense of the role that individual leaders have played in driving change. We will examine when and how individual agency and leadership has mattered in the transformation of American political systems, and/or Leadership Studies is preferred; open to first-year students with instructors permission
Enrollment Limit: 19
Expected Class Size: 12

LEAD 325(S) The Roosevelt Style of Leadership Crosslistings: LEAD 325/HIST 358
In this seminar we will study the political and moral leadership of Theodore, Franklin and Eleanor Roosevelt. The three Roosevelts transformed and expanded the role of government in American society, bringing about fundamental and lasting change. What were their leadership strategies and styles? How did TR and FDR differ in their approaches to leadership? Were TR's "Square Deal" and FDR's "New Deal" similar? How did Dr. New Deal become Dr. Win-the-War? How did they balance political deal-making with bold, principled leadership? What kind of leadership role did Franklin Roosevelt play? In addition to studying biographies, their writings and speeches, we will do research using the Proquest data base of historical newspapers, to see history as it was being made.
Class Format: seminar
Requirements/Evaluation: evaluation based on participation in class discussions, oral reports, two research papers
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none; courses in Leadership Studies and American Political Science and American History are very helpful for admission to this seminar

LEAD 327(F,S) Leadership and Strategy (W) Crosslistings: PSCI 327/LEAD 327
This course is about the role of leaders and statecraft in international relations. In particular, this course examines the relationship between political and military objectives. The aim is to identify and analyze the principal structural and situational constraints—both foreign and domestic—that limit leaders' freedom of action, and which they must manage effectively to achieve their diplomatic and military goals. The course integrates theoretical perspectives related to a range of international security issues—including the causes of...
war, alliance politics, nuclear strategy, deterrence, coercion, reassurance, misperception, and credibility concerns— with illustrative case studies of decision-makers in action. The basic structure of the class is interdisciplinary; the goal of this approach is to utilize key conceptual arguments to gain greater leverage for the examination of major historical decisions in national security policy. Students will be asked to analyze and evaluate the strategic choices we examine, as well as the process by which they were reached. The primary objective of the course is for students to improve dramatically their understanding of the role of leaders and strategic choice in international relations.

Class Format: seminar
Requirements/Evaluation: students will be evaluated based on their participation in class, a midterm examination, and a final research paper, roughly 20-25 pages in length
Prerequisites: none
Enrollment Preferences: Political Science Majors and Leadership Studies concentrators
Enrollment Limit: 15

LEAD 338T Garveyism (W)
Crosslistings: AFR 338/PSCI 338/LEAD 338
This course explores the life, work, political thought, and activism associated with the Jamaican Pan-Africanist Marcus Mosiah Garvey and the transnational movement—Garveyism—that was captured by its leader and founder, Marcus Mosiah Garvey, ushered into the modern world. We will investigate the founding of Garveyism on the island of Jamaica, the evolution of Garveyism during the early twentieth century across the Americas and in Africa, Garveyism in Europe in the mid-twentieth century, and the contemporary branches of Garveyism in our own late modern times. The implications of Garvey’s conflict with W. E. B. Du Bois and the subsequent cleavages in political thought and allegiances among their respective adherents will be addressed, along with various other core issues including: the relationship between race, nation, and empire; transnationalism; the meaning of power; notions of leadership; the limitations of understanding Garveyism by the phrase “Back-to-Africa”; the moral philosophy of respect, reparation, and redemption; prophetic political theory; Pan-Africanism; the impact of Garveyism on critical theological movements such as the Nation of Islam and Rastafari; women in the Garvey movement; and Garveyite strategies for forging models of political solidarity in dark times.
Class Format: tutorial
Requirements/Evaluation: attendance, five 5-page essays, five 2-page critiques, and one 1-page essay for the final class
Extra Info: may not be taken on a pass/fail basis

LEAD 340 Great Astronomers and Their Original Publications (W)
In the 2014-15 academic year our sun-library book, honoring the new library and the expansion of the Chapin Library of Rare Books, we study many of the greatest names in the history of astronomy, consider their biographies, assess their leadership roles in advancing science, and examine and handle their first-edition books and other publications. Our study includes the original books published as follows: 16th-century, Nicolaus Copernicus (heliocentric universe); Tycho Brahe (best pre-telescopic observations); 17th-century, Galileo (discoveries with his first astronomical telescope, 1610; sunspots, 1613; Dialogue, 1632), Johannes Kepler (laws of planetary motion, 1609, 1619), Johannes Hevelius and Elisabeth Hevelius (atlasses of stars and the Moon, 1647 and 1687), Isaac Newton (laws of universal gravitation and of motion, 1687); 18th-century, Edmond Halley (Miscellanea curiosa, eclipse maps, 1715, 1724); John Flamsteed and Margaret Flamsteed (Atlas Coelestis, 1729); William Herschel and Caroline Herschel (1781, 1798). In more recent centuries, the original works are articles: 20th-century: Albert Einstein (special relativity, 1905; general relativity, 1916); Marie Curie (radioactivity); Cecilia Payne-Gaposchkin (hydrogen dominating stars, 1929), Edwin Hubble (Hubble’s law, 1929); Vera Rubin (dark matter, 1970s); Jocelyn Bell (pulsar discovery, 1968); 21st-century: Wendy Freedman (Universe’s expansion rate, 2000s). We will also read biographies and recent novels dealing with some of the above astronomers. With the collaboration of the librarians, we will meet regularly in the Chapin Library of Rare Books and also have a session at the library of the Clark Art Institute to see its rare books of astronomical interest.

Class Format: seminar
Requirements/Evaluation: class participation, two 5-page intermediate papers, and a final 15-page paper
Enrollment Preferences: if over enrolled, preference by written paragraph of explanation of why student wants to take the course

LEAD 345T Biography as American History
Biography is easily the most widely read form of American history today; in fact, historical biography is among the most popular of all literary forms in contemporary America. Yet historians oftentimes treat the genre with suspicion; moreover, they have engaged in relatively little sustained reflection about how biographical approaches might illuminate major historical questions. For its part, leadership studies treats biography as a fundamental mode of analysis; yet the genre is problematic, for its conventions sometimes obscure the social/structural contexts within which leadership is practiced. In this course, we will view American history through the lens of biography, asking what this genre reveals about the past as well as what it conceals. We will also conduct critical inquiries into the relationship between historical analysis and biography and the practice of writing history through biography. What tensions exist between history and biography, and how have writers sought to negotiate these tensions? What have historians sought to use the biographical form to do, and how successful have they been in achieving their objectives? What do biographers’ choices—their narrative emphases as well as their choices of subject—reveal about their conceptions of history? How has the writing of analytical biography changed over time? How have its practitioners sought to innovate, and toward what ends? Above all, we will seek to develop a deeper sense of the relationship between people and processes, between individual lives and history—issues fundamental to a historical understanding of leadership.
Class Format: tutorial
Requirements/Evaluation: weekly writing assignments, research proposal, research paper with presentation
Extra Info: may not be taken on a pass/fail basis
Prerequisites: previous course in American history

LEAD 355T(S) American Realism: Kennan, Kissinger and the American Style of Foreign Policy (W)
Crosslistings: PSCI 355/LEAD 355
George Kennan is widely considered to be the author of the containment strategy that ultimately won the Cold War. Henry Kissinger served as National Security Advisor and Secretary of State. In addition to their distinguished careers in government, both men have published well-regarded and popular scholarship on various aspects of American foreign policy, international relations, and nuclear weapons. This tutorial will first examine the nature of their relationship to both Realist and Wilsonian perspectives on American foreign relations. We will then examine their experiences as strategists and policymakers during the most crucial moments of the Cold War. One of the key questions we will seek to answer is why Kennan and Kissinger disagreed on so many important issues, ranging from the Vietnam War to the role of nuclear weapons, despite their shared intellectual commitment to Realism. Finally, we will also examine some of the more recent biographies of both men, including John Lewis Gaddis’s Pulitzer prize-winning George F. Kennan: An American Life and Niall Ferguson’s Kissinger: 1923-1968: The Idealist. Class Format: tutorial
Requirements/Evaluation: five 6-page papers, five 2-page response papers
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none
Enrollment Preferences: Political Science majors, Leadership Studies concentrators (foreign policy track), and History majors.
Enrollment Limit: 15

TUT Section: T1 MWF 08:30 AM 09:45 AM Instructor: James McAllister
LEAD 402(F) The Art of Presidential Leadership
In this seminar, we will focus on the leadership skills, strategies, successes and failures of some of the greatest American presidents—Washington, Jefferson, Theodore Roosevelt, FDR, Reagan—as well as some of the most controversial—Lyndon Johnson and Nixon. We will investigate how these presidents developed as leaders before as well as after their election to the presidency. How did they determine their goals and assemble their leadership teams? How did they mobilize followers and connect with them? What challenges did they face and what principles guided them? What failures did they meet and why? Can we relate these historical examples to the American presidency today? Readings will include correspondence, speeches, and biographies. Students will make extensive use of the Proquest data base of historical newspapers to study history as it was being made.

Class Format: seminar
Requirements/Evaluation: three papers and several class presentations
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: LEAD 125 or permission of instructor
Enrollment Preferences: Leadership Studies concentrators and students with background in American history and Political Science
Enrollment Limit: 15
Expected Class Size: 15
Distributional Requirements: Division 2
Other Attributes: LEAD American Domestic Leadership

LEAD 403 Making it in Africa: Business in African History
Although Africa has come to be known as a continent that relies heavily on foreign aid, that aid rarely reaches ordinary people. In fact, recent studies have suggested that foreign aid has not helped develop Africa. In spite of the staggering problems that ordinary Africans face, many see Africa—now more than ever before—as a place bursting with promise and opportunity, even if that opportunity may require challenges to conventional economic and political thinking. Increasingly, an innovative class of entrepreneurs is emerging in Africa that is husting in the formal and informal economy in order to accumulate capital. This seminar will trace the social and cultural history of entrepreneurship in Africa from the 19th century to the present. We will explore the individual journeys of several entrepreneurs, the values and objectives they nurtured, the changes in the strategy and structure of the businesses they created, and the dynamic environments in which they each lived and worked. The course will also examine the long-term impact of entrepreneurial innovation and market evolution on African communities and governments. Readings will include histories, biographies, autobiographies, ethnographies, and novels.

Class Format: seminar
Requirements/Evaluation: evaluation will be based on participation in discussion, several short papers, and a final research paper
Prerequisites: previous courses in HIST
Enrollment Preferences: History majors and Africana Studies concentrators
Enrollment Limit: 15
Expected Class Size: 10-15
Distributional Requirements: Division 2
Other Attributes: HIST Group A Electives - Africa

Not Offered Academic Year 2017

LEAD 420 The Great Transformation: America and Europe in the 20th Century
At the beginning of the 20th century, Europe was at the center of world politics and the main player in the balance of power while America was a peripheral player in the international system. American involvement in European affairs was strictly limited. By the end of the 20th century, the states of Western Europe would become greatly integrated and the threat of war was virtually abolished. No longer an isolationist power, America would become intimately involved in every facet of European and world politics. This course examines this great and fundamental transformation of the international system. We will examine American involvement in both of the world wars, the defense of Europe during the Cold War, decolonization, and the uneven but steady development of European unity and integration in the second half of the 20th century.

Class Format: seminar
Requirements/Evaluation: short response papers and a lengthy research paper
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: PSCI 120 or 202
Enrollment Preferences: Political Science/International Relations concentrators and concentrators in Leadership studies (Kaplan track)
Enrollment Limit: 14

LEAD 440(S) The Russian Revolution at 100 (W)
100 years ago the February Revolution of 1917 began a process of revolution through which a new type of political regime attempted to create a modern communist society, economy, and culture. By the 1930s this process of revolutionary transformation had developed into the Stalinist system, characterized by a hypertextic state, rapid industrialization and the destruction of peasant agriculture, radical social and cultural change combined with traditionalism, and extensive state welfare combined with unprecedented state violence, all presided over by the towering figure of Joseph Stalin. The purpose of this seminar is to enable students to explore the sources and dynamics of this revolutionary process and to assess its meaning and significance in light of the past 100 years through both common readings and a seminar project. Class meetings therefore will be devoted both to the discussion of common readings intended to familiarize students with the main aspects and interpretations of the Revolution, as well as with some of the sources on which these interpretations are based, and to helping students with their research. Research topics can focus on any aspect of the Revolution, defined broadly as the period between 1900 and 1939.

Class Format: seminar
Requirements/Evaluation: short response papers, 2-3 oral presentations, substantial 18- to 25-page research paper, and class discussion
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none, but some familiarity with modern Russian or European history or background in Russian studies would be helpful
Enrollment Preferences: History majors, Leadership Studies concentrators, and students with some background in modern Russian/European history or Russian studies
Enrollment Limit: 14
Expected Class Size: 6-10
Dept. Notes: Fullfills Advanced Seminar and Group C requirements
Distributional Requirements: Division 2
Writing Intensive
Other Attributes: HIST Group C Electives - Europe and Russia

Spring 2017

LEAD 458 Senior Seminar: The Vietnam War and the Vietnam Era, 1961-75
This upper-level course has three major objectives. First, it will familiarize students with the basic political, military and diplomatic facts of the Vietnam War. Second, it will acquaint them more generally with broader aspects of the years 1954-75, especially the great political and cultural changes that took place within the United States beginning around 1965. Lastly, each student will have the opportunity to research and write about some aspect of one of these two topics in some detail. In so doing, students will learn some new research techniques that use up-to-date software, and may take advantage of the enormous opportunities now available for on-line research.

Class Format: seminar
Requirements/Evaluation: class participation and a 20- to 25-page research paper
Extra Info: may not be taken on a pass/fail basis
Prerequisites: none
Enrollment Preferences: senior Political Science majors and Leadership Studies concentrators
Enrollment Limit: 14
Expected Class Size: 14
Distributional Requirements: Division 2
Other Attributes: PSCI International Relations Courses

Not Offered Academic Year 2017

LEAD 464 The United States and the Vietnam War
U.S. involvement in Vietnam affected nearly every aspect of American life, including the country's overall foreign policy, its military strategy, the relationship between various branches of government, the nation's political trajectory, the role of media in society, youth culture, race relations, and more. This seminar examines America's war in Vietnam and its domestic ramifications at home and abroad. We will evaluate the Vietnam War era as a turning point in U.S. history—and in the role of the U.S. in the world—by reading and discussing a number of scholarly works on domestic and international aspects of the conflict. Students will develop an original research topic and research and write a 20- to 25-page paper, based in primary sources, on one aspect of America's Vietnam War.
From the early nineteenth to the twenty-first century, modern history has been marked by numerous wars fought by nation states. Some of these wars were enormously destructive, some changed history decisively on a continental or global scale. This modern period of warfare witnessed rapid and dramatic changes in the manner military forces were organized, armed, and led, and in their scale and lethality. From the smoothbore musket to the machine gun, sailing warships to dreadnaught battleships, horse-pulled artillery to the atomic bomb, submarines under the seas and warplanes in the skies, to rockets and smart weapons, war rapidly evolved and continues to evolve today. This course will study these developments, concentrating on conflicts like the Napoleonic wars, the American Civil War, World War I and World War II, with special emphasis upon the evolution of military leaders like Napoleon, Grant and Lee, Moltke, Churchill and Roosevelt, Stalin and Hitler, Nelson and Doenitz, Eisenhower and MacArthur. Is it leadership that provides the key to our understanding of modern warfare? Or is it technology? Or certain "timeless" military principles that transcend local historical contexts? Can history help us foresee the future of warfare?

**Course Information**

**MATERIALS SCIENCE STUDIES (DIV III)**

Advisory Committee: Professors: D. AALBERTS*, P. KARABINOS, D. LYNCH, L. PARK*, J. STRAIT. Associate Professors: S. GOH.

Materials Science is an interdisciplinary field which combines microscopic physics and chemistry in order to understand and control the properties of materials such as plastics, semiconductors, metals, liquid crystals, and biomaterials. Williams students with an interest in the properties of materials can create interdisciplinary programs, or in pursuing careers in materials science or a variety of engineering disciplines would benefit from following the courses in this program.

**MATHMATICS AND STATISTICS (DIV III)**

**Chair:** Professor SUSAN LOEPP

**MAJOR IN MATHEMATICS**

The major in Mathematics is designed to meet two goals: to introduce some of the central ideas in a variety of areas of mathematics and statistics, and to develop problem-solving ability by teaching students to combine creative thinking with rigorous reasoning. Mathematics is a gateway to many career paths including statistics, teaching, consulting, business, engineering, finance, actuarial studies and advanced applied mathematics. Students are strongly encouraged to consult with the department faculty on choosing courses appropriate to an individualized program of study.

**REQUIREMENTS (nine courses plus colloquium)**

The major in Mathematics consists of nine courses plus the colloquium requirement. Mathematics is highly cumulative, and students should plan a route to completing the major that ensures the proper sequencing and prerequisites for all needed courses. Note that not all upper level courses are offered every year.

**Calculus (two courses)**

- Mathematics 140 Calculus I
- Mathematics 150 or 151 Multivariable Calculus

**Applied/Discrete Mathematics/Statistics (one course)**

- Mathematics 209 Differential Equations
- Mathematics 210 Mathematical Methods for Scientists (Same as Physics 210)
- Mathematics 200 Discrete Mathematics
- Statistics 201 Statistics and Data Analysis
- Statistics 231 Statistical Design of Experiments
- a more advanced applied/discrete/statistics course with prior department approval

**Core Courses (three courses)**

- Mathematics 250 Linear Algebra
- Mathematics 330 Real Analysis or Mathematics 351 Applied Real Analysis
- Mathematics 335 Abstract Algebra

**Completion (three courses plus colloquium)**

- Two electives from courses numbered 300 and above, or STAT 231
- Any 400-level course taken in the senior year (excluding thesis work and independent studies)

Participation in the Department Colloquium, in which all senior majors present and attend talks on mathematical or statistical topics of their choice. Majors have to attend at least 20 colloquia in their senior year and present one themselves.

**ADVANCED PLACEMENT**

Students who come to Williams with advanced placement will be moved up in the Mathematics major, and should consult with faculty to be placed in the best class reflecting their experience and background. A student who places out of a course substitutes another course numbered 200 or above in Mathematics or Statistics to complete the nine course major. Students should select courses best suited to their preparation and goals, and consult with the department faculty concerning appropriate courses and placement. The department reserves the right to refuse registration in any course for which the student is overqualified.

For example, a student starting in MATH 130 might take MATH 130 and 140 the first year, MATH 150 and MATH 200 the second year, MATH 250 and MATH 350 the third year, MATH 355 and a senior seminar the fourth year, plus the two required electives some time. Students are encouraged to consult freely with any math faculty about course selection and anything else.

**CALCULUS PLACEMENT**

Recommended placement for students who have taken an Advanced Placement Examination in Calculus (AB or BC): is:

- BC 1, 2 or AB 2, 3 Math 140
- AB 4 or 5 Math 150
- BC 3, 4 or 5 Math 151

Consult with department faculty for any Calculus or Statistics placement questions. Students who have had calculus in high school, whether or not they took the Advanced Placement Examination, are barred from 130 unless they obtain permission from the instructor.

**NOTES**

**Substitutions, Study Abroad, and Transfer Credit:** In some cases, and with prior permission of the Mathematics and Statistics Department, appropriate courses from other institutions or a course from another Williams department may be substituted for electives. Programs like the Budapest
Semester in Mathematics* are recommended for majors who wish to focus on mathematics away. The department, though, normally accommodates students who select other study away programs. The department offers its core courses in both the fall and the spring to allow students to spend more easily a semester away. You can find general study away guidelines for mathematics away. The department, though, normally accommodates semester in Mathematics* are recommended for majors who wish to focus on mathematics away. application and continuation requirements, but at least eight courses must be taken from the Department of Mathematics and Statistics at Williams. These can, with prior permission, include courses taken away. Students with transfer courses normally offered every year. Other 300 and 400 level statistics courses are offered on an irregular basis. Students should check with the department before planning far into the future.

Course Admissions: Courses are normally open to all students meeting the prerequisites, subject to any course caps. Students with questions about the level at which courses are conducted are invited to consult department faculty.

THE DEGREE WITH HONORS IN STATISTICS

The degree with honors in Statistics is awarded to the student who has demonstrated outstanding intellectual achievement in a program of study which extends beyond the requirements of the major. The principal considerations for recommending a student for the degree with honors will be: mastery of core material and skills, breadth and, particularly, depth of knowledge beyond the core material, ability to pursue independent study of statistics, originality in methods of investigation, and, where appropriate, creativity in research.

Courses normally consist of two semesters (STAT 493 and 494) and a winter study (WSP 031) of independent research, culminating in a thesis and a presentation. One of STAT 493 or STAT 494 can count as a continuation course, but not both. Neither counts as the 400-level senior capstone course.

An honors program in actuarial studies requires significant achievement on four or more examinations of the Society of Actuaries.

Highest honors will be reserved for the rare student who has displayed exceptional ability, creativity, and originality. Such a student usually will have written a thesis or pursued actuarial honors. In all cases, the award of honors and highest honors is the decision of the Department.

MATH 102(F) Foundations in Quantitative Skills

This course is designed to strengthen the student's foundation in quantitative reasoning in preparation for the science curriculum and QFR requirements. The material will cover topics at the college algebra/precalculus level with a particular emphasis on the computational and applied side of mathematics. We will use specialized software, including Excel and Mathematica. Prior experience with this software is not required. The course will be offered as a tutorial, with pairs of students meeting with the instructor to discuss various topics in mathematics and their implementation on the computer. Access to this course is limited to placement by a quantitative skills counselor.

Class Format: tutorial
Requirements/Evaluation: homework assignments and projects
Enrollment Preferences: students who need most help with the quantitative reasoning
Enrollment Limit: 10
Expected Class Size: 10
Distributional Requirements: Division 3

Fall 2016
LEC Section: 01   MWF 10:00 AM 10:50 AM   Instructor: Lori Pedersen
LEC Section: 02   MWF 11:00 AM 11:50 AM   Instructor: Lori Pedersen

MATH 103 The Beauty of Numbers (Q)

Have you ever wondered what keeps your credit card information safe everytime you buy something online? Number theory! Number Theory is one of the oldest branches of mathematics. In this course, we will discover the beauty and usefulness of numbers, from ancient Greece to modern cryptography. We will look for patterns, make conjectures, and learn how to prove these conjectures. Starting with nothing more than basic high school algebra, we will develop the logic and critical thinking skills required to realize and prove mathematical results. Topics to be covered include the meaning and content of proof, prime numbers, divisibility, rationality, modular arithmetic, Fermat’s Last Theorem, the Golden ratio, Fibonacci numbers, coding theory, and unique factorization.

Class Format: lecture
Requirements/Evaluation: evaluation will be based primarily on homework, quizzes, and exams
Enrollment Limit: 25
Expected Class Size: 25
Distributional Requirements: Division 3
Quantiative/Formal Reasoning

Not Offered Academic Year 2017
LEC: Instructor: Allison Pacelli

MATH 115 Mathematical Politics: Voting, Power, and Conflict (Q)

Crosslistings: MATH 115/INTR 160

Who should have won the 2000 Presidential Election? Do any two senators really have equal power in passing legislation? How can marital assets be divided fairly? While these questions are of interest to many social scientists, a mathematical perspective can offer a quantitative analysis of issues like these and many more. In this course, we will discuss the advantages and disadvantages of various types of voting systems and show that, in fact, any such system is flawed. We will also examine a quantitative definition of power and the principles behind fair division. Along the way, we will enhance the critical reasoning skills necessary to tackle any type of problem mathematical or otherwise.

Class Format: lecture/discussion
Requirements/Evaluation: evaluation will be based primarily on projects, homework assignments, and exams
Prerequisites: MATH 102 (or demonstrated proficiency on a diagnostic test) or permission of instructor
Enrollment Limit: 30
Expected Class Size: 30
Distributional Requirements: Division 3
Quantiative/Formal Reasoning

MATH 120 The Art of Mathematical Thinking: An Introduction to the Beauty and Power of Mathematical Ideas (Q)

What can mathematics do for you? How can it enrich and improve your life? What do mathematicians think about and how do they go about tackling challenging questions? Most people envision mathematicians as people who solve equations or perform arithmetic. In fact, mathematics is an artistic endeavor which requires both imagination and creativity. In this course, we will experience what this is all about by discovering various beautiful branches of mathematics while learning life lessons that will have a positive impact on our lives. There are two meta-goals for this course: (1) a better perspective into mathematics, and (2) a sharper analytical reasoning to solve problems (both mathematical and nonmathematical).

Class Format: lecture
Requirements/Evaluation: evaluation will be based primarily on projects, homework assignments, and exams
Enrollment Limit: 30
Expected Class Size: 30
Dept. Notes: not open to students who have taken mathematics courses other than MATH 102, 130, 170, STAT 101 without permission of the instructor
Distributional Requirements: Division 3
Quantiative/Formal Reasoning

MATH 130(F,S) Calculus I (Q)

Calculus permits the computation of velocities and other instantaneous rates of change by a limiting process called differentiation. The same process also solves “max-min” problems: how to maximize profit or minimize pollution. A second limiting process, called integration, permits the computation of areas and accumulations of income or medicines. The Fundamental Theorem of Calculus provides a useful and surprising link between the two processes. Subtopics include trigonometry, exponential growth, and logarithms.

Class Format: lecture
Requirements/Evaluation: evaluation will be based primarily on exams, homework, and quizzes
Enrollment Limit: 50
Expected Class Size: 50
Department Notes: only open to students who have not taken calculus before
Enrollment Limit: 50
Expected Class Size: 50
Department Notes: students who have previously taken a calculus course may not enroll in MATH 130 without the permission of instructor
Distributional Requirements: Division 3
Quantiative/Formal Reasoning

MATH 150(F,S) Multivariable Calculus (Q)
Applications of calculus in mathematics, science, economics, psychology, the social sciences, involve several variables. This course extends calculus to several variables: vectors, partial derivatives, multiple integrals. There is also a unit on infinite series, sometimes with applications to differential equations.

Class Format: lecture
Requirements/Evaluation: evaluation will be based primarily on homework, quizzes, and/or exams
Prerequisites: MATH 140 or equivalent, such as satisfactory performance on an Advanced Placement Examination
Enrollment Limit: 50
Expected Class Size: 50

Fall 2016
LEC Section: 01 MWF 09:00 AM - 09:50 AM Instructor: Stewart Johnson
LEC Section: 02 MWF 10:00 AM - 10:50 AM Instructor: Stewart Johnson

LEC Section: 02 MWF 11:00 AM - 11:50 AM Instructor: Diana Davis

MATH 151(F,S) Multivariable Calculus (Q)
Applications of calculus in mathematics, science, economics, psychology, the social sciences, involve several variables. This course extends calculus to several variables: vectors, partial derivatives and multiple integrals. The goal of the course is Stokes Theorem, a deep and profound generalization of the Fundamental Theorem of Calculus. The difference between this course and MATH 150 is that MATH 150 covers infinite series instead of Stokes Theorem. Students with the equivalent of BC 3 or higher should enroll in MATH 151, as well as students who have taken the equivalent of an integral calculus and who have already been exposed to infinites. For further clarification as to whether MATH 150 or MATH 151 is appropriate, please consult a member of the math/stat department.

Class Format: lecture
Requirements/Evaluation: evaluation will be based primarily on homework, quizzes, and/or exams
Prerequisites: AP BC 3 or higher or integral calculus with infinite series
Enrollment Limit: 50
Expected Class Size: 50
Dept. Notes: MATH 151 satisfies any MATH 150 prerequisite; credit will not be given for both MATH 150 and MATH 151

Fall 2016
LEC Section: 01 MWF 09:00 AM - 09:50 AM Instructor: Ralph Morrison
Section: 02 MWF 10:00 AM - 10:50 AM Instructor: Ralph Morrison
Section: 03 MWF 11:00 AM - 11:50 AM Instructor: Ralph Morrison

MATH 200(F,S) Discrete Mathematics (Q)
Course Description: In contrast to calculus, which is the study of continuous processes, this course examines the structure and properties of finite sets. Topics to be covered include mathematical logic, elementary number theory, mathematical induction, set theory, functions, relations, elementary combinatorics and probability, graphs and trees, and algorithms. Emphasis will be on the methods and styles of mathematical proofs, in order to prepare the students for more advanced math courses.

Class Format: lecture/discussion
Requirements/Evaluation: evaluation will be based primarily on homework and exams
Prerequisites: MATH 140, or MATH 130 with CSCI 134 or 135, or one year of high school calculus with permission of instructor
Enrollment Limit: none
Expected Class Size: 25

Fall 2016
LEC Section: 01 MWF 09:00 AM - 09:50 AM Instructor: Peyam Tabrizian

Spring 2017
LEC Section: 01 MWF 09:00 AM - 09:50 AM Instructor: Peyam Tabrizian

MATH 209 Differential Equations (Q)
Historically, much beautiful mathematics has arisen from attempts to explain physical, chemical, biological and economic processes. A few ingenious techniques solve a surprisingly large fraction of the associated ordinary and partial differential equations, and geometric methods give insight to many more. The mystical Pythagorean fascination with ratios and harmonics is vindicated and applied in Fourier series and integrals. We will explore the methods, abstract structures, and modeling applications of ordinary and partial differential equations and Fourier analysis.

Class Format: lecture/discussion
Requirements/Evaluation: evaluation will be based on problem sets, hour tests, and a final exam
Prerequisites: MATH 150; students may not normally get credit for both MATH 209 and MATH/PHYS 210
Enrollment Limit: 50
Expected Class Size: 25

Division 3
Quantitative/Formal Reasoning

Spring 2017
LEC Section: 01 MWF 10:00 AM - 10:50 AM Instructor: Lori Pedersen

MATH 210(S) Mathematical Methods for Scientists (Q)
Crosslistings: PHYS 210/MATH 210
This course covers a variety of mathematical methods used in the sciences, focusing particularly on the solution of ordinary and partial differential equations. In addition to calling attention to certain special equations that arise frequently in the study of waves and diffusion, we develop general techniques such as looking for series solutions and, in the case of nonlinear equations, using phase portraits and linearizing around fixed points. We study some simple numerical techniques for solving differential equations. A series of optional sessions in Mathematica will be offered for students who are not already familiar with this computational tool.

Class Format: lecture, three hours per week
Requirements/Evaluation: evaluation will be based on weekly problem sets and several in-class exams, all of which have a substantial quantitative component
Prerequisites: MATH 150 or 151 and familiarity with Newtonian mechanics at the level of PHYS 131

Enrollment Limit: 50
Expected Class Size: 30

Fall 2016
LEC Section: 01 MWF 09:00 AM - 09:50 AM Instructor: Allison Pacelli

Division 3
Quantitative/Formal Reasoning

Spring 2017
LEC Section: 01 TR 09:00 AM - 10:15 AM Instructor: Pamela Harris

MATH 250(F,S) Linear Algebra (Q)
Many social, political, economic, biological, and physical phenomena can be described, at least approximately, by linear relations. In the study of systems of linear equations one may ask: When does a solution exist? When is it unique? How does one find it? How can one interpret it geometrically? This course develops the theoretical structure underlying answers to these and other questions and includes the study of matrices, vector spaces, linear independence and bases, linear transformations, determinants and inner products. Course work is balanced between theoretical and computational, with attention to improving mathematical style and sophistication.

Class Format: lecture
Requirements/Evaluation: evaluation will be based primarily on homework and exams
Prerequisites: MATH 150/151 or MATH 200

Enrollment Limit: 45
Expected Class Size: 35

Distributional Requirements: Division 3
Quantitative/Formal Reasoning

MATH 285T Mathematics Education (Q)
This course will be a study of mathematics education, from the practical aspects of teaching to numerous ideas in current research. This is an exciting time in mathematics education. The new common core state standards have become a level of interest and debate not often seen in the field. In this course, we will look at a wide range of issues in math education, from content knowledge to the role of creativity in a math class to philosophies of teaching. In addition to weekly tutorial meetings that focus on some of the key questions in math education, we will also meet weekly as a group to discuss the mechanics of teaching. Each student will also be responsible for teaching bi-weekly extra sessions for MATH 200 at which they will make presentations, as well as...
field questions, and offer guidance on homework questions. Students will also attend the MATH 200 lecture, and do some grading for the course.

**Class Format:** tutorial/teaching

**Requirements/Evaluation:** evaluation will be based primarily on written work, oral presentations, teaching performance, and a final project

**Prerequisites:** MATH 250 and MATH 200 or permission of instructor

**Enrollment Preferences:** those with an interest in teaching, and if over-enrolled, admission will be based on answers to a questionnaire

**Enrollment Limit:** 6

**Expected Class Size:** 6

**Distributional Requirements:**

- Quantitative/Formal Reasoning

**Other Attributes:**

- TEAC Related Courses

---

**Not Offered Academic Year 2017**

**TUT**  Instructor: Allison Pacelli

MATH 293T(F) Undergraduate Research Topics in Representation Theory (Q)

Central to the study of the representation theory of Lie algebras is the computation of weight multiplicities by using Kostant’s weight multiplicity formula. This formula is an alternating sum over a finite group, and involves a partition function. In this tutorial, we will address questions regarding the number of terms contributing nontrivially to the sum and develop closed formulas for the value of the partition function. Techniques used include generating functions and counting arguments, which are at the heart of combinatorics and are accessible to undergraduate students.

**Class Format:** tutorial

**Requirements/Evaluation:** written assignments, oral presentations

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**Prerequisites:** permission of instructor

**Enrollment Preferences:** programming experience, students with interests in the intersection of combinatorics and abstract algebra

**Enrollment Limit:** 10

**Expected Class Size:** 10

**Distributional Requirements:**

- Quantitative/Formal Reasoning

**Fall 2016**

**TUT Section:** T1  Instructor: Pamela Harris

MATH 300 Measuring Truth

Crosslistings: MATH 300/HSCI 300/REL 301/SOC 300

We will examine specific case studies of measuring truth—the emergence of science and technology in American colleges and universities; the prevalence of scientific methods in social science and humanities; the ways alternative methodologies in the humanities critique and historicize scientific approaches to reaching truth; and the possible tension between scientific modes of thinking and the aims of the liberal arts.

**Class Format:** seminar

**Requirements/Evaluation:** five 2-page papers and a final 15-page paper

**Extra Info:** may not be taken on a pass/fail basis

**Prerequisites:** any 200-level course

**Enrollment Preferences:** at the discretion of the instructors

**Enrollment Limit:** 20

**Expected Class Size:** 20

**Distribution Notes:** meets Division 3 requirement if registration under MATH; meets division 2 if registration under AFR, HSCIREL or SOC

**Distributional Requirements:**

- Quantitative/Formal Reasoning

---

**Not Offered Academic Year 2017**

**Spring 2017**

**LEC Section:** 01  MWF 11:00 AM 11:50 AM  Instructor: Alejandro Sarria

MATH 311(F) Chaos and Dynamical Systems (Q)

Dynamical systems model the motion over time of objects from populations to pendulums. Often they are governed by ordinary differential equations and arise in physics, engineering, biology, and other areas. We will study one and two dimensional flows, fixed points and stability, bifurcations, oscillators, linear systems, linearization, and chaos in one dimensional dynamics.

**Class Format:** lecture

**Requirements/Evaluation:** evaluation will be based primarily on performance on homework, projects, and examinations

**Prerequisites:** MATH 209, 210, or 250

**Enrollment Limit:** 50

**Expected Class Size:** 25

**Distributional Requirements:**

- Quantitative/Formal Reasoning

---

**Spring 2017**

**LEC Section:** 01  MWF 09:00 AM 09:50 AM  Instructor: Alejandro Sarria

MATH 313(S) Introduction to Number Theory (Q)

The study of numbers dates back thousands of years, and is fundamental in mathematics. In this course, we will investigate both classical and modern questions about numbers. In particular, we will explore the integers, and examine issues involving primes, divisibility, and congruences. We will also look at the ideas of number and prime in more general settings, and consider fascinating questions that are simple to understand, but can be quite difficult to answer.

**Class Format:** lecture

**Requirements/Evaluation:** evaluation will be based primarily on performance on homework, projects, and examinations

**Prerequisites:** MATH 250 or permission of instructor

**Enrollment Limit:** 50

**Expected Class Size:** 25

**Distributional Requirements:**

- Quantitative/Formal Reasoning

---

**Spring 2017**

**LEC Section:** 01  MWF 10:00 AM 10:50 AM  Instructor: Steven Miller

MATH 316(S) Protecting Information: Applications of Abstract Algebra and Quantum Physics (Q)

Crosslistings: MATH 316/PHYS 316

Living in the information age, we find ourselves depending more and more on codes that protect messages against either noise or eavesdropping. This course examines some of the most important codes currently being used to protect information, including linear codes, which in addition to being mathematically elegant are the most practical codes for error correction, and the RSA public key cryptographic scheme, popular nowadays for internet applications. We also study the standard AES system as well as an increasingly popular cryptographic strategy based on elliptic curves. Looking ahead by a decade or more, we show how a quantum computer could crack the RSA scheme in short order, and how quantum cryptographic devices will achieve security through the inherent unpredictability of quantum events.

**Class Format:** lecture

**Requirements/Evaluation:** evaluation will be based on homework sets and exams

**Prerequisites:** PHYS/MATH 210 or MATH 250 (possibly concurrent) or permission of instructors;

**Enrollment Preferences:** discretion of the instructors

**Enrollment Limit:** 50

**Expected Class Size:** 35

**Dept. Notes:** students not satisfying the course prerequisites but who have completed MATH 200 or MATH 209 are particularly encouraged to ask to be admitted

**Distributional Requirements:**

- Quantitative/Formal Reasoning

---

**Spring 2017**

**LEC Section:** 01  MWF 09:00 AM 09:50 AM  Instructors: Susan Loepp, William Wootters

MATH 318T(F) Numerical Problem Solving (Q)

In the last twenty years computers have profoundly changed the work in numerical mathematics (in areas from linear algebra and calculus to differential equations and probability). The main goal of this tutorial is to learn how to use computers to do quantitative science. We will explore concepts and ideas in mathematics and science using numerical methods and computer programming. We will use specialized software, including Mathematica and Matlab.

**Class Format:** tutorial

**Requirements/Evaluation:** evaluation will be based on homework, classwork, and exams

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**Prerequisites:** MATH 150/151 and MATH 250 or permission of instructor

**Enrollment Limit:** 10

**Expected Class Size:** 10

**Distributional Requirements:**

- Quantitative/Formal Reasoning
**MATH 319(F) Integrative Bioinformatics, Genomics, and Proteomics Lab (Q)**

Crosslistings: BIOL 319/MATH 319/CHM 319/PHYS 319/CSCI 319

What can computational biology teach us about cancer? In this capstone experience for the Genomics, Proteomics, and Bioinformatics program, computational analysis and wet-lab investigations will inform each other, as students majoring in biology, chemistry, computer science, mathematics/statistics, and physics contribute their own expertise to explore how ever-evolving gene and protein data-sets can provide key insights into human disease. In this course, we will take advantage of one well-studied system, the highly conserved Ras-related family of proteins, which play a central role in numerous fundamental processes within the cell. The course will integrate bioinformatics and molecular biology, using database searching, alignments and pattern matching, phylogenetics, and recombinant DNA techniques to reconstruct the evolution of gene families by focusing on the gene duplication events and gene rearrangements that have occurred over the course of eukaryotic speciation. By utilizing high throughput-pull approaches to investigate genes involved in the MAPK signal transduction pathway in human colon cancer cell lines, students will uncover regulatory mechanisms that are aberrantly altered by siRNA knockdown of putative regulatory components. This functional genomic strategy will be coupled with independent projects using phosphorylation-state specific antisera to test our hypotheses. Proteomic analysis will introduce the students to de novo structural prediction and threading algorithms, as well as data-mining approaches and Bayesian modeling of protein network dynamics in single cells. Flow cytometry and mass spectrometry will be used to study networks of interacting proteins in colon tumor cells.

**Class Format:** Two afternoons of lab, with one hour of lecture, per week

**Requirements/Evaluation:** Lab participation, several short homework assignments, one lab report, a programming project, and a grant proposal

**Prerequisites:** BIOL 202; students who have not taken BIOL 202 but have taken BIOL 101 and CSCI 315 or PHY 315, may enroll with permission of instructor. No prior computer programming experience is required.

**Enrollment Preferences:** Seniors, then juniors, then sophomores

**Enrollment Limit:** 12

**Expected Class Size:** 12

**Dept. Notes:** Does not satisfy the distribution requirement in the Biology major

**Distributional Requirements:**
- Division 3
- Quantitative/Formal Reasoning

**Other Attributes:**
- BGNP Core Courses
- BIMO Interdepartmental Electives

---

**MATH 321 Knot Theory (Q)**

Take a piece of string, tie a knot in it, and glue the ends together. The result is a knotted circle, known as a knot. For the last 100 years, mathematicians have studied knots, asking such questions as, “Given a tangled knot, how do you untangle it?”. Some of the most interesting advances in knot theory have occurred in the last 10 years. This course is an introduction to the theory of knots. Among other topics, we will cover methods of knot presentation, surfaces associated to knots, polynomial invariants associated to knots, and relationships between knot theory and chemistry and physics. In addition to learning the theory, we will look at open problems in the field.

**Class Format:** Lecture

**Requirements/Evaluation:** Evaluation will be based on homework, midterm, and final exam

**Prerequisites:** MATH 250 or permission of instructor

**Enrollment Limit:** 30

**Expected Class Size:** 25

**Distributional Requirements:**
- Division 3
- Quantitative/Formal Reasoning

**Not Offered Academic Year 2017**

**LEC Instructor:** Colin Adams

---

**MATH 322 Introduction to Complex Analysis (Q)**

The complex numbers are amazingly useful in mathematics, physics, engineering, and elsewhere. We'll learn the meaning of complex multiplication and exponentiation, and Euler's famous \( e^{i \pi} = -1 \). We'll study complex functions and their power series, learn how to integrate in the complex plane, including residue calculus, and how to map one domain to another (conformal mapping). We'll see the easiest proof of the Fundamental Theorem of Algebra, which says that every algebraic equation has a solution as long as you allow complex numbers.

**Class Format:** Tutorial

**Requirements/Evaluation:** Evaluation will be based primarily on homework, classwork, and exams

**Extra Info:** May not be taken on a pass/fail basis

**Prerequisites:** MATH 150

**Enrollment Limit:** 10

**Expected Class Size:** 10

**Distributional Requirements:**
- Division 3
- Quantitative/Formal Reasoning

**Not Offered Academic Year 2017**

**LEC Instructor:** Thomas Garrity

---

**MATH 325 Applied Topology (Q)**

In topology, one studies properties of an object that are preserved under rubber-like deformations, where one is allowed to twist and pull, but one cannot tear or glue. Hence a sphere is considered the same as a cube, but distinct from the surface of a doughnut. In recent years, topology has found applications in chemistry (knotted DNA molecules), economics (stability theory), Geographic Information Systems, cosmology (the shape of the Universe), medicine (heart failure), robotics and electric circuit design, just to name some of the fields that have been impacted. In this course, we will learn the basics of topology, including point-set topology, geometric topology and algebraic topology, but all with the purpose of applying the theory to a broad array of fields.

**Class Format:** Lecture

**Requirements/Evaluation:** Evaluation will be based primarily on problem sets and exams

**Prerequisites:** MATH 250 or permission of instructor

**Enrollment Preferences:** None

**Enrollment Limit:** 40

**Expected Class Size:** 25

**Distributional Requirements:**
- Division 3
- Quantitative/Formal Reasoning

**Not Offered Academic Year 2017**

**LEC Instructor:** Lois Banta

---

**MATH 326 Differential Geometry (Q)**

Differential Geometry is the study of curvature. In turn, curvature is the heart of geometry. The goal of this course is to start the study of curvature, concentrating on the curvature of curves and of surfaces, leading to the deep Gauss-Bonnet Theorem, which links curvature with topology.

**Class Format:** Lecture

**Requirements/Evaluation:** Evaluation will be based primarily on homework and exams

**Prerequisites:** MATH 150 or MATH 151, and MATH 250

**Enrollment Limit:** None

**Expected Class Size:** 15

**Distributional Requirements:**
- Division 3
- Quantitative/Formal Reasoning

**Not Offered Academic Year 2017**

**LEC Instructor:** Lois Banta

---

**MATH 327 Computational Geometry (Q)**

The subject of computational geometry started just 25 years ago, and this course is designed to introduce its fundamental ideas. Our goal is to explore "visualization" and "shape" in real world problems. We focus on both theoreic ideas (such as visibility, Voronoi diagrams, triangulations, motion) as well as applications (such as cartography, origami, robotics, surface meshing, rigidity). This is a beautiful subject with a tremendous amount of active research and numerous unsolved problems, relating powerful ideas from mathematics and computer science.

**Class Format:** Lecture

**Requirements/Evaluation:** Evaluation will be based primarily on problem sets and exams

**Extra Info:** May not be taken on a pass/fail basis

**Prerequisites:** MATH 200 or MATH 250 or CSCI 256

**Enrollment Preferences:** Preference given to upperclassmen

**Enrollment Limit:** None

**Expected Class Size:** 25

**Distributional Requirements:**
- Division 3
- Quantitative/Formal Reasoning

**Not Offered Academic Year 2017**

**LEC Instructor:** Thomas Garrity
Using math competitions such as the Putnam Exam as a springboard, in this class we follow the dictum of the Ross Program and "think deeply of simple things". The two main goals of this course are to prepare students for competitive math competitions, and to get a sense of the mathematical landscape encompassing elementary number theory, combinatorics, graph theory, and group theory (among others). While elementary frequently is not synonymous with easy, we will see many beautiful proofs and "a-ha" moments in the course of our investigations. Students will be encouraged to explore these topics at levels compatible with their backgrounds.

**Class Format:** lecture  
**Requirements/Evaluation:** evaluation will be based primarily on homework, classwork, and exams  
**Prerequisites:** MATH 250 or permission of instructor  
**Enrollment Preferences:** members or alternates of the Putnam team, Mathematics, Physics or Computer Science majors  
**Expected Class Size:** 25  
**Department Notes:** http://web.williams.edu/Mathematics/sjmiller/public_html/331/  
**Distributional Requirements:** Division 3  
**Quantitative/Formal Reasoning**

### Spring 2017  
**LEC Section:** 01  MWF 09:00 AM-09:50 AM  Instructor: Steven Miller  
**MATH 333 Investment Mathematics (Q)**  
Over the years financial instruments have grown from stocks and bonds to numerous derivatives, such as options to buy and sell at future dates under certain conditions. The 1997 Nobel Prize in Economics was awarded to Robert Merton and Myron Scholes for their Black-Scholes model of the value of financial instruments. This course will study deterministic and random models, futures, options, the Black-Scholes Equation, and additional topics.  
**Class Format:** lecture/discussion  
**Requirements/Evaluation:** evaluation will be based on homework, classwork, and exams  
**Prerequisites:** MATH 250 or permission of instructor  
**Enrollment Limit:** 25  
**Expected Class Size:** 25  
**Distributional Requirements:** Division 3  
**Quantitative/Formal Reasoning**

### Fall 2016  
**LEC Section:** 01  MWF 10:00 AM-10:50 AM  Instructor: Steven Miller  
**MATH 347T Origami (Q)**  
Origami is the art and study of folding and unfolding. Although ancient in origin, there has been a tremendous resurgence of interest recently, resulting in stunning sculptures and marvelously intricate pop-up books. The applications of origami have grown as well, from NASA's James Webb space telescope to cutting-edge protein folding models. This is a beautiful subject with a tremendous amount of active research, relating powerful ideas from studio art, computer science, and mathematics. This tutorial is designed to introduce the foundations of origami design from a mathematical viewpoint: 1D linkages, 2D crease patterns and cut-theorems, 3D unfolding polyhedra. No experience in paper folding is necessary.  
**Class Format:** tutorial  
**Requirements/Evaluation:** primarily based on participation, presentations, and projects  
**Extra Info:** may not be taken on a pass/fail basis  
**Prerequisites:** MATH 200 or MATH 250 or permission of instructor  
**Enrollment Preferences:** at the discretion of the instructor  
**Enrollment Limit:** 10  
**Expected Class Size:** 10  
**Distributional Requirements:** Division 3  
**Quantitative/Formal Reasoning**

### Not Offered Academic Year 2017  
**TUT Instructor:** Satyan Devadoss  
**MATH 350(F,S) Real Analysis (Q)**  
Real analysis is the theory behind calculus. It is based on a precise understanding of the real numbers, elementary topology, and limits. Topologically, nice sets are either closed (contain their limit points) or open (complement closed). You also need limits to define continuity, derivatives, integrals, and to understand sequences of functions.  
**Class Format:** lecture/discussion  
**Requirements/Evaluation:** evaluation will be based on homework, classwork, and exams  
**Prerequisites:** MATH 150 or MATH 151 and MATH 250, or permission of instructor  
**Enrollment Limit:** 40  
**Expected Class Size:** 30  
**Distributional Requirements:** Division 3  
**Quantitative/Formal Reasoning**

### Fall 2016  
**LEC Section:** 01  MWF 11:00 AM-11:50 AM  Instructor: Cesar Silva  
**MATH 351(F) Probability (Q)**  
While probability began with a study of games, it has grown to become a discipline with numerous applications throughout mathematics and the sciences. Drawing on gaming examples for motivation, this course will present axiomatic and mathematical aspects of probability. Included will be discussions of random variables, expectation, independence, laws of large numbers, and the Central Limit Theorem. Many interesting and important applications will also be presented, potentially including some from coding theory, number theory and nuclear physics.  
**Class Format:** lecture  
**Requirements/Evaluation:** evaluation will be based primarily on homework, classwork, and exams  
**Prerequisites:** MATH 250 or MATH 200 or permission of instructor  
**Enrollment Limit:** 40  
**Expected Class Size:** 20  
**Department Notes:** http://web.williams.edu/Mathematics/sjmiller/public_html/341/  
**Distributional Requirements:** Division 3  
**Quantitative/Formal Reasoning**

### Spring 2017  
**LEC Section:** 01  MWF 09:00 AM-09:50 AM  Instructor: Steven Miller  
**MATH 334 Graph Theory (Q)**  
Graph theory is the study of interacting decision makers involved in a conflict of interest. We investigate outcomes, dynamics, and strategies as players pursue objectives and behave accordingly. Game theory can be used to illustrate political, ethical, economical, social, psychological, and evolutionary phenomenon. We will examine concepts of equilibrium, stable strategies, imperfect information, repetition, cooperation, utility, and decision.  
**Class Format:** lecture  
**Requirements/Evaluation:** evaluation will be based primarily on problem sets and exams  
**Prerequisites:** MATH 250 or permission of instructor  
**Enrollment Limit:** 35  
**Expected Class Size:** 20  
**Distributional Requirements:** Division 3  
**Quantitative/Formal Reasoning**

### Not Offered Academic Year 2017  
**TUT:** Stewart Johnson  
**MATH 335 Game Theory (Q)**  
Game theory is the study of interacting decision makers involved in a conflict of interest. We investigate outcomes, dynamics, and strategies as players pursue objectives and behave accordingly. Game theory can be used to illustrate political, ethical, economical, social, psychological, and evolutionary phenomenon. We will examine concepts of equilibrium, stable strategies, imperfect information, repetition, cooperation, utility, and decision.  
**Class Format:** lecture

LEC   Instructor: Haydee Lindo

Requirements/Evaluation: evaluation will be based primarily on exams, homework and quizzes.
Prerequisites: MATH 150 and MATH 250, or permission of instructor
Enrollment Limit: 50
Expected Class Size: 20
Distributional Requirements: Division 3
Quantitative/Formal Reasoning

Fall 2016
LEC Section: 01   MWF 09:00 AM 09:50 AM   Instructor: Diana Davis

MATH 355(F.S) Abstract Algebra (Q)
Algebra gives us tools to solve equations. The integers, the rationals, and the real numbers have special properties which make algebra work according to the circumstances. In this course, we generalize algebraic processes and the sets upon which they operate in order to better understand, theoretically, when equations can and cannot be solved. We define and study abstract algebraic structures such as groups, rings, and fields, as well as the concepts of factor group, quotient ring, homomorphism, isomorphism, and various types of field extensions. This course introduces students to abstract rigorous mathematics.

Class Format: lecture
Requirements/Evaluation: evaluation will be based primarily on problem sets and exams
Prerequisites: MATH 250 or permission of instructor
Enrollment Limit: 50
Expected Class Size: 30
Distributional Requirements: Division 3
Quantitative/Formal Reasoning

Fall 2016

LEC Section: 02   MWF 12:00 PM 12:50 PM   Instructor: Allison Pacelli

MATH 361(F) Theory of Computation (Q)
This course introduces a formal framework for investigating both the computability and complexity of problems. We study several models of computation including finite automata, regular languages, context-free grammars, and Turing machines. These models provide a mathematical basis for the study of computability theory—the examination of what problems can be solved and what problems cannot be solved—and the study of complexity theory—the examination of how efficiently problems can be solved. Topics include the halting problem and the P versus NP problem.

Class Format: lecture
Requirements/Evaluation: evaluation will be based on problem sets, a midterm examination, and a final examination
Prerequisites: CSCJ 361 or MATH 361
Enrollment Preferences: current or expected Computer Science majors
Enrollment Limit: 40
Expected Class Size: 40
Distributional Requirements: Division 3
Quantitative/Formal Reasoning
Other Attributes: COGS Interdepartmental Electives

Fall 2016
LEC Section: 01   MWF 12:00 PM 12:50 PM   Instructor: Thomas Murtagh

MATH 367 Homological Algebra (Q)
Though a relatively young subfield of mathematics, Homological Algebra has earned its place by supplying powerful tools to solve questions in the much older fields of Commutative Algebra, Algebraic Geometry and Representation Theory. This class will introduce theorems and tools of Homological Algebra, grounding its results in applications to polynomial rings and their quotients. We will focus on some early groundbreaking results and learn some of Homological Algebra's most-used constructions. Possible topics include tensor products, chain complexes, homology, Ext, Tor and Hilbert's Syzygy Theorem.

Class Format: lecture
Requirements/Evaluation: evaluation will be based primarily on homework and exams
Extra Info: may not be taken on a pass/fail basis
Prerequisites: MATH 355 or MATH 351; not open to students who have taken MATH 323
Enrollment Limit: 10
Expected Class Size: 10
Distributional Requirements: Division 3
Quantitative/Formal Reasoning

Fall 2016
LEC Section: 01   TR 08:30 AM 09:45 AM   Instructor: Alejandro Sarria

MATH 372(S) Complex Analysis (Q)
The calculus of complex-valued functions turns out to have unexpected simplicity and power. As an example of simplicity, every complex-differentiable function is automatically infinitely differentiable. As examples of power, the so-called "residue calculus" permits the computation of "impossible" integrals, and "conformal mapping" reduces physical problems on very general domains to problems on the round disc. The easiest proof of the Fundamental Theorem of Algebra, not to mention the first proof of the Prime Number Theorem, used complex analysis. We will discuss these and other topics as time permits (such as the Riemann Mapping Theorem, Special Functions, and the Central Limit Theorem).

Class Format: lecture
Requirements/Evaluation: evaluation will be based primarily on homework, classwork, and exams
Prerequisites: MATH 350 or MATH 351
Enrollment Limit: 40
Expected Class Size: 30
Distributional Requirements: Division 3
Quantitative/Formal Reasoning

Spring 2017
LEC Section: 01   TR 08:30 AM 09:45 AM   Instructor: Alejandro Sarria

MATH 374(T) Topology (Q)
Topology is the study of when one geometric object can be continuously deformed and twisted into another object. Determining when two objects are topologically the same is incredibly difficult and is still the subject of a tremendous amount of research, including recent work on the Poincaré Conjecture, one of the million-dollar millennium-prize problems. The main part of the course is on point-set topology establishes a framework based on "open sets" for studying continuity and compactness in very general spaces. The second part on homotopy theory develops refined methods for determining when objects are the same. We will prove for example that you cannot twist a basketball into a doughnut.

Class Format: tutorial
Requirements/Evaluation: homework, tutorials, and exams
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: MATH 350 or 351; not open to students who have taken MATH 323

Quantitative/Formal Reasoning

Fall 2016
TUT Section: T1   TBA   Instructor: Cesar Silva

MATH 377(F) Operations Research (Q) (W)
Crosslistings: MATH 377/STAT 377
In the first N math classes of your career, you can be misled as to what the world is truly like. How? You've given exact problems and told to find exact solutions. The real world is sadly far more complicated. Frequently we cannot exactly solve problems; moreover, the problems we try to solve are themselves merely approximations to the world! We are forced to develop techniques to approximate not just solutions, but even the statement of the problem. Additionally, we often need the solutions quickly. Operations Research, which was born as a discipline during the tumultuous events of World War II, deals with efficiently finding optimal solutions. In this course we build analytical and programming techniques to efficiently tackle such problems. We will review many algorithms from earlier in your mathematical or CS career, with special attention now given to analyzing their run-time and seeing how they can be improved; students will be implementing many of these algorithms on computer systems of their choice. The culmination of the course is a development of linear programming and an exploration of what it can do and what are its limitations. For those wishing to take this as a Stats
course, the final project must have a substantial implementation computation (respectively, statistics) component approved by the instructor.

**Class Format:** lecture

**Requirements/Evaluation:** evaluation will be based primarily on homework, classwork, projects, presentations and exams; at least 20 pages of writing

**Prerequisites:** MATH 350 or 351 and permission of instructor

**Enrollment Preferences:** Computer Science, Mathematics and Statistics majors.

**Enrollment Limit:** 40

**Distributional Requirements:** Division 3

**Quantitative/Formal Reasoning**

**Writing Intensive**

**Fall 2016**

**LEC Section:** 01 MWF 09:00 AM 09:50 AM Instructor: Steven Miller

**MATH 378(S) Computational Algebraic Geometry (Q)**

Algebraic Geometry has been at the heart of mathematics for at least two hundred years. While starting with a humble study of circles, it has influenced a tremendous amount of modern mathematics, ranging from number theory to robotics. Algebraic Geometry uses tools from almost all areas of mathematics to study shapes defined by polynomials; in this course, we will build up both theoretical and computational machinery to help in this endeavor. We will study Bezout’s Theorem for plane curves, and the geometry of more general affine and projective varieties.

**Class Format:** lecture

**Requirements/Evaluation:** evaluation will be based on homework, exams, and final project

**Extra Info:** may not be taken on a pass/fail basis

**Spring 2017**

**LEC Section:** 01 TR 09:55 AM 11:10 AM Instructor: Ralph Morrison

**MATH 379(F) Asymptotic Analysis in Differential Equations**

Asymptotic Analysis is a fascinating subfield of differential equations in which interesting and unexpected phenomena can occur. Roughly speaking, the problem is this: Given a differential equation depending on a parameter epsilon, what happens to the solutions to the equation as we let epsilon go to 0? After an extensive survey of examples, we will cover asymptotic evaluation of integrals, such as stationary phase and Laplace’s method, multiple scales, WKBJ approximations, averaging methods, matched asymptotic expansions, and boundary layers. If time permits, we will also discuss bifurcation theory and the Nash-Moser Inverse Function Theorem.

**Class Format:** lecture

**Requirements/Evaluation:** evaluation will be based primarily on homework and exams

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**Prerequisites:** MATH 350 or MATH 351

**Enrollment Limit:** 25

**Expected Class Size:** 15

**Distributional Requirements:** Division 3

**Quantitative/Formal Reasoning**

**Fall 2016**

**LEC Section:** 01 MWF 10:00 AM 10:50 AM Instructor: Peyam Tabrizian

**MATH 382 Harmonic Analysis (Q)**

Harmonic Analysis is a diverse field which includes Fourier Analysis, one of the major tools of modern mathematics. Applications range from mathematical topics such as partial differential equations and number theory to more applied ones such as signal processing and medical imaging. The course will begin with an introduction to the Fourier Transform and will cover a wide variety of topics including singular integral operators, maximal operators and wavelets as the semester progresses. Along the way applications from partial differential equations and ergodic theory will arise with a highlight being the almost everywhere convergence of Fourier series.

**Class Format:** lecture

**Requirements/Evaluation:** evaluation will be based primarily on homework, quizzes and a project

**Prerequisites:** MATH 350 or MATH 351 or permission of the instructor

**Enrollment Preferences:** lottery

**Enrollment Limit:** 30

**Expected Class Size:** 15

**Distributional Requirements:** Division 3

**Quantitative/Formal Reasoning**

**Not Offered Academic Year 2017**

**LEC Instructor:** Eyvindur Palsson

**MATH 389 Advanced Analysis (Q)**

This course further develops and explores topics and concepts from real analysis, with special emphasis on introducing students to subject matter and techniques that are useful for graduate study in mathematics or an allied field. Material will be drawn, based on student interest, from many areas, including analytic number theory, Fourier series and harmonic analysis, generating functions, differential equations and special functions, integral operators, equidistribution theory and probability, random matrix theory and probabilistic methods. This will be an intense, fast paced class which will give a flavor for graduate school. In addition to standard homework problems, students will also write reviews for MathSciNet, referee papers for journals, write programs in SAGE or Mathematica to investigate and conjecture, and read classic and current research papers.

**Class Format:** lecture

**Requirements/Evaluation:** evaluation will be based primarily on homework, classwork, and exams

**Prerequisites:** MATH 350 or 351 and one additional 300-level MATH course, or permission of instructor

**Enrollment Preferences:** students interested in graduate school in mathematics or an allied discipline

**Enrollment Limit:** 30

**Expected Class Size:** 15

**Distributional Requirements:** Division 3

**Quantitative/Formal Reasoning**

**Not Offered Academic Year 2017**

**LEC Instructor:** Steven Miller

**MATH 394 Galois Theory (Q)**

Some equations — such as \(x^5 - 1 = 0\) — are easy to solve. Others — such as \(x^5 - x - 1 = 0\) — are very hard, if not impossible (using standard mathematical operations). Galois discovered a deep connection between field theory and group theory that led to a criterion for checking whether or not a given polynomial can be easily solved. His discovery also led to many other breakthroughs, for example proving the impossibility of squaring the circle or trisecting a typical angle using compass and straightedge. From these not-so-humble beginnings, Galois theory has become a fundamental tool in modern mathematics, from topology to number theory. In this course we will develop the theory and explore its applications to other areas of math.

**Class Format:** lecture

**Requirements/Evaluation:** evaluation will be based primarily on written homeworks, oral presentations, and exams

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**Prerequisites:** MATH 355

**Enrollment Preferences:** discretion of the instructor

**Enrollment Limit:** 15

**Expected Class Size:** 10

**Distributional Requirements:** Division 3

**Quantitative/Formal Reasoning**

**Not Offered Academic Year 2017**

**LEC Instructor:** Leo Goldmakher

**MATH 397(F) Independent Study: Mathematics**

Directed 300-level independent study in Mathematics.

**Class Format:** independent study

**Prerequisites:** permission of department

**Distributional Requirements:** Division 3

**Spring 2017**

**IND Section:** 01 Canceled

**MATH 398(S) Independent Study: Mathematics**

Directed 300-level independent study in Mathematics.

**Class Format:** independent study

**Prerequisites:** permission of department

**Distributional Requirements:** Division 3

**Spring 2017**

**IND Section:** 01 Canceled

**MATH 401 Functional Analysis (Q)**

Functional analysis can be viewed as linear algebra on infinite-dimensional spaces. It is a central topic in Mathematics, which brings together and extends ideas from analysis, algebra, and geometry. Functional analysis also provides the rigorous mathematical background for several areas of theoretical physics (especially quantum mechanics). We will introduce infinite-dimensional spaces (Banach and Hilbert spaces) and study their properties. These spaces are often spaces of functions (for example, the space of square-integrable functions). We will consider linear operators on Hilbert spaces and investigate their spectral properties. A special attention will be dedicated to various operators arising from mathematical physics, especially the Schrodinger operator.

**Class Format:** lecture

**Requirements/Evaluation:** weekly problem sets, two midterm exams, final exam

**Prerequisites:** MATH 350 or 351 or permission of instructor

**Enrollment Preferences:** Mathematics and Physics majors; seniors
MATH 402(S) Measure Theory and Probability (Q)
The study of measure theory arose from the study of stochastic (probabilistic) systems. Applications of measure theory lie in biology, chemistry, physics as well as in economics. In this course, we develop the abstract concepts of measure theory and ground them in probability spaces. Included will be Lebesgue and Borel measures, measurable functions, and Lebesgue integration, distributions, independence, convergence and limit theorems. This material provides good preparation for graduate studies in mathematics, statistics and economics.
Class Format: lecture/discussion
Requirements/Evaluation: evaluation will be based primarily on performance on homework assignments and exams
Prerequisites: MATH 350 or MATH 351 or permission of instructor
Enrollment Limit: 40
Expected Class Size: 30
Distributional Requirements:
Division 3
Quantitative/Formal Reasoning

MATH 403 Measure and Ergodic Theory (Q)
An introduction to measure theory and ergodic theory. Measure theory is a generalization of the notion of length and area, has been used in the study of stochastic (probabilistic) systems. The course covers the construction of Lebesgue and Borel measures, measurable functions, and Lebesgue integration. Ergodic theory studies the probabilistic behavior of dynamical systems as they evolve through time, and is based on measure theory. The course will cover basic notions, such as ergodic transformations, weak mixing, mixing, and Bernoulli transformations, and transformations admitting and not admitting an invariant measure. There will be an emphasis on specific examples such as group rotations, the binary odometer transformations, and rank-one constructions. The Ergodic Theorem will also be covered, and will be used to illustrate notions and theorems from measure theory.
Class Format: lecture
Requirements/Evaluation: homework and exams
Prerequisites: MATH 350 or MATH 351 or permission of instructor
Enrollment Preferences: Mathematics majors
Enrollment Limit: 25
Expected Class Size: 15-20
Dept. Notes: senior major course
Distributional Requirements:
Division 3
Quantitative/Formal Reasoning

MATH 406T Analysis and Number Theory (Q)
Crosslistings: MATH 369/MATH 406
Gauss said “Mathematics is the queen of the sciences and number theory the queen of mathematics”; in this class we shall meet some of her subjects. We will discuss many of the most important questions in analytic and additive number theory, with an emphasis on techniques and open problems. Topics will range from Goldbach's Problem and the Circle Method to the Riemann Zeta Function and Random Matrix Theory. Other topics will be chosen by student interest, coming from sum and difference sets, Poissonian behavior, Benford's law, the dynamics of the 3x+1 map as well as suggestions from the class. We will occasionally assume some advanced results for our investigations, though we will always try to supply heuristics and motivate the material. No number theory background is assumed, and we will discuss whatever material we need from probability, statistics or Fourier analysis. For more information, see http://www.math.brown.edu/~sjmiller/williams/406.
Class Format: tutorial
Requirements/Evaluation: evaluation will be based on scholarship, discussions, homework, examinations, papers and presentations
Extra Info: may not be taken on a pass/fail basis, not available for the fifth course option
Prerequisites: for those taking 406T: at least one of MATH 350, 351, 355; for those taking 406T: one of MATH 350 or 351 and MATH 355
Enrollment Limit: 10
Expected Class Size: 10
Distributional Requirements:
Division 3
Quantitative/Formal Reasoning

MATH 410T Mathematical Ecology (Q)
Crosslistings: MATH 410/BIOL 214
Using mathematics to study natural phenomena has become ubiquitous over the past couple of decades. In this tutorial, we will study mathematical models comprised of both deterministic and stochastic differential equations that are developed to understand ecological dynamics and, in many cases, evaluate the dynamical consequences of policy decisions. We will learn how to understand these models through both standard analytic techniques such as stability and bifurcation analysis as well as through simulation using computer programs such as MATLAB. Possible topics include fisheries management, disease ecology, control of invasive species, and predicting critical transitions in ecological systems.
Class Format: tutorial
Requirements/Evaluation: written and programming assignments, oral presentations, and exams
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: MATH 250 or permission of instructor; Math 209 preferred
Enrollment Preferences: programming experience, students with interests in the intersection of math and biology
Enrollment Limit: 10
Expected Class Size: 10
Dept. Notes: Does not satisfy the distribution requirement in the Biology major
Distributional Requirements:
Division 3
Quantitative/Formal Reasoning

MATH 411(S) Commutative Algebra (Q)
Commutative Algebra is an essential area of mathematics that provides indispensable tools to many areas, including Number Theory and Algebraic Geometry. This course will introduce you to the fundamental concepts for the study of commutative rings, with a special focus on the notion of “prime ideals,” and how they generalize the well-known notion of primality in the set of integers. Possible topics include Noetherian rings, primary decomposition, localizations and quotients, height, dimension, basic module theory, and the Krull Altitude Theorem.
Class Format: lecture
Requirements/Evaluation: evaluation will be based primarily on homework and exams
Prerequisites: MATH 355 or permission of instructor
Enrollment Limit: 30
Expected Class Size: 15
Distributional Requirements:
Division 3
Quantitative/Formal Reasoning

MATH 416 Advanced Applied Linear Algebra (Q)
In the first N math classes of your career, it’s possible to get an incomplete picture as to what the real world is truly like. How? You’re often given exact problems and told to find exact solutions. The real world is sadly far more complicated. Frequently we cannot exactly solve problems; moreover, the problems we try to solve are themselves merely approximations to the world. We’re forced to develop techniques to approximate not just solutions, but even the statement of the problem. In this course we discuss some powerful methods from advanced linear algebra and their applications to the real world, specifically linear programming (and, if time permits, random matrix theory). Linear programming is used to attack a variety of problems, from applied ones such as the traveling salesman problem, determining schedules for major league sports (or a movie theater, or an airline) to designing efficient diets to feed the world, to pure ones such as Hales’ proof of the Kepler conjecture.
Class Format: lecture
Requirements/Evaluation: evaluation will be based primarily on homework, possible presentations and write-ups, exams and scholarship
Prerequisites: MATH 250 and MATH 350 (programming experience is desirable, but not necessary)
Enrollment Limit: 40
Expected Class Size: 35
Distributional Requirements:
Division 3
Quantitative/Formal Reasoning

MATH 419 Algebraic Number Theory (Q)
We all know that integers can be factored into prime numbers and that this factorization is essentially unique. In more general settings, it often still makes sense to factor numbers into “primes,” but the factorization is no longer necessarily unique! This surprising fact was the downfall of Lamé’s attempted proof of Fermat’s Last Theorem in 1847. Although a valid proof was not discovered until over 150 years later, this error gave rise to a new branch of mathematics: algebraic number theory. In this course, we will study factorization and other number-theoretic notions in more abstract algebraic settings, and we will see a beautiful interplay between groups, rings, and fields.
Class Format: lecture/seminar
Requirements/Evaluation: evaluation will be based primarily on homework assignments and exams
Prerequisites: MATH 355, or permission of instructor
Enrollment Limit: 40
Expected Class Size: 20
Distributional Requirements: Division 3
Quantitative/Formal Reasoning

Not Offered Academic Year 2017

LEC  Instructor: Allison Pacelli

MATH 420T Analytic Number Theory (Q)
How many primes are smaller than x? How many divisors does an integer n have? How many different numbers appear in the N x N multiplication table? Over the course of the past 150 years, tremendous progress has been made towards resolving these and similar questions in number theory, relying on tools and methods from analysis. The goal of this course is to explain and motivate the ubiquitous appearance of analysis in modern number theory—a surprising fact, given that analysis is concerned with continuous functions, while number theory is concerned with discrete objects (integers, primes, divisors, etc.). Topics to be covered include: asymptotic analysis, partial and Euler-Maclaurin summation, counting divisors and Dirichlet's hyperbola method, the randomness of prime factorization and the Erdos-Kac theorem, the partition function and the saddle point method, the prime number theorem and the Riemann zeta function, primes in arithmetic progressions and Dirichlet L-functions, the Goldbach conjecture and the circle method, gaps between primes, and other topics as time and interest allow.

Class Format: tutorial
Requirements/Evaluation: tutorial format (problem sets and presentations)
Extra Info: may not be taken on a pass/fail basis, not available for the fifth course option
Prerequisites: MATH 350 or MATH 351, MATH 372 (may be taken concurrently), familiarity with modular arithmetic
Enrollment Preferences: Mathematics majors
Enrollment Limit: 10
Expected Class Size: 10
Distributional Requirements: Division 3
Quantitative/Formal Reasoning

Not Offered Academic Year 2017

TUT  Instructor: Leo Goldmakher

MATH 424(F) Geometry, Surfaces and Billiards
Mathematical billiards is the study of a ball bouncing around in a table—a rectangle in the popular pub game, but any shape of table for us, including triangles and ellipses. The geometry of billiards is elegant, and is related to surfaces, fractals, and even continued fractions. We will study many types of billiards and surfaces, and take time to explore some beautiful examples and ideas.

Class Format: lecture
Requirements/Evaluation: based on work in class, problem sets, an exam and a project
Extra Info: not available for the fifth course option
Prerequisites: MATH 350/351 and MATH 355
Enrollment Limit: 25
Expected Class Size: 15
Distributional Requirements: Division 3

Fall 2016
LEC Section: 01  MWF 11:00 AM 11:50 AM  Instructor: Diana Davis

MATH 427 Tiling Theory (Q)
Since humankind first utilized stones and bricks to tile the floors of their abodes, tiling has been an area of interest. Practitioners include artists, engineers, designers, architects, crystallographers, scientists and mathematicians. This course will be an investigation into the mathematical theory of tiling. The course will focus on tilings of the plane, including topics such as the symmetry groups of tilings, the topology of tilings, the ergodic theory of tilings, the classification of tilings and the aperiodic Penrose tilings. We will also look at tilings in higher dimensions, including “knotted tilings”.

Class Format: lecture
Requirements/Evaluation: problem assignments, exams and a presentation/paper
Extra Info: may not be taken on a pass/fail basis
Prerequisites: MATH 250 and MATH 355
Enrollment Preferences: seniors, because it is a 400-level course required for graduation
Enrollment Limit: 30
Expected Class Size: 20
Distributional Requirements: Division 3
Quantitative/Formal Reasoning

Not Offered Academic Year 2017

LEC  Instructor: Colin Adams

MATH 431(F) Nonlinear Waves, Solitons (Q)
Waves arise in scientific and engineering disciplines such as acoustics, optics, fluid/solid mechanics, electromagnetism and quantum mechanics. Although linear waves are well understood, the study of nonlinear wave phenomena remains an active field of research and a source of inspiration and challenge for several areas of mathematics. We discuss traveling waves, shallow water models, wave steepening, solitons and blowup. Additional topics may include shocks, weak solutions and conservation laws.

Class Format: lecture
Requirements/Evaluation: problem sets, exams, and final project
Prerequisites: MATH 209/210 and MATH 350/351, or permission of the instructor
Enrollment Limit: 40
Expected Class Size: 15
Distributional Requirements: Division 3
Quantitative/Formal Reasoning

Not Offered Academic Year 2017

LEC  Instructor: Julie Blackwood

MATH 433 Mathematical Modeling (Q)
Mathematical modeling is concerned with translating a natural phenomenon into a mathematical form. In this abstract form the underlying principles of the phenomenon can be carefully examined and real-world behavior can be interpreted in terms of mathematical shapes. The models we investigate include feedback phenomena, phase locked oscillators, multiple population dynamics, reaction-diffusion equations, shock waves, and the spread of pollution, forest fires, and diseases. We will employ tools from the fields of differential equations and dynamical systems. The course is intended for students in the mathematical, physical, and chemical sciences, as well as for students who are seriously interested in the mathematical aspects of physiology, economics, geology, biology, and environmental studies.

Class Format: lecture
Requirements/Evaluation: evaluation will be based primarily on performance of problem sets and exams
Prerequisites: MATH 209/PHYS 210 and MATH 350 or 351, or permission of the instructor
Enrollment Preferences: senior Mathematics majors
Enrollment Limit: 50
Expected Class Size: 30
Distributional Requirements: Division 3
Quantitative/Formal Reasoning

Other Attributes: COGS Related Courses

Not Offered Academic Year 2017

LEC  Instructor: Alejandro Sarria

MATH 434 Applied Dynamics and Optimal Control (Q)
We seek to understand how dynamical systems evolve, how that evolution depends on the various parameters of the system, and how we might manipulate those parameters to optimize an outcome. We will explore the language of dynamics by deepening our understanding of differential and difference equations, study parameter dependence and bifurcations, and explore optimal control through Pontryagin's maximum principle and Hamilton-Jacobi-Bellman equations. These tools have broad application in ecology, economics, finance, and engineering, and we will draw on basic models from these fields to motivate our study.

Class Format: lecture
Requirements/Evaluation: evaluation will be based primarily on exams and homework assignments
Prerequisites: MATH 209 or PHYS 210, and MATH 350 or 351, or permission of the instructor
Enrollment Limit: 40
Expected Class Size: 25
Distributional Requirements: Division 3
Quantitative/Formal Reasoning

Not Offered Academic Year 2017

LEC  Instructor: Julie Blackwood

MATH 437 Electricity and Magnetism for Mathematicians (Q)
Maxwell's equations are four simple formulas, linking electricity and magnetism, that are among the most profound equations ever discovered. These equations led to the prediction of radio waves, to the realization that a description of light is also contained in these equations and to the discovery of the special theory of relativity. In fact, almost all current descriptions of the fundamental laws of the universe are deep generalizations of Maxwell's equations. Perhaps even more surprising is that these equations and their generalizations have led to some of the most important mathematical discoveries (where there is no obvious physics) of the last 25 years. For example, much of the math world was shocked at how these physics generalizations became one of the main tools in geometry from the 1980s until today. It seems that the mathematics behind Maxwell is endless. This will be an introduction to Maxwell's equations, from the perspective of a mathematician.

Class Format: lecture
Requirements/Evaluation: evaluation will be based primarily on performance on homework and exams
Prerequisites: MATH 350 or MATH 351, and MATH 355, or permission of instructor; not open to students who have taken MATH 337; no physics background
Enrollment Limit: none
Expected Class Size: 15
MATH 453(S) Introduction to the Theory of Partial Differential Equations (Q)
The study of Partial Differential Equations (PDE) is a very prominent branch of modern analysis with many real-life applications. Unlike previous courses you may have taken, in this senior seminar we will set the applications-part aside, and instead study PDE from a rigorous point of view, using tools from mathematical analysis. We will start by examining properties of three classical PDE: Laplace's equation, the heat equation, and the wave equation. Then, we will move on with an introduction to Sobolev spaces and see how to use them to study general second-order elliptic equations. Finally, we will end with first-order PDE and the method of characteristics and, if time permits, we will also cover the theory of Hamilton-Jacobi equations and conservation laws. My hope is that, by the end of the course, you will not only have a deeper understanding of PDE, but also a newfound appreciation of mathematical analysis.

Class Format: lecture
Requirements/Evaluation: evaluation will be based primarily on homework and exams
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: MATH 350 or MATH 351
Enrollment Limit: 25
Expected Class Size: 15
Distributional Requirements: Division 3 Quantitative/Formal Reasoning

Spring 2017
LEC Section: 01 MWF 11:00 AM 11:50 AM Instructor: Peyam Tabrizian

MATH 456(F) Representation Theory (Q)
Representation theory has applications in fields such as physics (via models for elementary particles), engineering (considering symmetries of structures), and even in voting theory (voting for committees in agreeable societies). This course will introduce the concepts and techniques of the representation theory of finite groups, and will focus on the representation theory of the symmetric group. We will undertake this study through a variety of perspectives, including general representation theory, combinatorial algorithms, and symmetric functions.

Class Format: lecture
Requirements/Evaluation: evaluation will be based primarily on homework, in class presentations, and exams
Extra Info: may not be taken on a pass/fail basis
Prerequisites: MATH 355
Enrollment Preferences: junior and senior Math majors
Enrollment Limit: 40
Expected Class Size: 15
Distributional Requirements: Division 3 Quantitative/Formal Reasoning

Fall 2016
LEC Section: 01 TR 08:30 AM 09:45 AM Instructor: Pamela Harris

MATH 475 Methods in Mathematical Fluid Dynamics (Q)
Crosslistings: MATH 475 PHYS 475
The mathematical study of fluids is an exciting field with applications in areas such as engineering, physics and biology. The applied nature of the subject has led to important developments in aerodynamics and hydrodynamics. From ocean currents and exploding supernovae to weather prediction and even traffic flow, several partial differential equations (pde) have been proposed as models to study fluid phenomena. This course is designed to both, introduce students to some of the techniques used in mathematical fluid dynamics and lay down a foundation for future research in this and other related areas. We will start with the method of characteristics, a useful tool in the study of pde. Symmetry and geometrical arguments, special solutions, energy methods, particle trajectories, and techniques from ordinary differential equations (ode) are also discussed. A special focus will be on models from hydrodynamics. These include the KdV and the Camass-Holm equations (and generalizations thereof), and the Euler equations of ideal fluids. Finally, we will be concerned with models whose solutions depend on time and one spatial variable, although depending on student interest and time, we may also investigate higher-dimensional models.

Class Format: lecture
Requirements/Evaluation: problem sets and final project
Extra Info: may not be taken on a pass/fail basis
Prerequisites: MATH 151, MATH 250, and MATH 350 or 351; some background in pde/ode would be helpful but not required
Enrollment Preferences: senior Mathematics majors
Enrollment Limit: 40
Expected Class Size: 25
Distributional Requirements: Division 3 Quantitative/Formal Reasoning

Not Offered Academic Year 2017
LEC Instructor: Alejandro Sarria
MATH 478 On Expressing Numbers (Q)
The real numbers are overall mysterious. Attempts even to describe different real numbers can quickly lead to deep, open questions in mathematics. For example, writing numbers via their decimal expansions leads to the result that a number is rational precisely when the decimal expansion is eventually periodic. This is an entirely different method for describing real numbers: continued fractions, which go back thousands of years. Here every real number can be captured by a sequence of integers (just like for the decimal expansion) but now eventually periodicity corresponds to the number being a square root. The mathematics of continued fractions, and especially their higher dimensional generalizations, lead to a great deal of mathematics. We will be using tools from linear algebra, functional analysis, dynamical systems, ergodic theory and algebraic number theory to explore the best way to express a real number.

Class Format: lecture
Requirements/Evaluation: exams and homework
Prerequisites: MATH 350 or MATH 351, and MATH 355
Enrollment Preferences: Seniors
Enrollment Limit: none
Expected Class Size: 15
Distributional Requirements: Division 3 Quantitative/Formal Reasoning

Not Offered Academic Year 2017
LEC Instructor: Thomas Garrity

MATH 479 Additive Combinatorics (Q) (W)
Lying at the interface of combinatorics, ergodic theory, harmonic analysis, number theory, and probability, Additive Combinatorics is an exciting field which has experienced tremendous growth in recent years. Very roughly, it is an attempt to classify subsets of a given field which are almost a subspace. We will discuss a variety of topics, including sum-product theorems, the structure of sets of small doubling (e.g. the Freiman-Ruzsa theorem), long arithmetic progressions (e.g. Roth's theorem), structured subsets of sumsets, and applications to computer science (e.g. to pseudorandomness). Depending on time and interest, we may also discuss higher-order Fourier analysis, the polynomial method, and the ergodic approach to Szemerédi’s theorem.

Class Format: lecture
Requirements/Evaluation: regular problem sets, as well as a final project
Prerequisites: MATH 250, MATH 350, MATH 355
Enrollment Preferences: students who have previously taken number theory
Enrollment Limit: 19
Expected Class Size: 8

STAT 101(F,S) Elementary Statistics and Data Analysis (Q)
It is impossible to be an informed citizen in the world today without an understanding of data and information. Whether opinion polls, unemployment rates, salary differences between men and women, the efficacy of vaccines or consumer webdata, we need to be able to separate the signal from the noise. We will learn the statistical methods used to analyze and interpret data from a wide variety of sources. The goal of the course is to help reach conclusions and make informed decisions based on data.

Class Format: lecture
Requirements/Evaluation: evaluation will be based primarily on performances on quizzes and exams
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: MATH 102 (or demonstrated proficiency on a diagnostic test)
Enrollment Limit: 50
Expected Class Size: 40
Dept. Notes: students who have had calculus, and potential majors in science, economics or mathematics should consider taking Statistics 201 instead.

STAT 201(F,S) Statistics and Data Analysis (Q)
Statistics can be viewed as the art and science of turning data into information. Real world decision-making, whether in business or science is often based on data and the perceived information it contains. Sherlock Holmes, when prematurely asked the merits of a case by Dr. Watson, snapped back, "Data, data, data! I can't make bricks without clay." In this course, we will study the basic methods by which statisticians attempt to extract information from data. These will include many of the standard tools of statistical inference such as hypothesis testing, confidence intervals, and linear regression as well as exploratory and graphical data analysis techniques. This is an accelerated introductory statistics course that involves computational programming and incorporates modern statistical techniques.

Class Format: lecture
Requirements/Evaluation: evaluation will be based primarily on performance on quizzes and exams
Prerequisites: MATH 150 or equivalent; students without any calculus background should consider STAT 101 instead
Enrollment Limit: 40

STAT 202(F) Introduction to Statistical Modeling (Q)
Data come from a variety of sources sometimes from planned experiments or designed surveys, but also arise by much less organized means. In this course we'll explore the kinds of models and predictions that we can make from both kinds of data as well as design aspects of collecting data. We'll focus on model building, especially multiple regression, and talk about its potential as well as its limits to answer questions about the world. We'll emphasize applications over theory and analyze real data sets throughout the course.

Class Format: lecture
Requirements/Evaluation: evaluation will be based on homework, exams and projects
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: AP Statistics 5; STAT 101 or 201 or permission of instructor
Enrollment Limit: 35
Expected Class Size: 20
Distributional Requirements:
Division 3
Quantitative/Formal Reasoning
Other Attributes: PHLH Statistics Courses

Fall 2016

LEC Section: 01  TF 02:35 PM 03:50 PM  Instructor: Richard De Veaux

STAT 231T Statistical Design of Experiments (Q)
What does statistics have to do with designing and carrying out experiments? The answer is, surprisingly perhaps, a great deal. In this course, we will study how to design an experiment with the fewest number of observations possible to achieve a certain power. We will also learn how to analyze and present the resulting data and draw conclusions. After reviewing basic statistical theory and two sample comparisons, we cover one and two-way ANOVA and (fractional) factorial designs extensively. The culmination of the course will be a project where each student designs, carries out, analyzes, and presents an experiment of interest to him or her. Throughout the course, we will use the free statistical software program R to carry out the statistical analysis.

Class Format: tutorial
Requirements/Evaluation: evaluation will be based primarily on performance on exams, homework and the final project
Extra Info: may not be taken on a pass/fail basis
Prerequisites: a previous introductory course in statistics and no fear of simple computer programming and calculus
Enrollment Limit: 10
Expected Class Size: 10
Distributional Requirements:
Division 3
Quantitative/Formal Reasoning

Other Attributes:
BGNP Related Courses
COGS Related Courses
ENVS Methods Courses
PHLH Statistics Courses

Not Offered Academic Year 2017

TUT  Instructor: Andrey Glubokov

STAT 346(F,S) Regression and Forecasting (Q)
This course focuses on the building of empirical models through data in order to predict, explain, and interpret scientific phenomena. Regression modeling is the standard method for analyzing continuous response data and their relationship with explanatory variables. This course provides both theoretical and practical training in statistical modeling with particular emphasis on simple linear and multiple regression, using R to develop and diagnose models. The course covers the theory of multiple regression and diagnostics from a linear algebra perspective with emphasis on the practical application of the methods to real data sets. The data sets will be taken from a wide variety of disciplines.

Class Format: lecture
Requirements/Evaluation: evaluation will be based primarily on performance on exams, homework, and a project
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: STAT 101 or 201, and MATH 150 and 250; or permission of instructor
Enrollment Limit: 22
Expected Class Size: 15
Distributional Requirements:
Division 3
Quantitative/Formal Reasoning

Fall 2016

LEC Section: 01  TF 01:00 PM 02:25 PM  Instructor: Richard De Veaux

Spring 2017

LEC Section: 01  TF 01:10 PM 02:25 PM  Instructor: Richard De Veaux

STAT 355 Multivariate Statistical Analysis (Q)
To better understand complex processes, we study how variables are related to one another, and how they work in combination. Therefore, we want to make inferences about more than one variable at time? Elementary statistical methods might not apply. In this course, we study the tools and the intuition that are necessary to analyze and describe such data sets. Topics covered will include data visualization techniques for high dimensional data sets, parametric and non-parametric techniques to estimate joint distributions,
techniques for combining variables, as well as classification and clustering algorithms.

Class Format: lecture
Requirements/Evaluation: evaluation will be based on homework and exams
Prerequisites: STAT 201 and MATH 250
Enrollment Limit: 25
Expected Class Size: 10
Distributional Requirements: Division 3
Quantitative/Formal Reasoning

Not Offered Academic Year 2017
LEC Instructor: Brianna Heggeseth

STAT 356(F) Time Series Analysis (Q)
Time series—data collected over time—crop up in applications from economics to engineering to transit. But because the observations are generally not independent, we need special methods to investigate them. This course will include exploratory methods and modeling for time series, including smoothing, ARIMA and state space models, and a foray into the frequency domain. We will emphasize applications to a variety of real data.

Class Format: lecture
Requirements/Evaluation: evaluation will be based primarily on projects, homework, and exams
Prerequisites: STAT 346 (may be taken concurrently) or permission of instructor
Enrollment Limit: 30
Expected Class Size: 20
Distributional Requirements: Division 3
Quantitative/Formal Reasoning

LEC Section: 01  MWF 10:00 AM 10:50 AM Instructor: Laurie Tupper

Spring 2017

STAT 360(S) Statistical Inference (Q)
How do we estimate unknown parameters and express the uncertainty we have in our estimate? Is there an estimator that works best? Many topics from Stat 201 such as random variables, the central limit theorem, point and interval estimation and hypotheses testing will be revisited and put on a more rigorous mathematical footing. The focus is on maximum likelihood estimators and their properties. Bayesian and computer intensive resampling techniques (e.g., the bootstrap) will also be considered.

Class Format: lecture
Requirements/Evaluation: evaluation will be based on problem sets and exams
Extra Info: may not be taken on a pass/fail basis
Prerequisites: MATH 250, STAT 201, STAT 341
Enrollment Limit: 30
Expected Class Size: 30
Distributional Requirements: Division 3
Quantitative/Formal Reasoning

LEC Section: 01  TR 11:20 AM 12:35 PM Instructor: Bernhard Klingenberg

Spring 2017

STAT 365(F) Bayesian Statistics (Q)
The Bayesian approach to statistical inference represents a reversal of traditional (or frequentist) inference, in which data are viewed as being fixed and model parameters as unknown quantities. Interest and application of Bayesian methods have exploded in recent decades, being facilitated by recent advances in computational power. We begin with an introduction to Bayes' Theorem, the theoretical underpinning of Bayesian statistics which dates back to the 1700's, and the concepts and prior and posterior distributions, conjugacy, and closed-form Bayesian inference. Building on this, we introduce modern computational approaches to Bayesian inference, including Markov chain Monte Carlo (MCMC), Metropolis-Hastings sampling, and the theory underlying these simple and powerful methods. Students will become comfortable with modern software tools for MCMC using a variety of applied hierarchical modeling examples, and will use R for all statistical computing.

Class Format: lecture
Requirements/Evaluation: evaluation will be based on homework and exams
Prerequisites: STAT 201 and MATH 150 and 250, or permission of instructor
Enrollment Preferences: juniors and seniors, Math majors
Enrollment Limit: 30
Expected Class Size: 10
Distributional Requirements: Division 3
Quantitative/Formal Reasoning

Fall 2016
LEC Section: 01  MWF 11:00 AM 11:50 AM Instructor: Daniel Turek

STAT 372 Longitudinal Data Analysis: Modeling Change over Time (Q)
This course explores modern statistical methods for drawing scientific inferences from longitudinal data, i.e., data collected repeatedly on experimental units over time. The independence assumption made for most classical statistical methods does not hold with this data structure because we have multiple measurements on each individual. Topics will include linear and generalized linear models for correlated data, including marginal and random effect models, as well as computational issues and methods for fitting these models. We will consider many applications in the social and biological sciences.

Class Format: lecture
Requirements/Evaluation: evaluation will be based primarily on performance on exams, homework, and a project
Extra Info: may not be taken on a pass/fail basis
Prerequisites: STAT 201 and STAT 346
Enrollment Limit: 18
Expected Class Size: 15
Distributional Requirements: Division 3

Spring 2017
IND Section: 01  Cancelled

STAT 440(F) Categorical Data Analysis (Q)
This course focuses on methods for analyzing categorical response data. In contrast to continuous data, categorical data consist of observations classified into two or more categories. Traditional tools of statistical data analysis are not designed to handle such data and pose inappropriate assumptions. We will develop methods specifically designed to address the discrete nature of the observations and consider many applications in the social and biological sciences as well as in medicine, engineering and economics. All methods can be viewed as extensions of traditional regression models and ANOVA.

Class Format: lecture
Requirements/Evaluation: evaluation will be based primarily on performance on exams, homework, and a project
Prerequisites: STAT 346 and STAT 360
Enrollment Limit: 18
Expected Class Size: 15
Distributional Requirements: Division 3

Fall 2016
LEC Section: 01  MWF 09:00 AM 09:50 AM Instructor: Steven Miller

STAT 377(F) Operations Research (Q) (W)
Crosslistings: MATH 377/STAT 377
In the first N math classes of your career, you can be misled as to what the world is truly like. How? You've given exact problems and told to find exact solutions. The real world is far more complicated. Frequently we cannot exactly solve problems; moreover, the problems we try to solve are themselves merely approximations to the world! We are forced to develop techniques to approximate not just solutions, but even the statement of the problem. Additionally, we often need the solutions quickly. Operations Research, which was born as a discipline during the tumultuous events of World War II, deals with efficiently finding optimal solutions. In this course we build analytic and programming techniques to efficiently tackle many problems. We will review many algorithms from earlier in your mathematical or CS career, with special attention now given to analyzing their run-time and seeing how they can be improved; students will be implementing many of these algorithms on computer systems of their choice. The culmination of the course is a development of linear programming and an exploration of what it can do and what are its limitations. For those wishing to take this as a Stats course, the final project must have a substantial implementation computation (respectively, statistics) component approved by the instructor.

Class Format: lecture
Requirements/Evaluation: evaluation will be based primarily on homework, classwork, projects, presentations and exams; at least 20 pages of writing
Prerequisites: MATH 350 or 351 and permission of instructor
Enrollment Preferences: Computer Science, Mathematics and Statistics majors

STAT 442(S) Computational Statistics and Data Mining (Q)
In both science and industry today, the ability to collect and store data can outpace our ability to analyze it. Traditional techniques in statistics are often unable to cope with the size and complexity of today's data bases and data warehouses. New methodologies in Statistics have recently been developed, designed to address these inadequacies, emphasizing visualization, exploration and empirical model building at the expense of traditional hypothesis testing. In this course we will examine these new techniques and apply them to a variety of real data sets.

Class Format: lecture
Requirements/Evaluation: evaluation will be based primarily on homeworks and projects.

STAT 462 Modern Nonparametric Statistics (Q)
Many statistical procedures and tools are based on a set of assumptions, such as normality. But, what if some or all of these assumptions are not valid? This question leads to the consideration of distribution-free analysis, an active and fascinating field in modern statistics called nonparametric statistics. In this course we aim to make inference for population characteristics while making as few assumptions as possible. Besides the classical rank or randomization-based test statistics course especially focuses on various modern nonparametric inferential techniques, such as nonparametric density estimation, nonparametric regression, selection of smoothing parameter (cross validation and unbiased risk estimation), bootstrap and jackknife, and Minimax theory.

Throughout the semester we will examine these new methodologies and apply them on simulated and real data sets using R.

Class Format: lecture
Requirements/Evaluation: evaluation will be based primarily on homework, exams, and a final presentation and project.
Extra Info: may not be taken on a pass/fail basis.
Prerequisites: STAT 201 and STAT 360, or permission of instructor

WANG. Instructor in Music: E. LAWRENCE (Musicianship Skills Labs), Visiting Instructor in Music: D. PRINODE (Musicianship Skills Labs), C. MELLON Postdoctoral Fellow in Music: A. TIMBERLAKE. Ensemble Directors & Artist Associates: C. CAPRONI (Marching Band), D. CHANDRA (Tabla), V. CHANDRA (Sitar), S. CHENG (Chinese Strings), J. DEVOE (Flute), S. EVANS (Jazz Voice), J. GENOVA (Violin), M. GORDON (Percussion Ensemble, Percussion), C. JENKINS (Oboe), K. KIBLER (Voice, Co-Director of Williams Opera Workshop), M. KOLODNY (Saxophone), E. LAWRENCE (Piano, Organ, Harpsichord), B. LEWIS (Songwriting), S. MARTULA (Clarinet Choir, Clarinet), C. MEHEAN (Jazz Drums), E. MORSE (Harp), E. NAFZIGER (Voice, Co-Director of Williams Opera Workshop), J. NAZARENKO (Jazz Piano), A. NEU (Viola), Y. PENG (Classical and Jazz Guitar), K. RYER-PARKE (Voice), A. SHARPE (Jazz Bass, Co-Director of Small Jazz Ensembles, Faculty Advisor to Gospel Choir), V. SUNGARIAN (Horn), M. WALT (Voice), S. WALT (Woodwind Chamber Music, Bassoon), D. WHEELER (Classical and Jazz Trumpet), J. WHEELER (Classical and Jazz Trombone, Co-Director of Small Jazz Ensembles), E. WRIGHT (Piano), R. ZIMMERMAN (Bass).

COURSES AND COURSE-NUMBERING

100-level courses are introductory in nature. They aim to acquaint students with a variety of topics in music, ranging from the materials of music (introductionary music theory and musicianship) to various musical cultures (Africa, Oceania, Asian, Classical, Caribbean, and more). Some of these courses are intended for advanced juniors and seniors, usually with a background in instrumental or vocal performance and fluency in reading musical notation to focus on specialized topics. All require at least one semester of music theory or its equivalent. Some 100-level courses are experiential in nature, including performance-based coursework in conducting, composition, arranging, orchestration, and improvisation. Others are advanced courses in music theory and analysis, musicology, or ethnomusicology, taught in a seminar context that emphasizes original research and analysis.

200-level courses are intended for advanced juniors and seniors, usually with a background in instrumental or vocal performance and fluency in reading musical notation to focus on specialized topics. All require at least one semester of music theory or its equivalent. Some 200-level courses are experiential in nature, including performance-based coursework in conducting, composition, arranging, orchestration, and improvisation. Others are advanced courses in music theory and analysis, musicology, or ethnomusicology, taught in a seminar context that emphasizes original research and analysis.

300-level courses are intended for advanced juniors and seniors, usually with a background in instrumental or vocal performance and fluency in reading musical notation to focus on specialized topics. All require at least one semester of music theory or its equivalent. Some 300-level courses are experiential in nature, including performance-based coursework in conducting, composition, arranging, orchestration, and improvisation. Others are advanced courses in music theory and analysis, musicology, or ethnomusicology, taught in a seminar context that emphasizes original research and analysis.

MAJOR
A minimum of ten courses are required for the major, as detailed below.

Four courses in Music Theory and Musicianship to be taken in sequence:
Music 103
Music 104a (Music Theory and Musicianship I) or Music 104b (Jazz Theory and Improvisation I)
Music 201
Music 202

Three courses in European and American Music History:

Music 231
Music 232
Music 233

Majors may choose to replace a maximum of any one of these three specific courses with a course in music history covering aspects of the same period. The courses that may substitute for MUS 231, 232, and 233 are listed below:

Music 231: 163, 164, or 261
Music 232: 165, 166, 236, or 266T
Music 233: 119, 138, 151, 238, 239, 244, 251, 252, or 254

One course in World Music/Ethnomusicology from the following:

Music 111, 112, 113, 117, 120, 125, 126, 21T, 220, 221, 222, 225, 226, 230, 330

Two electives:

One must be taken in the senior year and at the 400-level to serve as a capstone course. (The second semester of a year-long honors thesis, MUS 493/494, will satisfy this requirement.) The other elective may be fulfilled in any semester by any Music course but must be taken in addition to courses selected to satisfy the history, theory, and world music/ethnomusicology requirements detailed above.

Majors are required to participate in faculty-directed departmental ensembles for at least four semesters.

Majors must enroll in partial credit music lessons for at least two semesters.

The Degree with Honors in Music

Three routes provide the opportunity for honors or higher honors consideration in the Music major:

Composition: A Composition thesis must include one major work completed during the senior year supported by a 10- to 15-page discussion of the student's work or analysis of a major 20th century or contemporary work. The student's general portfolio of compositions completed during the junior and senior years will also be considered in determining honors.

Performance: A Performance thesis must include an honors recital given during the spring of the senior year supported by a 15- to 20-page discussion of one or more of the works performed. The student's general performance career will also be considered in determining honors.

History, Theory and Analysis, or Ethnomusicology: A written Historical, Theoretical/Analytical, or Ethnomusicological thesis between 65 and 80 pages in length. A written thesis should offer new insights based on original research. A public oral thesis defense is also required.

In order for a thesis proposal to be approved a student must have at least a 3.3 GPA in Music courses (this GPA must be maintained in order to receive honors) and must have demonstrated outstanding ability and experience through coursework and performance in the proposed thesis area. Students are encouraged to seek the advice of their potential thesis advisor early in the junior year and no later than the first month of the second semester. A 1- to 2-page proposal written in consultation with the faculty advisor must be received by the Music chair by the end of spring break.

Honors candidates must enroll in Music 493(F)/W31-494(S) during their senior year. A student who is highly qualified for honors work, but is unable to pursue a year-long project for compelling reasons, may petition the department for permission to pursue a WS/one-semester thesis. The standards for evaluating such a thesis remain the same. Completed thesis is due by April 15.

Lessons

Courses in individual vocal or instrumental instruction are fully subsidized for all students who meet the lesson commitment. (See Music 281-288 and Advanced Musical Performance 391, 392, 491, 492). For further information, check the Music Department webpage or contact the Department of Music.

Study Abroad

One study abroad course may satisfy the one free elective requirement for the major, if approved by the department. A second study abroad course might satisfy any one of the specific required courses if the proposed course is clearly equivalent and if the substitution is approved by the department. Majors planning to study abroad should meet with the department chair to propose specific study abroad courses that might be approved to satisfy major requirements under this policy. No more than two courses taken abroad may count toward the major. Music lesson courses and ensemble participation pursued while studying abroad may count toward the performance requirements with approval of the department. You can find general study abroad guidelines for Music here.

MUS 101(F) Listening to Music: An Introduction to the Western Classical Tradition

When you listen to music — on the radio, on your ipod, at a concert — how much do you really hear? This course refines students' listening skills through study of the major composers, styles, and genres of the Western classical tradition. We will explore music from the Baroque, Classical, Romantic, and Modern eras, including works by Bach, Mozart, Beethoven, Chopin, Tchaikovsky, Brahms, Stravinsky, and other composers. Genres to be covered include the symphony, string quartet, sonata, opera, song, and choral music. Attendance at selected concerts on campus is required.

Class Format: lecture
Requirements/Evaluation: evaluation will be based on a short listening journal, two concert reviews, a quiz, a midterm exam and a final exam
Prerequisites: none
Enrollment Preferences: first-years, sophomores and any student who expresses a strong interest in the course
Enrollment Limit: 25
Expected Class Size: 25
Dept. Notes: intended for non-major students with little or no formal training in music

Distributional Requirements:
Division 1

Fall 2016

LEC Section: 01 MW6 10:00 AM - 10:50 AM Instructor: Marjorie Hirsch

MUS 102(F) Introduction to Music Theory

The course presents an introduction to the materials and structures of music. Through a variety of practical exercises and written projects, students will develop an understanding of the elements of music theoryLEC Section: 01 MW6 10:00 AM - 10:50 AM Instructor: Marjorie Hirsch

Prerequisites: none
Enrollment Preferences: none
Enrollment Limit: 25
Expected Class Size: 25

Distributional Requirements:
Division 1

Fall 2016

LEC Section: 01 TR 08:30 AM - 09:45 AM Instructor: Ed Gollin

MUS 103(F) Music Theory and Musicianship I

MUS 103 and 104 are designed for potential majors and for students with strong instrumental or vocal backgrounds. Students entering MUS 103 should have a solid understanding of musical rudiments (intervals, scales, keys) and relative proficiency in both bass and treble clefs. A short diagnostic exam will be administered at the first class meeting of MUS 103 to determine if a student requires any additional work to complement and fortify course work during the early weeks of the semester, or whether placement in MUS 102 would be more appropriate. Students with a strong background in music theory may take a placement exam during First Days to see whether they can pass out of one or both semesters. MUS 103 and 104 are required for the music major.

MUS 103 presents the materials, structures and procedures of tonal music, with emphasis on the elements of music theory. A public oral thesis defense is also required. Completed thesis is due by April 15.

Extra Info: may not be taken on a pass/fail basis
Prerequisites: none
Enrollment Preferences: first year students
Enrollment Limit: 16
Expected Class Size: 16

Distributional Requirements:
Division 1

Fall 2016

LEC Section: 01 TR 08:30 AM - 09:45 AM Instructor: Ed Gollin

MUS 104(S) Music Theory and Musicianship II

MUS 104a continues the practical musicianship work of Music 103, while expanding the scope of harmonic topics to include seventh chords and Chromatic harmony. Music 104a further explores the transformation of chordal harmony in contrapuntal works of the eighteenth century. Projects include the composition and performance of preludes, fugues and organ chorale preludes on baroque models.
Class Format: lecture two days a week; a conference meeting one day a week; ear training/keyboard skills lab meeting twice a week

Requirements/Evaluation: evaluation will be based on weekly written work, written and keyboard quizzes, and midyear and final projects

Extra Info: may not be taken on a pass/fail basis

this course will share aural skills labs with MUS 104b; students considering taking this course should consult the lab times shown below and plan their schedules accordingly.

Prerequisites: MUS 103

Enrollment Preferences: first-years, potential or declared Music majors, and those with strong musicianship backgrounds

Enrollment Limit: 24

Expected Class Size: 21

Distributional Requirements:

Division 1

Spring 2017

LAB Section: A3  MWF 10:00 AM 10:50 AM  Instructors: Edwin Lawrence, Kris Allen, Ed Gollin, Daniel Prindle

LAB Section: A4  MWF 11:00 AM 11:50 AM  Instructors: Edwin Lawrence, Kris Allen, Ed Gollin, Daniel Prindle

MUS 104(S) Jazz Theory and Improvisation I

Crosslistings: MUS 104/AFR 212

The theory and application of basic techniques in jazz improvisation and performance styles, including blues forms, swing, bebop, modally based composition, Afro-Cuban, etc. Appropriate for students with skill on their instrument and some basic theoretical knowledge. Knowledge of all key signatures, major/minor keys and modes, intervals, triads and basic seventh chords and their functions within keys. Students should be able to play and demonstrate these concepts on their instruments—competence on an instrument is essential (vocalists and drummers will be encouraged to study the piano).\n
Plantains and guitarists should be able to sight read chords on a jazz lead sheet.

Class Format: alternates between lecture style exposition of theoretical topics and a master class where students will perform and be evaluated on assigned repertoire

Requirements/Evaluation: evaluation will be based on weekly assignments, (e.g., harmonic analysis and exercises in transposition and transcription), a midterm, a transcription project and the end of semester assignments, (e.g., harmonic analysis and exercises in transposition and transcription). In each section of the course, aspects of cultural context (including music's function in religious life and its relationship to the other arts), will be emphasized. While our focus will be on the traditional and classical music of these cultures, we will also briefly consider the contemporary musical scene.\n
Extra Info: this course will share aural skills labs with MUS 104a; students considering taking this course should consult the lab times shown below and plan their schedules accordingly.

Prerequisites: MUS 103 and/or permission of instructor; musical literacy required as per above description; private study on student's individual instruction strongly encouraged

Enrollment Preferences: prospective Music majors, then Jazz Ensemble members, then Music majors

Enrollment Limit: 15

Expected Class Size: 12

Distribution Notes: meets Division 1 requirement if registration is under MUS; meets Division 2 requirement if registration is under AFR

Distributional Requirements:

MUS 111(F) Music Cultures of the World (D)

This course introduces a variety of musical traditions from around the world, from ancient to reggae and Indian classical genres. Students develop a working knowledge of musical terms, influential musicians, and concepts relevant to performance genres hailing from the Americas, Africa, Asia, Europe, and the Middle East. Beyond engaging with music's sound and structure, we will address its capacity to express personal and group identity, and its ability to both reflect and shape broader social ideas and circumstances. Reading and writing assignments are combined with direct engagement with music and musicians. No prior musical training required.

Class Format: lecture

Requirements/Evaluation: based on class attendance and participation, regular short writing assignments, and a final paper

Extra Info: may not be taken on a pass/fail basis

Prerequisites: none

Enrollment Preferences: current or prospective majors in Music, Anthropology, Sociology, Arabic Studies and Asian Studies, as well as current and prospective concentrators in African Music and Latinx/o Studies

Enrollment Limit: 30

Expected Class Size: 20

Dept. Notes: MUS World Music/Ethnomusicology

Distributional Requirements:
MUS 119(S) Popular Music: Revolutions in the History of Rock
This course will trace the history of rock music from the 1950s to the present, focusing on those musicians who revolutionized the genre in various periods. Such "revolutions" are discovered in the use of new sounds and musical forms, in the relationship between lyrics and musical setting, and in the conception of rock's role in society. Three objectives will underpin our studies: to develop listening skills with music that one often hears, but which perhaps rarely listens to intently; to determine in what ways popular music can be interpreted as reflecting its cultural context; and to encounter the work of several of the more innovative musicians in the history of rock. Finally we will interrogate our own activities by asking why the study of the "merely popular" should be pursued in a liberal arts education, whether new approaches can be developed for this endeavor, and what makes music "popular."

Class Format: lecture/discussion
Requirements/Evaluation: evaluation will be based on two tests, two papers, and a final exam
Extra Info: may not be taken on a pass/fail basis
Prerequisites: no musical background assumed
Enrollment Preferences: random selection
Enrollment Limit: 40
Expected Class Size: 40
Distributional Requirements: Division 1

LEC Section: 01   TR 09:55 AM 11:10 AM   Instructor: W. Anthony Sheppard

MUS 120 Musics of Africa (D)
Crosslistings: MUS 120/AFR 113
This course introduces a selection of musical cultures from the geographical breadth of Africa. Following an introductory exploration of the fundamental aesthetic and social parameters governing African musical practice, we will engage in a series of case studies considering a diverse array of musical practices and related social and political issues in specific locales. Featured countries include Ghana, Zimbabwe, Ethiopia, Algeria and the Democratic Republic of Congo. This course samples a wide range of musical practices from the Ghanaian dance craze, azonto, to Ethiopian liturgical chant, and Shona mbira music in Zimbabwe. Performance analysis and critical reading and listing assignments are combined with a number of hands-on workshops and musical exercises.

Class Format: lecture
Requirements/Evaluation: grade based on two 4- to 6-page papers, two tests, one performance project, a final paper, and class participation
Extra Info: may not be taken on a pass/fail basis
Prerequisites: no prerequisites; prior musical background is not essential for this class
Enrollment Preferences: current or prospective Music majors and Africana Studies concentrators
Enrollment Limit: 30
Expected Class Size: 25
Dept. Notes: MUS World Music/Ethnomusicology
Distribution Notes: meets Division 1 requirement if registration is under MUS; meets Division 2 requirement if registration is under AFR
Distributional Requirements: Division 1

MUS 125 Music and Social Dance in Latin America (D)
Crosslistings: MUS 125/DANC 125
This course offers a full-spectrum introduction to the sounds, movements, and social characteristics of a number of Latin American social dance forms, including samba, salsa, tango, and the Afro-Surinamese genre, awawa. Through critical listening and viewing assignments, performance workshops, and readings from disciplines spanning ethnomusicology, anthropology, dance studies, Latin American studies and history, students will combine a technical understanding of the musical and choreographic features of these genres with a consideration of their social impact. Among the questions that will drive class discussions are the following: How do sound and movement interrelate? What aspects of gender, sexuality, class, race and ethnicity arise in the performance and consumption of Latin American genres of social dance? How do high political, economic, and personal stakes emerge through activities more commonly associated with play and leisure? No prior music or dance training is necessary, however this course does require regular engagement in interactive and performance-based assignments and workshops.

Class Format: seminar/studio

MUS 138(S) Introduction to Twentieth-Century Music
Twentieth-century Euro-American art music involved a persistent exploration of the limits of musical possibility. Encounters with this music often challenge our ears and musical minds and require us to reconsider fundamental conceptions of music itself. Throughout the course, we will investigate in what ways the basic elements of music (e.g., harmonic organization, rhythm, timbre, instrumentation and performance conventions) were extended and revolutionized. Topics and styles to be discussed include: atonality, expressionism, twelve-tone techniques, neoclassicism, electronic and computer music, stochastic music, minimalism, and neoromanticism. We will also consider the use of this century in relation to contemporary developments in the other arts and to popular musical styles. The syllabus will include works by such composers as Debussy, Mahler, Stravinsky, Schoenberg, Webern, Bartók, Weil, Milhaud, Shostakovich, Ives, Copland, Babbitt, Stockhausen, Messiaen, Boulez, Berio, Cage, Gorecki, Glass, Gubaidulina, and Tower.

Class Format: lecture/discussion
Requirements/Evaluation: evaluation will be based on a series of quizzes, projects, short papers, and performance reports; quizzes will include listening and identifying examples
Prerequisites: none
Enrollment Preferences: juniors, seniors, Music majors and potential majors
Enrollment Limit: 19
Expected Class Size: 15
Distributional Requirements: Division 1

Spring 2017
MUS 141(F) Opera
An introduction to the history of opera, from the genre's birth c. 1600 to the present. At various points in its 400-year development, opera has been considered the highest synthesis of the arts, a vehicle for the social elite, or a form of popular entertainment. Opera's position in European cultural history will be a primary focus of our inquiry. We will also study the intriguing relationship between text and music, aspects of performance and production, and the artistic and social conventions of the operatic world. The multidimensional nature of opera invites a variety of analytical and critical perspectives, including trends of music analysis, literary studies, feminist interpretations, and political and sociological approaches. Works to be considered include operas by Monteverdi, Lully, Charpentier, Handel, Gluck, Mozart, Rossini, Donizetti, Verdi, Wagner, Bizet, Puccini, Strauss, Berg, Britten, Glass and Adams. This course may involve a trip to the Metropolitan Opera.

Class Format: lecture/discussion
Requirements/Evaluation: evaluation will be based on a midterm, a brief paper, a 3-page paper, and a final exam
Prerequisites: none
Enrollment Preferences: none
Enrollment Limit: 30
Expected Class Size: 20
Distributional Requirements: Division 1

Fall 2016
LEC Section: 01 MR 01:10 PM 02:25 PM Instructor: W. Anthony Sheppard

MUS 143(S) The Symphony
This course traces the European symphonic tradition from the late eighteenth century through the mid-twentieth century, focusing on works by Mozart, Haydn, Beethoven, Berlioz, Liszt, Mendelssohn, Schumann, Brahms, Dvorak, Mahler, Strauss, and Shostakovich. We will examine developments in musical form and harmony, social contexts for listening, and contemporary aesthetic debates about the nature of genius, the idea of musical tradition, and the narrative capacity of instrumental music.

Class Format: lecture/discussion
Requirements/Evaluation: students will be evaluated on three 3- to 5-page essays, two exams, and short weekly assignments, ability to read music not required
Prerequisites: none
Enrollment Preferences: first-years and sophomores
Enrollment Limit: 25
Expected Class Size: 10
Distributional Requirements: Division 1

Spring 2017
LEC Section: 01 MR 02:35 PM 03:50 PM Instructor: Anicia Timberlake

MUS 146 The Concerto: Dialogue and Discord
The concerto is the musical genre most akin to the novel, and like the novel, explores the individual's relationship to society. A musical protagonist—a solo instrumentalist or a group of individual players—engages the larger orchestra/ensembles, and a story unfolds in a dramatic narrative told in sound. This course will trace the history of the concerto from its beginning in the Baroque period to today. We will explore the spirited exchanges of Bach's Brandenburg Concerti, the virtuoso concertos of Mozart's piano concertos, the impassioned struggles of the Brahms violin concerto, the ferocious arguments of the Shostakovich cello concerto, the polygot discussions of John Adam's clarinet concerto, and many more. Along the way we will also investigate transformations in patronage and performance contexts, the cult of the virtuoso, and aspects of musical form and style. Students will experience the excitement of hearing concerti performed on campus by the Berkshire Symphony and student winners of the Department of Music's Concerto Competition.

Class Format: lecture/discussion
Requirements/Evaluation: evaluation based on several short papers, a midterm and a final, and on class participation
Prerequisites: none
Enrollment Preferences: students with a demonstrated interest in music
Enrollment Limit: 25
Expected Class Size: 20
Distributional Requirements: Division 1

Not Offered Academic Year 2017
LEC Instructor: Kris Allen

MUS 151 History of Jazz (D)
"There are only three things that America will be remembered for 200 years from now: Baseball, Football, Jazz Music and Baseball. These are the three most beautiful things this culture's ever created."—(Gerald Early) Jazz is the most common name for a great African American Art form that still defies definition. Over the past century this elastic tradition has laid down firm roots for numerous other American and World musics, while itself in the throes of a seemingly permanent identity crisis. Jazz is perennially declared dead or dying yet consistently summoned by advertisers to lend vitality and sex appeal to liquor or automobiles. By any name and regardless of its health status, jazz has a rich history of conservative innovators, at once restless and reverent, who made fascinating leaps of creativity out of inspiration or necessity. This "listening intensive" class will look at the past century of jazz music through ideas, "what-if" questions and movement, changing the way the music was created, presented and perceived. Both musical concepts (such as syncopation and cross-instrumental-influence) and cultural connections (jazz as cold war propaganda, jazz as protest music) will be examined, giving us freedom to link similar kinds of musical thought across disparate settings and decades. Our inquiry will include (but not be limited to) the lives and music of Louis Armstrong, Fletcher Henderson, Mary Lou Williams, Duke Ellington, Charlie Parker, Thelonious Monk, Dizzy Gillespie, Art Blakey, John Lewis, Miles Davis, John Coltrane and Wayne Shorter.

Class Format: lecture
Requirements/Evaluation: class participation including regular reading and listening assignments; concert attendance; midterm and final exam, one paper, and one final project
Prerequisites: none
Enrollment Preferences: first-years and sophomores
Enrollment Limit: 30
Expected Class Size: 30
Distributional Requirements: Division 1

Not Offered Academic Year 2017
LEC Instructor: Kris Allen
MUS 163 Bach

Johann Sebastian Bach now enjoys the status of a cultural icon, transcending time and place. But who was Bach, and why do his musical creations continue to fascinate us? This course offers an introduction to the life and music of this iconic composer. We will explore aspects of cultural context (such as the social milieu in which Bach developed his art and the use and perception of his music by his contemporaries), as well develop our listening skills by exploring matters of purely musical content (the styles and forms of his prodigious oeuvre). Both instrumental and vocal music will be surveyed, including the Brandenburg Concerti, the Goldberg Variations, the Magnificat, and the B Minor Mass. The course will conclude with a consideration of Bach's legacy in the 19th and 20th centuries.

Class Format: lecture/discussion

Requirements/Evaluation: evaluation will be based on 2 papers, a midterm, a final exam, and class participation

Prerequisites: none

Enrollment Preferences: seniors and juniors

Expected Class Size: 15

Distributional Requirements: Division 1

Not Offered Academic Year 2017

LEC Instructor: Jennifer Bloxam

MUS 164(F) Bach and Handel: Their Music in High Baroque Culture

This course explores the lives and music of two great composers of the High Baroque, Johann Sebastian Bach and George Frideric Handel. We will examine their dramatically contrasting life experiences and musical pursuits within the larger social and cultural framework of the period: Bach as a provincial composer, servant to minor German aristocrats and the Lutheran Church, virtuoso organist and pedagogue; Handel as a cosmopolitan celebrity and entrepreneur, creator of operatic and instrumental entertainments for both the Italian and English nobility and the paying public. Development of listening skills and understanding of Baroque music styles, genres, and forms will be stressed. Bach's Cantatas and Mass in B-minor, and Handel's opera Giulio Cesare and Water Music Suite are just a few of the works to be discussed and enjoyed.

Class Format: lecture/discussion, two meetings per week; field trip may be required

Requirements/Evaluation: evaluation will be based on participation, two papers, a midterm, and a final exam

Extra Info: may not be taken on a pass/fail basis

Prerequisites: none

Enrollment Preferences: first-year students and sophomores

Expected Class Size: 12

Distributional Requirements: Division 1

Fall 2016

LEC Section: 01 TR 08:30 AM 09:45 AM Instructor: Jennifer Bloxam

MUS 165 Mozart

This course will examine the extraordinary life and musical genius of Wolfgang Amadeus Mozart. Through lectures, discussion, readings, and guided listening, students will gain appreciation of Mozart's classical compositional style and familiarity with many of his greatest works. The class will explore Mozart's pivotal position as a musician in Viennese society; his strange childhood and the story of his music as told in his own letters; his relationship with his domineering father Leopold, as well as with Haydn, Beethoven, and Salieri; and the myths about Mozart that have sprung up in the two centuries since his death.

Class Format: lecture/discussion

Requirements/Evaluation: evaluation will be based on class participation, listening quizzes, two short papers, a midterm exam, and a final exam

Prerequisites: none

Enrollment Preferences: students with demonstrated interest in music

Expected Class Size: 15

Distributional Requirements: Division 1

Not Offered Academic Year 2017

LEC Instructor: Marjorie Hirsch

MUS 166 Beethoven

This course provides an introduction to the life and music of Ludwig van Beethoven. The composer's difficult childhood, tragic loss of hearing, and his struggles with his suicidal nephew Karl, together with the French Revolution and the emergence of Romanticism, will form the backdrop for our investigation of his artistic struggles and monumental achievements. Students will listen to a broad cross section of Beethoven's music, including piano sonatas, string quartets, symphonies, overtures, concertos, choral works, and opera. We will explore a range of topics, including the nature of his genius, his relation to composers such as Haydn and Mozart, and his impact on posterity.

Class Format: lecture/discussion

Requirements/Evaluation: listening quizzes, two papers, midterm and final exams, and class participation

Prerequisites: none

Enrollment Preferences: those with a demonstrated interest in music

Expected Class Size: 15

Distributional Requirements: Division 1

Not Offered Academic Year 2017

LEC Instructor: Joan Huguet

MUS 171 Music and Spirituality

Crosslistings: MUS 171/REL 171

Across cultures and across millennia, music has served to enable, inspire, and express the spiritual life experiences of communities and individuals. Why is this so? In what contexts and through what means can making and hearing music acquire a spiritual dimension? This course will take a topical approach to exploring music's spiritual power, considering such areas as the function of music in ritual practices from various cultures and times, the use of music to tell sacred stories, and the role of music created in the face of death and its aftermath. Our primary focus will be on music from Christian traditions from medieval to modern times, enriched by conversations with musicians immersed in the music of other world faith traditions. We will explore connections between music and spirituality through a wide variety of composers and styles, including plainchant and Renaissance sacred choral music; classics by Bach, Mozart, Beethoven, and Brahms; American hymnody and spirituals; Igor Stravinsky and Arvo Pärt; John Coltrane and Dave Brubeck; and selected artists from the world of contemporary popular music.

Class Format: lecture/discussion

Requirements/Evaluation: evaluation will be based on class participation, several brief writing assignments, a midterm paper, and a final project with presentation

Extra Info: may not be taken on a pass/fail basis

Prerequisites: none

Enrollment Preferences: students with a demonstrated interest in music or religion

Expected Class Size: 15

Distribution Notes: meets Division 1 requirement if registration is under MUS.

Distribution Notes: meets Division 1 requirement if registration is under REL

Distributional Requirements: Division 1

Not Offered Academic Year 2017

LEC Instructor: Jennifer Bloxam

MUS 172 Myth in Music (W)

Crosslistings: MUS 172/COMP 172

Orpheus, Prometheus, Faust, and Don Juan—these figures have captured the imagination of writers, artists, and composers throughout history. This course explores how prominent myths of western civilization have found expression in a broad variety of musical works, e.g., operas by Claudio Monteverdi, Wolfgang Amadeus Mozart, Jacques Offenbach, and Richard Wagner; songs by Franz Schubert, Hugo Wolf, Ricky Ian Gordon, and Adam Gueffel; ballets by Ludwig van Beethoven and Igor Stravinsky; symphonic poems by Franz Liszt, Richard Strauss and Alexander Scriabin; Broadway musicals by Richard Adler and Randy Newman; and mixed-media projects by Rinde Eckert. Our inquiry will lead us to ponder an array of questions: Why have certain myths proven especially appealing to composers? What accounts for these myths' musical longevity? How have myths been adapted to different musical genres and styles, and for what purposes? How do the works reflect the historical cultures in which they originated? How have they engaged with different social, political, artistic, and intellectual concerns?

Class Format: lecture/discussion

Requirements/Evaluation: evaluation will be based on class participation, three 6-8 page papers (with revisions), and a final presentation

Extra Info: may not be taken on a pass/fail basis

Prerequisites: none

Enrollment Preferences: students with a demonstrated interest in literature or music

Expected Class Size: 15

Distributional Requirements: Division 1

Not Offered Academic Year 2017

LEC Instructor: Marjorie Hirsch
MUS 173 Storytelling in Music

Many of the songs we hear on the radio derive their appeal, in part, from the interest of the narratives conveyed by their lyrics. Even without lyrics, however, music itself can compellingly depict characters, emotions, settings, or events in order to relate tales of love, tragic loss, conflict, heroism and victory, transcendence, comedy, adventure, and the exotic. This course explores the various musical ways of conveying such stories in both texted and untexted genres including the sixteenth-century madrigal; opera; the concerto and the symphony; nineteenth-century song cycles, solo piano works, and tone-poems; ballet and film scores; and jazz and rock 'n roll.

Class Format: lecture/discussion

Requirements/Evaluation: evaluation will be based on brief written assignments and a paper, a midterm and a final exam, and attendance and participation

Prerequisites: none

Enrollment Limit: 15

Expected Class Size: 15

Distributional Requirements: Division 1

Not Offered Academic Year 2017

LEC  Instructor: Marjorie Hirsch

MUS 174(S) The Singing Voice: Styles and Meaning

What makes an opera singer sound different than a rock singer? Why can't one convincingly sing in the style of the other? And why is the former granted a higher status and the latter a wider audience? This course examines the world of singing styles and engages these styles from multiple angles: through listening, readings, film viewing and, above all, through singing. The class will learn the basics of vocal technique, and how composers of the past among other styles and will explore the cultural and historical contexts of each.

Class Format: lecture/studio/discussion

Requirements/Evaluation: evaluation will be based on one quiz, two papers, and a final project

Prerequisites: none

Enrollment Preferences: juniors and seniors

Enrollment Limit: 20

Expected Class Size: 10

Distributional Requirements: Division 1

Spring 2017

LEC Section: 01 MR 02:35 PM 03:50 PM Instructor: Brad Wells

MUS 175(F) Sound Art, Public Music

Crosslistings: MUS 175/ARTS 273

Western music performance traditionally occurs within contained spaces in which “performer” and “audience” adhere to designated locations and follow tacit scripts: seats/stage; applause/bows, etc. In recent years, traditional boundaries and scripts of performance and reception have moved into public spaces—from sound art installations to ambient music, to interactive soundsculpture to radio art to social media driven flash mobs. This course studies the work of pioneers in public music and sound art including Alvin Lucier, Bill Fontana, John Cage, Trimpin, Brian Eno and Gregory Whitehead, among others. The course will alternate between study and analysis of particular artistic strategies and the creation of site-specific works on and around the Williams campus.

Class Format: seminar

Requirements/Evaluation: class participation, three short (2-4 page) essays, a response journal and the creation of four public music works

Prerequisites: none

Enrollment Preferences: juniors and seniors

Enrollment Limit: 10

Expected Class Size: 10

Distributional Requirements: Division 1

Fall 2016

SEM Section: 01 MR 02:35 PM 03:50 PM Instructor: Brad Wells

MUS 177(S) Gender and Sexuality in Music (D)

Crosslistings: MUS 177/WGSS 177

This course explores key themes in the expression of gender and sexuality through music. It draws from primarily 21st century examples, across cultures and genres, ranging from pop boy bands to Indian bhangra dance to the musical avant-garde. Themes will include: communicating gendered ideals, dance and embodiment, transgressive performances, biography, subjectivity, intersectionality, music and sexual violence, and marketing. We will explore the ways in which ideas and identities related to sex and gender are formulated and mobilized in music's performance and consumption. Inevitably, issues of sound and stagecraft intersect with factors such as race, age, and class further inform these experiences. Students will consider their own processes of identifying and interpreting expressions of gender and sexuality in sound and movement, and contemplate the role of culture and society in informing those interpretations. This course fulfills the EDI requirement, owing both to its comparative approach and its focus on issues of power and privilege.

Class Format: lecture/discussion

Requirements/Evaluation: class participation, two 4- to 6-page papers, Midterm paper, a Final paper/project

Extra Info: may not be taken on a pass/fail basis

Prerequisites: none

Enrollment Preferences: students with some musical experience

Enrollment Limit: 19

Expected Class Size: 15

Distribution Notes: meets Division 1 requirement if registration is under MUS, meets Division 2 requirement if registration is under WGSS

Distributional Requirements: Division 1

Expanding Diversity

Spring 2017

LEC Section: 01 MR 01:10 PM 02:25 PM Instructor: Corinna Campbell

MUS 1781(F) Music and Politics (W)

Crosslistings: MUS 178/PSCI 175

This course examines how musical sound and musical discourse change, enable, and inhibit citizen formation and the functioning of a well-ordered society. We will take a very wide definition of “politics,” as music can have political meaning and effects far beyond national anthems and propaganda. For instance, musical sound is often read as a metaphor for political structures: eighteenth-century commenters pointed out that string quartets mirrored reasoned, democratic discourse, and twentieth-century critics made similar arguments about free jazz. Beliefs about music can serve as a parameter for a society's non-musical anxieties: Viennese fin-de-siecle critics worried that the sounds and stories of Strauss's operas were causing moral decline, an argument that should be familiar to anyone who reads criticism of American popular music. Finally, a pervasive strand of Romantic thought holds that (good) music, by its nature, is apolitical—what might it mean to deny social relevance to an entire field of human expression? We will read classic philosophical texts on art and politics by Schiller, Kant, Schopenhauer, Marx, Adorno, and others, and pair them with contextual studies of works of Western classical music from the last two hundred years and popular music of the last hundred years.

Class Format: tutorial

Requirements/Evaluation: Students will be expected to write a 5-7 page paper every other week, and submit written commendations on their tutorial partner's paper in off weeks.

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: none

Enrollment Preferences: first-year students

Enrollment Limit: 10

Expected Class Size: 8

Distribution Notes: meets Division 1 requirement if registration is under MUS; meets Division 2 requirement if registration is under PSCI

Distributional Requirements: Division 1

Writing Intensive

Fall 2016

TUT Section: T1 TBA Instructor: Alicia Timberlake

MUS 201(F) Music Theory and Musicianship II

Music 201 continues to greater degrees the study of music techniques from the common practice period by means of analysis, composition, writing exercises, sight-singing, and dictation. We will expand our understanding of chromaticism. We will learn how chromaticism is used as a voice-leading tool, and how it participates in music even at deeper levels of the structure. We will learn about innovations that occurred from the early 19th century through the beginning of the 20th century and will trace the origins for these new harmonic tendencies. We will also learn how composers create larger formal structures.

Class Format: lecture meetings twice a week plus aural skills lab meetings

Requirements/Evaluation: final grading will be based on homework, theory quizzes, analysis papers, compositional projects/final project, class attendance, preparation, participation, and on the results of the lab portion of the class (sight singing and ear training)

Extra Info: may not be taken on a pass/fail basis

Prerequisites: MUS 104

Enrollment Preferences: Music majors and potential Music majors

Enrollment Limit: 12

Expected Class Size: 12

Distributional Requirements: Division 1

Fall 2016

MUS 220(F) African Dance and Percussion
Crosslistings: DANC 201/AFR 201/MUS 220
This course focuses on selected dance and music forms from the African continent for example, Kpanlogo from Ghana, Lamban from Guinea, Senegal and Mali or Bira from Zimbabwe. We will examine their origins (people, history and cultures) and influence beyond geographic perimeter to more fully understand the function of these forms in contemporary times. Students will study movement and percussion and are evaluated on the quality of progress

Spring 2017
LEC Section: T1 MR 01:10 PM 02:25 PM Instructor: Zachary Wadsworth

MUS 208 Arranging for Voices
What is gained—or lost—when music is arranged for voices? How does one create music that has something to say when using something already said? Arranging for Voices addresses these questions through study of arrangements and regular arranging projects. Students will work in multiple styles, making use of numerous compositional strategies and techniques. All student arrangements will be read and discussed in a seminar-type setting.
Class Format: lecture
Requirements/Evaluation: evaluation will be based on weekly assignments, midterm and a final, large-scale project
Prerequisites: MUS 103 and 104
Enrollment Preferences: Music majors
Enrollment Limit: 3
Expected Class Size: 4
Distributional Requirements: Division 1

Not Offered Academic Year 2017
LEC Instructor: Brad Wells

MUS 210(S) Music Technology I
Designed for students with some music background who wish to learn basic principles of Musical Technology and practical use of current software and hardware. Topics include acoustics, MIDI sequencing, digital recording and editing, sampling, analog and digital synthesis, digital signal processing, and instrument design. Lectures will provide technical explanations on those topics covered in class and an historical overview of electronic music.
Class Format: lecture
Requirements/Evaluation: evaluation will be based on weekly assignments, a midterm exam, a final paper and two composition projects
Extra Info: may not be taken on a pass/fail basis
Prerequisites: MUS 102 or 103, or permission of instructor; knowledge of and proficiency with musical notation is required; some background in acoustics/physics is desirable
Enrollment Preferences: Music majors and those planning to major
Enrollment Limit: 8
Expected Class Size: 8
Distributional Requirements: Division 1

Spring 2017

MUS 211(F) Music, Nationalism, and Popular Culture (D) (W)
This course surveys the manner, function, and contexts through which sound and ideas of national belonging are linked. We will consider influential and iconic musicians (Umm Kalthoum, Amalia Rodriguez, Bob Marley, Carlos Gardel, Joao Gilberto, Youssou N'Dour), international forums for the expression of national sentiment (the Olympics, Miss Universe and Eurovision competitions), and a wide range of instruments, genres, and anthems that are strong conduits for national sentiment. Drawing on the work of critical theorists including Benedict Anderson, Michael Herzfeld, and Ernest Gellner, we will pursue a number of analytical questions: What parallels exist between musical and political structure? How do nations adjust as their policies and demographics change? How are cultural forms implicated in postcolonial nation building projects? What marginal populations or expressive forms are included, excluded, or appropriated in the formation of national identity? Finally, what differences emerge as we change our focus from a national to an international perspective, or from officially endorsed representations of national culture to unofficial popular forms of entertainment? Owing to its global focus and attention to power and privilege in political and musical structures, this course meets the EDI requirement.
Class Format: lecture/discussion
Requirements/Evaluation: class participation, two 4- to 6-page papers, Midterm paper, a Final Paper/Project
Prerequisites: none
Enrollment Preferences: upperclass students and Music majors
Enrollment Limit: 15
Expected Class Size: 12
Dept. Notes: MUS World Music/Ethnomusicology

LEC Section: 01 TR 09:55 AM 11:10 AM Instructor: Corinna Campbell

MUS 220(F) African Dance and Percussion
Crosslistings: DANC 201/AFR 201/MUS 220
This course focuses on selected dance and music forms from the African continent for example, Kpanlogo from Ghana, Lamban from Guinea, Senegal and Mali or Bira from Zimbabwe. We will examine their origins (people, history and cultures) and influence beyond geographic perimeter to more fully understand the function of these forms in contemporary times. Students will study movement and percussion and are evaluated on the quality of progress

Fall 2016
MUS 221 African Dance and Percussion
Crosslistings: DANC 202/AFR 206/MUS 221
Course continues the investigation of selected music and dance from the African continent. Advancing dance and music skills, deepening understanding of history and context of the material are focus of readings, discussions and projects throughout the semester. Questions we will address include the impact of religion, colonialism, travel, immigration, media tradition and the continued emergence of new forms. Material may include Gum Boots (Isicathulo) from Southern Africa, Juju in Nigeria or Hip Hop in several nations. This course can be taken for academic and/or PE credit.

Class Format: studio/lecture/discussion
Requirements/Evaluation: participation in assignments that include research and performance projects and a short paper; students enrolled for PE credit only are not required to do short paper or research assignments; all students must participate in all performance projects.
Prerequisites: none
Enrollment Preferences: students who have taken Dance 100 or advanced placement.
Enrollment Limit: 25
Expected Class Size: 20
Dept. Notes: MUS World Music/Ethnomusicology
Distribution Notes: meets Division 1 requirement if registration is under DANC or MUS; meets Division 2 requirement if registration is under AFR

MUS 222 Politics of Performance/Performing Politics in Contemporary Africa (D) (W)
Crosslistings: MUS 222/AFR 223
Using selected examples from throughout Africa, this course highlights genres, artists, and works that engage with social and ideological change. Students practice critical listening and performance analysis, while also considering the social contexts that render these performances meaningful and provocative. Topics include: challenges to mass mediated stereotypes of African populations, the social and economic impact of cultural tourism, music as a form of social criticism, changing attitudes toward women and the LGBTQ community, music and global aid organizations, issues of migration and displacement, and the changing roles of traditional musical occupations. Popular genres—among them Afrobeat, kwato, soukous, rai, mbalax, Chimurenga music, and a variety of rap and hip-hop styles—are discussed based on in-class preparation and participation, multimedia project, midterm paper, intermittent short assignments, final exam
Prerequisites: none
Enrollment Preferences: Music majors and African Studies or Latino/o Studies concentrators

MUS 226 Introduction to the Music of Brazil
A course designed to acquaint students with an overview of the history and development of the music of Brazil, from African and colonial antecedents to the present. Students will examine characteristics of West African music brought to Brazil as a part of the Portuguese colonization, as well as how these musical elements and influences congemined with those of the European immigrant population to create a variety of distinctly national musical styles, including Balucada, Choro, Frevo, Samba, Bossa Nova, and MPB (música popular brasileira), among others. Composers and musicians whose work will be studied will include Alfredo da Rocha Viana Sr., Plixinguinha (Alfredo da Rocha Viana Jr.), Noel Rosa, Luiz Gonzaga(Gonzagão), Heitor Villa Lobos,C. Jobim, Gilberto Gil, Milton Nascimento, Hermeto Pascoal, Egberto Gismonti, Mario Adnet, among others. Musical literacy sufficient to engage in score study and formal analysis is required.
Class Format: lecture - weekly lecture format with assigned readings and listening exercises
Requirements/Evaluation: midterm and final exams as well as two 10-page research papers
Extra Info: may not be taken on a pass/fail basis
Prerequisites: MUS 104A or b
Enrollment Preferences: Music majors and Jazz Ensemble members
Enrollment Limit: 19

MUS 230 Musical Ethnography (D)
Crosslistings: MUS 230/ANTH 230
Often, we experience music’s impact on us without fully considering why it achieves such strong effects. The purpose of this course is to investigate the question of musical meaning by combining musical study and analysis with an exploration into the contexts of musical production, circulation, and reception. Musical ethnography is both the means by which scholars pursue this line of questioning, and also the (usually) written work that results from such an investigation. This course features a hands-on approach to musical ethnography. Students will each conduct ethnographic fieldwork in a music-
making community within Williamstown and the surrounding area.
Coursework will survey approaches to methodology (modes and degrees of researcher involvement, practical skills related to documentation), issues of ethics, and social and musical analysis.
This course fulfills the EDI requirement, with particular emphasis on empathetic understanding.
Please note: This course requires students to devote regular time outside of class to the study of a musical community.

Class Format: lecture/discussion

Requirements/Evaluation: class participation, small assignments (four 1-2 page assignments), interview transcript with commentary, reading response, final project and presentation.

Extra Info: may not be taken on a pass/fail basis
Prerequisites: some musical training/experience necessary, see instructor for more information

Enrollment Preferences: some with some musical experience
Enrollment Limit: 10

MUS 231(F) Music in History I: Antiquity-1750
This course explores 1000 years of music-making in Western European culture, beginning with the philosophical and theoretical origins of that music in ancient Greece and extending to the life and music of J.S. Bach. Topics covered will include how the sound of music changed over a millennium; the different functions it served and how genres developed to serve these functions; the lives of the men and women who composed, performed, and wrote about music; and how the changing notation and theory of music related to its practice over the centuries. At the same time, the course provides an introduction to the modern study of music history, sampling a broad range of recent scholarship reflecting an array of critical approaches to the study of early music in our own day.

Class Format: lecture/discussion, two meetings per week; field trip may be required

Requirements/Evaluation: evaluation will be based on class participation, written assignments, midterm and final exams

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: ability to read music; open to qualified non-majors with the permission of instructor

Enrollment Preferences: Music majors and those planning to major

MUS 254 Charlie Parker and the (Re)vention of Modern Jazz
In the 1940s, Jazz turned a corner, transitioning from the functional and popular music of the swing era to the increasingly complex art music known as bebop. The practitioners of this new sub-genre were seen not as showmen or entertainers, but (in the words of poet Ralph Ellison) as “frozen faced introverts, dedicated to chaos.” This class will survey the life and music of that decade’s most pivotal figure, the brilliant alto saxophonist Charlie “Yardbird” Parker (1920-1955). The ubiquitous graffiti slogan “Bird Lives” that heralded his almost mythical afterlife rings true today, as his influence remains undiminished in recent decades his music has become a cornerstone of jazz pedagogy, and increasingly is considered to represent more of an evolution than a revolution in jazz history. We will focus on Parker’s musical development, with a particular emphasis on his study and musical apprenticeships with some of the major soloists of the swing era. Through score study, guided listening and composition assignments, the class will examine and practice applications of Parker’s melodic, harmonic and rhythmic innovations. We will evaluate, compare and contrast examples of contemporary theoretical scholarship concerning his improvisational vocabulary. Parker’s broader cultural significance and the intersections between his music and parallel artistic, social and political movements will also be addressed. While our focus will be on Charlie Parker, the class will also discuss the contributions made to modern jazz by his most prominent collaborators, including Dizzy Gillespie, Thelonious Monk, and Bud Powell. Additionally, we will consider his influence on subsequent generations of musicians by investigating personal anecdotes as well as the work of several “first generation disciples,” such as Cannonball Adderley, Jackie McLean and Ornette Coleman. The class will culminate in a final multimedia project in which the students will explore Parker’s musical influence on contemporary jazz musicians.

Class Format: lecture/discussion
Requirements/Evaluation: weekly reading, listening and musical repertoire learning assignments, class participation including written responses to discussion prompts; brief transcription and/or composition assignments
Extra Info: final multimedia interview project and presentation
Prerequisites: musical literacy sufficient to deal with material (W) suggested and/or permission of instructor

MUS 261 The Saint and the Countess: Lost Voices of Medieval Women (W)
Crosslistings: MUS 261/WGSS 261
Very few female voices from the Middle Ages are audible today; most of the music, poetry, and other writings that survives reveals the creativity and expressiveness of men. This course will explore the experiences and viewpoints of medieval women through the lens of the poetry and songs of two exceptional 12th-century figures: the German abess Hildegard of Bingen, whose long and immensely productive life was shaped by the requirements of monastic culture, and the French Countess of Die in Provence, whose creative life and works exemplify the dynamics of aristocratic court culture. We will ask how these and other musical women active in both the sacred and the secular spheres (such as the nun Birgitta of Sweden, and Queen Blanche of Castile) negotiated their places and made their voices heard within the patriarchal society of their time. We will examine the ways in which these contrasting environments informed the different outlooks, ideas, and aesthetics expressed in the words and music of their songs. Along the way we will critically assess how these lost voices have been recreated to speak to us today through recordings and film.

Class Format: seminar
Requirements/Evaluation: evaluation based on several short papers and presentations, and a final project and presentation
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

MUS 252(F) Introduction to the Music of John Coltrane
Crosslistings: MUS 252/AFR 242
This course offers the serious music student an opportunity to study the unique body of work produced by saxophonist and composer John Coltrane (1926-1967). The course traces the evolution of Coltrane’s compositional and performance styles in the context of the musical and cultural environment in which they developed. Emphasis placed on Coltrane’s musical style, representing a unique synthesis of influences, including jazz, world, and European Classical music and spirituality. Substantial reading assignments, including a biography and related criticism, as well as detailed score analysis and study, are required.

Class Format: lecture
Requirements/Evaluation: evaluation based on in-class participation and preparation, quizzes on assigned readings, midterm, final examinations and a final paper

MUS 251 Introduction to the Music of Duke Ellington
Crosslistings: MUS 251/AFR 240
This course will survey the career and compositional style of Edward Kennedy (Duke) Ellington (1899-1974). Students will learn to listen to and analyze music from throughout Ellington’s five-decade career as a bandleader, composer, arranger, and writer. Particular emphasis will be placed on development of aural analysis skills, in terms of form, style, orchestration, and the ability to identify the individual sounds of key Ellingtonian soloists. Ellington’s importance as a key figure in American cultural history, and relationships between his music and parallel stylistic developments and influences from both within and outside of the jazz tradition will be discussed.

Class Format: lecture
Requirements/Evaluation: weekly listening and reading assignments, one biographical paper examining the career of an Ellingtonian, as well as participation in a group presentation to the class of one of Ellington’s extended works; midterm and final exams will also be given
Extra Info: may be taken on a pass/fail basis
Prerequisites: ability to read music notation

LEC Instructor: Andrew Jaffe

MUS 247(T)(S) Music for Theater Production
Crosslistings: MUS 247/THEA 247
Music written to accompany or to “point up” the action or mood of a dramatic performance on stage can be traced to Ancient Theater. Are the labels of incidental and background music appropriate or patronizing for this genre? What is the difference between the composition of “incidental music” and sound designing? How does creating music to accompany a play differ from writing concert music or music for film, ballet, opera, or musical theater? What makes for effective incidental music? How does the music interact with the spoken drama? Students will discuss music composed for selected plays and will attempt to compose music for a scene of a play drawing upon pre-existing works or creating their own. Format: tutorial. During the first and last weeks of the semester, students will attend two group classes. In the other weeks, students will meet with the instructor in pairs for a one-hour session. Students will write and present a 5- to 6-page paper every other week and a 1- to 2-page response to their partner’s paper in the alternate weeks.

Class Format: tutorial
Requirements/Evaluation: evaluation will be based on five papers/presentations, and five responses
Extra Info: not available for the fifth course option
Prerequisites: ability to read music and permission of the instructor
Enrollment Preferences: Music and Theater Majors
Enrollment Limit: 16
Expected Class Size: 16

MUS 267T Verdi and Wagner (W)

Born in the same year (1813), Giuseppe Verdi and Richard Wagner stand as the two central figures of nineteenth-century European opera. Their divergent approaches to the genre provoked heated debate that continues today. Both composers not only transformed the operatic forms they inherited, but they also had a significant impact on the cultural and political histories of their emerging nations. Throughout the semester we will juxtapose major works by these composers in order to investigate such topics as opera's relationship to its literary sources; the staging and production of opera; intersections between opera and film; connections between opera and political context; and biographical influences on the creation of opera. Our final meeting will be devoted to the broader operatic and cultural legacies of these two composers. Focusing on one opera per week, we will study Verdi's Nabucco, Il trovatore, La traviata, Aida, Otello, and Falstaff, and on Wagner's Tannhäuser, Lohengrin, Die Walküre, Tristan und Isolde, Die Meistersinger von Nürnberg, and Parsifal. When possible, this tutorial will include field trips to live performances and/or live HD broadcasts of these operas.

Class Format: tutorial
Requirements/Evaluation: evaluation will be based on five 5- to 6-page essays and on the quality of the student's critical engagement with the work of his/her tutorial partner
Extra Info: may not be taken on a pass/fail basis, not available for the fifth course option
Prerequisites: previous related course work and/or musical experience is desirable, but is not required; open to all students
Enrollment Preferences: sophomores, juniors, and seniors

TUT Instructor: W. Anthony Sheppard

MUS 272T Music and Meaning (W)

Nearly everyone finds music meaningful, but what exactly does it mean? Without the help of words, this largely non-referential art presents special challenges to interpretation. While most would agree that musical sounds can do such things as mimic the rumbling of thunder, evoke the countryside, suggest the act of chasing, or express rage, the capacity of music to convey meaning remains controversial among scholars, composers, performers, and listeners. Some, following music critic Eduard Hanslick, assert that musical works are essentially "tonally moving forms"—patterns of sound with no reference to the external world, whereas others maintain that music is a form of communication using the principles of musical elements. Others counter that music can signify aspects of human experience, its sounds and structures not merely referring to the outside world but even relating complex narratives. Certain writers have argued that, without the assistance of language, what music signifies remains vague, while others insist that the meaning of music is actually more precise than that of words. In this tutorial course, we will explore a range of questions regarding musical meaning. How can combinations of pitches, rhythms, and instrumental timbres signify something beyond themselves? Is the subject of musical meaning more relevant to some historical styles or genres than others? How can we glean the meaning(s) of a work? Should we concentrate on formal processes within the music? Consider socially constructed meanings? Seek the composer’s intentions? Should we look for some interpretations more convincing than others? In grappling with these questions, students will engage with writings by Agawu, Cone, Hanslick, Kramer, Langer, Lewin, Newcomb, and Schopenhauer, among others. Music to be studied includes works by Beethoven, Schubert, Chopin, Brahms, Mahler, Tchaikovsky, Ravel, Stravinsky, Glass, and Adams.

Class Format: tutorial; during the first and last weeks of the semester, students will attend two group classes; in the other weeks, students will meet with the instructor in pairs for a one-hour session at a mutually convenient time
Requirements/Evaluation: students will write and present a 5- to 6-page paper every other week and a 1-2 page response to their partner's paper in the alternate weeks; evaluation will be based on five papers/presentations, and five responses

MUS 273T Dangerous Music (W)

As a largely non-referential art whose meanings are far from transparent, music might seem to pose little danger. How could mere sounds represent a threat? Yet precisely because its meanings can be obscure, enabling it to achieve its ends surreptitiously, music has intertwined with danger throughout history. With its power to stir the emotions, stimulate bodily movement, encode messages, and foment rebellion, music has often been perceived as an agent of harm. Plato claimed that too much music could make a man effeminate or neurotic, and warned that certain musical modes, melodies, and rhythms promote licentious behavior and anarchic societies. Puntins, Victorians, and Totalitarians, as well as opponents of ragtime, rock 'n roll, and rap, have also accused certain musical genres or styles of exerting dangerous influences, and sought to limit or suppress them. In Afghanistan, the Taliban banned music altogether. While music has often been unfairly accused, its potential for playing a dangerous role in actual danger is undeniable. Works that are played at ear-splitting decibel levels, that call upon performers to injure themselves, that are used as a form of psychological torture, or that incite violence demand reconsideration of the widely shared view that music is fundamentally a form of entertainment.

Class Format: tutorial
Requirements/Evaluation: evaluation will be based on participation, several short papers and quizzes, a final project

MUS 278T Carmen, 1845 to Now (D) (W)

Crosslistings: MUS 278WGSS 248

The story of the gypsy femme fatale Carmen has endured for over 150 years. In Western culture she exemplifies the seductive, exotic, independent, and formidable woman who drives an upstanding man to a life of crime and finally murder. This course explores a broad array of treatments of this archetypal narrative, starting with Prosper Mérimée’s 1845 novella on which Bizet based his beloved 1875 opera Carmen. We will consider various staged and film versions of the opera itself, including François Truffaut’s 1972 film version and Robert Rafelson’s Five Easy Pieces from 1970, and Jane Campion’s The Piano from 1993.

Class Format: lecture/discussion, two meetings per week

MUS 279T American Pop Orientalism (D) (W)

This tutorial will investigate the representation of Asians and Asian Americans in American popular culture since the late nineteenth century. Our focus will be on music’s role in Orientalist representation in a wide variety of media, including Hollywood film, television, popular song, Broadway musicals, and novels. We will begin with major texts in cultural theory (Said, Bhabha) and will attempt throughout the semester to revise and refine their tenets. Can American Orientalism be distinguished in any fundamental way from nineteenth-century European imperialist thought? How does Orientalist representation calibrate when the “exotic others” being represented are themselves Americans? Our own critical thought will be sharpened through analysis and interpretation of specific works, such as Madame Butterfly, "Chinatown, My Chinatown,” The King and I, Sayonara, Flower Drum Song, Miss Saigon, Rising Sun, My Butterfly, Alex, and Weezer’s Pinkerton. We will end the semester by considering the current state of Orientalism in American popular culture.

This course satisfies the EDI requirement by considering diversity in relation to the representation of specific minority groups within American popular culture and the attempts by members of those minority groups to participate in mainstream culture. We will also engage with critical theories offered by scholars for understanding the dynamics of these representations and this cultural participation.

Class Format: tutorial
Requirements/Evaluation: evaluation will be based on five 5- to 6-page essays and on the quality of the student’s critical engagement with the work of his/her colleagues

Extra Info: may not be taken on a pass/fail basis, not available for the fifth course option

Prerequisites: previous related coursework and/or musical experience is desirable, but is not required

Enrollment Preferences: sophomores and juniors

Enrollment Limit: 10

Expected Class Size: 10

Distributional Requirements:
Division 1
Exploring Diversity
Writing Intensive

Other Attributes:
AMST Arts in Context Electives

Not Offered Academic Year 2017

TUT  Instructor: W. Anthony Sheppard

MUS 281-288(F,S) Individual Vocal and Instrumental Instruction

Individual vocal or instrumental lessons offered as a partial credit fifth course. Students are encouraged to take this course for a letter grade, but pass/fail is also an option. (Note: partial credit music lessons taken pass-fail do not count as one of the three pass-fail options available to students for regular semester courses.) Students are required to prepare for 10 lessons during the semester with a minimum expectation of one hour practice per day and to perform publicly on at least one departmental studio recital during the semester.

Lessons are scheduled TBA based upon instructor schedule. Make-up lessons given at the discretion of the instructor. Grading will be based upon lesson preparation, public performance, and progress throughout the semester. Courses in individual vocal or instrumental instruction are fully subsidized for all students who meet the 10 lesson commitment.

To register for the course, the student must first contact the appropriate teacher (see Music Dept. for list), and then fill out a registration/billing contract to be signed by both teacher and student. See contract for instructions. There is no online registration. Registration is for course number 281, with the appropriate section number from the following list. Students will be reassigned to course numbers 281-288 based on the number of semesters of instruction already taken in one particular section.

Specific instrument or voice sections are as follows: 01 Bassoon, 02 Cello, 03 Clarinet, 04 Bass, 05 Flute, 06 Guitar, 07 Harpsichord, 08 Horn, 09 Jazz Piano, 10 Oboe, 11 Organ, 12 Percussion, 13 Piano, 14 Classical Saxophone, 15 Trumpet, 16 Viola, 17 Violin, 18 Voice, 19 Jazz Bass, 20 Jazz Vocal, 21 Trombone, 22 Harp, 23 Jazz Drum, 24 Jazz Saxophone, 25 Jazz Trumpet, 26 African Drumming, 27 Jazz Guitar, 30 Mibra, 31 Vocal/Songwriting, 32 Jazz Trombone 33 Sitar, 34 Tabla, 35 Erhu, 36 Yangqin, 37 Zheng, 38 Liqin/Pipa, 39 Zhonghu bone, 33 Sitar, 34 Tabla, 35 Erhu, 36 Yangqin, 37 Zheng, 38 Liqin/Pipa, 39 Zhonghu

Prerequisites: permission of the individual instructor; enrollment limits apply to distributional requirements based upon studio space and student qualifications

Distributional Requirements: Non-distribution

Fall 2016

LSN Section: 01  TBA  Instructor: Marjorie Hirsch

Spring 2017

LSN Section: 01  TBA  Instructor: Marjorie Hirsch

MUS 291-298(F,S) Chamber Music Workshop

Classical and Jazz Chamber Music and other small departmental ensembles (including Chamber Choir, Percussion Ensemble, Chinese Music Ensemble, and Brass Ensemble) coached by faculty on a weekly basis culminating in a performance. Offered as a partial credit fifth course. Students are encouraged to take this course for a letter grade, but as with all fifth courses, pass/fail is also an option. Students in ad hoc groups organized each semester by the director of the chamber music or jazz programs are required to prepare for 10 one-hour coaching session during the semester. It is recommended that each group rehearse a minimum of 2 hours each week in preparation of the coaching. Each ensemble is responsible for keeping a weekly log of rehearsal times and attendance. The logs are to be handed in to the coach at the end of the semester. In addition students are expected to practice the assigned music individually and be required to perform on the Classical or Jazz Chamber Music concert at the end of the semester. The ensembles will be organized based on skill levels and the instruments represented. For students in choose departmental small ensembles, students are expected to practice the assigned music individually and keep a log of their practices, attend all rehearsals, and participate in all concerts presented during the semester.

To register for the course, a student must contact the Chamber Music Performance Coordinator. Registration is for course number 291 to be signed by the Coordinator, the coach, and the student.

Class Format: partial credit fifth course

Requirements/Evaluation: evaluation based on preparation for weekly coaching

Extra Info: registration is through the music department

Prerequisites: permission of the Chamber Music Staff; enrollment limits will depend upon instructor availability

Enrollment Preferences: more advanced students, to be determined by audition as necessary

Enrollment Limit: 12

Dept. Notes: students should register for 291 for their first semester enrolled in this course. The number of students in each course would be limited to the numbers 292-298 for subsequent semesters

Distributional Requirements: Non-distribution

Spring 2017

LSN Section: 01  TBA  Instructor: Marjorie Hirsch

MUS 301(F) Modal Counterpoint

Counterpoint, the study of the ways independent melodic lines can be joined in music, has been essential to musical and compositional instruction for centuries. Counterpoint was taught by Mozart, studied by Beethoven, and to this day remains an integral part of compositional training. The course will introduce students to species counterpoint in two and three voices—exercises that develop discipline in polyphonic writing. The exercises will focus on the constraints of sixteenth-century vocal polyphony (music ofPalestrina and Lassus) but will illustrate how such contrapuntal discipline is also manifest in music of Corelli, Bach, Brahms and Debussy. The species exercises will lead to a final composition project, such as the emulation trio sonata in seventeenth-century style.

Class Format: lecture

Requirements/Evaluation: evaluation will be based on written exercises and emulation projects

Extra Info: may not be taken on a pass/fail basis

Prerequisites: MUS 103 or permission of instructor

Enrollment Preferences: Music majors and those with previous music theory training

Enrollment Limit: 19

Expected Class Size: 12

Distributional Requirements: Division 1

Fall 2016

LEC Section: 01  MWF 09:00 AM 09:50 AM  Instructor: Ed Gollin

MUS 305T Jazz Ear Training Tutorial

This tutorial is designed for jazz performers, composers and arrangers who have taken Music 212 or 104b and who seek further work in the area of aural training. The focus of the tutorial will be on the development of advanced aural skills specific to the disciplines of jazz performance and arranging/composition. Its format will involve two weekly meetings. In the first, tutorial pairs will meet individually with the instructor to present transcriptions of approved improvised solos, which will be thoroughly notated and performed by the students. A critique of both the performance and notation of these transcription projects will be offered by the partnered students for one another, as well as by the instructor, with revisions and corrections incorporated into an edited performance for the entire class the following week. In the other weekly meeting, all of the tutorial pairs will meet jointly with the instructor in order to do group assignments involving sight-singing (both rhythmic and melodic), and advanced harmonic and melodic dictation. During these sessions the instructor will offer a critique of the past week’s performance, based on the following criteria: 1) notational technique, 2) observations relating to performance practice, 3) how such factors contributed to the evolution of the given soloists’ style, and, 4) historical significance of the given performance and its relationship to the overall evolution of the given performer’s personal voice.

Class Format: tutorial

Requirements/Evaluation: evaluation based on assessment of weekly assignments as described above
MUS 307(F,S) Composition III
Advanced individual instruction in composition. Projects will be initiated largely by the students with guidance from the instructor. This course is responsible for arranging performance of his/her own work.

Student may enroll for up to four semesters by taking these courses in sequence, with the lower numbered course being the prerequisite for the next higher numbered course. May not be taken in conjunction with Music 493 or 494, the honors courses in composition.

Prerequisites: MUS 205T, 206T and permission of instructor; 2 students per instructor for both courses (MUS 307, 308)
Distributional Requirements: Division 1

MUS 308(F,S) Composition IV
Advanced individual instruction in composition. Projects will be initiated largely by the students with guidance from the instructor. This course is responsible for arranging performance of his/her own work.

Student may enroll for up to four semesters by taking these courses in sequence, with the lower numbered course being the prerequisite for the next higher numbered course. May not be taken in conjunction with Music 493 or 494, the honors courses in composition.

Prerequisites: MUS 205T, 206T and permission of instructor; 2 students per instructor for both courses (MUS 307, 308)
Distributional Requirements: Division 1

MUS 309 Jazz Arranging and Composition
This is a course designed to acquaint the student with the basic principles of composing and arranging for Jazz Ensemble, beginning with the quintet and progressing through the big band. Intensive score study and some transcription from selected recordings required. Evaluation will be based on the successful completion, rehearsal and performance of original arrangements and/or compositions during the semester, to include at least one transcription of a recorded arrangement, one quintet or sextet arrangement, and one arrangement for big band. Performances by the Jazz Ensembles, as rehearsed and prepared by the students of this course, are also expected. Students must attend small ensemble rehearsals when work is being rehearsed, and end of semester small ensemble recital when their work is performed.

Class Format: weekly lecture and targeted ensemble rehearsals generally last 2 hours total; additional individual tutorial style meetings are generally an hour a week, more frequently and for longer amounts of time as needed
Requirements/Evaluation: project based; students must participate in small ensemble rehearsals as necessary
Prerequisites: MUS 104B and permission of the instructor
Enrollment Preferences: Music Majors and Jazz Ensemble members
Enrollment Limit: 10
Expected Class Size: 3-5
Distributional Requirements: Division 1

MUS 310T Music Analysis: Music with Text (W)
The course explores the ways in which musical structure interacts with, can comment upon, and can influence one’s reading of a text set to music, and similarly, how texts set to music can exert influence upon and guide one’s understanding of the musical structure. Using scenes from Mozart operas and selected songs of the 19th and 20th centuries (by Schubert, Schumann, Brahms and Schoenberg), the course will examine the bearing specific aspects of a text (voice, person, time, alliteration, meter, and so forth) have upon the musical domain, and conversely, how musical structures have the ability to project or allegorize actions in the text. We will observe the often amazing ways composers of texted music use the tonal system to create musical desires—desires that may be fulfilled, withheld, delayed, redirected, and so forth, in ways that enhance, or enact the desires of characters in a drama or poem. In addition to the specific issues involving texted and dramatic works, the course will introduce the basic techniques and insights of linear analysis—one of the most profound developments in tonal analysis during the last century. Analysis assignments, based on the student’s close study of texted musical works, will offer the opportunity to apply these techniques. The course will also confront the difficult issue of writing about music and will help students define and clearly express ideas about music.
Class Format: tutorial; students will attend one weekly group lecture and one weekly tutorial
Requirements/Evaluation: evaluation will be based on five analysis essays/presentations and five critiques of another student’s analyses
Extra Info: may not be taken on a pass/fail basis, not available for the fifth course option
Prerequisites: MUS 104
MUS 381 Choral Conducting

Choral conducting techniques will be developed through exercises and projects that encompass the many facets of this activity. Using the class as the primary practice choir, students will focus on conducting patterns applied to elements of interpretation, keyboard and vocal skills, issues of tuning and blend, rehearsal techniques, score study, and style and repertoire. Regular videotaping of conducting sessions will provide opportunities for students to study themselves. Repertoire will include a broad survey of works from the early Renaissance to early 21st century, accompanied and a cappella, and issues of conducting ensembles at various skill levels will be addressed.

Class Format: seminar/coaching sessions
Requirements/Evaluation: evaluation will be based on regular conducting assignments and final projects
Prerequisites: MUS 103 and 104
Enrollment Preferences: upperclass students
Enrollment Limit: 6
Expected Class Size: 4
Distributional Requirements: Division 1

MUS 382(F) Orchestral Conducting

This course will introduce and develop a broad range of subjects associated with conducting, including: leadership, rehearsal techniques, physical and aural skills, interpretation, performance practices, and programming. Related areas to be discussed include: balance, intonation, rhythm, articulation, bowings, and complex meters. Weekly conducting and score reading assignments will form the core of the workload. Larger projects may include conducting existing instrumental ensembles, and along with score reading, will be the basis of the midterm and final exams. This course includes instrument demos, conducting videos and a trip to audit a private Boston Symphony rehearsal at Symphony Hall in Boston.

Class Format: seminar/lab
Requirements/Evaluation: evaluation will be based on class participation, irregular conducting assignments, midterm and final projects
Prerequisites: membership in a Music Department ensemble preferred, permission of instructor
Enrollment Preferences: Music department ensemble members/upperclass students
Enrollment Limit: 6
Expected Class Size: 2-4
Distributional Requirements: Division 1

MUS 391(F,S) Advanced Musical Performance

Individual instruction in instrumental and vocal lessons offered at the advanced level as a regular full credit course. Additional guidelines for full credit lessons can be obtained at the Music Department office. Full credit lessons must be approved by the entire music faculty and an audition may be required. Courses in individual vocal or instrumental instruction are fully subsidized for all students who meet the 12 lesson commitment.

Class Format: individual instruction
Class Format: individual instruction
Extra Info: MUS 391, 392, 491, 492 should be used for four sequence courses in the same instrument; if a different instrument is elected, the numbering sequence should start again at 391; numbers are selected without regard to semester taken or class year of student
Prerequisites: completed application, registration and instructor recommendation must be submitted by the instructor by 4pm on the day prior to the first day of classes
Enrollment Preferences: intended for music majors; students must obtain the application and registration forms from the Music Department Office
Dept. Notes: music majors may register for a total of four semesters, non-majors may register for two semesters: the specific name of the project elected is to be specified after the title "Music Performance Studies"
Distributional Requirements: Division 1

MUS 392(F,S) Advanced Musical Performance

Individual instruction in instrumental and vocal lessons offered at the advanced level as a regular full credit course. Additional guidelines for full credit lessons must be approved by the entire music faculty and an audition may be required. Courses in individual vocal or instrumental instruction are fully subsidized for all students who meet the 12 lesson commitment.

Class Format: individual instruction
Extra Info: MUS 391, 392, 491, 492 must be taken as a graded course and it is strongly recommended that it be taken only as part of a four-course load; the numbers 391, 392, 491, 492 should be used for four sequence courses in the same instrument; if a different instrument is elected, the numbering sequence should start again at 391; numbers are selected without regard to semester taken or class year of student
Prerequisites: completed application, registration and instructor recommendation must be submitted by the instructor by 4pm on the day prior to the first day of classes
Enrollment Preferences: intended for music majors; students must obtain the application and registration forms from the Music Department Office
Dept. Notes: music majors may register for a total of four semesters, non-majors may register for two semesters: the specific name of the project elected is to be specified after the title "Music Performance Studies"
Distributional Requirements: Division 1

MUS 394(S) Junior Thesis: Music

This course involves independent study in history, theory of music or ethnomusicology, under the supervision of a member of the department, as preparation for the senior thesis.

Class Format: independent study
Extra Info: may not be taken on a pass/fail basis
Prerequisites: permission of department
Distributional Requirements: Division 1

MUS 472 Bach's Legacy (W)

This seminar, the culminating course in the music major, examines how composers used his music. We will explore the pertinence of Harold Bloom's theory of the venerated in the later Romantic era by Brahms and Busoni. Our main focus, however, will be on how composers of the modern era have viewed him and used his music. We will explore the pertinence of Harold Bloom's Theory of the "anxiety of influence" for understanding the ways in which contemporary classical composers ranging from Schoenberg and Webern through Peter Maxwell Davies and George Crumb engage Bach's music, and consider both
the musical techniques and meanings of reworkings and quotations of Bach's music in jazz and popular styles.

**Class Format:** seminar

**Requirements/Evaluation:** evaluation will be based on several papers totaling at least 20 pages, presentations, and class participation

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**Prerequisites:** MUS 103-104, and two from MUS 231, 232, or 233 (or equivalents). MUS 201-202 and MUS 231and/or 233 highly recommended

**Enrollment Preferences:** senior Music majors

**Enrollment Limit:** 12

**Expected Class Size:** 8

**Distributional Requirements:**

- **Division 1 Writing Intensive**

**MUS 491(F,S) Advanced Musical Performance**

Individual instruction in instrumental and vocal lessons offered at the advanced level as a regular full credit course. Additional guidelines for full credit lessons must be obtained at the Music Department office. Full credit lessons must be approved by the entire music faculty and an audition may be required. Courses in individual vocal or instrumental instruction are fully subsidized for all students who meet the 12 lesson commitment.

**Class Format:** individual instruction

**Extra Info:** MUS 391, 392, 491, 492 must be taken as a graded course and it is strongly recommended that it be taken only as part of a four-course load; the numbers 391, 392, 491, 492 should be used for four sequence courses in the same instrument; if a different instrument is elected, the numbering sequence should start again at 391; numbers are selected without regard to semester taken or class year of student

**Prerequisites:** completed application, registration and instructor recommendation must be submitted by the instructor by 4pm on the day prior to the first day of classes

**Enrollment Preferences:** intended primarily for music majors; students must obtain the application and registration forms from the Music Department Office

**Dept. Notes:** music majors may register for a total of four semesters, non-majors may register for two semesters; the specific name of the project elected is to be specified after the title “Music Performance Studies”

**Distributional Requirements:**

- **Division 1**

**Fall 2016**

- IND Section: 01 TBA Instructor: Marjorie Hirsch

**Spring 2017**

**Chair:** Professor HEATHER WILLIAMS

**Advisory Committee:** Professors: N. SANDSTROM*, H. WILLIAMS, B. ZIMMERBERG. Assistant Professors: M. CARTER, T. LEBESTKY. Visiting Assistant Professor: L. WILLIAMSON. Affiliated Faculty: A. HANE. Lecturer: M. MARVIN.

Neuroscience is a rapidly growing interdisciplinary field concerned with understanding the relationship between brain, mind, and behavior. The interdisciplinary nature of the field is apparent when surveying those who call themselves neuroscientists. Among these are anatomists, physiologists, chemists, psychologists, philosophers, molecular biologists, computer scientists, linguists, and ethologists. The areas that neuroscience addresses are equally diverse and range from physiological and molecular studies of single neurons, to investigations of how systems of neurons produce phenomena such as vision and movement, to the study of the neural basis of complex cognitive phenomena such as memory, language, and consciousness. Applications of neuroscience research are rapidly growing and include the development of drugs to treat neurodegenerative disorders such as Alzheimer’s disease and Parkinson’s disease, the use of noninvasive techniques for imaging the human brain such as PET scans and MRI, and the development of methods for repair of the damaged human brain such as the use of brain explants and implants. Combining this wide range of approaches and research methods to study a single remarkably complex organ—the brain—and the behavioral outcomes of its activity requires a unique interdisciplinary approach. The Neuroscience Program is designed to provide students with the opportunity to explore this approach.

**THE PROGRAM**

The program in neuroscience consists of five courses including an introductory course, three electives, and a senior course. In addition, students are required to take two courses, Biology 101 and Psychology 101, as part of the program.

**Neuroscience (Neuroscience 201)** is the basic course and provides the background for other neuroscience courses. Ideally, this will be taken in the sophomore year. Either Biology 101 or Psychology 101 serves as the prerequisite. Electives are designed to provide in-depth coverage including laboratory experience in specific areas of neuroscience. At least one elective course is required from Biology (Group A) and one from Psychology (Group B). The third elective course may also come from Group A or Group B, or may be selected from other neuroscience-related courses upon approval of the advisory committee. Topics in Neuroscience (Neuroscience 401) is designed to provide an integrative culminating experience. Students take this course in the senior year.

**Required Courses**

- BiOL 101 The Cell
in neuroscience. Parkinson's disease, and addiction. The laboratory focuses on current topics in systems, consciousness and clinical disorders such as schizophrenia, autism, neurophysiology, development, learning and memory, sensory and motor systems, and homeostatic functions such as sleep, food intake, and thirst. We will explore these questions. We then consider the behavior of individuals, both as it is explained by evolutionary theory and as it is evaluated by the statistical methods used to test hypotheses. We will examine the roles played by genetically specified programs and non-genetic mechanisms that maintain social systems and on the selection pressures that drive animals toward a particular social system.

**Class Format:** lecture/lab, six hours per week

**Requirements/Evaluation:** exam will be based on a lab practical, lab reports, hour exams and a final exam

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**Prerequisites:** BIOL 212 (same as PSYC 212 or NSCI 201) and BIOL 202 (or permission of instructor)

**Enrollment Preferences:** Biology majors; Neuroscience concentrators; Psychology majors

**Expected Class Size:** 24

**Dept. Notes:** does not satisfy the distribution requirement in the Biology major

**Distributional Requirements:** Division 3

**Other Attributes:** COGS Interdepartmental Electives

**LAB Section:** 03 T 01:00 PM 04:00 PM Instructor: Heather Williams

**NSCI 310(F) Neural Development and Plasticity**

**Crosslistings:** BIOL 310/NSCI 310

Development can be seen as a tradeoff between genetically-determined processes and environmental stimuli. The tension between these two inputs is particularly apparent in the developing nervous system, where many events must be predetermined, and where plasticity, or altered outcomes in response to environmental conditions, is also essential. Plasticity is reduced as development and differentiation proceed, and the potential for regeneration after injury or disease in adults is limited; however some exceptions to this rule exist, and recent data suggest that the nervous system is not hard-wired as previously thought. In this course we will discuss the mechanisms governing mammalian nervous system development, from relatively simple nervous systems such as that of the fruitfly, to the more complicated nervous systems of humans, examining the roles played by genetically specified programs and non-genetic influences.

**Class Format:** lecture

**Requirements/Evaluation:** exams

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**Prerequisites:** BIOL 212 (same as PSYC 212 or NSCI 201) and BIOL 202 (or permission of instructor)

**Enrollment Preferences:** Biology majors; Neuroscience concentrators; Psych majors

**Expected Class Size:** 24

**Dept. Notes:** does not satisfy the distribution requirement in the Biology major

**Distributional Requirements:** Division 3

**NSCI 311 Neural Systems and Circuits**

**Crosslistings:** BIOL 311/NSCI 311

This course will examine the functional organization of the vertebrate brain, emphasizing both neuroanatomy and neurophysiology. How do specific populations of neurons and their connections analyze sensory information, form perceptions of the external and internal environment, make cognitive decisions, and execute movements? How does the brain produce feelings of reward/motivation and aversion/pain? How does the brain regulate homeostatic functions such as sleep, food intake, and thirst? We will explore these questions using a holistic, integrative approach, considering molecular/cellular mechanisms, physiological characteristics of neurons, and connectivity among brain systems. Laboratory sessions will provide experience in examining macroscopic and microscopic neural structures, as well as performing experiments to elucidate the structure and function of neural systems using classical and cutting-edge techniques.

**Class Format:** lecture/lab, six hours per week

**Requirements/Evaluation:** class participation, laboratory notebooks and posters, hour exams and a final exam

**Prerequisites:** BIOL 212 (same as PSYC 212 or NSCI 201) or BIOL 205

**Enrollment Preferences:** Biology majors and Neuroscience concentrators

**Expected Class Size:** 24

**Dept. Notes:** does not satisfy the distribution requirement in Biology

**Distributional Requirements:** Division 3

**Other Attributes:** NSCI Group A Electives

**Not Offered Academic Year 2017**

**LEC Instructor:** Matt Carter

**NSCI 312(S) Brain, Behavior, and the Immune System**
In all animals, the immune system is the body’s defense against the outside world. Immune function is strongly influenced by environmental and behavioral experiences, and the immune system has a dynamic relationship with the brain. We will study the interactions among the brain, behavior, and the immune system in models of health and disease. Specific topics to be examined include: immune cells and their signaling molecules, immune cells within the brain, sickness behaviors, learning and memory, nervous system development, multiple sclerosis, Alzheimer’s disease, and nervous system injury and repair. Students will critically review data from both human and animal studies. All students will design and conduct an empirical research project as part of a small research team.

**Class Format:** seminar/lab

**Requirements/Evaluation:** presentations and participation in discussions, short papers, midterm, written and oral presentation of the research project

**Prerequisites:** PSYC 212 (same as BIOL 212 or NSCI 201) or permission of instructor

**Enrollment Preferences:** Psychology majors and Neuroscience concentrators

**Enrollment Limit:** 16

**Expected Class Size:** 16

**Distribution Notes:** meets Division 3 requirement if registration is under PSYC

**Distributional Requirements:**

Division 3

**Other Attributes:** NSCI Group B Electives

**NSCI 317 Nature via Nurture: Topics in Developmental Psychobiology**

**Crosslistings:** PSYC 317/NSCI 317

Do your genes determine who you are? This course examines the relative contributions of nature (genetics) and nurture (the environment) that lead to individual differences in behavior. Modern neuroscience techniques have discovered new relationships between genes and behavior. Conversely, recent studies on the effects of social factors suggest critical environmental influences on the expression of these genetic determinants. This tutorial will explore the theoretical and empirical issues in animal models of behavioral epigenetics. Topics include child neglect, antisocial behavior, addiction, anxiety, risk-taking, empathy, and depression. Each tutorial pair will design and conduct an empirical laboratory project that will explore their own experimental question about the interaction of genes and environment in determining behavioral phenotypes.

**Class Format:** tutorial

**Requirements/Evaluation:** each week, students will either present an oral argument based on a 5-page position paper or respond to their partners’ paper; Weekly lab meetings will be held and empirical projects presented in a final poster session

**Extra Info:** may not be taken on a pass/fail basis, not available for the fifth course option

**Enrollment Preferences:** Neuroscience concentrators and Psychology majors

**Enrollment Limit:** 10

**Expected Class Size:** 10

**Distribution Notes:** meets Division 3 requirement if registration is under PSYC

**NSCI 318(S) Image, Imaging, and Imagining: The Brain and Visual Arts**

**Crosslistings:** PSYC 318/INTR 223/NSCI 318

This course will study the intersections of neuroscience and art. The brain interprets the visual world and generates cognitive and emotional responses to what the eyes see. It is also responsible for creating mental images and then directing the artist’s motor output. We will first examine the neural mechanisms of how we perceive what we see. We will investigate how visual artists have used or challenged perceptual cues in their work. Understanding how the brain perceives faces will be used to analyze portraiture. We will consider the influence of neurological and psychological disorders on artistic work. We will examine neuroimaging studies questioning whether the brains of visual artists are specialized differently from non-artists. Finally, we will explore how contemporary artists are using brain images in their artwork, and how “outsider” artists have portrayed brain syndromes and mental states. Students will conduct an empirical laboratory project that will explore their own experimental question in response to the course material. The class will include field trips to local museums.

**Class Format:** seminar and empirical lab course

**Requirements/Evaluation:** evaluation will be based on presentations, participation in class discussions, and a poster presentation of the empirical project

**Extra Info:** satisfies one semester of Division III requirement may not be taken on a pass/fail basis; not available for the fifth course option

**Enrollment Preferences:** Studio Art majors; Psychology majors and Neuroscience concentrators

**Enrollment Limit:** 12

**Expected Class Size:** 12

Neuroscience studies the brain and mind, and thereby some of the most profound aspects of human existence. In the last decade, advances in our understanding of brain function and in our ability to manipulate brain function have raised significant ethical challenges. This tutorial will explore a variety of important neuroethical questions. Potential topics will include pharmacological manipulation of "abnormal" personality; the use of "cosmetic pharmacology" to enhance cognition; the use of brain imaging to detect deception or to understand the ability, personality or vulnerability of an individual; the relationship between brain activity and consciousness; manipulation of memories; the neuroscience of morality and decision making. In addition to exploring these and other ethical issues, we will explore the basic science underlying them.

**NSCI 401(S) Topics in Neuroscience**

Neuroscientists explore issues inherent in the study of brain and behavior. The overall objective of this seminar is to create a culminating senior experience in which previous course work in specific areas in the Neuroscience Program can be brought to bear in a synthetic, interdisciplinary approach to understanding complex problems. The specific goals for students in this seminar are to evaluate original research and critically examine the experimental evidence for theoretical issues in the discipline. Topics and instructional formats will vary somewhat from year to year, but in all cases the course will emphasize an integrative approach in which students will be asked to consider topics from a range of perspectives including molecular, cellular, systems, behavioral and clinical neuroscience. Previous topics have included autism, depression, stress, neurogenesis, novel neuromodulators, language, retrograde messengers, synaptic plasticity, and learning and memory.

**Class Format:** seminar and tutorial meetings

**Requirements/Evaluation:** evaluation will be based on presentations, short papers, and a term paper

**Extra Info:** may not be taken on a pass/fail basis

**PERFORMANCE STUDIES**

Coordinator: Associate Professor SHINKO KAGAYA

The Performance Studies Program provides an opportunity to inhabit an intellectual place where the making of artistic and cultural meaning intersects with critical reflection on those processes. The program has as its primary goal the bringing together of those students and faculty engaged in the creative arts, i.e., studio art, creative writing, dance, film and video, music, and theater with those departments that reflect in part on those activities, e.g., Anthropology and Sociology, Art History, Classics, Comparative Literature, English, History, Music, Philosophy, Psychology, Legal Studies, Religion and Theatre. Central concepts and interactions to Performance Studies are: action, the body, presence, ritual, representation, race, ethnicity, gender, sexuality, politics, history and transcultural experience.

Performance Studies strongly suggests that interested students take the introductory course (LAT 330) and two of several recommended upper-level courses (AFR 305, AFR 400, ARTH 408, ARTH 461, LATS 375, WNY 310, or WNY 311).

Currently, the Program's status is as a program without a concentration. However, students can petition and obtain a Performance Studies Contract. Students are encouraged to do five things: 1) take the introductory course, which in 2009-10 is (LATS 330) Approaching Performance Studies; 2) take two advanced courses which utilizes critical theory in relation to performance, such as (AFR 305) The Hip-Hop Generation; (LATS 330) The Aesthetics of Resistance; (LATS 375) Performance and Its Traces; (WNY 310) Art, Space and the City; (WNY 311) Imagining New York City; (AFR 400) Race, Gender, Space; (ARTH 408) Contemporary Performance Art History: Space, Time, Action; (ARTH 461) Writing About Bodies; 3) try different artistic media, both in the curriculum and beyond; 4) produce projects that are a combination of art and performance with critical thinking about that process; and 5) prepare a portfolio of their work.

As a senior year project, the Performance Studies Program strongly recommends the assembling of a senior portfolio. Preparation of the portfolio should normally begin in the second semester of the junior year. It will be done...
under the supervision of a member of the advisory faculty and will be submitted in the spring of the senior year. What we suggest is that portfolios should draw on at least four projects or productions. They should show critical self-reflection on the creative processes, a comparison of the artistic media employed and also demonstrate performance criticism on the work of others.

Performance Studies Interdepartment Elective Courses

PHILOSOPHY (DIV II)
Chair: Professor MELISSA BARRY

To engage in philosophy is to ask a variety of questions about the world and our place in it. What can we know? What should we do? What may we hope? What makes human beings human? These questions, in various forms, and others like them are not inventions of philosophers; on the contrary, they occur to most people simply as they live their lives. Many of us ask them as children, but later either ignore them, or accept answers we can live with. Philosophers, however, seek to keep such questions open, and to address them through reasoned discussion and argument, instead of accepting answers to them based on opinion or prejudice. The program in philosophy is designed to aid students in thinking about these issues, by acquainting them with influential work in the field, past and present, and by training them to grapple with these issues themselves. The program emphasizes training in critical, logical thinking and in effective writing. Philosophy courses center around class discussions and the writing of interpretive and critical essays.

MAJOR

Philosophy is a discipline with a long and intricate history, a history that remains an integral part of the disciple. In this way, it differs dramatically from the natural sciences: for example, although no contemporary physicists remains an integral part of the discipline. In this way, it differs dramatically from the natural sciences: for example, although no contemporary physicists courses have taken. Students should register for a directed study over their senior year winter study and work with an advisor on the paper revisions. A recommendation for graduation with honors will be made on the basis of the thoroughness, independence, and originality of the student's work.

STUDY AWAY

The Williams-Exeter Programme at Oxford (WEPO): the first full Oxford philosophy tutorial will count as the equivalent of two full-semester philosophy courses at Williams. The second full Oxford philosophy tutorial will count as the equivalent of one full-semester philosophy course at Williams, for a total of three Williams philosophy courses. Courses must be pre-approved by the Chair of the Philosophy Department, who will also determine which, if any, courses will count towards the philosophy major distribution requirements.

Courses taken in other Study Away programs: Students may petition the Philosophy Department for credit for philosophy courses taken at their Study Away institution. They should consult with the department Chair before they complete the program. Final determinations will be made on the basis of the course syllabus and the quality of the student's written work for the course. Typically, courses taken while studying away will not fulfill distribution requirements for the philosophy major at Williams.

PHIL 104T(S) Philosophy and Tragedy (W)

Tragedy and philosophy were two of the finest achievements of classical Athenian civilization, and each attempts to reveal to the reader something fundamental about our shared human condition. The worldview that underlies classical tragedy, however, seems markedly different from the one that we find in classical philosophy. While Plato and Aristotle differ on many points, they share the belief that the cosmos and the human place within it can be understood by reason; both, however, would make the prediction that the most important components of a successful life are within the control of the individual human being. The picture that we find in the works of the tragedians, Aeschylus, Sophocles and Euripides is markedly different. The tragedians view the world as in which there is rarely any attempt to be understood, and emphasize the ways in which the success or failure of our lives often turns on things completely beyond our control. The view of the tragedians lead to a thoroughgoing nihilism according to which, for all of us, life and meaning are a matter of chance, but the next best thing is to die soon ("Aristotle's" Eudemus as quoted in Nietzsche's Birth of Tragedy; see also Sophocles' Oedipus at Colonus). Despite these rather grim pronouncements, tragic drama has continued to fascinate and educate generations. In this course, we will examine the philosophical works of Aeschylus, Sophocles and Euripides and will continue with Hume's The Tragedy of Tragedy. If possible, we will arrange to see a live performance of a Greek tragedy.

Class Form: tutorial
Requirements/Evaluation: 5 papers, 5 responses and a final paper in multiple drafts; each week one student will write a paper responding to the week’s readings and the other student will write a response to that paper
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none; this tutorial is an appropriate first course in PHIL

PHIL 109T Skepticism and Relativism (W)

Intellectually, we are ready skeptics and relativists. We doubt, we play out that no one can be certain in what she believes, and we are suspicious of declarations of transcendent reason or truth (unless they are our own). Emboldened by our confidence in skeptical arguments, we claim that knowledge is inevitably limited, that it depends on one's perspective, and that everything one believes is relative to context or culture. No domain of inquiry is immune to this destructive skepticism and confident relativism. Science is only "true" for some people, and the attempt to escape from foolish superstition, and moral relativism and, consequently, nihilism are obvious. But is the best conclusion we can come to with respect to our intellectual endeavors that skepticism always carries the day and that nothing at all is true? In this tutorial, we will examine skeptical arguments, and the varieties of relativism it encourages. Our readings will come primarily from philosophy, but will be supplemented with material from anthropology, physics, psychology, and the like. We will challenge the assumptions that skeptical and relativist positions are incompatible with respect to the truth in general as well as with respect to science, religion, and morality. Along the way, we will need to come to grips with the following surprising fact. With few exceptions, thoroughlygoing skepticism and relativism have not been the prevailing views of the greatest minds in the history of philosophy. Were they simply too unsophisticated and confused to understand what is for us the irresistible power of skepticism and relativism? Or might it be that our

phil 114(f) freedom and society (w)

freedom is one of our fundamental values as americans. it is emphasized in our founding documents, and it occupies a central place in our contemporary political discourse. but do we ask: what is freedom? and why do we value it? in the first unit of this course, we will consider the relationship between freedom and social order. does society's laws limit our freedom in order to make us safe? or do laws somehow enhance or enable our freedom? we will read Thomas Hobbes, John Locke, and Jean-Jacques Rousseau in seeking answers to these questions. we will then turn to some specific social forms in the second unit. we will ask whether they promote or preclude our freedom. we will read Adam Smith and Karl Marx on capitalism, and Simone de Beauvoir on gender.

class format: seminar

semester: spring 2017

writing intensive

phil 115(f,s) personal identity (w)

through lectures, discussions, close readings and assigned writings, we will consider a variety of philosophical questions about the nature of persons, and personal identity through time. persons are subjects of experiences, have thoughts and feelings, motivation and agency; a person is thought of as continuous over time, and as related to, recognized and respected by other persons. thus, the concept of person plays a significant role in most branches of philosophy: metaphysics, epistemology, moral and political philosophy, and of course in the philosophy of mind. conceptions of person are also equally important for scientific research programs (especially in psychology), for law, and for the arts (especially mime and arts). questions about persons are of central importance for a myriad of our theories and practices, and for the ways in which we live our lives. the aim of this course is to explore and evaluate a number of rival conceptions of persons and personal identity over time. some of the questions which we will discuss are: what is a person? how do i know that i am one? what constitutes my knowledge of myself as a person, and does that knowledge differ in any significant respect from my knowledge of physical objects and of other people? what makes me the particular person that i am, and how is my identity as this individual person preserved over time?

while addressing these questions through lectures and class discussions, the course will place special emphasis on developing students' intellectual skills in the following domains:

- close, analytical reading;
- recognizing, reconstructing and evaluating claims and reasons that support them;
- producing original ideas and arguments, orally and in writing;
- responding to the claims and arguments presented in texts and in class;
- writing clear, polished, well-argued papers.

class format: lecture/discussion

requirements/evaluation:

class attendance, preparedness and participation;

small group weekly meetings; weekly short writing assignments

prerequisites: none; open to first year students

enrollment preferences: freshmen, sophomores, and philosophy majors who need a 100 level course to satisfy requirement for the major

enrollment limit: 19

phil 119 introduction to moral and political philosophy: plato with footnotes (w)

this course addresses a central question in practical philosophy: how should we live? the question has two parts: what is the best life for individuals? and what social and political arrangements make such a life possible? in attempting to answer these questions we will also engage related theoretical questions concerning what is real and how we have access to it.
We begin with readings from Plato's Republic—a seminal work in the history of philosophy that illustrates the inseparability of theoretical and practical questions and has exerted a powerful influence on nearly every subsequent attempt to answer these questions in the context of the Western philosophical tradition. While reading the Republic, we also consider some of the best of these attempts in the Western philosophical canon ("footnotes on Plato" by Aristotle, Hobbes, Kant, Mill, Nietzsche and others) and the challenges they present to Plato's conclusions.

Class Format: seminar
Requirements/Evaluation: six 2-page papers, two 5-page papers, presentations, participation
Extra Info: not available for the fifth course option
Prerequisites: none
Enrollment Preferences: first-year students, prospective and actual majors
Enrollment Limit: 19
Expected Class Size: 19
Dept. Notes: meets 100-level PHIL major requirement

PHIL 121(F,S) Truth, Goodness, and Beauty (W)

In our everyday lives, we routinely assume that our clocks can tell us the truth about what time it is, that committing murder is wrong, and that there are people, landscapes, and works of art that are beautiful. But we are also aware that people can and often do disagree about what is true, what is good or right, and what is beautiful. Should the fact of such disagreement lead us to conclude that truth, goodness, and beauty are in some basic sense relative to human beings, perhaps as individuals, perhaps as members of societies or cultures? Some philosophers defend such conclusions, but others argue that truth, goodness, and beauty are "objective," in some important sense, despite the fact that people disagree about them. This introductory course addresses these and related issues.

Class Format: seminar
Requirements/Evaluation: attendance, frequent short papers totaling about 30 pages, class participation
Extra Info: may not be taken on a pass/fail basis
Prerequisites: none

Writing Intensive

PHIL 126 Paradoxes (W)

There are three grains of sand on my desk. This is unfortunate, but at least there isn't a heap of sand on my desk. That would be really worrisome. On the other hand, there is a heap of sand in my backyard. I don't know how exactly how many grains of sand are in this heap, but let's say 100,000. My daughter removes one grain of sand. I don't know why, she just does. It seems like there is still a heap of sand in my backyard. In fact, it seems like you can't change a heap of sand into something that isn't a heap of sand by removing one grain of sand. Right? But now we have a problem. By repeated application of the same reasoning, it seems that even after she removes 99,997 grains of sand—I don't know what she wants with all this sand, but I'm starting to worry about that girl—there is still a heap of sand in my backyard. But three grains isn't enough for a heap. So there is not a heap in my backyard. Now I'm confused. Where did my reasoning go wrong?

What have we here is an example of the sorites paradox. It is a paradox, because I started with seemingly true statements and used valid reasoning to arrive at contradictory conclusions. We can learn a lot about logic, language, epistemology and metaphysics by thinking through and attempting to resolve paradoxes. In this class, we'll work together to think through some ancient and contemporary paradoxes. We'll also work on writing lucid prose that displays precisely the logical structure of arguments, engages in focused critique of these arguments, and forcefully presents arguments of our own. Other topics could include: Zeno's paradoxes of motion and plurality, the liar's paradox, the surprise exam paradox, paradoxes of material constitution, Newcomb's Probability, and the Prisoner's Dilemma.

Class Format: seminar
Requirements/Evaluation: several short writing assignments and a longer final paper
Prerequisites: none
Enrollment Preferences: first-years and sophomores

Expected Class Size: 19
Dept. Notes: meets 100-level PHIL major requirement
Distributional Requirements: Division 2
Writing Intensive

PHIL 128(F,S) Utopias and Dystopias (W)

The touchstone of our course will be Plato's Republic: the first and perhaps greatest Utopia as well as perhaps the greatest work in political philosophy. We will prepare for the Republic by reading two Socratic dialogues: the Euthyphro and the Meno. After several weeks on the Republic we will turn to Shakespeare's last play: The Tempest. From there it is a natural transition to Aldous Huxley's Brave New World. We will continue with B. F. Skinner's Walden Two, and finish by comparing the dystopias of the first book and first film of The Hunger Games.

Class Format: seminar
Requirements/Evaluation: several short papers totaling at least twenty pages
Prerequisites: none
Enrollment Preferences: first-years and sophomores
Enrollment Limit: 19
Expected Class Size: 19
Dept. Notes: meets 100-level PHIL major requirement
Distributional Requirements: Division 2
Writing Intensive

PHIL 201(F) History of Ancient Greek Philosophy

The development of a new and profoundly powerful philosophical conception. We will prepare for the Republic by reading two Socratic dialogues: the Euthyphro and the Meno. After several weeks on the Republic we will turn to Shakespeare's last play: The Tempest. From there it is a natural transition to Aldous Huxley's Brave New World. We will continue with B. F. Skinner's Walden Two, and finish by comparing the dystopias of the first book and first film of The Hunger Games.

Class Format: lecture/discussion
Requirements/Evaluation: short papers, possibly supplemented by one or more exams
Prerequisites: none; open to first-year students

PHIL 201(F) History of Ancient Greek Philosophy

CrosstListings: PHIL 201/CLAS 203

Very few people believe that everything is water, that we knew everything before birth, that philosophers ought to rule the state, or that some people are natural slaves. Why then should we spend our time studying people who in addition to having these surprising beliefs have been dead for 2500 years? First of all, Greek thinkers, especially Plato and Aristotle, radically shaped the trajectory of western thought in every area of philosophy. No one can have an adequate understanding of western intellectual history without some familiarity with the Greeks, and we might think that an understanding of our intellectual history can deepen our understanding of our own situation. More importantly, many of the thinkers that we will read in this class are simply excellent philosophers, and it is worthwhile for anyone interested in philosophical problems to read treatments of these problems by excellent philosophers. We will begin the course by looking briefly at some of the Presocratic philosophers active in the Mediterranean world of the seventh through fifth centuries BCE, and some of the sophists active in the fifth century. We will then turn to several of Plato’s dialogues, examining Plato’s portrayal of Socrates and his development of a new and profoundly powerful philosophical conception. We will then read some of Aristotle’s works on metaphysics, epistemology and ethics, considering some of the ways Aristotle’s thought responds to that of predecessors.

Class Format: lecture/discussion
Requirements/Evaluation: short papers, possibly supplemented by one or more exams
Prerequisites: none; open to first-year students

PHIL 202(S) History of Modern Philosophy
This course provides an introduction to Modern Philosophy of the 17th and 18th Centuries, with a focus on metaphysics and epistemology. Topics: What can we know through our senses? Can we know anything through reason alone? What is the nature of the mind? What is the nature of bodies? Are bodies independent of minds? Do bodies interact with other bodies? What are space and time? What can we know about God? Authors: Descartes, Locke, Berkeley, Leibniz, Hume, and Kant.

Class Format: lecture
Requirements/Evaluation: weekly papers plus midterm and final exams
Prerequisites: none
Enrollment Limit: none
Expected Class Size: 30
Dept. Notes: Required course for Philosophy majors
Distributional Requirements: Division 2

Spring 2017
LEC Section: 01 MWF 11:00 AM 12:15 PM Instructor: Keith McPartland

PHIL 203(F) Logic and Language (Q)
Logic is the study of reasoning and argument. More particularly, it concerns itself with the difference between good and bad reasoning, between strong and weak arguments. We all examine the virtues and vices of good arguments in both informal and formal systems. The goals of this course are to improve the critical thinking of the students, to introduce them to sentential and predicate logic, to familiarize them with enough formal logic to enable them to read some of the great works of philosophy, which use formal logic (such as Wittgenstein’s “Tractatus”), and to examine some of the connections between logic and philosophy.

Class Format: lecture/discussion
Requirements/Evaluation: a midterm, a final, frequent homework and problem sets
Prerequisites: none
Enrollment Limit: none
Expected Class Size: 50-80
Distributional Requirements: Division 2
Quantitative/Formal Reasoning

Fall 2016
LEC Section: 01 MWF 10:00 AM 10:50 AM Instructor: Joseph Cruz

PHIL 207(S) Contemporary Philosophy of Mind (W)
The philosophy of mind has been one of the liveliest and most active areas of philosophical inquiry over the last century, and it has taken a place at the center of the field. Part of the explanation for this is the rise of compelling scientific accounts of who and what we are. The question of whether the mind can be fully understood within a physicalist, materialist framework has taken on an exciting urgency. In this course we will investigate the mind/body problem, mental representation, the conceptual and nonconceptual content of mental states, and the nature of consciousness. Throughout we will attend to the relevant empirical literature.

Class Format: seminar
Requirements/Evaluation: weekly two page papers on focused topics and two 8- to 10-page papers
Prerequisites: at least one prior 100- or 200-level PHIL course
Enrollment Preferences: prospective Philosophy majors and Cognitive Science concentrators
Enrollment Limit: 19
Expected Class Size: 14
Distributional Requirements: Division 2
Writing Intensive

PHIL 208 Philosophy of Education: DuBois versus Washington
At the beginning of the last century Booker T. Washington and W.E.B. DuBois engaged in a great debate about the nature of education. Their dispute raised some of the deepest questions in philosophy: consequentialism versus deontology, the goals of happiness versus dignity, long term versus short term goals, and more. We will begin with Washington's classic article "Industrial Education for the Negro" and DuBois' classic "The Talented Tenth." We will continue with J. S. Mill's Utilitarianism and Kant's Grundlegung der Metaphysik der Sitten, considering these books as works in the philosophy of education. We will read the great 20th century philosopher who saw education as the foundation of democracy: John Dewey. We will also study contemporary philosophers who have written on education, such as Martha Nussbaum and Cornel West.

Class Format: seminar
Requirements/Evaluation: short papers, longer final paper
Prerequisites: none

Enrollment Preferences: Philosophy majors and Africana Studies concentrators, then sophomores, then first-years
Enrollment Limit: 25
Expected Class Size: 25
Distributional Requirements: Division 2
Not Offered Academic Year 2017

PHIL 209 Philosophy of Science
It is a generally held belief, in our time and culture, that science is the best source of our knowledge of the world, and of ourselves. The aim of this course is to examine the origins, grounds, and nature of this belief. We will analyze and discuss various accounts of scientific method, structure and justification of scientific theories, and the changing ideas about scientific knowledge is progressive. The course will begin with the "received view" of science, advanced by logical empiricists, which assumes the objectivity and rationality of science. We will then discuss philosophies of science which emerged out of various criticisms of this view - especially those of Popper, Lakatos, Kuhn and Feyerabend - and the challenges to the assumptions of scientific objectivity and rationality which they erected. This course will naturally lead us to the relativists and social-constructionists whose views developed within the history of contemporary science and philosophy. Finally, we will consider some of the connections between science and proper approach to the study of science, which came to be known as “the science wars.”

Class Format: seminar with a short lecture component in each class
Requirements/Evaluation: class attendance, preparedness and participation; three short assignments; three 5 pages long papers, the last of which will be the final paper, due a week after the end of classes
Extra Info: may not be taken on a pass/fail basis
Prerequisites: PHIL course, or declared major in a natural science, or permission of instructor
Enrollment Preferences: Philosophy majors and prospective majors
Enrollment Limit: 19

PHIL 212 Ethics and Reproductive Technologies (W)
This course is an interdisciplinary survey of the ethical, legal, and public policy questions about the development and use of reproductive technologies. These technologies are currently undergoing rapid development, and their widespread use is raising significant and multifaceted ethical questions. Throughout this course, we will begin with a survey of the major reproductive technologies themselves, examining their biological, ethical, and public policy implications. We will then consider a number of conceptual and ethical issues in the use and development of technologies related to human reproduction, drawing out their implications for such core concepts as "motherhood" and "parenthood," family and genetic relatedness, exploitation and commodification, and reproductive rights and society's interests in reproductive activities. Topics will range from considerations of "mendelian" technologies such as in vitro fertilization (IVF), prenatal genetic screening and testing, and surrogacy, to the more extraordinary, (possibly) including pre-implantation genetic (diagnosis) (PGD), post-menopausal reproduction, post-mortem gamete procurement, reproductive cloning and embryo splitting, and in uterus medical interventions. Background readings include sources rooted in traditional modes of bioethical analysis as well as those incorporating feminist approaches.

Class Format: discussion
Requirements/Evaluation: active participation in class discussions, four to five short reflection papers, and two longer papers (5-10 pages)
Prerequisites: none, but introductory-level course in PHIL and/or WGSS highly recommended
Enrollment Preferences: Women's, Gender and Sexuality Studies majors
Enrollment Limit: 19
Expected Class Size: 19

PHIL 213(S) Biomedical Ethics (W)
Much like the construction of medical knowledge itself, it is from specific cases that general principles of biomedical ethics arise and are systematized into a theoretical framework, and it is to cases they must return, if they are to be both useful and comprehensible to those making decisions within the biomedical context. In this tutorial we will exploit this characteristic of biomedical ethics by using a case-based approach to examining core concepts of the field. The first
portion of the course will be devoted to developing and understanding four moral principles which have come to be accepted as canonical: respect for autonomy, beneficence, nonmaleficence, and justice. The remainder of the course will consider key concepts at the core of medical ethics and central issues for the field, such as privacy and confidentiality, the distinction between killing and "letting die," therapy vs. research, and enhancement vs. therapy. To this end, each week we will (1) read philosophical material focused on one principle or concept, and (2) consider in detail one bioethics case in which the principle or concept has special application or relevance. In some weeks, students will be asked to choose from a small set which case they would like to address; in others the case will be assigned.

Class Format: tutorial; students will meet with the professor in pairs for approximately one hour per week, writing and presenting 5- to 7-page essays every other week, and commenting orally on partners' essays in alternate weeks.

Requirements/Evaluation: evaluation will be based on written work, on oral presentations of that work, and on oral critiques. Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option.

Prerequisites: none
Enrollment Preferences: declared and prospective Philosophy majors and students committed to taking the tutorial
Enrollment Limit: 10

PHIL 220T Happiness (W)
According to Aristotle the ultimate good is happiness—everything we desire we desire for the sake of happiness. Yet what is it to be happy? Should we value other things (say justice or passionate commitment and curiosity) over happiness? Are happiness and pleasure the same thing? Is happiness an emotional or mental state or is it a social construct? What do the social and psychological sciences have to teach us about happiness? Philosophy? Is the happy life a life of virtue? Does being virtuous guarantee happiness? How important are honor, money, love, work, friendship and our connections to others to our happiness? In this tutorial we will read from ancient, modern and contemporary philosophical sources as well several relevant studies in the social sciences and positive psychology movement in order to engage questions concerning happiness.

Class Format: tutorial
Requirements/Evaluation: five 5-page papers and six 2-page papers
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option.
Prerequisites: none
Enrollment Preferences: students interested in philosophy and/or happiness
Enrollment Limit: 10

PHIL 223(S) Philosophy of Sport
Sports: many of us (at Williams, in the US, throughout most of the world) play them, yet more of us watch them, and we invest not only our time but enormous amounts of money in them (we build sports arenas, not cathedrals; in 2013, in 40 of the 50 United States, the highest-paid public official was a football or basketball coach). Why do sports matter so much to us? Should they? The topics we consider in responding thoughtfully to these questions will include sports and health, sports and education, ethical issues in sports (including issues of class, gender, and race), and sports and beauty.

Class Format: lecture/discussion
Requirements/Evaluation: short writing assignments for most classes
Prerequisites: none
Enrollment Preferences: seniors, then juniors, then sophomores
Enrollment Limit: 30
Expected Class Size: 30
Distributional Requirements:
Division 2

Spring 2017
LEC Section: 01 MR 01:10 PM 02:25 PM Instructor: Alan White

PHIL 225 Existentialism
What is Existentialism? Philosophers since Socrates have asked why a human life is worth living. Following Kant philosophers have considered freedom essential to a valuable life. How do existentialists differ? While Socrates and Kant maintain that reason is intrinsic to freedom and a worthwhile life, Existentialists hold our irrationality paramount. We will explore their treatments of anxiety, boredom, despair, religious pointless, pettiness, guilt, care, death, nausea, shame, sadism, and masochism. Authors will include Kierkegaard, Nietzsche, Heidegger, and Sartre.

Class Format: seminar
Requirements/Evaluation: four mid-length papers

Not Offered Academic Year 2017
SEM Instructor: Justin Shaddock

PHIL 227 Death and Dying (W)
In this course we will examine traditional philosophical approaches to understanding death and related concepts, with a special focus on the ethical concerns surrounding death and care for the dying. We will begin with questions about how to define death, as well as reflections on its meaning and function in human life. We will move on to examine ethical issues of truth-telling with terminally ill patients and their families, decisions to withhold or withdraw life-sustaining treatments, the care of seriously ill newborns, physician-assisted suicide, euthanasia, and posthumous interests. In addition to key concepts of death, dying, and terminal illness, we will develop refined notions of medical futility, paternalism and autonomy, particularly within the context of advance directives and surrogate decision making.

Class Format: lecture/discussion
Requirements/Evaluation: class attendance and participation, periodic short essays (3 or 4 total, 2-3 pages each), two mid-length papers (5-7 pages each); possible experiential learning component
Prerequisites: none

PHIL 228(F) Feminist Bioethics (D) (W)
Crosslistings: PHIL 228/WGSS 228
In this course we'll explore the ways in which feminist approaches to moral thinking have influenced both the methodology and the content of contemporary bioethics. The first portion of the course will address the emergence of the "Ethics of Care," critically assessing its origins in feminist theory, its development within the context of the caring professions, and its potential as a general approach to bioethical reasoning. The second portion of the course will use feminist philosophy to inform our understanding of the ways in which gender structures the individual's interactions with the health care system. To do this we'll explore topics that might traditionally be considered "women's issues" in health care, such as medicine and body image (e.g., cosmetic surgery, eating disorders), reproductive and genetic technologies, and research on women and their health care needs. In addition we'll also look at feminist analyses of topics that traditionally have not been regarded as "gendered," such as resource allocation and end of life issues. As a course offered under the Exploring Diversity Initiative, this class is designed to improve students' ability to recognize both the existence and the effects of gender disparities within the health care context, and in particular, how power and privilege within and beyond medicine contribute to gender inequalities in health and medical treatment. Moreover, students will theorize about ways of conceptualizing and of reforming health care interactions in order to reduce or eliminate those gender inequalities.

Class Format: lecture/discussion
Requirements/Evaluation: active participation in class discussions, two mid-length papers (7-10 pp. each), one oral presentation, and periodic short writing assignments (four or five, app. 2 pp. each)
Prerequisites: none, although previous coursework in WGSS is desirable

PHIL 229 19th Century Philosophy
This course provides an introduction to 19th Century Philosophy, with a focus on the distinctive theme of critique. We consider Hegel's criticisms of our natural conceptions of freedom and religion; Marx's criticisms of capitalism and its ideology; Kierkegaard's criticisms of aesthetic, ethical, and rational lives; Nietzsche's criticism of Christianity and its morality; and Freud's criticisms of civilization and religion. By comparing and evaluating these powerful and influential criticisms, we will be able to assess the tradition of philosophy in the 19th Century.

Class Format: lecture

PHIL 231 Ancient Political Thought Crosslistings: PSCI 231/PHIL 231
The core activity of this seminar is the careful reading and sustained discussion of selected works by Plato and Aristotle, but we will also engage such other thinkers as Epictetus and Augustine, and, from a political and theoretical point of view, selections from the Hebrew Bible and New Testament. Among the questions that we will address: What is justice? How can it be known and pursued? How is political power generated and exercised? What are the social and ethical prerequisites—and consequences—of democracy? Must the freedom or fulfillment of some people require the subordination of others? Does freedom require leading (or avoiding) a political life? What distinguishes that kind of life from others? What does it mean to be "philosophical" or to think "theoretically" about politics? Although we will attempt to engage the readings on their own terms, we will also ask how the vast differences between the ancient world and our own undercut or enhance the texts' ability to illuminate the dilemmas of political life for us.

Class Format: lecture/discussion
Requirements/Evaluation: three 7- to 8-page papers
Prerequisites: none
Enrollment Preferences: Political Science majors

PHIL 235T Morality and Partiality: Loyalty, Friendship, Patriotism (W)
The aim of this tutorial is to critically examine the nature, importance, and ethical value of personal attachments and loyalties. Loyalty is frequently expected by family, friends and lovers, and demanded by institutions, religious and political communities, as well as by the state. A person incapable of loyalty is often characterized as fickle, cold, self-serving and sometimes even pathological. However, the status of loyalty as a virtue has always been suspect; it has been argued that it is incompatible with impartiality, fairness and equality, and claimed that it is always exclusionary. So, some relationships with other people—such as friendships, familial ties, love, patriotism—seem to be ethically desirable, central to the quality of our lives, and yet prima facie in tension with the widely held belief that morality requires impartiality and equal treatment of all human beings. Are we ever justified in having more concern, and doing more, for our friends, family, community or nation? Does morality require that we always subordinate our personal relationships to universal principles? Is patriotism incompatible with cosmopolitanism, and if so, which of the two should we value? If loyalty is a virtue, what are the proper limits of its cultivation and expression?

Class Format: tutorial; tutorial pairs will meet with the instructor for one hour a week
Requirements/Evaluation: tutorial attendance and participation; bi-weekly tutorial papers, each about 5 pages long (totaling 6 per student); bi-weekly oral responses to the paper of the tutorial partner
Extra Info: may not be taken on a pass/fail basis

PHIL 236(S) Contemporary Ethical Theory (W)
This course will be an in-depth exploration of central questions in normative ethics, including the following: Which features of actions are morally important and why (e.g., their motive, their intrinsic nature, or their consequences)? When should we give moral priority to our personal commitments, and why? Are there universal moral principles that apply to all cultures? Are we capable of disinterested altruism, or are we motivated solely
by self-interest? By which methods can we answer these questions? We will examine these and related issues by looking closely at two influential moral theories: consequentialism and deontological. While both have important historical roots — consequentialism in Mill and Sidgwick, deontology in Kant — we will focus on contemporary developments of these views. In the last few weeks, we'll examine contractualism, which outlines a different approach to these questions.

Class Format: seminar

Requirements/Evaluation: short response papers; an 8- to 10-page midterm paper; a 10- to 12-page final paper

PHIL 244(F) Environmental Ethics (W)

Crosslistings: ENVI 244/PHIL 244

What ethical standards should guide our individual and societal choices when those choices affect current and future environmental conditions? This course will introduce students to fundamental concepts, methods, and issues in environmental ethics. Initial tutorial meetings will focus on theoretical materials that will background later discussions and will include classic readings from the environmental ethics literature (e.g., Leopold, Taylor, Rolston). Subsequent sessions will pair readings about key concepts with specific cases that raise complex ethical issues, including the concept of moral standing and, e.g., people who do not yet exist, non-human individuals, species, and complex living systems; the concept of moral responsibility and complicity in environmentally damaging practices; the legitimacy of cost-benefit analysis as an environmental policy tool; and the valuation of human lives.

Class Format: tutorial

Requirements/Evaluation: one 5- to 7-page essay every other week (6 in all) and carefully prepared oral responses to partners' essays in alternate weeks; evaluation will be based on essays, oral critiques, and quality of discussion

Extra Info: may not be taken on a pass/fail basis

PHIL 271T Woman as "Other" (D) (W)

Crosslistings: PHIL 271/WGSS 271

At mid-century, Simone de Beauvoir, existential philosopher and perhaps the greatest feminist theorist of the twentieth century, described women as "living in a world where men compel her to assume the status of the Other." At the same time, Beauvoir asserts: "One is not born a woman, one becomes one." How, given their objectification, can women become subjects for themselves? Is authenticity even possible? Must the relation between self and other inevitably be one of objectification and domination? Is reciprocity and mutuality in self-other relations possible? In our efforts to deepen our understanding of these important philosophical questions, questions that have been at the center of social and political thought at least since Hegel introduced the dialectic of master and slave, we will engage in close readings of writings by Beauvoir (including autobiography and biography), as well as philosophers responding to her—Frantz Fanon, Luce Irigary and Judith Butler. This course has been designated EDI because it explores identity formation under conditions of inequality.

Class Format: tutorial; students will work in pairs

Requirements/Evaluation: each student will write/present orally a 5-page essay every other week; those not presenting essays will prepare oral critiques of partners' essays; evaluation based on written work, oral presentations of essays and critiques

Extra Info: may not be taken on a pass/fail basis

PHIL 272T Free Will and Responsibility (W)

In moral and legal decisions we hold people responsible for their deliberate actions. This practice seems justified as long as people are free to make the choices that they do. But which criteria must a decision meet in order to qualify as free? Clearly, a free decision must not be the result of external coercion. But must the decision also be free from any outside influence at all? If so then freedom may seem impossible, for we are all deeply influenced by external factors ranging from the general laws of nature to specifiable features of our genetic endowment and social environment including religion, political ideology, and advertising. These affect not only our particular choices but also, more fundamentally, who we are and what we value. Since it is undeniable that we are pervasively influenced by such forces, the real question is whether, and how, free choice is possible amidst all of these influences. In this course we will examine the best-known recent philosophical attempts to make sense of the nature of free will and responsibility. Since these issues have a direct bearing on which theory of legal punishment we should accept, we will also examine influential theories of punishment. Our focus will be on works by contemporary authors. Emphasis will be placed on developing skills in reading, interpretation and oral argument as well as critical reasoning and writing.

Class Format: tutorial; students meet with the instructor in pairs for roughly an hour each week

Requirements/Evaluation: each student will write a 5- to 6-page paper every other week and comment on his or her tutorial partner's paper in alternate weeks

PHIL 274T(S) Messing with People: The Ethics of Human Experimentation (W)

The Tuskegee Syphilis Study and Stanley Milgram's Obedience experiments are infamous. Yet, other lesser known experiments are equally important landmarks in research ethics, as well, such as the Willowbrook experiment, in which residents of a state home for mentally impaired children were intentionally infected with a virus that causes hepatitis, and the Kennedy-Krieger Lead Abatement study, which tested the efficacy of a new lead paint removal procedure by housing young children in partially decontaminated homes and testing those children for lead exposure. In this sophomore tutorial we'll closely examine a series of contemporary and historical cases of human experimentation (roughly, one case per week) with an eye toward elucidating the moral norms that ought to govern human subjects research. A number of
notions of exploitation and coercion, privacy and confidentiality, and the conceptual themes will emerge throughout the course of the term, including among other topics. Professors and majors committed to taking the tutorial

Class Format: seminar
Requirements/Evaluation: two short papers (5 pages) and one longer final paper (12-15 pages)
Prerequisites: PHIL 102
Enrollment Preferences: Philosophy majors, then seniors and juniors of any major
Expected Class Size: 12-15
Distributional Requirements: Division 2
Other Attributes: PHIL History Courses

PHIL 281T Philosophy of Religion (W)
Crosslistings: PHIL 281/REL 309
Our goal in this course will be to try to determine how far reason can justify belief in God. We will spend at least half of the semester examining the best-known philosophical arguments for and against the existence of God (including the ontological argument, the cosmological argument, the teleological argument, the argument from religious experience, the argument from evil, and the argument from religious disagreement). For each one, we will first look at historically important formulations of the argument and then turn to contemporary reformulations. Our aim is to be able to evaluate the strongest version of each argument. After working through these arguments, we will reflect more generally on the proper roles of reason and faith in justifying religious belief. In the final section of the course, we will examine the relationship between god and morality. Authors will include Plato, Anselm, Aquinas, Pascal, Paley, Hume, Kant, Kierkegaard, Freud, Marx, and several contemporary philosophers.

have been thought of as a kind of intellectual saint in the Hellenistic world. The stoics and skeptics both claimed a Socratic imprimatur for their own thought. Stoicism and skepticism, however, are wildly divergent schools of thought. How could proponents of each be claiming to follow in the footsteps of Socrates? We will read some representative works from each of these schools of thought to see how each approaches Socrates. If time permits, we may also discuss how Socrates' views may have been thought of as a kind of intellectual saint in the Hellenistic world. The more modern thinkers.

Prerequisites:

Enrollment Preferences: first-years and sophomores; some preference will be given to prospective Philosophy and Classics majors

Enrollment Limit: 10

Expected Class Size: 10

Notes: meets History requirement only if registration is under PHIL

Distribution Notes: meets Division 1 requirement if registration is under CLAS; meets Division 2 requirement if registration is under PHIL

Distributional Requirements: Division 2

Writing Intensive

PHIL 291T Violence: Its Trajectory and Its Causes (W)

This tutorial examines Steven Pinker's The Better Angels of our Nature. Why Violence Has Declined (2011). We focus first on the controversial theses that the two world wars and the Holocaust were not the most violent so far, and that, over the entire course of history, human beings have become decreasingly violent. We then return to the book's explanations of the factors it identifies as leading us to be violent—our "inner demons" and as curing our violence—our "better angels."

Class Format: tutorial

Requirements/Evaluation: tutorial papers and responses to partner's tutorial papers, in alternating weeks; participation in tutorial discussions

Extra Info: may not be taken on a pass/fail basis

Prerequisites: none

Enrollment Preferences: Philosophy majors and potential majors

PHIL 294T(S) Philosophy and Narrative Fiction (W)

Crosslistings: PHIL 294/COMP 294

What is it for a novel, a story, a play or a film to be a philosophical narrative? It is not enough for it merely to be about a character who happens to be a philosopher; nor is it just that philosophical positions are reviewed in the narrative, as in Gaarder's Sophie's World. In this class, we will try to answer this question by saying that a good philosophical novel does not serve philosophy but, on the contrary, tries to "get hold of a domain that (...) philosophy had kept for itself. There are metaphysical problems, problems of human existence, that philosophy has never known—problems that only the novel can seize." If Kundera is right, fictional narratives (such as novels) sometimes do the philosophical work that philosophy cannot do for itself. What kind of work is that, and how is it accomplished? Why can't argumentative prose—philosophers' preferred form of expression—clearly say, and moreover prove, what literature, theatre and film illustrate, show and display? One possible answer which we will examine is that, while many philosophers recognize that there are intimate connections between what we believe, feel and do, philosophical argumentation by its very nature appeals to belief alone; narrative art, by contrast, can simultaneously engage our reason, emotions, imagination and will, thus resulting not only in deepening our understanding, but also in transformation of the self.

To properly address a number of interrelated questions concerning philosophy in literature and film, and philosophical problems of meaning, interpretation and evaluation of narrative fiction, we will discuss both narrative works of art and theoretical approaches to their analysis. We will consider the ways in which narrative fiction both refashions and engages its surrounding in philosophical reflections on personal identity, nature of the self, interpersonal relationships, memory, time, human existence, freedom, and the meaning in life. The choice of literary works and films to be discussed will to some extent depend on students' interest. Most of the authors will come from this list, however: Sartre, de Beauvoir, Kafka, Dostoevsky, Thomas Mann, Camus, Eco, Kundera, Borges, Charlie Kaufman, Bergman, Tarkovsky, Resnais, Kurosawa, Bunuel, Kubrick, Godard, Visconti and Guillermo del Toro. The theoretical aspect of the course will involve close readings of selected articles in contemporary aesthetics, philosophy of literature and philosophy of film.

Class Format: tutorial

Requirements/Evaluation: weekly film screenings on Monday nights (7-10 pm), tutorial attendance and participation; bi-weekly tutorial papers, each about 5 pages long (totaling 6 per student); bi-weekly oral responses to the papers of the tutorial partner

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: none

Enrollment Preferences: students who can demonstrate informed interest in the course and who can commit the time that the course will require

PHIL 295 Philosophy of Film and Film Theory (W)

Crosslistings: PHIL 295/COMP 295

Philosophy of film is a relatively young, but very rich and rapidly growing field. Its central question—What is film?—has been framed in many different ways; naturally, the answers to that question, and the theoretical assumptions that underlie the answers, differ as well. This course will offer a selective overview of the debates that characterized philosophy of film since the early 20th century. Starting with early film theorists (such as Munsterberg, Arnim, Bazin, and Soviet formalists), we will examine how their insights and disagreements influenced later developments in continental and analytic philosophy of film, and in film theory. While looking at film as art, as commodity, and as entertainment, we will always keep in sight specific theoretical assumptions that underlie different understandings of film, and different critical approaches to the medium. Some of the questions we will ask are: What is the nature of filmic representation? Does film adequately capture reality as no other art does? Is it advancement of our thinking and increase our knowledge of the world? Or is it a supreme illusion, a dreamlike escape, the domain in which the viewer's unconscious wishes are magically fulfilled? How does film generate meaning? Is film a creation of a single artist - the director, the author - or is it a result of a loosely synchronized and not quite coherent collaboration of many different people, each guided by her or his particular vision? Is there a room for the notion of collective intention in filmmaking? What is the nature of audience's response to film? Why do we seek to experience through film forms and conditions that we avoid in our daily lives? Are there ethical considerations that should govern both film production and spectatorship? Finally, is there a reason for philosophy of film and film theory to exist as a separate field? Is philosophy of film really autonomous, independent from traditional philosophical disciplines which help generate its central questions, such as aesthetics, philosophy of art, epistemology, ontology, semiotics, ethics, social and political philosophy? Is film today really distinct from a number of new, emerging visual media? How should we think about the boundaries and methods of theorizing about film?

Class Format: seminar

Requirements/Evaluation: this is a reading, writing & viewing intensive class; evaluation will be based on class participation, 5 short response papers (about 800 words each), & 2-5 page long papers

Extra Info: the second of which will be due after the end of classes; class attendance and Tuesday evening film screenings are mandatory and may not be taken on a pass/fail basis

Prerequisites: none; open to first year students

Enrollment Preferences: Philosophy majors and intended majors; students especially interested in film; and by seniority

Enrollment Limit: 19

PHIL 301 Textual Meaning and Interpretation (W)

Early philosophy of language focused on meaning of assertions, denials and descriptions. However, this approach is too narrow, since people use language to do a myriad of things: to ask, demand, promise, praise, blame, threaten, command, insinuate, evoke, express feelings, and sometimes just to play. The philosophical study of what we do in language, and how we understand one another, is called pragmatics; within the analytic tradition, the main philosophical contributions to the study of pragmatics in language came from Peirce, Wittgenstein, Austin, Grice and Searle. Other philosophers and literary theorists have used some of their ideas recently to throw light on the nature of textual meaning and the interpretation of literary texts. We shall first explore the salient features of the pragmatic approaches to language, paying special attention to Austin's notion of illocutionary force and Grice's notion of non-natural meaning. We will then examine how these notions may be exploited in the consideration of various long-standing issues in the theory of literary interpretation. We will discuss the importance of specific genre
conventions and broader contextual matters to the interpretation of literary texts (along the lines suggested by Quentin Skinner); the possibility of using conventions and broader contextual matters to the interpretation of literary surrounding the intentional fallacy (the alleged result of invoking authorial intention to determine textual meaning).

Class Format: seminar
Requirements/Evaluation: class participation, 10 short weekly response papers, and 2 longer (5-7 page) papers
Prerequisites: PHIL 102 or 103; open to all students
Enrollment Preferences: Philosophy majors
Enrollment Limit: 19
Expected Class Size: 5-12
Distributional Requirements: Division 2
Writing Intensive
Other Attributes: FMST Related Courses

PHIL 304 Philosophy of Language (W)
This will be a course in the philosophy of language at it has developed over the past century and a half in the analytic tradition. We will narrow our focus even further and will concentrate primarily on meaning, reference and truth. What sorts of things can be true or false? We ordinarily claim that sentences are true or false, but are there other entities whose truth and falsity explains the truth and falsity of sentences? If there are such things—we'll call them propositions—what are they like? If there aren't such things, how do we characterize meaningfulness instead? What is it for a sentence or a proposition to be true? We think that there is a difference between a linguistic object's being meaningful and its having a referent. For example, many people would agree that 'Keith's favorite unicorn' is a meaningful expression. However, few (haters gonna hate) would say that the expression has a referent. It is difficult, however, to get clear on the relation between the meaning of an expression and its reference. We'll try to make some progress on these issues. Our study will definitely include Frege, Russell, Quine, Searle, and Kripke.

There will be a series of short response papers in which you provide a careful analysis of particular arguments in our texts. There will also be a midterm paper (roughly 10 pages) and a final paper (roughly 15 pages) which you will develop and revise in consultation with the instructor. It will be very helpful, though not absolutely necessary, for you to have some familiarity with logic and some experience in reading philosophy.

Class Format: seminar
Requirements/Evaluation: short response papers, midterm paper (10pp), final paper (15pp)
Prerequisites: previous philosophy course and familiarity with logic suggested
Enrollment Preferences: Philosophy majors
Enrollment Limit: 19

Writing Intensive
Other Attributes: PHIL Contemp Metaphysics & Epistemology Courses

PHIL 305 Existentialism and Phenomenology (W)
According to Jean-Paul Sartre, the only philosopher to ever refer to himself as an "existentialist," existence precedes essence. What is essential to human being is not any fixed set of characteristics, but rather what a human being becomes and how it defines and creates itself under conditions it does not choose. In this course, we address key themes and figures from two of the most influential movements in twentieth century European philosophy, namely, existentialism and phenomenology, a philosophical approach to which existentialism is indebted. We will discuss major works (philosophical, literary, visual) by such figures as Edmund Husserl, Martin Heidegger, Jean-Paul Sartre, Simone de Beauvoir, Albert Camus, Maurice Merleau-Ponty, and Richard Wright. Ingmar Bergman and Jean-Luc Godard. We will raise questions concerning the task of philosophy, the structure and meaning constituting function of consciousness, the relationship between self and other, the mind-body relationship, freedom, authenticity, and absurdity.

Class Format: seminar
Requirements/Evaluation: short critical response papers, occasional short class presentations based on outlines of the text, and three 5- to 6-page papers; students will be required to re-write one of the three papers in lieu of a final exam
Prerequisites: PHIL 101 or 102 or 240 or 271T or 304T or permission of instructor
Enrollment Preferences: majors and those considering a major in Philosophy
Enrollment Limit: 19
Expected Class Size: 10-15
Distributional Requirements: Division 2
Writing Intensive
Other Attributes: AMST Critical and Cultural Theory Electives

PHIL 306 The Good Life in Greek and Roman Ethics (W)
Most thoughtful human beings spend a good deal of time musing about how we ought to live and about what counts as a good life for a human being. The philosophers of ancient Greece and Rome were among the first thinkers to develop rigorous arguments in response to such musings. Much of the moral philosophy introduced in Greece and Rome remains as relevant today as when it was written. In this course, we will examine some central texts in ancient Greek and Roman moral philosophy. We will begin by reading some of Plato's early dialogues and his Republic. We will then turn to Aristotle's Nicomachean Ethics. We will then examine writings in the Stoic and Epicurean traditions, as well as Cicero's On the Ends of Good and Evil. As we proceed through the course, we will look at the way in which each thinker characterizes happiness, virtue and the relation between the two. We will also pay close attention to the way in which each of these thinkers takes the practice of philosophy to play a key role in our realization of the good human life.

This course is part of the Williams College program at the Berkshire County Jail and House of Corrections and will be held at the jail. Transportation will be provided by the college. The class will be composed equally of Williams students and inmates, and one goal of the course will be to encourage students from different backgrounds to think together about issues of common human concern.

Class Format: seminar
Requirements/Evaluation: several short response pieces. A final paper of 10-15 pages
Extra Info: may not be taken on a pass/fail basis
Enrollment Preferences: seniors & students who can demonstrate an interest in the subject matter of the class; there will not be any preference purely on the basis of major; final selection for the course will be made on the basis of an interview with the instructor
Enrollment Limit: 9
Expected Class Size: 9
Distribution Notes: meets Division 1 requirement if registration is under CLAS; meets Division 2 requirement if registration is under PHIL
Distributional Requirements: Division 2
Writing Intensive
Other Attributes: PHIL History Courses

PHIL 308 Wittgenstein's "Philosophical Investigations"
Bertrand Russell claimed that Ludwig Wittgenstein was "perhaps the most perfect example I have ever known of genius as traditionally conceived—passionate, profound, intense, and dominating." Wittgenstein's two masterpieces, the Tractatus Logico-Philosophicus and the Philosophical Investigations, stand like opposing poles around which schools of twentieth-century analytic philosophy revolve. The Wittgenstein of the Tractatus is known as the "earlier Wittgenstein," the Wittgenstein of the Investigations is known as the "later Wittgenstein." This course is an intensive, line-by-line study of the Investigations—one of the greatest (and thus, one of the most controversial) books in the history of philosophy. Aside from its overwhelming influence on 20th and 21st century philosophy and intellectual culture, any book which contains the remark, "if a lion could talk, we could not understand him," deserves serious attention.

Class Format: seminar
Requirements/Evaluation: one short midterm paper (5-7 pages) and one longer final paper (12-15 pages)
Prerequisites: PHIL 102
Enrollment Limit: 19
Expected Class Size: 12
Distributional Requirements: Division 2

PHIL 310T Wittgenstein's Later Philosophy (W)
Ludwig Wittgenstein (1889-1951) is probably the greatest philosopher of the 20th century. His later work, best known through posthumously published Philosophical Investigations, continues to influence contemporary thinking about language, mind, action, knowledge, ethics, religion, aesthetics, culture, and of course, philosophy itself. Understanding later Wittgenstein is thus vital for engaging in contemporary philosophy, but neither the interpretation nor the evaluation of his thought is straightforward or easy. Later Wittgenstein is a controversial, polarizing figure; but serious reading of his work is invariably intellectually enriching and fertile. This tutorial aims to provide students with the skills necessary for careful, serious and thorough reading of Wittgenstein's later philosophy. In the first part of the course, we will read Wittgenstein's Philosophical Investigations, one of the greatest books ever written. In the second part of the course, we will read On Certainty, and selections from other of Wittgenstein's posthumously published works: Zettel, Philosophical Grammar, Remarks on the Philosophy of Psychology, Culture and Value, Lectures and Conversations on Aesthetics, Psychology and Religious Belief, and The Big Typescript.
Throughout the course, we will consult and discuss the important secondary literature on Wittgenstein, and analyze different philosophical presuppositions and goals that motivate particular readings. The central topics of the course will be: meaning, rule following, human languages; private experiences and other minds; intention and action; knowledge and skepticism, and especially, the methods and nature of philosophy.

**Class Format:** tutorial
**Requirements/Evaluation:** tutorial attendance and participation; bi-weekly tutorial papers, each about 5 pages long (totaling 6 per student); bi-weekly oral responses to the paper of the tutorial partner
**Extra Info:** may not be taken on a pass/fail basis
**Prerequisites:** PHIL 200
**Enrollment Preferences:** Philosophy majors, intended majors, and students who can demonstrate both a strong interest in latter Wittgenstein and capacity for careful, close reading of texts
**Enrollment Limit:** 10
**Expected Class Size:** 10
**Distributional Requirements:**
- Division 2

**PHIL 315 Kant's "Critique of Pure Reason"**

Kant's *Critique of Pure Reason* is perhaps the most significant text in the history of philosophy. It puts an end to the Early Modern traditions of Rationalism and Empiricism, and it stands at the beginning of both the Analytic and Continental traditions in contemporary philosophy. Love it or hate it, you cannot ignore it. In this course, we will study the most important and influential chapters of the Critique with the help of some secondary literature.

**Class Format:** seminar
**Requirements/Evaluation:** students will be required to participate actively in discussion and write a number of papers
**Prerequisites:** PHIL 202
**Enrollment Preferences:** Philosophy majors
**Enrollment Limit:** 15
**Expected Class Size:** 10

  - PHIL History Courses

**Not Offered Academic Year 2017**
**SEM Instructor:** Justin Shaddock

**PHIL 320 Recent Continental Feminist Theory: The Enlightenment and its Critics (D)**

**Crosslistings:** PHIL 320/WGSS 321

This course explores developments in recent feminist thought influenced by philosophical currents in France and Germany (poststructuralism and critical theory.) Depending upon the year in which the course is offered, we explore topics such as the self and society, sexual difference, embodiment, critiques of reason, the psyche, new materialist theories, queer feminism, and transnational feminism. We will read from works by authors such as the following: Sandra Bartky, Iris Young, Judith Butler, Elizabeth Grosz, Luce Irigaray, Jessica Benjamin, Gayle Rubin, Rosi Braidotti, Eve Sedgwick, Lyne Huffer, Sara Ahmed, Jaister Piur, and Wendy Brown. Fiction and film may also be included.

**Class Format:** seminar
**Requirements/Evaluation:** some of the following: frequent short essays, two or three 4- to 5-page essays, class presentations, or a final project in lieu of one of the papers; students in the class will be consulted about alternatives to this plan
**Prerequisites:** WGSS 101, and a second course in WGSS, or permission of instructor
**Enrollment Preferences:** Women's, Gender and Sexuality Studies majors and Philosophy majors
**Enrollment Limit:** 10
**Expected Class Size:** 8-10
**Depart. Notes:** meets Contemporary Value Theory requirement only if registration is under PHIL
**Distributional Requirements:**
- Division 2
- Exploring Diversity
**Other Attributes:**
- WGSS Theory Courses

**Not Offered Academic Year 2017**
**SEM Instructor:** Jana Sawicki

**PHIL 321T Critical Theory: The Enlightenment and its Critics (D) (W)**

**Crosslistings:** PHIL 321/WGSS 322

"Dare to know! Have courage to use your own reason—that is the motto of Enlightenment." Thus the 18th century German philosopher Immanuel Kant exhorts his contemporaries to muster the courage to cultivate their capacity for reason. Modern faith in the prospects of universal human dignity, rational autonomy, the rights of man, individual liberty, democracy, open scientific inquiry and social and political progress depend upon it. Yet in 19th and 20th centuries we find the promise of Enlightenment tempered by the rise of nationalism and the persistence of racism, sexism, genocide, terrorism, and religious extremism as well as the emergence of wars of mass destruction, environmental degradation, and the potential for manipulation of populations by consumerist mass media. Can the promise of Enlightenment be redeemed?

In this tutorial we begin with short readings by Kant, Hegel and Marx, key sources for critical social theory. In the 20th century, possible other figures read may include: Max Horkheimer, Theodor Adorno, Herbert Marcuse, Walter Benjamin, Jurgen Habermas, Nancy Fraser, Amy Allen, Noelle McAfee, Judith Butler, Elizabeth Grosz, Michel Foucault, Jean Baudrillard, and Gilles Deleuze. Georgia Agamben, Frantz Fanon, Edward Said and Achille Mbembe, as well as current critiques of neoliberal capitalism.

Although we will not directly address diversity issues except insofar as cultural, racial, class, sexual and other differences are bound up within power or domination relations, insofar as the course examines social and political power, oppression and domination, and the possibility or viability of the idea of human emancipation it meets the EI requirement. This tutorial will be adapted for WGSS students seeking to meet a theory requirement.

**Class Format:** tutorial, students will work in pairs and meet for 75 minutes each week with the professor

**Requirements/Evaluation:** each student will write and present a 5- to 6-page paper every other week and a commentary on his or her partner's essay on alternate weeks;

**Extra Info:** evaluations are based on written work as well as level of preparation and intellectual engagement in tutorial meetings may not be taken on a pass/fail basis

**Prerequisites:** demonstrated background in modern philosophy, critical theory, political theory, or continental philosophy
**Enrollment Preferences:** current and prospective Philosophy majors and students with a sufficient background in political or critical theory
**Enrollment Limit:** 10
**Expected Class Size:** 10
**Distributional Requirements:**
- Division 2
- Writing Intensive
**Other Attributes:**
- PHIL History Courses
- WGSS Theory Courses

**TUT Instructor:** Jana Sawicki

**PHIL 322T Hume's "Treatise of Human Nature" (W)**

Hume's *A Treatise of Human Nature*, one of the greatest books in the history of philosophy, still exerts a considerable influence on contemporary epistemology, metaphysics, philosophy of science, philosophy of action, ethics and moral psychology. Unfortunately, the relevance of Hume's ideas and arguments for particular philosophical disciplines has too often led to a piecemeal reading of his work: the three books of Treatise ("Of the Understanding," "Of the Passions" and "Of Morals") are typically considered in isolation from one another. Epistemologists don't seem to think that Hume's account of human psychology, morality and taste can in any way illuminate his treatment of skepticism and natural belief, while moral philosophers often neglect Hume's conclusions about the limits of our knowledge in analyzing his conception of motivation, action, obligation and virtue. In contrast with this interpretive tendency, this tutorial will focus on Hume's science of human nature—his philosophical project in Treatise—and cultivate the discussion of different philosophical issues and arguments in light of this general aim of the work as a whole.

We will start by situating Hume's project within the historical tradition in which he thought and against which Treitse was directed. For clarification of discussion of the points made in Treatise, we will read parts of Hume's later works, especially the two Enquiries. Our reading of Hume will be
supplemented by historical and interpretive essays on his work. Throughout the course, our focus will be on three broad issues: Hume’s conception of theoretical rationality, his conception of practical rationality, and his views about the role and relevance of non-rational (on some readings, irrational) elements in a good life of a wise person. 

**Class Format:** tutorial; one-two hour long seminar meeting in the first week of classes; in subsequent weeks, tutorial pairs will meet with the instructor for 75 minutes a week, and each week will visit the tutorial partner's paper on alternate weeks; in the last week of classes, all students will write a paper and comment on the tutorial partner's paper.

**Extra Info:** may not be taken on a pass/fail basis

**Prerequisites:** PHIL 202 and two other PHIL courses; or permission of instructor

**Enrollment Preferences:** Philosophy majors

**Enrollment Limit:** 10

**Expected Class Size:** 10

**Distributional Requirements:**

**Class Format:** lecture/discussion; this class will be a roughly equal mixture of lectures, student presentations, and small group discussion.

**Requirements/Evaluation:** students will be expected to prepare a seminar presentation, to write several focused short analytical pieces, and to write a 15- to 20-page term paper in multiple drafts

**Prerequisites:** PHIL 101, PHIL 102 or permission of instructor; a prior course in logic will be extremely helpful, but is not necessary

**Enrollment Preferences:** upper-level Philosophy and Classics majors

**Enrollment Limit:** 15

**Expected Class Size:** 15

**Distribution Notes:** meets Division 2 requirement if registration is under PHIL; meets Division 1 requirement if registration is under CLAS

**PHIL 327T Foucault (D) (W)**

**Crosslistings:** PHIL 327/WGSS 327

This course begins with a brief introduction to some of Foucault's early writings but focuses on a close reading of a selection of middle and late texts that have become central to debates in contemporary philosophy on the nature of knowledge and rational belief. Epistemologists seek answers to the following kinds of questions: When is it rational to have a particular belief? What is knowledge (as opposed to mere opinion)? In order to be justified in holding a belief, must someone know (or believe) that she is justified in holding that belief? What, if anything, justifies our scientific knowledge? These questions are typically asked within a framework where the overarching goal is attaining truth and avoiding falsity. Beyond this common ground, however, epistemologists are much divided. Some maintain that these issues are solely the provinces of philosophy, using traditional a priori methods. Others maintain that these questions will only yield to methods that incorporate our broader insight into the nature of the world including, perhaps, feminist thought or science. Both stances face severe difficulties. Further, even where there is agreement as to the proper way of answering epistemological questions, there is a stunning variety of possible answers to each question.

**Class Format:** tutorial

**Requirements/Evaluation:** each student will write a 5- to 6-page paper every other week (6 in all) and comment on his or her tutorial partner's paper in class. Extra Info: may not be taken on a pass/fail basis

**Prerequisites:** at least two courses in PHIL or WGSS, or permission of instructor

**Enrollment Preferences:** current or prospective Philosophy majors

**Enrollment Limit:** 10

**Expected Class Size:** 6-10

**Department Notes:** meets Division 1 requirement only if registration is under PHIL

**PHIL 328(F) Kant's Ethics**

Although Kant initially planned for his magnum opus to comprise theoretical and practical chapters, his metaphysics and epistemology take up all of his Critique of Pure Reason while his ethics spread out over a series of works—Groundwork of the Metaphysics of Morals, Critique of Practical Reason, and Religion within the Boundaries of Mere Reason. These latter writings of Kant's had a tremendous influence on the development of subsequent moral philosophy and indeed set the stage for contemporary discussions of the nature of practical reason, motivation, freedom, and morality. Our seminar will have two aims: (1) to reconstruct the single most compelling moral theory from Kant's various ethical writings, and (2) to trace the influence of Kant's ethics in contemporary philosophy. Some of today's leading Kantian moral philosophers will visit our seminar to aid us in these tasks.

**Class Format:** seminar

**Requirements/Evaluation:** weekly reading-response essays, a 6- to 8-page midterm paper and a 10- to 12-page final paper

**Prerequisites:** a prior course in Philosophy (either at the 100-level, 201, or 202) or permission of the instructors

**Enrollment Preferences:** preference to Philosophy majors

**Enrollment Limit:** 20

**Expected Class Size:** 15

**PHIL 330 Plato (W)**

**Crosslistings:** PHIL 330/CLAS 330

Plato is one of the most important and influential thinkers in the history of the western tradition. His depiction of the trial and death of Socrates is one of the classics of western literature, and his views on ethics and politics continue to occupy a central place in our discussions 2400 years after they were written. It is, in fact, quite difficult to get through any course of study in the liberal arts without some familiarity with Plato. Nevertheless, comparatively few people realize that the views we commonly think of as "Platonic" represent only one strand in Plato's thought. For example, we commonly attribute to Plato a theory of the Forms on the basis of his claims in the so-called "middle dialogues" (mainly Republic, Phaedo, and Symposium). However, in his philosophically more sophisticated and notoriously difficult later dialogues (such as the Parmenides, Sophist, and Statesman), Plato engages in radical criticism and revision of his earlier views. In this course, we will spend the first third of the semester attempting to understand the metaphysics and epistemology in Plato's middle dialogues. We will spend the balance of the semester coming to grips with Plato's arguments in the later dialogues. We will read several complete dialogues in translation, and will also read a wide variety of secondary source material.

**Class Format:** lecture/discussion; this class will be a roughly equal mixture of lectures, student presentations, and small group discussion.

**Requirements/Evaluation:** evaluation will be based on written work (six 5- to 6-page papers), oral presentations of that work, and on oral critiques

**Extra Info:** may not be taken on a pass/fail basis

**Prerequisites:** at least two courses in PHIL or WGSS, or permission of instructor

**Enrollment Preferences:** current or prospective Philosophy majors

**PHIL 331T Contemporary Epistemology (W)**

Epistemology is one of the core areas of philosophical reflection. In this course, we will study the literatures of modern and contemporary philosophy on the nature of knowledge and rational belief. Epistemologists seek answers to the following kinds of questions: When is it rational to have a particular belief? What is knowledge (as opposed to mere opinion)? In order to be justified in holding a belief, must someone know (or believe) that she is justified in holding that belief? What, if anything, justifies our scientific knowledge? These questions are typically asked within a framework where the overarching goal is attaining truth and avoiding falsity. Beyond this common ground, however, epistemologists are much divided. Some maintain that these issues are solely the provinces of philosophy, using traditional a priori methods. Others maintain that these questions will only yield to methods that incorporate our broader insight into the nature of the world including, perhaps, feminist thought or science. Both stances face severe difficulties. Further, even where there is agreement as to the proper way of answering epistemological questions, there is a stunning variety of possible answers to each question.

**PHIL 332 Aristotle's Metaphysics (W)**

**Crosslistings:** PHIL 332/CLAS 332

In this course we will study Aristotle's *Metaphysics* concentrating on books gamma-theta. Aristotle sets out to study being qua being, or what is insofar as it is. The thoughts that Aristotle expounds in these books are instrumental in setting an intellectual agenda that dominated western thought through the Middle Ages and provided the backdrop against which the modern philosophical tradition arose. Furthermore, many of the issues that Aristotle takes up in these books remain of central importance in contemporary philosophy. Our main goal in this course is to work our way through Aristotle's text which can be extremely daunting, and to reconstruct his central positions and his arguments for these positions. We will also read selections from the vast secondary literature on Aristotle's *Metaphysics*.

**Class Format:** seminar

**Requirements/Evaluation:** discussion leadership, weekly short papers, term paper

**Extra Info:** may not be taken on a pass/fail basis

**Prerequisites:** PHIL 201, CLAS 203
PHIL 334 Greats in Moral Philosophy (W)
Crosslistings: PHIL 334/CLAS 334
Most thoughtful human beings spend a good deal of time musing about how we ought to live. The philosophers of ancient Greece and Rome were among the first thinkers to develop rigorous arguments in response to such musings. While ancient scientific theories and the philosophical systems constructed in accordance with these theories might be of interest only to scholars of the ancient world, the moral philosophy produced in Greece and Rome remains as relevant today as it was when it was written. In this course, we will closely examine several central ethical theories from the ancient world, reading several of Plato's early dialogues and the entirety of his Republic. We will then turn to Aristotle's Nicomachean Ethics, as well as selections from his Eudemian Ethics, Magna Moralia and Politics. Finally we will examine some central texts in the Stoic and Epicurean traditions, as well as some of Cicero's contributions to moral philosophy. We will pay special attention to how different thinkers conceive of the nature of happiness, the nature of virtue, and the relation between the two. We will also spend a good deal of time thinking about the moral psychology of the thinkers we read. 
Class Format: seminar
Requirements/Evaluation: several short response pieces, two 10-page papers which will involve substantial revision in light of instructor feedback, active participation in seminar meetings
Prerequisites: PHIL 221 or permission of instructor
Enrollment Preferences: Philosophy and Classics majors
Enrollment Limit: 15
Expected Class Size: 10-15
Distribution Notes: meets Division 2 requirement if registration is under CLAS; meets Division 1 requirement if registration is under PHIL.

Division 2
Writing Intensive
Not Offered Academic Year 2017

PHIL 337T Justice in Health Care (W)
Justice is a notoriously complex and elusive philosophical concept, the conditions of which are even more difficult to articulate within real world institutions and contexts than in the abstract. In this course we'll explore justice as a fundamental moral principle and as a desideratum of the US health care system. The first portion of the course will be devoted to considering general theories of justice as well as alternative conceptions of justice within the health care context. This will provide the background for subsequent examination of specific topics, which may include, among others: justice in health care financing and reform, which may itself include an analysis of the Affordable Care Act; justice in health care rationing, with particular attention to the relationship between rationing criteria and gender, race,* disability, and age; justice in the procurement and allocation of organs for transplantation; AIDS and personal responsibility for illness; and justice in medical research, including "double standards" for research conducted in less developed countries. 
Class Format: tutorial
Requirements/Evaluation: evaluations will be based on written work, oral presentations of that work, and on oral critiques
Extra Info: may not be taken on a pass/fail basis
Prerequisites: none
Enrollment Preferences: Philosophy majors, students in the Public Health Program, and students committed to taking the tutorial
Enrollment Limit: 10

Writing Intensive
Other Attributes: 
Not Offered Academic Year 2017

PHIL 338 Contemporary Metaethics (W)
We often speak as if moral judgments can be true or false, warranted or unwarranted. But how should objectivity in this domain be understood? Is moral objectivity like scientific objectivity, assuming we have a clear sense of what that involves? If not, should that concern us? Are there other models for understanding moral objectivity besides science? While answers to such questions are implicit in historically important accounts of morality, these issues became the topic of explicit, sustained debate in the twentieth century. Our focus will be on recent influential work in this area. We will examine several different approaches in depth, including realism, constructivism, expressionivism, and skepticism. 
Class Format: seminar
Requirements/Evaluation: short response papers, midterm paper, final paper, attendance and participation
Extra Info: may not be taken on a pass/fail basis
Prerequisites: two courses in PHIL (including one of the following: a 100-level course, PHIL 201, or PHIL 292)
Enrollment Preferences: Philosophy majors and those considering the Philosophy major

Not Offered Academic Year 2017

PHIL 339 Mind and World
We will consider a series of debates in 20th Century Analytic Philosophy concerning the relationship between the mind and the world. Questions include: Does the world decide the truth and falsity of all our beliefs? Or are some of our beliefs true in virtue of their meanings alone? Do our beliefs have their meanings one-by-one? Or can meaning be allocated only to entire sets of beliefs? Could the world be made up of sensory properties only? Or, must sensible properties be organized spatiotemporally? Must they inhere in substances? How do our thoughts refer to objects? How does our experience justify our beliefs?
Class Format: seminar
Requirements/Evaluation: five papers of six to eight pages
Prerequisites: none
Enrollment Preferences: none
Enrollment Limit: none
Expected Class Size: 10
Distributional Requirements: Division 2
Other Attributes: PHIL Contemp Metaphysics & Epistemology Courses

PHIL 340T(S) Locke and Leibniz (W)
Modern philosophy centers on two debates: Empiricism vs. Rationalism and Realism vs. Idealism. Locke is the first great Empiricist Realist, and Leibniz the greatest Rationalist Idealist. The debate between Empiricism and Rationalism concerns whether all our knowledge derives from experience, or any is innate. The debate between Realism and Idealism concerns whether...
reality is composed of mind-independent matter, or mind-like substances. Leibniz wrote his New Essays in 1704 as a critical response to Locke's Essay of 1690. He hoped it would occasion a public debate between Locke and himself, and prompt the intellectual community to decide, once and for all, between Empiricism and Rationalism, Realism and Idealism, and on related issues concerning the mind, language, truth, God, natural kinds, causation, and freedom. The debate never transpired - indeed, Leibniz suppressed his New Essays - because of Locke's death in 1705. This tutorial will bring to life the debate between Locke and Leibniz, and enable students to reach their own conclusions about Empiricism vs. Rationalism, Realism vs. Idealism, and related issues.

Class Format: tutorial
Requirements/Evaluation: weekly tutorial papers and response essays
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

PHIL 348T Philosophy, Politics and Religion: Hobbes and Spinoza Revisited Today (W)

"The mob has no ruler more potent than superstition." (Spinoza, A Theologico-Political Treatise, preface)

What are the connections between the political and the religious, and how to deal with them from a philosophical point of view? These are two of the most recurrent questions in modern political philosophy, but they have in no way lost their actuality in our own time and society. Hobbes and Spinoza may both, each in their own specific way, be considered as two major figures of Modern Philosophy, where Hobbes is mainly seen as a pure political philosopher, while Spinoza has also been read as a metaphysician. In a more recent reception however, focus has been put on Spinoza's own political philosophy, showing both how his theory is influenced by Hobbes, and how it diverges from it on significant points. In both Hobbes and Spinoza, we find two fundamental theses concerning religion as a phenomenon, and concerning the connection between politics and religion. The first one is that religion - and religiosity in any form - is a strictly human phenomenon, that is, has fundamentally nothing to do with any transcendent reality. The second one is that religion has an exclusively political function, and that this function can be either positive or negative - that is, beneficial for the state, or harmful.

The course proposes a joint reading of Hobbes and Spinoza, taking its point of departure in their common terminology and problems (conatus, materialism, affectivity, force and power, individual and multitude) in order to understand, in each of the two philosophers, the close connection between religion and politics understood as affectivity: the necessity of politics and the inevitability of religion, and their mutual implications. Beyond Hobbes and Spinoza, we will also investigate how their theories are highly relevant for contemporary political theorists such as Schmitt, Agamben, Hardt and Negri, Mouffe and Laclau and Balibar - and how, through them, it may be possible to still see both Hobbes and Spinoza as forceful alternatives for our thinking about the political and the religious today.

Class Format: tutorial
Requirements/Evaluation: each week one student will write a 5- to 6-page paper on the assigned reading and the other student will write a 2- to 3-page critical response paper
Extra Info: roles will be reversed the following week; in all, each student will write 5 papers and 5 critical response papers may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: one previous course in philosophy or critical theory, or permission of instructor
Enrollment Preferences: Philosophy majors and critical theory students

PHIL 360 The Political Thought of Frantz Fanon (W)

Crosslistings: AFR 360/PSCI 370/PHIL 360/LEAD 360

Martinican, psychiatrist, philosopher, and revolutionary Frantz Fanon was among the leading critical theorists and Africana thinkers of the twentieth century. Fanon ushered in the decolonial turn in critical theory, a move calling on those both within and outside of Europe to challenge the coloniality of the age and to forge a new vision of politics in the postcolonial period. This course is an advanced seminar devoted to a comprehensive examination of Fanon’s political thought. We will begin with an analysis of primary texts by Fanon and end by considering how Fanon has been interpreted by his contemporaries as well as activists and critical theorists writing today.

Class Format: seminar
Requirements/Evaluation: evaluation will be based upon attendance and participation, weekly online reading response papers, a class presentation, two 7-page essays, and one 20-page final research paper
Prerequisites: none
Enrollment Preferences: Africana Studies concentrators
Enrollment Limit: 19
Expected Class Size: 10
Distributional Requirements: Division 2

AMST Critical and Cultural Theory Electives
Not Offered Academic Year 2017

PHIL 379 American Pragmatism

Crosslistings: PHIL 379/AMST 379

Along with jazz, pragmatism stands as the greatest uniquely American contribution to world culture. As the music wails in the background, we will study the classic pragmatists—William James, C. S. Peirce, and John Dewey. We will continue with the contemporary inheritors of the tradition: Cornel West, Richard Rorty, and Hilary Putnam. Although it has influenced both analytic and continental philosophy, pragmatism is a powerful third philosophical movement. Always asking what practical difference would it make, our authors investigate the central questions and debates of philosophy, from epistemology and metaphysics to ethics and religion. Rather than seeing philosophy as an esoteric discipline, the pragmatic philosophers (with the possible exception of Peirce) see philosophy as integral to our culture and see themselves as public intellectuals.

Class Format: seminar
Requirements/Evaluation: final paper, several short assignments
Prerequisites: at least two PHIL courses
Enrollment Preferences: Philosophy and American Studies majors, then seniors and juniors of any major
Enrollment Limit: 25
Expected Class Size: 12-15
Distributional Requirements: Division 2

PHIL 380F Relativism (W)

The aim of the course is to survey, analyze and discuss many varieties of relativism—semantic, epistemic, ontological and moral—from Plato's
Theaetetus to contemporary social constructivism. We will pay special attention to the structure of arguments for and against relativism, as well as to the philosophical motivations and perceived consequences of its endorsement or rejection. We will thus be led to discuss some of the concepts common to epistemology, metaphysics and ethics: reason, justification, objectivity, understanding, reality and truth. Some of the questions we will consider are: Are moral standards relative to cultural frameworks? Are there incompatible but equally valid ways of describing the world? Is rationality relative to cultural norms? Is relativism a form of skepticism? Is it forced on people who endorse cultural pluralism as their political ideal as the only tenable philosophical position? Our readings will include the relevant works of Plato, Sextus Empiricus, Carnap, Quine, Davidson, Goodman, Elgin, Hacking, Krausz, Foot, and Williams, among others.

Class Format: seminar
Requirements/Evaluation: class attendance, preparedness and presentation; weekly small group discussions and one or two large group presentations in class; three short writing assignments (1-2 pgs. each) and three 5 pages long papers
Prerequisites: two philosophy courses, or consent of the instructor
Enrollment Limit: 19
Expected Class Size: 7-10
Distributional Requirements: Division 2
Writing Intensive
Other Attributes: PHIL Contemp Metaphysics & Epistemology Courses

Fall 2016
SEM Section: 01 MR 02:35 PM 03:50 PM Instructor: Bojana Mladenovic

PHIL 388T Consciousness (W)
The nature of consciousness remains a fundamental mystery of the universe. Our internal, felt experience—what chocolate tastes like to oneself, what it is like to see the color red, or, more broadly, what it is like to have a first person, knowing perspective at all—resists explanation in any terms other than the conscious experience itself in spite of centuries of intense effort by philosophers and, more recently, by scientists. As a result, some prominent researchers propose that the existence of consciousness requires a revision of basic physics, while others (seemingly desperately) deny that consciousness exists at all. Those positions remain extreme, but the challenge that consciousness poses is dramatic. It is at the same time the most intimately known fact of our humanity and science’s most elusive puzzle.

In this tutorial we will read the contemporary literature on consciousness. We will concentrate both on making precise the philosophical problem of consciousness and on understanding the role of the relevant neuroscientific and cognitive research. Tutorial partners will have an opportunity to spend the end of the semester working on a special topic of their choosing including, for instance, consciousness and freewill, Pain and anesthesia, consciousness and artificial intelligence, or disorders of consciousness.

Class Format: tutorial; expect several short lectures by the instructor over the course of the semester where all the tutorial members converge.
Requirements/Evaluation: participants will present substantial written work in the tutorial every other week, and will be responsible for commenting on their tutorial partner's work on off weeks
Extra Info: may not be offered on a pass/fail basis
Prerequisites: PHIL 102 and at least one upper-level course in PHIL
Enrollment Preferences: Philosophy majors, Neuroscience or Cognitive Science concentrators, open to sophomores with permission of the instructor; every effort will be made to pair students according to similar or complimentary background
Enrollment Limit: 10

PHIL 391T The Ethics of Hume and Kant (W)
David Hume and Immanuel Kant are indisputably among the most influential figures in the western philosophical tradition. Interestingly, each regarded his work in epistemology and metaphysics as a mere prelude to his work in moral philosophy. In both domains, Kant took himself to be responding directly to Hume, whom he credited with awakening him from his dogmatic slumber. In this tutorial we shall study their core works in moral philosophy, in which they developed concepts of practical rationality, motivation, freedom, and morality. For Hume, we’ll read Books II and III of A Treatise of Human Nature, the Second Enquiry, and several essays, including “Of the Standard of Taste.” For Kant, we’ll read Groundwork of the Metaphysics of Morals and Critique of Practical Reason, along with related essays. Rich and intriguing in their own right, these texts are particularly rewarding when read together, as they articulate profoundly different views of the nature of human reason, agency, and sociality. It is no exaggeration to say that these two Kantian formulations have set the stage for much current work on these issues in contemporary ethics. One happy consequence of the enduring quality of their work is an abundance of superb secondary literature, which we’ll draw upon to supplement our study of the primary texts.

Class Format: tutorial
Requirements/Evaluation: students meet with instructor in pairs for 1 hour each week; each student will write a 5- to 6-page paper every other week (6 in all) and comment on their tutorial partner's paper in alternate weeks
Extra Info: emphasis will be placed on developing skills in reading, interpreting and oral argument, as well as critical reading and writing, may not be taken on a pass/fail basis
Prerequisites: a 100-level PHIL course, PHIL 202, or permission of instructor
Enrollment Preferences: current and prospective Philosophy majors
Enrollment Limit: 10
Expected Class Size: 10
Distributional Requirements: Division 2
Writing Intensive
Other Attributes: PHIL History Courses

Not Offered Academic Year 2017
TUT Instructor: Melissa Barry

PHIL 393T Nietzsche and His Legacy (W)
The late 20th Century philosopher Richard Rorty characterized the present age as “post-Nietzschean.” Indeed Nietzsche's influence has been pervasive. German philosopher Martin Heidegger thought he represented the culmination of Western metaphysics; French Nietzscheans such as Foucault, Derrida and Deleuze as well as French feminist Luce Irigaray appropriate Nietzschean themes and concepts in their critical engagements with the Western philosophical tradition; and Anglo-American moral philosophers such as Bernard Williams, Alisdair Maclntyre, and Philippa Foot (as well as Rorty) respond to and engage his critique of modern morality. In this tutorial we address some (certainly only some) of the current debates in critical and ethical theory that have been fueled by Nietzsche's work. Key ideas and concepts such as the death of god, the use and abuse of history, the eternal recurrence, will to power, and master and slave morality will be addressed. Nietzschean texts may include selections from: Untimely Meditations, The Gay Science,Beyond Good and Evil, Thus Spoke Zarathustra, The Genealogy of Morals, Twilight of the Idols, and Ecce Homo. I may also pair some Nietzschean texts with readings from representatives of both the Anglo-American and European critical reception of his work (Bataille, Heidegger, Habermas, Foucault, Irigaray, Deleuze, Derrida Williams, Rorty, Reginster, Hussian, and so forth). While students will not regularly be required to read the latter, any who want to pursue this legacy will be supported in doing so.

Class Format: tutorial (10) 2 seminar meetings, students will work in pairs
Requirements/Evaluation: each student will write & present four 5-6-page papers every other week (except seminar weeks) and a commentary on his or her partner’s essay on alternate weeks; seminar meetings will be held at the beginning and end of term
Extra Info: may not be taken on a pass/fail basis
I may add an additional seminar at midterm; evaluations are based on written work as well as level of intellectual engagement in tutorial and seminar meetings
Prerequisites: two courses in philosophy, preferably either Ancient and/or Modern surveys or 19th Century course, or demonstrated background in Critical Theory, or permission of instructor
Enrollment Preferences: current and prospective Philosophy majors as well as students concentrating unoffically in critical theory; I am open to first year students, but any first year interested should make an appointment with me before adding the course.
Enrollment Limit: 10

PHYSICS (DIV III)

Chair: Professor DAVID TUCKER-SMITH

What is light? How does a laser work? What is a black hole? What are the fundamental building blocks of the universe? Physics majors and Astrophysics majors study these and related questions to understand the physical world around us, from the very small to the very large. A physics student practices the experimental methods used to learn about this world and explores the mathematical techniques and theories developed to explain these physical phenomena. A Physics major or Astrophysics major serves as preparation for further work in physics, astrophysics, applied physics, other sciences, engineering, medical research, science teaching and writing, and other careers involving critical thinking, problem-solving, and insight into the fundamental principles of nature.

**ASTROPHYSICS MAJOR**
The Physics Department, in cooperation with the Astronomy Department, offers a major in astrophysics consisting of (at least): 6 or 7 courses in Physics, 3 or 4 in Astronomy, and 1 in Mathematics. The core sequence of the Astrophysics major is the same as the Physics major described below (except that Physics 302, although strongly recommended, is not required). Students intending to pursue graduate study in astrophysics will need to take upper-level physics electives beyond the basic requirements for the major. Honors work in Astrophysics may be in either physics or astronomy. Students majoring in Astrophysics are expected to consult early and often with faculty from both departments in determining their course selections. The detailed description of the Astrophysics major is given under "Astronomy," along with a description of the Astronomy major also offered by that department.

PHYSICS MAJOR

Introductory Courses

Students considering a major in physics should take both physics and mathematics as first-year students. A student normally begins with either Physics 131 or Physics 141:

- Physics 131 Introduction to Mechanics. This is designed as a first course in physics. It is suitable for students who either have not had physics before or have had some physics but are not comfortable solving “word problems” that require calculus.
- Physics 141 Mechanics and Waves. Students in this course should have solid backgrounds in science and calculus, either from high school or college, including at least a year of high school physics.

The Department of Mathematics will place students in the appropriate introductory calculus course. The physics major sequence courses all make use of calculus at increasingly sophisticated levels. Therefore, students considering Physics major should continue their mathematical preparation without interruption through the introductory calculus sequence (Mathematics 130, 140, and 150 or 151). Students are encouraged to take Physics 210 as early as possible. Physics 210 is cross listed as Mathematics 210 for the benefit of those students who wish to have the course listed with a MATH prefix.

ADVANCED PLACEMENT

Students with unusually strong backgrounds in calculus and physics may place out of Physics 141 and either: 1) begin with the special seminar course Physics 151 in the fall (typically followed by Physics 210 in the spring), or 2) begin with Physics 142 in the spring (possibly along with Physics 210). Students may take either 141 or 142 but not both. On rare occasions a student with an exceptional background will be offered the option of enrolling in Physics 201. Placement is based on AP scores, consultation with the department, and results of the placement exam administered during First Days. The exam can also be taken later in the year by arrangement with the department chair. The exam covers classical mechanics, basic wave phenomena, and includes some use of calculus techniques.

REQUIREMENTS FOR THE MAJOR

A total of ten courses in physics and mathematics are required to complete the Physics major. Students who place out of both Physics 141 and Physics 142 and begin their studies in Physics 201 are required to take a total of nine courses.

Required Physics Sequence Courses

- Physics 141 Mechanics and Waves
- or Physics 131 Introduction to Mechanics
- Physics 142 Foundations of Modern Physics
- or Physics 151 Seminar in Modern Physics
- Physics 201 Electricity and Magnetism
- Physics 202 Waves and Optics
- Physics 210 Mathematical Methods for Scientists
- Physics 301 Quantum Physics
- Physics 302 Statistical Mechanics and Thermodynamics

Required Mathematics Course

Mathematics 150 or 151 (formerly 105 or 106) Multivariable Calculus

Students entering with Advanced Placement in mathematics may obtain credit toward the major for the equivalent Mathematics 150 or 151 taken elsewhere.

At least two more physics courses above the 100 level (or other approved courses as noted below) must be taken, bringing the total number of courses for the major to ten.

Options

Mathematics 140 (formerly 104) may be counted if taken at Williams.
Mathematics 209 may substitute for Physics 210.
Astronomy 111 may count in place of Physics 141 if a student places out of 141 (see “advanced placement” above).

An additional Astronomy or Astrophysics course above the introductory level is acceptable for the astrophysics major may be counted.

Two approved Division III courses above the introductory level may be substituted for one Physics course. Approval is on an individual basis at the discretion of the department chair.

Honors work is in addition to completion of the basic major so Physics 493 and 494 do not count towards the ten courses in the major.

PREPARATION FOR ADVANCED STUDY

Students who may wish to do graduate work in physics, astrophysics, or engineering should elect courses in both physics and mathematics beyond the minimum major requirements. The first-year graduate school curriculum in physics usually includes courses in quantum mechanics, electromagnetic theory, and classical mechanics that presuppose intermediate level study of these subjects as an undergraduate. Therefore, students planning graduate work in physics should elect all of the following courses:

- Physics 402T Applications of Quantum Mechanics
- Physics 405T Electromagnetic Theory
- Physics 411T Classical Mechanics

ADVISING

Both majors and non-majors are encouraged to consult with the department chair or course instructors about course selections or other matters.

THE DEGREE WITH HONORS IN PHYSICS

The degree with honors in Physics will be awarded on the basis of a senior thesis presenting the results of a substantial experimental or theoretical investigation carried out under the direction of a faculty member in the department. There is no rigid grade point average required for admission to the program or for the awarding of the degree with honors, but it is normally expected that honors students will maintain at least a B average in physics and mathematics. Students will normally apply for admission to the program early in the spring of their junior year and during senior year these students will normally elect Physics 493, 494, and 494 in addition to the usual requirements for the major. At the end of winter study, the department will decide whether the student will be admitted to honors candidacy. Both a written thesis and a colloquium presentation of the results are required. The degree with honors will be awarded to those who meet these requirements with distinction. The highest honors will be awarded to those who fulfill their requirements with unusually high distinction.

Honors candidates will also be required to participate in departmental colloquium talks.

STUDY ABROAD

The physics community is international in scope and a career in physics (or a related field) can provide many opportunities for travel and contact with individuals from outside the United States. The physics major at Williams is a carefully structured four-year program designed to prepare students who are so inclined for graduate study at leading research institutions. While it is possible to complete the major requirements in three years, such a major will not usually not lead to further study in the field. With careful early planning on the part of a student, and close consultation with the department chair, it is possible to complete a strong major and still study abroad provided the foreign institution can provide courses which reasonably substitute or supplement those in the Williams major program. You can find general study away guidelines for Physics [here](#).

OPTIONS FOR NON-MAJORS

Many students want to take a self-contained and rigorous full-year survey of physics. For such students, the most appropriate sequence will be either Physics 131 or Physics 141 followed by Physics 132, depending on the student’s background in science and mathematics (see Introductory Courses above). Either of these sequences satisfies the physics requirement for medical school.

The department also offers one semester courses designed for non-majors.

PHYS 107 Spacetime and Quanta (Q)
Quantum mechanics and Einstein's relativity both drastically altered our view of the physical world when they were developed in the early twentieth century. In this course we will learn about the central concepts that define relativity and quantum mechanics, along with some of the diverse phenomena the two theories describe. These investigations will prepare us to discuss recent developments in cosmology, where observations have produced a surprising picture for the make-up of our universe, and particle physics, where the Large Hadron Collider continues to extend our understanding of nature to higher energies and shorter distances. This course is intended for students whose primary interests lie outside of the natural sciences and mathematics. The mathematics used will be algebra and trigonometry.

Class Format: lecture twice a week, except five Thursdays when the class will break into two conference sections
Requirements/Evaluation: evaluation will be based on weekly problem sets, quizzes, two midterms, and a final exam, all with a significant quantitative component.
Prerequisites: none
Enrollment Preferences: by seniority
Expected Class Size: 50 total*

Department Notes: *20 per conference section

Distributional Requirements:
Division 3
Quantitative/Formal Reasoning

Other Attributes:
SCST Related Courses

Not Offered Academic Year 2017
LEC: Instructor: David Tucker-Smith

PHYS 108(F) Energy Science and Technology (Q)
Crosslistings: PHYS 108/ENVI 108
Energy use has skyrocketed in the United States and elsewhere in the world, causing significant economic and political shifts, as well as concerns for the environment. This course will address the physics and technology of energy generation, consumption, and conservation. It will cover a wide range of energy sources, including fossil fuels, hydropower, solar energy, wind energy, and nuclear energy. We will discuss energy use in transportation, manufacturing, building heating, and building lighting. Students will learn to compare the efficiencies and environmental impacts of various energy sources and uses.

**Class Format:** lecture twice a week, except five Thursdays when the class will break into two conference sections

**Requirements/Evaluation:** evaluation will be based on weekly assignments, two hour tests, and a final project; all of these will be substantially quantitative

**Prerequisites:** high school physics, high school chemistry, and mathematics at the level of MATH 130

**Enrollment Limit:** 40

**Expected Class Size:** 40

PHYS 109 Sound, Light, and Perception (Q)

Light and sound allow us to perceive the world around us, from appreciating music and art to learning the details of atomic structure. Because of their importance in human experience, light and sound have long been the subject of scientific inquiry. How are sound and light related? How do physiology and neural processing allow us to hear and see the world around us? What are the origins of color and musical pitch? This course introduces the science and technology of light and sound to students not majoring in physics. We will start with the origins of sound and light as wave phenomena, and go on to topics including color, the optics of vision, the meaning of musical pitch and tone, and the physical basis of hearing. We will also discuss some recent technological applications of light, such as lasers and optical communications.

The class will meet for two 75-minute periods each week for a variable mixture of lecture, discussion, and hands-on, interactive experiments.

**Class Format:** lecture/lab/discussion; each student will attend the Friday lecture plus one conference section weekly

**Requirements/Evaluation:** evaluation will be based on class participation, problem sets, in-class exams, oral presentations, and a final exam, all with a quantitative component

**Prerequisites:** none

**Enrollment Limit:** 40

**Expected Class Size:** 40

**Distributional Requirements:**

Division 3

Not Offered Academic Year 2017

LEC  Instructor: Protik Majumder

PHYS 131(F) Introduction to Mechanics (Q)

We focus first on the Newtonian mechanics of point particles: the relationship between velocity, acceleration, and position; the puzzle of circular motion; forces, Newton's laws, and gravitation; energy and momentum; and the physics of vibrations. Then we turn to the basic properties of waves, such as interference and refraction, as exemplified by sound and light waves. We also study the optics of lenses, mirrors and the human eye. This course is not intended for students who have successfully completed an AP physics course in high school.

**Class Format:** lecture, three hours per week; laboratory, three hours approximately every other week

**Requirements/Evaluation:** evaluation will be based on exams, labs, and weekly problem sets, of which a student will have a substantial quantitative component

**Prerequisites:** MATH 130; students who scored 4 or 5 on an AP physics exam, or 6 or 7 on the IB Physics HL exam may not take this course and are encouraged to take PHYS 141 instead

**Enrollment Limit:** 24/lab

**Expected Class Size:** 60

**Dept. Notes:** PHYS 131 can lead to either PHYS 132 (for students wanting a one-year survey of physics) or PHYS 142 (for students considering a Physics or Astrophysics major)

**Distributional Requirements:**

PHYS 132(S) Electromagnetism and the Physics of Matter (Q)

This course is intended as the second half of a one-year survey of physics with some emphasis on applications to medicine. In the first part of the semester we will focus on electromagnetic phenomena. We will introduce the concept of electric and magnetic fields and study in detail the way in which electrical circuits and circuit elements work. The deep connection between electric and magnetic phenomena is highlighted with a discussion of Faraday's Law of Induction. Following our introduction to electromagnetism we will discuss some of the most central topics in twentieth-century physics, including Einstein's theory of special relativity and some aspects of quantum theory. We will end with a treatment of nuclear physics, radioactivity, and uses of radiation.

**Class Format:** lecture, three hours per week; laboratory, three hours approximately every other week; conference section 1 hour approximately every other week

**Requirements/Evaluation:** evaluation will be based on weekly problem sets, labs, quizzes and exams

**Prerequisites:** PHYS 131 or 141 or permission of instructor, and MATH 130 (formerly 103)

**Enrollment Limit:** 22 per lab

**Expected Class Size:** 60

PHYS 142(S) Foundations of Modern Physics (Q)

Newtonian Mechanics, spectacular as it is in describing planetary motion and a wide range of other phenomena, only hints at the richness of behaviors seen in the universe. Special relativity has extended physics into the realm of high speeds and high energies and requires us to rethink our basic notions of space and time. Quantum mechanics successfully describes atoms, molecules, and solids while at the same time calling into question our notions of what can be predicted by a physical theory. Statistical physics reveals new behaviors that emerge when many particles are present in a system. This course will survey some of these important ideas, and can serve either as a terminal course for those seeking to complete a year of physics or can serve as the basis for more advanced study of these topics.

**Class Format:** lecture, three hours per week; laboratory, three hours approximately every other week; conference section 1 hour approximately every other week

**Requirements/Evaluation:** evaluation will be based on weekly homework, labs, two hour tests, and a final exam, all of which have a substantial quantitative component

**Prerequisites:** PHYS 141 and MATH 130 (formerly 103), or equivalent; students may not take both PHYS 142 and PHYS 151; PHYS 131 may substitute for PHYS 141 with the permission of instructor

**Enrollment Limit:** 22 per lab

**Expected Class Size:** 30

**Distributional Requirements:**

**PHYS 202(S) Vibrations, Waves and Optics (Q)**

Waves and oscillations characterize many different physical systems, including vibrating strings, springs, water waves, sound waves, electromagnetic waves, and gravitational waves. Quantum mechanics even describes particles with wave functions. Despite these diverse settings waves exhibit several common characteristics, so that the understanding of a few simple systems can provide insight into a wide array of phenomena. In this course we begin with the study of oscillations of simple systems with only a few degrees of freedom. We then move on to study transverse and longitudinal waves in continuous media in order to gain a general description of wave behavior. The rest of the course focuses on electromagnetic waves and in particular on optical examples of wave phenomena. In addition to well known optical effects such as interference and diffraction, we will study a number of modern applications of optics such as short pulse lasers and optical communications. Throughout the course mathematical methods useful for higher level physics will be introduced.

**Class Format:** lecture, three hours per week; laboratory, three hours per week.

**Requirements/Evaluation:** evaluation will be based on problem sets, labs, two one-hour tests, and a final exam, all of which have a substantial quantitative component.

**Prerequisites:** PHYS 201; co-requisite: PHYS/MATH 210 or MATH 209 or permission of instructor

**Enrollment Limit:** none

**Expected Class Size:** 20

**Distributional Requirements:**
- Division 3
- Quantitative/Formal Reasoning
- MTSC Related Courses

---

**PHYS 210(S) Mathematical Methods for Scientists (Q)**

Crosslistings: PHYS 210/MATH 210

This course covers a variety of mathematical methods used in the sciences, focusing particularly on the solution of ordinary and partial differential equations. In addition to calling attention to certain special equations that arise frequently in the study of waves and diffusion, we develop general techniques such as looking for series solutions and, in the case of nonlinear equations, using phase portraits and linearizing around fixed points. We study some simple numerical techniques for solving differential equations. A series of optional sessions in Mathematica will be offered for students who are not already familiar with this computational tool.

**Class Format:** lecture, three hours per week

**Requirements/Evaluation:** evaluation will be based on weekly problem sets and several in-class exams, all of which have a substantial quantitative component.

**Prerequisites:** MATH 150 or 151 and familiarity with Newtonian mechanics at the level of PHYS 131

**Enrollment Limit:** 50

**Expected Class Size:** 30

**Distributional Requirements:**
- Division 3
- Quantitative/Formal Reasoning

**Other Attributes:**
- MTSC Related Courses

---

**PHYS 321(F) Quantum Physics (Q)**

This course serves as a one-semester introduction to the history, formalism, and phenomenology of quantum mechanics. We begin with a discussion of the historical origins of the quantum theory, and the Schrödinger wave equation. The concepts of matter waves and wave-packets are introduced. Solutions to one-dimensional problems will be treated prior to introducing the system which serves as a hallmark of the success of quantum theory, the three-dimensional hydrogen atom. In the second half of the course, we will develop the important connection between the underlying mathematical formalism and the physical predictions of the quantum theory and introduce the Heisenberg formalism. We then go on to apply this knowledge to several important problems such as the origin of atomic and nuclear physics, and concentrating on applications involving angular momentum and spins.

**Class Format:** lecture, three hours per week; laboratory, three hours per week.

**Requirements/Evaluation:** evaluation will be based on weekly problem sets, labs, a mid-term exam, and final exam, all of which have a substantial quantitative component.

**Prerequisites:** PHYS 202 and PHYS/MATH 210 or MATH 209

**Enrollment Limit:**

**Expected Class Size:** 15

**Distributional Requirements:**
- Division 3
- Quantitative/Formal Reasoning
- MTSC Related Courses

---

**PHYS 302(S) Stat Mechanics & Thermodynamics (Q)**

Macroscopic objects are made up of huge numbers of fundamental particles interacting in a stable world according to the Schrödinger equation, Newton's and Coulomb's Laws—and these objects can be described by macroscopic properties like temperature, pressure, magnetization, heat capacity, conductivity, etc. In this course we develop the tools of statistical physics, which will allow us to predict the cooperative phenomena that emerge in large ensembles of interacting particles. We will apply those tools to a wide variety
of physical questions, including the behavior of gasses, polymers, heat engines, magnets, and electrons in solids.

**Class Format:** lecture/discussion, three hours per week; laboratory, three hours per week

**Requirements/Evaluation:** evaluation will be based on weekly problem sets, exams, and labs, all of which have a substantial quantitative component

**Prerequisites:** required: PHYS 201, PHYS/MATH 210 or MATH 209; recommended: PHYS 202, PHYS 301

**Enrollment Limit:** 24

**PHYS 316(S) Protecting Information: Applications of Abstract Algebra and Quantum Physics (Q)**

Crosslistings: MATH 316/PHYS 316

Living in the information age, we find ourselves depending more and more on codes that protect messages against either noise or eavesdropping. This course examines some of the most important codes currently being used to protect information, including linear codes, which in addition to being mathematically elegant are the most practical codes for error correction, and the RSA public key cryptographic scheme, popular nowadays for internet applications. We also study the standard AES system as well as an increasingly popular cryptographic strategy based on elliptic curves. Looking ahead by a decade or more, we show how a quantum computer could crack the RSA scheme in short order, and how quantum cryptographic devices will achieve security through the inherent unpredictability of quantum events.

**Class Format:** lecture

**Requirements/Evaluation:** evaluation will be based on homework sets and exams

**Prerequisites:** PHYS/MATH 210 or MATH 250 (possibly concurrent) or permission of instructors

**Enrollment Preferences:** discretion of the instructors

**Enrollment Limit:** 50

**Expected Class Size:** 35

**Dept. Notes:** students not satisfying the course prerequisites but who have completed MATH 200 or MATH 209 are particularly encouraged to ask to be admitted

Crosslistings: BIOL 319/MATH 319/CHEM 319/PHYS/319/CSCI 319

What can computational biology teach us about cancer? In this capstone experience for the Genomics, Proteomics, and Bioinformatics program, computational analysis and wet-lab investigations will inform each other, as students majoring in biology, chemistry, computer science, mathematics/statistics, and physics contribute their own expertise to explore how ever-growing gene and protein data-sets can provide key insights into human disease. In this course, we will take advantage of one well-studied human cancer cell lines, students will uncover regulatory mechanisms that are aberrantly altered by siRNA knockdown of putative regulatory components. This functional genomic strategy will be coupled with independent projects using phosphorylation-state specific antisera to test our hypotheses. Proteomic analysis will introduce the students to de novo structural prediction
and threading algorithms, as well as data-mining approaches and Bayesian modeling of protein network dynamics in single cells. Flow cytometry and mass spectrometry will be used to study networks of interacting proteins in colon tumor cells.

**Class Format:** two afternoons of lab, with one hour of lecture, per week

**Requirements/Evaluation:** lab participation, several short homework assignments, one lab report, a programming project, and a grant proposal

**Prerequisites:** BIOL 202; students who have not taken BIOL 202 but have taken BIOL 101 and CSCI 315 or PHYS 315, may enroll with permission of instructor. No prior computer programming experience is required.

**Enrollment Preferences:** seniors, then juniors, then sophomores

**Enrollment Limit:** 12

**Expected Class Size:** 12

**Dept. Notes:** does not satisfy the distribution requirement in the Biology major

**Distributional Requirements:** Division 3

**Quantitative/Formal Reasoning**

**Other Attributes:** BGNP Core Courses

**BIMO Interdepartmental Electives**

**LAB Section:** 03  CANCELLED

**PHYS 321 Introduction to Particle Physics (Q)**

The Standard Model of particle physics incorporates special relativity, quantum mechanics, and almost all that we know about elementary particles and their interactions. This course introduces some of the main ideas and phenomena associated with the Standard Model. After a review of relativistic kinematics, we will learn about the symmetries in particle physics, Feynman diagrams, and selected applications of quantum electrodynamics, the weak interactions, and quantum chromodynamics. We will conclude with a discussion of spontaneous symmetry breaking and the Higgs mechanism.

**Class Format:** lecture

**Requirements/Evaluation:** weekly problem sets, two midterm exams, and a final exam

**Prerequisites:** PHYS 301, which may be taken concurrently

**Enrollment Limit:** none

**Expected Class Size:** 15

**Distributional Requirements:** Division 3

**Quantitative/Formal Reasoning**

**Not Offered Academic Year 2017**

**LEC Instructor:** David Tucker-Smith

**PHYS 402T(S) Applications of Quantum Mechanics (Q)**

This course will explore a number of important topics in the application of quantum mechanics to physical systems, including perturbation theory, the variational principle and the semiclassical interaction of atoms and radiation. The course will finish up with three weeks on quantum optics including an experimental project on non-classical interference phenomena. Applications and examples will be taken mostly from atomic physics with some discussion of solid state systems.

**Class Format:** tutorial, 1 and 1/4 hours per week; lecture, one hour per week

**Requirements/Evaluation:** evaluation will be based on weekly problem sets, tutorial participation, presentations, and a final exam, all of which have a substantial quantitative component

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**Prerequisites:** PHYS 301

**Enrollment Limit:** 10 per sec

**Expected Class Size:** 16

**Distributional Requirements:** Division 3

**Quantitative/Formal Reasoning**

**Spring 2017**

**TUT Section:** T1  F 01:10 PM 02:25 PM  Instructor: Catherine Kealhofer

**TUT Section:** T2  F 01:10 PM 02:25 PM  Instructor: Catherine Kealhofer

**PHYS 405T Electromagnetic Theory (Q)**

This course builds on the material of Physics 201, and explores the application of Maxwell's Equations to understand a range of topics including electric and magnetic fields in matter, light, and radiation. We begin with electrostatics, developing analytical solutions to Laplace's and Poisson's equations using mathematical tools and approximation techniques. We then move on to magnetic materials, electromagnetic waves, accelerating charges, and relativistic electrodynamics. In addition to weekly tutorial meetings, the class will meet once a week as a whole to introduce new material.

**Class Format:** tutorial, 1 and 1/4 hours per week; lecture, one hour per week

**Requirements/Evaluation:** evaluation will be based on weekly problem sets, tutorial participation, presentations, and a final exam or final project, all of which have a substantial quantitative component

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**Prerequisites:** PHYS 202 and PHYS/MATH 210 or MATH 209

**Enrollment Limit:** 10/section

**Expected Class Size:** 25

**Distributional Requirements:** Division 3

**Quantitative/Formal Reasoning**

**Other Attributes:** MTSC Related Courses

**Not Offered Academic Year 2017**

**TUT Instructor:** Charlie Doret

**PHYS 411T(F) Classical Mechanics (Q)**

This course will explore advanced topics in classical mechanics including the calculus of variations, the Lagrangian and Hamiltonian formulations of mechanics, phase space, non-linear dynamics and chaos, central-force motion, non-inertial reference frames (including implications for physics on a rotating Earth), and rigid-body rotations. Numerical and perturbative techniques will be developed and used extensively. We will also examine the ways in which classical mechanics informs other fields of physics. In addition to weekly tutorial meetings the class will meet once a week as a whole to discuss new material.

**Class Format:** tutorial, 1 and 1/4 hours per week; lecture, one hour per week

**Requirements/Evaluation:** evaluation will be based on weekly problem sets, tutorial participation, presentations, a final project, and a final exam, all of which have a substantial quantitative component

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**Prerequisites:** PHYS 202 and PHYS/MATH 210 or MATH 209

**Enrollment Limit:** 10/section

**Expected Class Size:** 25

**Distributional Requirements:** Division 3

**Quantitative/Formal Reasoning**

**Other Attributes:** MTSC Related Courses

**Not Offered Academic Year 2017**

**TUT Instructor:** Charlie Doret

**PHYS 418T Gravity (Q)**

This course is an introduction Einstein's theory of general relativity. We begin with a review of special relativity, emphasizing geometrical aspects of Minkowski spacetime. Working from the equivalence principle, we then motivate gravity as spacetime curvature, and study in detail the Schwarzschild geometry around a spherically symmetric mass. After this application, we use tensors to develop Einstein's equation, which describes how energy density curves spacetime. With this equation in hand we study the Friedmann-Robertson-Walker geometries for an expanding universe, and finally, we linearize Einstein's equation to develop the theory of gravitational waves.

**Class Format:** tutorial

**Requirements/Evaluation:** evaluation will be based on weekly problem sets, tutorial participation, presentations, and a final exam, all of which have a substantial quantitative component

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**Prerequisites:** PHYS 301 or PHYS 405 or PHYS 411; students with strong math backgrounds are invited to consult with the instructor about a possible waiving of the prerequisites

**Enrollment Limit:** 10/section

**Expected Class Size:** 10/section

**Distributional Requirements:** Division 3

**Quantitative/Formal Reasoning**

**Not Offered Academic Year 2017**

**TUT Instructor:** David Tucker-Smith

**PHYS 451(S) Condensed Matter Physics (Q)**

Condensed matter physics is an important area of current research and serves as the basis for modern electronic technology. We plan to explore the physics of metals, insulators, and semiconductors, with particular attention to structure, thermal properties, energy bands, and electronic properties. After developing the appropriate background, we will examine some simple semiconductor devices.

**Class Format:** seminar

**Requirements/Evaluation:** weekly readings and problem sets, and a final exam

**Prerequisites:** PHYS 301; PHYS 302 preferred; or permission of instructor

**Enrollment Preferences:** Physics majors

**Enrollment Limit:** 10

**Expected Class Size:** 4-6

**Distributional Requirements:** Division 3

**Quantitative/Formal Reasoning**

**Spring 2017**

**SEM Section:** 01  MR 02:35 PM 03:50 PM  Instructor: Jefferson Strait

**PHYS 475 Methods in Mathematical Fluid Dynamics (Q)**

The mathematical study of fluids is an exciting field with applications in areas such as engineering, physics and biology. The applied nature of the subject has led to important developments in aerodynamics and hydrodynamics. From ocean currents and exploding supernovae to weather prediction and even traffic flow, several partial differential equations (pde) have been proposed as models to study fluid phenomena. This course is designed to both, introduce
students to some of the techniques used in mathematical fluid dynamics and lay down a foundation for future research in this and other related areas. Briefly, we start with the method of characteristics, a useful tool in the study of pde. Symmetry and geometrical arguments, special solutions, energy methods, particle trajectories, and techniques from ordinary differential equations (ode) are also discussed. A special focus will be on models from hydrodynamics. These include the KdV and the Camassa Holm equations (and generalizations thereof), and the Euler equations of ideal fluids. Mainly, we will be concerned with models whose solutions depend on time and one spatial variable, although depending on student interest and time, we may also investigate higher-dimensional models.

**Class Format:** lecture

**Requirements/Evaluation:** problem sets and final project

**Extra Info:** may not be taken on a pass/fail basis

**Prerequisites:** MATH 151, MATH 250, and MATH 350 or 351; some background in pde/ode would be helpful but not required

**Enrollment Preferences:** senior Mathematics majors

**Enrollment Limit:** 40

**Expected Class Size:** 25

**Distributional Requirements:** Division 3

**Quantitative/Formal Reasoning**

**Not Offered Academic Year 2017**

**LEC Instructor:** Alejandro Sarria

**PHYS 493(F) Senior Research: Physics**

An original experimental or theoretical investigation is carried out under the direction of a faculty member in Physics, as discussed above under the heading of *The Degree with Honors in Physics.*

**Class Format:** independent study

**POLITICAL ECONOMY (DIV II)**

Chair: Professor JON BAKUA

The Political Economy major is designed to give students a grasp of the ways in which political and economic forces interact in shaping public policy. The major includes substantial study of the central analytical approaches in both Political Science and Economics and seeks to surmount the sometimes artificial barriers of specialization that may characterize either discipline taken by itself. Three of the required Political Economy courses undertake a conscious merging of the approaches in the two fields. These courses are designed by, and usually are taught jointly by, political scientists and economists. Political Economy 250 examines major theoretical texts in political economy and analyzes economic liberalism and critiques of economic liberalism in the context of current policy issues. Political Economy 401 examines contemporary issues in political economy in their domestic, comparative and international contexts. Political Economy 402 asks students to research and make proposals in policy areas of current importance. Background for the two senior courses is acquired through introductory courses in Economics and Political Science, a course in empirical methods, and elective courses in international, domestic and comparative economics, politics and policy.

Students in Political Economy 402 visit Washington, D.C. Sunday night through Wednesday of the first week of spring vacation to conduct interviews relating to their Political Economy 402 group projects. This is a course requirement and thus a requirement for the major.

**MAJOR**

The Political Economy major requires students to complete eleven (11) courses: two introductory courses each in Economics and Political Science; one empirical methods course; three core courses specific to the Political Economy Program; and three electives, one from each of three categories. In order to balance students’ educations, majors must take at least one elective in Economics and one elective in Political Science; the third elective may come from either Economics or Political Science. In light of the public policy orientation of the program, all majors are also required to complete one course with a substantial experiential education component which is related to the making or effect of public policy. The purpose of the experiential education requirement is for the student to get out into the world and interact with people in cases where the stakes are real, often involving some element of community service or participation in the political process or in the making or analysis of public policy, in order to learn something about public policy that one cannot get from a purely academic experience. This requirement must be fulfilled prior to taking POEC 402. It can be fulfilled through a regular semester-length course (which might also serve as an elective in the major), a winter study course, a study abroad academic internship, a winter study internship, or a summer internship. The chair distributes a list of approved experiential courses to majors at the beginning of each academic year. For an internship to satisfy the requirement, its focus must be the making or effect of public policy. Approval of the chair is required to use an internship to fulfill this requirement.

**Two Introductory Economics Courses**

- ECON 110 Principles of Microeconomics
- ECON 120 Principles of Macroeconomics

**Two Introductory Political Science Courses**

For students in the class of 2019 and earlier:

- PSCI 201 Power, Politics, and Democracy in America
- PSCI 203 Introduction to Political Theory

For POEC 204 World Politics: An Introduction to International Relations or PSCI 204 Introduction to Comparative Politics: State, Nation, and Democracy

For students in the class of 2020 and later:

- PSCI 201 Power, Politics, and Democracy in America
- PSCI 202 World Politics: An Introduction to International Relations or PSCI 204 Introduction to Comparative Politics: State, Nation, and Democracy

**One Empirical Methods Course**

- POEC 253 Empirical Methods in Political Economy or ECON 255 Econometrics

**Three Political Economy Program Courses**

- POEC 250/ECON 299/PSCI 238 Economic Liberalism and Its Critics
- POEC 401 Contemporary Problems in Political Economy
- POEC 402 Political Economy of Public Policy Issues

**Three Elective Courses**

NOTE: students must take at least one elective in Economics and at least one elective in Political Science; the third elective may come from either Economics or Political Science. Please see the online catalog for up-to-date information on which courses are being offered in the current year.

**One Comparative Political Economy/General Public Policy Course**

- ECON 204/ENVI 234 Economics of Developing Countries
- or ECON/ENVI 213 Introduction to Environmental and Natural Resources Economics
- or ECON 222 Economics of the Arts and Culture
- or ECON 225 Global Financial Crisis and African Economic Development
- or ECON/ENVI 228T Water as a Scarce Resource
The three Political Economy Program courses (POEC 250, 401, and 402) must be completed at Williams without exception. Students are strongly encouraged to complete the empirical methods course (POEC 253 or ECON 255) and POEC 251 at Williams, as versions of these courses offered elsewhere are usually highly imperfect substitutes that will not provide adequate preparation for the senior seminars; students may in rare cases be able to complete either of these requirements during study at another college or university (e.g. during study abroad) with permission of the chair. The general policy of the Program is to grant credit for one course per semester abroad and in extraordinary circumstances, credit for three courses for an entire year abroad. Students who score a 5 on the AP exam in Microeconomics, Macroeconomics, or Comparative Government and Politics may receive credit towards the major for the cognate introductory economics or political science course(s). Credit for A levels and IB exams in Economics and for introductory microeconomics and macroeconomics classes taken at other colleges and universities (subject to approval by the Economics department study abroad coordinator) is given consistent with the current policy of the Economics Department. No substitute high-level coursework is required for majors receiving credit in this way, although it is certainly encouraged. Students in the class of 2019 and earlier who score a 5 on the AP exam in U.S. Government and Politics may receive credit for the cognate introductory course(s). Students in the class of 2020 and later classes cannot substitute AP credit for PSCI 201.

RECOMMENDED PROGRESSION THROUGH THE REQUIRED MAJOR COURSES

Students considering a major in Political Economy are encouraged to begin with ECON 110 and 120 and any one of PSCI 201, 202, 203, or 204 in their first year, so that these courses are the prerequisites for POEC 250. All prospective POEC majors are encouraged to take PSCI 201, and indeed are required to do so if they are in the class of 2020 or later, as it provides tools of political analysis that will be essential for the projects all POEC students will undertake in POEC 250 to complete both of their two required introductory PSCI courses during either the first or second year at Williams, as first- and second-year students get enrollment preference in these classes. Students should plan to take POEC 250 and PSCI 252 (or PSCI 253) during the sophomore and junior years, keeping in mind that both POEC 250 and PSCI 253 are offered only in the fall, and that ECON 255 requires STAT 101 or STAT 201 as a prerequisite. POEC 401, taken fall of senior year, requires POEC 253 or ECON 255 as a prerequisite, so that prerequisite must be completed before the start of senior year. Students should also get started on their electives during sophomore and junior year.

THE DEGREE WITH HONORS IN POLITICAL ECONOMY

Due to the special demands of this interdisciplinary major, the only route to honors in Political Economy is the thesis. Seniors may pursue the honors thesis course (Political Economy 493-W31) during the fall semester and winter study period. The third course contributing to such an honors program would normally be an elective in Political Science or Economics taken during the junior year. This course, which may be one of the required electives, must be closely related, indeed must prepare the ground for the honors thesis. The other two required courses are the three Political Economy Program courses (POEC 250, 401, and 402). In the program may apply for the honors thesis program by means of a written proposal submitted to the chair by the end of the first week after spring vacation. Written guidelines for such proposals are available in the chair’s office. Students preparing the proposal should have been discussed with at least two faculty members, and at least one faculty advisor from each discipline must be solicited by the student prior to submission of the proposal. Final decisions about admission to the honors program will be made in late May after spring grades become available.

To achieve the degree with honors in Political Economy, the thesis must be completed by the end of the winter study period and be judged of honors quality by a committee consisting of the two advisors and a third reader. A thesis judged to be of particular distinction will qualify its author for the degree with highest honors.

STUDY ABROAD

Despite the fact that Political Economy requires more courses than the typical major, many Political Economy majors go abroad. Since POEC 250 and POEC 253 are offered in the fall, students considering spending only one semester abroad often find spring to be the better choice. Nonetheless, many students study away for the fall or the fall and the whole year. Political Economy majors have often been overrepresented in Williams at Oxford. Students planning to abroad in the fall should take POEC 250 in their sophomore year if at all possible. Similarly, it is necessary to plan ahead to find the best way to satisfy the empirical methods requirement (POEC 253 or ECON 255) before the fall of the senior year. The easiest major credits to obtain abroad are the electives in Political Science and Economics. General study away guidelines for Political Economy are available here.

POEC 250(F) Economic Liberalism and Its Critics

Crosslistings: POEC 250/ECON 299/PSCI 238

Economic liberalism holds that only if people enjoy economic freedom, and its critics point to what they believe this position ignores or what it wrongly assumes, and hence, how it would make bad policy. This course explores the relationship between politics and economics by surveying influential works of political economy. Its first part examines major thinkers in relation to the historical development of capitalism in Western Europe and the United States: the classical liberalism of Adam Smith, Karl Marx’s...
revolutionary socialism, and the reformist ideas of John Stuart Mill and John Maynard Keynes. The second part considers mid-20th-century writers who revise and critique economic liberalism from a variety of perspectives, including Friedrich Hayek, Milton Friedman, Ronald Coase, Arthur Okun, and Albert O. Hirschman. The third part surveys significant recent contributions relevant to the themes of the course, with applications to current public policy issues, including topics such as: power relations and autonomy in the workplace; asymmetric information and social insurance; economic inequality and distributive justice; equality of opportunity; the economics of health care; positional goods and the moral foundations of capitalism; intergenerational equity and climate change; economic nationalism and new trade theory; behavioral economics; finance and financial crises; and rent-seeking. The combination of the historical focus of the early part of the course with discussion of modern policy issues and debates in the latter part of the course permits you to appreciate the ongoing dialogue between classical and contemporary views of political economy.

Class Format: lecture/discussion
Requirements/Evaluation: eight essays of 650 words each, several short homework assignments, and a final exam
Prerequisites: ECON 110 and 120 or equivalent; PSCI 201, 202, 203, or 204 (may be taken concurrently with POEC 250); open to non-majors
Enrollment Preferences: Political Economy majors and sophomores intending a Political Economy major
Enrollment Limit: 35
Expected Class Size: 35
Dept. Notes: formerly POEC 301
Distributional Requirements: Division 2

Other Attributes:
AMST Critical and Cultural Theory Electives
POEC Required Courses

POEC 253(F) Empirical Methods in Political Economy (Q)
This course introduces students to common empirical tools used in policy analysis and implementation. The broad aim is to train students to be discriminating consumers of public policy-relevant research. The emphasis in the course is on intuitive understanding of the central concepts. Through hands-on work with data and critical assessment of existing empirical social scientific research, students will develop the ability to choose and employ the appropriate tool for a particular research problem, and to understand the limitations of the techniques. Topics to be covered include basic principles of probability; random variables and distributions; statistical estimation, inference and hypothesis testing; and modeling using multiple regression, with a particular focus on understanding whether and how relationships between variables can be determined to be causal—an essential requirement for effective policy formation. Throughout the course, the focus will be on public policy applications relevant to the fields of political science, sociology, and public health, as well as to economics.
Class Format: lecture/discussion
Requirements/Evaluation: problem sets, group projects, and three exams
Prerequisites: MATH 130 or its equivalent; one course in ECON; not open to students who have taken ECON 255
Enrollment Preferences: Political Economy majors, Environmental Policy majors and sophomores
Enrollment Limit: 25
Expected Class Size: 15
Dept. Notes: does not satisfy the econometrics requirement for the Economics major; POEC 253 cannot be substituted for ECON 255, or count as an elective towards the Economics major
Distributional Requirements: Division 2
Quantitative/Formal Reasoning

Spring 2017
IND Section: 01 TBA Instructor: Jon Bakija

POEC 401(F) Contemporary Problems in Political Economy
This course examines contemporary problems in political economy in the United States and across the developed world. Using both Economics and Political Science methods of analysis, students study the exercise of power and the accumulation of wealth in the world today as well as central public policy debates around those processes. We begin with a discussion of philosophical foundations of economic policy-making. We then discuss welfare states in comparative perspective with special attention to the development of the American welfare regime. The remainder of the course is dedicated to particular issue areas of contemporary concern: pensions, health insurance, education, retirement, public policy and immigration. The goal of this course is to build upon theoretical debates encountered in POEC 250 as well as to prepare students for the public policy projects they will do in POEC 402.
Class Format: seminar
Requirements/Evaluation: one 8- to 10-page paper; one 12- to 15-page paper; in-class group presentations; class participation
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: ECON 110 and 120; PSCI 201 or 203, or equivalent; PSCI 202 or 204, or equivalent; POEC 253 or ECON 255, or permission of instructor; open to non-majors
Enrollment Preferences: Political Economy majors
Enrollment Limit: 20

POLITICAL SCIENCE (DIV II)
Chair: Professor JAMES MCALLISTER

Politics is most fundamentally about forging and maintaining community, about how we manage to craft a common destiny guided by shared values. Communities need a way to reconcile conflicts of interest among their members and to determine their group interest; they need to allocate power and to determine its just uses. Power may be used wisely or foolishly, rightly or cruelly, but it is always there; it cannot be wished away. Political science attends to the ways that social power is grasped, maintained, challenged, or justified. The contests over power and the values that it should be used to further give politics its drama and pathos. The effort to understand politics aims not only to describe and explain, but also to improve political life.
The Political Science major is structured to allow students either to participate in the established ways of studying politics or to develop their own focus. To this end, the department offers two routes to completing the major, each requiring nine courses. We invite students either to organize their major through the subfields that structure the discipline of political science (American politics, international relations, political theory, or comparative politics), or to develop individual concentrations reflecting their particular interests, regardless of subfields.

MAJOR

Subfield Concentration Route: Upon declaring a major, students choose one subfield: American politics, international relations, political theory, or comparative politics. The subfield concentration draws at least four (4) of the nine courses from one subfield including the appropriate core course from 201-204, two electives of the student’s choice at the 200 or 300 level and the senior seminar or an individual project (in the student's subfield). Students selecting political theory as their subfield concentration must take Political Science 231 or Political Science 232 as one of their four subfield courses, in addition to taking Political Science 203 and prior to taking Political Science 430. With permission of the department chair, students may take a senior seminar in a different subfield, providing they take a third elective in the subfield of concentration. In addition, students must take courses in two subfields outside the subfield of concentration to satisfy the breadth requirement (all methods courses also count toward the breadth requirement). The faculty advisor must approve the student plan. All students must take at least one 300-level course and one research course to complete the major. (Most senior seminars are also research courses but, especially in political theory, not all are.) In addition, no more than two 100-level courses can count toward the major.

Individual Concentration Route: Alternatively, students may devise a concentration of their own. In this event, the student prepares a curricular plan in consultation with a faculty advisor, explaining the nature of the concentration and the courses the student will take. The individual concentration also requires nine (9) courses, with at least five (5) thematically linked courses constituting the concentration. Of these five courses, four are electives, chosen from the 200 or 300 level, including one from 201-204, and one is a senior seminar or individual project. In addition, students pursuing an individual concentration must take at least two other courses that illustrate breadth in political science. To complete the requirement, the student has his or her choice of any two from the following: Political Science 481-W33 (482) is designed to encourage the pursuit of excellence among the most talented Williams students of Political Science. Admission to it is awarded to the most distinguished candidate on the basis of demonstrated capacity for outstanding work and of the prospect for creative contributions to the understanding of American politics, political institutions and thought.

ADVANCED STUDY IN AMERICAN POLITICS

The Department of Political Science provides the opportunity for an unusually gifted student to engage in an entire year’s advanced research in American politics under singularly favorable conditions. Supported by income derived from an endowment fund, the student, designated the Sentinels of the Republic Scholar (after the name of the fund), receives a substantial research stipend to cover costs associated with the proposed project. The student will not only define American involvement in various international issues but also seek to understand the reasons why the US perhaps should or should not be involved, and we will see why such careful reasoning sometimes gains traction in actual US foreign policy debates. Finally, we will assess whether strategic choices determine US foreign policy decisions or whether they are constrained by broader forces. The student’s project will consist of a substantial research paper, along with the successful completion of a high-quality thesis, the degree with honors in Political Science requires enrollment in the year-long senior thesis seminar, in addition to the other nine (9) courses of the regular major requirements.

PSCI 126(G) America and the World

Crosslistings: PSCI 126/LEAD 126/GBST 101

This course will help students understand the US role in the world. US wealth and military power force its leaders to make choices that no other leaders in the world confront. Students will learn to evaluate the decisions that US leaders have made within a wide range of difficult foreign policy issues, including: rising Chinese power; Russian moves in Ukraine; nuclear proliferation in Iran; the threat of terrorism; humanitarian disasters in Syria and Libya; and long-term challenges like climate change.

We will not only describe American involvement in various international issues but also seek to understand the reasons why the US perhaps should or should not be involved, and we will see why such careful reasoning sometimes gains traction in actual US foreign policy debates. Finally, we will assess whether strategic choices determine US foreign policy decisions or whether they are constrained by broader forces. The student’s project will consist of a substantial research paper, along with the successful completion of a high-quality thesis.

PSCI 125(F) Leadership, Power and Legitimacy: An Introduction to Leadership Studies

Crosslistings: LEAD 125/PSCI 125

Leadership has long been a central concept in the study of politics. Philosophers from Plato to Machiavelli have struggled with the question of what qualities and methods are necessary for effective leadership. Social scientists throughout the twentieth century have struggled to refine and advance hypotheses about leadership in the areas of psychology, sociology, and political science. Among others. Nevertheless, despite all of this impressive intellectual effort, the study of leadership remains a contested field of study precisely because universal answers to the major questions in leadership studies have proven to be elusive. This course is designed to introduce students to many of the central issues and debates in the area of leadership studies.

PSCI 131(S) Global Queer Politics and Theory

Crosslistings: PSCI 131/WGSS 131

In this course we explore, in a global context, the politics and theories of gay, lesbian, bisexual, transgender, queer, and two-spirit persons. Despite stunning recent developments in the US and Western Europe regarding the rights, visibility and security of gays and lesbians, from a global perspective matters.
look quite different. New laws criminalizing homosexuality have been enacted in India and Nigeria. Transnational activism against such laws is slandered as neo-colonial even as India’s legislation, for example, revives forms of employment discrimination has stalled at the federal level and in most states. We analyze these and related issues, including those confronted by queers of color and indigenous two-spirit, third and fourth gender persons, using the tools of political theory.

Class Format: seminar
Requirements/Evaluation: papers, participation, exam
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none
Enrollment Preferences: first-year or second-year students
Enrollment Limit: 19
Expected Class Size: 19
Distributional Requirements: Division 2
Other Attributes: PSCI Political Theory Courses

This introductory seminar investigates the relationship between the three major schools of thought in contemporary Africana social and political philosophy, namely the African, Afro-American, and Afro-Caribbean intellectual traditions. We will discuss a range of thinkers including Aimé Césaire, Angela Y. Davis, Édouard Glissant, Lewis R. Gordon, Kwame Gyekye, Paget Henry, bell hooks, Oyèrónke Oyewùmi, Charles W. Mills, Nkiru Nzegwu, Lewis R. Gordon, Oyèrónke Oyewùmi, Tommie Shelby, and Sylvia Wynter. A primary goal of the course is to provide students with the intellectual resources to decipher problems central to philosophical discourse and to allow students an opportunity to apply what they learn to critical issues in current geopolitics. This seminar is part of the Exploring Diversity Initiative, and as such we shall investigate—via the authors mentioned—comparative philosophical analyses, critical theorization, and the plurality of global thinking in contemporary social and political philosophy.

Class Format: seminar
Requirements/Evaluation: evaluation will be based on attendance and participation, two 5- to 7-page essays, and one 10-page final paper
Extra Info: not available for the fifth course option
Prerequisites: none; open to all
Enrollment Preferences: first- and second-year students
Enrollment Limit: 15
Expected Class Size: 12

PSCI 135(F) Politics after the Apocalypse

The zombies are coming! Climate change will destroy us! Bird-flu pandemic! To our horror and delight, reminders are everywhere that the end is near. Some of these projected apocalypses are alarmist, some fanciful, and others all too realistic. What shape will politics take after the apocalypse? What aspects of politics will endure the ravages of fire or pestilence? What new political realities might emerge on ground cleared by disaster? And what does it say about politics today that we are so eager to consume stories of states falling and bands of survivors scraping together a nasty, brutish and short existence? In this class, we reconsider what politics is and should be by contemplating accounts of its destruction and rebirth in television, film, literature, activism, social science, and critical theory. We will approach these sources as analogous to political theory’s classic ‘thought experiment’ of the “state of nature” and social contract. And we will consider what it tells us about our time that we are so eager to imagine ourselves at the beginning of the end. Class will be driven primarily by discussion. Students will have significant responsibility for setting the agenda for discussions through informal writing submitted prior to class. Two papers, one close-reading assignment, and one post-apocalyptic short story or video are required.

Class Format: seminar
Requirements/Evaluation: formal and informal writing assignments, including a “close reading” assignment of 3-5 pages, two 5- to 7-page papers, one short story (approximately 12-20 pages and including an explanatory cover letter), and class participation
Prerequisites: none
Enrollment Preferences: first-year students
Enrollment Limit: 20

PSCI 202(F,S) World Politics: An Introduction to International Relations

While the field of international relations focuses on the actions of sovereign states towards one another, the comparative study of politics looks mainly at what goes on inside various countries, international relations considers the actions of sovereign states toward one another and the patterns and institutions that they create. International politics differs from domestic politics in the absence of centralized, legitimate institutions. Anarchy characterizes the world of sovereign states—there is no world government, nor agreement that one is desirable or even possible. This lack of a common authority means that any dispute among countries is up to the countries themselves to settle, by negotiating, appealing to shared norms, or using force. For this reason, while international relations involves many of the same topics that consume domestic politics—ethnic antagonisms, spending on aid, war, national identity, inequality, weapons manufacture, finance, loans, pollution, migration—it shares few of the same processes for dealing with them. This course covers the theories and problems central to international relations. It considers the importance that this radical decentralization has for achieving values we hold, and examines processes that might undermine or support the anarchical system in which we live.

Class Format: lecture

Requirements/Evaluation: some combination of short papers, midterm exam/paper, final exam, and class participation

Extra Info: may not be taken on a pass/fail basis

Prerequisites: this is an introductory course, open to first-year and sophomores; juniors and seniors may enroll only with permission of instructor and under special circumstances

PSCI 205 Political Leadership

Crosslistings: LEAD 250/PSCI 205

This course will examine the leadership strategies of American political leaders with an emphasis on the importance of communication and negotiating skills that public sector leaders need. We will study these issues by examining local, state and federal political leaders and by answering key questions specific to the political realm. We will read and watch significant speeches by American political leaders, be visited by guests with deep knowledge and insight into the world of politics and read a variety of writings by academics and practitioners on the subject. We will explore questions such as "What
characteristics mark successful communication and how do leaders craft a unique and effective communications style?" and "What strategic considerations are there for female political leaders and do they have different challenges in communicating?"

The first series of classes will focus on communication taking a look at some unique and effective communications style?" and "What strategic challenges and opportunities facing select sub-groups of political leaders: women, celebrity candidates and officeholders. We will then explore the tenets of political strategy—both in campaigns and governing. This segment of the course will take a look at the tools used in crafting a strategy and how to put together a winning coalition. The final classes in the course will explore the unique challenges and opportunities facing select sub-groups of political leaders: women, celebrity candidates and officeholders and high-achieving young political leaders—operatives and elected officials.

PSCI 206T(F) Dangerous Leadership in American Politics (W)
Crosslistings: PSCI 206/LEAD 206
"Donald Trump, Hillary Clinton, Ted Cruz, Bernie Sanders. What do Americans want from their political leaders?" A common assumption is that those who do it well—whether in the presidency, the parties, social movements, organizations, or local communities—are just and legitimate agents of democratic change, and those most celebrated are those who have helped the country make progress toward its ideals. Yet to rest on this is too simple as it is, in part, an artifact of historical construction. Assessing leadership in the moment is complicated because leaders press against the bounds of political convention—as do ideologues, malcontents, and lunatics. Indeed, a central concern of the founders was that democracy would invite demagogues who would bring the nation to ruin. Complicating things further, the nature of democratic competition is such that those vying for power have incentive to portray the opposition’s leadership as dangerous. How do we distinguish desirable leadership from dangerous leadership? Can they be the same thing? Many who today are recognized as great leaders were, in their historical moment, branded dangerous. Others, whose ambitions and initiatives arguably undermined progress toward American ideals, were not recognized as dangerous at the time. In this tutorial, we will explore the concept of dangerous leadership in American history, from inside as well as outside of government. What constitutes dangerous leadership, and what makes a leader dangerous? Is it the person or the context? Who decides? How do we distinguish truly dangerous leadership from the perception of dangerous leadership? Does dangerous describe the means or the ends of leadership? Does it matter? Is leadership that privileges desirable ends, such as justice or security, at the expense of democratic means acceptable? Is democratic leadership in service of "dangerous" goals acceptable, and what are these goals?

Class Format: tutorial

PSCI 207(F) Political Elections
The National and state elections taking place this fall, 2016, will be "interesting". Historically, elections with the dominant consideration of who will be the President generate greater attention by and greater involvement of the public. This is especially the case when an incumbent President is not standing for re-election. The 21st century in the United States has had a very turbulent beginning as the American public is very divided over how best to respond to the many challenges that confront the United States. This course explores the factors that shape the outcome of political elections in America. Among the factors we will consider are the state of the economy, international events, the role of political parties at the state and national levels, the current partisan balance, ideology, media, special interests, money, candidates, the "hot" issues of the moment, of which there are many, and long enduring issues that have long generated conflict at the national level. We will consider in detail the 2016 national elections both for Federal office (President, Senate and House) and for state offices (governors and state legislators). And, we will consider the likely consequences that will flow from the results that obtain.

Class Format: lecture

PSCI 208T Wealth in America (W)
The pursuit of wealth is an important feature of American political identity, captured by the ideas of the American dream and the Protestant work ethic. The accumulation of wealth has been lauded as both a worthy individual activity and a vital component of the nation’s public interest. Yet inequality in wealth may conflict with the political equality necessary for democratic governance and public trust, leading to concerns that we are sacrificing community, fairness, and opportunity for the benefit of a small portion of the population. This tutorial focuses on questions about the public value of wealth and its accumulation, which have become more pressing now that the richest one percent of Americans own about 40 percent of privately held wealth. Some readings will be historical, particularly those focusing on American political thought and the politics of the Gilded Age, such as Andrew Carnegie’s “Gospel of Wealth”. Most of the readings, such as Pierson and Hacker’s "Winners-Take-All Politics", will focus on contemporary political debates about the accumulation, concentration, and redistribution of wealth.

Class Format: tutorial

PSCI 209 Poverty in America
Crosslistings: PSCI 209/WGSS 209
Although some protest that the U.S. is heading toward European-style socialism, social welfare programs in the U.S. differ in important ways from those in other wealthy and democratic nations. This course focuses on the adoption and development of policies to address poverty and inequality in the U.S. The issues we will explore include: What is poverty, and how do Americans perceive its dangers to individuals as well as the political community? What economic, historical, and sociological theories have been advanced to explain poverty? Why has the U.S. adopted some approaches to reduce poverty but not others? What enduring political conflicts have shaped the U.S. welfare state?

Class Format: lecture/discussion
Requirements/Evaluation: class participation, two or three short papers, and a final paper

PSCI 211(F) Do the People Govern? U.S. Public Opinion and Mass Political Behavior (Q)

America's founding documents explicitly state that the will of the people is the authority upon which our government rests. But do the people actually govern, and should they? Pessimists point out that most Americans know very little about politics and lack coherent political views, are easily manipulated by media and campaigns, and are frequently ignored by public officials anyway. Optimists counter that, even if individuals are often ignorant and/or confused about politics, in the aggregate, the public sends a coherent signal to public officials, who usually carry out the public's general wishes. In addition to engaging this debate about what the public thinks about politics, we will also protest, or engage in other types of political action? How do resource gaps tied to inequalities in society (such as race, class, and gender) influence political behavior? And how do institutions such as the media and campaigns encourage or discourage?

Class Format: lecture

Requirements/Evaluation: class participation, 2-3 short papers (5-7 pages), and a final exam

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

PSCI 212 Hip-Hop and Political Theory

Crosslistings: AFR 207/PSCI 212

This course is an introduction to the theoretical underpinnings of the genesis and evolution of hip-hop, a late modern phenomenon whose forms are routinely referred to as a movement, a culture, a music, and a politics. Since its emergence in the South Bronx during the late 1970s, what constitutes the organizing definitions and philosophical bulwarks of hip-hop are often underexplored. The course illuminates this submerged, neglected, and contested bodies of knowledge by focusing on eight concepts: justice, rights, recognition, freedom, equality, democracy, love, and judgment. Through these principles, students are able to address how we frame questions of race, ethnicity, gender, sexuality, class, authenticity, the public sphere, incarceration, and globalization. Our meetings consider the popular and the underground, the originally forged and the remixed, the utility of nomenclature bifurcating conscious and radical hip-hop on the one hand and alternative political, anti-political, or neutral forces in the realm of hip-hop. Written texts, lyrical thought, breaking, film, music videos, and guest lectures by rappers, R&B singers, DJs, academics, and graffiti artists are interwoven in assignments and in-class discussions. Through these mediums and select experiential education opportunities outside the classroom, students have an opportunity to render evaluations on the political theory of hip-hop between past and future.

Class Format: lecture

Requirements/Evaluation: attendance and participation, two 5- to 7-page essays, and choice of a final 10-page paper or final project; students opting for a core course concept

PSCI 214(F) Racial and Ethnic Politics in America

Arguably, the dominant discourse in the election and presidency of Barack Obama and the battle to succeed him is about race. Race is connected to salient issues like immigration and police conduct; to politicians across the political spectrum, including Obama, Donald Trump, and Bernie Sanders; and (some argue) to virtually everything in American politics, including fundamental concepts that have no manifest racial content, like partisanship and the size and scope of government. We will evaluate the role of race as it relates to public opinion, political behavior, campaigns, political institutions, and public policy debates, with special attention devoted to the nature of racial attitudes. Most of the course will focus on the historical and contemporary relations between whites and African Americans, but we will also explore topics involving other pan-ethnic communities, particularly Latinos and Asian Americans.

Class Format: lecture

Requirements/Evaluation: class participation, 2-3 short papers (5-7 pages), and a final exam

PSCI 216 American Constitutionalism I: Structures of Power Crosslistings: PSCI 216/LEAD 216

How has the American Constitution been debated and understood over time? What is the relationship between constitutional and political change? How has the American Constitution been debated and understood over time? This course examines the historical development of American constitutional law and politics from the Founding to the present. Our focus is on structures of power — the limits on congressional lawmaking, growth of presidential authority, establishment of judicial review, conflicts among the three branches of the federal government, and boundaries between the federal and state and local governments. The specific disputes under these rubrics range from secession to impeachment, gun control to child labor, waging war to spurring commerce; the historical periods to be covered include the Marshall and Taney Court years, the Civil War and Reconstruction, the Progressive Era, the New Deal, the Warren Court, and the conservative ascendancy of the late twentieth century. Readings are drawn from Supreme Court opinions, presidential addresses, congressional debates and statutes, political party platforms, key tracts of American political thought, and secondary scholarship on constitutional development. Throughout the semester, our goal will be less to remember elaborate doctrinal rules and multi-part constitutional "tests" than to understand the changing nature of, and changing relationship between, constitutional law and public policy.

Class Format: lecture/discussion

PSCI 218(F) The American Presidency  
**Crosslistings:** PSCI 218/LEAD 218  
To study the presidency is to study human nature and personality, constitution and institution, strategy and contingency. This course will examine the problems and paradoxes that attend the exercise of the most powerful political office in the world's oldest democracy: Can an executive office be constructed with sufficient energy to govern and also be democratically accountable? How much do we attribute the shaping of politics to the agency of the individual in the office and to what extent are politics the result of structural, cultural, and institutional factors? Are the politics of the presidency different in foreign and domestic policy? How are national security concerns balanced with domestic priorities such as the protection of civil liberties? How is the office and purpose of the presidency affected by an economic order predicated on private capital? Exploration of these questions will lead us to examine topics such as presidential selection, the bases of presidential power, character and leadership issues, congressional-executive relations, the media, and emergency powers. Attention will focus largely on the modern presidency, though older historical examples will also be used to help us gain perspective on these problems.  

**Class Format:** lecture/discussion

PSCI 222(F) Refugees in the International System (W)  
A half-century ago, the United Nations subtitled its report on refugees "a problem of our time." This course considers the politics of this designation: why refugees are "a problem" at all, whom they might be a problem for, and what might be meant by "our" time. Our readings start with individuals' experiences, turn to the global, and continue to international and national laws and policies on displacement and asylum-seeking, and conclude with case studies. Our central question is: what do the legal categorization and experiences of refugees tell us about power in the international system? This class is writing-intensive. Each student will write, and rewrite, an essay at each stage of the course.  

**Class Format:** seminar

PSCI 223(F) International Law  
International law embodies the rules that govern the society of states. It spells out who can be a state and how to become one, what states can do, what they cannot do, and who can punish transgressions. It also determines the status of other actors, such as international organizations, heads of state, refugees, transnational religious institutions, and multinational corporations. International law is similar to domestic law, with one very crucial difference: it is not enforced by a centralized, sovereign state. In other respects, it is the same: it protects the status quo, including the distribution of power among its members, it spells out legitimate and illegitimate ways of resolving conflicts of interest; it is biased toward the powerful; it tells its members how to act to coordinate their interests and minimize direct conflict; some of it is purely aspirational, some of it necessary for survival. And like domestic law, it is enforced only some of the time, and then against the weak more than the strong. Yet, law is still where we look for justice.

PSCI 224(F) Neo-liberalism: What Is It and Why Does It Matter?  
We live in the era of neo-liberalism. But what does this mean? This course will focus on neo-liberalism in comparative perspective, looking mainly at the US experience. It will consider how neo-liberalism is defined, the role of states in making and maintaining neo-liberalism, the centrality of markets to neo-liberal conceptions, and the kinds of politics that are produced and are produced by neo-liberalism. Economically, the course will look at the institutional configuration of neo-liberalism, changes in economies, growing inequality, the financial crises, and prevalence of debt. Politically, the course will address changes in the role of government, what governments do and do...
not do, the growing influence of financial interests, the role of identities in mobilizing support for and legitimating governments, and the impact of these developments on the status of citizenship and democracy.

Class Format: seminar
Requirements/Evaluation: three papers—one 3-page, one 5-page, and one 10-page paper

PSCI 225(S) International Security
This course examines why, and how military threats and military force are used to obtain international political objectives. It discusses the many methods used by states and non-state actors to bend opponents to their will, including military coercion, economic coercion, terrorism, guerilla warfare, nuclear threats, and conventional war. It also explores how the organizational attributes of these actors—e.g., leadership structures, military cultures, and bureaucratic politics—may affect their decisions to use force and the effectiveness with which they do so. The course focuses on the period from the end of World War II until the present.

PSCI 227(S) War and the Nation-State
As Charles Tilly famously argued, “War made the state, and the state made war.” This course explores the phenomenon of war in its broader socioeconomic context during the years between the emergence of the modern nation-state in the late 18th century and the end of World War II. It examines the ways in which warfare influenced state development, and in turn, how state development changed the nature and conduct of war itself. The co-evolution of nation-states and modern warfare is studied in the context of four broad social transformations: the rise of nationalism, democratization, industrialization, and military bureaucratization. We will also discuss the causes, conduct, and consequences of the major wars of this period, including the Napoleonic Wars, the Wars of German Unification, and the cataclysmic showdowns of the twentieth century: World War I and World War II.

PSCI 228 International Organization
Tens of thousands of international organizations populate our world. IGOs, whose members are governments of sovereigns, range from the Nordic Association for Reindeer Research to the UN and NATO; NGOs, whose members are private groups and individuals, include the International Seaweed Association as well as the International Committee of the Red Cross. We will examine where they come from, what they do, and to whom they matter, and will examine their agency, efficiency, and accountability. We cover the history, structures and functions of international organizations using case studies.

PSCI 229 Global Political Economy
Thirty years ago the production, distribution, consumption and accumulation of goods, services and capital were predominantly national, organized by nation-states and within national territories. Today they are increasing global in scope, and nation-states find themselves more and more in the subjects than the masters of transnational corporations, international trade tribunals, global currency markets and natural resources. All of these developments have direct and far-reaching effects on the power of states, the wealth of societies, and the life chances of billions of people around the world. This course offers a broad introduction to contemporary global capitalism, emphasizing the inherent and inseparable intertwining of politics and economics. Our goal is to place these current issues into historical context, to trace the roots of modern global capitalism, and to ask if we can and should be thinking about this world differently.
Class Format: lecture/discussion

PSCI 231 Ancient Political Thought
Crosslistings: PSCI 231/PHL 231
The core activity of this seminar is the careful reading and sustained discussion of selected works by Plato and Aristotle, but we will also engage such other thinkers as Epictetus and Augustine, and, from a political and theoretical point of view, selections from the Hebrew Bible and New Testament. Among the questions that we will address: What is justice? How can it be known and pursued? How is political power generated and exercised? What are the social and ethical prerequisites—and consequences—of democracy? Must the freedom or fulfillment of some people require the subordination of others? Does freedom require leading (or avoiding) a political life? What distinguishes that kind of life from others? What does it mean to be “philosophical” or to think “theoretically” about politics? Although we will attempt to engage the readings on their own terms, we will also ask how the vast differences between the ancient world and our own undercuts or enhances the texts’ ability to illuminate the dilemmas of political life for us.
Class Format: lecture/discussion

PSCI 232(S) Modern Political Thought (W)
Crosslistings: PSCI 232/PHL 232
This course is a chronological survey of major works of political theory from the 16th to the 20th century. In discussions and writing, we will explore the diverse visions of modernity and of politics offered by such thinkers as Machiavelli, Hobbes, Locke, Rousseau, Marx, Mill, and Freud. They help us ask: What is freedom? Who is equal? Who should rule? With what limits and justifications? What form of government best serves the people? Who are the people, anyway? And on what grounds can we justify confidence in our provisional answers to such questions? Class will be primarily driven by discussion, often preceded by brief lectures. Attention to the writing process and developing an authorial voice will be a recurrent focus of our work inside and outside the classroom.
Class Format: lecture/discussion

PSCI 233 Rastafari: Dread, Politics, Agency
Crosslistings: AFR 299/PSCI 233/REL 261
The emergence of Rastafari in the twentieth century marked a distinct phase in the theory and practice of political agency. From its heretical roots in Jamaica, Garveyism, Ethiopianism, and Pan-Africanism, Rastafari has evolved from a Caribbean theological movement to an international political actor. This course investigates the political theory of Rastafari in order to develop intellectual resources for theorizing the concept of agency in contemporary Africana thought and political theory. We will analyze texts and audio-visual works on the political economy of late colonial Jamaica, core Rastafari thinking, political theology, the role of reggae music, the notion of agency, and the influence of Rastafari on global politics.

Class Format: lecture/discussion
Requirements/Evaluation: attendance and participation, weekly reading e-response papers, two short essays, and a group lyrics and politics final project

PSCI 234(F) Political Romanticism
Crosslistings: ENGL 322/COMP 329/PSCI 234
What is Romanticism, and how does it relate to the world-changing political upheavals that emerge along with it? Romantic literature emerged around the time of the French and Haitian Revolutions, and many Romantic authors were deeply sympathetic to the democratic principles of freedom and equality that inspired such political uprisings. Yet many also questioned revolutionary attempts to realize such ideas by forcibly seizing control of governments. These authors became interested in art and literature as alternative means of bringing about social and political change. In so doing, they invented ideas about the political power of art that are still very much with us today. This seminar examines these ideas through readings of works of Romantic literature and the philosophy that brought them into the world, while also considering how arguments subsequently developed for and against political Romanticism inform today's heated debates about the relationship between art and politics. Authors may include Burke, Kant, Rousseau, Wordsworth, Schiller, C. Smith, P.B. Shelley, Hegel, Heine, Marx, and Carl Schmitt.

Class Format: seminar
Requirements/Evaluation: evaluation based on two papers, 6 and 8-10 pages in length, weekly posts, and general participation

PSCI 235(S) Survival and Resistance: Environmental Political Theory (W)
Crosslistings: PSCI 235/AMST 235
Contemporary struggles to reverse environmental destruction and establish sustainable communities have prompted some political theorists to rethink longstanding assumptions about politics and its relationship to nature. Does the environment have "rights"? What, if anything, is the difference between an ecosystem and a political community? Is democracy dangerous to the planet's health? Are environmental protections compatible with political freedom? How is the domination or conquest of nature connected with domination and conquest within human societies? What does justice demand in an age of climate change? In this class, we will consider the promise and limits of political theory to illuminate present day environmental crises and foster movements to overcome them. We will engage classic texts that helped to establish political theory's traditional view of nature as a resource, as well as contemporary texts that offer alternative, ecological understandings of nature and its entwinements with politics. Class will be driven primarily by discussion. Students will have significant responsibility for setting the agenda for discussions through informal writing submitted prior to class. As a writing intensive course, attention to the writing process and developing an authorial voice will be a recurrent focus of our work inside and outside the classroom.

PSCI 236 Sex, Gender, and Political Theory
Crosslistings: PSCI 206/WGSS 236
This course offers a feminist reading of key concepts in the study of politics: freedom, justice, equality, obligation, representation, alienation, and objectification. Each of these terms will be considered in relation to problems of political exclusion and social stratification that persist in contemporary societies, with particular attention to inequalities based on sex, gender, and class. Is welfare a problem for freedom theory? In what way might a pregnancy be experienced as a form of alienation, and how does this pose a challenge for theories of justice? Is it possible to treat another person as an equal and at the same time an object of one's sexual desire? We will identify the analytical tools and strategies that feminist theorists have employed in order to bring these and other concerns into political science scholarship, reconstructing traditional ideas of politics and public life in the process. Theorists whose work we will read include Susan Moller Okin, Nancy Hirschmann, Martha Nussbaum, Iris Marion Young, Drucilla Cornell, Gayatri Spivak, Dorothy Roberts, Judith Butler, Linda Zerilli and Catherine MacKinnon.

Class Format: lecture/discussion

PSCI 238(F) Economic Liberalism and Its Critics
Crosslistings: POEC 250/ECON 299/PSCI 238
Economic liberalism holds that society is better off if people enjoy economic freedom. Its critics point to what they believe this position ignores or what it wrongly assumes, and hence, how it would make bad policy. This course explores the relationship between politics and economics by surveying influential works of political economy. Its first part examines major thinkers in relation to the historical development of capitalism in Western Europe and the United States: the classical liberalism of Adam Smith, Karl Marx, and John Stuart Mill; and the reformist ideas of John Stuart Mill and John Maynard Keynes. The second part considers mid-20th-century writers who revise and critique economic liberalism from a variety of perspectives, including Friedrich Hayek, Milton Friedman, Ronald Coase, Arthur Okun, and Albert O. Hirschman. The third part surveys significant recent contributions relevant to the themes of the course, with applications to current public policy issues, including topics such as: power relations and autonomy in the workplace; asymmetric information and social insurance; economic inequality and distributive justice; equality of opportunity; the economics of health care; positional goods and the moral foundations of capitalism; intergenerational equity and climate change; economic nationalism and new trade theory; behavioral economics; finance and financial crises; and rent-seeking. The combination of the historical focus of the early part of the course with discussion of modern policy issues and debates in the latter part of the course permits you to appreciate the ongoing dialogue between classical and contemporary views of political economy.

Class Format: lecture/discussion
PSCI 239 Science, Gender and Power
Crosslistings: PSCI 239/WGSS 238
This course considers debates in feminism about the relationship between science, gender and power in politics. On the one hand, shifting ideas about gender have challenged the origins of the sciences themselves. For example, some feminists argue that science has historically been premised upon a view of women as objects, not subjects, of knowledge. On the other hand, shifting ideas about science have strongly influenced the development of feminist theory and practice: for example, debates about reproductive rights are often couched in terms of a conflict between reliable scientific knowledge of embryos, STDs, etc. and an unscientific, patriarchal worldview. Do science and technology serve to transform or reinforce power imbalances based on gender, race, and sexuality? Should feminist theory embrace objectivity and model itself upon scientific procedures of knowledge production? Or should feminists reject objectivity as a myth told by the powerful about their own knowledge-claims and develop an alternative approach to knowledge? What is "objectivity" anyway, and how has this norm changed through history? What kinds of alternatives to objectivity exist, and should they, too, count as "science"? Rather than treating science as a monolith, we will endeavor to understand the implications of various sciences—as practiced and envisioned in various, historically specific situations—for gender and politics. Readings may include texts by Rene Descartes, Andreas Vesalius, Londa Schiebinger, Anne Fausto-Sterling, Helen Longino, Nancy Harstock, Sandra Harding, bell hooks, Donna Haraway, Mary Hawkesworth, and Octavia Butler.

PSCI 246 Political Power in Contemporary China
Crosslistings: PSCI 246/AFR 256
This course provides an introduction to the politics of contemporary Africa, emphasizing the diversity of African politics. It seeks to challenge the widespread image of African politics as universally and inexplicably lawless, violent, and anarchic. We begin by examining the colonization of Africa, nationalist movements, and patterns of rule in the first 30 years of independence. From there, we analyze the causes, achievements and limitations of the recent wave of political liberalization across Africa. We then consider patterns of economic development in Africa. Finally, we examine China's growing expansion into Africa and ask whether this is a new colonialism.
Class Format: lecture/discussion

PSCI 247(F) Political Power in Contemporary China
The People's Republic of China presents us with two grand political narratives: socialism and democracy. In the Maoist era, a distinctive understanding of socialism, which claimed to be a more genuine democracy, brought hope and, ultimately, tragedy to hundreds of millions of people. In the post-Mao era, Chinese politics has been driven by the need to redefine socialism in the wake of the world-historic calamities of the Great Leap Forward and the Cultural Revolution and, more recently, the end of the Cold War. The state cannot simply give up the socialist myth because without it the rationale for Communist Party hegemony evaporates. But China's rulers cannot avoid political reform, both ideological and institutional, because to do so heightens the legitimacy crisis born of Maoist failures. Within this context has emerged the contemporary Chinese democracy movement which, in all of its complexity, looks to both socialist discourse and Western practice to create a new politics that checks tyrannical abuses of state power and engenders a civil society. What is Chinese democracy now? What are its prospects and what is its relationship to the ideas of socialism?
Class Format: lecture/discussion
PSCI 248T The USA in Comparative Perspective (W)

Politics in the USA is often considered unique and incomparable, and US political science separates the study of American politics from comparative politics. This course overcomes this divide, considering politics and society in the United States comparatively, from a variety of viewpoints and by authors foreign and American, historical and contemporary. Important topics include: the colonial experience and independence; race relations and the African diaspora; nationalism and national identity; war and state-building; American exceptionalism and Hegemony in the global political economy; transnational political institutions; and the origins and shape of the welfare state. (As the list suggests, the most common comparisons are with Latin America and Western Europe, but several of our authors look beyond these regions.) Along the way, we also read short descriptive accounts by foreign observers, from TOCQUEVILLE to José Martí, Max Weber, and Sayyid Qutb.

Class Format: tutorial; a lecture in the first week; then ten weeks of tutorial; then a discussion class in the final week

PSCI 249 From Beetroot to Zero Grazing: Comparative Response to AIDS in Africa

Crosslistings: PSCI 249/GBST 249

As AIDS in African countries grew from a few cases in the mid-1980s to more generalized levels by the mid-1990s, government policy varied widely. Consider that while Kenyan medical officials denied the existence of AIDS (insisting that this fourth disease reported in the press was due to skin cancer), in Senegal, President Diouf openly acknowledged AIDS and launched a national prevention and control program. South African President Mbeki and his health minister questioned whether HIV causes AIDS and suggested a garlic, beetroot, and lemon concoction as treatment, while in Uganda, President Yoweri Museveni developed a successful home-grown ‘Zero Grazing’ campaign. Why did some African governments respond early and aggressively to AIDS, while others did essentially the opposite? What has worked and what hasn’t in the fight against AIDS in African countries? Has political liberalization improved the responsiveness of African governments to AIDS? In this course we aim to better understand how politics and social factors shaped African countries’ responses to AIDS.

PSCI 252(F) Pillars of Apartheid—Race and Ethnicity in South Africa

Crosslistings: GBST 252/PSCI 252

A fundamental liberal tenet is that a person is, first and foremost, an individual and everything else about a person follows from that. In contrast, for South Africa’s apartheid ideology, a person was primarily a member of a group (racial or ethnic) and this fact alone, defined a person’s status in society. As a result, South Africa under apartheid was characterized by a four-fold classification of citizens based on race and ethnicity. In the first place, there was a broad division between blacks and whites. In addition, blacks were further sub-divided into a hierarchical structure of ‘coloureds (mixed race), Asians (largely of Indian origins) and Africans (indigenous blacks). This hierarchy defined one’s political and economic status. Blacks were further subdivided into 9 “tribal” groups. There was political and economic advantage in a descending order, to each group of whites, coloureds, Indians and Africans. This course explores this fundamental principle and its theoretical and practical implications for the South African society. It begins with an analysis of conceptions of race and ethnicity according to various actors in the country. The main thrust of the course is two-fold, namely, the practical application of this principle in the country’s political, social and economic policies as well as the response of the oppressed through their liberation movements.

PSCI 261(F) The United States and the World, 1914 to the Present

Crosslistings: HIST 263/PSCI 261/LEAD 261

This course explores America’s engagement with the world from 1914 to the present. The First World War ushered in a new era for U.S. foreign relations. The self-identified isolator became a principal player on the world stage and by the end of the Second World War emerged as one of the two global superpowers, poised to compete with the Soviet Union in a protracted Cold War. After the Soviet Union collapsed in 1991, some spoke of the United States as a “hyperpower,” but how it should exercise its unrivalled power was far from clear. Through a mixture of lecture and discussion, this course introduces students to the key events of America’s most powerful century and to the new wave of scholarly literature being written about the United States and the World. Readings will reflect current trends in the sub-field, which focuses not only on high-level diplomacy, but also on a range of other factors that influence foreign relations, including ideology, race, gender, culture, domestic politics, and the roles of individual personalities.

Class Format: lecture/discussion

PSCI 262(F) America and the Cold War

Crosslistings: PSCI 262/LEAD 262/HIST 261

This course examines the rise and fall of the Cold War, focusing on four central issues. First, why did America and the Soviet Union become bitter rivals shortly after the defeat of Nazi Germany? Second, was one side primarily responsible for the length and intensity of the Cold War in Europe? Third, how did the Cold War in Europe lead to events in other areas of the world, such as Cuba and Vietnam? Finally, could the Cold War have been ended long before the collapse of the Soviet Union in 1989? Political scientists and historians continue to argue vigorously about the answers to all these questions. We examine both traditional and revisionist explanations of the
Cold War, as well as the new findings that have emerged from the partial opening of Soviet and Eastern European archives. The final section of the course examines how scholarly interpretations of the Cold War continue to influence how policymakers approach contemporary issues in American foreign policy.

PSCI 263 America and the Vietnam War (W)

Crosslistings: PSCI 263/LEAD 242

Every American president from Franklin Roosevelt to John F. Kennedy sought to avoid a commitment of ground forces to Vietnam. Lyndon Johnson also feared the consequences of a massive American commitment, but he eventually sent over half a million men to Vietnam. Richard Nixon hoped to conclude a peace with honor when he assumed the presidency, but the war lasted for another four years with many additional casualties. This course examines the complex political processes that led successive American presidents to get involved in a conflict that all of them desperately wanted to avoid. We will examine both the international and domestic context of the war, as well as pay close attention to both South and North Vietnamese perspectives on the war. In addition, we will examine the long-standing arguments among both historians and political scientists over how to explain and interpret the longest and most controversial war in American history.

Class Format: seminar

Requirements/Evaluation: two 7-page papers, one 8- to 10 page paper, and active class participation

Prerequisites: none

Enrollment Preferences: sophomore and junior Political Science majors and Leadership Studies concentrators

Enrollment Limit: 35

Expected Class Size: 19

Distributional Requirements: Division 2

Writing Intensive

Other Attributes: LEAD American Foreign Policy Leadership

PSCI 264 Politics of Global Tourism

A decade ago, tourism passed oil to become the world’s most valuable export. This arguably frivolous activity accounts for more than 10% of global GNP, and employs an enormous number of people. Tourism accounts for most of the revenue that the poorest countries receive; meanwhile, presidents and prime ministers of nuclear-capable countries beg on TV for visitors. Where are the politics in this vast, complicated industry and why is no one paying attention? This class explores various types of tourism, asking what happens in a tourist encounter, who benefits, who loses, and what changes. We will examine cases—Antigua vs. Auschwitz, Angkor Wat vs. Alaska—to help us understand the process from the points of view of the tourists, the toured-upon, and the governments and international organizations that oversee this industry. Our readings range from academic anthropology, economics, political science, and sociology (MacCannell, Veblen) to magazine accounts (Kincaid, Krakauer).

Class Format: lecture/discussion

Requirements/Evaluation: two essays, one major presentation with accompanying write-up, active and constructive class participation

Prerequisites: none

Enrollment Preferences: Political Science majors

Enrollment Limit: 30

Expected Class Size: 30

PSCI 265 The International Politics of East Asia

This course examines the political, economic, and cultural determinants of conflict and cooperation in East Asia. Throughout the semester, we will examine three distinct but inter-related aspects of international relations in East Asia: Security, economy, and culture by using some core concepts and theoretical arguments widely accepted in the study of international relations. We will engage some of the central questions and issues in the current debate on East Asia. Do East Asian countries seek security and prosperity in a way fundamentally different from the Western system? Is there a single best way to maintain regional order and cooperation across regions? Will a strong China inevitably claim its traditional place under the sun? Will Japan continue to live as a nation with enormous economic power but limited military means? What is the choice for South Korea between security alliance with the United States and national reconciliation with the North? What should be done to dissuade the authoritarian regime in North Korea from acquiring nuclear capabilities and lead it to different paths toward national survival? By the end of the semester, you will gain both a general perspective and substantive knowledge on East Asian international politics.

Class Format: lecture/discussion

Requirements/Evaluation: midterm exam, team debate, take-home final exam, class participation and other assignments

Prerequisites: none

Enrollment Preferences: Political Science and Asian Studies majors

PSCI 266 The United States and Latin America

This course examines the most important political and diplomatic divide in the Western Hemisphere. The first half is a historical survey of US-Latin American foreign relations from the early Spanish American independence movements through the end of the Cold War, with some emphasis on the latter. We consider how this history confirms or undermines influential views about US foreign relations and about international relations generally. We also compare historical US foreign policy toward the hemisphere to current policy globally. The second half covers the most important current issues in hemispheric relations: the rise of leftist governments in Latin America, economic integration, the war on drugs, immigration, and border security. At the end we reconsider current US policies, in view of the economic and political evolution of Latin America, in historical context.

Class Format: lecture/discussion, with more lecture in the first half, more discussion and several in-class debates in the second quarter

Requirements/Evaluation: a map quiz, a 5-page midterm paper; one 4-page policy paper; and either a second policy paper and the regular final exam, or a midterm-length (10-page) research paper and an abbreviated final exam

Prerequisites: none

Enrollment Preferences: Political Science majors

Enrollment Limit: 35

Expected Class Size: 35

PSCI 273 Politics without Humans?
Crosslistings: PSCI 273/ENVI 273
Are human beings the only beings who belong in politics? And is political
involvement a unique or defining aspect of what it means to be human? Such
questions are increasingly complex as the boundaries of "the human" become
blurred by the rise of artificial intelligence, robotics, and brain implants; shifting
attitudes towards both animal and human bodies; and the automation of
economic and military decisions (buy! sell! attack! retreat!) that used to be the
prerogative of human actors. How do visions of politics without humans and
humans without politics impact our thinking about longstanding questions of
freedom, power, and rights? Can and should the link between humans and
politics survive in an age in which "posthuman" or "transhuman" entities
become central characters in the drama of politics? This class will consider
these questions through readings, films and artifacts that bring political theory
into conversation with science fiction, popular literature on the so-called
"singularity" (the merger of humans with computers), science and technology
studies, evolutionary anthropology, "new materialist" philosophy, and feminist
theory.
Class Format: lecture/seminar
Requirements/Evaluation: class participation, three 6- to 8-page papers
Extra Info: please note that this is an introductory-level course with no
prerequisites. First year students and those with no background in political
theory are welcome, as are more experienced students

PSCI 283 Dirty Politics: Regulating Hazardous Chemicals and Wastes
Crosslistings: ENVI 283/PSCI 283
Since consumers were first introduced to the promise of "better living through
chemistry," society has had to wrestle with the impacts, often far removed in
place and time, resulting from a rapid proliferation of hazardous chemicals and
wastes. Policy responses, be they at the local, national or global scale, are
often limited to reactionary efforts to counter releases into the environment,
are constrained by the prevalent use of the technologies in question, and
further bring to the fore key challenges of environmental justice and risk
management.
How then are we to regulate DDT without adversely affecting our fight against
mosquito-borne malaria? How might we preserve the ozone layer while still
maintaining the benefits of food preservation through refrigeration? How can we
reap the benefits of the electronic age without condoning the steady flow of
electronic waste affecting workers' health and environments in developing
countries? Emphasis will be placed on understanding the politics that bring about,
and allow us to address, these problems. We will be examining in
particular novel policy responses, including Europe's precautionary safe use
law, citizen science initiatives and consumer-driven certification schemes.
Class Format: seminar
Requirements/Evaluation: participation, several smaller assignments, and a
final research project
Prerequisites: ENVI 101 or permission of instructor
Enrollment Preferences: Environmental Policy & Environmental Science
majors, Environmental Studies concentrators, and Political Science majors
Enrollment Limit: 19

PSCI 285(F) The Revolutionary Generation: Galaxy of Leaders
Crosslistings: LEAD 285/PSCI 285/HIST 354
The American Revolution produced a galaxy of brilliant politicians, statesmen,
and military leaders of extraordinary courage, intellect, creativity, and
character. Washington, Hamilton, Jefferson, Madison, Adams. In this seminar,
we will study their astounding accomplishments—a successful war of
independence, a Constitution and Bill of Rights, enduring democratic political
institutions, and a nascent party system. But mostly we will focus on their ideas,
for they were thinking revolutionaries. We will examine in depth and in
detail their superb writings, their letters and speeches as well as Madison's
and Hamilton's Federalist essays. We will also read recent interpretations of
the founding generation by Gordon Wood, Joseph Ellis, Bernard Bailyn, and
others.
Class Format: seminar

PSCI 291T American Political Events (W)
Scandals. Wars and assassinations. Contested elections, Supreme Court
decisions, and constitutional amendments. As large as they loom in our daily
experience and our historical memory, these sorts of events—concrete,
discrete things that happen in and around the political world—are often
underestimated as catalysts of political change. Indeed, in the study of
American political development, we often look to complex processes and
underlying causes as explanations for how and why ideas, institutions, and
policies both emerge and evolve. Yet for all our focus on long-term and subtle
causal mechanisms, events often serve as political turning points in ways that
vary over time, last for extended periods of time, and are not always entirely
predictable at the time. Beginning from the presumption that change often has
proximate as well as latent causes, this tutorial focuses on events as critical
curriculums in American politics. Our concern with these events is not with
why they happened as or when they did but, rather, with how they altered
the American political order once they did—with how they caused shifts in political
alignments, created demands for political action, or resulted in a reordering of
political values. Over the course of the semester, we will look at ten different
types of events, ranging from those that seem bigger than government and
politics (economic collapse) to those that are products of government and
politics (landmark policy initiatives), in each instance juxtaposing two different
categories of a particular category of event. In so doing, we will seek to use
controversial and consequential moments in American politics as a window
into deeper questions about political change and the narratives we tell about it.
Class Format: tutorial
Requirements/Evaluation: five 5-to 7-page essays, five 2- to 3-page
critiques, and a final 4-page reflection

PSCI 292(S) Threats to the Republic: Politics in Post-Obama America
When Barack Obama’s successor assumes office in January 2017, he or she will be asked to govern an America that is out of sorts. Economic inequality on a level not seen in over a century, Terrorist attacks at home and abroad, Escalating racial violence in cities, Protests against cultural insensitivity on campuses. Social unrest over the definition of American morality and over who counts as an American. Ideological polarization that regularly brings the government to a standstill and periodically threatens financial ruin. Looming environmental catastrophes capable of provoking humanitarian crises. To what extent do these calamities pose new, existential threats to the republic? And is there anything that can be done to stop or slow them? This course interrogates many peers that pundits and activists tell us we should worry about in 21st century America. In examining these issues, we will seek not only to understand the contours of the potentially dramatic political changes that some say are unfolding but also to put these issues into historical context so that we may draw lessons from the crises of the past. Ultimately, our goal is to determine how worried we should be—and what, precisely, we should be worried about—as a new era of American leadership begins.

Class Format: lecture

PSCI 305T Challenges Of Knowing
Although we may be mistaken about something we have ourselves experienced, we often take direct experience to be valid on its face. How do we know about events that occurred outside our ken? The distinction between knowledge as truth, based on direct knowledge, and mere opinion unhinged from direct observation, has a long lineage. The concern for how we know something to be true has given birth to the field of epistemology, the study of truth and how best to obtain and represent it. The tutorial will consider the modes of truth and the tools used in a variety of case studies from the Holocaust. How can we, who have had no direct experience, nor memories, of the events of the Holocaust, come to know it?
There is a wide variety of ways of seeking and representing truth: memoir, testimony, documents of the time, oral history, each derived directly from participants. There are also accounts given by non-participants: documentary producers, journalists, historians, sociologists, and others using the tools of their disciplines. Each of these have different ways of generating an understanding and each brings some attendant standards to distinguish true from falsity (e.g., memoirs can be self-serving or self-effacing, even complete mis-representations; historians and journalists need to be able to tell whether a document is real or is a forgery).

PSCI 308 From Welfare to Nanny to Surveillance? The Politics of the American State (W)
Ronald Reagan’s announcement in 1981 that “government is not a solution to our problems, government is the problem” has defined American politics for nearly three decades. Skepticism of government has deep roots and strong resonance throughout American political history, yet in many ways the American state has grown steadily larger and stronger. This course explores this conundrum by examining the American state, and its growth, in various arenas. We will assess traditional theories about the weak American state in the light of arguments about the state as: regulator of family and “private” life, insurer of security, and arbiter of the acceptable uses of violence and surveillance.

Class Format: seminar
Requirements/Evaluation: several short papers on class readings and a longer, 15-20 page paper with oral presentation
Prerequisites: at least one class in American politics
Enrollment Preferences: Political Science majors
Enrollment Limit: 14
Expected Class Size: 14
American political life in the twenty-first century? With Tocqueville as a guide

"I confess," French aristocrat Alexis de Tocqueville wrote in the introduction to his book Democracy in America in 1835, "that in America I saw more than America. I sought to understand the image of democracy itself, its inclinations, its character, its prejudices, and its passions, in order to learn what we have to fear or hope from its progress." What would Tocqueville see if he returned to America today, almost 200 years later? What types of institutions, dynamics, and processes animate American political life in the twenty-first century? With Tocqueville as a guide, we will think about political ethnography, this course investigates four central elements of political life—religion, education, difference, and crime and punishment—that simultaneously pose problems for and represent sites of progress in American democracy. For each subject, we will ask several key questions. How has that particular aspect of political life changed in the recent past? How might it change in the near future? Does it conform to how American politics is designed to work? To how we want American politics to work? Using a diverse set of readings drawn from empirical political science, contemporary democratic theory, American political history, theoretical documents, political punditry (from the left and the right), and current events, our focus, like Tocqueville before us, is on teasing out both the lived experience—the character and challenges—of American democracy and examining any disconnect between that experience and the ideals that undergird it. Among the many specific questions we will consider are whether particular religious traditions might be incompatible with democratic values, the extent to which recent changes in higher education have affected the health of democratic politics, the effects of ideological polarization on democratic discourse, and the place of the jury system in securing democratic justice. Throughout the semester, we will not only approach these questions from the joint perspectives of theory and practice but also seek to enrich our understanding by exploring American democracy as it happens all around us with several exercises in the community at large.

Class Format: discussion

Requirements/Evaluation: two experiential projects with accompanying write-ups of at least 5 and 7 pages, six 2- to 3-page ethnographic reflections, and class participation.

PSCI 310(S) Political Psychology

Crosslistings: PSCI 310/PSYC 345

What kinds of politics are humans capable of engaging to govern themselves? For millennium political philosophers have asserted different foundational claims about "human nature" that in turn led them to their vision of politics. For example, the enlightenment thinkers held that science and technology would strengthen rationality and thereby making democracy more viable. On the other hand, those who defend authoritarian regimes often do so by proclaiming that the general public is incapable of rationality and of self-rule and should therefore accept rule by their betters (previously nobility, now representatives). But in its current form is very influenced from the joint perspectives of theory and practice but also seek to enrich our understanding by exploring American democracy as it happens all around us with several exercises in the community at large.

Class Format: lecture/discussion

Requirements/Evaluation: a midterm, a term paper, and a final exam.

PSCI 314 Leadership in American Political Development (W) Crosslistings: PSCI 314/LEAD 314 From the Founding to the present, the American political order has undergone incredible, cataclysmic and thoroughgoing transformations, yet it has also proven to be remarkably enduring. How can this be? Where do we find continuities and where upheavals? What accounts for the continuities, and what for the changes? What sorts of transformations have been possible, and who or what has made them possible? Finally, what are the costs of change (and of continuity)—and who pays them? The goal of this course is to assess American political change, or lack of, and to gain a sense of the role that individual leaders have played in driving change. We will examine when and how individual agency and leadership has mattered vis-à-vis broader historical and contextual factors, including economic developments, demographic change, and constitutional and institutional parameters. After examining general models of change and of leadership, we will consider specific case studies, such as civil rights for African-Americans, gender equality, labor demands, and social conservatism. We will consider some of the complicated legacies of change. Finally, we will look at arguments that America has been "exceptional"—or, unlike other countries—as well as critiques of these arguments, to help us gain an understanding of future prospects for political transformation.

Class Format: research seminar

PSCI 315 Parties in American Politics (W) Political parties have played a central role in extending democracy and organizing power in the United States, yet their worth is a continuing subject of debate. In one ideal formulation, parties not only link citizens to their government, they also provide the cohesiveness and unity needed to govern in a political system in which power is widely dispersed. But there is also an American tradition of antipathy toward parties. They have been criticized by some for inflaming divisions among the people and for grid-locking the government. For others, political parties fail to offer citizens meaningful choices; the Republican and Democratic parties are likened to a choice between "two fiddles and two-headed lem." This course will investigate this debate over parties by examining their nature and role in American political life, both past and present. How have the parties changed over time?
Throughout the course, we will explore questions such as: What constitutes a party? How have the parties changed over time? For whom do they function? Why a two-party system, and what role do third parties play? Is partisanship good or bad for democracy? For governance? We will seek answers to these questions both in seminar discussion and through substantial independent research projects.

PSCI 316(S) Policy Making Process (W) Politics as usual. It's a phenomenon we all love to hate. But what does it mean? When government policy is decided by politics, does it mean the policy is necessarily bad? Can we get rid of politics in policy making or improve on it somehow? What would "politics as usual" look like anyway? This class examines the policy making process with particular emphasis on the United States: How do issues get defined as problems worthy of government attention? What kinds of alternatives are considered as solutions to these problems? Why do we end up with some policies but not others? Do certain kinds of processes yield better policies than others? How should we decide what constitutes a good policy?

Class Format: seminar
Requirements/Evaluation: several short papers, research paper, class participation

Spring 2017
PSCI 325(S) International and Transitional Justice (W)
Crosslistings: PSCI 325/JLST 402
Before the 1990s, the world saw only occasional, discrete war crimes trials after specific war catastrophes. In the last two decades, trials expanded dramatically in number, scope, and philosophy. Separate Ad Hoc Tribunals for crimes in Yugoslavia and those in Rwanda, in Sierra Leone and in Cambodia are giving way to a permanent International Criminal Court, which has begun to try individuals and codify its jurisdiction. The UN Security Council, alongside national governments, decides on legitimacy and punishment. At the same time, worries about residual impunity or the effect that punishment might have on societies’ futures has led to the development of national and social courts, as well as national military tribunals, to complement those at the international level. Meanwhile, national activists look to international apologies and reparations for models of what to demand. Examples Models cut of internationalized transitional justice abound. This capstone seminar examines the intent, process, meaning and consequence of these new institutions, particularly in terms of national constitutions, international law, and principles of justice.

Class Format: seminar
Requirements/Evaluation: four papers, longer final paper, class participation
Prerequisites: Political Science major or permission of instructor
Enrollment Preferences: Political Science majors concentrating in International Relations

PSCI 327(F,S) Leadership and Strategy (W)
Crosslistings: PSCI 327/LEAD 327
This course focuses on the role of leaders and statecraft in international relations. In particular, this course examines the relationships between political and military objectives. The aim is to identify and analyze the principal structural and situational constraints—both foreign and domestic—that limit leaders’ freedom of action, and which they must manage effectively to achieve their diplomatic and military goals. The course integrates theoretical perspectives related to a range of international security issues—including the causes of war, alliance politics, nuclear strategy, deterrence, coercion, reassurance, misperception, and credibility concerns—with illustrative case studies of decision-makers in action. The basic structure of the class is interdisciplinary; the goal of this approach is to utilize key conceptual arguments to gain greater leverage for the examination of major historical decisions in national security policy. Students will be asked to analyze and evaluate the strategic choices we examine, as well as the processes by which they were reached. The primary objective of the course is for students to improve dramatically their understanding of the role of leaders and strategic choice in international relations.

Class Format: seminar
Requirements/Evaluation: students will be evaluated based on their participation in class, an midterm examination, and a final research paper, roughly 20-25 pages in length
Prerequisites: none
Enrollment Preferences: Political Science Majors and Leadership Studies concentrators
Enrollment Limit: 15
Expected Class Size: 15

PSCI 335(F) The Birth of Biopower
Michel Foucault famously invented the concept of biopower. Looking at modernity, he saw two forms of biopower. First, the "anatomo-politics" whereby we discipline our bodies to work in institutions like factories, schools and armies in order to maximize profits and productive and destructive capacities. Second, the "biopolitics" of population whereby governments manage the births, deaths and health of populations in order to maximize power. Biopower is an increasingly important concept as we witness the rise of biometric security mechanisms, cyborg war-fighting technologies, the Human Genome Project and genetically modified organisms. But when exactly did biopower begin? In this course we revisit the birth of biopower in the classical Greek world, the theories of Plato and biopower in Sparta (especially Spartan eugenics and war-fighting), as we explore work by Foucault and other theorists of biopower today.
Class Format: seminar
Requirements/Evaluation: class participation, e-responses, papers
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

PSCI 336T Freud and Psychoanalysis (W)

Crosslistings: PSCI 336/COMP 336

By any measure, Sigmund Freud was one of the most influential intellectuals of the 20th century. Although he was not explicitly preoccupied with articulating political principles and only rarely addressed questions of governance or policy, his assumptions, theories, and therapeutic techniques have fundamental implications for the basic questions of political theory—questions about, for instance, the sources of conflict and group cohesion, what ways of living are desirable and attainable, and the place of reason, desire, emotion, affect, and motive in the interpretation and explanation of human interaction. This tutorial offers an in-depth exploration of Freud's key writings and concepts, from his early work on sexuality and dreams through his final writings. While we will read some of the texts that most directly address conventional political topics, Freud generally has more to say to students of conventional politics when he is formulating his fundamental views of the psyche (of the nature and role of the unconscious, of drives, etc.), and the syllabus will reflect that view. Over the course of the semester, we will consider some scholarly commentaries on specific texts as well as critical assessments of the psychoanalytic project: as time allows, we may also engage such key later psychoanalytical thinkers as Klein, Winnicott, Lacan, and Kristeva. The preponderance of the tutorial, however, will be given over to the students' own careful reading, interpretation, and evaluation of Freud's most important writings.
Class Format: tutorial
Requirements/Evaluation: grades are based on five or six 5- to 7-page papers, five or six 1.5 page responses, and class participation
Extra Info: may not be taken on a pass/fail basis
Prerequisites: at least one course in political theory, literary theory, or philosophy or permission of instructor

PSCI 337 Visual Politics (W)

Crosslistings: PSCI 337/ARTH 337

Even casual observers know that appearances matter politically and that the saturation of politics by visual technologies, media, and images has reached unprecedented levels. Yet the visual dimensions of political life are, at best, peripheral topics in contemporary political science and political theory. This seminar explores how our understanding of politics and political theory might change if visuality were made central to our inquiries. Treating the visual as a site of power and struggle, order and change, we will examine not only how political institutions and conflicts shape what images people see and how they make sense of them but also how the political field itself is visually constructed. Through these explorations, which will consider a wide variety of visual examples, we will also take up fundamental theoretical questions about the place of the senses in political life. Readings may include relevant excerpts from ancient and modern theorists, but our primary focus will be contemporary and will bring political theory into conversation with such fields as art history, feminism, film studies, psychoanalysis, affect theory, and cognitive science. Possible authors include Arendt, Azoulay, Bal, Barthes, Benjamin, Bruno, Buck-Morss, Butler, Clark, Connolly, Crimp, Deleuze, Elkins, Fanon, Foucault, Hobbes, Lacan, Merleau-Ponty, Mitchell, Mulvey, Noé, Plato, Rancière, Rolin, Scott, Slawinski, Sontag.
Class Format: seminar
Requirements/Evaluation: regular, engaged class participation and three 7- to 8-page papers
Prerequisites: at least one prior course in political theory, cultural theory, visual studies, or art history; or permission of instructor

PSCI 338T Garveyism

Crosslistings: AFR 338/PSCI 338/LEAD 338

This course explores the life, work, political thought, and activism associated with the Jamaican Pan-Africanist Marcus Mosiah Garvey and the transnational movement—Garveyism—that Garvey ushered into the modern world. We will investigate the founding of Garveyism on the island of Jamaica, the evolution of Garveyism during the early twentieth century across the Americas and in Africa, Garveyism in Europe in the mid-twentieth century, and the contemporary branches of the Garvey movement in our own late modern times. The implications of Garvey's conflict with W. E. B. Du Bois and the subsequent clearances of Garveyism in political thought and allegiances among their respective adherents will be addressed, along with various other core issues including: the relationship between race, nation, and empire; transnationalism; the meaning of power; notions of leadership; the limitations of understanding Garveyism by the phrase "Back-to-Africa"; the moral philosophy of respect, reparation, and redemption; biblical political theory; Pan-Africanism; the impact of Garveyism on political theological movements such as the Nation of Islam and Rastafari; women in the Garvey movement; and Garveyite strategies for forging models of political solidarity in dark times.
Class Format: tutorial

PSCI 339 Politics and Aesthetics (W)

In recent years, political theorists have grown increasingly preoccupied with questions of what since the Romantic era has been called "aesthetics." In a moment of global economic crisis, amidst continuing problems of war, violence, poverty, and injustice, this concern may seem puzzling, even fundamentally misplaced. Yet just as Plato, for instance, famously connected questions of the good and the true to those of the beautiful (so that it is
anachronistic to impute to him a separation between political and aesthetic domains), some notable recent theorists claim that investigating aesthetic matters can enable us to gain a better understanding of political perceptions, ideals, aspirations, struggles, and possibilities. Among the main questions we will ask in this seminar is whether or not that claim is persuasive. Along the way, we will pay sustained attention to such matters as the role of emotion, affect, and the senses in political life, the nature of aesthetic judgment, its relationship to both political judgment and structures of power, and the similarities and differences between making art and acting politically. We will also, of course, examine what it means to call something "aesthetic," and we will think about the limits of the aesthetic as a category of analysis. Though we will regularly take up examples drawn from the worlds of art, politics, and the mass media, our central focus will be on the careful reading of philosophical and critical texts, including Kant's "Critique of Judgment" and writings from among the following authors: Adorno, Arendt, Bal, Benjamin, Burke, Cavell, Danto, Deleuze, Dickie, Felski, Freud, Hegel, Heidegger, Hume, Mill, Nietzsche, Ramachandran, Rancière, Schiller.

Class Format: seminar
Requirements/Evaluation: regular class participation, several short (1 page) response memos, one paper (6 pages) and one longer final essay (12-15 pages)
Prerequisites: open to juniors and seniors with at least one course in political theory or philosophy, or permission of instructor

PSCI 340 Why States Fail: Political Violence at the End of the 20th Century
This course considers the origins of political violence and state failure at the end of the 20th century. It seeks to address why there was a resurgence of political violence at the dawn of the 21st century. Toward that end, we begin by considering competing explanations of political violence (ethnicity, democratization, natural-resource endowments, and predatory elites). We then move on to the empirical section of the course in which we cover case studies of state failure in parts of Eastern Europe, Africa and the Middle East.

Class Format: seminar/discussion

PSCI 341 Modern Midas? Resource Abundance and Development (W)
Many academics, international nongovernmental organizations, international financial institutions, and the media assert that natural resource endowments—oil, gas, and diamonds—are like the touch of Midas. Yet consider that while mineral abundance promises to give countries a platform for prosperity, equity, and political stability, it often produces poor economic performance, weak authoritarian states, and conflict. Is there a resource curse, or is it possible for mineral rich countries to escape the modern counterparts of Midas? In this seminar we revisit the debate on the relationship between mineral wealth and development, focusing on the factors and conditions that lead some resource rich countries to fail and others to succeed.

Class Format: seminar
Requirements/Evaluation: active participation in discussions, four short theory reviews (1-2 pages), case study discussions (4-5 pages), literature review (10 pages), and a research proposal (15 pages)
Extra Info: may not be taken on a pass/fail basis

PSCI 342(F) Intolerance and Justice
The array of stories from the University of Missouri, Princeton, Yale, Amherst, and Williams reflect profound confusion about the place of tolerance in, but not restricted to, higher education. We will examine two variants, social tolerance and political tolerance, and the similarities and differences between those that tolerate and those that mitigate against. Happily the empirical record covers not only the United State but also other emerging democracies and from very new democracies as well. And, all this research points to the same insight. Political tolerance is not only conceptually different from social tolerance they are empirically unrelated (that is, making people more socially tolerant is of little effect in enhancing political tolerance). Thus, the challenge is how to deal with social tolerance, which requires a focus on civility, and deal with political tolerance, which requires a focus on citizenship. As the norms of each, civility and citizenship are not comfortably aligned when and where one should take precedence over the other is one of the central questions of this course.

PSCI 344T The Political Theory of Liberal Economics (W)
This course deals with the economic and political writings of four important economists—Adam Smith, John Maynard Keynes, Friedrich Hayek, and Milton Friedman. Although all are remembered primarily as economists, they also engaged in writing political theory. This course will examine the political assumptions and implications of their economic thought and where they agree and disagree, particularly the role they assign to the state in constructing and sustaining markets. How do they conceive of the origin of markets? What role does the state play in making, shaping, and maintaining markets? Do the economists conceive of the state in similar terms and, especially, do the more libertarian economists really proceed as if markets are self-generated and spontaneous? What is it that economic theorists have the state doing? What is the implicit theory of the state?

Class Format: tutorial
Requirements/Evaluation: grades are based on five to six papers and participation

PSCI 345(F) Cosmology and Rulership in Ancient Chinese Political Thought (W)
This class will involve students in close reading of, and exegetical writing about, core texts of ancient Chinese political thought. The purpose is to gain an understanding of a number of different perspectives on politics and leadership, especially Confucianism, Legalism and Taoism. While the primary focus will be on the meaning of the texts in the context of their own times, contemporary applications of core concepts will also be considered. The class will begin with background readings, since no prior work in Chinese philosophy or history is assumed. Then the class will read significant portions of the following canonical works: The Analects, Mencius, the Daodejing, Zhuangzi, and Han Feizi.

Class Format: discussion/lecture
Requirements/Evaluation: two 5-page papers and one 15-page paper
Prerequisites: none

PSCI 346(S) Radical Theories of Political Struggle: Anti-Black Racism and the Obama Administration
Crosslistings: INTR 334/AFR 334/PSCI 346
This seminar reviews contemporary theories of "anti-black racism"; their articulation or assimilation within current political movements and mobilizations; and the influence and impact such theories—expressed in and/or as activism—have on the racial justice programs and civil rights policies of the Obama Administration.
Legal theory, "Afro-pessimism," black feminist/queer theory are forms of radical thought shaping political discourse and influencing new advocacy formations (e.g. the Black Women's Blue Print and #BlackLivesMatter); these new democracy advocates have in turn shaped the public rhetoric and policy initiatives of a black presidency as it grapples with multiculturalism and racial animus.

Class Format: seminar
Requirements/Evaluation: 1 research paper (50%); 2 presentations with summaries (40%); active engagement in class discussions (10%); Weekly student presentations consist of 15 minutes of analysis with written summaries and Q/A.
Extra Info: 1st quarter of semester: thesis and outline; 2nd and 3rd quarters: 2-page summaries integrating assigned texts into research analysis; 4th quarter: edit final paper
Prerequisites: familiarity with one of the following: critical race theory; Africana/Black studies; feminist anti-racist political movements
Enrollment Preferences: if over enrolled students will be asked to submit a paragraph on their research interest relevant to the seminar.
Enrollment Limit: 15
Expected Class Size: 15

PSCI 349T Cuba and the United States (D) (W)
With the passing of the Castro brothers' regime on the horizon, we examine the long and deeply felt history of dependence and conflict between Cuba and its colonial neighbor in the north. It begins with the political economy of the colony, then covers the Cuba-US relationship from José Martí and 1898 through the Cold War to the present, emphasizing the revolutionary period. Tutorial topics include the significance of Martí, sovereignty and the Platt Amendment, as well as various aspects of the communist regime: mobilizational politics; cultural expression; race and national identity; policies on gender and sexual orientation; social programs; political institutions; and the evolution of the Cuban exile community in the US. Materials include journalism, official publications, biographies, travel accounts, polemics, policy statements of the US government, and a wide range of academic works.

Class Format: tutorial; a lecture in the first week; then ten weeks of tutorial; then a discussion class in the final week
Requirements/Evaluation: five 5- to 6-page papers, five 1- to 2-page responses, and one 1-page essay for the final class
Extra Info: may not be taken on a pass/fail basis

PSCI 350 Comparative Political Economy (W)
This tutorial provides an introduction to comparative political economy by focusing on an enduring puzzle: the spread of capitalism led to both transitions to democracy and dictatorship/authoritarianism. How is it that the expansion of markets led to the birth of democracy in some countries, but dictatorships in others? What, if any, is the relationship between economic development and the organization of power (regime type)? Does economic development lead to the spread of democracy? Or is economic crisis the key to understanding the conditions under which dictatorships fail? To answer these questions we read works by Moore, Lipset, Schumpeter, Przeworski, Rueschemeyer et al., Haggard & Kaufman, among others.

Class Format: tutorial
Requirements/Evaluation: five 5- to 6-page lead essays, five 1- to 2-page response papers, one 10- to 12-page revised lead essay
Extra Info: may not be taken on a pass/fail basis
Prerequisites: one of the following: PSCI 201, 202, 203, 204, 229, 250, 254, 256, 333 or permission of instructor

PSCI 351 The New Left and Neoliberalism in Latin America (W)
Recent years have seen a resurgence of the political left in Latin America. This course seeks to understand the origins of this new left, the ideological character of its protagonists, the neoliberal policies and philosophy it opposes, and the arena of democratic politics it now inhabits. We first read polemics from both sides, before stepping back to consider Latin American political economy, including the twentieth-century left, from a more historical and analytical perspective. With this preparation, we then look more closely at major contemporary figures and movements in Venezuela, Bolivia, Ecuador, Brazil, and other countries. After considering explanations of the rise of the left and assessments of its performance in power, we end our common readings by asking what it might mean today to be on the left in Latin America—or anywhere—both in policy and political terms.

Class Format: lecture and discussion, plus two seminar classes
Requirements/Evaluation: three short essays, a 1-page research proposal and a 12-page research proposal
Prerequisites: a course on Latin America and a course in ECON, or permission of instructor
Enrollment Preferences: Political Science majors

PSCI 355T(S) American Realism: Kennan, Kissinger and the American Style of Foreign Policy (W)

Crosslistings: PSCI 355/LEAD 365

George Kennan is widely considered to be the author of the containment strategy that ultimately won the Cold War. Henry Kissinger served as National Security Advisor and Secretary of State. In addition to their distinguished careers in government, both men have published well-regarded and popular scholarship on various aspects of American foreign policy, international relations, and nuclear weapons. This tutorial will first examine the nature of their relationship to both Realist and Wilsonian perspectives on American foreign relations. We will then examine their experiences as strategists and policymakers during the most crucial moments of the Cold War. One of the key questions we will seek to answer is why Kennan and Kissinger disagreed on so many important issues, ranging from the Vietnam War to the role of nuclear weapons, despite their shared intellectual commitment to Realism. Finally, we will also examine some of the more recent biographies of both men, including John Lewis Gaddis's Pulitzer prize-winning George F. Kennan: An American Life and Niall Ferguson's Kissinger: 1923-1968: The Idealist.

Class Format: tutorial
Requirements/Evaluation: five 6-page papers, five 2-page response papers

PSCI 362T The Wilsonian Tradition in American Foreign Policy (W)

Crosslistings: PSCI 362/LEAD 362

During and after the First World War, President Woodrow Wilson developed an approach to international relations that challenged the dominant assumptions of Realism. Instead of a world order marked by alliances, arms races, and wars, Wilson offered a vision of a peaceful world and the rule of international law. While America ultimately rejected the League of Nations, the Wilsonian tradition has continued to exert a powerful influence on scholars and policymakers. This tutorial will intensively examine Wilson's efforts to recast the nature of the international system, the American rejection of his vision after the First World War, and the reshaping of Wilsonianism after the Second World War. We will spend equal time in the tutorial on both the theoretical and historical dimensions of Wilsonianism.

Class Format: tutorial

PSCI 365 U.S. Grand Strategy

Crosslistings: PSCI 365/LEAD 365

This course examines how U.S. leaders have conceived of their nation's place in the world and sought to use power to achieve national objectives. We will consider military affairs, economics, and diplomacy, but the class is mostly concerned with ideas. How have leaders from James Madison to George W. Bush thought about U.S. vulnerabilities, resources, and goals, and how have those ideas influenced foreign policy decisions? How did key leaders balance competing objectives and navigate difficult international circumstances? Which leaders were successful in managing U.S. statecraft, and which were not? Which leaders developed coherent grand strategies? What lessons might we derive for our own times from studying this history? The course will sweep across American history but will not attempt to be exhaustive in any way. Rather, it will focus on certain moments that highlight changing grand strategic thought. We will carefully consider, for example, the drafting of the U.S. Constitution, continental expansion in the Manifest Destiny period, the Civil War, overseas expansion in the late nineteenth century, the presidency of Woodrow Wilson, the Second World War, and the "War on Terror." Possible texts include Hamilton, Madison, and Jay, The Federalist Papers; Alfred Thayer Mahan, The Influence of Sea Power Upon History; George Kennan, American Diplomacy; Richard Immerman, Empire for Liberty; Henry Kissinger, Diplomacy; James McPherson, Tried by War: Abraham Lincoln as Commander in Chief; and a collection of primary sources.

Class Format: seminar
Requirements/Evaluation: attendance and active participation in class; two short essays and one longer research paper (approximately 15 pages)
Prerequisites: PSCI 120 or PSCI 202 or permission of instructor
Enrollment Preferences: Political Science majors and Leadership Studies concentrators
Enrollment Limit: 19

PSCI 367(S) The Politics of American National Security

Crosslistings: PSCI 367/LEAD 367

Primary Crosslisting

Liberal democracies face the challenge of establishing effective civil-military relations in order to protect and promote their cherished way of life while preserving civilian control of the armed forces. A lot is at stake in getting it right—everything from national survival to the preservation of liberty. In the process, countries must decide on policies for the armed forces: should they be focused on winning wars or on preparing society for peace? Should they be focused on being feared or on being trusted? In this course, we will examine a complex range of international, civil-military relations are explored to set the conditions for students to assess a country's foreign policy and to make informed decisions about the use of military force to achieve political ends. The course concludes with a section on the future of American civil-military relations.

Class Format: seminar
Requirements/Evaluation: two 5-7 page analytic essays, one 12-15 page analytic essay, and class participation
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

PSCI 368(S) Miracle?: The Demise of the Apartheid System

Crosslistings: GBST 368/PSCI 368

In February 1990, the last apartheid President, F W de Klerk, in a major policy speech in Parliament, announced changes to the apartheid system. Until then, South Africa was locally and globally known for its racist, repressive and authoritarian political system. Four years later, the former white minority system was replaced by a democratic system in which, for the first time, the black majority could participate in a free and fair elections and enjoy rights taken for granted in many democracies. The end of apartheid and the emergency of universal franchise has been described by some commentators as a “South African miracle”. This historical process was significant for three reasons. Firstly, it was remarkable that 18 parties, all largely erstwhile enemies with very little in common, agreed to meet and map out the future of the country. Secondly, it is noteworthy that they even agreed on a common agenda. Finally, that an agreement was ultimately reached, leading to elections and the adoption of a national constitution, was in itself, short of remarkable. Was this development a miracle? What explains this atypical and very rare transfer of power from a highly privileged minority to the majority by mutual agreement? This course explores a complex range of international, regional and domestic factors that contributed to this land-mark negotiation.
process. What were the strengths and vulnerabilities of the various parties? The course concludes with the analysis of the conduct of the negotiators and the agreement reached.

PSCI 370 The Political Thought of Frantz Fanon (W)
Crosslistings: AFR 360/PSCI 370/PHIL 360/LEAD 360

Marxist critics, anthropologists, and revolutionary Fanon was among the leading critical theorists and African thinkers of the twentieth century. Fanon ushered in the decolonial turn in critical theory, a move calling on those both within and outside of Europe to challenge the coloniality of the age and to forge a new vision of politics in the postcolonial period. This course is an advanced seminar devoted to a comprehensive examination of Fanon’s political thought. We will begin with an analysis of primary texts by Fanon and end by considering how Fanon has been interpreted by his contemporaries as well as activists and critical theorists writing today.

Class Format: seminar
Requirements/Evaluation: evaluation will be based upon attendance and participation, weekly online reading response papers, a class presentation, two 7-page essays, and one 20-page final research paper
Prerequisites: none

PSCI 374 Shadows of Plato’s Cave: Image, Screen, and Spectacle
Crosslistings: PSCI 374/COMP 374/ARTH 505

In Book VII of the Republic, Socrates famously asks his interlocutors to picture people living in a cave, bound in chains and able to see only shadows on the wall. Thus begins the presentation of perhaps the most influential metaphor in the history of philosophy. One might even claim that when Plato deployed the metaphor in an extended allegory, he constituted the fields of both philosophy and political theory. In repeatedly examining the allegory over the centuries, later thinkers have elaborated their approaches not only to Plato but also to the nature of politics and the tasks of thinking. This class begins with the Republic’s cave and other key Platonic discussions of appearances, visual representation, and (literal and metaphoric) seeing, asking how Plato’s approaches to image, politics, and theory/philosophy shape each other. Building on those inquiries, we next take up important twentieth and twenty-first century returns to the cave, engaging such figures as Heidegger, Strauss, Arendt, Derrida, Irigaray, Rancière, and Badiou. Finally, we examine recent theories of screen and spectacle—both for their resonances with and departures from debates over the Platonic legacy—and case studies in the politics of both military and racial spectacles in the U.S. The question of what an image and what images do will run from the beginning of course to the end. Beyond the authors mentioned, readings may include such authors as Allen, Bruno, Clark, Debord, Friedberg, Goldsby, Joselit, Mitchell, Nightingale, Rodowick, Rosin, Silverman, and Virilio. Insofar as it fits student interest, we will also explore the cave’s considerable presence in visual culture, ranging from Renaissance painting through such recent and contemporary artists as Kelley, Demand, Hirschhorn, Kapoor, Sugimoto, and Walker, to films such as The Matrix.

Class Format: seminar
Requirements/Evaluation: regular glow posts and three 7- to 8-page essays or one 20-page final paper
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course offering
Prerequisites: one prior course in political theory, art history, cultural/literary theory, or philosophy or permission of the instructor
Enrollment Preferences: majors in political science, comparative literature, and art history, as well as students (up to 4) in the graduate program in art history
Enrollment Limit: 19

PSCI 375 Modern Jewish Political Theory (W)
Crosslistings: REL 330/PSCI 375/JWST 492

By the late 19th century, Jews across Europe were faced with an urgent political problem. Amidst burgeoning nationalism and self-consciousness throughout the continent, despite the liberal promises of the Enlightenment, Jews remained a vulnerable, segregated, and stigmatized minority population. Jews had to decide where to pin their hopes. Should they ally themselves with the liberals or the communists? Should they embrace nationalism or cosmopolitanism? Should they, perhaps, abandon Europe altogether and reconstitute themselves elsewhere? If so, should they focus their efforts on relocation to the historical land of Israel? Or could they go anywhere? Wherever they might go, should they aspire to build a modern Jewish nation-state, a semi-autonomous Jewish community, or some other arrangement? Should this coincide with the cultivation of a distinctively Jewish modern language? If so, should it be Hebrew or Yiddish? In this course we will assess various answers to these questions proffered by Jewish political thinkers in the modern period. We will pay particular attention to the construction of “Jews” and “Judaism” in these arguments. And we will ask persistently: what constitutes a “Jewish justification” for a political claim in modern Jewish political theory? Coverage will include: Jewish liberalism, political Zionism, Yiddishist autonomism, messianic quietism, and other views. We will read mostly primary sources, including texts by: Hermann Cohen, Theodor Herzl, Chaim Zhitlowsky, Franz Rosenzweig, Leo Strauss, Hannah Arendt, and many others.

Class Format: seminar
Requirements/Evaluation: six short (1-2 pages) response papers; two 6- to 8-page papers, each analyzing a different view in depth;
Extra Info: a final 18- to 20-page paper that incorporates the two previously submitted 6-8-page papers, but also compares the two views and adjudicates between them

PSCI 410 Senior Seminar in American Politics: Civic Education in America

Despite the fact that, according to a recent poll by the National Constitution Center, 8 in 10 Americans believe that democratic government requires an informed and active citizenry, fewer than 4 in 10 can name the three branches of the federal government. Whether or not we regard this particular encyclopedic fact as especially important, few disagree with the idea that, when it comes to politics and citizenship, Americans are an ill-informed people. But what exactly would we want Americans to know more about? And how exactly might we get them to learn it? Taking these questions as its starting points, this senior seminar will tackle the state of civic education in America — its promise and its pitfalls, its past iterations and its practice in contemporary times. In the first half of the semester, we will look closely at a series of debates about the goals, substance, and effect of civic education, including whether (and why) we should want it, what exactly it can and should look like (perhaps looking to civic education in other nations for meaningful points of comparison), and what sorts of effects it may have on citizens individually and the polity at large. In the second half of the semester, we will seek to put what we have learned into action, with students selecting a particular school (a city, a town, or a process) and a civic education curriculum around it for introduction at several distinct grade levels in local schools. Embodying the idea that you never know something as thoroughly and meaningfully as you might until you have taught it, this seminar will seek simultaneously to deepen our own civic knowledge and practices and to cultivate more meaningful knowledge and practices in others.

Class Format: seminar
Requirements/Evaluation: one or two short essays, class participation, and a multi-part experimental project culminating in a class presentation and a 15- to 20-page paper

PSCI 410(S) Senior Seminar in American Politics: Interpretations of American Politics

Current assessments of the state of American politics vary widely. Though recent polls show that as many as 60 percent of Americans think that the country is headed down the wrong-track, it is not clear what that means. Critics on the left worry that the United States is on an imperial quest, exerting resources from the global many for the advantage of an elite few. Critics on the right worry that the U.S. has abandoned the traditions that made it strong and has entered a period of moral decay. What are we to make of these different assessments? What do left and right see when they survey the nation, and why is it that they see so different? Any diagnosis of contemporary maladies is premised on a vision of what a healthy functioning republic looks like. Our task in the seminar is to uncover and interrogate those visions. We will do this by exploring different interpretations of American politics, each with its own story of narrative tensions and possible resolutions. We will then use our investigation of how different authors, and different traditions, understand the nation to help us assess contemporary politics and come to our own conclusions about what animates it.

Class Format: seminar
Requirements/Evaluation: brief weekly writing assignments; two short essays; one longer paper; and oral presentation
Extra Info: may not be taken on a pass/fail basis
Prerequisites: at least one course in American politics
Enrollment Preferences: senior Political Science majors

**PSCI 420 Senior Seminar: The Vietnam War and the Vietnam Era, 1961-75**

**Crosslistings:** PSCI 420/LEAD 458

This upper-level course has three major objectives. First, it will familiarize students with the basic political, military and diplomatic facts of the Vietnam War. Second, it will acquaint them more generally with broader aspects of the years 1954-75, especially the great political and cultural changes that took place within the United States beginning around 1965. Lastly, each student will have the opportunity to research and write about some aspect of one of these two topics in some detail. In so doing, students will learn some new research techniques that use up-to-date software, and may take advantage of the enormous opportunities now available for on-line research.

**Class Format:** seminar

**Requirements/Evaluation:** class participation and a 20- to 25-page research paper

**Extra Info:** may not be taken on a pass/fail basis

**PSCI 420 The Great Transformation: America and Europe in the 20th Century**

**Crosslistings:** PSCI 420/LEAD 420

At the beginning of the 20th century, Europe was at the center of world politics and the main player in the balance of power while America was a peripheral player in the international system. American involvement in European affairs was strictly limited. By the end of the 20th century, the states of Western Europe would become closely integrated and the threat of war was virtually abolished. No longer an isolationist power, America would become intimately involved in every facet of European and world politics. This course examines this great and fundamental transformation of the international system. We will examine American involvement in both of the world wars, the defense of Europe during the Cold War, decolonization, and the uneven but steady development of European unity and integration in the second half of the 20th century.

**Class Format:** seminar

**Requirements/Evaluation:** short response papers and a lengthy research paper

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**PSCI 430 Senior Seminar in International Relations: The Liberal Project in International Relations**

This course explores two major themes emerging from the work of theorists associated with the Frankfurt School: the critique of progress, Enlightenment and modernity, and the recuperation of certain Enlightenment ideals and hopes for progress in new, aesthetic forms. The first part of the course looks at Karl Marx’s critique of alienation and reification, asking how Marx’s ideas are picked up and modified in the writings of Georg Lukacs, Max Horkheimer and Theodor Adorno. We will also pay attention to the influence of Freud on Herbert Marcuse’s critique of civilization. The second part of the course turns to the writings of Walter Benjamin and Ernst Bloch, whose efforts to reconstruct emancipatory ideals in Marxist thought after the collapse of communist and socialist teleologies have been described as “maverick” and “utopian.” Among our questions: What is the price of progress? What are the prospects for freedom in modern societies, where individuality, down to the very structure of our instincts and drives, is shaped by mass culture and social institutions? Can agency and subjectivity be recovered within a “totally administered society”? What may we hope?

**Class Format:** seminar

**Requirements/Evaluation:** regular class participation, short (1 pg) response memos, and drafts leading up to a 15-page final essay

**Prerequisites:** junior or senior standing and prior coursework in political theory, cultural theory, philosophy, or permission of instructor

**Enrollment Preferences:** senior Political Science majors with concentration in Political Theory, then other Political Science majors

**Enrollment Limit:** 19

**Expected Class Size:** 15

**PSCI 430 Senior Seminar: Dignity**

Over the last few decades, the concept of dignity has become one of the most contentious and emotive terms in democratic politics. Policy battles over embryonic stem cell research, abortion, physician-assisted suicide, life-sustaining treatments such as mechanical ventilation, and the constitutionality of the death penalty have all been fought out on the grounds of human dignity. But what exactly does dignity mean? Is it an existential demand for respect? A moral, intangible quality of a person? A set of legally guaranteed rights of citizens? This course examines some of the strongest attacks on and defenses of human dignity, both in theory and in practice. The emphasis will be on the role of dignity in shaping modern ideas of democracy, citizenship, and human rights. Readings construct a genealogy of dignity that includes Aquinas, Pico della Mirandola and Kant. Contemporary theories of dignity will be explored through the work of Drucilla Cornell, Jürgen Habermas, Martha Nussbaum, Jeremy Waldron, and the dignity jurisprudence of Canada, Germany, Namibia, South Africa, and the United States.
Class Format: seminar
Requirements/Evaluation: class participation, short (1 page) response papers, a 15- to 18-page final essay
Extra Info: may not be taken on a pass/fail basis
Prerequisites: junior or senior standing and prior coursework in political theory, cultural theory, philosophy; or permission of instructor
Enrollment Preferences: senior Political Science majors with concentration in Political Theory, then other Political Science majors
Enrollment Limit: 19
Expected Class Size: 15
Distributional Requirements: Division 2
Other Attributes: PSCI Political Theory Courses

PSCI 430(S) What Should Political Theory Be Now?
How can theorists best engage politics today? What political problems most demand or resist theorization—and is "theory" even the right genre for critical intellectual work on politics now? This course takes up such questions by considering how key recent or contemporary theorists have sketched the defining features of their political worlds. With each reading, our dual aim will be to confront pressing issues or controversies and to ask whether the work in question offers ways of thinking and writing that we should pursue ourselves. Topics may include neoliberalism and democracy; sovereignty and biopower; pluralism, individuality, and justice; technology and the specter of ecological catastrophe; the problem of evil in politics; white supremacy; and contemporary struggles over gender and sexuality. Readings will be drawn from such authors as Adorno, Allen, Arendt, Berlant, Brown, Butler, Connolly, Dean, Foucault, Galil, Honig, Latour, Moten, Rancière, Rawls, Sen, and Sexton.

Class Format: seminar
Requirements/Evaluation: based on class participation and the writing of 7 glow posts (about 1.5 pages) and one 15-page final paper
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: juniors or senior standing and two or more theory courses or consent of instructor. Non-majors with theory interests and backgrounds are welcome
Enrollment Preferences: concentrators in Political Theory, followed by other Political Science majors
Enrollment Limit: 15

PSCI 440(F) Senior Seminar in Comparative Politics: Political Development
The role of the United States in the wars in Iraq and Afghanistan, and its adventures and misadventures in reconstituting order in those countries, have directed attention back to the dynamics, approaches, and debates in political development. This senior seminar in comparative politics critically examines the theories and problems of political development by focusing on three major topics in the sub-discipline: state formation, nationalism, and democratization. Drawing on both historical and contemporary cases, we consider the conditions that lead to strong and weak states, inclusive and exclusive nationalist mobilization, and democratic and autocratic government.

Class Format: seminar
Requirements/Evaluation: class participation; three short papers; ten weekly responses; and an oral exam covering two of the three topics
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: PSCI 204 or permission of instructor

PSYCHOLOGY

(DIV II, with some exceptions as noted in course descriptions)
Chair: Professor STEVEN FEIN

MAJOR
For the degree in Psychology, students must complete a minimum of nine courses as outlined below:

PSYC 101 Introductory Psychology

PSYC 201 Experimentation and Statistics

Three 200-level courses from the list below:
COGS/PHIL/PSYC 222 Minds, Brains, and Intelligent Behavior: An Introduction to Cognitive Science
NSCI 201/BIOL 212/PSYC 212 Neuroscience
PSYC 221 Cognitive Psychology
PSYC 232 Developmental Psychology
PSYC 242 Social Psychology
PSYC 252 Psychological Disorders
PSYC 272 Psychology of Education

Either PSYC 221 or 222, but not both, can count towards the three required 200-level courses.

Three 300-level courses from at least two of the areas listed below:
Area 1: Behavioral Neuroscience (courses with middle digit 1)
Area 2: Cognitive Psychology (courses with middle digit 2)
Area 3: Developmental Psychology (courses with middle digit 3)
Area 4: Social Psychology (courses with middle digit 4)
Area 5: Clinical Psychology (courses with middle digit 5)
Area 6: Other/Interdisciplinary Psychology (courses with middle digit 6)
Area 7: Educational Psychology (courses with middle digit 7)

At least one of these courses must be from among those carrying the format designation Empirical Lab Course.

PSYC 401 Perspectives on Psychological Issues

Students who place out of Psychology 101 are still required to take nine courses to complete the major.

The department recommends that students take Psychology 201 in their sophomore year. The department requires that 201 be completed by the end of the junior year.

COURSE NUMBERING RATIONALE
As is the case in all departments, the first digit of a Psychology course number indicates the relative level of the course. Where appropriate, the second digit designates to the Areas listed above.

THE DEGREE WITH HONORS IN PSYCHOLOGY
Students who are candidates for honors need take only two 300-level courses from two different areas, but they must enroll in Psychology 483-W31-494 and write a thesis based on original empirical work. Presentation of a thesis, however, should not be interpreted as a guarantee of a degree with honors. Guidelines for pursuing the degree with honors are available from the department.

STUDY ABROAD
With some advance planning, studying abroad (especially for one semester) can easily be worked into the psychology major. To facilitate this, we recommend that students:

Meet with the Study Abroad advisor as soon as they decide that they are interested in studying abroad.

Take Psychology 201 (Experimentation and Statistics) in the sophomore year.

Think ahead to the 300-level courses they are interested in taking so that they can fulfill the 200-level prerequisites before they go away or, if possible, while they are away. In our experience, study abroad programs in the following places are most likely to offer psychology courses: England, Ireland, Scotland, Spain, Australia, New Zealand, Hawaii, and Scandinavia. Students should procure the descriptions of the psychology courses they are considering taking and bring them to their meeting with the advisor.

There are some costs to studying away, particularly for the year. This limits students’ opportunity to choose the particular 300-level courses they would like to take and they must sometimes settle for those that are open, those which happen to be offered, or those for which they have the prerequisites, once they return in their senior year. Many students who are keen on psychology begin doing research with professors during their junior year, and for some this leads to an honors thesis in the senior year, summer research, etc. If you are going away for the entire year and do not make such connections with a professor ahead of time (i.e., before you go), you may lose out on some of these opportunities to deepen your involvement in the major on campus. On the other hand, studying abroad can be an invaluable learning experience, so you need to think carefully, in consultation with your advisor and/or the Study Abroad advisor, about the costs and benefits of it. Very occasionally, a student who just begins taking psychology courses late in the sophomore year and wishes to go abroad for the year finds that he/she is not able to do both, or is restricted in the choice of study-abroad programs. You can find general study away guidelines for Psychology here.

PSYC 101(F,S) Introductory Psychology
An introduction to the major subfields of psychology: behavioral neuroscience, cognitive, developmental, social, personality, psychopathology, and health. The course aims to acquaint students with the major methods, theoretical points of view, and findings of each subfield. Important concepts are exemplified by a study of selected topics and issues within each of these areas.

Class Format: lecture
Requirements/Evaluation: two lab reports, unit quizzes, and a final exam
Prerequisites: none
Enrollment Limit: none
Expected Class Size: 160

Distributional Requirements:
Division 2

Other Attributes:
NSCI Required Courses
TEAC Teaching Sequence Courses

Fall 2016
LEC Section: 01 MWF 10:00 AM 10:50 AM Clarence Gillig, Safa Zaki

Spring 2017
LEC Section: 01 MWF 10:00 AM 10:50 AM Instructors: Noah Sandstrom, Clarence Gillig

PSYC 201(F,S) Experimentation and Statistics (Q)
An introduction to the basic principles of research in psychology. We focus on how to design and execute experiments, analyze and interpret the results, and write research reports. Students conduct a series of research studies in different areas of psychology (e.g., social, personality, cognitive) that illustrate basic designs and methods of analysis.

Class Format: lecture/lab
Requirements/Evaluation: papers, exams, and problem sets
Extra Info: two sections; must register for the lab and lecture with the same instructor
section A1 may not be taken on a pass/fail basis
Prerequisites: PSYC 101; not open to first-year students except with permission of instructor
Enrollment Preferences: Psychology majors
Enrollment Limit: 22
Distributional Requirements:
Division 2
Quantitative/Formal Reasoning
Other Attributes:
COGS Related Courses
PHLH Statistics Courses

Fall 2016

PSYC 212(F) Neuroscience
Crosslistings: NSCI 201/BIOL 212/PSYC 212
A study of the relationship between brain, mind, and behavior. Topics include a survey of the structure and function of the nervous system, basic neurophysiology, development, learning and memory, sensory and motor systems, consciousness and clinical disorders such as schizophrenia, autism, Parkinson's disease, and addiction. The laboratory focuses on current topics in neuroscience.

Class Format: lecture, three hours a week; laboratory, every other week
Requirements/Evaluation: evaluation will be based on a lab practical, lab reports, two hour exams and a final exam
Extra Info: not available for the fifth course option
Prerequisites: PSYC 101 or BIOL 101; open to first-year students with permission of instructor
Enrollment Preferences: sophomores and Biology and Psychology majors
Enrollment Limit: 72
Expected Class Size: 72
Dept. Notes: does not satisfy the distribution requirement in the Biology major
Distribution Notes: meets Division 3 requirement if registration is under PSYC

Distributional Requirements:
Division 3
Other Attributes:
COGS Interdepartmental Electives
NSCI Required Courses
PSYC 200-level Courses

Fall 2016
LEC Section: 01 TR 09:55 AM 11:10 AM Instructor: Heather Williams, Lauren Williamson
LAB Section: 02 M 01:00 PM 04:00 PM Instructor: Martha Marvin

LAB Section: 04 W 01:00 PM 04:00 PM Instructor: Martha Marvin

PSYC 221(F,S) Cognitive Psychology
This course will survey the experimental study of the structures and processes that make up normal human cognition. Topics include perception, attention, learning, memory, categorization, language, judgment, decision making, reasoning, and problem solving.
Class Format: lecture
Requirements/Evaluation: two midterms, a final exam, short essay and daily quizzes
Prerequisites: PSYC 101 or permission of instructor
Enrollment Preferences: Psychology majors
Enrollment Limit: 50
Expected Class Size: 50
Distributional Requirements:
Division 2
Other Attributes:
COGS Interdepartmental Electives
PSYC 200-level Courses

Fall 2016
LEC Section: 01 MR 01:10 PM 02:25 PM Instructor: Nate Kornell
LEC Section: 02 TR 09:55 AM 11:10 AM Instructor: Nate Kornell

Spring 2017
LEC Section: 01 TR 08:30 AM 09:45 AM Instructor: Jeff Moher

PSYC 222(F) Minds, Brains, and Intelligent Behavior: An Introduction to Cognitive Science
Crosslistings: COGS 222/PHIL 222/PSYC 222
This course will emphasize interdisciplinary approaches to the study of intelligent systems, both natural and artificial. Cognitive science synthesizes research from cognitive psychology, computer science, linguistics, neuroscience, and contemporary philosophy. Special attention will be given to the philosophical foundations of cognitive science, representation and computation in symbolic and connectionist architectures, concept acquisition, problem solving, perception, language, semantics, reasoning, and artificial intelligence.
Class Format: lecture/discussion
Requirements/Evaluation: midterm and final exams, and self-paced weekly exercises
Prerequisites: PSYC 101 or any introduction to PHIL course or CSCI 134 or permission of instructor; background in more than one of these is recommended
Enrollment Preferences: first-year and sophomore students
Enrollment Limit: 25
Expected Class Size: 25
Dept. Notes: meets Contemporary Metaphysics & Epistemology requirement only if registration is under PHIL
Distributional Requirements:
Division 2
Other Attributes:
PHIL, Contemp Metaphysics & Epistemology Courses
PSYC 200-level Courses

Fall 2016
LEC Section: 01 TR 11:20 AM 12:35 PM Instructor: Joseph Cruz

PSYC 232(F,S) Developmental Psychology
An introduction to the study of human growth and development from conception through emerging adulthood. Topics for discussion include prenatal development, perceptual and motor development, language acquisition, cognitive development, and social and emotional development.
These topics form the basis for a discussion of the major theories of human development, including those about early experience, neural plasticity, social learning, and cognitive-development.
Class Format: lecture/discussion
Requirements/Evaluation: attendance and active class participation, 3 exams (2 midterms and final), and a 5- to 7-page paper
Prerequisites: PSYC 101
Enrollment Preferences: sophomores and junior Psychology majors
Enrollment Limit: 50
Expected Class Size: 50
Distributional Requirements:
Division 2
Other Attributes:
PSYC 200-level Courses
TEAC Teaching Sequence Courses

Fall 2016
LEC Section: 01 MR 01:10 PM 02:25 PM Instructor: Eliza Congdon

Spring 2017
LEC Section: 01 MR 02:35 PM 03:50 PM Instructor: Eliza Congdon

PSYC 242(F,S) Social Psychology
A survey of theory and research in social psychology. Topics include the self, social perception, conformity, attitudes and attitude change, prejudice, aggression, altruism, attraction and love, intergroup conflict, and cultural psychology. Applications in the areas of advertising, law, business, and health will also be discussed.
Class Format: lecture
Requirements/Evaluation: two in-class exams, one paper and a final exam
Prerequisites: PSYC 101; open to first-year students
Enrollment Limit: 50
Expected Class Size: 50
Distributional Requirements:
Division 2
Other Attributes:
PSYC 200-level Courses
TEAC Teaching Sequence Courses

Fall 2016
LEC Section: 01 TF 01:10 PM 02:25 PM Instructor: Laura Smalarz

Spring 2017
LEC Section: 01 TR 09:55 AM 11:10 AM Instructor: Kenneth Savitsky

PSYC 252(F,S) Psychological Disorders
A study of the phenomenology, etiology, and treatment of the major forms of psychological disorders: the schizophrenias, dissociative disorders, affective disorders, anxiety disorders, personality disorders, eating disorders, addictions, alcoholism, and others. The course emphasizes an integrative approach which incorporates and analyzes theories and research from psychological, biological, interpersonal, and sociocultural perspectives.
Class Format: lecture
Requirements/Evaluation: two hour exams and a final exam
Prerequisites: PSYC 101; open to first-year students
Enrollment Preferences: Psychology majors, then sophomores, then by seniority
Enrollment Limit: 50
Expected Class Size: 50
Distributional Requirements:
Division 2
Other Attributes:
PSYC 200-level Courses

Fall 2016
LEC Section: 01 TR 11:20 AM 12:35 PM Instructor: Catherine Stroud

Spring 2017
LEC Section: 01 TR 11:20 AM 12:35 PM Instructor: Laurie Heatherington

PSYC 272(S) Psychology of Education
This course introduces students to a broad range of theories and research on education. What models of teaching work best, and for what purposes? How do we measure the success of various education practices? What is the best way to describe the psychological processes by which children gain information and expertise? What accounts for individual differences in learning, and how do teachers (and schools) address these individual needs? How do social and economic factors shape teaching practices and the educational experiences of individual students? The course will draw from a wide range of literature (research, theory, and first hand accounts) to consider key questions in the psychology of education. Upon completion of the course, students should be familiar with central issues in pre-college education and know how educational research and the practice of teaching affect one another.
Class Format: lecture/discussion
Requirements/Evaluation: two exams and a final project
Prerequisites: PSYC 101
Enrollment Preferences: Psychology majors and those who plan to become teachers
Enrollment Limit: 50
Expected Class Size: 50
Distributional Requirements:
Division 2
PSYC 312(S) Brain, Behavior, and the Immune System
Crosslistings: PSYC 312/NSCI 312

In all animals, the immune system is the body's defense against the outside world. Immune function is strongly influenced by environmental and behavioral experiences, and the immune system has a dynamic relationship with the brain. We will study the interactions among the brain, behavior, and the immune system in models of health and disease. Specific topics to be examined include: immune cells and their signaling molecules, immune cells within the brain, sickness behaviors, learning and memory, nervous system development, multiple sclerosis, Alzheimer's disease, and nervous system injury and repair. Students will critically review data from both human and animal studies. All students will design and conduct an empirical research project as part of a small research team.

Class Format: seminar/lab
Requirements/Evaluation: presentations and participation in discussions, short papers, midterm, written and oral presentation of the research project
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: PSYC 212 (same as BIOL 212 or NSCI 201) or permission of instructor
Enrollment Preferences: Psychology majors and Neuroscience concentrators
Enrollment Limit: 16
Expected Class Size: 16
Distribution Notes: meets Division 3 requirement if registration is under PSYC
Distributional Requirements: Division 3
Other Attributes: NSCI Group B Electives
PSYC Empirical Lab Course

PSYC 315 Hormones and Behavior
Crosslistings: PSYC 315/NSCI 315

In all animals, hormones are essential for the coordination of basic functions such as development and reproduction. This course studies the dynamic relationship between hormones and behavior. We will review the mechanisms by which hormones act in the nervous system. We will also investigate the complex interactions between hormones and behavior. Specific topics to be examined include: sexual differentiation; reproductive and parental behaviors; stress; aggression; and learning and memory. Students will critically review data from both human and animal studies. All students will design and conduct an empirical research project as part of a small research team.

Class Format: empirical lab course
Requirements/Evaluation: presentations and participation in discussions, short papers, midterm, written and oral presentation of the research project
Prerequisites: PSYC 212 (same as BIOL 212 or NSCI 201)
Enrollment Preferences: Psychology majors and Neuroscience concentrators
Enrollment Limit: 16
Expected Class Size: 16
Distribution Notes: meets Division 3 requirement if registration is under PSYC
Distributional Requirements: Division 3
Other Attributes: NSCI Group B Electives
PSYC Area 1 - Behavioral Neuroscience
PSYC Empirical Lab Course

Not Offered Academic Year 2017
LEC Instructor: Noah Sandstrom

PSYC 316(F) Clinical Neuroscience
Crosslistings: PSYC 316/NSCI 316

Diagnosing and treating neurological diseases is the final frontier of medicine. Recent advances in neuroscience have had a profound impact on the understanding of diseases that affect cognition, behavior, and emotion. This course provides an in-depth analysis of the relationship between brain dysfunction and disease state. We will focus on neurodegenerative disorders including Alzheimer's disease, Parkinson's disease, and Huntington's disease. We will consider diagnosis of disease, treatment strategies, as well as social and ethical issues. The course provides students with the opportunity to present material based upon: (1) review of published literature, (2) analysis of case histories, and (3) observations of diagnosis and treatment of patients both live and on videotape. All students will design and conduct an empirical research project.

Class Format: empirical lab course
Requirements/Evaluation: evaluation will be based on position papers, class participation, and research project report
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: PSYC 212 (same as BIOL 212 or NSCI 201)
Enrollment Preferences: Psychology majors and Neuroscience concentrators
Enrollment Limit: 16
Expected Class Size: 16
Distribution Notes: meets Division 3 requirement if registration is under PSYC
Distributional Requirements: Division 3
Other Attributes:
**PSYC 319T(S) Neuroethics (W)**

Crosslistings: PSYC 319/NSCI 319

Neuroscience studies the brain and mind, and thereby some of the most profound aspects of human existence. In the last decade, advances in our understanding of brain function and in our ability to manipulate brain function have raised significant ethical challenges. This tutorial will explore a variety of important neuroethical questions. Potential topics will include pharmacological manipulation of “abnormal” personality; the use of “cosmetic pharmacology” to enhance cognition; the use of brain imaging to detect deception or to understand the ability, personality or vulnerability of an individual; the relationship between brain activity and consciousness; manipulation of memories; the neuroscience of morality and decision making. In addition to exploring these and other ethical issues, we will explore the basic science underlying them.

**Class Format:** Tutorial

**Requirements/Evaluation:** evaluation will be based on five 5-page position papers and five short response papers as well as participation in discussions.

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option.

**Prerequisites:** PSYC 212 (same as BIOL 212 or NSCI 201); or permission of instructor

**Enrollment Preferences:** Psychology majors and Neuroscience concentrators

**Enrollment Limit:** 10

**Expected Class Size:** 10

**Distribution Notes:** meets Division 2 requirement if registration is under PSYC; meets Division 3 requirement if registration is under NSCI

**Distributional Requirements:**

- Division 2
- Writing Intensive

**Other Attributes:**

- NSCI Group B Electives
- PSYC Area 1 - Behavioral Neuroscience

Spring 2017

**TUT Section:** T1 TBA Instructor: Noah Sandstrom

**PSYC 322(F) Concepts: Mind, Brain, and Culture**

Every time we see something as a kind of thing, every time that we decide that an object is a cup rather than a glass, when we recognize a picture of a familiar face as a picture of ourselves, or even when we understand speech, we are employing categories. Most categorization decisions are automatic and unconscious, and therefore have the illusion of simplicity. The complexity of these decisions, however, becomes apparent when we attempt to build machines to do what humans perform so effortlessly. What are the systems in place that allow us this extraordinary ability to segment the world? Are they universal? How does conceptual knowledge differ across cultural groups? How do our concepts affect our perception? How to the categories of experts differ from the categories of novices? Do children have the same kind of conceptual knowledge as adults? How are categories represented in the brain? In this course, we explore various empirical findings from cognitive psychology, cognitive neuroscience, and anthropology that address these questions.

**Class Format:** empirical lab course

**Requirements/Evaluation:** short papers, class participation, and research paper

**Prerequisites:** PSYC 221 or 222 or permission of instructor

**Enrollment Preferences:** Psychology majors and Cognitive Science concentrators

**Enrollment Limit:** 16

**Expected Class Size:** 16

**Distributional Requirements:**

- Division 2

**Other Attributes:**

- COGS Interdepartmental Electives
- PSYC Area 2 - Cognitive Psychology
- PSYC Empirical Lab Course

Fall 2016

**SEM Section:** 01 Cancelled

**LAB Section:** 02 Cancelled

**LAB Section:** 03 Cancelled

**PSYC 324T Great Debates in Cognition**

The field of cognition is filled with controversies about how the mind really works. For example, is there sufficient evidence for a system in vision that can become aware of things without actually "seeing" them? Is it necessary to assume that babies come into the world armed with innate linguistic knowledge? Are humans inherently rational? Can we make inference about the mind using neuroimaging? These debates, and others that we will consider, help fuel scientific discovery in cognition in interesting ways. In this class, we will consider some of these contemporary debates, weigh evidence on both sides, and discuss the implications for what we know about the mind.

**Class Format:** tutorial; students will meet in pairs with the instructor for an hour each week

**Requirements/Evaluation:** evaluation will be based on weekly papers and oral arguments.

**Extra Info:** may not be taken on a pass/fail basis

**Prerequisites:** PSYC 221 or 222 or permission of instructor

**Enrollment Preferences:** Psychology majors and Cognitive Science concentrators

**Enrollment Limit:** 10

**Expected Class Size:** 10

**Distributional Requirements:**

- Division 2

**Other Attributes:**

- COGS Interdepartmental Electives
- PSYC Area 2 - Cognitive Psychology

**Not Offered Academic Year 2017**

TUT

**PSYC 326(F) Choice and Decision Making**

One aspect of "being human" is that we often make choices that we know are bad for us. In this course we survey theoretical and experimental approaches to understanding our strengths and weaknesses as decision makers. Topics include normative decision theories, biases in probability judgments, "fast and frugal" heuristics, impulsiveness and self-control, addictions and bad habits, gambling, and moral decision making.

**Class Format:** empirical lab course

**Requirements/Evaluation:** problem sets, essay papers, class and lab participation, and a research report

**Prerequisites:** PSYC 221 or 222 or permission of instructor; permission is typically given to students who have successfully completed ECON 110

**Enrollment Preferences:** senior Psychology majors who need the course to fulfill the major

**Enrollment Limit:** 16

**Expected Class Size:** 16

**Distributional Requirements:**

- Division 2

**Other Attributes:**

- COGS Interdepartmental Electives
- PHLH Decision-Making by Institutions + Individuals
- PSYC Area 2 - Cognitive Psychology
- PSYC Empirical Lab Course

Spring 2017

**SEM Section:** 01 MR 01:10 PM 02:25 PM Instructor: Nate Kornell

**LAB Section:** 02 W 01:00 PM 04:00 PM Instructor: Kris Kirby

**PSYC 327(S) Cognition and Education**

This class will focus on basic research into the cognitive processes underlying learning. How does the mind encode, store, and retrieve knowledge? How do learners (and teachers) manage their own learning? How do educational practices depart from what research recommends? The readings will be scientific articles. Students will do original research.

**Class Format:** empirical lab course

**Requirements/Evaluation:** class participation, daily quizzes, research papers

**Prerequisites:** PSYC 221 and PSYC 222, or permission of instructor

**Enrollment Preferences:** Psychology majors

**Enrollment Limit:** 16

**Expected Class Size:** 12

**Distributional Requirements:**

- Division 2

**Other Attributes:**

- COGS Interdepartmental Electives

**LAB Section:** 02 W 01:00 PM 04:00 PM Instructor: Nate Kornell

**PSYC 328(S) Understanding Attention and Distraction**

The human brain is constantly bombarded by sensory information. For example, as you sit in class listening to a lecture, many other people and objects are visible, competing for your limited attention resources. How does your brain manage to avoid such distractions to focus attention on relevant sensory information (such as the lecture) in order to extract the information you need to accomplish important goals (such as passing the class)? This is a problem that confronts humans in a variety of ways, ranging from finding your keys or driving your car, to using your iPhone or iPad, to doctors looking for tumors on medical images or airport security screeners looking for weapons in baggage. In this course, students will read empirical studies that use both behavioral and brain imaging techniques to investigate the capabilities, limitations, and brain substrates of attention in human behavior. Topics include attentional control, how attention interacts with overt behaviors such as eye and hand movements, practical applications of attention research including topics such as smartphone technology design and training for medical image screeners, and dysfunction of attention in clinical populations. Students will conduct original empirical research, analyze data, and present their findings to their peers at the end of the semester.

**Class Format:** empirical lab course

**Requirements/Evaluation:** class participation, midterm, short papers, presentation and paper on empirical project
Extra Info: may not be taken on a pass/fail basis
Prerequisites: PSYC 201 and PSYC 221 or 222, or permission of instructor
Enrollment Preferences: Psychology majors
Enrollment Limit: 16
Expected Class Size: 12
Distributional Requirements: Division 2
Other Attributes: PSYC Area 2 - Cognitive Psychology
PSYC Empirical Lab Course

Spring 2017
SEM Section: 01  MW 11:00 AM 12:15 PM  Instructor: Jeff Moher
LAB Section: 02  R 01:00 PM 04:00 PM  Instructor: Jeff Moher

PSYC 332(S) Mathematical Development1
Can monkeys do math? Are babies statistical experts? Will I ever be good at calculus? What are we born with and what do we learn? Before children are ever taught formal mathematics in a classroom, they are confronted with situations where they must use their informal understanding of geometry, space, and number to successfully navigate their environments. In this course we read and discuss both foundational and cutting-edge articles from neuroscience, cognitive science, education and psychology to understand how humans bridge this gap between the informal and formal mathematical worlds. We will also tackle questions such as: How do culture and language affect numerical understanding? What are the sources of children's mathematical misconceptions? What are the effects of early environmental input or input deprivation on mathematical development? What do we know about gender differences in math achievement? How do stereotypes, prejudice, and math anxiety affect math performance?
Class Format: seminar
Requirements/Evaluation: class participation, 300-word weekly thought papers, two 5- to 7-page papers
Prerequisites: PSYC 232 or permission of the instructor
Enrollment Preferences: Psychology majors
Enrollment Limit: 19
Expected Class Size: 12
Distributional Requirements: Division 2
Other Attributes: PSYC Area 3 - Developmental Psychology

Spring 2017
SEM Section: 01  W 01:10 PM 03:50 PM  Instructor: Eliza Congdon

PSYC 333 Cognitive Development
Can babies decide which bottle contains more milk? Can toddlers figure out who's lying? How do we determine who's nice and who's mean? How do children develop the ability to make these decisions, and how do these abilities change over time? In this class, we'll be reading literature (both seminal and cutting-edge) and designing our own experiments to find the answers to these questions and more.
The course will broadly cover aspects of early cognitive development such as memory, numerical cognition, language acquisition, and understanding of other social beings, focusing especially on aspects of the human mind that are present early in life and how they evolve. Students will participate in discussions about primary literature, think about effective science communication, and design and collect data for their own specific area of interest.
Class Format: empirical lab course
Requirements/Evaluation: active participation, regular thought papers and class presentations, written report and oral presentation on an original empirical research project
Extra Info: may not be taken on a pass/fail basis
Prerequisites: PSYC 201 and PSYC 232
Enrollment Preferences: Psychology majors
Enrollment Limit: 16
Expected Class Size: 12
Distributional Requirements: Division 2
Other Attributes: PSYC Area 3 - Developmental Psychology
Not Offered Academic Year 2017
SEM  Instructor: Mariko Moher

PSYC 335(S) Early Experience and the Developing Infant (W)
The period from conception to age three is marked by impressive rapidity in development and the plasticity of the developing brain affords both fetus and infant an exquisite sensitivity to context. This course delves into the literature that highlights the dynamic interactions between the developing fetus/infant and the environment. The course readings span a range of disciplines and cover a diversity of hot topics in the study of prenatal and infant development, including empirical research drawn from the developmental, neuroscience, psychopathology, and pediatric literatures.
Class Format: seminar
Requirements/Evaluation: active class participation, regular thought papers and class presentations, and a written report and accompanying presentation of an independent project
Prerequisites: PSYC 201, PSYC 212, and PSYC 232 or permission of instructor
Enrollment Preferences: Psychology majors and Neuroscience concentrators
Enrollment Limit: 16
Expected Class Size: 16
Distributional Requirements: Division 2
Writing Intensive
Other Attributes: PHLH Biomedical Determinants of Health
PHLH Reproductive, Maternal and Child Health
PSYC Area 3 - Developmental Psychology
Spring 2017
SEM Section: 01  TR 11:20 AM 12:35 PM  Instructor: Amie Hane

PSYC 336 Adolescence (W)
Why do we define adolescence as a distinct stage of development? What are its perils and accomplishments? What internal and external forces make adolescence such a volatile and formative stage of life? The course considers a range of empirical and theoretical material, as well as fiction and film, in order to identify and understand the behavior and experience of adolescents.
Topics include: identity, sexuality, romantic love, intellectual growth, family relationships, psychological problems, education, and variation between cultures.
Class Format: seminar
Requirements/Evaluation: there will be a midterm paper and a group project that will involve several pieces of writing
Prerequisites: PSYC 232 or permission of instructor
Enrollment Preferences: Psychology majors and those who plan to become teachers
Enrollment Limit: 16
Expected Class Size: 16
Distributional Requirements: Division 2
Writing Intensive
Other Attributes: PSYC Area 3 - Developmental Psychology
TEAC Teaching Sequence Courses
Not Offered Academic Year 2017
SEM  Instructor: Susan Engel

PSYC 337 Temperament and Biobehavioral Development (W)
This class will explore individual differences in reactivity and self-regulation in infancy and childhood. Developmental, ethological, and neuroscience models will serve as the foundation for the exploration of the construct of temperament. Topics will include biobehavioral models of reactivity to stress and novelty, including research examining individual differences in neuroendocrine, electrophysiological, and emotional responding. Individual differences in self-regulation will be explored, and will focus heavily on the literature examining the development of attention and other executive control processes in infancy and early childhood. Longitudinal research that examines continuity and change in temperament from infancy through adulthood will be examined. The contributions of genetics and the contextual influences on temperament trajectories will be explored, including research demonstrating the influence of caregivers and gene-by-environment interactions.
Class Format: seminar
Requirements/Evaluation: weekly thought papers and one final 7- to 10-page paper
Extra Info: may not be taken on a pass/fail basis
Prerequisites: PSYC 201 and 232 or PSYC 212 or permission of instructor
Enrollment Preferences: Psychology majors
Enrollment Limit: 19
Expected Class Size: 16
Distributional Requirements: Division 2
Writing Intensive
Other Attributes: PHLH Reproductive, Maternal and Child Health
PSYC Area 3 - Developmental Psychology
Not Offered Academic Year 2017
SEM  Instructor: Amie Hane

PSYC 338(F) Inquiry, Invention and Ideas
Children tinker, explore and create, but some more than others, and under some conditions more than others. What leads children to investigate, invent and build their own ideas? We will examine the development of curiosity, invention, and the ability to have or construct an idea. We will also look at what accounts for individual differences between children, including the role of intelligence, creativity, social cues, and opportunity. We will look at how these processes unfold at home and in school, and discuss the educational implications of the research we read, and the research we conduct.
Class Format: Empirical Lab course
Requirements/Evaluation: regular response papers, a midterm exam, and an empirical project resulting in a 10- to 15-page written paper and an oral presentation
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course of the semester
Prerequisites: PSYC 101, and PSYC 232 or PSYC 272, or permission of instructor
Enrollment Preferences: preference given to Psychology majors
Enrollment Limit: 16
Expected Class Size: 16
Distributional Requirements:
PSYC 340T Interdisciplinary Approaches to Social Psychology (W)

This course will examine cutting-edge and emerging interdisciplinary approaches to the study of important social psychological issues. Its focus will be on the connections between social psychology and disciplines such as neuroscience, biology, cognitive psychology, political science, organizational behavior, educational psychology, and cross-cultural and multi-cultural psychology. Examples of topics to be examined include: Neuroscience and prejudice; culture and the self, education and diversity; biology and altruism; politics and attitude change. We will explore the benefits and challenges of taking interdisciplinary approaches to studying these issues.

Class Format: tutorial
Requirements/Evaluation: tutorial papers and responses to partner's tutorial papers, in alternating weeks; participation in tutorial discussions
Extra Info: may not be taken on a pass/fail basis
Prerequisites: PSYC 242
Enrollment Preferences: Psychology majors
Enrollment Limit: 10
Expected Class Size: 10
Distributional Requirements: Division 2
Writing Intensive

Not Offered Academic Year 2017
LEC Instructor: Steven Fein

PSYC 341 Stereotypes, Prejudice, and Discrimination (D) (W)

Crosslistings: PSYC 341/WGSS 339

This course will examine social psychological theories and research that are relevant to the understanding of stereotypes, prejudice, and discrimination. We will take a variety of social psychological perspectives, emphasizing sociocultural, cognitive, personality, or motivational explanations. We will examine the impact that stereotypes and prejudice have on people's perceptions of and behaviors toward particular groups or group members and will explore a variety of factors that tend to exacerbate or weaken this impact. We also will consider some of the sources of stereotypes, prejudice, and discrimination and some of the processes through which they are maintained, strengthened, or revised. In addition, we will examine some of the effects that stereotypes, prejudice, and discrimination can have on members of stereotyped groups, as well as some implications of the social psychological research findings for issues such as education and business and government policies. A major component of this course will be the examination of classic and ongoing empirical research.

Class Format: empirical lab course
Requirements/Evaluation: weekly brief papers, oral reports, two longer papers
Prerequisites: PSYC 201 and 242
Enrollment Preferences: senior, then junior Psychology majors
Enrollment Limit: 16
Expected Class Size: 16
Distributional Requirements: Division 2
Exploring Diversity
Writing Intensive

Not Offered Academic Year 2017
LEC Instructor: Steven Fein

PSYC 342(S) Social Judgment

Prerequisites: PSYC 242 and PSYC 201, or permission of instructor
Enrollment Preferences: Psychology majors
Enrollment Limit: 16
Expected Class Size: 12
Distributional Requirements: Division 2

Other Attributes: PSYC Area 4 - Social Psychology
PSYC Empirical Lab Course

Spring 2017
LEC Section: 01 TR 11:20 AM 12:35 PM Instructor: Susan Engel

LEC Instructor: Steven Fein

PSYC 344 Advanced Research in Social Psychology

This course will focus on the process of doing original, empirical social psychological research. We will concentrate on a few social psychological topics, such as stereotyping and prejudice, media influences, political biases, and sports psychology. Students will research and critically analyze and integrate the relevant literature, and they will design and conduct original research to test hypotheses that emerge from these literatures. We will examine a variety of types of research designs, how to conduct online and in-person research, and how to analyze and understand results, including using SPSS to analyze data.

Class Format: empirical lab course
Requirements/Evaluation: two exams, two papers, and several small assignments
Prerequisites: PSYC 201 and PSYC 242
Enrollment Preferences: Psychology majors
Enrollment Limit: 16
Materials/Lab Fee: a lab fee of up to $30 is associated with this course

Distributional Requirements: Division 2

Other Attributes: PSYC Area 4 - Social Psychology
PSYC Empirical Lab Course

Not Offered Academic Year 2017
LEC Instructor: Steven Fein

PSYC 345(S) Political Psychology

Crosslistings: PSCI 310/PSYC 345

What kinds of politics are humans capable of engaging to govern themselves? For millennia, political philosophers have asserted different foundational claims about "human nature" that in turn led them to their vision of politics. For example, the enlightenment thinkers held that science and technology would strengthen rationality and thereby make democracy more viable. On the other hand, those who defend authoritarian regimes often do so by proclaiming that the general public is incapable of rationality and of self-rule and should therefore accept rule by their betters (previously nobility, now experts). Many of the disputes turn on how rational people are and on their capacity to pursue justice for all people. We explore what political psychology tells us about political citizens and political leaders. We find intriguing new answers from neuroscience. The course pays special attention to the powerful and surprising, roles that emotions play in all aspects of politics. Central to politics is an issue of political judgment. If we are to trust ourselves to rule ourselves, how well will we be able to secure justice and liberty for one and all among us? Political psychology is one of the very oldest disciplines (it can be dated at least back to the early classic Greeks, among them Socrates, Plato, and Aristotle). But in its current form is very influenced by neuroscience. Nonetheless, the issue of citizen competence, then as now, was at the center of their attention. So, it shall be in this course.

Class Format: lecture/discussion
Requirements/Evaluation: a midterm, a term paper, and a final exam
Prerequisites: a PSCI elective at the 200 or 300 level OR PSYC 101, 212, 221, 232, 242, 251, or 300-level course
Enrollment Preferences: political science and psychology majors
Enrollment Limit: 35
Expected Class Size: 13
Distributional Requirements: Division 2

Other Attributes: PSCI American Politics Courses

LEC Section: 01 TR 08:30 AM 09:45 AM Instructor: George Marcus

PSYC 346(F) Environmental Psychology

Crosslistings: PSYC 346/ENVI 346

This is a course in social psychology as it pertains to the natural environment. We will consider how the environment influences aspects of human psychology (e.g., the psychological implications of humans' disconnect with nature), as well as how human psychology influences the environment (e.g., why some people engage in environmentally destructive behaviors despite holding proenvironmental attitudes). At the core of this course is an attempt to examine various ways in which research and theory in social psychology can contribute to and shape environmentally responsible behavior and sustainable practices, both here at Williams and globally. Because human choice and behavior play such an important role in environmental problems, a consideration of human psychology may therefore be an important part of the solution.

Class Format: seminar

Division 2

**PSYC 349(S) Psychology and Law**

This course examines the legal system in light of psychological research findings, Supreme Court rulings, wrongful conviction cases and illustrative crimes. The law's informal theories of human behavior will be compared to what psychological research tells us about the basis of theories and research regarding such topics as Miranda, lie detection, police interrogation, false confessions, eyewitness identification, repressed and recovered memories, forensic evidence, juries and criminal insanity. Students will conduct an empirical research project, analyze data and present their findings to their peers at the end of the semester.

**Distributional Requirements:**
- Division 2

- PSYC Area 4 - Social Psychology
- PSYC Empirical Lab Course

**Fall 2016**
- SEM Section: 01  TF 01:10 PM 02:25 PM  Instructor: Kenneth Savitsky

**PSYC 350 Child Psychopathology**

This course explores the rapidly evolving field of psychological disorders in childhood and adolescence. We will examine the intertwined effects of individual characteristics (e.g., genetics, neurobiological factors), relationship processes (e.g., parenting, family functioning, peers), community settings (e.g., schools, neighborhoods), and the broader cultural context (e.g., poverty, stigma, media). Using a developmental framework, we will examine the emergence and maintenance of specific psychological disorders, as well as variations in how children cope with catalyzing stressors (chronic illness, physical and sexual abuse). The goals of this course include (1) appreciation of the dynamic interplay between biology and experience in the unfolding of psychopathology, (2) exploration of diagnostic criteria and phenomenology of specific disorders, and (3) exposure to a wide range of research-based strategies for prevention and intervention.

**Class Format:** seminar

**PSYC 357 Depression**

A study of the theory, methods, and professional issues in clinical and community psychology. In addition to academic work (primary source readings and class discussions), the course aims to enable students to apply their experience in academic settings to field settings and to use their fieldwork experience to critically evaluate theory and research. The course includes a supervised field-work placement arranged by the instructor in a local mental health or social service agency.

**Class Format:** seminar

**Requirements/Evaluation:**
- extra investigations (oral and written/oral reports of research)
- two short position papers, occasional one-page response and a written/oral report of research

**Distributional Requirements:**
- Division 2
- Other Attributes:
  - PSYC Area 5 - Clinical Psychology
  - TEAC Related Courses

- **Not Offered Academic Year 2017**
  - SEM  Instructor: Marlene Sandstrom

**PSYC 352(F) Clinical and Community Psychology**

A study of the theory, methods, and professional issues in clinical and community psychology. In addition to academic work (primary source readings and class discussions), the course aims to enable students to apply their experience in academic settings to field settings and to use their fieldwork experience to critically evaluate theory and research. The course includes a supervised field-work placement arranged by the instructor in a local mental health or social service agency.

**Class Format:** seminar

**Requirements/Evaluation:**
- extra investigations (oral and written/oral reports of research)
- two short position papers, occasional one-page response and a written/oral report of research

- Division 2
- Other Attributes:
  - PSYC Area 5 - Clinical Psychology
  - TEAC Related Courses

- **Not Offered Academic Year 2017**
  - SEM  Instructor: Marlene Sandstrom

**PSYC 355(F) Psychotherapy: Theory and Research**

Psychotherapy is a young, barely 100-year old psychological endeavor which attempts to promote change and healing through social interaction. How can it be that talking with a psychotherapist can help people change — emotionally, cognitively, and/or behaviorally — and how exactly does it help people achieve relief from psychological disorders and problems? In this course, we will study some of the key approaches to psychotherapy by examining the theories and scientific research that surround them, and considering theory and research in juxtaposition. This will be accomplished by a close reading and critical analysis of primary source theoretical papers, the “raw data” (videotapes and transcripts) of therapy sessions, case studies, and contemporary empirical research on the outcomes and change processes of psychotherapy. Students will learn how to evaluate the efficacy claims of both standard and new therapies and how to evaluate claims about the mechanisms by which those therapies work. Current controversies in psychotherapy and psychotherapy research will be addressed and debated as well. All students will design and conduct an empirical research project based on the course material.

**Class Format:** empirical lab course

**Requirements/Evaluation:**
- two short position papers, occasional one-page response and a written/oral report of research

**Distributional Requirements:**
- Division 2

  - SEM Section: 01  MR 01:10 PM 02:25 PM  Instructor: Catherine Stroud

**PSYC 356 Depression**

This course will provide students with a comprehensive understanding of depression. Topics will include assessment, models of etiology and course, effective approaches to prevention and intervention, and depression in specific populations. Readings will expose students to seminal works in the field as well as current methods and research findings. All students will design and conduct an empirical research project based on the readings and concepts discussed. Throughout the course, students will evaluate current research based on theory, methodological rigor, and potential impact on prevention and intervention efforts.

**Class Format:** empirical lab course

**Requirements/Evaluation:**
- extra investigations (oral and written/oral reports of research)
- two short position papers, occasional one-page response and a written/oral report of research

**Distributional Requirements:**
- Division 2
- Other Attributes:
  - PSYC Area 5 - Clinical Psychology
  - PSYC Empirical Lab Course

- **Not Offered Academic Year 2017**
  - SEM  Instructor: Marlene Sandstrom

**PSYC 364 Psychotherapy: Social-Psychological Contributions**

This course is designed to introduce students to the social-psychological aspects of human functioning and to provide them with an overview of major theories in the field. It aims to deepen students' understanding of the social-psychological perspective on human behavior, and to equip them with the tools necessary to conduct research in this area. The course will cover a range of topics, including social psychology, social cognition, and social influence, with a particular focus on how these concepts apply to mental health and well-being.

**Class Format:** seminar

**Requirements/Evaluation:**
- extra investigations (oral and written/oral reports of research)
- two short position papers, occasional one-page response and a written/oral report of research

**Distributional Requirements:**
- Division 2
- Other Attributes:
  - PSYC Area 5 - Clinical Psychology
  - PSYC Empirical Lab Course

- **Not Offered Academic Year 2017**
  - SEM  Instructor: Marlene Sandstrom

**PSYC 380 Child Education and Social Development**

This course examines the development of children from birth to age 12, with an emphasis on the social and emotional aspects of development. It covers topics such as attachment, peer relationships, and academic achievement. The course will provide an understanding of the theoretical frameworks that guide research and practice in the field of child development.

**Class Format:** seminar

**Requirements/Evaluation:**
- extra investigations (oral and written/oral reports of research)
- two short position papers, occasional one-page response and a written/oral report of research

**Distributional Requirements:**
- Division 2
- Other Attributes:
  - PSYC Area 5 - Clinical Psychology
  - PSYC Empirical Lab Course

- **Not Offered Academic Year 2017**
  - SEM  Instructor: Marlene Sandstrom

**PSYC 384 Individual Development and Learning**

This course examines the development and learning of individuals from infancy to old age, with a focus on cognitive, emotional, and social development. It covers topics such as intelligence, memory, and language development, as well as the impact of environmental factors on development.

**Class Format:** seminar

**Requirements/Evaluation:**
- extra investigations (oral and written/oral reports of research)
- two short position papers, occasional one-page response and a written/oral report of research

**Distributional Requirements:**
- Division 2
- Other Attributes:
  - PSYC Area 5 - Clinical Psychology
  - PSYC Empirical Lab Course

- **Not Offered Academic Year 2017**
  - SEM  Instructor: Marlene Sandstrom

**PSYC 386 Early Childhood Education**

This course provides an overview of early childhood education, with a focus on the development of young children from birth to age 8. It covers topics such as brain development, early literacy, and social-emotional development, as well as the role of teachers and caregivers in supporting children's development.

**Class Format:** seminar

**Requirements/Evaluation:**
- extra investigations (oral and written/oral reports of research)
- two short position papers, occasional one-page response and a written/oral report of research

**Distributional Requirements:**
- Division 2
- Other Attributes:
  - PSYC Area 5 - Clinical Psychology
  - PSYC Empirical Lab Course

- **Not Offered Academic Year 2017**
  - SEM  Instructor: Marlene Sandstrom

**PSYC 387/587 Social Psychology**

This course examines the social psychology of individuals, groups, organizations, and societies. It covers topics such as social influence, social cognition, and social behavior, with a focus on understanding how social contexts shape human behavior.

**Class Format:** seminar

**Requirements/Evaluation:**
- extra investigations (oral and written/oral reports of research)
- two short position papers, occasional one-page response and a written/oral report of research

**Distributional Requirements:**
- Division 2
- Other Attributes:
  - PSYC Area 5 - Clinical Psychology
  - PSYC Empirical Lab Course

- **Not Offered Academic Year 2017**
  - SEM  Instructor: Marlene Sandstrom

**PSYC 388 Social Psychology and the Law**

This course examines the application of social psychological principles to legal issues, with a focus on the role of social psychology in understanding and addressing social problems. It covers topics such as the psychology of crime, the psychology of justice, and the psychology of decision making.

**Class Format:** seminar

**Requirements/Evaluation:**
- extra investigations (oral and written/oral reports of research)
- two short position papers, occasional one-page response and a written/oral report of research

**Distributional Requirements:**
- Division 2
- Other Attributes:
  - PSYC Area 5 - Clinical Psychology
  - PSYC Empirical Lab Course

- **Not Offered Academic Year 2017**
  - SEM  Instructor: Marlene Sandstrom

**PSYC 392 Personality and Individual Differences**

This course examines the nature of personality and the factors that influence individual differences. It covers topics such as trait theory, the structure of personality, and individual differences in intelligence, motivation, and emotion.

**Class Format:** seminar

**Requirements/Evaluation:**
- extra investigations (oral and written/oral reports of research)
- two short position papers, occasional one-page response and a written/oral report of research

**Distributional Requirements:**
- Division 2
- Other Attributes:
  - PSYC Area 5 - Clinical Psychology
  - PSYC Empirical Lab Course

- **Not Offered Academic Year 2017**
  - SEM  Instructor: Marlene Sandstrom
PSYC 359(S) Anxiety: Responses to Danger, Both Real and Imagined
This is an advanced course on anxiety that takes an in depth look at the theory and research on the normative psychological processes that influence responses to danger, both real and imagined. Specifically, it examines the empirical research on psychological responses to traumatic experiences, such as combat, rape, and natural disasters. Responses to perceived or imagined threats are also discussed as the underpinnings of such anxiety disorders as Panic Disorder, Generalized Anxiety Disorder, Social Phobia, Specific Phobia and OCD. Discussions focus on commonalities and differences in empirically supported treatments for anxiety disorders as well as controversies in the field.

Class Format: seminar
Requirements/Evaluation: active class participation, frequent response papers, midterm examination and final term paper
Prerequisites: PSYC 252
Enrollment Preferences: Psychology majors
Expected Class Size: 19
Distributional Requirements: Division 2
Other Attributes: PSYC Area 5 - Clinical Psychology

PSYC 361(S) Psychology of Nonviolence
Nonviolence refers to choice behavior in interpersonal interactions in which physical and psychological injury to others is rejected as an option. In this course we will study moral and psychological theories of nonviolence, and evaluate the empirical support for their central empirical claims of psychological benefits to the practitioner, attitude change in the adversary, and positive exemplary effects on social interaction. Topics include anger and self-control, aggression, evil, conflict resolution, empathy, and forgiveness.

Class Format: discussion/seminar
Requirements/Evaluation: class attendance and participation, discussion leadership, short essays, and a final paper
Prerequisites: any 200-level course in PSYC or permission of instructor
Enrollment Preferences: Psychology majors
Expected Class Size: 19
Distributional Requirements: Division 2
Other Attributes: JLST Theories of Justice/Law
PSYC Area 6 - Other/Interdisciplinary Psychology

PSYC 372 Advanced Seminar in Teaching and Learning
This advanced seminar will give students an opportunity to connect theory to practice. Each student will have a teaching placement in a local school, and participate in both peer and individual supervision. In addition, we will read a range of texts that examine different approaches to teaching, as well as theory and research on the process of education. What is the best way to teach? How do various theories of child development and teaching translate into everyday practices with students? Students will be encouraged to reflect on and modify their own teaching practices as a result of what we read as well as their supervision. Questions we will discuss include: What is the relationship between educational goals and curriculum development? What is the relation between substance (knowledge, skills, content) and the interpersonal dynamic inherent in a classroom setting? How do we assess teaching practices and the students’ learning? What does it take to be an educated person?

Class Format: seminar
Requirements/Evaluation: this course involves a field placement, weekly readings, as well as seminar discussion, supervision, and a graded journal
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: PSYC 232 or PSYC 272 or permission of instructor
Enrollment Preferences: Psychology majors and those who plan to become teachers
Expected Class Size: 16
Distributional Requirements: Division 2
Other Attributes: EXPE Experiential Education Courses
PSYC Area 7 - Educational Psychology
TEAC Teaching Sequence Courses

Not Offered Academic Year 2017 SEM Instructor: Susan Engel

PSYC 397(F) Independent Study: Psychology
Open to upperclass students with permission of the instructor and department. Students interested in doing an independent study should make prior arrangements with the appropriate professor. The student and professor then complete the independent study proposal form available at the Registrar’s Office and should submit it to the department chair for approval prior to the beginning of the drop/add period.

Class Format: independent study
Enrollment Preferences: Psychology majors
Expected Class Size: 16
Distributional Requirements: Division 2

Fall 2016
IND Section: 01 TBA Instructor: Steven Fein

PSYC 398(S) Independent Study: Psychology
Open to upperclass students with permission of the instructor and department. Students interested in doing an independent study should make prior arrangements with the appropriate professor. The student and professor then complete the independent study proposal form available at the Registrar’s Office and should submit it to the department chair for approval prior to the beginning of the drop/add period.

Class Format: independent study
Enrollment Preferences: Psychology majors
Expected Class Size: 16
Distributional Requirements: Division 2

Spring 2017
IND Section: 01 TBA Instructor: Steven Fein

PSYC 401(F) Perspectives on Psychological Issues
This course—the psychology department’s senior seminar—considers several important contemporary topics from diverse psychological perspectives. These topics will be introduced via popular books or films, and we will analyze them more deeply with original research articles from across multiple perspectives and subdisciplines of psychology. The course will primarily be discussion based, and the students will lead these discussions.

Class Format: seminar
Requirements/Evaluation: participation in class discussions, choosing relevant research articles, and three position papers
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Enrollment Preferences: open to seniors Psychology majors only
Enrollment Limit: none
Expected Class Size: 15
Dept. Notes: required of all senior Psychology majors

Distributional Requirements: Division 2

PSYC 493(F) Senior Thesis: Psychology
Independent study and research for two semesters and a winter study period under the guidance of one or more members of the department. After exploring the literature of a relatively specialized field of psychology, the student will design and execute an original empirical research project, the results of which will be reported in a thesis. Detailed guidelines for pursuing a thesis are available online and on our web site. This is part of a full-year thesis (493-494); Senior Psychology Majors meeting requirements for Honors

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: permission of the thesis advisor

Distributional Requirements: Division 2

Fall 2016
HON Section: 01 TBA Instructor: Steven Fein

PSYC 494(S) Senior Thesis: Psychology
Independent study and research for two semesters and a winter study period under the guidance of one or more members of the department. After exploring the literature of a relatively specialized field of psychology, the student will design and execute an original empirical research project, the results of which will be reported in a thesis. Detailed guidelines for pursuing a thesis are available from the department and on our web site.

Extra Info: this is part of a full-year thesis (493-494)
Prerequisites: permission of the thesis advisor

Distributional Requirements: Division 2

Spring 2017
HON Section: 01 TBA Instructor: Steven Fein
Public health seeks to understand, and also to protect and improve, health at the level of a community or population. Communities make decisions and allocate resources that, intentionally or not, fundamentally shape human life. For example, great reductions in sickness and early death have come from social interventions with relatively low financial cost, such as physically separating drinking water from sewage, or distributing aspirin, condoms, mosquito nets, vaccines or soap, or sharing new ideas about life’s possibilities. The way a society is organized affects how that social and scientific knowledge is distributed within it; access to that knowledge shapes health at the individual level. At its heart, the study of public health focuses on questions about relationships between science and society, and between reality and possibility; what intervention(s) can measure its effectiveness; what the relationship is, and ought to be, between research and policy; how we reconcile important moral and economic claims, or balance other values that compete with maximizing health; what counts as disgressions, over what and against whom; what is the role of the state in responsibility; what constitutes a healthy environment; how our fundamental beliefs determine our approaches to health decisions; and how such decisions ought to be made.

**REQUIREMENTS**

Application to the concentration must be completed in the Spring of sophomore year. Applications are due on the final day of pre-registration. Application materials can be found on the Public Health website: [http://public-health.williams.edu/](http://public-health.williams.edu/) by early April or by e-mailing the chair of the program. Due to excess demand for the concentration, applicants are not guaranteed admittance to the program.

**PHLH 201(S) Dimensions of Public Health**

All students wishing to pursue the Area of Concentration should take this course early in their careers, preferably sophomore year. Students may petition the advisory committee to substitute a course taken in a study abroad program focused on global health, providing that the course is equivalent in scope. However, students who plan to take advantage of this option should have taken at least two other courses from among the electives by the end of their sophomore year. The advisory committee recognizes that those who lack a foundation in the core issues of the field may find it more challenging to prepare their proposal for admission to the concentration.

**Statistics**

Statistical analysis is at the heart of the quantitative tools necessary to study the health of populations. One course in statistics from the list below is required of all concentrators.

**Elective Courses**

Concentrators must take at least three electives, with at least two different prefixes, from the list below. Elective courses are grouped by category, but these clusters are not meant to constrain students to a single track within the program. Instead, each student is free to determine, with the guidance of an advisory committee member(s), a set of electives that provides an intellectually coherent exploration of his/her particular areas of interest within the field of public health. In choosing electives, students should consider the balance of breadth versus depth that will allow them to gain theoretical and methodological sophistication in one or more areas. Students may not substitute an independent study for any of these electives. Winter Study courses may not be counted towards the electives.

**Experiential Component**

Because many public health challenges cannot be fully appreciated until one has hands-on experience with real communities and actual populations, each concentrator must have at least one relevant field-based educational experience with a research component. This requirement may be met through participation in an approved study abroad program focused on global health, performing a research project marked with an asterisk, a WSS99 project, or a not-for-credit summer or academic-year internship. In every case, the advisory committee must approve the project in advance. This experiential component will serve as a focal point for the student’s work in the capstone course. Please note that experiential component should address both the “public” and “health” in public health. Projects that center on clinical or lab or that do not experience at the discretion of the instructor and the advisory committee, if space permits.

**Written Proposal for the PH Portfolio**

To be considered for admission to the Area of Concentration in Public Health, students must submit a written statement describing the portfolio of courses, study abroad, and experiential learning component(s) they intend to pursue. In this proposal, candidates for the concentration should describe their intellectual goals, and how these relate to their professional goals. A fundamental purpose of the proposal requirement is to encourage the student to consider concretely how s/he will engage with socio-cultural, behavioral, policy, and/or biomedical aspects of population health. To this end, students should address whether a methodological or disciplinary emphasis ties their chosen courses together, and how the intended experiential component will relate to this set of questions. This proposal is due by the end of the course registration period in the spring of the sophomore year, and should be prepared in consultation with a member of the advisory committee.

Concentrators are required to revisit and update their proposal prior to registration in the spring of the junior year, and to provide documentation of their internship experience both prospectively and retrospectively. The final portfolio will typically include major papers written for electives within the concentration, and may serve as a resource for students to draw on during their capstone course.

STUDY ABROAD AND INTERNSHIPS

Although not a requirement for the PH concentration, study abroad and/or overseas internships provide a crucial opportunity to engage with global health issues through field-based coursework and independent research projects. The Public Health program in coordination with the Study Abroad Advisor and the Office of Career Counseling will advise students on opportunities in these areas. In particular, students may want to consider one of the several Global Health options offered through SIT. One or more courses completed on an approved study abroad program can be counted toward the three elective courses, with permission of the program coordinator. You can find general study away guidelines for Public Health on the publichealth.williams.edu.

PHLH 201(S) Dimensions of Public Health

Public health is concerned with protecting and improving health at the level of a community or population. Although individual behavior is an essential element of public health, collective, rather than individual, outcomes are the focus of public health study. In this course we will survey the field of public health, introducing students to core concepts and methods that highlight the interrelationship of individual choice and social institutions with environmental and biological factors in producing health outcomes at the population level. We will develop these concepts and methods within the context of signal cases and public health crises, covering infectious disease epidemics and prevention, sexual health, and mental health.

Class Format: lecture
Requirements/Evaluation: two papers on a selected population or country and health issue, two short reaction papers, peer reviews and active contribution to class discussion, including on Glow
Extra Info: may not be taken on a pass/fail basis
Prerequisites: none
Enrollment Preferences: sophomores, potential Public Health concentrators
Enrollment Limit: 30
Expected Class Size: 30
Distributional Requirements: non-divisional
Other Attributes: PHLH Core Courses

Spring 2017
LEC Section: 01 MWF 11:00 AM 12:15 PM Instructor: Kiarkan Honderich

PHLH 402(S) Senior Seminar in Public Health

This course is designed to provide senior concentrators the opportunity to delve into the public health literature. Students will read, discuss, and compose written reflections on primary source empirical papers addressing a range of issues and disciplines in the field of public health, including topics in the social determinants of health, environmental health risks, and access to health care. Students will also be divided into three or four research teams to investigate a contemporary real-life issue in public health by designing a study; collecting and analyzing data; and disseminating findings by written report and formal oral presentation to the public health advisory committee faculty. Some amount of off-campus travel may be required either in spring break or the latter half of the semester. The capstone course is required of all concentrators, but may be opened to other students with relevant experience at the discretion of the instructor and the advisory committee, if space permits.

Class Format: seminar
Requirements/Evaluation: active seminar participation, written reflections, contribution to the team research project and a 12- to 15-page final paper
Extra Info: may not be taken on a pass/fail basis
Prerequisites: completion of at least 4 courses counting towards the PHLH concentration
Enrollment Preferences: senior Public Health concentrators
Enrollment Limit: 14
Expected Class Size: 14
Distributional Requirements: Non-divisional
Other Attributes: PHLH Core Courses

Spring 2017
SEM Section: 01 MR 02:35 PM 03:50 PM Instructor: Amie Hane

RELIGION (DIV II)

Chair: Associate Professor JASON JOSEPHSON

MAJOR

The major in Religion is designed to perform two related functions: to expose the student to the methods and issues involved in the study of religion as a phenomenon of psychological, sociological, and cultural/historical dimensions; and to confront students with the beliefs, practices, and values of specific religions through a study of particular religious traditions. It is a program that affords each student an opportunity to fashion his/her own sequence of study within a prescribed basic pattern constructed to ensure both coherence and variety. Beginning with the class of 2016, the major in Religion will consist of at least nine semester courses as follows:

Required Sequence Courses
Religion 200 Theories and Methods in the Study of Religion
One 300-level seminar or tutorial
Religion 401 Senior seminar

Elective Courses
Six electives at the 100, 200 or 300 level (with a maximum of one 100-level class to count towards major).

In addition, each major will select a specialization route in the major in conversation with and with the approval of the department. The specialization will consist of at least four courses. There are two ways to meet this requirement. A major could fulfill the requirement by concentration in one of the College's co-ordinate programs or by designating four specialization courses that can be supported by the resources of the Religion department faculty and the College. In other words, these four courses might be from among the six electives and one 300-level seminar or tutorial or might include additional coursework from other programs and departments (whether cross-listed or not).

The major will culminate in a year-long senior project. The first semester will remain a seminar (REL 401) on a topic in the study of religion set by the faculty member in consultation with incoming seniors. The spring semester will consist of participation in a research colloquium (not a course taken for credit). In this colloquium, each senior major will present his/her individual research project and a 12- to 15-page final paper. The major further provides one with interdisciplinary analytical tools and cross-cultural experience and opens up new avenues for dealing with both the history of a society and culture and the relationships between different societies and cultures. What one learns as a Religion major is therefore remarkably applicable to a wide range of other fields of study or professions.

The department will work with students in the classes of 2014-2015 to adapt these new guidelines for the major. Beginning in spring 2012, students declaring Religion as a major will identify an area of specialization and link it to their senior seminar final paper and be expected to present it in a spring colloquium during their senior year.
REL 102(F) The Meaning of Life
As Henry David Thoreau put it, "The mass of men lead lives of quiet desperation," attempting to fill their void of existence with sex, money, ephemeral amusements, and the steady accumulation of unnecessary possessions—basically killing time until the day they die. For some people this might seem to be enough, but this course is for those of us who lie awake at night wondering things like: "Why are we here?" "What does it mean to live a good life?" "How can I be happy?" "What is our duty to others?" "What really matters?" and "What is the Meaning of Life?" This course will trace the diverse responses to these important questions offered by philosophers and religious thinkers in different cultures and time periods. We will read their texts critically and discuss how they can be directly relevant to our lives. Students will also be introduced to abstract theorizing in Religious Studies about how different cultures and traditions have historically come to live meaningfully. Authors and texts to be read may include Aristotle, Hannah Arendt, Marcus Aurelius, the Bhagavad Gita, H. H. Dalai Lama, the Dharmakarmaccha, Karen Armstrong, Martin Luther King Jr., Jean-Paul Sartre, Shantideva, Peter Singer, Leo Tolstoy, Max Weber, and Slavoj Zizek.

Class Format: lecture
Requirements/Evaluation: attendance and participation, journal and short writing assignments, midterm and final exams
Prerequisites: none
Enrollment Limit: none
Expected Class Size: 40
Distributional Requirements: Division 2

Fall 2016
LEC Section: 01 MR 01:10 PM 02:25 PM Instructor: Jason Josephson

REL 103 The Way of Power: A History of Occult Knowledge and Practices
Since antiquity, certain individuals and groups have claimed privileged access to hidden sources of knowledge, which they maintained could only be revealed to the initiated or enlightened. What is more, it was also often asserted that this knowledge conveyed various powers—from summoning good and evil spirits, transforming base metals into gold, predicting the future, achieving body immortality, directly witnessing the face of God or even becoming a God. How does examining these claims alter our understanding of established religions? This course will trace the historical development of these practices and beliefs known to scholars as "esotericism"—from antiquity to the present. It will cover such topics as magic, alchemy, kabbalah, Gnosticism, hermeticism, Theosophy, tantrism, occultism, vodou, and spiritualism. Emphasizing close the reading of the primary sources, we will explore the boundaries between "esoteric" and "secular" knowledge. We will discuss esotericism as the site for the European appropriation of the "Orient," the construction of discipline of religious studies, and even the origins of modern science.

Class Format: lecture/discussion
Requirements/Evaluation: two short writing assignments, a midterm, and a final exam
Prerequisites: none
Enrollment Limit: none
Expected Class Size: 40
Distributional Requirements: Division 2
Not Offered Academic Year 2017 LEC Instructor: Denese Buell

REL 104 Religious Conflict and Cooperation
Violent conflicts throughout the world are animated by religious rhetoric, driven by religious actors, and sanctioned by religious authorities. At the same time, religious and "interfaith" organizations are often prominent participants in peace advocacy and conflict resolution. What are the varieties of religious involvement in war and peace? What can we learn about "religion" from the conflicts and cooperative initiatives that are labeled "religious"? Does the modern nation-state increase the likelihood of religious conflict? Will 21st century globalization support more or less conflict and/or cooperation? We will investigate these and other questions through contemporary case studies. In some cases we will focus on conflicts over territory: the Temple Mount/Noble Sanctuary in Jerusalem, the Babri Mosque/Birthplace of Rama in Ayodhya, India, the Israeli-Palestinian conflict, and the conflict over the historic site of Usama Bin Laden and the role of spirit possession in the formation of the Lord's Resistance Army in Uganda. Finally, we will consider efforts to end such conflicts peacefully and delegitimize militant groups. In each case, we will see how competitive or co-opting the control over what counts as "Islamism," "Hinduism," "religion," and so forth is central to these conflicts and to the goals of those who seek to resolve them. Along with primary and secondary sources related to each case study, we will also read theoretical works by authors that may include Mark Juergensmeyer, Samuel Huntington, Scott Appleby, Bruce Lincoln, Saba Mahmood, Olivier Roy, Ananda Abeysekara, Talal Asad, Tomoko Masuzawa, Elizabeth Shakkam Hur, and others.

Class Format: lecture
Requirements/Evaluation: two short papers, an in-class mid-term exam, and a final paper or project
Extra Info: not available for the fifth course option

Enrollment Preferences: first-year students and potential Religion majors
Enrollment Limit: none
Expected Class Size: 30
Distributional Requirements: Division 2
Not Offered Academic Year 2017

REL 106 Is God Dead? Secularization in the Modern World
In 1966, Time magazine published an edition titled "Is God Dead?", alluding to Friedrich Nietzsche's famous claim that "God is dead." The Time edition examined the growing number of people in the United States who proclaimed disbelief in organized religion or in God. Today, one in five people in the United States identify as "none" when asked about their religious affiliation. This trend is one important component of what has come to be known as "secularization." At the same time, however, the idea that religion is increasingly disappearing or becoming irrelevant has been significantly challenged by the rise of the "religious right" in the United States, as well as Islamism, Hindu nationalism, and many other religious revival movements across the globe. This course will take a theoretical and global comparative perspective to understand the nature of secularization in the modern world. Has secularization taken place or not? What does it mean to say we live in a secular society? Is it the case that "Western" society is secular whereas the rest of the world is not? The course will answer such questions by beginning with broad historical narratives and theoretical accounts that propose various interpretations of secularization as a historical process (focusing primarily on Peter Berger, Steve Bruce, Jose Casanova, and Charles Taylor). The remainder of the course will then explore a variety of case studies from the Americas, the Middle East, India, and East Asia to nuance and complicate those theories and narratives. We will explore how the very idea of secularization presupposes a constructed notion of "religion" and will think about the implications of that secular-religion binary.

Class Format: seminar
Requirements/Evaluation: active participation, two short essays (4-5 pages), in-class mid-term exam, and final project
Prerequisites: none
Enrollment Preferences: prospective Religion majors
Enrollment Limit: 25
Expected Class Size: 10
Distributional Requirements: Division 2
Not Offered Academic Year 2017

REL 171 Music and Spirituality Crossoverings: MUS 171/REL 171
Across cultures and across millennia, music has served to enable, inspire, and express the spiritual life experiences of communities and individuals. Why is this so? In what contexts and through what means can making and hearing music acquire a spiritual dimension? This course will take a topical approach to exploring music's spiritual power, considering such areas as the function of music in ritual practices from various cultures and times, the use of music to tell sacred stories, and the role of music created in the face of death and its aftermath. Our primary focus will be on music from Christian traditions from medieval to modern times, enriched by conversations with musicians immersed in the music of other world faith traditions. We will explore connections between music and spirituality through a wide variety of composers and styles, including plainchant and Renaissance sacred music; Baroque and choral music; classics by Bach, Mozart, Beethoven, and Brahms; American hymnody and spirituals; Igor Stravinsky and Arvo Pärt; John Coltrane and Dave Brubeck; and affiliated artists from the world of contemporary popular music.

Class Format: lecture/discussion
Requirements/Evaluation: evaluation will be based on class participation, several brief writing assignments, a midterm paper, and a final project with presentation
Extra Info: may not be taken on a pass/fail basis
Prerequisites: none
REL 200(S) What is Religion? Theories and Methods in the Study of Religion

As recently as the 1960s, the most influential theorists of modernity were predicting that religion would eventually vanish, while theologians lamented what they called the "Death of God." But one has only to glance at today's headlines to see that accounts of religion's demise were premature. Indeed a basic knowledge of religion is indispensable to understanding the current global moment as well as a range of fields from political science to English literature and history. To explore the meaning of religion, this course will introduce the debates around which the discipline of religious studies has been constituted. It will familiarize students with the discipline's most significant theorists (both within and outside of the field) and forge their multidisciplinary—philosophical, sociological, anthropological, and psychological—modes of inquiry. At stake are questions such as: How does one go about studying religion? Is "religion" even a cultural universal? Or is it merely the byproduct of the European Enlightenment? What is religion's relationship to God? to science? to secularism? to colonialism? to ethics? to politics? to violence? to sex? to freedom? Has religion changed fundamentally in modernity? And if so, what is its future?

Class Format: seminar

Requirements/Evaluation: class participation, three short (2-3 pages) writing assignments, a 5-page midterm paper, and a 10-page final paper

Extra Info: not available for the fifth course option

Prerequisites: none, although a previous course on religion is recommended

Enrollment Preferences: Religion majors

Enrollment Limit: 15

Expected Class Size: 15

Distributional Requirements: Division 2

REL 201(F) The Hebrew Bible

Crosslistings: REL 201/COMP 201/JWST 201

The Hebrew Bible is perhaps the single most influential work in the history of Western philosophy, literature, and art. But the overwhelming presence of the text in nearly every aspect of modern culture often obscures the sheer brilliance of its narrative technique as well as the complex interplay between law, history, prophecy, and poetry. This course offers a comprehensive introduction to the literary, historical, and theological aspects of the Hebrew Bible with an eye towards developing a sophisticated understanding of the text in its ancient context. Through the close reading of substantial portions of the Hebrew Scripture in translation and the application of various modern critical approaches to culture and literature, students will explore fundamental questions about the social, ritual, and philosophical history of ancient Israel, as well as the fundamental power of storytelling that has resonated across two millennia.

Class Format: lecture/discussion

Requirements/Evaluation: evaluation will be based on class participation, short written assignments, and two to three longer papers

Prerequisites: none

Enrollment Preferences: Jewish Studies concentrators, Religion and Comparative Literature majors

Enrollment Limit: 35

Expected Class Size: 40

Not Offered Academic Year 2017

REL 202 Moses: Stranger in a Strange Land

Crosslistings: REL 202/JWST 202/COMP 214

As chieftan, priest, prophet, and lawgiver all in one, Moses occupies the central place in the history of Israelite and Jewish leaders. However, he is a story of the unlikely candidate for such an important role. He is God's chosen leader among the enslaved Israelites, but he is raised as an Egyptian prince. He is a spokesman for his people, but he is slow of speech. He is the lawgiver and first judge of his nation yet he is quick-tempered and impulsive. This is the story of the most revered figure in the Jewish tradition, who nevertheless remains an outsider to the very end, has fascinated commentators and inspired countless artistic and literary interpretations. This course will engage in a close study of the figure of Moses by examining the biblical narrative of his life and career from Exodus through Deuteronomy with an eye towards understanding the complex and often contradictory portrait of this self-described "stranger in a strange land." We will also examine some of the ancient legendary and folkloric accounts about Moses, as well as philosophical and allegorical treatments in Hellenistic Jewish, early Christian, and Muslim biographies. We will then proceed to investigate key modern reconfigurations and critiques of Moses in several genres, which may include renaissance visual depictions, literary works by Sigmund Freud, George Eliot, Thomas Mann, and Zora Neale Hurston, and even musical and cinematic renditions. All readings are in translation.

Class Format: seminar

Requirements/Evaluation: class participation, short written assignments, and two or three longer papers

Prerequisites: none

Enrollment Preferences: students who have already taken a course in biblical literature

Enrollment Limit: 19

Expected Class Size: 19

Distribution Notes: meets Division 2 requirement if registration is under REL or JWST; meets Division 1 requirement if registration is under COMP

Distributional Requirements: Division 2

Not Offered Academic Year 2017

REL 203 Judaism: Before The Law (D)

Crosslistings: REL 203/JWST 101

This course introduces the academic study of Judaism through a humanistic exploration of "the Law" as a concept in Jewish thought and practice. Coverage will include the Law of Moses in the Hebrew Bible, the rabbinic distinction between "Oral Law" and "Written Law," medieval philosophical justifications for the Law, modern interpretations of the Law as Moral Law, Hasidic challenges to the centrality of the Law, and twenty-first-century Jewish fiction that is haunted by a felt absence of the Law. Topics may also include the nature of rabbinic authority, methods of Jewish legal interpretation and innovation, and Jewish law as it pertains specifically to women, gentiles, idolaters, food consumption, and the Land of Israel. Course materials will include classical sources such as the Talmud and Midrash, modern philosophical texts by Franz Rosenzweig, Leo Strauss and Joseph Soloveitchik, Kafka's The Trial with his parable "Before The Law," Woody Allen's film Crimes and Misdemeanors, and ethnographic accounts of contemporary Jewish observance. All readings will be in translation.

Class Format: seminar

Requirements/Evaluation: class participation, three short papers, and a final longer paper

Extra Info: not available for the fifth course option

Prerequisites: none

REL 205 Ancient Wisdom Literature

Crosslistings: REL 205/CLAS 205/COMP 217/JWST 205

The Biblical books of Proverbs, Ecclesiastes, and Job are often grouped together under the Hebrew category of hokhmah, 'wisdom.' Although these books are very different in content, they can all be interpreted as meditations on ethical and practical philosophy. In this way, they represent the Hebrew Bible's canonical embrace of a widespread Near Eastern literary phenomenon. From the institutional literature of Egypt and Mesopotamia to Greek didactic poetry and fables, ancient Mediterranean cultures offer a wide range of texts that engage the issues of personal behavior, leadership, and justice. Starting with the central wisdom books of the Hebrew Bible and moving through relevant material from the Apocrypha, New Testament, and the Egyptian and Babylonian traditions, this course will examine the literature of wisdom throughout the ancient world with an eye toward understanding its various social, political, and philosophical contexts. We will then consider the Greek wisdom tradition in such texts as Hesiod's Works and Days, Aesop's fables, and fragments from the pre-Socratic philosophers. Finally, we will explore the influence of these ancient sources on later expressions of wisdom in medieval European literature, as well as more recent examples such as Benjamin Franklin's Poor Richard's Almanack. All readings are in translation.

Class Format: lecture/discussion

REL 209 Jewish America

Crosslistings: REL 209/COMP 250/JWST 209

Who and what counts as "Jewish" in America? Does stand-up comedy have a distinctively Jewish pedigree? What about neoconservatism? How is it possible to answer such questions without falling into what David Hollinger has called the "booster-bigot trap"? How is it possible, that is, to avoid answers that uncritically celebrate "Jewish contributions" or perniciously suggest "Jewish influence"? This course will explore the various meanings of Jewishness in American culture as expressed by artists, rabbis, activists, intellectuals, politicians, and some comedians in order to avoid the booster-bigot trap by focusing vigilantly on what is at stake wherever Jewishness is invoked, defined or ascribed. We will draw methodological support from scholars like Hollinger, Jonathan Freedman, Laura Levitt, Yuli Sziekze, Shaul Magid, Andrew Ross and others. Particular attention will be given to the appearance of Jewish themes and involvement in popular culture and political action, as well as to Jewish American communal institutions, the everyday lives of Jewish Americans, and Jewish variations on American religion. Coursework will involve some historical, sociological and anthropological readings, but will focus primarily on close analysis of films, literary fiction, stand-up comedy, political magazines, theological texts, and television shows. We may, for instance, watch films like The Jazz Singer (1927 and 1980), Exodus and Annie Hall, read John Updike's Bech: A Book, Philip Roth's Operation Shylock or Cynthia Ozick's The Puttermesser Papers; listen to the comedy of Mort Sahl, Lenny Bruce and Sarah Silverman; read from Henry Ford's Dearborn Independent, the Menorah Journal or Commentary; study works by Rabbis Stephen Wise, Ranen Joshua Heschel and Meir Kahane; and watch episodes of Bridget Loves Bernie, Northern Exposure and Curb Your Enthusiasm. We will also study arguments about the role and meaning of Jewishness in American secularization, "therapeutic culture," the civil rights movement, the sexual revolution, and feminism.

Class Format: Seminar

Requirements/Evaluation: class participation, two short papers, a midterm take-home exam, and a final paper interpreting an example of Jewishness in America chosen by the student

Prerequisites: none

Enrollment Preferences: Religion majors, Jewish Studies concentrators, and students who are interested in either of these options

Enrollment Limit: 19

Expected Class Size: 25

Distributional Requirements: Division 2

Not Offered Academic Year 2017

REL 210 The New Testament: Purpose, History and Method (W)

Crosslistings: REL 210/CLAS 210/COMP 213

The New Testament is the most important collection of documents in the Christian religion. This course offers an overview and discussions of the origin and purpose of the writings, the development of methods of readings of the texts, we start with the origin of the writings before they became collected into the New Testament, and ask: what forms of writings (genres) in Greco-Roman culture were available to the authors of the New Testament, and how they were used for the purpose of shaping faith in Jesus Christ and creating communities? Why just these scriptures were included, and not others, for instance, the Gospel of Thomas, is another much discussed question. The impact of the New Testament writings upon society is a problematic history; for instance, they have been used to support negative attitudes to Jews, women and homosexuals. This raises the issue of how to read the New Testament. There are many different ways of reading the New Testament; perhaps the most common way to read it is as a scripture, important for one's religious faith. In this course, however, we will focus on scholarly and academic readings of the New Testament. But they, too, have gone through many changes, influenced by contemporary methodologies, and critical ones in the 19th and into 20th century, more recently, by literary, feminist and post-colonial readings. Through extensive readings of New Testament writings in their cultural and historical context, documentations of their use in history, and recent theories of interpretation, the aim is to gain an independent position on the New Testament as an historical and religious document.

Class Format: lecture/discussion

REL 208 Ancient Greek Religion

Crosslistings: CLAS 208/REL 208

This course explores the nature and evolution of ancient Greek religion from the Bronze Age (1200s BCE) to the rise of Christianity, with a focus on ritual and cultic practices in their cultural and historical context. We will draw on the rich evidence provided by literary and documentary texts, and also take into account archaeological evidence, including works of art such as sculpture and vase painting. We will pay special attention to ritual in civic and political life, and its role in expressing and forming individual and group identity. We will also examine the intersection of religion and literature by reading works that describe or depict cultic practice, or that were composed for performance in ritual contexts. Readings include Homer's Iliad, Hesiod's Theogony, Euripides' Bacchae, Aristophanes' Women at the Thesmophoria, and selections from the Homeric Hymns and Pindar's Odes.
REL 211(F) Earliest Christianities
This history course explores the diversity and development of early Christianity primarily through the writings of early Christians beyond the New Testament canon. Attention is given to diverse interpretations of Jesus and Judaism, the emergence of church structures and rituals, and the construction of the categories "orthodoxy" and "heresy" in the context of the struggle for authority and identity in the Roman Empire as well as at the intersections between historiography and contemporary religious and political debates.

Class Format: lecture/discussion
Requirements/Evaluation: active preparation and participation, 1 text analysis paper (5 pages), midterm, and take-home final
Prerequisites: none
Enrollment Limit: none
Distributional Requirements: Division 2

REL 212 The Development of Christianity: 30-600 C.E. (W)
Crosslistings: REL 212/HIST 324
This class will introduce you to the history, writings, practices, and structures of early Christians between 30-600 CE. Who were "Christians" and how did they understand and define themselves in this time period? What historical and cultural factors influenced the ways in which Christians were perceived, could imagine themselves, and lived? While this class addresses the basic flow of events and major figures in early Christian history, it will also require you to develop a critical framework for the study of history in general. In addition, you will gain significant experience in the critical analysis of primary source materials. Special attention will be paid to the incredible diversity of early Christian thought and practice.

Class Format: lecture/discussion; in-class group work
Requirements/Evaluation: active and informed participation, one reflection paper (1 page), two textual analysis papers (3-4 pages)—at least one to be revised (option to revise both)
Extra Info: additional requirements: one historiographical analysis (5-7 pages), and a take-home final exam
Prerequisites: none
Enrollment Preferences: sophomores considering a major in Religion or History, then senior and junior majors in these departments
Enrollment Limit: 19
Expected Class Size: 19
Distributional Requirements: Division 2
Writing Intensive
Other Attributes: HIST Group P Electives - Premodern
JWST Elective Courses

REL 214 The Late Byzantine World: From Justinian to Constantine XI
Crosslistings: ARTH 238/CLAS 248/REL 216
This course will cover the basic stylistic, iconographical, narrative, and ritual functions of visual representations of gods, and the continued interest in the heroic world of epic, to their sometimes sublime artistic presence, complex religious function, and transformation into metaphors in aesthetic and philosophical thought. The course will cover the basic stylistic, iconographical, narrative, and ritual aspects of the gods and goddesses in ancient Greek culture. The course will address in detail influential artistic monuments, literary forms, and social phenomena, including the sculptures of Olympia and the Parthenon; divine corporeality in poetry; the theology of mortal-immortal relations; the cultural functions of visual representations of gods, and the continued interest in the gods long after the end of antiquity. Readings assignments will include selections from Homer, Hesiod, Sappho, Aischylus, Euripides, Plato, Walter Burkert, Jean-Pierre Vernant, Nikolaus Himmelmann, Erika Simon, and Friedrich Nietzsche.

Class Format: lecture and discussion
Requirements/Evaluation: short writing assignments, midterm exam, final exam, final paper
Prerequisites: none
Enrollment Preferences: preference will be given to pre-registered Art-History majors concentrating in the pre-1400 requirement; otherwise, the course is open to any interested student
Enrollment Limit: 40
Expected Class Size: 30
Dept. Notes: the pre-1400 requirement; satisfies the pre-1600 elective requirement in the art-history major.
Distribution Notes: meets Division 1 requirement if registration is under ARTH and CLAS; meets Division 2 requirement if registration is under REL
Distributional Requirements: Division 1
Other Attributes: ARTH pre-1600 Courses

REL 218 Gnosis, Gnostics, Gnosticism (W)
Crosslistings: REL 218/COMP 218/CLAS 218
What is gnosis and Gnosticism? Who were the Gnostics? Salvation by knowledge, arch-heresy, an eternal source of mystical insights and experiences, secret esoteric teachings available only to a few. All these and more have been claimed made about gnostis, Gnostics, and Gnosticism. This course will introduce you to the key ancient texts and ideas associated with...
Muslim and non-Muslim biographies of Muhammad are intertwined and interdependent, often developing in tandem with one another. By exploring Muslim and non-Muslim, pre-modern and modern accounts of Muhammad’s life, we will think about the many ways in which Muhammad's life has been told and re-told over the centuries. In this course we will consider some of the following depictions of Muhammad: Muhammad as the object of ritual devotion; Muhammad as statesman and military leader; Muhammad’s polygynous marriages and his young wife, Aisha; Muhammad as social reformer and revolutionary. Course readings will include pre-modern biographies (in translation) as well as contemporary Muslim and non-Muslim biographies.

Class Format: seminar
Requirements/Evaluation: reading responses, 3 short essays (3-4 pages double-spaced), and final exam
Prerequisites: none

REL 231 The Origins of Islam: God, Empire and Apocalypse
Crosslistings: REL 231/HIST 209
Both Muslim and non-Muslim historians usually see the rise of Islam in the seventh century C.E. as a total break with the past. This course will challenge that assumption by placing the rise of Islam in the context of the history of late antiquity (c. 250-700 C.E.). The first portion of the course will examine the impact of Judeo-Christian monotheism in the ancient world, the rise of confessional empires, articulation of new ideas about holiness and its relation to sexuality, and the transformations undergone by Judaism, Christianity, Zoroastrianism and Manichaeanism. We shall examine the conversation of these traditions with classical paganisms and philosophy, the internal struggles within traditions to define rules of interpretation, the impact of ascetic, iconiclastic and apocalyptic ideas and, finally, politics among the traditions. We will then examine the career of Muhammad (PBUH) in the context of Arabia, the spread of the Islamic empire into Christian and Iranian worlds, the impact of apocalyptic expectations, the fixation of religious decision making within the tradition, the process of conversion, the encounter with the Late Antique heritage and religious diversity within the commonwealth of Islam. The course will end with the end of the Abbasid Caliphate in 1258.
Requirements/Evaluation: one 5-page paper, self-scheduled final, and a final research project
Prerequisites: none, open to all

REL 234(F) Religion and Migration (D)
Crosslistings: LATS 234/REL 234/AMST 234
This course is concerned with the ways in which migrants groups have altered the religious landscape of the U.S. and how they innovatively reproduce practices from their places of origin. Crossing into the U.S. from the eastern seaboard, the Pacific Rim, and the southern border with Mexico, migrants bring their new ways of creating sacred space and negotiated religious life. We will seek to understand the multifaceted relationships between religion and migration. How have migrants negotiated the role of religion in their private and public lives? What have been the social consequences pertaining to gender, praxis, respectability? The course take into account earlier iterations of migration from the nineteenth century but case studies in this course will draw heavily from the third wave of American immigration, characterized by twentieth-century “indentured migrations” of African Americans, Latins/o, Native Americans, and rural dwellers into the urban environment. We will conclude by examining the ways in which forces of modern globalization have changed the nature of religious diversity in the U.S. In this EDI course, we will extensively compare migrant cultures as we interrogate power and privilege pertaining to race and religion. The cultural production of these migrant groups that we will examine will offer students an empathetic understanding of diverse cultures and their form of belonging.
Class Format: seminar
Requirements/Evaluation: student participation, weekly reflection papers (up to half page), midterm primary source write up (up to 5 pages), and a final project on “Representing Religious Migrations”
Extra Info: (includes 8-10 page paper based on primary and secondary sources and interactive component: video, map, photographs, material cultures exhibit plan, etc). Course may require a field trip may not be taken on a pass/fail basis; not available for the fifth course option

REL 235(F) The Qur’an and Literature
Crosslistings: COMP 235/ARAB 235/REL 235
This course explores the rich and multifaceted relationship between the Qur'an and literature from several different perspectives. The first part of the course will examine Qur'anic styles through primary readings in translation and scholarship on the question of whether the Qur'an is literature. Readings will consider how the Qur’an sheds light on the category of literature through attention to such features as sound, figurative language, and genre. Students will then discover what the Qur’an has to say about poets and stories. We will then turn to the classical discourse on Qur'anic inimitability (i`jaz al-Qur'an), with an emphasis on stylistic/rhetorical inimitability and its relationship to Arabic literary theory. We will make use of recent translations of i`jaz treatises, manuals of literary criticism, and historical readings on the status of the Qur’an in early Islamic history. Finally, we will read a selection of later literature that takes up Qur’anic themes and language in Islamic history, in order to explore questions of intertextuality, rewriting, and the guises that commentary can take.
Class Format: seminar
Requirements/Evaluation: 2 papers (5-7 pp., 8-10 pp.), short response papers, class participation
Enrollment Preferences: Comparative Literature majors, Arabic Studies majors

REL 237 Islam in the United States: From Black Muslims to the War on Terror (D)
Crosslistings: REL 237/AMST 237/AFR 237
Malcolm X is likely the most prominent and influential Muslim figure in the history of the United States. His story represents two fundamental themes in the history of Islam in America: conflict between Muslims over what is “authentic” or “orthodox” Islam; and the ways that American history, politics, and culture determine the contours of “American Islam”. This course will explore these two themes through an array of topics in the history of American Islam. In so doing, we will examine the complex relationship between religion, politics, and culture in the United States. Beginning with the story of Malcolm X, the Nation of Islam, and other African-American Muslim movements, we will try to understand: What made Islam so appealing to millions of African-Americans throughout the 20th century? And were these genuinely “religious” and “Islamic” movements, or just racial/political “black nationalist” movements in the guise of religion? What counts as legitimately “Islamic”, and who gets to decide? We will then move into the latter half of the 20th century and the post-9/11 debates over authentic Islam. What happened to American Muslim communities and organizations after the waves of post-1965 immigration from Muslim countries? How have debates about Muslim identity shifted over time, from being configured in terms of black separatism, to transnational/diasporic identity, to the attempts at articulating an indigenous “American-Muslim” identity? How have national narratives around 9/11 and the “War on Terror” impacted these debates over identity and “authenticity”? And how have these debates intersected with gender, racial, and ethnic politics?
Throughout the course, we will be studying historical and anthropological material, autobiographies, novels, documentaries, films, and social media. The course fosters critical thinking about diversity by challenging assumptions of who Muslims are, what being American means, and what Islam is. It also focuses on the complex interaction of different dimensions of diversity, from religion to race, ethnicity, nationality, culture, gender, language, and age.

REL 238(S) Faith and Rationality in Islam: Skepticism and the Quest for Certainty
Religious faith is generally perceived as being diametrically opposed to reason and rationality. Islam in particular is often assumed to be even more dogmatic in its demand for blind unquestioning faith. This course will explore the diverse ways that Muslims in different historical contexts have navigated the complex relationship between faith, rationality, and skepticism. Is faith compatible with reason and rationality? Can the foundations of Islamic belief be proven to be true? Does faith require absolute certainty? What room is there for doubt and skepticism in Islam? We will explore these questions through an array of primary and secondary readings in Islamic theology, philosophy, and mysticism, from the classical to the modern periods. We will also conduct the course with some anthropological material exploring how ordinary Muslims today live out these tensions in their daily lives.

REL 243(S) Women, Gender, and Sexuality in Islam

**Crosslistings:** REL 242/ARAB 242/WGS 242

The figure of the Muslim woman is an object of intense scrutiny in Western society. Claims that Muslim women are oppressed and the incompatibility of Islam and feminism abound. This course will consider women and gender roles in the Islamic tradition and how Muslim women have interpreted and negotiated these discourses. We will explore questions of masculinity, femininity, and sexuality across various historical periods as well as through contemporary Muslim feminist scholarship and literature (including film and novels). We will begin with insights into the politics of representation and then explore: how Muslim women have claimed religious authority through scriptural interpretation; how they have negotiated their position in Islamic law both historically and in contemporary Muslim societies; and the lives of pious women in Sufism—the mystical tradition of Islam. We will conclude with Muslim feminist scholarship and recent works on Islamic masculinities.

### Course Format:
- **Requirements/Evaluation:** active class participation (including a presentation on the reading materials), short weekly reflections, and one final research paper (10-15 pages)
- **Enrollment Limit:** 19
- **Expected Class Size:** 10
- **Distributional Requirements:** Division 2

REL 244 Mind and Persons in Indian Thought

**Crosslistings:** REL 244/ASST 244

In this course, we follow the conversation among Indian philosophers concerning the self and the nature of consciousness. We start with some of the Hindu views about the self and the mind and consider their historical implications. We then consider a range of Buddhist critiques of these views, focusing more particularly on the Madhyamaka philosophy, which radicalizes the critique of the self into a global anti-realist and skeptical stance. We also examine the Yogacara school, which offers a process view on the analysis of experience. We conclude by considering some of the later Hindu holistic views of the self as responses to the Buddhist critique. In this way we come to realize that far from being the irrational foil of "the West," Indian tradition is a rich resource for thinking through some of the central ideas that have challenged philosophers in both traditions.

### Course Format:
- **Requirements/Evaluation:** lecture/discussion
understanding of a remarkable but tragically threatened civilization. This becomes not just an exercise in self-reflection but also a gate to a better world, and the indispensable assessment of Western representations of Tibet and culture to resist oppression. In this way, we get a footing in the Tibetan the Tibetan people have faced the challenge of how to use their institutions misunderstandings that threaten its integrity, is part of the Exploring Diversity Initiative.

REL 246(T)F India’s Identities: Reproducing the Nation,Community and Individual (D) (W)
Crosslistings: REL 246/ANTH 246/WGSS 246/ASFT 246
This course examines the relationship between body, gender, sex, and society in South Asia, using three countries and religions—India, Sri Lanka, and Bangladesh, and Hinduism, Buddhism, and Islam—as its foil. The course explores the body as a lens through which to unpack South Asian discourses that link body and sexuality with nation, community, and population. In particular, it explores the ways that links individual and social bodies in ways that occasion solidarity as well as social suffering, violence as well as communal cohesion. How do bodies come to signify the purity or prosperity of the nation or community and with what social or discursive effects? We begin by unpacking foundational theories of the body as proposed by Foucault, Douglas, and Bourdieu in order to better understand how local discourses of the body help produce gender and other social hierarchies in South Asia. By considering how the human body can serve as a map for society and vice versa, we examine both classical discourses and modern institutional practices of the body including the temple, the monastery, the mosque, and the mendicant, as well as bodily practices such as yoga, celibacy, sex work, and new reproductive technologies. We also analyze how the body has served as a symbol of nation, community, and social health. Throughout, we are interested in the cross-cutting effects of gender and sex in perpetuating structural hierarchies and social suffering around the body in South Asia.

Class Format: seminar
Requirements/Evaluation: the course has weekly writing, more than 20 pages total, and there is student-faculty feedback every week including a week dedicated to a one-one writing feedback session between student and instructor

REL 247(S) Religion, Environment, and the American West (D)
Crosslistings: REL 247/LATS 247/ENVI 247
From the “Land of Enchantment” of New Mexico in the far reaches of the desert to the sacred temples on the West Coast that overlook Pacific Ocean, this course examines the peoples and the “sacrosanct” of the American West. Historian Patricia Limerick regards this region as an extraordinary site of convergence and one of “the greatest meeting places on the planet.” The region is a site of cultural complexity where Penitentes maintained a sacred order, Pentecostals attracted a global audience, Native Americans forged leprous definitions of “religion,” and Asian immigrants built the first Buddhist and Sikh temples. Until recently, standard surveys of religious history in North America have devoted minimal attention to the distinctive role of religion in the American West. They have focused on religious history in the flow of events westward from the Plymouth Rock landing and Puritan establishment while generally overlooking the Pueblo Revolt in modern-day New Mexico which occurred in that same century and marked the temporary suspension of Spanish encroachment. How do scholars of religion and history account for these renditions between the past and present? Most mainstream religious histories treat religious experience and identity in the U.S. West as additive rather than complementary to or constitutive of its mainstream narratives. Contemporary historians of religion note the need for new “sights,” “cites,” and “sites” in order to deconstruct and reconstruct this incomplete meta-narrative, taking into account such factors as migration, gender, region, and the environment. In this EDI course we will use tools of critical theory and historicism to examine this region, compare religious cultures, and interrogate who and what constitute notions of race.

Class Format: lecture/discussion
Requirements/Evaluation: student participation, weekly reflection papers (up to half page), midterm primary source paper (up to 5 pages), and a final research paper on Religion and the Environment (8-10 page paper with a media/visual component)

REL 250 Scholars, Saints and Immortals: Virtue Ethics in East Asia (D) Crosslistings: REL 250/ASST 250
In East Asian cultures, as in the United States, popular conceptions of morality are both sexualized and moralized—stylized figures that are said to embody a distinctive cluster of virtues. For example, American Christians invoke not only Jesus, but also a pantheon of "secular saints" as diverse as Martin Luther King Jr. and General Patton, George Washington and Cesar Chavez. This course will explore the cultural functions of moral paragons and philosophies of virtue in East Asia by introducing students to examples from Chinese and Japanese history, ranging from Confucian articulations of the ideal subject to Buddhist conceptions of the Bodhisattva to Taoist immortals. It will also address the history of ethical thought in East Asia, focusing particular attention on conceptions of "Virtue Ethics." This approach has come to be seen by some contemporary analytic philosophers as a way out of the impasse produced by ethical relativism and the loss of theological rationales for moral action. Readings will include Euro-American philosophers such as Nietzsche and MacIntyre as well as primary texts in translation by Chuang-tzu, Confucius, Shantideva and others. This course fulfills the Exploring Diversity Initiative by providing students with tools for cross-cultural analysis of ethics and moral paragons, as part of how societies manage difference and articulate hierarchies of privilege and power.

REL 251 Zen Buddhism: History and Historiography Crosslistings: REL 251/ASST 251
Because mystifying references to Zen are strewn throughout American popular culture—from episodes of the Simpsons to names of perfumes and snack foods—most Americans have an image of Zen Buddhism that is disconnected from anything actually practiced in East Asia. This course offers a corrective to this image by familiarizing students with both the history of Zen and the historiographical roots of these popular perceptions. This course will examine the origins of Zen (Ch'an) in China, trace its transmission to Japan, and consider its development in both cultural contexts. It will conclude with an examination of Zen's unique role in American popular culture. The course will enrich the conventional image of Zen by addressing its involvement with politics and governance, gods and demons, mummies and sacred sites, sex and violence, nationalism and scholarship. Texts will include selections from primary works in translation (The Platform Sutra of The Sixth Patriarch, The Gateless Barrier, The Lancelot of Seated Meditation) as well as selections from secondary literature including Suzuki, Zen and Japanese Culture, Victoria, Zen at War, and Faure, The Rhetoric of Immediacy.

Class Format: lecture/discussion

REL 252(F) Zen Buddhist Visual Culture: The Path to Nirvana (W) Crosslistings: ARTH 376/ASST 376/REL 252
This course is about the ways in which images are produced, viewed, and used in the Zen Buddhist tradition. It explores the various ways in which visual culture is a key part of Zen Buddhism teaching in China and Japan. In this class we will look at both high art and popular expressions of Zen Buddhist visual culture. Topics of interest include: 1) Buddhist image making and icon worship; 2) Gardens; 3) tearooms, tea ceremony and tea bowls; 4) The Zen temples Ryoan-ji, Daisen-in, and Daitoku-ji; 5) The political function of Zen and its art in Japan's samurai culture; 6) The popular Zen Buddhist cult of Bodhisattva Avalokitešvara and his gender transformation; and 7) Daruma (Bodhidharma) imagery in popular culture. This course is a CRASS (critical reasoning and analytical skills) course. The class format also offers students opportunities to practice public speaking and writing skills.

Class Format: lecture/class discussion

Distributional Requirements: Division 2
Exploring Diversity

Not Offered Academic Year 2017
SEM Instructor: Ju-Yu Jang

This course introduces students to Buddhism by examining its ideas and practices as they have taken place in actual social contexts rather than as disembodied textual objects. After examining the main ideas and narratives of the tradition, we turn our attention to Thailand where we examine how these ideas and narratives have shaped a whole range of practices, from meditation to shamanistic rituals. We then consider the transformations that Buddhism is undergoing in contemporary society, examining the rise of meditation movements, the changing role of monks and laity, the resurgence of the nunnery, the rise of Buddhist social activism and the development of new Buddhist social philosophies. We ask questions such as: How can Buddhism adapt to a modern global consumerist society? What are the transformations involved in this process and the role that Buddhism can play in such a global society? Should Burmese Buddhism take advantage of the opportunities of this new global culture or should they adopt a critical stance toward its consumerist values?

Class Format: lecture/discussion

REL 256 Engendering Buddhism: How Women and Men Shape and Are Shaped by Buddhism (D) (W) Crosslistings: REL 256/GWSS 256/ANTH 256/ASST 256
This course looks at how gender has shaped Buddhism as well as how Buddhism has shaped gender. Most generally, it considers the myriad ways that Buddhism soteriology and practice produce the very gender differences they purport to overcome. How have the Buddha and his far-flung disciples institutionalized gender differences in spite of their putative goal of transcending duality? We examine the varying experiences of women and men in Buddhist societies and literatures as a lens by which to analyze the pervasive operation of social and gender hierarchies. Last but not least, we discuss how well feminist and American revisions of Buddhism have transformed gender and other forms of difference. Our analysis revolves around several interdependent themes. (1) How do female and male bodies become the subject of a specific set of Buddhist gazes? What does Buddhist discourse say about the possibility of gaining enlightenment in the female body? (2) How do gender divisions reflect deeper social divisions such as class and race in Buddhist discourse? (3) How do feminist deconstructions
REL 257(F) Tibetan Buddhism: Embodying Wisdom and Compassion

We begin by considering the basic ideas and practices of Tibetan Buddhist traditions and the ways in which the ideals of wisdom and compassion have shaped Tibetan culture. We then proceed to examine particular aspects of the tradition such as the role of the teacher or lama and his or her various manifestations, from the exotic figure of the tantric guru to that of the Dalai Lama, a charismatic world teacher engaged in both religious and political affairs. We also examine a wide range of lay and monastic practices, from the life of large monasteries and their unique culture to the practices of nuns and lay people. Throughout this course, we consider not just the variety of esoteric practice forms but also the esoteric tantric tradition that pervades Tibetan life.

We examine the various meditative practices that revolve around this profound and often misunderstood tradition. In doing so, we do not consider tantra as just a set of strange practices sometimes revolving around sex and violence. Rather we examine how it manifests a philosophy of embodiment that has profound implications for thinking about who we are as human beings.

REL 259 Ethics of Jewish American Fiction (W)

Crosslistings: REL 259/ENGL 259/JWST 259

After the Second World War, Jewish American writers who wrote about Jewish characters and Jewish themes were increasingly celebrated as central figures in American fiction. Isaac Bashevis Singer, Bernard Malamud, Saul Bellow, Cynthia Ozick and Philip Roth are among those who gained prominence in this period. These writers were literary innovators and often addressed broad humanistic themes. But they also struggled with profound questions that arose in the postwar period about Jewishness, the legacy of the Holocaust, and what it means to be an American. In this course we will read the above authors and others. We will focus, in particular, on the distinctive ethical and political ideas, emotions, and aspirations that animate their work. The course will begin with a study of theoretical approaches that will provide the basis for our ethical criticism: we will read, for instance, Lionel Trilling, Wayne Booth, Martha Nussbaum, and Noël Carroll. Then we will delve into the fiction, following a trail that begins in the postwar period and continues in fictions by Erica Jong, Rebecca Goldstein, Michael Chabon, Gary Shteyngart, and others. Can we find a distinctive Jewish American ethics in Jewish American fiction?

Class Format: seminar

Requirements/Evaluation: class participation, one take-home exam on theoretical approaches to ethical criticism; four short essays

LEC
The concept of time is one of the most examined, yet least theorized, concepts in Africana Studies. While the field is saturated with historical studies and literary analyses that take up issues of cultural memory, both of which involve thinking about time, time itself is rarely the subject of sustained inquiry. This may be due to its abstractness as an idea and the level of analysis its conceptualization demands, or because time in the African American experience cannot be understood outside of the meaning of race, which itself is far from tangible. In this tutorial, \"Time and Blackness,\" we will explore how African American writers across a number of genres understand time. We will read texts of fiction as well as spiritual autobiographies, historical narratives, and sociological studies to understand how writers draw from—and create—paradigms of time to organize their work. The following questions will structure our investigation: What are the constituent elements of time in African American writing? How does race shape the ways a writer conceives of the experience of time? In examining writings across genres, is there something that we can call an identifiable African-American \"timescape?\"

REL 278 The Dynamics of Globalization: Society, Religion and the Environment (D)

Class Format: LAB 278/ENVI 278

This course offers a 6-credit course on the social, cultural, and environmental dynamics of globalization and their consequences for the nature and place of religion. Rather than argue for or against globalization, we first examine the nature of this new configuration and its relation to (post)modernity, asking questions such as: What are the cultural and social dynamics of globalization? What are the impacts of globalization on the state and the political practices that take place in the global world? What are its environmental consequences? We then shift to examining the role of religion, arguing that its renewed relevance is a function of the socio-cultural transformations that globalization brings about, particularly the loss of community and the increasing atomization of individuals. We conclude by examining some of the perspectives created by the new religious expressions that attempt to respond to this situation, from personal spiritual quests as manifested in interest in Buddhism, ecology or mountain climbing, to various forms of fundamentalism, such as Evangelicalism, the fastest growing

REL 290T Explorations of the Afterlife (W)
From Heaven to Hell, Valhalla to Hades, the Fields of Aaru to the Land of Yellow Springs, all cultures have generated images of other worlds that lie beyond death. By considering examples from a range of different cultures, this tutorial will guide students on an exploration of the topographies of these shadow-lands. In an effort to map the continuities and discontinuities between these visions of the hereafter, we will consider them as reflections of existing social hierarchies, examining their underlying assumptions about punishment and redemption, family, and ethics. Along the way, we will discover culturally specific notions of death and mourning, attitudes towards the bodies of the dead, and controversies about the nature of the soul. Texts will include selections from primary works in translation, such as Virgil’s Aeneid, Dante’s Inferno, and The Tibetan Book of the Dead, as well as selections from secondary literature, including Teiser’s The Scripture on the Ten Kings, Gauchet’s The Disenchantment of the World, and Bremmer’s The Rise and Fall of the Afterlife.
Class Format: tutorial
Extra Info: may not be taken on a pass/fail basis
Prerequisites: none
Enrollment Preferences: Religion and Asian Studies majors
Enrollment Limit: 10
Expected Class Size: 10
Distributional Requirements: Division 2
Writing Intensive
REL 300 Dialectics and the Archaeology of Knowledge
How might one perform a philosophical study of history? What does it mean to think dialectically in one era, and how does the concept of a "false universal" come into play? This course will focus on historically important formulations of the argument and then move on to contemporary versions of it. We will explore the idea that history is not just a linear progression, but rather a series of complex and interconnected events. This course will address these questions and provide students with methods for exploring the historical dimension of religion. It will focus on two approaches to the philosophy of history inspired by Kant and Hegel. This course will introduce students to these intertwined bodies of theory, which promise to do nothing less than expose the very foundations of knowledge and transform the study of history from the stringing together of events into a philosophical enterprise. Thinkers to be considered may include: Kant, Hegel, Marx, Engels, Nietzsche, Foucault, Agamben, and Jameson.

Class Format: seminar
Requirements/Evaluation: regular participation and attendance, short writing assignments, class presentations, 10- to 15-page final paper
Enrollment Preferences: none
Enrollment Limit: 15
Expected Class Size: 15
Distributional Requirements: Division 2

Not Offered Academic Year 2017
SEM Instructor: Jason Josephson

REL 301 Measuring Truth
Crosslistings: MATH 300/HSCE 300/REL 301/SOC 300
We will examine specific case studies of measuring truth—the emergence of science and technology in American colleges and universities; the prevalence of scientific methods in social science and humanities; the ways alternative methodologies in the humanities critique and historicize scientific approaches to reaching truth; and the possible tension between scientific modes of thinking and the aims of the liberal arts.
Class Format: seminar
Requirements/Evaluation: five 2-page papers and a final 15-page paper
Extra Info: may not be taken on a pass/fail basis
Prerequisites: any 200-level course
Enrollment Preferences: At the discretion of the instructors
Enrollment Limit: 20
Expected Class Size: 20
Distribution Notes: meets Division 3 requirement if registration under MATH; meets division 2 if registration under AFR, HSCIREL or SOC
Distributional Requirements: Division 3

REL 302T Philosophy of Religion (W)
Crosslistings: PHIL 281/REL 302
Our goal in this course is to try to determine how far reason can justify belief in God. We will spend at least half of the semester examining the best-known philosophical arguments for and against the existence of God (including the ontological argument, the cosmological argument, the teleological argument, the argument from religious experience, the argument from evil, and the argument from religious disagreement). For each one, we will first look at historically important formulations of the argument and then turn to contemporary reformulations. Our aim will be to identify and then evaluate the strongest version of each argument. After working through these arguments, we will reflect more generally on the proper roles of reason and faith in justifying religious belief. In the final section of the course, we will examine the relationship between God and morality. Authors will include Plato, Anselm, Aquinas, Pascal, Paley, Hume, Kant, Kierkegaard, Freud, Marx, and several contemporary philosophers.
Class Format: tutorial; students meet with instructor in pairs for an hour each week; emphasis will be placed on developing skills in reading, interpretation and oral argument as well as critical reasoning and writing.
Requirements/Evaluation: each student will write a 5- to 6-page paper every other week and comment on his or her tutorial partner's paper in alternate weeks.
Extra Info: may not be taken on a pass/fail basis
Prerequisites: one PHIL course or permission of instructor
Enrollment Preferences: current and prospective Philosophy majors
Enrollment Limit: 18
Expected Class Size: 18

REL 304 From Hermeneutics to Post-Coloniality and Beyond (D)
Crosslistings: REL 304/COMP 344
This course explores and critiques some of the resources offered by "Theory" for making sense of our contemporary situation, focusing on the nature of interpretation and its role in the construction of the self in a global world. We will start with Gadamer's hermeneutics, which offers a classical formulation of the philosophy of liberal arts education, stressing the importance of questioning one's prejudices. Although this approach offers important resources for understanding ourselves in a world of cultural differences, it also has limitations, which we explore through the works of Derrida, Foucault and Said. In this way, we question some of the notions central to understanding ourselves such as identity and difference, suggesting some of the difficulties in the ever more important yet problematic project of knowing oneself. We also suggest that representation is not innocent but always implicated in the world of power and its complexities, particularly within the colonial and postcolonial contexts explored by Said. We conclude with a critique of the constructivist paradigm central to this course done from the point of view of cognitive sciences and suggest that the future of "Theory" may well be in a dialogue with the emerging mind sciences. This course, which theorizes the possibilities of cross-cultural understanding, is part of the Exploring Diversity Initiative.
Class Format: lecture/discussion
Requirements/Evaluation: full attendance and participation and three essays (6 pages)
Prerequisites: some familiarity with philosophy and/or theory is recommended
Enrollment Limit: 18

REL 306 Feminist Approaches to Religion (D) (W)
Crosslistings: REL 306/WGSS 307
What does feminist theory have to offer the study of religion? How have participants in various religious traditions helped to produce and enact feminist frameworks in the New World? This course will have a long and often troubled history of interconnection. In this course, we will explore a range of feminist theoretical analyses that have either emerged out of particular religious contexts or have been applied to the study of religious traditions and practices. We shall consider how conflicts within feminism—especially those pertaining to issues of sexuality, race, class, nationality, ethnicity, and religious
REL 307 Thinking Gods: Cognitive Theories of Religion

Although it is still in its infancy, the so-called "cognitive turn" has already become one of the most exciting contemporary developments in the study of religion. During the past twenty years, scholars influenced by cognitive science have begun to formulate new models and challenge old assumptions about human religiousity and its relationship to the mind. In so doing, they have articulated theories about the evolutionary origins of religious concepts, reassessed the role of memory and of counterintuitive explanations in the perpetuation of religious ideas, and developed new concepts such as "theological incorrectness" and "systematic anthropomorphism." By examining the cutting-edge work produced by members of this movement on both sides of the Atlantic, this seminar for advanced students will trace the historical roots of the cognitive turn and introduce some of its most important recent products. Authors to be considered include Sigmund Freud, Ludwig Feuerbach, Jean-Pierre Dupuy, D. Jason Stone, Pascal Boyer, Veikko Anttonen, Scott Atran, Richard Dawkins, Dan Sperber, and Ilkka Pyykkäinen.

Class Format: Seminar
Requirements/Evaluation: Active participation, class presentations, short writing assignments, and a take-home final examination.

REL 309 Scriptures and Race Crosslistings:
REL 309/AFR 309/LATS 309

This course focuses on the relationships between constructions of race in the post-1492 American world and "Christian scriptures." The big questions of the course examine the ways that scriptures inform other historical constructions of power and politics in modern times, the making of, interpretation, and transformation of sacred texts. Both scriptures and race are conceptual constellations of human social imagination, and yet their conceptualization has often been embroiled in the hopes and traumas of everyday life in the Americas. How and why did these two terms come to have an relationship to each other? How and why do peoples engage "scripts"?

In what ways have "scripts" informed how peoples imagine themselves, their communities, and their relationship to religious and racial "others"? How did "scripts" and "race" inform each other in modern colonialisms and imperialisms? In this course, we will examine the ways that scriptures have been employed in order to understand and develop notions of race, and we will examine how ideas about and lived experiences of race have informed the concept of scriptures as well as practices of scriptural interpretation.

Class Format: Lecture/Discussion
Requirements/Evaluation: Evaluation based upon participation, short writing exercises, a 5- to 8-page take-home midterm essay, and a 10- to 15-page final essay.

REL 310 Womanist/Black Feminist Thought Crosslistings:
AFR 310/REL 310/WGS 310/AMST 309

This course explores the genealogy and development of black feminist and womanist thought. We will investigate the expansion of womanist thought from a theologically dominated discourse to a broader category of critical reflection associated more commonly with black feminism, analyze the relationship between womanism and black feminism, and review the historical interventions of black feminism. As critical reflections upon western norms of patriarchy, heterosexism, and racism, womanism and black feminism begin with the assumption that the experiences of women of color—particularly black women—are significant standpoints in modern western society. Through the examination of interdisciplinary and methodological diversity within these fields, students will be introduced to key figures including Alice Walker, Zora Neale Hurston, and Katie Cannon, and will engage materials that draw from multiple fields, including, but not limited to, literature, history, anthropology, and religious studies. Fulfilling the EDI requirement, this course will explore how womanism/black feminism can be a bridge for empathetic understanding of diverse experiences, and will examine the varied social, political, and historical contexts that led to the formulation of womanism/black feminism as a tool to critique power and privilege.

Class Format: Lecture/Discussion
Requirements/Evaluation: Evaluation will be based on class participation, three short response papers, and the completion of an original research paper or project.

REL 311 Black Ministerial Imaginations: Griots, Athletes, and Maestros Crosslistings:
AFR 311/REL 311

In one of the memorable lines from the classic Souls of Black Folk, W. E. B. Du Bois described the Black minister as "the most unique personality developed on U. S. soil." This course will draw from Du Bois's sociopsychological portrait of the minister to explore how the ministerial personality appears across a number of social arenas beyond the religious sphere, including politics, sports, and music. We will investigate the complex social dynamics of race and gender surrounding Black ministerial expressions, such as Barack Obama's campaign for the U.S. presidency; Mike Singletary's career as a Hall of Fame linebacker for the Chicago Bears, motivational speaker, and Head Coach for the San Francisco 49ers; and John Coltrane's "A Love Supreme."

Class Format: Discussion

REL 314 Racial and Religious Mixture (D) (W) Crosslistings:
LATS 427/REL 314/AMST 327/AFR 427

The very term "mixture" implies that two or more distinct substances have been brought together. Distinctions of race and religion are social fictions; yet, the "lived ramifications of these social fictions involve tense struggles over the boundaries of racial and religious communities. These boundaries are not just ideas but also practices. In the history of the Americas, mixed racial and religious identities and experiences have more often been the result of violent encounters than romantic encounters. Still, the romanticization of the New World as a geography that makes such mixtures possible reaches back to the earliest days of Spanish conquest in the Americas. This course critically considers varying ways that racial and religious mixtures have been imagined, defined, challenged, negotiated, and survived under imaginative and legal rubrics of mestizaje, creolization, transculturation, passing, syncretism, religious hybridity, and mixed race studies. Focusing on how different peoples have critically theorized and made meaning about and out of racial and religious differences and interconnections, this EDI course investigates the ways that knowledge about mixture and difference have been critically constructed and transformed.

Class Format: Seminar

REL 317 Disenchantment, Modernity, and the Death of God
A great many theorists have argued that the defining feature of modernity is
the separation of the supernatural. They often argue that magic, religion,
and some sense of cosmic significance have been replaced by technology,
calculation, and bureaucratic protocol. This course will be driven by one
question: Are they right? Put differently: Do cities and computers generate
their own type of magic? Is God in fact dead? Religion clearly has not
vanished, but has it become less authentic? Does the dissolution of Christian
ethics produce nihilism or the positive revaluation of values? Does capitalism
turn everything into a commodity or does it commercialize wonder? Does
modernity mean alienation from nature, a withering of social community, the
end of art, and a rejection of history, or is it humankind's liberation from the
dogmas of the past? Will science and reason ultimately wipe away belief
in ghosts, angels, and demons, or will we always be haunted?
Students will read the major theorists of secularization, modernization,
and disenchantment and will conduct independent research projects on various
modern attempts to revive magic and re-enchant the world. Students will be
instructed in the use of physical and digital archives for original primary text
research. Possible topics for student exploration are vast and include: occult
sciences and new religious movements such as the Golden Dawn,
Spiritualism, Theosophy, Voodoo, Neo-paganism, Wicca; and various artistic
movements including Symbolism and Surrealism—all of which promised to
supply antidotes to the meaninglessness of the modern age. Authors to be
read may include: Nietzsche, Novalis, Comte, Max Weber, Tonnyes, Walter
Benjamin, Bernard Siegle.

Class Format: seminar

Requirements/Evaluation: regular attendance and participation, short weekly
reflection papers, and a 15- to 20-page research paper
Extra Info: may not be taken on a pass/fail basis
Prerequisites: not open to first year students

REL 326(S) Queer Temporalities (W)
Crosslistings: REL 326/LATS 426/WGSS 326/COMP 326
Birth, childhood, adolescence, college, adulthood, career, marriage, family,
mid-life, old age, death, afterlife. How are all these facets of human
imagined as stages in time, as axes on certain progressive lines that delineate
human social relations? How do we experience and represent time, and what
factors might account for both our experiences and our representations? What
are some of the ways that people experience and make the passing of time?
What are some of the different ways that people have made sense of time and
themselves in time? How have our conceptions of time and our narrations of
time, history, space, and location got negotiated? In this course, drawing from within
the rich framework of queer theory (including theorists such as Gloria Anzaldúa,
Elizabeth Freeman, J. Halberstam, and José Esteban Muñoz) we will examine
some non-linear, non-normative, and interruptive approaches to making sense
of time, space and self within time.

Class Format: tutorial

Requirements/Evaluation: evaluation will be based on class attendance,
analytical essays, responses, and revised essays
Extra Info: pairs will meet with the instructor for one hour each week. Almost
every week, one student from the pair will write a 5-page analysis of the
week's reading. The other student will respond orally with a 2-page response
to their partner's paper.
Pairs will also prepare a mid-term synthesis, students will revise two of their 5-
page analytical papers: one from the first half of the semester, one from the
second half due at the end of the semester.
May not be taken pass/fail or fifth course

REL 327 Theory after Postmodernity: New Materialisms and Realism
Crosslistings: REL 327/COMP 327
Since the 1970s much of the academy has labored under a particular form
of linguistic skepticism (often called postmodernism or poststructuralism) that is
directed at the destruction of stable conceptions of subjectivity and meaning. It
is often said that everything is a text and that all knowledge is power. But just
as a typewriter has given way to the computer and disco to dubstep, as we
exit postmodernism new philosophies are appearing on the conceptual horizon.
This course will lay out this challenge to postmodernity by exploring the work
of cutting edge theorists in French and American movements known as new
materialism, speculative realism, and actor-network theory. Often drawing on
work in ecology, feminism, science studies, neuroscience and complexity
theory, these thinkers aim to reclaim knowledge of the real world, to suture the
separation between the sciences and the humanities, and to overturn what
they see as the dualism between matter (as dead or inert) and mind (as the
locus of life and agency). By so doing, they claim to empower the object-world

483
and dethrone humanity from the center of philosophy. Thinkers to be discussed, this course is intended for students of any major who wish to study critical, political, or philosophical theory.

REL 340(S) African Diaspora Religions in the Americas and the Caribbean
Classlistings: AFR 340/GBST 340/REL 340
Over the last century, historians, social scientists, and religionists have labored to discover the meaning of African dispersal beyond the African continent and its accompanying spiritual lineages. What did it mean to move from the African continent (as opposed to the Australian continent, for example)? What theories of encounter sufficiently adjudicate the religious cultures of African dispersed persons in North America, South America, and the Caribbean? What are the cross-disciplinary methodologies that scholars utilize to understand African religious cultures in the Western hemisphere? Firstly, this course will consider a brief historiography of African Religious Studies. This background will inform the second and primary objective of the course: privileging knowledge, place, and performance as central lenses for thematizing and exploring West and Central African religious traditions housed in the Americas. We will cover diverse African diasporic religious traditions including Conjure, New Orleans Voodoo, Spiritual Baptist, Winti, and Yoruba (Candomblé, IFA, Lucumi, and “Orisha-Vodu”). We will also explore other African diasporic religious sensibilities that transcend regional and institutional boundaries.

Class Format: seminar
Requirements/Evaluation: evaluation will be based on class participation, discussion leadership, two scholarly journal entries, and a final seminar paper of 18-20 pages (which will require working in stages on a proposal, an 8-page draft, and a 15-page final)
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none
Enrollment Preferences: Africana Studies concentrators
Enrollment Limit: 15
Expected Class Size: 15

REL 346 Islam and Anthropology
Classlistings: ANTH 346/REL 346/ARAB 280/ASST 346
If anthropology has helped to define Islam in global thought, Islam has returned the favor, holding a critical mirror to the anthropological endeavor perhaps more than any other traditional “object” of study. This course examines anthropological studies of Islam and considers what they teach us both about Islam and about anthropology. We begin with foundational social theorists whose studies of religious phenomena helped give rise to the field of anthropology of religion. We then survey influential efforts to construct “ideal-type” models of Muslim society based on anthropological and historical knowledge, alongside efforts to critique, historicize, and redirect the model-building project (notably by Talal Asad and Edward Said). The second half of the course is devoted to ethnographies that explore, from a variety of perspectives and in several regions (Morocco, India, Egypt, Syria), questions of human agency, hierarchy and resistance, and Islam as discursive resource, ethical project, and embodied community.

Class Format: seminar
Requirements/Evaluation: weekly postings, one 5-page paper, one 10-page paper, discussion leading
Prerequisites: none
Enrollment Preferences: juniors and seniors, Anthropology, Sociology or Religion majors
Enrollment Limit: 19

Distributional Requirements: Division 2

REL 350(S) Max Weber & Critical Theory or Rationalization & Its Discontents
Classlistings: REL 350/SOC 350/COMP 349
We live in an age characterized by unprecedented technological and scientific progress—we have unraveled the building blocks of life, witnessed the birth of stars at the edge of the galaxy, and harnessed the power of the atom—and yet modern life often appears fundamentally meaningless and lacking in ultimate value. We work, we eat, we excrete, we die, perhaps in the interim shuffling paperwork, sucking up to our boss, and asking ourselves, “What kind of dining set defines me as a person?” Few thinkers have explored the roots of this modern ennui as thoroughly as Max Weber, a German sociologist often regarded as the single most important social theorist of the twentieth century. Weber wanted to know why it was European civilization in particular that gave birth to the grand trifecta of rationality, science, and capitalism and how we have become enslaved by the very things that were supposed to have set us free. Weber’s key innovation was to trace the grand trajectory of Western “rationalization”—the historical attempt to produce a world in which “one can, in principle, master all things by calculation.” Further, he demonstrated how this rationalization produced not just mastery over nature, but also the “disenchantment of the world” — value fragmentation, hyper-specialization, bureaucracy, and ultimately the “iron cage” of modernity. The first part of this course will follow Weber’s footsteps by studying his theory of rationalization and by exploring it in different social spheres, such as the economy, the law, the professions, and the secularization of religion. The second half of the course will look at Weber’s legacy in Critical Theory. It will show how thinkers such as Theodor Adorno, Georges Bataille, Jürgen Habermas, Max Horkeimer, Michael Löwy, and Alasdair MacIntyre suggested various lines of flight from the “iron cage” of modernity.

Class Format: seminar
Requirements/Evaluation: attendance and participation, weekly critical reflections, 5- to 8-page midterm paper, 10- to 15-page final essay
Prerequisites: none
Enrollment Preferences: preference will be given to REL, ANSO and COMP majors
Enrollment Limit: 15
Expected Class Size: 15

What role does ancient history play in modern societies? What is the role of myths and fables in the creation of national identities? This course will address
Students entering the major program at the 200-level may, with the permission of the Department, choose as part of their major program, one course in Art History, History, Philosophy, Comparative Literature or other subjects that relate to and broaden their study of French. Students entering the major program at a very advanced level may, in some cases and with the permission of the Department, include two such courses in their major program.

Working with the major advisor, the student will formulate a curricular plan that will ensure balance and coherence in courses taken. Such balance and coherence will be based on the above areas of literary and cultural investigation. Prospective majors should discuss their program with the major advisor by the end of their sophomore year. This is especially imperative for students who are planning to spend a part or all of their junior year in France.

Inasmuch as all courses in French assume the active participation of each student in discussions conducted in the foreign language, regular attendance at class meetings is expected.

MAJOR—FRENCH STUDIES

The major in French Studies is an interdisciplinary program that provides students with the opportunity to acquire skills and knowledge embracing the cultural, historical, social, and political heritage of France and the Francophone world. The program allows for an individualized course of study involving work in several departments and the opportunity to study abroad.

Students electing the French Studies major must be in good standing with the French Studies faculty advisor during their sophomore year. At that time, they should submit a feasibility plan that articulates their projected program.

The French Studies major consists of ten courses satisfying the following requirements:

- at least three courses in French language and/or literature above the French 102 level;
- the senior seminar during the student’s final year at the College;

Electives: The remaining courses needed to complete the major must be drawn from at least three different departments and relate primarily to an aspect of the culture, history, society, and politics of France and the Francophone world. These courses will be selected in consultation with members of the Department of Romance Languages. Appropriate electives might include:

- History 331 The French and Habsburg Worlds
- Religion 301 Psychology of Religion
- All courses in French literature, culture and language above the 103 level

THE DEGREE WITH HONORS IN FRENCH

Students majoring in French may apply to be admitted to the Honors Program in French upon demonstrating the following: (1) fluency of spoken and written language; (2) potential for successful independent research, as demonstrated by strong performance in advanced-level coursework; (3) interest and motivation; and (4) overall quality and feasibility of the proposal.

By May 15th of their junior year, candidates will have found a thesis advisor, and given the Department a three- to five-page preliminary bibliography. (In some cases, and upon consultation with the Department, candidates will have the option to choose a second reader in addition to their primary advisor; for example, when the thesis is interdisciplinary enough in nature that it requires the expertise of an additional reader). This proposal will be discussed by the Department; by June 1st, the candidate will be informed whether he/she can proceed with the thesis, and if so, what changes need to be made to the focus and scope of the project. The summer before the senior year will be spent compiling a more detailed bibliography and reading.

Upon their return to Williams, candidates will devote to their theses two semesters of independent study (beyond the nine courses required for the major), and the winter study period of their senior year (493-W31-W32). The thesis will be written in French and will usually not be shorter than fifty pages. By the end of the Fall semester, students will normally have a clear outline of the project, have done substantial research, and produced the draft of at least the first half of the project. During January this draft will be suitably rewritten and edited with a view to a final version, while the candidates will also begin work on remaining chapters.

Candidates will submit what they have written to the department on the last day of Winter Study.

On the Tuesday of the first week of the spring semester candidates will make a presentation of the project at a departmental colloquium in French. The thesis will be promptly discussed and evaluated to determine whether or not the student should continue in the honors program. The second semester of independent thesis work will be spent writing more chapters, as well as revising, rewriting, and polishing the project where necessary. The completed thesis in its final form will be due on April 25th. At the end of the Spring term, the student will present and defend the final project before members of the Department and others by invitation. The grade will be awarded once members of the Department have consulted after the defense.

THE CERTIFICATE IN FRENCH

The Certificate in French Language and Cultures consists of a sequence of seven courses for which the student must earn a cumulative grade average of 3 or higher. In addition, the student must take a proficiency test and achieve a score of "Advanced." The test will be administered by the department once a year during the month of April to all students desirous of obtaining the
Certificate. Those interested should express their intent to the chair of the department by March 1 or earlier. For students with no prior study of French, the course sequence will consist of RLFR 101-102, RLFR 103, RLFR 104, and three additional courses, with at least one of these at the 200-level or higher taken at Williams. For students starting the sequence at RLFR 103, five additional courses must be taken, including at least three French courses at the 200-level or higher. For all students starting at the French 103 level or higher, two electives may be taken in other departments: one elective should be in French or Francophone culture (art, literature, theatre, music) and the other in French or Francophone civilization (history, political science).

See French Studies Major description above for list of possible electives in other departments.

PLACEMENT A placement test in French is administered at Williams at the opening of the fall semester. Incoming first-year students who register for any French course above the 101-102 level must take this test, regardless of their previous preparation.

STUDY ABROAD French majors are strongly advised to complete part of the requirements for the major by studying abroad either during the academic year or the summer. Most American study abroad programs require that students have completed a fifth-semester, college-level French course (French 105, for example) before they go abroad. A special affiliation with the Hamilton Junior Year in France program enables Williams students (who have completed 105) to participate in a comprehensive academic and cultural experience in French-speaking environment. Credit for up to four courses towards the major can be granted at the discretion of the Department: up to 4 major credits for a semester or full year abroad. The final assignment of credit will be authorized in consultation with the Department’s major advisor once the student has returned to Williams. Such credits can only be determined by review of course format, course materials, and evidence of satisfactory academic performance. Students interested in studying abroad need to consult with faculty members in French in the second semester of their first year. Early planning is essential. Because the academic quality of certain programs of study in France may well be beneath the pedagogical standards normally associated with a Williams education, students will receive major credit for only those programs recommended by the Department. Please consult a faculty member to find out which programs are acceptable. Normally, the Department does not administer proficiency exams (for study abroad) to any student who has not completed a French course at Williams. You can find general study away guidelines for French here.

RLFR 101(F) Introduction to French Language and Francophone Cultures This year-long course offers a complete introduction to the French language and is designed to help you become fully conversant in French by focusing on four fundamental language skills: listening, speaking, reading, and writing. Through daily practice, class activities, interactive discussion, listening exercises, written work, reading assignments, and active engagement with music, video, and film, you will quickly gain confidence and increasing facility with your abilities to speak and understand both spoken and written French. In addition, our study of grammar, vocabulary, and communication skills will be organized around an engaging and dynamic introduction to a variety of French-speaking cultures around the world, from France and Belgium, to Québec and Martinique, to Sénégal and Morocco. Conducted in French.

Class Format: The class meets five hours a week
Requirements/Evaluation: evaluation in both semester-long courses will be based on active class participation, workbook exercises and compositions, chapter tests, midterms, and final exams
Extra Info: students registered for RLFR 101-102 are required to attend and pass the sustaining program during the winter study period; credit granted only if both semesters (RLFR 101 and 102) are taken not available for the fifth course option
Prerequisites: none; for students who have never formally studied French; students who have previously studied French must take the French Placement Test during First Days
Enrollment Preferences: first- and second-year students and those with compelling justification for admission
Enrollment Limit: 20
Expected Class Size: 20
Distributional Requirements: Division 1

RLFR 105(F) Advanced French: Advanced Studies in French Language and Francophone Cultures This course is based on the concept that one can read images in any art form (portraits, landscapes, etc...) and pair them with passages taken from French fiction or poetry, comparing them, exploring their meaning, developing a wide range of vocabulary. How does Maupassant’s prose compare to a landscape painted by Corot, for instance? Students will read creatively and in depth, express their ideas orally and in writing, and listen to interviews of artists and writers and if applicable extend the art form to film. As for grammar, we will build on what you already know through an in-depth advanced review of grammar structures. Conducted in French.

Class Format: class meets three hours a week plus a fourth conference hour with French teaching associates
Requirements/Evaluation: class participation, short papers, oral class presentations, quizzes and exams
Extra Info: not available for the fifth course option
Prerequisites: RLFR 103; this course is primarily for continuing RLFR 103 students; students who have placed at the advanced intermediate level on the placement exam should register for RLFR 105
Enrollment Preferences: continuing 103 students and potential French majors
Enrollment Limit: 20
Expected Class Size: 20
Dept. Notes: for students who have successfully completing RLFR 104, students may register for RLFR 201
Distributional Requirements: Division 1

RLFR 104(S) Intermediate French II: Advanced Intermediate Studies in French As a continuation of French 103, this course “Images vivantes dans les arts et la littérature” is primarily conceived to enable students to express themselves with fluency and accuracy in spoken and written French. The course is based on the concept that one can read images in any art form (portraits, landscapes, etc...) and pair them with passages taken from French fiction or poetry, comparing them, exploring their meaning, developing a wide range of vocabulary. How does Maupassant’s prose compare to a landscape painted by Corot, for instance? Students will read creatively and in depth, express their ideas orally and in writing, and listen to interviews of artists and writers and if applicable extend the art form to film. As for grammar, we will build on what you already know through an in-depth advanced review of grammar structures. Conducted in French.

From the Gallic Wars against Caesar (during the first century BC) to France's controversial role in the "War on Terror" (at the opening of the twenty-first century), the French literary tradition is rich in texts that bear witness to war and speak out against its monstrous inhumanity. While war literature in France can be traced back to ancient and medieval texts on Vercingétorix, Charlemagne, William the Conqueror, and Joan of Arc, this course will focus specifically on literary representations of war during the nineteenth- and twentieth-centuries, from the Napoleonic Wars, to the First and Second World Wars, to the Algerian and Cold Wars, and the "War on Terror." Discussions will examine the impact of war on soldiers and civilians, patriotism and pacifism, history and memory; the implications of war as invasion and conquest, occupation and resistance, victory and defeat; the relationship of war to gender, sexuality, and ethnicity; and the role of war in colonialism and genocide. Readings to include novels, short stories, and poems by Balzac, Stendhal, Hugo, Rimbaud, Daudet, Maupassant, Zola, Cocteau, Wiesels, Duras, Camus, and Fanon. Films to include works by Resnais, Renoir, Carion, Jeunet, Malle, Angelo, Pontecorvo, and Duras. Conducted in French.

Class Format: seminar

Requirements/Evaluation: active class participation, two short papers, an oral presentation, and a final paper

Prerequisites: exceptional performance in RLFR 105; strong performance in RLFR 106 or 107; successful performance in RLFR 201 or 203; or by French placement exam; or by permission of instructor

RLFR 204 Intro to French Literature: French Drama from Classicism to the Theatre of the Absurd

When can we learn about French society through its theater? This course proposes to examine the evolution of French plays from the 17th to the 20th century within their political, social and cultural contexts. Readings plays by Molière, Beaumarchais, Musset, Anouilh, Becket and Ionesco will allow students to see how the theater as a genre engages the public through self-reflection and analysis. Readings will be complemented by theoretical texts and film versions of the plays.

Questions regarding the nature of the performance itself (dramatic structure), the role of space and the role of language, the importance of acting and the public's involvement will be examined and will evolve, into a mini staging of our own.

Class Format: seminar

Requirements/Evaluation: one short response paper weekly; 2 short essays and one final papers

Prerequisites: RLFR 105 or permission of instructor

Enrollment Preferences: open to those who have completed RLFR 105, 107 or a 200 level course; if overenrolled, preference will be given to French majors

Distributional Requirements:

Not Offered Academic Year 2017

RLFR 206 Outsiders in French and Francophone Film: Cinematic Adaptations of Literary Texts (D)

In this course students will examine the figure of the outsider (queer, black, woman, intruder, Ioner) in several French and Francophone literary texts and their film adaptations and will explore questions such as: how are such outsiders translated onto the screen? To what extent does outsider status help maintain, challenge or reveal hegemonic discourse? This course fulfills the...
college Exploring Diversity requirement because its asks in what ways do non-Western and Western filmmakers (re)cast power and privilege through the figure of the outsider in their film adaptations (of Western canonical texts). Students will read original French and Francophone literary texts and apply theories of film adaptation to their analyses.

Class Format: seminar
Requirements/Evaluation: one 6-page paper, first draft, journaling on film elements, presentation.
Extra Info: not available for the fifth course option
Prerequisites: RLFR 105, 106, or 107, and permission of instructor
Enrollment Preferences: French majors and certificate students, those who have completed RLFR 105, 106, or 107, or those who have placed into this level from the French Placement Test

RLFR 224 Sexuality and Seduction in Nineteenth and Twentieth-Century France (D)
Crosslistings: RLFR 224/WGSS 224
In 1857, both Flaubert’s Madame Bovary and Baudelaire’s Les Fleurs du mal were put on trial for sexual indenecy and “crimes against public morality.” In 1868, Le Figaro attacked Zola’s novel Thérèse Raquin as “putrid literature” for its depiction of adultery, murder, and scandalous sexuality in nineteenth-century Paris. A century later, Gide, Colette, and Duras continued to shock French readers with their extraordinary novels on male and female homosexuality, inter-generational lovers, and bi-racial relationships. In this course, we will examine a wide range of issues on eroticism and sexuality in nineteenth- and twentieth-century French literature, including marriage and adultery, seduction and desire, love and betrayal, prostitution and fetishism, gay and lesbian identity, cross-dressing and gender representation, exoticism and colonial(s)’ exploitation. Readings to include novels, shorts stories, and poems by Chateaubriand, Constant, Duras, Balzac, Flaubert, Baudelaire, Zola, Maupassant, Barby d’Aurevilly, Gide, Proust, Colette, Duras, and Guibert. Conducted in French.

Class Format: seminar
Requirements/Evaluation: active class participation, two short papers, an oral presentation, and a final paper
Prerequisites: RLFR 106 or 107; another 200-level course such as RLFR 201, 202, 203; or by placement test; or by permission of instructor
Enrollment Preferences: French majors and certificate students; Women’s, Gender and Sexuality Studies majors; Comparative Literature majors and those with compelling justification for admission

RLFR 230 Introduction to French Stylistics: The Art of Pastiche (W)
Generally speaking, pasticheurs are derivative artists. Yet many of France’s most original authors were agile pasticheurs, among them La Bruyère, Flaubert, and the experimental writers of the Oulipo movement. What might the art of pastiche suggest about the relationship between imitation and creation, tradition and innovation, and past and present? Discussion of such questions will be grounded in the study of short texts by Rimbaud (as Villon), Zaimanski (as Madame de Sévigné), Janin (as Diderot), Flaubert (as Chateaubriand), and Queneau (as Proust). Analysis and explication of pastiches will strengthen students’ technical grasp of French. In the second half of the semester, students will apply their rhetorical, syntactical, and stylistic knowledge through weekly pastiche exercises, submitted as a final portfolio at semester’s end. Conducted in French.

Class Format: seminar
Requirements/Evaluation: active class participation, individual meetings, biweekly postings, 3 compositions (2 drafts each) and final portfolio
Prerequisites: RLFR 105-106 or examination placement
Enrollment Preferences: French majors and those completing a French Certificate

SEM Section: 01 MW 11:00 AM 12:15 PM Instructor: Annelle Curulla

RLFR 260 Reading Comics from the French-Speaking World
Crosslistings: RLFR 260/COMP 260
From political cartoons and satire of the 19th century to contemporary graphic novels, the bande dessinée has a long history in the French-speaking world. We will read early political cartoons, classics such as Asterix and Tintin, and contemporary BD from France, Québec, Côte d’Ivoire, Morocco, Rwanda, and Guadeloupe to analyze how they tackle subjects such as nation, empire, sexuality, biography, war and human rights. We will pay attention to the visual form and critical theory of the genre. Conducted in French.

Class Format: seminar
Requirements/Evaluation: weekly response papers, 5-page paper, graphic-form paper, final research project
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: RLFR 201, 202, or 203, or by permission of instructor
Enrollment Preferences: French majors and certificate students, Comparative Literature majors
Enrollment Limit: 20
Expected Class Size: 15

RLFR 261(F) Haitian and French Caribbean Literatures and Films (D)
Crosslistings: RLFR 261/AFR 261/COMP 283
This course focuses on Haitian and Francophone Caribbean literature and film as critical interventions that bring into focus slavery, identity, imperialism, culture, and (non) sovereignty.

Class Format: seminar
Requirements/Evaluation: in-class discussions, journaling, steps towards final project, final project and presentation
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: French majors, French certificate, Africana and Comparative Literature students
Enrollment Preferences: 105 and above, French majors, French certificate, Africana and Comparative Literature students
Enrollment Limit: 15
Expected Class Size: 10
Distribution Notes: meets Division 1 requirement if registration is under RLFR or COMP; meets Division 2 requirement if registration is under AFR
Distributional Requirements:
RLFR 309 Contemporary Short Stories from North Africa: Fast Cars, Movies, Money, Love and War

Crosslistings: RLFR 309/AFR 307

Today the countries of North Africa are experiencing rapid social change. Rap music can be heard spilling out of windows while television sets broadcast a call to prayer. In the market place, those selling their goods compete to be heard over the ringing of cell-phones. Old and new exist side by side, albeit sometimes very uncomfortably. During the past decade, literature has emerged in both French and Arabic examining the effects of globalization: unequal modernization, unemployment, cultural change and cultural resistance. In this course, we will read short stories that address these issues as well as analyze film texts and Moroccan, Algerian and Tunisian newspapers on the web in order to explore contemporary transformations of life in North Africa. Readings by Maissa Bey, Abdelfattah Kilito, Zeina Tabi, Mohamed Zafzaf, Ahmed Bouzou, Soumaya Zahi and Abdelhak Serhane among others. Conducted in French.

Class Format: lecture/discussion

Requirements/Evaluation: active class participation, reading journal, two short papers, an oral presentation and a final paper

Prerequisites: RLFR 201, 202 or 203 or permission of instructor

Enrollment Preferences: French majors and those with compelling justification for admission

Enrollment Limit: 20

Expected Class Size: 20

Distribution Notes: meets Division 1 requirement if registration is under RLFR; meets Division 2 requirement if registration is under AFR

Distributional Requirements: Division 1

Other Attributes: ARAB

LEC Instructor: Katarzyna Pieprzak

RLFR 312 Francophone Islands (D)

Crosslistings: RLFR 312/COMP 312/AFR 312

Utopia, paradise, shipwreck, abandonment, exile, death. Man’s fascination and obsession with the island as place of discovery, beauty and imprisonment. How does the island become an agent in discussions of gender, race, poverty and greed, and exposing urban isolation and cultural alienation in modern France? What role does the island play in the novel as setting for deviant experiences, or as an idyllic escape from the pressures of urban life? This course will examine the role of the island as a timeless and multi-texured setting for French literature, in the work of writers from seveneenth to twentieth century. We will explore the symbolic signification of islands in the French literary imagination, and their focus on adversity and modernity. In a century dominated by the devastation of two World Wars, the atrocities of colonial empire, and massive social and political transformation, the novel both documented and interrogated France’s engagement with race and ethnicity, gender and sexuality, colonialism and immigration. Within this historical context, we will discuss the role of the novel in confronting war and disease, challenging poverty and greed, and exposing urban isolation and cultural alienation in twentieth-century France. Readings to include novels by Colette, Genet, Camus, Duras, Erraou, Guibert, Begag. Lectures to include discussions of Gide, Proust, Sartre, Beauvoir, Cixous, Foucault, Jellou, Djebar, Films to include works by Fassbind, Anniaud, Loret, Ducastel, Martinou, Téchiné, Cherat. Conducted in French. 

Class Format: seminar

Requirements/Evaluation: active class participation, midterm exam and two to three papers

Prerequisites: a 200-level course; or by placement test; or permission of instructor

Enrollment Preferences: French majors and certificate students; Comparative Literature majors; and those with compelling justification for admission

RLFR 316 Paris on Fire: Incendiary Voices from the City of Light (1830-2005)

Crosslistings: RLFR 316/WGSS 315

During the 1830s, Balzac described Paris as a "surprising assemblage of movements, machines, and ideas, a city of a hundred thousand novels, the head of the world," but also characterized the French capital as a "land of contrasts." a "monstrous wonder." a "moral sewer." Similarly, writers from Hugo to Zola have simultaneously celebrated Parisian elegance and condemned the appalling misery of Paris's urban poor. Since 1869, Paris has been fêted as the "City of Light" for its Enlightenment legacy, its Eiffel Tower modernity, and its luminous cultural energy, captured in countless paintings, photographs, and film. However, Paris is also the historical site of revolution, resistance, and riots. From revolutionary revolt (1830, 1848, 1871), to wartime resistance (1870, 1914-18, 1940-44), to reformist and radical movements (1888 and 2005), Paris has repetitively sparked with incendiary passion and political protest. As fires raged during the riots in 2005, many heard the echo of Hitler’s ominous 1944 question, "Is Paris burning?" and asked: why was Paris burning again at the dawn of the twenty-first century? To answer this question, we will examine the social, political, and literary landscape of Paris during the nineteenth and twentieth centuries, from urbanization and modernization, to occupation and liberation, to immigration and globalization. Readings to include poetry, short stories, and novels by Hugo, Balzac, Baudelaire, Maupassant, Verne, Zola, Apollinaire, Colette, Duras, Perek, Rochefort, and Cherat. Films to include works by Clair, Truffaut, Godard, Minnelli, Clément, Lelouch, Luhrmann, Kassovitz, Besson, and Jeunet. Conducted in French.

Class Format: seminar

Requirements/Evaluation: active class participation, two short papers, an oral presentation, and a final paper

Prerequisites: RLFR 201, or 202, or 203; or another RLFR 200-level course; or permission of instructor.

RLFR 318(F) Twentieth-Century French Novel: From Adversity to Modernity

Crosslistings: RLFR 318/COMP 318

In his futurist novel París in the Twentieth Century (1863), Jules Verne envisions an era of technological superiority, complete with hydrogen cars and high-speed trains, televisions and skyscrapers, computers and the internet. But in Verne's vision of modernity, technological sophistication gives way to intellectual stagnation and social indifference, in a world where poetry and literature have been abandoned in favor bureaucratic efficiency, mechanized surveillance, and the merciless pursuit of profit. To contest or confirm this dystopic vision, we will examine a broad range of twentieth-century novels and their focus on adversity and modernity. In a century dominated by the devastation of two World Wars, the atrocities of colonial empire, and massive social and political transformation, the novel both documented and interrogated France’s engagement with race and ethnicity, gender and sexuality, colonialism and immigration. Within this historical context, we will discuss the role of the novel in confronting war and disease, challenging poverty and greed, and exposing urban isolation and cultural alienation in twenty-first century France. Readings to include novels by Colette, Genet, Camus, Duras, Erraou, Guibert, Begag. Lectures to include discussions of Gide, Proust, Sartre, Beauvoir, Cixous, Foucault, Jellou, Djebar. Films to include works by Fassbind, Anniaud, Loret, Ducastel, Martinou, Téchiné, Cherat. Conducted in French.

RLFR 326(S) Molière in Performance

Like Shakespeare, the work of France’s greatest playwright is less a timeless monument than a living body perpetually in motion. This course offers a dual approach to the theater of Molière. The first half of the semester will focus on readings and analysis of printed plays in the context of the seventeenth century. The second half of the semester focuses on a collective project that combines student research and performance of a single play. Possible works: Les Femmes savantes, L'Ecole des femmes, L'Avare, Le Bourgeois gentilhomme. Throughout the semester, we will explore the dynamic relationships between tradition and innovation, elite and popular culture, actors and audience, past and present. Conducted in French.

Class Format: seminar

Requirements/Evaluation: active class participation, one presentation, two short papers, final performance project and accompanying final paper

Prerequisites: Freasts 201, 202, or 203, or by placement test, or by permission of instructor

Enrollment Preferences: French majors, Comparative Literature, Theater, and Women's, Gender and Sexuality Studies majors; and those with compelling justification for admission

Enrollment Limit: 20

Expected Class Size: 20

Not Offered Academic Year 2017

Spring 2017

SEM Section: 01 MR 02:35 PM 03:50 PM Instructor: Annelie Curulla
One of the most central concepts in Modern philosophy is that of the subject. At the outset, the subject is ontologically constituted within a Cartesian framework: the subject is a unified consciousness, constitutive of personal identity and endowed with universal moral and cognitive capacity. Thereby, this subject or self can additionally be understood as the product of a cultural process of self-identification and asserted in and through language. However, as investigated in the works of French philosophers Michel Foucault and Gilles Deleuze, this attempt to understand the subject as an ontological basis for self-understanding and self-states such as expressed for example in various kinds of identity politics, which in turn makes the subject understood as having multiple powers and agencies: hence, the subject understood as in many ways being subject to authority, power, and abuse.

This course proposes a joint reading of a selection of key texts of French philosophers Michel Foucault and Gilles Deleuze, this attempt in establishing the subject as an ontological basis for self-understanding such as expressed for example in various kinds of identity politics, which in turn makes the subject understood as having multiple powers and agencies: hence, the subject understood as in many ways being subject to authority, power, and abuse. This course proposes a joint reading of a selection of key texts of Foucault and Deleuze problematizing subjectivity and its processes in terms of subjectivation, subjectification, “asujetissement”, resistance and lines of flight, in order to investigate the possibilities of renegotiating the conditions of subjectivity in our post-subjective era, in both the individual and the collective sense.

Class Format: seminar
Requirements/Evaluation: three short papers (5-6 pages); one final 10-page essay; participation in discussions
Extra Info: may not be taken on a pass/fail basis
Prerequisites: at least one previous course in philosophy and/or Critical theory
Enrollment Preferences: Philosophy majors/Critical Theory majors
Enrollment Limit: 19
Expected Class Size: 15

RLFR 370 Displaying, Collecting and Preserving the Other: Museums and French Imperialism
Crosslistings: RLFR 370/AFR 370/MATH 370
This course will explore relationships between culture and imperialism in France by exploring how the colonial “Other” has been conceived, displayed and collected in French museums, world’s fairs and galleries from the 19th century to the present. Through readings in museum history and theory, we will explore the imperial histories of the Louvre and the Musée de l’Homme, the role of Parisian World’s Fairs in ordering the colonial world, French colonial photography and the creation a body of consumable subjects, and the discourse of collection and preservation in French colonial architecture. Drawing on museum theory, we will also critically examine contemporary Parisian museums such as the Musée du Quai Branly, the Institut du Monde Arabe and the Cité nationale de l’histoire de l’immigration. In addition to readings and discussions, the class will engage in a semester-long group project to design a new museum of French history and identity. The group will present all aspects of their museum including location, design, exhibit concept, narrative, and more. This course will be conducted in English. For students seeking RLFR credit, select readings will be in French, and written work will be in French.

Class Format: seminar
Requirements/Evaluation: active class participation, response papers, 2 short essays, and a final project
Prerequisites: for students taking the course as RLFR: RLFR 201 or above, or permission of instructor; for students taking the course as COMP or AFR: no prerequisites
Enrollment Preferences: French and Comparative Literature majors, and Africana Studies concentrators
Enrollment Limit: 15
Expected Class Size: 15

RLFR 410 Senior Seminar: Landscapes of Movement and Migration in French
How do migration and movement construct and disrupt landscapes of identity—home, city and nation—in the French-speaking world? How do migration and movement contribute to conditions of alienation, nostalgia and violence? This seminar explores some fundamental questions and asks us to think about how in an increasingly mobile and de-territorialized world, place is imagined, experienced and remembered. Over the course of the semester, we will examine theoretical texts on memory, space, identity and movement, and analyze literary and film narratives of migration that focus on: the immigration experience in France, the construction of an Atlantic identity between Africa, the Caribbean, Europe and the Americas, internal migration between the country and the city, clandestine migration between Africa and Europe, population displacement due to war, and the possibility of creating portable places of memory. Works by Nora, Benjamin, Deleuze, Barthes, Charef, Chamoiseau, Glissant, Dionne, Condé, Mimeysi, Poulin, Pineau, Sembene, and Binebine among others. Conducted in French.

Class Format: seminar
Requirements/Evaluation: weekly 1-page response papers, short mid-term paper and a final research paper
Extra Info: qualified students in first, second, or third years of their career at Williams can register for the Senior Seminar with the permission of the instructor; however, this will not replace the senior seminar requirement in the senior year of French majors
Prerequisites: any RLFR course above 203, or permission of instructor
Enrollment Preferences: senior French majors or completing the certificate in French, but open to advanced students of French
Enrollment Limit: 15
Expected Class Size: 10
Distributional Requirements: Division 1

Not Offered Academic Year 2017
SEM Instructor: Katarzyna Pieprzak

RLFR 415 Senior Seminar: Banned In France: Literature and Censorship in the Eighteenth-Century
Censorship is probably as old as culture itself, but recent global debates over network neutrality, media regulation, and copyright reveal a growing sense of urgency over what role, if any, censorship should play in the digital age. This seminar will explore the role of censorship in eighteenth-century France, another complex period transformed in part by unprecedented access to knowledge. Students will critically assess a range of works that were, before or at publication, represented by various religious or public authorities, editors, publishers, and, in some cases, audiences. Discussions will focus on the formal and thematic content of each work, as well as its broader place in Enlightenment and French Revolutionary literature and culture. Analysis of such historically-specific concepts as tolerance, obscenity, and obscenity and censorship will be supported by critical work and commentary from the eighteenth century and the present day. As a central feature of the course, students will conduct a semester-long research project that will draw on readings from: Diderot, Diderot, Rousseau, Sade, Beaumarchais, Chénier, Gouges, Charrière, Stael, and others. Key issues include copyright and the literary market, self-censorship, public opinion and public censure, gender and canon formation, blasphemy, pornography, and the politics of incitement. Conducted in French.

Class Format: seminar
Requirements/Evaluation: active class participation, weekly online postings, a 200-level or 300-level RLFR literature course at Williams; advanced coursework during study abroad; or permission of the instructor
Enrollment Preferences: French majors and certificate students; Women’s, Gender, and Sexuality Studies majors; Comparative Literature majors; and those with compelling justification for admission
Enrollment Limit: 16
Expected Class Size: 16
Distribution Notes: meets Division 1 requirement if registration is under RLFR or COMP; meets Division 2 requirement if registration is under WGSS

**RLFR 512(S) Readings in French Art History and Criticism**

This course is designed to provide Graduate Program students and interested others with knowledge of French acquired through translation and interpretation. The core of this course is based on the reading and translating of a variety of critical works covering different periods and genres in the field of art history. The material read (excerpts from museum catalogues; the Gazette des Beaux-Arts and other publications; Salons by Diderot, Baudelaire, and Théodore, artists on their works; and critics such as Francastel, Gh. Sterling, M. Faré, Valéry, Focillon) will be analyzed in form and content, translated or summarized, in order to develop the skills and understand the techniques necessary for reading French accurately. Grammar will be reviewed in context.  
**Class Format:** this course will meet twice a week  
**Requirements/Evaluation:** evaluation is based on class participation, papers, a midterm, and a final examination  
**Prerequisites:** RLFR 511 or permission of instructor; undergraduates are welcome with permission of instructor

**SPANISH**

**THE MAJOR IN SPANISH**

Students who major in Spanish can expect to acquire linguistic fluency along with in-depth knowledge of the cultures of Spain and Latin America. Through the study of the major writers and historical events of the Spanish–speaking world, our program offers training in literary analysis and linguistic expression, as well as a deep appreciation of Hispanic civilizations.  
The major consists of nine courses above the 102 level. One of these courses must be the 400-level senior seminar taken during the student’s final year at the College; another must be a course that substantially focuses on literature or cultural texts produced before 1800. Students entering at the 200-level may, with the permission of the Department, choose as part of their major program one course not conducted in Spanish but offered by faculty in Romance Languages or another Department or Program, such as Latino/a Studies, Comparative Literature, History, etc., provided that the subject matter relate to and broaden their study of Spanish. Students entering at a very advanced level may, in some cases and with the permission of the Department, include two such courses in their major program. Working with a member of the Spanish faculty, the student will formulate a curricular plan that will ensure balance and coherence in courses taken prior to declaring a major in Spanish. This is especially imperative for students who are planning to spend a part or all of their junior year in Latin America or Spain.  
**THE DEGREE WITH HONORS IN SPANISH**

Students majoring in Spanish may apply to be admitted to the Honors Program in Spanish upon demonstrating the following: (1) fluency of spoken and written language; (2) potential for successful independent research, as demonstrated by strong performance in advanced-level coursework; (3) interest and motivation; and (4) overall quality and feasibility of the proposal. Two routes are available to those who wish to apply for the degree with honors.  
The first of these involves the writing of a senior thesis.  
By May 15th of their junior year, candidates will have found a thesis advisor, and given the Department a three- to five-page proposal and a preliminary bibliography. (In some cases, and upon consultation with the Department, candidates will have the option to choose a second reader in addition to their primary advisor; for example, when the thesis is interdisciplinary enough in nature that it requires the expertise of an additional reader).  
This proposal will be discussed by the Department; by June 1st, the candidate will be informed whether he/she can proceed with the thesis, and if so, what changes need to be made to the focus and scope of the project. The summer before the senior year will be spent compiling a more detailed bibliography and reading.  
Upon their return to Williams, candidates will devote to their theses two semesters of independent study (beyond the nine courses required for the major) and the winter study period of their senior year (493–W31–494). The
RLSP 101(F) Elementary Spanish

This course focuses on grammar, elementary composition, practice in conversation, and reading of easy modern prose. It is taught by the intensive oral method.

**Class Format:** the class meets five hours a week; students will complete a workbook and lab exercises weekly.

**Requirements/Evaluation:** evaluation will be based on homework, regular homework exercises, quizzes, and midterm exams.

**Extra Info:** students registered for RLSP 101-102 are required to attend and pass the sustaining program during the winter study period; credit granted only if both semesters (RLSP 101 and 102) are taken may not be taken on a pass/fail basis; not available for the fifth course option.

**Prerequisites:** none; this course is for students who have studied less than two years of Spanish in secondary school.

**Enrollment Limit:** 20

**Distributional Requirements:** Division 1

**Spring 2017**

LEC Section: 01  M-F 10:00 AM 10:50 AM  Instructor: Leyla Rouhi

RLSP 103(F) Intensive Intermediate Spanish

This course is a continuation of Spanish 101-102. It is designed to help students improve their proficiency in each of the major skill-groups (listening, speaking, reading, and writing) while providing an introduction to the cultures of the Spanish-speaking world. Classroom activities and homework are designed to increase vocabulary and improve your ability to handle daily life in a Spanish-speaking country, to express your views on complex subjects such as art and politics, and to increase your knowledge of the cultural traditions of Latin America and Spain. Film screenings and readings in Hispanic literature, culture and politics will provide material for in-class discussion and some writing assignments. This course provides the linguistic and cultural training that is necessary to engage the diverse Spanish-speaking communities of Latin America, Spain and the US; it will help to prepare students for further literary and cultural studies as well as provide skills that are increasingly essential in fields such as medicine, law, and education. Conducted in Spanish.

**Class Format:** class meets four hours a week.

**Requirements/Evaluation:** regular attendance and active in-class participation, workbook exercises and weekly compositions, quizzes, midterm and final exams.

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option.

**Prerequisites:** RLSP 101-102 or by Spanish placement exam.

**Enrollment Limit:** 20

**Expected Class Size:** 20

**Distributional Requirements:** Division 1

RLSP 105(F) Advanced Spanish Grammar and Conversation

This course focuses on the development of Spanish linguistic accuracy and oral communication skills. Major emphasis is placed on increasing oral fluency through exposure to media, interaction with native speakers, and participation in a variety of communicative activities. In addition, students will perform regular exercises to improve writing and syntax skills. Throughout the course, they will read journalistic and literary texts in order to stimulate oral and written participation, regular homework assignments, and frequent tests.

**Class Format:** lecture/discussion

**Requirements/Evaluation:** evaluation will be based on homework, class participation, quizzes, a midterm and final exam and a series of communicative projects.

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option.

**Prerequisites:** RLSP 103 and 104 or by Spanish placement exam.
RLSP 199 Spanish in Action: Advanced Communication & Culture for Everyday Life

This is an advanced communication and culture course that uses real-world materials. This class serves as a bridge between Spanish 105 or Spanish 106 and advanced classes on literature and culture. Through the use of multimedia materials and engagement with local native speakers students will develop their communication and analytical skills as they improve their understanding of contemporary Hispanic/Latino culture and their ability to comprehend and respond to a variety of cultural and social issues and situations. Emphasis will be placed on activities that promote effective speaking and writing skills with the use of advanced structures and complex vocabulary. Students will complete at least one research project and related oral presentation. This course will have a service-learning component in which students engage with the Latino community.

Conducted in Spanish.

Class Format: seminar/discussion
Requirements/Evaluation: active participation in class discussions, engagement with native speakers, short writing assignments, and a final research paper and oral presentation
Extra Info: may not be taken on a pass/fail basis
Prerequisites: none
Enrollment Preferences: students who take the Williams College Placement exam and place into RLSP 199, students who have completed RLSP 105 or RLSP 106 and are planning to go abroad, and students returning from one semester abroad
Enrollment Limit: 15
Expected Class Size: 15
Distributional Requirements: Division 1

Not Offered Academic Year 2017

SEM

RLSP 200(S) Advanced Grammar and Composition through Literature (W)

This course is designed for advanced students who wish to further polish and refine their grammatical, lexical, and writing skills in Spanish. The course may be taken immediately after 105, by placement exam results, or even after students have begun to sample the Department's literature and culture offerings at the 200- and 300-level. Classic works of short fiction by celebrated Latin American authors such as Gabriel García Márquez and Julio Cortázar will be discussed; selected Latin American films will be viewed as well. For written and oral assignments: weekly essays, in-class presentations, and language-laboratory activities.

Class Format: lecture/discussion
Requirements/Evaluation: a weekly essay based on the stories read in class, written lab exercises, participation in the grammatical and literary discussions, quizzes, a midterm and a final
Prerequisites: RLSP 105, any course 201+, placement exam or permission of instructor
Enrollment Limit: 19
Expected Class Size: 10-19

RLSP 204 Icons and Imaginaries: Culture and Politics in Latin America (D)

This course provides an overview of Latin American culture and politics by focusing on some of the most recognizable names and faces from the continent's turbulent history: Christopher Columbus, Hernán Cortés and Malintzin, Simón Bolívar, José Martí, Pancho Villa, Eva Perón, Frida Kahlo, Che Guevara, Rigoberta Menchú and Hugo Chávez. In addition to exploring the controversies surrounding each figure and her or his influence within a specific historical context, we'll also unpack some of the overarching issues of Latin American culture and politics: How are nations and nationalism constructed through processes of representation, and what roles do specific iconic figures play in that process? How can popular culture challenge elite representations of the nation and its heroes/heroinés, and how durable are the images it produces as expressions of collective will? What opportunities are available to women and sexual minorities in a political culture that has been historically dominated by macho military types? This course fulfills the EDI requirement by enabling students to appreciate the figures that have influenced generations of Latin American women and men and their sense of what is politically possible, while challenging the class to identify the operations of power at work in the construction of the figures themselves.

Conducted in Spanish.

Class Format: lecture/discussion
Requirements/Evaluation: political and cultural essays, literature and films, three 5-page papers
Prerequisites: RLSP 105, or RLSP 200, or results of Williams College Placement Exam, or permission of instructor
Enrollment Preferences: Spanish majors and qualified first-year students

RLSP 202 Spain's Fin de Siglo and the Crisis of Ideas

In this class we will read the works of some of modern Spain's influential writers from the late part of the nineteenth century and the first three decades of the twentieth. Our aim is to understand how fiction and philosophy represented this significant time in Spain's history. The loss of the war with the U.S. in 1898, the turbulent shifts of power within the country, Spanish regional identities, and the cultural and intellectual movements that shaped Spain on the eve of the Civil War are among the key issues we will address. Our primary sources—largely fiction and poetry by artists such as Miguel de Unamuno, Azorín, Antonio Machado, Pío Baroja—will be complemented with a rigorous study of the cultural landscape of Spain at that time. Our principal engagement with philosophy will be through José Ortega y Gasset, in particular his output from the 1920s.

Class Format: seminar
Requirements/Evaluation: 2 short papers, one long research paper, and oral presentations
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: RLSP 105, or RLSP 200, or results of Williams College Placement Exam, or permission of instructor
Enrollment Limit: 25

RLSP 201 The Spanish Labyrinth

Do Spaniards really dance flamenco and have dinner at 10:00 pm? Does everyone in Barcelona speak Catalan? How can you learn to separate the stereotypical images of Spain from reality? How can we talk about one nation in Europe that so dramatically survived centuries of violent upheavals and divisiveness; dramatic economic rises and collapses? In this course we will approach Spain by studying examples of its literary and artistic production, from periods of brilliant cultural exchange, as well as in times of censorship and repression. Some topics of focus will be the Inquisition, the Civil War and contemporary Spain's obsession with its own recent past. Secondary texts will also be provided for historical and socio-political background and reference.

Conducted in Spanish.

Class Format: seminar/discussion
Requirements/Evaluation: active participation in class discussions, oral presentations, short writing assignments, and a final essay
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: RLSP 105, or RLSP 200, or results of Williams College Placement Exam, or permission of instructor

RLSP 205 The Latin-American Novel in Translation
Crosslistings: RLSP 205/COMP 205
A course specifically designed to enable students who have no knowledge of Spanish to read and discover those Latin-American authors who, in the twentieth century, have attracted world-wide attention. Among the texts to be discussed: Borges, Labyrinths; Cortázar, Blow-up and Hopscotch; Lisper, The Day of the Star; lesser works by Fuentes and Puig; and by Nobel Prize-winner Gabriel García Márquez, One Hundred Years of Solitude.

Class Format: lecture
Requirements/Evaluation: class participation, two brief papers, a midterm, and a final exam
Prerequisites: none
Enrollment Limit: 22
Expected Class Size: 22
Dept. Notes: does not carry credit for the Spanish major or the certificate
Distributional Requirements:

RLSP 208 The Spanish Civil War in Literature and Film
The Spanish Civil War (1936-1939) has generated a vast bibliography and filmography that to this day reflect widely antagonistic interpretations of the conflict itself, its roots, and its impact. From the Spanish perspective, the war is the most important single event in understanding modern Spain. The ideals, passions, and consequences of the Spanish Civil War still define Spaniards and have been recreated and relived by writers, artists, and filmmakers, and debated by historians. The course will begin with a historical introduction to the origins, development, and outcome of the war. Was the Spanish war a national struggle or an international struggle played out on Spanish soil? Along with studying internal Spanish political divisions, we will also consider the impact of the foreign policy positions of other countries—including Germany, Italy, the United States, and Russia—vis-a-vis Spain, as well as the role of the thousands of foreign volunteers who formed the International Brigades and came from all over the world to fight against Franco. With this historical basis, we will see how the themes and issues of the war are reflected in Spanish poetry, short fiction, novels, and films from the time of the war up through the present day. Readings will include works by Ayala, Cernuda, Neruda, Goytisolo, Sender, Fernan-Gomez, and Matute. Films will include documentaries as well as classic and contemporary features. Conducted in Spanish.

Class Format: seminar
Requirements/Evaluation: evaluations will be based on lively class participation, an oral report, short written assignments, and two papers
Prerequisites: RLSP 105, or RLSP 200, or results of Williams College Placement Exam, or permission of instructor

RLSP 209 Spanish for Heritage Speakers: Introduction to Latino/o Cultural Production
Crosslistings: LATS 209/RLSP 209
This course focuses on the acquisition and improvement of critical communication and analytical skills in Spanish for use both in and outside of the United States. We address all four of the primary language skills (listening, reading, writing, and speaking), with particular attention to the unique needs of students who have received a majority of their exposure to the Spanish language in informal or domestic environments. Through the use of materials and vocabulary taken from a variety of real-life contexts, but with primary emphasis on the diverse Latina/o communities of the United States, this class aims to sharpen heritage speakers’ sociolinguistic competency and ability to interpret musical, cinematic, and literary texts in Spanish. Please note that students who have completed the majority of their formal education in a Spanish-speaking country are not permitted to take this course without prior permission of the instructor.

Class Format: discussion
Requirements/Evaluation: evaluation will be based on student participation, grammar homework, 2 oral exams, and 3-4 written essays may not be taken on a pass/fail basis
Prerequisites: none; however, students who have completed the majority of their formal education in a Spanish-speaking country are not permitted to enroll in this course without prior permission of the instructor
Enrollment Preferences: Latina/o Studies concentrators or Spanish majors by seniority
Enrollment Limit: 12
Expected Class Size: 12
Distributional Requirements: Division 2

RLSP 211(F) A Survey of Spanish Literature from the 11th to the 17th Centuries (D)
This course will introduce the student to some of the major works of Spanish literature from its beginnings through the Golden Age. We will study the historical context in which the works were written as well as the literary history of the periods in question. Students will learn methods of textual analysis through readings of relevant literary criticism. Readings will include selected canonical prose, poetry, and drama of the periods; special emphasis will be given to the myth of the coexistence of three religions in Iberia and the often misunderstood idea of dividing this literature into the categories of ‘medieval’ and ‘Renaissance’. Conducted in Spanish.

This course fulfills the pre-1800 requirement for the Spanish major
Requirements/Evaluation: evaluation will be based on class participation, short paper assignments, and a final paper
Prerequisites: RLSP 105, or RLSP 200, or results of Williams College Placement Exam, or permission of instructor

RLSP 214 "Ecologismo": Literature, Culture and the Environment in Latin America (D)
Crosslistings: RLSP 214/ENVI 218
How have Latin American authors and artists responded to environmental concerns, from the logging and rubber booms that threatened the Amazon in the early 20th century to contemporary global warming? How do the realities of Latin American societies—including massive disparities of wealth and poverty; the cultural and political impacts of the region's indigenous populations; and the complex histories of colonialism, dependency and neoliberalism—inform Latin American responses to environmentalism? How does Latin America's "environmental imaginary" differ from those of the US and Europe? In this course we will explore these issues and more through literature and other cultural texts from Latin America. We will consider short stories and novellas by authors including Horacio Quiroga (Uruguay), Luis Sepúlveda (Chile), Memo Giardinielli (Argentina), and Ana Cristina Rossi (Costa Rica); poetry by Esthela Calderón (Nicaragua), Juan Carlos Galeano
(Colombia), Homero Aridjis (Mexico); the paintings of Tomás Sánchez (Cuba); and feature films as well as shorter documentaries. In Spanish. This course satisfies the EDI requirement because it is inspired by and organized around Arturo Escobar’s notion of “the political ecology of difference”, our work throughout the semester aims to understand the myriad ways in which “difference” — economic, ecological, and cultural — informs Latin American responses to environmental degradation. We will also explore some of the ways that contemporary artists and intellectuals attempt to revise forms of subjectivity understood as characteristically Western and modern through creative cultural engagement with Amerindian knowledge and forms of expression.

**Class Format:** seminar

**RLSP 217T Love in the Spanish Golden Age (W)**

The principal focus of this course is the Spanish “comedias” of the seventeenth century (with supplemental readings from prose and poetry) to provide us with a dynamic and critical understanding of the theme of love as constructed by the greatest dramatists and authors of the period. Works by Lope de Vega, Tirso de Molina, Calderón de la Barca, San Juan de la Cruz, and others will show us how the theme was treated from diverse perspectives, and how it related to key concepts such as honor, religion, and artistic creativity. Conducted in Spanish or English depending on student ability.

**Class Format:** tutorial

**Requirements/Evaluation:** students will meet with the instructor each week in groups of two, one student will read a 5-pg paper, left in advance for the tutorial partner, and the other will critique the paper; evaluation is based on the quality of the written essays and the notes.

**Extra Info:** may not be taken on a pass/fail basis, not available for the fifth course option

as well as evidence of preparation, punctuality of submission, and quality of discussion; by the end of the semester each student will have produced around 25 pages of writing

**Prerequisites:** RLSP 105, or RLSP 200, or results of Williams College Placement Exam, or permission of instructor

**Enrollment Preferences:** students with a background in literature

**RLSP 220 Women on the Verge (W)**

Crosslistings: RLSP 220/WGSS 222

From the early twentieth century to the present day, the radical changes in the lives of Spanish women have clearly reflected the tug of war between progress and tradition in recent Spanish history. The dramatic upheavals in Spanish politics have marked and transformed the lives of women to such an extent that one often gauges the political and social climate of any given historical moment by considering how the role of women was defined by the law, the Catholic church, education, and other social and political institutions. Using literary and historical texts as well as films and graphic media, this course will look at the transformations in the public and private lives of Spanish women during the following periods: the turn of the century, the Second Republic, the Spanish Civil War, the Franco years, and the transition to democracy.

**Class Format:** seminar

**Prerequisites:** none

**RLSP 223T Colonial Landscapes: Latin America’s Contemporary Environmental Literature (D) (W)**

Crosslistings: RLSP 223/ENVI 223/COMP 263

“It is not by coincidence that our societies are both racist and anti-ecological,” wrote the Chilean sociologist Fernando Mires in his now-classic study, The Discourse of Nature. This tutorial explores works of contemporary literature that implicitly and explicitly link Latin America’s ongoing environmental crisis to the region’s long and multi-layered history of colonialism: novels by Sylvia Iparaguire (Argentina), Mayra Montero (Puerto Rico), Giaconda Belli (Nicaragua), Luis Sepúlveda (Chile); poetry by Homero Aridjis (Mexico); essays by Octavio Paz (Mexico), Eduardo Viveiros de Castro (Brazil), and more. Representing a wide variety of geographies, literary styles and ideological perspectives, these writers nevertheless converge in challenging us to consider the effects of environmental crisis within structures of power that are radically unequal at the local, national, and global levels; and to recognize that consciousness of environmental vulnerability can prompt new forms of inclusion and community as well as exclusion. Topics to be explored also include the role of indigenous cosmologies in contemporary environmental politics, the place of urban ecologies within the environmental imaginary, and the ongoing debates among academic critics and others regarding the scope and methodologies of ecocriticism as an approach to Latin American literature.

Students have the option of tutorial in Spanish or in English; partners will be assigned accordingly. Each tutorial will meet with me for one hour during the week, during which time we will discuss a 5-page paper that one of the partners has submitted the night before. This adds up to a substantial amount of (reading and) writing for each student in the course, i.e., six 5-page essays over the course of the semester. This tutorial fulfills the Exploring Diversity Initiative by challenging students to position themselves, intellectually and imaginatively, in the space of those excluded from modernity’s material benefits as they struggle to brace themselves against its catastrophic environmental effects.

**Class Format:** tutorial

**RLSP 225F Subalternity, Dictatorship, and the Dream of Emanicipation: Paraguay, 1811-Present (D) (W)**

Paraguay is at once the most “typical” of Latin American countries and the most enigmatic. With a predominantly Guarani-speaking population, enormous disparities of wealth and poverty, and a political tradition that favors authoritarian dictatorship, Paraguay is also celebrated, in certain circles, as the only Latin American nation that actually achieved economic and political independence when the other republics were fast becoming economic dependencies of Britain and the US in the 19th century. This course explores the subjects of subalternity, dictatorship, and the “dream of emancipation” in Paraguay’s cultural production of the 19th, 20th, and 21st centuries. We will examine together the writings of the brilliant novelist Augusto Roa Bastos, especially Son of Man and I the Supreme; stories and poems by Teresa Lander, Lina Steinhof, Paraguay’s rich and vibrant tradition of visual art; and works of classic and contemporary film. Conducted in Spanish. This course fulfills the goals of the EDI requirement by challenging students to analyze the ways that structures of power and privilege, articulated at the national and international levels, are manifest in Paraguay, as well as the strategies Paraguayan artists and intellectuals have developed to undermine or contest those structures through creative cultural work. Our explorations will be undergirded by theoretical readings in the fields of postcolonial studies, subaltern studies, psychoanalysis.

**Class Format:** seminar

RLSP 303 Cervantes' "Don Quixote" in English Translation
Crosslistings: COMP 350/RLSP 303

A close study of one of the most influential and early European novels, Don Quixote by Miguel de Cervantes (1547-1616 C.E.) was a hit in its day in the seventeenth century, and has not ceased to influence artists and thinkers
since. Moving between humorous and serious tones, Cervantes takes on
several issues in the Quixote: the point of fiction in real life, the complications of relationships between men and women, the meaning of madness, the experience of religious co-existence, the shapes of friendship, and the task of
literary criticism, just to name a few. We will read the book in a fine modern
English-language translation, and set it in several relevant contexts to better
understand its original intellectual horizon—seventeenth-century Spain—as
well as the reasons for its continuing relevance.

Class Format: seminar

Requirements/Evaluation:
- active participation, three short papers, and a final project designed in consultation with the instructor

Extra Info: may not be taken on a pass/fail basis

RLSP 306T Latino Writing: Literature by U.S. Hispanics (W)
Crosslistings: RLSP 306/COMP 302

Writing by U.S. Hispanics constitutes a new voice in American letters. In this
tutorial, we will read and discuss work by U.S. Latinos and examine the social
backgrounds to their texts. The experiences of immigration and assimilation, and the specific complexities of being both Hispanic and North American will be addressed. Authors to be studied: José Antonio Villalobos, Richard Rodriguez, Sandra Cisneros, Rudolfo Anaya, Piri Thomas, Oscar Hijuelos, Cristina Garcia, Junot Diaz and historical texts by Carey McWilliams, and Rudolfo Acura. Given the absence of a critical consensus around these
titles, our task is to gain some sense of their common traits as a tradition, and place them within the larger body of literature of the Americas and
the world. The tutorial will examine one work or set of authors per week. A
student will bring, written out in full, an oral presentation focusing on the
artistic features and sociocultural content of the assigned reading. Questioning
the presenter, on the part of the second tutee and the tutor, will follow. The
course is designed to accommodate both Spanish and English speaking
students. A student able to read and speak Spanish will be paired with another
student of similar proficiency. Students who neither read nor speak Spanish
will be paired together.

Class Format: tutorial

Requirements/Evaluation:
- five short oral presentations/papers (about 20-25
  minutes) and a final longer one (about 40-45 minutes)

Extra Info: may not be taken on a pass/fail basis

Prerequisites:
- some previous course work in any literature beyond the 100
  level is helpful; students selecting the Spanish option for credit toward the
  Spanish major must have taken at least one 200-level RLSP course or seek
  permission of the tutor

RLSP 308 The Subject of Empire: Race, Gender and Power in the Colonial Era (D)

This class studies Latin American literature of the colonial era (1492-1898)
from the perspective of the constitution of the subject: the autobiograhical 'yo'
that is both the subject of discourse and the object of sovereign power. Our
readings will include the most outstanding texts of the group collectively
known as the Chronicles of the Conquest—the letters of Christopher
Columbus and Hernán Cortés and Bernal Diaz del Castillo's True History of
the Conquest of New Spain, among others—whose authors endeavor to
establish their historical authority and legitimate their actions before the
Spanish king. We will also read later works in which racially and sexually
marginalized subjects struggle to contest the identities and the conditions
imposed on them by a distant sovereign through far-reaching institutional
networks: the mestizo historian known as El Inca Garcilaso de la Vega, the
cross-dressed soldier Catalina de Erauso, the poet Sor Juana Inés de la Cruz,
and the slave Juan Francisco Manzano. This course fulfills the objectives of the Exploring Diversity Initiative by challenging students to examine the historical negotiation of individual and
collective identities within the context of violent, exploitative and exclusionary
structures of power.

Class Format: lecture/discussion

Requirements/Evaluation:
- one short (7-page) paper, one longer (15-20
  page) paper, proposal, bibliography, discussion-leading

Prerequisites:
- one RLSP course at the 200-level or above or permission of
  instructor

Enrollment Preferences:
- Spanish majors

Enrollment Limit: 19

RLSP 319(F) Dictatorship and the Latin-American Novel

Military dictatorship is among the most crucial factors in Latin-American
society and history, and some of the continent's leading novelists have taken it
upon themselves to depict the experience in their work. In this course we will
examine both the fact of dictatorship itself and the diverse representation
thereof in Spanish-American fiction. Novels by Garcia Marquez, Vargas Llosa,
and Rodolfo Acuña. Given the absence of a critical consensus around these
titles, our task is to gain some sense of their common traits as a tradition, and
place them within the larger body of literature of the Americas and
the world. The tutorial will examine one work or set of authors per week. A
student will bring, written out in full, an oral presentation focusing on the
artistic features and sociocultural content of the assigned reading. Questioning
the presenter, on the part of the second tutee and the tutor, will follow. The
course is designed to accommodate both Spanish and English speaking
students. A student able to read and speak Spanish will be paired with another
student of similar proficiency. Students who neither read nor speak Spanish
will be paired together.

Class Format: seminar

Requirements/Evaluation:
- three 8-page papers, an oral report, a final 3-page paper, and class participation

Prerequisites:
- RLSP 105, or RLSP 200, or results of Williams College Placement Exam, or permission of instructor

Enrollment Preferences:
- Spanish majors; Latin Studies concentrators

Enrollment Limit: 10

Expected Class Size: 5-10

Distributional Requirements:
- Division 1

Fall 2016
LEC Instructor: Gene Bell-Villada

RLSP 322(S) Islam in Spain (D)
Crosslistings: RLSP 322/ARAB 322

The presence of Islam—in all its diverse manifestations—is not new to
Europe, least of all to Spain. In this course we will focus for the most part on
the medieval and early modern periods, and study several works—primarily of
literature, though we will supplement with other texts—in which Muslims and
Islam have been portrayed in the Iberian Peninsula. We will cover a wide
range of perspectives that include Christian and Muslim writers as well as
authors of Jewish heritage. Our primary focus will be the Middle Ages (1000-
1700 CE), during which time Muslims were in control of the Iberian
Peninsula. We will look at the evolution of the Al-Andalus Kingdoms and the
rise of the Christian kingdoms in the north before reaching the Moorish
invasion of Europe. We will study a wide range of texts including poetry,
plays, novels, and scholarly treatises on the practice of holy wars and their
impact on the world. We will also explore the role of Islam in the
development of the Spanish language and the world. The tutorial will examine
one work or set of authors per week. A student will bring, written out in full, an oral presentation focusing on the
artistic features and sociocultural content of the assigned reading. Questioning
the presenter, on the part of the second tutee and the tutor, will follow. The
course is designed to accommodate both Spanish and English speaking
students. A student able to read and speak Spanish will be paired with another
student of similar proficiency. Students who neither read nor speak Spanish
will be paired together.

Class Format: seminar

Requirements/Evaluation:
- two short papers, oral presentations, one final project

Extra Info: may not be taken on a pass/fail basis; not available for the fifth
course option

Prerequisites:
- any RLSP 200-level class, or results of the Williams College Placement Exam, or permission of instructor

Enrollment Preferences:
- Spanish majors, Arabic Studies majors

Enrollment Limit: 20

Expected Class Size: 15

Distributional Requirements:
- Division 1
- Exploring Diversity
This course will consider different kinds of works (poetry, memoirs, fiction) written by authors forced to live in exile as a consequence of political and/or religious persecution. Our point of departure will be the paradigmatic expulsion and subsequent diaspora of the Jews of Spain and Portugal. Most assignments, however, will be drawn from twentieth century texts written during, or in the wake of, the massive destruction and displacements brought about by the Spanish Civil War and World War II. How is the life lost portrayed? How are the concepts of home and the past intertwined? What kind of life or literature are possible for the deracinated survivor? We will discuss the role of writing and remembrance in relation to political history, as well as in the context of individual survival. Readings might include works by Nuñez de Reinoso, León, Cernuda, Semprún, Benjamin, Nancy, and Blanchot.

**Course Format:**
- Several short writing assignments, a midterm paper and a final paper
- Presentations, short writing assignments, and a final essay

**RUSSIAN (DIV I)**

**Chair:** Professor JULIE CASSIDAY

**Professors:** J. CASSIDAY, D. GOLDSSTEIN**, J. VAN DE STADT. Assistant Professor: B. ALIEV. Teaching Associate: BUSHETARA.

**LANGUAGE STUDY**

The department provides language instruction to enable students to acquire all five linguistic skills: understanding, speaking, reading, writing, and culture. Russian 101-108-102 covers the basics of Russian grammar. Russian 103 through 202 offer additional instruction in grammar and provide extensive practice in reading and conversation.

**STUDY ABROAD**

The department strongly encourages students who want fluency in Russian to spend a semester or year studying in Russia or one of the former Soviet republics. Students generally apply to one of several approved foreign study programs. Russian 104 or the equivalent and junior standing are normally prerequisites for study abroad. You can find general study away guidelines for Russian here.

**LITERATURE AND CULTURE IN TRANSLATION**

The department regularly offers courses on Russian literature, culture, and politics in English for those students who have little or no knowledge of Russian, but who wish to become acquainted with Russian literary, cultural, and social history.

**THE CERTIFICATE IN RUSSIAN**

To enhance a student’s educational and professional profiles, the Certificate in Russian offers a useful tool for using the language in a wide variety of disciplines. The sequence of language and culture courses is designed to supplement a student’s major at Williams by enabling the student to expand his or her knowledge in a related field.

Students who enter Williams with previous training in Russian may substitute more advanced courses for all the 100-level courses; they can also be exempted from up to two of the required courses. Thus, in order to earn a certificate a student must take no fewer than five courses (including three courses in Russian) after enrolling at Williams. The student must achieve proficiency at the level of a B in RUSS 201 or the equivalent.

**Required Courses**
- 101
- 102
- 103
- 104
- one additional course conducted in Russian

**Elective Courses**
- at least one course on Russian cultural history
- at least one course on Russian intellectual, political, or social history, or post-Soviet economics

**THE MAJOR**

The Russian major offers students an interdisciplinary approach to the intellectual and cultural history of Russia and the former Soviet republics. Students complete the major by combining courses in Russian language and literature with courses in history, political science, music, economics, and art. The major requires a minimum of ten courses of which at least six must be conducted in Russian, at least two must be at the 300-level, and one at the 400-level. In addition, students may take up to four related courses offered by other departments and taught in English.

**Examples of appropriate courses in other departments are:**
- History 140 Fin-de-Siècle Russia: Cultural Splendor, Imperial Decay
History 240 Muscovy and the Russian Empire
History 241 The Rise of the Soviet Union
History 436 Religion and Secularism in Modern Europe and Russia

Students selecting the major must typically complete Russian 104 or the equivalent by the end of the junior year. Majors will normally be expected to take the 400-level seminar offered in their senior year, even if they have previously taken another version of it. Russian majors may receive major credit for summer language study (in consultation with the department) and for as many as four courses taken during study abroad.

THE DEGREE WITH HONORS IN RUSSIAN
At the beginning of the second semester of the senior year, students may nominate themselves to candidacy for the degree with honors. By the end of the senior year, they will establish in consultation with the department their qualifications for embarking on the project, the pattern of study to be followed, and the standards of performance.

Students earn a degree with honors by submitting a senior thesis (493- W31-494) of honors quality.

RUSS 101(F) Elementary Russian I (D)
An introduction to contemporary standard Russian, this course provides opportunities to acquire basic proficiency in all five language skills—listening comprehension, speaking, reading, writing, and culture—through immersion, intensive use of authentic materials, and a strong emphasis on the spoken word in all class activities. Greater emphasis is placed on writing in the second semester. For students who already know some Russian, consultation with the department is required before registering for any Russian language course in the sequence 101 through 202. As an EDI course, RUSS 101 focuses on the relationship between language and culture, exploring how different linguistic contexts and practices arise from and contribute to cultural difference.

Class Format: the class meets five times a week
Requirements/Evaluation: active class participation, completion of all assignments, quizzes, tests, and a final exam
Extra Info: students registered for RUSS 101-102 are required to attend and to pass the sustaining program during the winter study period; credit granted only if both semesters (RUSS 101 and 102) are taken
Prerequisites: none
Enrollment Limit: 15
Expected Class Size: 10

RUSS 103(F) Intermediate Russian I (D)
A continuation of Elementary Russian 101-102, this course seeks to develop conversational comprehension and composition skills through a variety of materials that treat topics from Russian and Soviet culture, current events, and daily life. Selected readings from the Russian literary cannon and the popular press will be included, as will the review and expansion of grammatical topics covered in 101-102. As an EDI course, RUSS 103 focuses on the relationship between language and culture, exploring how different linguistic contexts and practices arise from and contribute to cultural difference. Class is conducted in Russian.

Class Format: seminar
Requirements/Evaluation: regular attendance, active class participation, completion of daily homework, frequent writing assignments, tests, and a final exam
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: RUSS 101-102 or the equivalent (consult with instructor)

RUSS 104(S) Intermediate Russian II (D)
This course continues to develop all five skills—listening comprehension, speaking, reading, writing, and culture—by focusing on a variety of topics geared to students' interests. Coursework includes the review and expansion of grammatical topics, as well as a variety of unabridged authentic materials from Russian literature, film, and other media. Students who complete RUSS 104 should be well prepared to undertake study abroad in Russia and are encouraged to do so. Class is conducted in Russian. As an EDI course, RUSS 104 focuses on the relationship between language and culture, exploring how different linguistic contexts and practices arise from and contribute to cultural difference.

Class Format: seminar
Requirements/Evaluation: regular attendance, active class participation, completion of all homework, regular writing assignments, quizzes, and a final exam

RUSS 203 Nineteenth-Century Russian Literature in Translation
Crosslistings: RUSS 203/COMP 203
This course introduces students to landmark texts of 19th century Russian literature, exploring their aesthetic, social and philosophical implications and significance. We will begin by reading Pushkin, Lermontov and Gogol's innovative realist variations on pre-existing Romantic literary tropes. We will then trace how these initial themes and ideas are expanded upon and given new dimensions by subsequent "giants" of Russian realism: Dostoevsky and...
Tolstoy. Additional literary and ideological issues of the century will be addressed in the works of Turgenev and Goncharov, two other representative authors of the “Golden Age”. Finally, we will turn to the works of Chekhov, which accentuate ambiguity and uncertainty within the realist method of portrayal, thus anticipating modernist sensibilities of the 20th century. Knowledge of Russian is not required; all course readings will be in English.

Requirements/Evaluation:
- participation, short written responses, an oral presentation, research paper
- short response essays; final exam; class participation

Enrollment Limit: 15

RUSS 206(S) Feasting and Fasting in Russian History

This course will use the methodology of food history to explore the broader historical, economic, and artistic conditions that gave rise to Russian culture. We will examine culinary practice as well as the social context of cooking and eating in Russia. In order to elucidate the important interplay between culture and cuisine, we will discuss such issues as the domestic roles of women and serfs, the etiquette of the table, the role of drinking and temperance movements, and the importance of feasts and fasts in the Russian Orthodox Church calendar. Short stories, memoirs, and cookery books will provide insight into class and gender differences, cooking techniques, and the specific tastes that characterize Russian cuisine. This class will present Russian culture from a predominantly domestic point of view that originates from the wooden spoon as much as from the scepter. Knowledge of Russian is not required.

Class Format: lecture/discussion

Requirements/Evaluation: active class participation, bi-weekly response papers, one 6- to 8-page paper, midterm and final exams; participation in a communal feast

Enrollment Preferences: students who can demonstrate an interest in Russian culture

RUSS 210T Tolstoy: The Major Novels (W)

Crosslistings: RUSS 210/COMP 207

This tutorial will focus on Lev Tolstoy's four novelistic masterpieces—War and Peace, Anna Karenina, Resurrection, and Hadji Murat—placing them in their appropriate historical, social, and philosophical context. For each week of class, students will read a significant portion of a novel by Tolstoy, as well as a selection of secondary literature taken from those works that inspired the author, reactions that arose at the time of the novel's publication, and scholarship that seeks to explain the power and enduring significance of these novels. Students will meet with the professor in pairs, with one student writing a five-page paper for each class session and the other student providing a critique of the paper. For those students without Russian language skills, all works will be read in English translation. Those students who have completed at least three years of college-level Russian may take the course in Russian.

Class Format: tutorial

Requirements/Evaluation: evaluation will be based on completion of weekly reading and writing assignments and active discussion during tutorial sessions

Extra Info: may not be taken on a pass/fail basis

Prerequisites: for students taking the tutorial in ENGL: none; for students taking the tutorial in RUSS: either RUSS 252 or permission of instructor

TUT  Instructor: Julie Cassiday

RUSS 213 From Putin to Pussy Riot: Discourses of Post-Soviet Gender

Crosslistings: RUSS 213/GBST 213/WGSS 214/COMP 257

Before 1991, Russians typically appeared in the Western media as macho villains in the nuclear arms race or a James Bond film. Today, however, news from the Former Soviet Union often sounds like a bizarrely gendered media stunt. For example, Russian president Vladimir Putin has been photographed topless while fishing on vacation in Siberia, while the feminist punk-rock collective Pussy Riot protested Putin’s regime by performing in day-glo balaclavas in Russia’s largest cathedral. This course examines related post-Soviet media spectacles in the attempt to understand the Western press’s fascination with Russia, as well as key social trends defining the post-Soviet era. We will focus on the ways in which gender and sexuality have come to mark post-Soviet culture and discourse as different from those in the West. In addition to Vladimir Putin and Pussy Riot, we will consider the so-called crisis of masculinity in post-Soviet Russia, the trafficking of women from the Former Soviet Union, the Ukrainian feminist collective Femen, the Eurovision Song Contest, and the 2013 legislation in the Russian Federation banning homosexual propaganda among minors. We will try to understand how concepts, such as feminism, tolerance of sexual minorities, and performed gender, have been deemed dangerous in the post-Soviet East at the very time they have attained normative status in the West.

This course is part of the Exploring Diversity Initiative because it engages in cultural comparison, explores how power and privilege are allocated differently in post-Soviet societies than in Western liberal democracies, and engages in the critical theorization of post-Soviet culture and discourse.

All readings will be in English.

Class Format: seminar

Requirements/Evaluation: active participation in class discussions, response papers based on assignments for class, 2 papers (3-5 pages each) on relevant current events in the post-Soviet world, and a final project

RUSS 220(S) World War II in Russian Culture
Crosslistings: RUSS 220/COMP 285/GBST 220
This course examines how Russian literature and film have depicted World War II since the war period and up to the present. The enormous loss of life and trauma among the Soviet military and civilians, as well as the Soviet ideological and propagandistic narrative of the war have been definitive for the Russian national identity. As living memory of the war's combatants, widows, orphans, and survivors recedes with their passing, literature and film continue to shape the collective cultural memory of the war for subsequent generations. We will study artistic representations of the complex and varied experiences of the war: on the frontlines and in the country's interior; had by men, women, and children; by people of not only Russian, but also other nationalities of the USSR. In assessing the stories and images of the war in journalism, novels, and film, we will situate their emotional and intellectual impact within the formal parameters of a given medium or genre. Our discussions of the art and ideology of Russian war narratives will be framed within larger historical and political dimensions of the war's progress and legacy in the USSR and in post-Soviet Russia.

RUSS 331(T) The Brothers Karamazov (W)
Crosslistings: RUSS 331/COMP 331/ENGL 371
Widely hailed as one of the greatest novels ever written, Dostoevsky's The Brothers Karamazov contains a series of enigmas, not the least of which is precisely who murdered the Karamazov father. In addition to exploring the shared guilt of all four of the brothers Karamazov in the crime of patricide, Dostoevsky poses the most probing questions of his day: Are families tied together merely by blood or by deeper spiritual bonds? Is religious faith possible in an age of reason, science, and technology? Can man's earthly laws ever carry out divine justice? Is humanity prepared to bear the burden of responsibility that comes with freedom? This tutorial will spend an entire semester examining Dostoevsky's masterwork, and we will read a variety of secondary sources alongside The Brothers Karamazov, including history, philosophy, and literary theory. Our goal will be to understand Dostoevsky's answers to these so-called "accursed questions" through the unique artistic form of The Brothers Karamazov.
Class Format: tutorial
Requirements/Evaluation: evaluation will be based on completion of weekly reading and writing assignments, as well as active engagement during tutorial sessions
Extra Info: may not be taken on a pass/fail basis
Prerequisites: at least one 200-level literature class
Enrollment Preferences: students majoring or considering a major in Russian, Comparative Literature, or English
Enrollment Limit: 10
Expected Class Size: 10
Distributional Requirements:
Division 1
Writing Intensive

Not Offered Academic Year 2017
TUT Instructor: Julie Cassiday

RUSS 343 Spectacles on His Nose and Autumn on his Heart: The Oeuvre of Isaac Babel (D) (W)
Crosslistings: RUSS 343/COMP 343/JWST 343/GBST 343
Known alternately as "master of the short story" and "Russian Maupassant," Isaac Babel was not only one of the most celebrated and intriguing authors of early Soviet Russia, but also a cultural figure of profound national and international significance. For a number of reasons (political, aesthetic, professional, ethical) Babel was not prolific and this will allow us to read almost all of his creative output, something we rarely get to do in the course of a single semester. Babel's writing is extremely varied—it includes sketches, journalistic prose, short stories, plays, movie scripts, one unfinished novel—and richly intertextual. This will afford us the opportunity to read the work of some of his contemporaries and predecessors, from both Russia and abroad, with whom he fashioned brilliant literary conversations, among them Guy de Maupassant, Anton Chekhov, Sholem Aleichem, and Ivan Turgenev. Babel saw self-definition as the core of his writing and as an EDI offering, this course will ask students to reflect on what it meant to be a Russian, a Jew, and a non-party author—an outsider, insider, and problematic hybrid rolled into one—in the highly unsettled, and unsettling, 1920s and 1930s. All course readings will be in translation, but students are highly encouraged to read in the original (Russian, French, Yiddish) whenever possible.
Class Format: seminar
Requirements/Evaluation: active class participation, frequent short writing assignments, oral project, and an oral presentation
Prerequisites: none
Enrollment Preferences: Russian and Comparative Literature majors, Jewish Studies and Global Studies concentrators
Enrollment Limit: 12
Expected Class Size: 10

501
RUSS 401(F) Senior Seminar: Putin and Putinism (D)

This seminar asks: Who is Vladimir Putin and how has he restored Russia's status as a global superpower in less than twenty years in power? We will approach these questions by investigating Putin, the man and the myth, as well as programmatic changes that have taken place in the Russian Federation under his leadership. Focusing on the neotraditionalism, neonationalism, and neoliberalism that characterize Putinism, we will study topics ranging from the social sciences (the country's much bemoaned demographic crisis, new social policy and legislation, the annexation of Crimea) to popular culture (television, fashion, and rap music). All coursework will be conducted in Russian. This seminar is part of the Exploring Diversity Initiative because we will consider the differences between Russian society and culture and our own, the historical context that has given rise to both Putin and Putinism, and the distinct history of power and privilege in post-socialist Russia, using theoretical paradigms that allow us to understand the growing social disparities in Russia today.

Class Format: seminar

Requirements/Evaluation: thorough preparation for and active participation in class meetings, several short essays, two oral presentations, and completion of a research project

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

SCIENCE AND TECHNOLOGY STUDIES (DIV II)
Chair: Professor JOSEPH CRUZ

Advisory Committee: Professors: M. ALTSCHULER, D. DETHIER, L. KAPLAN, J. THOMAN. Associate Professor: B. MILADENOVIC.

Science and Technology Studies (SCST) is an interdisciplinary program concerned with science and technology and their relationship to society. In addition to the historical development and a philosophical understanding of the ideas and institutions of science and technology, Science and Technology Studies also examines their ethical, economic, social, and political implications.

The role that science and technology have played in shaping modern industrial societies is generally acknowledged, but few members of those societies, including scientists and engineers, possess any understanding of how that process has occurred or much knowledge of the complex technical and social interactions that direct change in either science or society. The Science and Technology Studies Program is intended to help create a coherent course of study for students interested in these questions by providing a broad range of perspectives. At present, courses are offered which examine the history or philosophy of science and technology, the sociology and psychology of science, the economics of research and development and technological change, science and public policy, technology assessment, technology and the environment, scientometrics, and ethical-value issues.

To complete the requirements of the program, students must complete six courses. The introductory course and senior seminar are required and three elective courses are chosen from the list of designated electives. Students may choose to concentrate their electives in a single area such as technology, American studies, philosophy, history of science, economics, environment, sociological psychology, or philosophy. The sixth course necessary to complete the program is one semester of laboratory or field science in addition to the College's three-course science requirement. Other science courses of particular interest include Chemistry 110 and Biology 134.

The program is administered by a chair and an advisory committee of faculty who teach in the program. Students who wish to enroll normally register with the chair by the fall of their junior year.

Elective Courses
ASTR 336/HSCI 336 Science, Pseudoscience, and the Two Cultures
BIOL 134/ENVI 134 The Tropics: Biology and Social Issues
CHEM 113 Chemistry and Crime: From Sherlock Holmes to Modern Forensic Science
ENVI 101F Nature and Society: an Introduction to Environmental Studies
ENVI 307/PSCI 317 Environmental Law
ENVI 402/MAST 402 Senior Seminar: Perspectives on Environmental Studies
HIST 374 American Medical History
PHIL 209 Philosophy of Science
PHIL 213(F) Biomedical Ethics
PHIL 244(T) Environmental Ethics
SOC 368 Technology and Modern Society

Courses of Related Interest
AMST 216(S) Environmental Humanities: Theory and Practice
ANSO 205 Ways of Knowing
ANTH 271(F) Medicine, Technology, and Power
ARTH 257 Architecture 1700-1900
ASTR 340 Great Astronomers and Their Publications
BHE 218T DNA, Life, and Everything
CHEM 115 AIDS: The Disease and Search for a Cure
CSCI: 102(F) The Socio-Techno Web
ECON 230 The Economics of Health and Health Care
ENGL 289(S) Writing about Science and Nature
ENGL 378(F) Nature Writing
ENVI 208 Science and Politics in Environmental Decision Making
ENVI 210 Governing Nature
ENVI 302 Environmental Planning Workshop
GEOS 103/ENVI 103 Global Warming and Natural Disasters
GEOS 215 Climate Change
GEOS 226 The Oceans and Climate
HIST 465/LEAD 465 Going Nuclear: American Culture in the Atomic Age
HIST 475/LEAD 475 Modern Warfare and Military Leadership
NSCI 317T Nature v. Nurture: Topics in Developmental Psychology
PHYS 108 Energy Science and Technology
REL 281 Religion and Science
SOC 303(F) Cultures of Climate Change
SOC 300 Measuring Truth
WGSS 238 Science, Gender, and Power

Students can check with the program chair to see if other courses not listed here might count as electives.

STUDY AWAY
You can find general study away guidelines for Science and Technology Studies here.

SCST 101(S) Science, Technology, and Human Values
Crosslistings: SCST 101/HSCI 101/SOC 201

This course offers an introduction to science and technology studies, or STS. A radically interdisciplinary field of inquiry, the roots of STS trace the philosophy, history, and sociology/anthropology of science and technology. Students will become acquainted with major STS schools, methodological strategies and research trajectories through intensive reading and analysis of classical and contemporary works in the field. Considerable attention will be devoted to exploring the nature of science and technology, their relationships to and interactions with one another, society and the natural world, and the
influences these interactions exert in shaping what humans value. A fundamental goal of the course is to cultivate awareness and understanding of the social organization of technology and scientific knowledge production, and the technoscientific structuring of modern social life broadly. The course as such is aimed at attracting from all divisions those students who are intellectually adventurous and inclined to think critically about the place and prominence of science and technology in the modern world.

Class Format: seminar
Requirements/Evaluation: two or three short exercises, two papers (3-5 pages and 5-7 pages), and two hour exams
Prerequisites: none
Enrollment Preferences: first-years and sophomores
Enrollment Limit: 20-25
Expected Class Size: 20
Distributional Requirements: Division 2

Spring 2017
SEM Section: 01 TR 08:30 AM 09:45 AM Instructor: Grant Shoffstall

SCST 263 Cold War Technocultures
Crosslistings: SOC 263/AMST 263/HIST 363/HSCI 263/SCST 263
With the Soviet Union's collapse at the end of the twentieth century and the emergence of the United States as an unchallenged victor and "new world" hegemon, have we lost a sense of the drama, fear, and unbridled terror that permeated American life during the Cold War? In this course we will set out to understand Cold War American culture(s) by examining the intersection of politics, aesthetics, and a range of major technoscientific developments during this period. The course will take shape in three parts. Part I will explore the emergence and role of the computer in shaping the distinctly American style of thought aimed at Soviet "containment". We will furthermore trace historical treads connecting MIT's legendary Whirlwind computer, the SAGE continental air defense system, nuclear wargaming at the RAND Corporation, artificial intelligence, and the advanced technologies, management strategies, and atrocities of the Vietnam War. Part II takes up the symbolic potency of the space race, which we will use as a conduit through which to explore the following events and developments: Sputnik, Yuri Gagarin's spaceflight, the Apollo moon landing, and American civil defense; the postwar science of human bodies, such that biology is increasingly less representative of legibility; the management of human life to the transformation of "life itself" by way of modern medicine as a form of social control; critiques of the Medicalization: those processes by which previously ethical-religious, legal or social (e.g. drug and alcohol addition, shyness, obesity), are brought within the purview of medical science and redefined as medical problems, usually in terms of "illness" or "disorder." Part I: The history of the medicalization thesis; medicalization as a technical process; modern medicine as a form of social control; critiques of the medicalization thesis. Part II: From medicalization to biomedicalization; from the management of human life to the transformation of "life itself" by way of biomedicalization; the "human" and the "human body" as the "remedies" of human vitality. Empirical cases for consideration will be drawn from those technoscientific developments having made possible the work of optimization that defines biomedicalization: molecular biology, pharmacogenomics, biotechnologies, imaging techniques, robotics, and transplant medicine, among others. Finally, a consideration of how processes of biomedical optimization have produced new ways of seeing, knowing, and imagining human bodies, such that biology is increasingly less representative of "human body" than it is of possibility. The course will wind down with a survey of emerging cases in speculative technoscience and the ethics and politics of human enhancement.

Class Format: lecture
Requirements/Evaluation: weekly discussion précis, science-fiction book review essay, class presentations, and a take-home midterm
Extra Info: may not be taken on a pass/fail basis
Prerequisites: none
Enrollment Preferences: preference will be given to Anthropology and Sociology students
Enrollment Limit: 25
Expected Class Size: 20-25
Distributional Requirements: Division 2

Not Offered Academic Year 2017

PHLH Bioethics + Interpretations of Health

Spring 2017
LEC Section: 01 MW 08:30 AM 09:45 AM Instructor: Grant Shoffstall

SCST 401(F) Senior Seminar: Critical Perspectives on Science and Technology
A research-oriented course designed to give students direct experience in evaluating and assessing scientific and technological issues. Students initially study particular techniques and methodologies by employing a case study approach. They then apply these methods to a major research project. Students may choose topics from fields such as biotechnology, computers, biomedical engineering, energy, and other resource development. Students will apply their background of historical, philosophical, and technological perspectives in carrying out their study.

Class Format: studio
Requirements/Evaluation: research paper or project
Enrollment Limit: 5
Distributional Requirements: Division 2

Other Attributes: ENVP SC-B Group Electives
THEATRE (DIV I)
Chair: Associate Professor AMY HOLZAPFEL

As a reflection of the theatre's historical relationship to literature and the arts, stage production is studied in the context of the literary and artistic movements, which have informed theatrical endeavor. The major in Theatre emphasizes the collaborative nature of the discipline by drawing upon courses offered by faculty of the Language, Literature, Music, and Art Departments. Although students will be equipped to proceed to graduate and professional schools in theatre, the major is primarily directed toward those interested in studying the theatre as an artistic phenomenon and as an interpretive tool. Because a deep understanding of the theatre requires training and experience with the synthesis on stage, the major includes curricular study of production and performance, as well as continued participation in departmental stage production.

The production arm of the Department of Theatre operates under the supervision of the departmental faculty. Major departmental productions as well as laboratory and experimental productions of all kinds are mounted on the new stages of the 62 Center for Theatre and Dance. Participation in acting or technical work is open to all members of the Williams College community. Students majoring in Theatre will be asked to consult regularly with departmental advisors in devising the sequence of courses and production participation that will constitute their major.

MAJOR
The Major in Theatre consists of nine courses:

Six required courses:
- Theatre 101(F) Introduction to Theatre
- Theatre 103(S) Acting I OR Theatre 204 Acting II
- Theatre 201 Worldbuilding: Staging and Design For The Theater
- Theatre 244 Introduction to Theatre Technology
- Theatre 248 The Modern Theatre: Plays and Performance or Theatre 229 Modern Drama
- Theatre 406 Senior Seminar

Three elective courses must be taken from the department’s other offerings. Some of these electives must be at the 300-level or higher. Substitutions of other Williams' courses, or of Study Abroad courses, will be made only with the consent of the department chair. Students should consult with the department chair regularly in planning a balance of practice and scholarship in their elective choices.

All majors in Theatre are required to participate in a minimum of four production departments in addition to the laboratory requirement for Theatre 244. Participation in at least two of the four must be in technical production and one of those two must be in stage management.

THE DEGREE WITH HONORS IN THEATRE

Candidates for Honors will apply for admission through the submission of a portfolio to the Department Chair by February of their junior year, as well as a description of their proposed project. The project description is a written essay of approximately 750-1000 words that describes in detail the nature, goals, methodology and approximate budget, if applicable, of the proposed course of study to be undertaken in the pursuit of Honors. When developing their project proposals, candidates are encouraged to familiarize themselves with successful past Honors projects from materials provided by the Department. The portfolio will be comprised of four parts:

- The first part will include a list of the courses students have taken relevant to their work towards the major. This list will include courses offered by the Theatre Department, but may also include courses taken in other Departments. Students should also list and describe relevant independent studies and production credits.
- The second part of the portfolio will include a selection of materials developed for these courses and productions listed in Part 1. The selection should include at least three papers or samples of other written work, and might also include design projects, director’s notebooks, studio art projects, actor’s journals or other forms of documentation of the candidate’s work. For students who have taken a semester away, it is particularly important that they provide the Department with a detailed picture of their activities while studying off-campus. Course descriptions and syllabi should be submitted in addition to a list of courses taken and activities performed.
- The third part of the portfolio is an annotated bibliography of approximately twelve dramatic or critical texts the student has read, and that he or she feels have had particular relevance in his or her Theatre education to date. Annotations should be based upon a particular text or portions of text that reflect the area or areas that the student has chosen to emphasize in his or her theatrical training. For instance, one might choose to write from the point of view of an actor, a director, a dramaturg. Generally, annotations should be one or two paragraphs long.
- The portfolio should conclude with a retrospective essay that reflects on the materials that are being submitted. Students should look for connections between the various aspects of their work, state any theoretical positions that they have come to embrace, assess their strengths and weaknesses, and discuss their educational goals for their work with the Department during their Senior year.

The portfolio will be examined alongside the student’s record and his or her project description; a determination will then be made as to admission into the Honors program. Students intending to apply for Honors should meet with the Department Chair or designated Honors Coordinator by the end of the fall semester of their junior year. Once the student is admitted to the Honors program, the department Chair will assign an Honors Project Advisor, who will work with the student to specify a timeline and work program for the completion of the Honors Project. At a minimum, this will entail enrollment in Theatre 493 or 494, plus one other course offered either within the department or elsewhere that the candidate and thesis advisor designate as contributing specifically to the overall goals of the honors work. This honors elective may not fulfill any other portion of the Theatre Major, or any other major the student may be pursuing. All honors candidates will present their completed projects to the Department Honors Committee for evaluation.

STUDY ABROAD

The Theatre Department attempts to work individually with majors and prospective majors who desire to study abroad. In general, with careful planning it is usually quite easy for students to complete the major in Theatre if they study abroad for one semester of their junior year. For those wishing to study abroad for more than one semester of junior year, a more complicated situation may arise, but one that can often be successfully managed through close consultation with the department chair. Students are encouraged to consult with the chair early in their Williams careers if they anticipate a combination of Theatre major and study abroad. You can find general study away guidelines for Theatre here.

THE NATIONAL THEATRE INSTITUTE

The Department of Theatre is affiliated with the National Theatre Institute, which offers additional theatre study through its resident semester program. The Institute is fully accredited by Connecticut College and is a member of the Twelve-College Exchange. Limited numbers of Williams students can therefore be selected to take a full semester of intensive theatre study at the NTI, located at the Eugene O’Neill Memorial Theatre Centre in Waterford, Connecticut. During the semester, students from participating colleges live and work as members of a theatre company gaining experience with professional theatre artists in a workshop environment. Early application is essential.

THEA 101(F) Introduction to Theatre

Class Format: lecture
Requirements/Evaluation: three short papers; in-class writing; mid-term Company studio presentation; final Company performance and portfolio
Extra Info: may not be taken on a pass/fail basis
Prerequisites: none
Enrollment Preferences: none
Enrollment Limit: none
Expected Class Size: 30
Distributional Requirements: Division 1

Fall 2016
LEC Section: 01 MR 01:10 PM 02:25 PM Instructor: Robert Baker-White
LAB Section: 02 R 02:35 PM 03:50 PM Instructor: Robert Baker-White

THEA 103(F) Acting I

This course deals with the development of intellectual and emotional resources required for the actor and will explore an acting technique based on the work of Russian actor and director Constantin Stanislavsky. Students will examine the power of public presence through theory and practice while expanding their talents, sensitivity, and imagination.

Class Format: studio
Requirements/Evaluation: evaluation will be based on committed participation in class, preparation and performance of assigned material, and some modest written assignments
Prerequisites: none
Enrollment Preferences: none
Enrollment Limit: 14
Expected Class Size: 14
Dept. Notes: course is a prerequisite for THEA 204
Distributional Requirements: Division 1
THEA 104 Critical Approaches to Theatre and Performance (D)
Class Crosslistings: THEA 104/COMP 104
This introductory critical survey course will explore a variety of theatre and performance traditions from around the globe, from antiquity to the present day. Through close analysis of selected texts and performance practices in a seminar format, the course will consider what role theatre plays in the exploration and growth of culture, politics, and aesthetics. Topics may include: Ancient Greek theatre, Classical Indian performance, Renaissance English theatre, Japanese Noh and Kabuki, popular American traditions, modern European theatre, and postmodern performance. Films and other media will be utilized when relevant. Regular in-class visits to the William J. Wirtz College Museum of Art will occur, as well. This course meets the criteria of the Exploring Diversity Initiative as it engages in a cross-cultural investigation of performance and explores how theatre is deeply embedded in power relations.
Class Format: seminar
Requirements/Evaluation: 5 structured writing & creative assignments based on thematic elements of the course, as well as a final "Company" performance; in-class participation, writing, & discussion
Extra Info: participation in all LABS; all students enrolled in the course are also required to attend the departmental theatre productions
Prerequisites: none
Enrollment Preferences: Theatre majors and Comparative Literature majors
Expected Class Size: 18
Enrollment Limit: 18
STU Section: 02   M 07:00 PM 09:40 PM   Instructor: Omar Sangare

THEA 201(F) Worldbuilding: Staging and Design For The Theater
Class Crosslistings: THEA 201/ARTS 201
This course examines the designer's and director's creative processes as they work together to imagine the fictional worlds of theatrical productions. Over a series of practical projects in staging, mise-en-scene, and various design disciplines, we will develop techniques for eliciting an initial creative response to a text, developing that response into a point-of-view, and solving the practical needs of the production. Particular emphasis is placed on how design elements synthesize with one another and the work of the actors and director, to form the larger intellectual, emotional, and physical context of the work as a whole. Students will adopt various creative routes throughout a series of assigned projects, giving a broad exposure to the work of designers and directors. Basic presentation skills and technique, as well as methodologies for critical feedback, will be taught as crucial elements of staging and design development.
Class Format: studio
Requirements/Evaluation: evaluation will be based upon committed class participation and thoughtful, timely completion of all assignments and projects
Prerequisites: none
Enrollment Preferences: Theatre majors
Enrollment Limit: 14
Expected Class Size: 12
STU Section: 01   MR 01:10 PM 03:50 PM   Instructor: Kameron Steele

THEA 205(S) The Actor's Instrument
Class Crosslistings: THEA 205
This course will focus on developing two specific areas integral to the actor's craft: process and aesthetic. Different approaches towards the development of an actor's process will be examined: such as self-care, warming-up, character development, rehearsal etiquette and performance ritual. Scene study in a range of styles and genres, from classical to contemporary, Becket to Deavere Smith, "outside in" to "inside out" will be utilized to develop and identify each actor's unique aesthetic. In addition to committed participation in class, students will be expected to complete some modest reading and writing assignments.
Class Format: studio
Requirements/Evaluation: in addition to committed, focused and positive class participation and scene study work, students will be expected to complete some modest reading and writing assignments
Extra Info: may not be taken on a pass/fail basis
Prerequisites: THEA 101 or THEA 103 or, for students with significant prior theatrical experience, permission of instructor
Enrollment Preferences: students intending to major in Theatre
Enrollment Limit: 14
Expected Class Size: 10
STU Section: 01   MR 01:10 PM 03:50 PM   Instructor: Robert Baker-White

THEA 209 Public Speaking: Traditions and Practice
Class Crosslistings: AFR 202/THEA 209
Effective oral communication skills are necessary for any student, regardless of major or area of concentration. This course is designed to give students an introduction to the fundamental of oral communication. We will discuss the critical role of both speakers and listeners within the transactional process of communication. Together we will explore African American oratorical traditions through viewing, listening to, and reading speeches from notable figures such as Frederick Douglass, Fannie Lou Hamer, Barak Obama, and many others. With an emphasis placed on Aristotelian and African American rhetorical methods of persuasion, evidence-based research, and organization, students will gain a better understanding of what it means to be an ethical and responsible communicator. Students will give three formal speech presentations with a focus on informative and persuasive elements. Through discussions, lectures, activities, readings, and speech presentations, students will develop meaningful skills to effectively communicate in the public setting.
Class Format: studio
Requirements/Evaluation: students will give three formal speech presentations with a focus on informative and persuasive elements; through discussions, lectures, activities, readings, and speech presentations, students will develop meaningful skills to effectively communicate
Prerequisites: none
Enrollment Preferences: first-year and sophomore students
Enrollment Limit: 19
Expected Class Size: 19
Distribution Notes: meets Division 2 requirement if registration is under AFR; meets Division 1 requirement if registration is under THEA
THEA 212(F) From Stage to Page: Writing about Dance (W)

Crosslistings: DANC 212/THEA 212

We commonly understand the word "chorography" to mean the creation of dance movement. The Greek roots of choreography, however, are choreia (the synthesis of dance, music and singing) and graphēin (to write). For centuries, people have attempted to pin dance down on the page, translating an ephemeral, embodied performance art into written form. In this writing-intensive tutorial, students will investigate four major modes of dance writing: dance notation or scoring, dance criticism, dance ethnography, and dance history, with a shorter unit on a new avant-garde form, "performative writing." Students will study important examples of each form, such as Rudolf Laban's famed system of dance notation and Katherine Dunham's ethnographic account of dance in Jamaica, Journey to Accompong. Students will then delve into each mode of dance writing. For example, they will work with Mellon Artist-in-Residence Emily Johnson as "scribes" for her creative process, attend live dance concerts at the 82 Center and Mass MoCA as the basis for writing pieces of dance criticism, conduct participant-observation research in the performance season by attending social dance events to write about and ethnographies of their experiences, and work with librarians to learn about resources at Sawyer for researching dance history.

Class Format: tutorial

Requirements/Evaluation: short analytical papers every other week, preparedness for being a respondent and discussant

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: none

Enrollment Preferences: first and second year students

Enrollment Limit: 10

Expected Class Size: 10

Distributional Requirements: Division 1

Writing Intensive

Fall 2016

TUT Section: T1 Canceled

THEA 214(S) Playwriting (W)

Crosslistings: THEA 214/ENGL 214

A studio course designed for those interested in writing and creating works for the theatre. The course will include a study of playwriting in various styles and genres, a series of set exercises involving structure and the use of dialogue, as well as individual projects. We will read and write, beginning with small exercises and working toward a longer final project. Students will be expected to share in and respond to each other's work on a weekly basis, and to present their own work regularly. At the end of the term, we will share our collaborative work with the community as part of an open studio experience.

Class Format: seminar

Requirements/Evaluation: evaluation will be based on attendance, completion of all class assignments, and class participation

Prerequisites: none

Enrollment Preferences: Theatre and English majors

Enrollment Limit: 14

Expected Class Size: 14

Distributional Requirements: Division 1

Writing Intensive

THEA 236 Political Theatre Making

Placing twentieth-century theatricality in the context of its historical roots in Western theatre, this course will examine a broad range of types of protest movements. From the biting observations of the British class playwrights such as Oscar Wilde, Noel Coward, and John Osborne, to mid-century American political writers such as Clifford Odet and Edward Albee, and Italy's Dario Fo, to the relentless satire of contemporary South African performers such as Pieter Dirk-Uys, we will investigate dramatic writing and performance style as aspects of social and political resistance. Other groups studied may include the protest theatre of Johannesburg's Market Theatre,
Luis Valdez’s Teatro Campesino, and a younger generation of post-apartheid experimentation in multi-ethnic South African theatre.

Prerequisites: none, though first-year students must get permission of instructor

Enrollment Limit: 15

Distributional Requirements:
Division 1

THEA 241(S) Performing Masculinity in Global Popular Culture (D)

Crosslistings: WGSS 240/AMST 241/LATS 241/THEA 241/SOC 240

This course examines popular cultural contexts, asking what it means to be a man in contemporary societies. We focus on the manufacture and marketing of masculinity in advertising, fashion, TV/film, theater, popular music, and the shifting contours of masculinity in everyday life, asking: how does political economy shape the icons and ideologies of masculinity? How is masculinity marketed abroad and the curious blend of chastity and homoeroticism that constitutes masculinity in the contemporary vampire genre. Through these and other examples, we learn to recognize masculinity as a performance shaped by the political economy of a given culture. The course includes a field trip to a drag performance in Northampton.

Class Format: seminar

Requirements/Evaluation: masculinity journal, mid-term essay, visual analyses of pop culture artifact, choice of final essay or 8-10 page final paper, short field trip reaction essay

Prerequisites: none

Enrollment Preferences: in the event of over-enrollment, a short statement of interest will be solicited

Enrollment Limit: 20

Expected Class Size: 20

Distribution Notes: meets Division 2 requirement if registration is under AMST, LATS, SOC or WGSS; meets Division 1 requirement if registration is under THEA

THEA 242 Body of Knowledge

Crosslistings: DANC 242/THEA 242

This is a movement course designed for creative thinkers, such as dancers, actors, musicians, and visual artists. The body is the sole mediator of human experience and the site where all creative work resides, so we must integrate movement as a source and resource in our work. We will engage the body as an expressive tool in support of artistic craft and technique and build confidence in our ability to translate creative impulses through physical action. We will focus on the kinetic application of movement in the art-making process, using core energy, dynamics, breath connection, strength, flexibility, stamina, and relaxation techniques in order to integrate our creative output. We will also examine how movement informs creative work across disciplines through readings, films, and museum visits.

Class Format: studio and seminar

Requirements/Evaluation: students will be assessed individually based on active class participation, journals, and final project

Prerequisites: experience in dance, acting, music, or the visual arts, or by permission of the instructor

Enrollment Limit: 12

Expected Class Size: 12

Distributional Requirements:
Division 1

Not Offered Academic Year 2017

THEA 243 Opera Since Einstein (W)

Crosslistings: MUS 244/THEA 243

After 400 years, we might assume we know what "opera" is. However, in recent decades the genre has moved far beyond our preconceptions. This course asks us to examine opera of the last forty years with fresh eyes and ears, expanding our understanding of the term to include the interdisciplinary, multimedia, cross-cultural work that has been created by composers, directors (Peter Greenaway, Peter Sellars, Robert Wilson), filmmakers, choreographers, and visual artists in that period. Using the 1976 premiere of Philip Glass's seminal Einstein on the Beach as a starting point, we will examine such diverse works as Adams's Nixon in China and The Death of Klinghoffer, Glass’s Satyagraha, Tan Dun’s Marco Polo, Neuwirth's Lost Highway, Unsuk Chin's Alice in Wonderland, Andriessen’s Writing to Vermeer, Ades's Powder Her Face, Muhly's Two Boys, Monk's Atlas, and Ashley’s television opera, Perfect Lives. We will also seize the opportunity to study Greenstein’s new opera project, concurrently under development for production during the semester.

Class Format: discussion/lecture

Requirements/Evaluation: evaluation based on several short papers and a final exam. All students will take the final: "scholar" students will have rigorous expectations in the writing of papers; "actor" students will have intermediate expectations; "dramaturg" students will have general performance expectations

Prerequisites: none

Enrollment Preferences: none

Enrollment Limit: 20

Expected Class Size: 15

where what is spoken is always open to skeptical scrutiny. We might say theatre is always lying as much as lying is always theatre.) This tutorial course will examine what lies hidden in American plays from the late nineteenth century to the early twenty-first. Beginning with excerpted critical and historical writings on secrecy and lying (The Adventures of Pinocchio, Machievelli's The Prince, Thomas Carlson's Lying and Deception: Theory and Practice, among others), we will proceed to a set of American plays from across a wide spectrum of playwrights, including Edward Albee, Suzan-Lori Parks, Sarah Ruhl, Sam Shepard, Eugene O'Neill, Arthur Miller, David Mamet, Amy Herzog, and others. Students will explore how hidden knowledge structures dramatic action, how different characters create and respond to untruths, and what can we learn in particular from American drama about a national relationship to honesty and its opposites.

Class Format: tutorial
Requirements/Evaluation: weekly papers/response papers; weekly meeting with instructor and tutor; test; final project.
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none
Enrollment Preferences: Theatre majors, English majors

THEA 280 Art of the Commons: Social Practice, Participatory Art and Performing Publics (D)
Crosslistings: THEA 280/ARTH 280
What responsibility does art have to its public? How is art a "social practice"? What is the model of the "cultural commons" and how might it be reshaping the way we make art today? This combined seminar and studio course will begin by exploring the concept of the "commons" as a cultural resource belonging to all members of a community. Drawing from recent scholarship, theory and debates across disparate fields (law, economics, history, theatre and performance studies, and art) we will first define the "cultural commons" of Williams College and Williamstown. We will then design and implement a series of art and performance projects involving participation, collective labor and ownership, community building, utopianism, active spectatorship, and public space. Students will also conduct and present to the class independent research on contemporary artists (Theaster Gates, Mieke Lademann Ukeles, Santiago Sierra, Francis Alÿs, Tino Sehgal, Paul Chan), collectives (The TEAM, The Civitians, GoGo Girls, Sojourn Theatre, The Neofuturists, Ghana Think Tank), and community-based initiatives in our local art institutions (WCMA, Mass MoCA, The Clark). Readings on participatory art, happenings, relational aesthetics, social works, and utopias may be drawn from such authors as: Allan Kaprow, Theodor Adorno, Augusto Boal, Nato Thompson, Jacques Rancière, Peggy Phelan, Shannon Jackson, Claire Bishop, Grant Kester, Nicholas Ridout, Jill Dolan, José É. Muñoz, Guillermo Gomez-Peña and Rebecca Schneider. This course fulfills the Exploring Diversity Initiative by engaging directly with questions of how diversities of gender, race, class, and sexuality may be embraced rather than negated by communal forms of art making.

Class Format: seminar
Requirements/Evaluation: weekly writing; two "workshop" showings; public art or performance project; one 15-minute oral presentation; one 10- to 12-page paper; active participation
Prerequisites: none
Enrollment Preferences: Art Majors, Theatre Majors
Enrollment Limit: 14

THEA 284 Writing for Film, Video, and Performance (W)
Crosslistings: ARTS 284/THEA 284
This is a writing workshop for the time-based arts. We will study the use of language in a variety of kinds of film, video, and performance-based artworks. We will study examples in avant-garde film, video art, performance art, essay films, and explore the use of language and syntax of these forms in relation to, and in contrast with, popular cultural forms. The second half of the course will focus primarily on narrative screenplay. The main goal of this course is to identify and generate a thematic, tonal, and narrative sensibility that is specific to each student. Students will create monologues, voiceovers, screenplays and avant-garde forms, and will also write several response papers about the use of language in film, video, and performance.

Class Format: studio
Requirements/Evaluation: grades will be based on in-class writing, weekly assignments, participation in workshop discussion and critiques, and video-sketches that visually demonstrate ideas generated through writing

THEA 302T Scenic Design and Experimental Performance
Crosslistings: THEA 302/ARTS 221
In contemporary experimental theater designers are essential parts of the ensemble, contributing equally to devised work alongside directors, writers, performers and dramaturgs. Design is not viewed as a response to the script, but rather an initial condition: a world whose creation describes the limits of the play while also providing the necessary components for that play to exist. In this way the act of designing and the act of devising can be seen as inextricably entwined—even interchangeable.

The course involves a series of both historical and theoretical research and methodologies utilized to create stage environments in traditional and experimental modes. Grounded in textual analysis and research, and emphasizing process, critique, and revision, we will create theoretical stage designs in response to a variety of performance texts. These may include plays, musicals, opera, physical- and dance-theater, and other work that is deeply grounded in the physicality of performer, spectator and performance environment. Emphasis will be on sketching and model-making as the primary means for developing and communicating design ideas. Drafting and digital tools will also be factors in course work, which will include training and mentorship in all materials and craft.

Class Format: tutorial
Requirements/Evaluation: evaluation will be based upon committed class participation in discussion and critique, as well as thoughtful, timely completion of all assignments and projects
Extra Info: may not be taken on a pass/fail basis
Prerequisites: THEA 201 or permission of instructor
Enrollment Preferences: Theatre and Art majors
Enrollment Limit: 10
Expected Class Size: 6
Dept. Notes: this course does not count toward the Art major
Materials/Lab Fee: lab fee of $125 to be added to the student's term bill
Distributional Requirements: Division 1
Not Offered Academic Year 2017
TUT  Instructor: David Gurcay-Morris

THEA 303 Stage Lighting
A study of the art and techniques of stage lighting. This class will provide instruction in the basic physics of light and color; the use of angle, intensity, color, texture and movement of light as compositional tools; various kinds of stage lighting instruments and their uses; conceptual development of a lighting design; translation of concept into light plot and channel hookup; focusing the plot in the theater; and writing cues. The course will use texts and scores of plays, musicals, opera and dance to discover and evaluate the lighting design process. There will be primary source and supplemental technical readings for each class meeting. The class format will be a combination of lectures, discussions and practical labs.

Class Format: lecture/lab
Requirements/Evaluation: evaluation will be based on class participation, successful completion of weekly projects, thorough technical understanding of a basic stage lighting system, and performance on a final project
Prerequisites: THEA 201 or permission of instructor
Enrollment Limit: 14
Expected Class Size: 8
Distributional Requirements: Division 1
Not Offered Academic Year 2017
LEC  Instructor: Natalie Robin

THEA 305 Costume Design
Crosslistings: THEA 305/ARTS 200
This course is both an introductory and an intensive study of the art of costume design. The course focuses on the designer's process: script analysis, collaboration, research, color theory, basic design principles, rendering techniques, fabric research, organizational skills and presentation of designs.

Class Format: studio
Requirements/Evaluation: evaluation will be based on multiple design assignments including a detailed final design project, costume labs, image and research files, costume sketchbook, short papers, committed participation, and the design portfolio
Extra Info: students are required to attend two to three theatre department or approved performances during the semester; students will also be expected to partake in intelligent critiques of fellow classmates' design work
Prerequisites: successful completion of any 200-level course in any of the fine or performing arts or permission of instructor
Enrollment Preferences: Theater and Art Studio, sophomores and juniors
THEA 306(S) Acting III: An Actor in Action
This course for advanced students of acting will focus on particular aspects of performance as determined by the instructor in each semester, in which the course is taught. Topics may include acting in verse drama, movement for the actor, voice, performing Shakespeare, aspects of physical theatre, non-realistic acting, etc. The course will be taught by members of the Theatre faculty and/or Guest Artists, and may be repeated by students as instructors and topics change. Texts and reading assignments will vary depending on each semester's focus.
This semester, Theatre 306 will provide students with the opportunity to work in a full-scale departmental stage production. The play will be announced in the preceding semester, and students will be encouraged to sign up for this course during preregistration periods. Preregistered students will be invited to audition, and will be enrolled if appointed for specific roles. During the semester, students will explore the production through analysis, supplemental research, discussions, and exercises. The process will include working on individual character and interacting with other actors in scenes, and the final performances will be open to the public at the end of the semester.
Class Format: studio
Requirements/Evaluation: evaluation will be based on committed participation in the production process and quality of final performance on stage
Prerequisites: permission of instructor
Enrollment Limit: 13
Expected Class Size: 13
Distributional Requirements: Division 1

STU Section: 01   MW 07:00 PM 09:40 PM   W 01:10 PM 03:50 PM Instructor: Omar Sangare

THEA 307 Stage Direction
An introduction to the resources available to the Stage Director for translating interpretive concepts into stageworthy physical realization. Kinetic and visual directorial controls, as well as textual implications and elements of dramatic structure, and strategies of working with actors and other collaborators will be studied in detail. Most assignments will involve hands-on directing projects presented in class for collective critique.
Class Format: studio
Requirements/Evaluation: evaluation will be based principally on committed participation in the preparation and performance of production exercises; there will be some written assignments, including the assembly of directing production books and critiques of several productions
Prerequisites: THEA 103 and THEA 201 or permission of instructor
Enrollment Preferences: those who have also taken THEA 204
Enrollment Limit: 12
Expected Class Size: 8
Distributional Requirements: Division 1

Not Offered Academic Year 2017
STU Instructor: David Eppel

THEA 308 Directing
This course is geared towards those who aspire to carry out a directorial vision for an audience. We will explore the defining creative concept, selecting dramatic material, analyzing text, working on dramatic structure, and making artistic choices in aspects of production design and acting. The class will conclude with a final project in which students will create a brief stage performance, a piece of performance art, or a short stage play designed for a video recording.
Class Format: studio
Requirements/Evaluation: evaluation will be based on committed participation in research and class discussions, general progress in the creative process, and quality/effectiveness of the final project
Prerequisites: at least one class taken in the theatre department, or permission of instructor
Enrollment Preferences: those who have also taken any other class in the Theatre department
Enrollment Limit: 10
Expected Class Size: 8
Distributional Requirements: Division 1
Other Attributes: FMST Related Courses

Not Offered Academic Year 2017
STU Instructor: Omar Sangare

THEA 309(S) The Ancient Greeks: Page To Stage
Drama from Ancient Greece-written around the 5th century BCE by Euripides, Sophocles, Aeschylus, Aristophanes, and others-has enthralled and captivated audiences throughout the ages. In our times too, theatre makers around the world continue to return to Ancient Greek drama to reflect the state of our world, the chasm between rich and poor, warfare, migration, refugee crises, the terror of tyranny, clashes between religions, and the walls erected to separate people. In this stage directing course, we will explore the process of taking an ancient play and placing it within a framework, whether on a stage or another site, so that an audience may recognize something about its world. How and why does a director re-imagine the play for contemporary audiences? How does a work like Euripides' Medea transform from a formalized event with mandatory presentations in the Theatre of Epidaurus in 490 BCE to a contemporary production in which Medea, wearing a 1950's housedress, her dreadful deed, stands exhibited in a plastic kiddie pool covered in the blood of her children, yelling at their father, who has run off with a younger woman? How does a director create a new world of Medea, in which the horror of infanticide remains? Reading several ancient plays, students will each be assigned one, and over the course of the semester, imagine a performance with all of its production elements: setting, acting styles, rehearsal methods, historical period, to name a few. We will watch films of the work of contemporary directors and read accounts of modern versions of those productions. Finally, the choices that a director makes are very personal. Presentations will reflect each student's personal journey to bring that play to life. Finally, this course asks of students: what is your personal response to this play?
Class Format: studio
Requirements/Evaluation: class participation, completion of weekly assignments, final written presentation of a play, and a fully mounted moment or scene
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: THEA 101, THEA 201, or permission of the instructor
Enrollment Preferences: Theatre Majors
Enrollment Limit: 14
Expected Class Size: 14
Distributional Requirements: Division 1

THEA 310(S) Tragic Stages
Crosslistings: ENGL 308/THEA 310
The earliest surviving tragedies were composed for Athens' theater of Dionysus. Performed as part of a religious festival, they played on an outdoor stage that seated 12,000 spectators. When tragedy was revived 2000 years later, it addressed itself to a new audience. The gods were dispatched. Chorus and masks dropped away in favor of sword fights and pig's blood. In this course we will consider both tragedy's invention and its reinvention. What happens when human suffering, once staged for ritual purposes, becomes a subject of mass entertainment? Works will include plays by Sophocles, Euripides, Seneca, Marlowe, Shakespeare, and Racine.
Class Format: seminar
Requirements/Evaluation: papers and short exercises
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: a 100-level ENGL course of a score of 5 on the AP English Literature Exam, or a score of 6 or 7 on the Higher Level IB English exam
Enrollment Preferences: English majors

THEA 317 Black Migrations: African American Performance at Home and Abroad
Crosslistings: AFR 317/COMP 319/DANC 317/ENGL 317/THEA 317/A
In this course, students will investigate, critique and define the concepts of migration, diaspora and diaspora within primary attention to the experiences of African Americans in the United States and Europe. Drawing on a broad definition of performance, students will explore everything from writing and painting to sports and dance to inquire how performance reflects, critiques and negotiates migration experiences in the African Diaspora. For example, how did musician Sidney Bechet's migration from New Orleans to Chicago to London influence the early jazz era? How did Katherine Dunham's dance performances in Germany help shape her prize-winning black dance aesthetic? Why did writer/dramatist Baishev go all the way on Switzerland to write his first novel on black, religious culture in Harlem? What drove actor/singer Paul Robeson to Russia, and why did the U.S. revoke his passport in response to his speeches abroad? These questions will lead students to investigate multiple migrations in the African diasporic experience and aid our exploration of the reasons for migration throughout history and geography. In addition to critical discussions and written analysis, students will explore these topics through their own individual and group performances in class. No prior performance experience is necessary.
Class Format: seminar/discussion
Requirements/Evaluation: evaluation will be based upon class participation, in-class student performances, several 2-page performance response papers, one 10- to 12-page research paper, a final performance with a 3-page report
Extra Info: may not be taken on a pass/fail basis
THEA 322 Race, Gender, and Performance from Literature to Social Media (D)
Crosslistings: WGSS 330/COMP 339/AMST 332/LATS 335/THEA 322
How can contemporary performance expand ideas and practices of belonging in the United States, as figured through race, gender, and sexuality? This spring course will begin with readings of dramatic literature including Suzan-Lori Park’s The Prince of Broadway; Dot Tabor’s The Shipment to analyze literary and staged performance, then continue to discussions and readings on the performance of everyday life via the work of performance artists including Adrian Piper, Nao Bustamante, and Yoko Ono. We will develop shared vocabulary and methodologies of performance studies, including readings by scholars including J.L. Austin, Judith Butler, and José Esteban Muñoz. This course will engage foundational texts to performance studies and offer an interdisciplinary approach to scholarship in gender and sexuality studies, critical ethnic studies, and performance studies from the 1970’s to the present. This course recognizes a suspicion for diversity discourses that universalize human experience and asks: how do we resist normativizing forces without reinforcing the regulating logics of those forces? This course will critically engage with diversity from the heterogeneous and multiple perspectives of racial, sexual, and gender minorities, asking students not only to examine the diversity of human experience but to explore the political stakes of creative expression through interdisciplinary methods and forms.
Class Format: seminar
Requirements/Evaluation: in-class participation, partnered presentation, weekly reading responses, performance analysis, final paper
Extra Info: not available for the fifth course option

Not Offered Academic Year 2017
SEM Instructor: Vivian Huang

THEA 323 New Orleans as Muse: Literature, Music, Art, Film and Theatre in the City
Crosslistings: THEA 330/COMP 330/AMST 331
This course will look at the representation of a city and how it has influenced artists. Students will read, listen to, and view a selection of the literature, music, film and art that represent the city from both pre-flooding and current re-building. Reading selections will include examples such as Harper’s Weekly (Lafradico Hearn), The Awakening (Kate Chopin), A Streetcar Named Desire (Tennessee Williams), The Moviegoer (Walker Percy), Why New Orleans Matters (Tom Piazza), A Confederacy of Dunces (John Kennedy O’Toole), New Orleans Sketches (William Faulkner), One Dead in the Attic (Chris Rose).
Film examples such as A Streetcar Named Desire, An Interview with a Vampire, The Curious Case of Benjamin Briton, When the Lovese Broke, Treme, Waiting for Godot (in the 9th Ward). Music selections from examples such as Louis Moreau Gottschalk, Jelly Roll Morton, Louis Armstrong, Fats Domino, The Meters, Kermit Ruffins and the Rebirth Brass Band. Art selections will come from a variety of sources such as THE OGDEN Museum of Southern Art and Prospect 1, 2, & 3.
Class Format: seminar
Requirements/Evaluation: will be on active participation, weekly response essays on film viewings, 2 short essays on class topics, a final paper and a contemporary creative project/performance
Prerequisites: none

THEA 325 A Room that Pretends to be Another Room: Scenography in Theory and Practice
How have designers and directors thought about theatrical space? How successfully have their theories aligned with their practice? How are the ideas of the great European and American scenographers being re-imagined, reused, or abused on today’s stages? In this tutorial we will take a hybrid approach to the study of scenography, blending theoretical, historical, and critical readings about stage design with a studio component that focuses on formulating an artistic response to those ideas. Our study of scenography will span a hundred years from Robert Edmund Jones to Nature Theater of Oklahoma, examining the ideas of Josef Svoboda, Bertolt Brecht and Caspar Neher, Mielziner, Lee, and Conklin; Wilson, Foreman, and The Wooster Group; and Contemporary New York experimental theater. Assignments will alternate between writing short papers and creating preliminary scenic designs; both done in response to the designers or periods being examined in the readings. Introductory drawing and/or some scale model-making experience would be useful, but is not absolutely required.
Class Format: tutorial
Requirements/Evaluation: evaluation will be based on critical analysis & discussion of readings, and active participation in critiques of creative work; assignments will consist of response papers alternating with design projects
Extra Info: that include visual research, sketches and/or scale models; there will be a final public presentation or display of all students’ work at the end of the semester
Prerequisites: one of the following: THEA 101, THEA 201 (ARTS 201), THEA 248, ARTS 100; or permission of instructor
Enrollment Notes: majors: Theatre majors
Enrollment Limit: 10
Expected Class Size: 6
Materials/Lab Fee: fee of up to $100 for materials and copying to be added to student term bill
Distribution Requirements: Division 1
Not Offered Academic Year 2017
TUT Instructor: David Gurcay-Morris

THEA 328 American Social Dramas (W)
Crosslistings: SOC 328/AMST 328/COMP 325/THEA 328
As Shakespeare wrote memorably in As You Like It, "All the world's a stage, and all the men and women merely players." Sociologists have heeded Shakespeare's wisdom, arguing that social and political events are "performances" that take shape in accordance with familiar cultural scripts, and indeed that social actors implicitly interpret real-world events using plot structures from literary and dramatic genres such as romance, irony, comedy, and tragedy. We will explore this thesis through the lens of contemporary American political events, including the Clinton-Lewinsky scandal, September 11, Hurricane Katrina, the 2012 presidential election, and current debates over Confederate symbolism. We will also pay careful attention to the unfolding drama associated with the 2016 presidential election. How do social performances and struggles to "control the narrative" shape the meanings and outcomes of political events? Are they merely "spectacles," or wellspring for genuine civic participation? What role do political comedy, satire, and media play in shaping the trajectory of contemporary events? Major authors will include Victor Turner, Clifford Geertz, J.L. Austin, Erving Goffman, and Jeffrey Alexander. Throughout the semester, each student will develop a significant project on a political event of his or her choosing.
Class Format: seminar
Requirements/Evaluation: active participation, five 2-page response papers, a 12-page paper that will go through draft and revision stage, and a presentation
Prerequisites: none
Enrollment Preferences: Anthropology and Sociology majors
Enrollment Limit: 15
Expected Class Size: 15
Distribution Notes: meets Division 2 requirement if registration is under SOC or AMST; meets Division 1 requirement if registration is under COMP or THEA

THEA 340(F) Twentieth and Twenty-First Century Struggle Theatre

This course explores the impact of theatre on communities in general and on societies existing under specific circumstantial contexts. The seminar investigates the power of theatre to influence, enlighten, and transform audiences within commonly lived sociopolitical systems. Over the course of the 20th and 21st centuries, theatre has provided a space where—within that frame and within the context of the theatre—people have lived and struggled. The opposition can, somehow, be voiced. The theatre is a place of parable and of storytelling, a place where comedy, satire, and tragedy find within their audiences both recognition and identification. Put this way, theatre can be and has been a powerful and dangerous tool. The course will consider "Struggle Theatre" across a range of contexts, including: anti-apartheid South African protest theatre from the 1950s to 1980s; theatre movements in Eastern Europe during the Cold War; United States Depression-era and and Viet Nam protest theatre; theatre in Brazil, Chile, Argentina and other South American countries during their periods of military dictatorships. We will look at current theatre movements in the USA as well as in the Middle East & North African Region, (MENA) and Europe. Readings will include theorists from literary studies, anthropology, cultural studies, and related fields, as well as primary texts from drama and other arts.

**Class Format:** seminar

**Requirements/Evaluation:** committed participation in class, on-time completion of assignments, one major staged event during the semester, where possible; a final, fully imagined project

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**Prerequisites:** THEA 101 or a 200-level Theatre course or permission of instructor

**Enrollment Preferences:** Theatre majors

**STU Section:** 01  TR 11:20 AM 12:35 PM  Instructor: David Eppel

THEA 342 Solo Performance

This is an acting course in which students will study the art and skill of monologue. We will look at the concepts of soliloquy and monologue and "one-person performance", both from the points of view of content, and context—that is the relationship between the performer and the work, and between the performer, audience, and the audience. The course will culminate in a performance during the Theatre Department's annual Dialogue One Festival.

**Requirements/Evaluation:** students will identify an historical figure on which to base their final monologues, and the work will entail intensive study of that performer

**Prerequisites:** THEA 103 or permission of instructor

**Enrollment Preferences:** Theatre majors

**Enrollment Limit:** 10

**Expected Class Size:** 10

**Distributional Requirements:** Division 1

**STU Instructor:** David Eppel

**Not Offered Academic Year 2017**

THEA 345(S) Contemporary Theatre and Performance

**Crosslistings:** THEA 345/ENGL 349/COMP 355/AMST 345

As Gertrude Stein once remarked, "The hardest thing is to know one's present moment." What is going on in theatre and performance today? What are the hot topics? Who are the writers, performers, and directors of our recent past and present moment? This seminar course will consider both experimental and mainstream drama and performance mainly in the U.S. from the past twenty years, focusing on topics such as: postmodern performance, theatre of images, auteurs-directors, new realism, identity theatre, eco-theatre, performance art, postdramatic theatre, devised performance, virtuosic theatre, immersive theatre, social practice, neo-collectivism, and more. As part of the seminar, students will conduct individual research on selected topics and present their findings through oral reports. We will take a tour of the world to see a show and speak with contemporary theatre makers. Artists and groups considered may include: The Wooster Group, Richard Foreman, Robert Wilson, Meredith Monk, Edward Albee, Maria Irene Fornes, Sam Shepard, Caryn Churchill, Tony Kushner, Suzan-Lori Parks, Sarah Kane, Will Eno, Richard Maxwell, Young Jean Lee, Annie Baker, Branden Jacobs-Jenkins, Quiara Alegría Hudes, Anne Washburn, Elevator Repair Service, Nature

**Fall 2016**

**STU Section:** 01  TR 02:35 PM 03:50 PM  Instructor: Omar Sangare

THEA 346 To Be Or Not To Be: Theatrical Decision-Making

This advanced acting course will examine a wide range of motivations, decisions, mistakes, and consequences that dramatic characters encounter. Through discussions and analysis of selected plays, students will find key moments that define tragedy, and world the ways in which characters change their behavior to resolve conflict. How do characters respond to problems? Could they make better choices? What can we change about our own decision-making? How do we protect ourselves from mistakes? Further, in a student-devised theatre project, the course will be included, a final project, a rehearsal room and a final performance. The results of our exploration will be presented in a final performance. This theatrical experience will prepare students for future challenges on the stage of life.

**Class Format:** studio

**Requirements/Evaluation:** evaluation will be based on committed participation in class, and preparation and performance of assigned material

**Prerequisites:** None

**Enrollment Preferences:** Theatre majors

**Enrollment Limit:** 10

**Expected Class Size:** 10

**Distributional Requirements:** Division 1

**STU Instructor:** David Gurcay-Morris

**Not Offered Academic Year 2017**

THEA 350 Devised Performance Studio

**Crosslistings:** THEA 350/ARTS 250

This course offers students a hands-on experience of devising new performance work as an ensemble. Through an examination of innovative, non-traditional models for performance creation used by contemporary theater and art collectives (including Théâtre du Soleil, Complicite, Nature Theatre of Oklahoma, Elevator Repair Service, Big Art Group, The Civilians, The T.E.A.M., and National Theater of the United States of America), this class will form its own unique structure for developing and producing a new theatrical experience. A major emphasis of the course will be on experiential education, which provides an invaluable opportunity to encounter firsthand the highly complex relationships present in collaborative creation. The course will also include guest classes with practitioners from the profession and other members of the Departments of Theater, Music, and Art, who can provide a full range of skills for the student ensemble to utilize during the devising process. Work-in-progress presentations spaced regularly throughout the semester will provide opportunities to receive feedback from small, invited audiences, as well as the opportunity to learn how to process and apply that critique to an ongoing creative process. At the end of the semester the accumulated work will have a public presentation in a workshop format.

**Class Format:** studio

**Requirements/Evaluation:** participation, individ presentations, contribution to group work, self-evaluation

**Extra Info:** students will contribute to the creation and presentation, by the group as a whole, of a newly devised performance piece

**Prerequisites:** none

**Enrollment Preferences:** the instructors will balance the course by level of prior theatrical experience

**Enrollment Limit:** 14

**Expected Class Size:** 10

**Distributional Requirements:** Division 1

**STU Instructor:** David Gurcay-Morris

THEA 360 The Body as Book: Memory and Reenactment in Dance & Theater

**Crosslistings:** THEA 360/DANC 303/COMP 360

What does it mean to conceive of the body as a book? This unique interdisciplinary studio/seminar course examines how dance and theater channel, preserve and transmit stories and cultural memory through individual and collective bodies. Dance and theater are traditionally defined as ephemeral arts, bounded by the limits of linear time and space. Yet, as Rebecca Schneider writes, “time is decided folded and fraught.” Repetition
and reenactments are forms of remembering, and performance is often not what disappears but what remains. How do we pass on knowledge in visceral and present dance and theater pieces in the new library.

Class Format: studio

Requirements/Evaluation: evaluation will be based on collaborative-based project work, individual research, writing and final performances

Prerequisites: no prior dance or theatre training is required

Enrollment Preferences: students majoring in Dance, Theatre, American Studies and Art

Enrollment Limit: 14

Expected Class Size: 10

Distributional Requirements: Division 1

Not Offered Academic Year 2017

STU Instructor: Amy Holzapfel

THEA 361(F) Writing about Bodies (W)

Crosslistings: ARTH 361/INTR 361/WGSS 361/THEA 361

The goal is to think about describing bodies from a variety of disciplinary approaches and genres of writing. Its focus is on living bodies, or bodies that were once alive, with an emphasis on bodies that move i.e., performing bodies—actors, dancers, singers—and what makes them unique. We will also consider objects associated with bodies, and the ways they are animated, including how they are animated when the person who had them dies. The course is meant for juniors, seniors, and graduate students who wish to analyze bodies from different disciplinary formations—art, theatre, literature, anthropology, philosophy—and who have a particular interest in writing. We will read scholarly writing, fiction, New Yorker profiles, as well as memoir/autobiography, and take each as a model through which to write about a person or an object redolent of a person.

Among possible readings: Roland Barthes on cultural theory and representation; Claudia Rankine and Robin Coste Lewis on black bodies; Tamar Garb on portraiture; Elaine Scarry on the body in pain; Joan Acocella, Hilton Als, Judith Thurman and other writers on the arts; Judith Butler and Peggy Phelan on the performative body; Marvin Carlson and Terry Castle on haunting; and Bill Brown and Mark Doty on things. In addition to readings, assignments include performances at the '62 Center and works on view at WCMA, as well as selected tapes of live performances as well as films.

Class Format: tutorial

Requirements/Evaluation: alternating weekly essays (4-5 pages) and responses (2-4 pages) as well as discussion; one to two group meetings

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: ARTH 101-102, or permission of instructor; a writing sample that conveys the kind of subject you might be interested in pursuing

Enrollment Limit: 10

Expected Class Size: 10

Distribution Notes: meets Division 1 requirement if registration is under ARTH or THEA; meets Division 2 requirement if registration is under INTR or WGSS

THEA 362(F) East Meets West: America, Japan, Theatre (W)

This course is a practicum, featuring an investigation of traditional and contemporary East Asian Arts and their influence on performance in the Americas and Europe; culminating in a staged play based on a traditional Noh text. The theoretical/historical work will include weekly readings, viewings and discussion of various lead artists, forms and movements. The studio work will involve reading, rehearsal and performance. Drawing on Professor Steele’s experience with traditional Noh, as well as contemporary directors Tadashi Suzuki and Robert Wilson, the course will focus primarily on Japanese post-Mejii-era performing Arts and their influence on the Western and American art world. Artists/forms/movements to be studied are: Noh, Kabuki, Tadashi Suzuki, Lee-Chen Lin, Robert Wilson, Adrianne Mnouchkine, Claude Debussy, Martha Graham, Yukio Mishima, Erika Ehnh, John Cage and Yosho Iida.

Class Format: studio

Requirements/Evaluation: 35% attendance, 35% class participation, 30% writing

Extra Info: may not be taken on a pass/fail basis

Prerequisites: none

Enrollment Preferences: Theatre majors, Asian Studies majors

Enrollment Limit: 20

Expected Class Size: 14

Dept. Notes: course will be a practicum, combining reading and class discussion with physical training, rehearsal and performance

Materials/Lab Fee: $30.00

THEA 385(S) The Sculptural Costume and It's Performance Potential

Crosslistings: ARTS 385/THEA 385

A team-taught studio art / theatre course designed to explore the rich territory of the wearable sculpture and its generative role in art and performance. From ritual costumes, to Carnival, to Dada performance, to Bauhaus dance, to Hello Oticica’s Parangole, and Nick Cave’s sound-suits, there has been a rich tradition of sculpture and costumes merge. Students will study artists who have bridged distinctions between the theatrical costume and the sculptural object as well as produce hybrid objects that explore the range of possibilities within this collaborative practice. The students will produce object-costumes involving a wide variety of media, from recycled materials to new technologies, while striving to develop their individual artistic voices.

Class Format: studio

Requirements/Evaluation: evaluation will be based on the quality of work produced, the depth and quality of the content and process, participation in critiques, and attendance

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: successful completion of any 200-level course in art studio or performing arts, or permission of the instructor

Enrollment Preferences: Art and Theater majors

Enrollment Limit: 14

Expected Class Size: 12

Materials/Lab Fee: $75

THEA 406(F) Senior Seminar: Theatre, Ritual, Play

This seminar is a revolving topics seminar. The subject matter and reading list for each iteration of the course will be determined by the instructor, but will in each instance focus on a current or historical question of theatre theory and practice. It is understood that the subjects addressed in the course will be broad enough to engage the varied interests of each senior class. The specific requirements for the class may vary, but in all cases students will be required to present original research and analysis in a public seminar presentation at the end of the semester. In Fall 2016 the seminar will explore the interrelated cultural phenomena of theatre (or, more broadly, performance), ritual and play. Each of these memes may be considered as a particular attribute of any human activity generally, as a means of communication between or among people, as a subject or field of scientific inquiry, or as a facet of artistic cultural production. The purpose of the seminar will be to explore each of these phenomena on their own terms, and then to investigate some of the ways in which they intersect in the spheres of art, religion, popular culture, and everyday life. Readings will include theorists from literary studies, anthropology, cultural studies, and related fields, as well as primary texts from drama and other arts.

Class Format: seminar

Requirements/Evaluation: project work, and presentation of original research and analysis in a public setting at the end of the semester

Prerequisites: limited to senior Theatre majors

Enrollment Preferences: Theatre majors only

Enrollment Limit: 4

Expected Class Size: 4

Distributional Requirements: Division 1

Fall 2016
THEA 438(F) Introduction to Dramaturgy: The Art of Adaptation

The dramaturge is an important collaborator in the theatrical production process, playing the multi-faceted role of historian, cultural critic, audience educator, and supporter of the production team. Working closely with the director and design team, the dramaturge helps to shape a production and facilitate the demanding process of creating a world on stage. This advanced seminar course will introduce students to the fundamentals of production dramaturgy, applying our study of the practice to the more focused topic of the dramaturge’s role as an adaptor and translator in the creative process of the piece making. As a major creative dramaturgical project for the course, students will choose a mythical or classical inspirational source material to be adapted into a written performance piece. Along with creating our own projects, we will explore how contemporary visual, musical, or otherwise) and adapt it into a written performance piece. Along with creating our own projects, we will explore how contemporary

Requirements/Evaluation: assignments will be project-based and will range from making image boards to writing program notes and educational study guides

Extra Info: as a final assignment, students will research and write their own adaptations of selected inspirational sources and present their material to one another through informal, staged readings

Prerequisites: THEA 101, or by permission of instructor

Enrollment Preferences: Theatre majors; English majors with creative writing experience

Enrollment Limit: 14

Expected Class Size: 10

Distributional Requirements: Divide 1

THEA 455(F-S) Advanced Practicum

This independently designed practicum offers an opportunity for students to gain practical, hands-on experience in theatre at an advanced level by receiving course credit for serving as an assistant to a faculty member on a Theatre Department production. Students interested in assisting a faculty member or guest artist on a production in any non-acting capacity—directing, design (costume, lighting, multimedia, scenic, sound), dramaturgy, or technical management—may enroll in the Advanced Practicum, pending the approval of a designated faculty advisor as well as the Department Chair. Working closely with the faculty advisor, the student will both serve as an assistant on the production and design a curriculum of readings and assignments intended to complement the experience of the assistantship. If funding allows, practitioners in the professional theatre will be invited as guest evaluators. Though the nature of each assistantship will vary according to the demands of each production, the experience of the assistantship will ideally simulate that which a student might undertake within the professional theatre.

Class Format: studio

Requirements/Evaluation: research, attendance at rehearsals, studio work, & final portfolio; research, attending weekly production meetings, rehearsals, studio work, and final portfolio, as well as other tasks determined by the faculty advisor

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: THEA 101

Enrollment Preferences: Theatre majors

Enrollment Limit: 4

Expected Class Size: 2

Spring 2017
In the first week of classes of the senior year, submission and approval by the faculty advisor, the second reader of an "honors thesis proposal" (an overview of what has already been completed and a schedule of what needs to be accomplished to finish the project). Where appropriate, students pursuing honors will continue to consult with the second reader over the course of the semester(s).

All honors work, including the public presentation, will be evaluated by the Women’s, Gender and Sexuality Studies Committee. It will decide on the awarding of honors; the advisor will award the grade(s).

**STUDY ABROAD**

The Williams College Women’s, Gender and Sexuality Studies Program encourages potential majors to study abroad in order to enhance their education and gain international perspectives on gender and women’s issues and feminism. There are many excellent study abroad opportunities offering students a variety of possible experiences: among them cultural immersion, field work, intensive language learning, independent study, participation in another educational system. There are several semester-long programs with a specific focus on women and/or gender administered by other U.S. Colleges that would especially enrich the educational experience of our majors:

- Antioch College: Comparative Women’s Studies in Europe fall semester
- Augsburg College, Center for Global Education: Crossing Borders: Gender and Social Change in Mesoamerica fall semester; and Social and Environmental Justice in Latin America spring semester
- School for International Training:
  - The Balkans: Women and Democratization, fall or spring semester
  - Jamaica: Gender and Development, fall or spring semester
  - Mali: Gender and Development, fall or spring semester
- The Netherlands: Identity, Gender and Sexuality, fall or spring semester

You can find general study away guidelines for Women’s, Gender and Sexuality Studies [here](#).

---

**WGSS 101(F,S) Women’s, Gender and Sexuality Studies (D) (W)**

This discussion and lecture course introduces students to a range of issues, theories, and controversies within feminism, gender studies, and sexuality studies. It has several aims: to provide critical and analytical tools for thinking about gender; to explore key issues facing women and sexual minorities in the U.S. (and other) societies, and to discuss strategies for confronting them. The course will examine issues in Latin America spring semester; and Social and Environmental Justice in Latin America spring semester; and Social and Environmental Justice in Latin America spring semester.

Above all, the course is intended as an exploration of the tremendous diversity of thought contained under the general rubrics of feminist, gender, and sexuality studies and as a vehicle for developing skills in writing and research, as well as analytical tools for further work in the field. This course meets the requirements of the Exploring Diversity Initiative in that its main emphases are on challenging the notion of one universalizing category of “woman,” and to recognize the diverse ways in which national, sexual, ethnic, racial, classed and other kinds of differences produce multiple and often divergent relations of gendered power. It also whenever possible contextualizes within a global frame the central issues that have come up and are being debated in the U.S. feminist tradition, in order to encourage students to recognize the role cultural difference plays in a variety of feminist issues and to denaturalize the U.S. as a reference point for all feminist theory and politics. During days with lectures, two sections may combine for team-teaching. Otherwise, the sections meet separately for discussion.

**Class Format:** lecture and seminar

**Requirements/Evaluation:** 1 or 2 short (3 page) essay, 1 final paper proposal/abstract, 1 annotated bibliography, 1 final paper of 7-9 pages (w/revisions); evaluation will be based on these assignments and class participation

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**Prerequisites:** none

**Enrollment Limit:** 19

**Expected Class Size:** 19

**Dept. Notes:** required course for the Women’s, Gender, and Sexuality Studies major

---

**THE DEGREE WITH HONORS IN WOMEN’S, GENDER AND SEXUALITY STUDIES**

Honors in Women’s, Gender and Sexuality Studies may be granted to majors after an approved candidate completes an honors project, delivers a public presentation of the work, and is awarded honors by the Women’s, Gender and Sexuality Studies Committee.

The honors project may be fall semester (plus winter study) or a year-long project. It may consist of a conventional research thesis of 40-70 pages or of another mode of presentation (e.g., art, music, poetry, theater, film, etc.)

Proposals for non-thesis projects should include evidence of experience and competence in the chosen mode.

A student may become a candidate for honors in Women’s, Gender and Sexuality Studies after the following criteria are met:

In April of the junior year, submission and Women’s, Gender and Sexuality Studies Committee approval of a 4- to 6-page project proposal, in which the ideas, aim, general methodology, and preliminary bibliography for the project are outlined and a faculty advisor is named; prior to submission of this proposal, students must consult with a reference librarian.

At the end of the junior year, cumulative grade point average of 3.5 from courses taken in the major;

HGSS 110T The Veil: History and Interpretations (D) (W)
Crosslistings: HIST 110/ARAB 215/WSGS 110
This tutorial will consider the history and the changing meanings of the veil (hijab) and its many manifestations (e.g. burqa, chador, niqab), starting with the earliest religious traditions and the status of women in Islamic law. We will then proceed to examine imperialist and orientalist representations of gender in the Middle East, the rise of Islamic feminism and finally consider the emergence and return of the veil in recent years in the Middle East, North America, Asia and Europe.

The tutorial is part of the Exploring Diversity Initiative (EDI) because it considers the veil across different cultural areas.

Class Format: tutorial
Requirements/Evaluation: each week each student will either write a 5- to 7-page essay on assigned readings or offer a 2-page critique of their partner's paper; by semester's end each student will have written a minimum of 40 pages.
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none
Enrollment Preferences: first years, sophomores and those with demonstrated interest in the Middle East
Enrollment Limit: 10
Expected Class Size: 10
Distribution Notes: meets Division 2 requirement if registration is under ARAB

HGSS 129 Blacks, Jews, and Women in the Age of the French Revolution (D) (W)
Crosslistings: HIST 129/WSGS 129
The French Revolution was an important turning point in world history. Besides ushering in an age of liberté (liberty) and égalité (equality), it also postulated the existence of a new revolutionary fraternité (brotherhood) between peoples of all backgrounds. Would revolutionary fraternity include women, African slaves, and Jews in the new democratic polity? French men and women debated these questions in ways that have had a direct impact on our contemporary discussions of race, gender, religious freedom and ethnicity.

In this course, we will explore these debates, their Enlightenment roots, and the legacy of these debates for France’s minorities today. Students will be introduced to various types of historical sources (rare books, art, opera, plays), as well as to the lively historiographical debates between historians of France concerning methodology, politics, and the goal of historical research.

Class Format: seminar
Requirements/Evaluation: evaluation will be based on class participation, oral reports, 1-2 short papers, a 15- to 20-page research paper, and a final examination (may be an oral and/or take-home exam); the class will also be expected to go on a couple of field trips.

Prerequisites: first-year or sophomore standing; juniors or seniors with permission of instructor
Enrollment Preferences: first-year students, and then sophomores, who have not previously taken a 100-level seminar
Enrollment Limit: 19
Expected Class Size: 15-19
Distributional Requirements: Division 2
Exploring Diversity

HGSS 177(S) Gender and Sexuality in Music (D)
Crosslistings: MUS 177/WSGS 177
This course explores key themes in the expression of gender and sexuality through music. It draws from primarily 21st century examples, across cultures and genres, ranging from pop boy bands to Indian bhanga dance to the musical avant-garde. Themes will include: communicating gendered ideals,
dance and embodiment, transgressive performances, biography and subjectivity, intersectionality, music and sexual violence, and marketing. We will explore the ways in which ideas and identities related to sex and gender are formulated and mobilized in music's performance and consumption. Inevitably, issues of sound and stagecraft intersect with factors such as race, age, and class further inform these experiences. Students will consider their own processes of identifying and interpreting expressions of gender and sexuality in sound, and contemplate the role of culture and society in informing those interpretations. This course fulfills the EDI requirement, owing both to its comparative approach and its focus on issues of power and privilege.

Class Format: lecture/discussion
Requirements/Evaluation: class participation, two 4- to 6-page papers, Midterm paper, a Final paper/project
Extra Info: may not be taken on a pass/fail basis
Prerequisites: none
Enrollment Preferences: students with some musical experience
Enrollment Limit: 19
Expected Class Size: 15

WGSS 178T Marriage and the American Nation (W) Crosslistings: HIST 178/WGSS 178

This tutorial explores the transformation of marriage as an institution, idea, and experience from colonial times through the beginning of the twenty-first century. What is marriage? Is it a private agreement or a public contract? A legal bond or a religious sacrament? A right or a privilege? Who can enter it? Who determines when it is over, and on what grounds? Examining the long history of American debates about these questions, we will consider the complex ways that beliefs and policies regarding marriage have affected national understandings of gender roles, of racial difference, of the meaning of citizenship, and of the function and reach of government. We will explore many of the controversies associated with marriage over the last 400 years, including interracial marriage, polygamy, divorce, domestic violence, property rights, custody, cohabitation, working mothers, and same-sex marriage.

Class Format: tutorial
Requirements/Evaluation: students meet in wkly 1-hr sessions with the instructor & a classmate; each wk, students will alternate between writing a 5- to 7-pg paper on the assigned readings (presented orally in class) & writing & presenting a 2-pg critique of classmate's paper
Extra Info: the course will conclude with a final paper that examines one of the issues raised in class in greater depth may not be taken on a pass/fail basis
Prerequisites: first-year or sophomore standing; juniors or seniors with permission of instructor
Enrollment Preferences: sophomores, and then first-year students who have not previously taken a 100-level tutorial

WGSS 200 Nordic Lights: Literary and Cultural Diversity in Modern Scandinavia (D) Crosslistings: COMP 212/WGSS 200

Mythologized as the land of the aurora borealis and the midnight sun, Scandinavia's five distinct nations—Iceland, Norway, Sweden, Denmark, and Finland—are often mistaken for one another, associated with blonde-haired and blue-eyed uniformity. Modern Scandinavia, however, is a place of great social and cultural diversity. From medieval Viking sagas to contemporary Nordic rap, the Scandinavian literary tradition is rich in tales of global exploration, childhood innocence, sexual revolution, and multicultural confrontation. Through readings of nineteenth-century drama, twentieth-century novels, and twenty-first-century cinema, we will investigate a wide range of issues on class, ethnicity, and identity, including the indigenous reindeer-herding Sami people, Dano-Norwegian nationalism and the Greenlandic Inuit, Norwegian collaboration and resistance during World War II, and Nordic emigration (to North America) and immigration (from Africa, Asia, Latin America, and the Middle East). Discussion will also focus on Scandinavia's leadership in gender equality and sexual liberation. Scandinavian political organization and integration (into both the UN and the EU), and the global effects of Nordic pop (ABBA to Björk), glamour (Greta Garbo to Helena Christensen), technology (Volvo to Nokia), and design (IKEA to H&M). Readings to include works by Henrik Ibsen, August Strindberg, Hans Christian Andersen, Karen Blixen, Astrid Lindgren, Halldór Laxness, Reidar Jónsson, and Peter Hoeg. Films to include works by Ingmar Bergman, Lasse Hallström, Bille August, Colin Nutley, Lukas Moodysson, Josef Fares, Thomas Alfredson and Tomas Vinterberg. All readings and discussions in English.

Class Format: seminar

Requirements/Evaluation: active participation, two short papers, an oral presentation, and a final paper

WGSS 201 War and Resistance: Two Centuries of War Literature in France, 1804-2004 Crosslistings: RLFR 202/WGSS 201

In 1883, Maupassant called on his fellow war veterans and writers to join him in “plotting and out against warfare and violence, crying "Let us dishonor war! From the Gallic Wars against Caesar (during the first century BC) to France's controversial role in the "War on Terror" (at the opening of the twenty-first century), the French literary tradition is rich in texts that bear witness to war and speak out against its monstrous inhumanity. While war literature in France can be traced back to ancient and medieval texts on Vercingetorix, Charlemagne, William the Conqueror, and Joan of Arc, this course will focus specifically on literary representations of war during the nineteenth- and twentieth-century. From Napoleonic Wars, to the First and Second World Wars, to the Algerian and Cold Wars, and the "War on Terror." Discussions will examine the impact of war on soldiers and civilians, patriotism and pacifism, history and memory; the implications of war as invasion and conquest, occupation and resistance, victory and defeat; the relationship of war to gender, sexuality, and ethnicity; and the role of war in colonialism and genocide. Readings to include novels, short stories, and poems by Balzac, Stendhal, Hugo, Rimbaud, Daudet, Maupassant, Zola, Cocteau, Wiesel, Duran, Camus, and Fanon. Films to include works by Resnais, Renoir, Caron, Jeunet, Malles, Angello, Pontecorvo, and Duras. Conducted in French.

Class Format: seminar

Requirements/Evaluation: active class participation, two short papers, an oral presentation, and a final paper
Prerequisites: exceptional performance in RLFR 105; strong performance in RLFR 106 or 107; successful performance in RLFR 201 or 203; or by French placement exam; or by permission of instructor.
Enrollment Preferences: French majors and certificate students; Comparative Literature majors; Women's and Gender Studies majors and those with compelling justification for admission
Enrollment Limit: 20
Expected Class Size: 20

WGSS 202(S) Introduction to Sexuality Studies (D) This course will offer an introduction to the burgeoning interdisciplinary field of gay/lesbian/bisexual/transgender/queer studies, in part through examining historical, legal, literary, filmic, cultural, and sociological work, as well as work done under the umbrella of queer theory. Subjects covered may include the following: histories of sexualities in the U.S., feminism and its relation to queer studies; how sexuality is racialized; transgender and intersex theory and activism; globalization and sexuality; and strategies of resistance and visibility such as those evidenced by AIDS activism/theory and debates over gay marriage. An essential part of the course will be exploring how race, class, religion, and nationality contribute to the construction and lived experience of modern gender and sexual identities. Readings may include works by FoucaultButler, Sedgwick, Warner, Berlant, Stryker, Puur, Ferguson, Muñoz, Freeman, El-Tayeb, Halberstam, Crimp, Lorde, Najmabadi, and Massad. This course meets the requirements of the Exploring Diversity Initiative in that it emphasizes empathetic understanding of gender and sexual diversity; studying relations of power and privilege as they apply to sexual, gender, racial, class and national identities and practices; and foregrounds critical theorization of gender and sexuality.

Class Format: seminar

Requirements/Evaluation: 5-page paper, paper proposal and annotated bib, 8- to 10-page final paper, glow posts and other short informal writings
Prerequisites: none
Enrollment Preferences: Women's Gender & Sexuality Studies majors, short statement of interest in case of over-enrollment

WGSS 203 Chican/ano Film and Video (D)

Crosslistings: LATS 203/ARTH 203/WGSS 203/AMST 205

Hollywood cinema has long been fascinated with the border that existed between the United States and Mexico. This course will examine representations of the U.S.-Mexico border, Mexican Americans, and Chican/ano in both Hollywood and independent media. We will consider how positions on nationalism, race, gender, identity, migration, and history are represented and negotiated through film. We will begin by analyzing Hollywood “border” and gang films before approaching Chican/ano-produced features, independent narratives, and experimental work. This course will explore issues of film and ideology, genre and representation, nationalist resistance and feminist critiques, queer theory and the performative aspects of identity. Through a focus on Chican/ano representation, the course explores a wide spectrum of film history (from the silent era to the present) and considers numerous genres. By introducing various interdisciplinary approaches and theoretical methods related to race, representation, and the nation, this course fulfills the Exploring Diversity Initiative’s themes of critical theorization and power and privilege.

Class Format: film screenings will be scheduled as a lab
Requirements/Evaluation: evaluation will be based on one short paper, midterm exam and take home essays
Prerequisites: none

WGSS 204 The Experience of Sexuality: Gender & Sexuality in 20th-century American Memoirs (D)

Crosslistings: WGSS 204/COMP 244

Focusing on first-person accounts of LGBTQ sexualities, this course examines how changing discourses and cultural narratives about sexuality are shaped by historical and cultural shifts. How does our understanding of identity change over time? How do these changes impact the way we think about gender and sexuality? We will read memoirs, autobiographies, and personal essays that reflect a range of LGBTQ identities and experiences, including works by Martin Duberman, Audre Lorde, Leslie Feinberg, Alison Bechdel, Reinaldo Arenas, Kate Bornstein, Gloria Anzaldúa, Samuel Delany, David Wojnarowicz, and Michelle Tea. These narratives will be accompanied by a variety of queer and feminist theories of memory, which interrogate the historical and conceptual limitations of “experience” and “identity.” This course fulfills the requirements of the Exploring Diversity Initiative in that it investigates institutions of power and privilege as they have impacted LGBTQ communities, and positions us to work toward ending the marginalization of gender and sexual diversity, and focuses on critical theorization of intersecting differences and identities.

Class Format: seminar
Requirements/Evaluation: intensive reading; active class participation; two 5-page papers and final 10-page paper
Extra Info: may not be taken on a pass/fail basis
Prerequisites: none
Enrollment Preferences: Women’s Gender & Sexuality Studies majors

WGSS 205(F) Gender and Economics

Crosslistings: ECON 203/WGSS 205

This course uses economic analysis to explore how gender differences can lead to differences in economic outcomes, in both households and the labor market. Questions to be covered include: How does the family function as an economic unit? How do individuals allocate time between the labor market and the household? How have changes in family structure affected women’s employment, and vice-versa? What are possible explanations for gender differences in labor force participation, occupational choice, and earnings? What is the role of government in addressing gender issues in the home and the workplace? How successful are government policies that primarily affect women (e.g., comparable worth policies, AFDC/TANF, subsidization of child care)? The course will focus on the current experience of women in the United States, but will place these gender differences in a historical and cross-cultural context.

WGSS 207(F) She Speaks in Color: Examining the ‘Color Complex’ in Toni Morrison’s Writings (W)

Crosslistings: AFR 205/COMP 236/WGSS 207

This course will explore the practice of colorism, or skin color discrimination, which is very familiar to people of color globally. Often described as intra-racial racism, colorism within the Black American context is part of the colonial legacy of institutionalized slavery where the vestiges of white supremacy have created color castes among Blacks that still, to this day, have serious consequences for those on the darkest end of the color spectrum. The impact of this practice is far-reaching, influencing everything from romantic partnering, economic and educational attainment, and perceptions of beauty, attractiveness, and criminality. Although the vast majority of colorism scholarship is empirically based, there is much that we can glean from a literary investigation of this practice by analyzing the works of renowned writer, theorist, and folklorist Toni Morrison. Her work is particularly useful in examining issues of skin color, as this topic has been persistently and underexplored in Morrison’s writings. Employing the methods of literary and rhetorical criticism, this tutorial will investigate five Morrison novels, The Bluest Eye (1970), Sula (1973), Song of Solomon (1977), Love (2003) and God Help the Child (2015). In our discussions of each text, we will examine the problem of the “color complex” at the intersections of race, gender, sexuality, class and sexual violence, and how the characters manage these overlapping issues. We will bring the novels into conversation with social science articles on the practices of colorism in daily life. Because the tutorial blends different kinds of investigations into colorism, it will equip first-year students with tools to critically engage and interrogate fictional literature; help them identify the real and nuanced ways that color discrimination affects Black communities; and consider how Morrison, one of our foremost writers, engages literary creativity with ethnographic observation.

Class Format: tutorial
Requirements/Evaluation: six 2-page papers, two 5- to 7-page papers, 10 minute vlog, annotated bibliography

WGSS 209 Poverty in America

Crosslistings: PSCI 209/WGSS 209

Although some protest that the U.S. is heading toward European-style socialism, social welfare programs in the U.S. differ in important ways from those in other wealthy and democratic nations. This course focuses on the adoption and development of policies to address poverty and inequality in the U.S. The issues we will explore include: What is poverty, and how do Americans perceive its dangers to individuals as well as the political community? What economic, historical, and sociological theories have been advanced to explain poverty? Why has the U.S. adopted some approaches to reduce poverty but not others? What enduring political conflicts have shaped the U.S. welfare state?

Class Format: lecture/discussion
Requirements/Evaluation: class participation, two or three short papers, and a final paper
Prerequisites: none

WGSS 211 Gender in the Global Economy
Crosslistings: WGSS 211/ECON 211

This course will present a feminist economic analysis of the global economy, and some of the urgent issues facing women in poor countries. The course will start by developing theoretical resources: these will include feminist critiques of economics theory, work on care labor and the shifting boundaries between markets, governments and households, theories of household bargaining, and discussions of intersectionality and difference. Then we will discuss a series of interlinked issues which may include the contradictory effects of structural adjustment and its successors; the informal sector and the 'invisible assembly line'; the economics of sex work and global sex trafficking; microcredit; the economics of the HIV/AIDS pandemic. We will finish by looking at community-based activism, non-governmental organizations, and the possibilities for first-world/third-world alliances.

Class Format: lecture/discussion
Requirements/Evaluation: reaction papers, midterm exam, research paper; participation in class discussion will count for part of the grade

WGSS 212 Ethics and Reproductive Technologies (W)
Crosslistings: PHIL 212/WGSS 212

In her groundbreaking book, The Tentative Pregnancy, Barbara Katz Rothman writes that "[t]he technological revolution in reproduction is forcing us to confront the very meaning of motherhood, to examine the nature and origins of the mother-child bond, and to replace—or to let us think we can replace—chance with choice." Taking this as our starting point, in this course we will examine a number of conceptual and ethical issues in the use and development of technologies related to human reproduction, drawing out their implications for such core concepts as "motherhood" and "parenthood," family and genetic relatedness, exploitation and commodification, and reproductive rights and society's interests in reproductive activities. Topics will range from consideration of "mundane" technologies such as in vitro fertilization (IVF), prenatal genetic screening and testing, and surrogacy, to the more extraordinary, (possibly) including pre-implantation genetic (diagnosis) (PGD), post-menopausal reproduction, post-mortem gamete procurement, reproductive cloning and embryo splitting, and in utero medical interventions. Background readings include sources rooted in traditional modes of bioethics analysis as well as those incorporating feminist approaches.

Class Format: discussion
Requirements/Evaluation: active participation in class discussions, four to five short reflection papers, and two longer papers (5-10 pages)
Prerequisites: none, but introductory-level course in PHIL and/or WGSS highly recommended
Enrollment Preferences: Women's, Gender and Sexuality Studies majors
Enrollment Limit: 19

WGSS 213T Race, Gender, and the Alien Body: Octavia Butler's Science Fiction (W)
Crosslistings: AFR 213/WGSS 213

Science fiction is a genre well known for its ability to envision new realities, and Octavia E. Butler (1947-2006) is among the most highly regarded science fiction writers. Butler's uncanny ability to imagine the future anew and to mine those imaginations with her experiences as an African American woman provide powerful commentary on—and often disrupt—modern understandings of race, gender, and human embodiment. We will explore questions such as: What role does 'gender' play in Butler's fiction? How does Butler's treatment of the 'alien' cause us to reconsider what it means to be human? How does Butler incorporate 'race' and the concept of 'other' into her fiction, and how do these techniques help us situate contemporary discussions of a post-race society? We will examine the relationship between Butler's visions for the future and what her narratives of future worlds invariably suggest about the present. We will read key texts including the best-selling text Kindred (1979), the haunting dystopian novel Parable of the Sower (1994), the popular vampire text Fledgling (2005), and the collection Bloodchild and Other Stories (1998). We will also explore contemporary engagement with Butler's work, including the relationship between the main character from her book Dawn (1987), and Henrietta Lacks, the African American woman from whom the immortal cell line (HeLa) used for medical research derives. This tutorial will engage Octavia Butler's work widely, and with particular attention to how the concepts 'race,' 'gender,' 'alien' and 'body' are interrogated in her writings.

Class Format: tutorial
Requirements/Evaluation: attendance, paired weekly reflection/response papers, a 5- to 7-page creative writing assignment, and a final essay of 10 pages
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none
Enrollment Preferences: students with interests and/or prior coursework in Africana Studies and Women's, Gender, and Sexuality Studies
Enrollment Limit: 10

WGSS 214 From Putin to Pussy Riot: Discourses of Post-Soviet Gender (D)
Crosslistings: RUSS 213/GBST 213/WGSS 214/COMP 257

Before 1991, Russians typically appeared in the Western media as macho villains in the nuclear arms race or a James Bond film. Today, however, news from the Former Soviet Union often sounds like a bizarrely gendered media stunt. For example, Russian president Vladimir Putin has been photographed topless while fishing on vacation in Siberia, while the feminist punk-rock collective Pussy Riot protested Putin's regime by performing in day-glo balaclavas in Russia's largest cathedral. This course examines related post-Soviet media spectacles in the attempt to understand the Western press's fascination with Russia, as well as key social trends defining the post-Soviet era. We will focus on the ways in which gender and sexuality have come to mark post-political culture and discourse as different from those in the West. In addition to Vladimir Putin and Pussy Riot, we will consider the so-called crisis of masculinity in post-Soviet Russia, the trafficking of women from the Former Soviet Union, the Ukrainian feminist collective Femen, the Eurovision Song Contest, and the 2013 legislation in the Russian Federation banning homosexual propaganda among minors. We will try to understand how concepts, such as feminism, tolerance of sexual minorities, and performed gender, have been deemed dangerous in the post-Soviet East at the very time they have attained normative status in the West. This course is part of the Exploring Diversity Initiative because it engages in cultural comparison, explores how power and privilege are allocated differently in post-Soviet societies than in Western liberal democracies, and engages in the critical theory of post-Soviet culture and discourse.

All readings will be in English.

Class Format: seminar
Requirements/Evaluation: active participation in class discussions, response papers based on assignments for class, 2 papers (3-5 pages each) on relevant current events in the post-Soviet world, and a final project

WGSS 222 Women on the Verge
Crosslistings: RLSP 220/WGSS 222
From the early twentieth century to the present day, the radical changes in the
lives of Spanish women have clearly reflected the tug of war between
progress and tradition in recent Spanish history. The dramatic upheavals in
Spanish politics have marked and transformed the lives of women to such a
great extent that one can often gauge the political and social climate of any
given historical moment by considering how the role of women was defined by
the law, the Catholic church, education, and other social and political
institutions. Using literary and historical texts as well as films and graphic
materials, this course will look at the transformations in the public and private
lives of Spanish women during the following periods: the turn of the century,
the Second Republic, the Spanish Civil War, the Franco years, and the
transition to democracy.
Class Format: seminar
Prerequisites: RLSP 105, or RLSP 200, or results of Williams College
Placement Exam, or permission of instructor

WGSS 224 Sexuality and Seduction in Nineteenth and Twentieth-Century
France (D)
Crosslistings: RLFR 224/WGSS 224
In 1857, both Flaubert's Madame Bovary and Baudelaire's Les Fleurs du mal
were put on trial for sexual indecency and "crimes against public morality." In
1868, Le Figaro attacked Zola's novel Thérèse Raquin as "putrid literature" for
its depiction of adultery, murder, and scandalous sexuality in nineteenth-
century Paris. A century later, Gide, Colette, and Duras continued to shock
French readers with their extraordinary novels on male and female
homosexuality, inter-generational lovers, and bi-racial relationships. In this
course, we will examine a wide range of issues on eroticism and sexuality in
nineteenth- and twentieth-century French literature, including marriage and
adultery, seduction and desire, love and betrayal, prostitution and fetishism,
gay and lesbian identity, cross-dressing and gender representation, exoticism
and colonial (s)exploitation. Readings to include novels, short stories, and
poems by Chateaubriand, Constant, Duras, Balzac, Flaubert, Baudelaire,
Zola, Maupassant, Bardey d'Aurevilly, Gide, Proust, Colette, Duras, and
Guibert. Conducted in French.
Class Format: seminar
Requirements/Evaluation: active class participation, two short papers, an
oral presentation, and a final paper
Prerequisites: RLFR 106 or 107; another 200-level course such as RLFR
201, 202, 203; or by placement test; or by permission of instructor
Enrollment Preferences: French majors and certificate students; Women's,
Gender and Sexuality Studies majors; Comparative Literature majors and
those with compelling justification for admission
Enrollment Limit: 20
Expected Class Size: 20
Distribution Notes: meets Division 1 requirement if registration is under
RLFR; meets Division 2 requirement if registration is under WGSS
causes, impact, and conundrums—the problems it poses for scholarship, activism, public policy, and public health. Issues discussed will include the role of transaction sex and economic structures in both susceptibility to HIV and vulnerability to its impact; stigma and its challenges for HIV prevention, testing and treatment uptake; the role of positive youth in the next stages of the pandemic; and the evolving expressions of biopower in the global AIDS response. The class will look at examples of successful policies and activism as well as the failures, confusion and complacency that characterized the global pandemic. There will be a particular geographical focus on experiences in the U.S. and sub-Saharan Africa. The class is an EDI course because of its focus on diversity and difference, as they shape the different ways that the HI virus plays out on the bodies of people in different global locations, and its discussion of the ways that global and local contexts of colonialism, patriarchy, and heteronormativity have inevitably shaped relationships between policy makers, researchers, activists, and those living with HIV and ultimately the content of their policies and interventions.

Class Format: seminar
Requirements/Evaluation: two short papers and a research paper; class participation will form part of the grade
Extra Info: may not be taken on a pass/fail basis
Prerequisites: none

WGSS 231(F) Sexuality and Imperialism (D)
Crosslistings: WGSS 231/COMP 234
This course takes as its central premise that the definition and experience of modern sexuality are intimately bound to nineteenth-century imperialism and its legacies. How did imperial power relations help to constitute racial and sexual categories and classifications? To what extent did sexual norms in both the colonies and European metropole contribute to the “management of empire”? In what way can this historical and intellectual framework help us understand contemporary phenomena such as homonationalism and pink-washing? We will explore these questions through the study of novels, films, and a variety of other cultural and historical texts, ranging from Freud’s Totem and Taboo and Foucault’s History of Sexuality to André Gide’s accounts of sexual tourism in colonial Algeria and Fanon’s analysis of the devastating psychological effects of colonialism. As part of the Exploring Diversity Initiative, this class will foster an awareness of how the economic and political structures of imperialism affected sexual diversity (and vice versa), and how colonial social hierarchies created differing and unequal sexual expectations, restrictions, and freedoms in individual lives.

Class Format: seminar
Requirements/Evaluation: two or three 3-page papers, a 6- to 8-page final essay, a presentation on the final essay topic, and engaged participation
Prerequisites: none
Enrollment Preferences: Women’s Gender & Sexuality Studies majors
Enrollment Limit: 25
Expected Class Size: 15
Distribution Notes: meets Division 2 requirement if registration is under WGSS; meets Division 1 requirement if registration is under COMP
Distributional Requirements: Division 2

WGSS 232(S) Approaches to Media Studies: Analyzing Mediated Difference (D)
Crosslistings: LATS 231/AMST 231/WGSS 232
Media’s influence in 21st century life is pervasive, and encompasses visual, sonic, and discursive formats. This course introduces students to a variety of qualitative approaches to the study of contemporary media. Simultaneously, we will explore questions of ethno-racial identity, gender, and sexuality. Structured around a series of hands-on exercises designed to provide experience in the areas of textual analysis, in-depth interviews, virtual ethnography and participant observation, this class will provide students with interdisciplinary training that enhances their understanding of everyday media and its intersection with multiple categories of identity. This course is a comparative Ethnic Media Studies class that encourages students to employ media as a lens for theorizing the intersections between ethno-racial identity, gender, and sexuality. We review materials focusing on a wide range of minority communities. According to the EDI framework this class engages in the comparative study of cultures and societies, examines questions of power and privilege, and aims to sharpen students’ critical theorization of difference in the media.

Class Format: seminar
Requirements/Evaluation: participation; four 3- to 5-page papers; student papers will be based on hands-on exercises using various current Media Studies methods
Extra Info: may not be taken on a pass/fail basis
Prerequisites: none

Enrollment Preferences: Latino/a Studies concentrators, American Studies and Women’s Gender & Sexuality Studies majors by seniority

WGSS 234 Masculinities (W)
Crosslistings: WGSS 234/ANTH 234
What does it mean to be a man? This course approaches masculinity in its various forms as a culturally constructed category and as an achieved aspect of social identity. We will look at characteristics of manhood as they are inscribed in different aspects of man as war hero, provider, disciplinarian, abuser; we will look at how manhood is variously achieved and how it can be lost; and we will look at forms of masculinity as they articulate with modes of sexuality and gender. The course will make extensive use of cinema in exploring these themes.

Class Format: seminar
Requirements/Evaluation: attendance at film screenings, active leading and participation in class discussions, two 7-page papers, final 12-page paper
Prerequisites: none; open to all
Enrollment Preferences: Anthropology and Sociology majors and to achieve gender balance
Enrollment Limit: 19
Expected Class Size: 19
Distributional Requirements: Division 2

WGSS 236 Sex, Gender, and Political Theory
Crosslistings: PSCI 236/WGSS 236
This course offers a feminist reading of key concepts in the study of politics: freedom, justice, equality, obligation, representation, alienation, and objectification. Each of these terms will be considered in relation to problems of political exclusion and social stratification that persist in democracies, with particular attention to inequalities based on sex, gender, race, and class. Is welfare a problem for freedom theory? In what way might a pregnancy be experienced as a form of alienation, and how does this pose a challenge for theories of justice? Is it possible to treat another person as an equal and at the same time an object of one’s sexual desire? We will identify the analytical tools and strategies that feminist theorists have employed in order to bring these and other concerns into political science scholarship, reconstructing traditional ideas of politics and public life in the process. Theorists whose work we will read include Susan Moller Okin, Nancy Hirschmann, Martha Nussbaum, Iris Marion Young, Drucilla Cornell, Gayatri Spivak, Dorothy Roberts, Judith Butler, Linda Zerilli and Catherine MacKinnon.

Class Format: lecture/discussion
Requirements/Evaluation: one oral presentation, one response paper (1 page), and three essays (6-8 pages)
Prerequisites: none
Enrollment Preferences: Political Science and Women’s, Gender and Sexuality Studies majors

WGSS 238 Science, Gender and Power
Crosslistings: PSCI 239/WGSS 238
This course considers debates in feminism about the relationship between science, gender and power in politics. On the one hand, shifting ideas about gender have influenced the development of the sciences through history; for example, some feminists argue that science has historically been premised upon a view of women as objects, not subjects, of knowledge. On the other hand, shifting ideas about science have strongly influenced the development of feminist theory and practice; for example, debates about reproductive rights are often couched in terms of a conflict between reliable scientific knowledge of embryos, STDs, etc. and an unscientific, patriarchal worldview. Do science and technology serve to transform or reinforce power balances, or should science change to accommodate gender, race, and sexuality? Should feminist theory embrace objectivity and model itself upon scientific procedures of knowledge production? Or should
feminists reject objectivity as a myth told by the powerful about their own knowledge-claims and develop an alternative approach to knowledge. What is "objectivity" anyway, and how has this norm changed through history? What kinds of alternatives to objectivity exist, and should they, too, count as "science"? Rather than treating science as a monolith, we will endeavor to understand the implications of various sciences—as practiced and envisioned in various, historically specific situations—for gender and politics. Readings may include texts by Louise Delamore, Andreas Vesalius, Londa Schiebinger, Anne Fausto-Sterling, Helen Longino, Nancy Hartsock, Sandra Harding, bell hooks, Donna Haraway, Mary Hawkesworth, and Octavia Butler.

WGSS 240(S) Performing Masculinity in Global Popular Culture (D)

This course examines popular cultural contexts, asking what it means to be a man in contemporary societies. We focus on the manufacture and marketing of masculinity in advertising, fashion, TV/film, theater, popular music, and the shifting contours of masculinity in everyday life, asking: how does political economy change the ideal shape, appearance, and performance of men? How have products - ranging from beer to deodorant to cigarettes — had their economy change the ideal shape, appearance, and performance of men? We will pay particular attention to racialized, queer, and subaltern masculinities. Some of our case studies include: the short half-life of the boy band in the US and in Asia (e.g., J/K-Pop), hip hop masculinities at home and abroad, and the curiously blended chastity and homoeroticism that constitutes masculinity in the contemporary vampire genre. Through these and other examples, we will learn how to recognize masculinity as a performance shaped by the political economy of a given culture. The course includes a field trip to a drag performance in Northampton.

WGSS 243(F) Islamic Law: Past and Present

From fear of the Shari'a to its implementation in so-called "Islamic countries," Islamic law is perhaps best associated with draconian punishments and the oppression of women. Islamic law is ever present in our public discourse today and yet little is known about it. This course is designed to give students a foundation in the substantive teachings of Islamic law. Islamic law stretches back over 1400 years and is grounded in the Quran, the life example of the Prophet Muhammad, and juridical discourse. Teetering between legal and ethical discourse, the Shari'a moves between what we normally consider law and religious etiquette. The course will explore four key aspects of the law: its historical development, its ethical and legal content, the law in practice, and the transformation of Islamic law through colonialism and into the contemporary. Specific areas we will cover include: ritual piety, family and personal status law, criminal law, and dietary rules.

WGSS 244T Sex and Gender in Ancient Greece and Rome (D) (W)

In the ancient Mediterranean world, sexuality and gender shaped a broad range of attitudes and actions. These categories created and reinforced difference in virtually every aspect of life, from the household to the political arena. This course examines the diverse discourses and practices around sexuality and gender in the cultures of ancient Greece and Rome, while also dismantling false assumptions about the continuity of the "classical" past with our own contemporary norms and values. We will carefully analyze, contextualize, and compare a variety of texts, including selections from tragedy and comedy (Euripides, Terence, Seneca), epic (Homer, Ovid) and lyric poetry (Sappho, Catullus), novels, epiphanies, and early saints' lives, in order to gain a deeper and more complex understanding of how gender and sexuality were expressed, experienced, and regulated in Greece and Rome. Our emphasis will be on ancient texts, but selections from contemporary criticism and theory will enrich the methodological framework through which we approach those primary sources. The course fulfills the ED requirement by providing sufficient context for students to make independent investigations of how literary and religious texts and practices engaged with political and social institutions to maintain different life courses and different systems of reckoning for the value of men's lives, women's lives, and the lives of individuals who didn't fit easily into either category. Additionally, the course will promote students' capacity to critically evaluate two past cultures that have long been important sources for intellectual and cultural traditions in the West, and which are still invoked today, sometimes misleadingly, to explain or justify positions and practices of privilege or oppression.

WGSS 245(S) Women, Gender, and Sexuality in Islam

This course examines how Muslim women are oppressed and the incompatibility of Islam and feminism abound. This course will consider women and gender roles in the Islamic tradition and how Muslim women have interpreted and negotiated these discourses. We will explore questions of masculinity, femininity, and sexuality across various historical periods as well as through contemporary Muslim scholarship and literature (including film and novels). We will begin with insights into the politics of representing Muslim women, exploring how Muslim women are depicted in popular culture and media, and ask the crucial question: do Muslim women need saving? We will then explore how Muslim women have claimed religious authority through scriptural interpretation; how they have negotiated their position in Islamic law both historically and in contemporary Muslim societies; and the lives of pious women in Sufism—the mystical tradition of Islam. We will conclude with Muslim feminist scholarship and recent works on Islamic masculinities. Throughout the course, emphasis will be placed on the diversity of interpretations in Islam among women, gender, and sexuality and on Muslim women's own articulations about their religious identity and experiences. Some of the topics covered in this course include: marriage and divorce, slavery, modesty and veiling, and homosexuality.

CLASS Format: tutorial
Requirements/Evaluation: five to six weekly tutorial papers, five to six responses, a midterm self-evaluation and conference with instructor, a mid- length final paper (approximately eight pages) consisting of a revision and expansion of a previously written paper

WGSS 246(A) Cross-Cultural Comparisons in Feminist Theory

This course examines how women's experiences and desires are not confined to a single culture. We will consider the ways in which women have experienced oppression and resistance in a variety of cultures, including those in which ideas of gender and sexuality are different from those in the West. We will consider, for example, how women's experiences have been shaped by patriarchal and feministic social structures, and how these experiences have been expressed through art, literature, and political movements. We will also consider the ways in which women have challenged and changed these structures, and how their experiences have been documented and studied. The course will be conducted in a seminar format, and will involve discussions of readings from a variety of cultures, as well as discussions of the relationships between these readings and modern feminist theory. The course will be worth three credits, and will fulfill the requirements for the major in Women's, Gender, and Sexuality Studies. Students who wish to use the course for the major must obtain approval from the departmental advisor.

Class Format: seminar
Requirements/Evaluation: active class participation (including a presentation on the readings), short written assignments, and a final research paper (10-15 pages)
Prerequisites: none
Enrollment Preferences: Religion, Women's, Gender and Sexuality Studies and Arabic majors
Enrollment Limit: 12

WGSS 248(G) Love and Friendship: Ancient and Modern

This course examines the role of love and friendship in ancient and modern literature, focusing on the ways in which these concepts have been constructed and understood. We will consider a variety of texts, including plays, poems, and novels, in order to explore the ways in which love and friendship have been depicted and experienced in different cultural contexts. We will also consider the ways in which these concepts have been used to construct and maintain social and political structures, and the ways in which they have been challenged and transformed over time. The course will be conducted in a seminar format, and will involve discussions of readings from a variety of cultures, as well as discussions of the relationships between these readings and modern feminist theory. The course will be worth three credits, and will fulfill the requirements for the major in Women's, Gender, and Sexuality Studies. Students who wish to use the course for the major must obtain approval from the departmental advisor.

Class Format: seminar

Fall 2016
Africa. The ILO declared 2012 the International Year of Cooperatives and solidarity economy now so much more advanced in other countries than the countries.

Arruda, 'a solidarity economy does not arise from thinkers or ideas; it is the place and are often crucial to our lives, but rendered invisible by economic theory. In the words of Brazilian popular educator and economist Marcos

...arrive, putting the two in a productive and innovative dialogue that enables students to experience the tension from both sides, to articulate the opportunities and limits of each side, and to combine their respective strengths. The mix of assignments (papers and scene work) will vary depending on whether students designate themselves as primarily scholars or actors, but some overlap will be built in to ensure that scholars gain understanding of acting and actors gain access to scholarship. All students will be expected to demonstrate versatility in traversing the full spectrum from interpretation through reading to interpretation through performance. The specific topic that will bring these theoretical issues into focus is the matter of sex and sexual identity, as illuminated through the analysis of language, psychology, and theatrical embodiment. Six plays will be studied in depth: The Merchant of Venice, Théâtre du Ventre, The Nudes, Twelfth Night, Othello, King Lear, Antony and Cleopatra, and The Winter's Tale.

Class Format: lecture/discussion, with additional periods set aside for scene preparation and evaluation.

Requirements/Evaluation: evaluation will be based on several short papers and a final exam. All students will take the final: "scholar" students will have rigorous expectations in the writing of papers; "actor" students will have intensive (graded) performance expectations.

Prerequisites: none; students wishing to enroll as Acting Students should consult with instructors

WGSS 249 Body Politics in South Asia: Gender, Sex, Religion, and
Nation (D) (W)
Crosslistings: REL 248/ASST 248/ANTH 248/WGSS 249/GBST 248
This course examines the relationship between body, gender, sex, and society in South Asia, using three countries and religions—India, Sri Lanka, and Bangladesh, and Hinduism, Buddhism, and Islam—as its foil. The course uses the body as a lens by which to unpack South Asian discourses that link body and sexuality with nation, community, and population. In particular, it explores a South Asian sociology that links individual and social bodies in ways that occasion solidarity as well as social suffering, violence as well as communal cohesion. How do bodies come to signify the purity or prosperity of the nation or community and with what social or discursive effects? We begin by unpacking foundational theories of the body as proposed by Mauss, Foucault, Douglas, and Bourdieu in order to better understand how local discourses in South Asia help produce gender and other social hierarchies in the body. By considering how the human body can serve as a map for society and vice versa, we examine both classical discourses and modern institutional practices of the body including the temple, the monastery, the mosque, and the mendicant, as well as bodily practices such as yoga, celibacy, sex work, and new reproductive technologies. We also analyze how the body has served as a symbol of nation, community, and social health. Throughout, we are interested in the cross-cutting effects of gender and sex in perpetuating structural hierarchies and social suffering around the body in South Asia.

Class Format: seminar
Requirements/Evaluation: the course has weekly writing, more than 20
pages total, and there is student-faculty feedback every week including a
week dedicated to a one-one writing feedback session between student and instructor

WGSS 250T(F) Gender, Sexuality and Modern Performance (D) (W)
Crosslistings: THEA 250/ENGL 253/WGSS 250/COMP 247
This interdisciplinary tutorial explores aspects of gender, sexuality,
performativity, race, class, and representations of the body in modern theatre
and performance in America. While attention will be given to the still
underrated role of women in the arts, we will focus primarily on the
transsexualities of social identities under interrelated systems of oppression.
Close scholarly works by playwrights—such as Adrienne Kennedy, Caryl
Churchill, Wendy Wasserstein, Ntozake Shange, Tony Kushner, Naomi iizuka,
Paula Vogel, Suzan-Lori Parks, David Henry Hwang, Tarell McCraney, Gina
Glonfridio, and Taylor Mac—will occur alongside consideration of works by
artists such as Karen Finley, Ron Athey, Tim Miller, E. Patrick Johnson, and
Young Jean Lee. Our approach to this varied material will be comparative and
will be enriched by readings of critical works by writers such as: Judith Butler,
and one final paper of 8-10 pages
Extra Info: emphasis will be placed on developing skills in reading,
interpretation, critical argumentation, and critical written and oral response
may not be taken on a pass/fail basis; not available for the fifth
course option

WGSS 250W Women Writers: Reading and Writing the City (W)
Crosslistings: COMP 243/WGSS 250
Ambivalence has always been a vital part of literary responses to city life.
Whether they praise the city or blame it, women writers react to the urban
evironment in a significantly different way from men. While male writers have
often emphasized alienation and strangeness, women writers have celebrated
the mobility and public life of the city as liberating. We will look at issues of
women's work, class politics, sexual freedom or restriction, rituals of
consumption, the conservation of memory by architecture, and community-
building in cities like New York, Berlin, Paris. We will examine novels and
short stories about the modern city by writers as diverse as Virginia Woolf,
Gertrude Stein, Anzia Yezierska, Ann Petry, Jean Rhys, Marguerite Duras,
Margaret Drabble, Ntozake Shange, Verena Stefan and Jhumpa Lahiri and
Edwidge Danticat. We will consider theoretical approaches to urban spaces by
feminists (Beatriz Colomina, Elizabeth Wilson), architectural historians
(Christine Boyer) and anthropologists and sociologists (Janet Abu-Lughod,
David Sibley, Michael Sorkin). Several contemporary films will be discussed.
All readings in English.
Class Format: seminar/discussion
Requirements/Evaluation: two short papers of 3-5 pages, one of 5-7 pages,
and one final paper of 8-10 pages
Prerequisites: COMP 111 or a 100-level ENGL course

WGSS 251 Arab Women Memoirs: Writing Feminist History
Crosslistings: ARAB 252/COMP 252/WGSS 251/HIST 309
This course reviews selected autobiographical writings by Arab and women writers from the wave of independence in the 20th century to the contemporary Arab
upsurges, passing through all the transformations that globalization and the
tecnosphere have instigated. We will examine the role that first-voice narrators play in shaping literature, history and thought, while providing a
space to reclaim cultural, social and political agency. Focusing on the different
articulations of self-representation, our discussion will address how these
women reflect on the shifting discourses of identities, gender, nationalism,
religion, feminism, politics, borders and their histories. Questions we
will address include: How did these memoirs contribute to the development
of Arab feminist consciousness? In addition to the memoirs, we will look at
women's blogs and watch films that focus on first-person narrative to discuss
related topics, such as political participation and feminism in the teknosphere. Required texts may include: Fadwa Tuqan (A Mountainous Journey: An Autobiography), Fatima Mernissi (Dreams of Trespass: Tales of a Harem Girlhood), Leila Ahmed (A Border Passage: From the Nile to New York), Haddad (From Cairo to America—a Woman's Journey), Farida Jalal and Shirley Eber
(In the House of Silence: Autobiographical Essays by Arab Women Writers),
and Jumanah Haddad (I Killed Scheherazade: Confessions of an Angry Arab
Woman), as well as critical essays and selections from autobiographical
writings that reflect the diversity of Arab women in the Middle East and the
diaspora.
Class Format: seminar

WGSS 255(F) “Disease” in Modern Chinese Literature and Culture (D)
Crosslistings: CHIN 253/COMP 254/WGSS 255
From early modern anxieties about China's status as the “sick man of Asia” to contemporary concerns regarding the prospect of transnational pandemics, “diseases” and their relation to health and illness have played a critical role in making and contesting individual psychologies and Chinese modernity in the 20th and 21st centuries. Actual diseases, from tuberculosis to AIDS, constitute not only social realities that trouble political and popular minds in their own right; but further provide powerful metaphors for exploring issues of human rights, national identity, and transnational circulation.

This course examines how Chinese literature in the 20th and 21st centuries writes and visualizes “disease” — a universal human experience that is nevertheless heavily shaped by culture and history. Specifically, we examine the cultural and social meaning of “disease,” the relationship between diseases on the one hand, and the politics of body, gender, and class on the other; we ask how infectious (sexual) disease, and mental illness are defined, represented, and understood in both male and female writers’ analytical essays and fictional writings in the 20th century; we examine how metaphorical “diseases,” such as infectious cannibalism and fin-de-siècle “viruses,” are imagined and interpreted by key culture figures ranging from the founding father of modern literature (Lu Xun), to the winner of the 2012 Nobel Prize in Literature (Mo Yan), to the “Second New Wave” film director of Taiwanese Cinema (Tsai Ming-liang); and we explore how Freud’s psychoanalysis and post-Freudian psychotherapy are “practiced” in literature that has been at both print and internet cultures. Throughout the course, we will focus on the interplay between literature canons (fictions, essays, and dramas) and popular media and genres: blockbuster cinemas and art house films, popular novels, photographs and posters, etc. This course meets the aims of the Exploring Diversity Initiative by fostering an empathetic understanding of various groups within China and their relationships with “disease,” and by questioning the power and privilege inherent within such categories as “rural” and “urban,” “science” and “literature,” and “East” and “West.”

Class Format: lecture/discussion
Requirements/Evaluation: regular in-class presentation, three short papers (3-5 pages) and one final project
Prerequisites: none
Enrollment Preferences: none
Enrollment Limit: 19
Expected Class Size: 15

WGSS 256 Engendering Buddhism: How Women and Men Shape and Are Shaped by Buddhism (D) (W)
Crosslistings: REL 256/WGSS 256/ANTH 256/ASST 256
This course looks at how gender has shaped Buddhism as well as how Buddhism has shaped gender. Most generally, it considers the myriad ways that Buddhist soteriology and practice produce the very gender differences they purport to overcome. How have the Buddha and his far-flung disciples institutionalized gender differences in spite of their putative goal of transcending duality? We examine the varying experiences of women and men in Buddhist societies and literatures as a lens by which to analyze the pervasive operation of social and gender hierarchies.

Last but not least, we discuss how well feminist and American revisions of Buddhism have transformed gender and other forms of difference. Our analysis revolves around several interdependent themes: (1) How do female and male bodies become the subject of a specific set of Buddhist gazes? What does Buddhist discourse say about the possibility of gaining enlightenment in the female body? (2) Do gender divisions reflect deeper social divisions such as class and race in Buddhist discourse? (3) How have feminist deconstructions of Buddhist transformed gender and social hierarchies in the contemporary world? This course fulfills the Exploring Diversity Initiative by seeking to theorize the ways that Buddhism has produced and reinscribed gender differences and social hierarchies.

Class Format: seminar
Requirements/Evaluation: two midterm papers, weekly GLOW participation, final research papers, and class participation
Prerequisites: none
Enrollment Preferences: majors in Religion, Women’s, Gender and Sexuality Studies, Asian Studies and Anthropology/Sociology

WGSS 259(F) Adultery in the Nineteenth-Century Novel (W)
Crosslistings: COMP 259/ENGL 261/WGSS 259
In this tutorial, we will read four novels written between 1850 and 1900, all of which focus on the figure of the adulteress: Gustave Flaubert’s Madame Bovary (1856), Lev Tolstoy’s Anna Karenina (1873-77), Leopoldo Alias’s La Regenta (1884-85), and Theodor Fontane’s Effi Briest (1894). For each week of class, students will read one of these primary texts, as well as a selection of secondary literature that will allow us to understand, over the course of the semester, how and why the adulteress played a key role in the cultural imagination of Europe during this time. All works will be read in English translation.

Class Format: tutorial; students will meet with the professor in pairs, with one student from each pair writing a 5-page paper for each class session
Requirements/Evaluation: evaluation will be based on completion of weekly reading and writing assignments, as well as active engagement during tutorial sessions
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none
Enrollment Preferences: students who have already taken at least one course devoted to literature at Williams
Enrollment Limit: 10
Expected Class Size: 10

WGSS 261 The Saint and the Countess: Lost Voices of Medieval Women (W)
Crosslistings: MUS 261/WGSS 261
Very few female voices from the Middle Ages are audible today; most of the music, poetry, and other writings that survives reveals the creativity and expresses the attitudes of men. This course will explore the experiences and viewpoints of medieval women through the lens of the poetry and songs of two exceptional 12th-century figures: the German abbess Hildegard of Bingen, whose long and immensely productive life was shaped by the requirements of monastic culture; and the French Countess of Dia in Provence, whose elusive life and work exemplify the dynamics of aristocratic court culture. We will ask how these and other musical women active in both the sacred and the secular spheres (such as the nun Birgitta of Sweden, and Queen Blanché of Castile) negotiated their places and made their voices heard within the patriarchal society of their time. We will examine the ways in which these contrasting environments informed the different outlooks, ideas, and aesthetics expressed in the words and music of their songs. Along the way we will critically assess how these lost voices have been re-created to speak to us today through recordings and film.

Class Format: seminar
WGSS 267F "Ain't I a Woman?": An Introduction to Black Women's Writing in America (C)
Class Format: tutorial; students will work in pairs
Requirements/Evaluation: each student will write/present orally a 5-page essay every other week; those not presenting essays will prepare oral critiques of partners' essays; evaluation based on written work, oral presentations of essays and critiques
Extra Info: may not be taken on a pass/fail basis
Prerequisites: one course in either ENGL or WGS

WGSS 271T Woman as "Other" (D) (W)
Class Format: PHIL 271/WGSS 271
At mid-century, Simone de Beauvoir, existential philosopher and perhaps the greatest feminist theorist of the twentieth century, described woman as "living in a world where men compel her to assume the status of the Other." At the same time, Beauvoir asserts: "One is not born a woman, one becomes one." How, given their objectification, can women become subjects for themselves? Is authenticity even possible? Must the relation between self and other inevitably be one of objectification and domination? Is reciprocity and mutuality in self-other relations possible? In our efforts to deepen our understanding of these important philosophical questions, questions that have been at the center of social and political thought at least since Hegel introduced the dialectic of master and slave, we will engage in close readings of writings by Beauvoir (including autobiography and biography), as well as philosophers responding to her—Frantz Fanon, Luce Irigaray and Judith Butler. This course has been designated EDI because it explores identity formation under conditions of inequality.

Requirements/Evaluation: each student will write/present orally a 5-page essay every other week; those not presenting essays will prepare oral critiques of partners' essays; evaluation based on written work, oral presentations of essays and critiques
Extra Info: may not be taken on a pass/fail basis
Prerequisites: one course in either PHIIL or WGSS

WGSS 272 Sex and the Reproduction of Society
Crosslistings: ANTH 272/WGSS 272
Why is reproduction such a controversial subject in society today, especially in areas of medicine, culture, and religion? And why is the reproductive body subject to such highly ideological and yet contradictory types of practices and discourses across the globe? This course seeks to examine the myriad ways that societies police the range of practices surrounding reproduction—including fertility, conception, pregnancy, birth, abortion, and motherhood. We will pursue a comparative analysis of reproduction across major societies and cultures, through an in-depth look at specialized topics such as the new reproductive technologies, the medicalization and ritualization of births in America, the continuing controversies over abortion across the globe, and the ongoing debates about the rise of women and the 'End of Men'. Throughout the course, we remain focused on the cultural, social, and medical construction of birth and reproduction more generally. To this end, we explore the varying ritual and medical practices that surround reproduction in different cultural contexts, from high tech to low tech settings and societies. We will deconstruct the process of human reproduction through readings culled from a variety of cultures and disciplines including anthropology, medicine, religious studies, sociology, and gender and sexuality studies.

WGSS 279(F) Erotic, Grotesque, Sublime: Ghosts and Monsters in East Asian Religion and Popular Culture
Crosslistings: REL 271/ASST 271/COMP 279/WGSS 279
"Ghosts and monsters" (Japanese yakuai, Japanese yokai, Korean yajo) have long figured in East Asian cultural history, from ancient East Asian chronicles, wrathful demons attacked the imperial palace, ghosts haunted abandoned temples, and shape-shifting foxes infiltrated the bedrooms of royal concubines. These creatures persisted into the modern era when nineteenth century tabloids reported the existence of demon-foxes, giant serpents, and vengeful spirits. In the latter half of the nineteenth century, monsters began crossing over into the realm of fiction, and Japanese,
Chinese, and Korean popular novels and films continue to crawl with images of traditional dark beasts. The opening contention of this course is that ghosts and monsters signify deviances from "the normal" as it is constructed in a given culture and time period—they often come to represent transgressions of nature, gender, sexuality, race, morality, or to subvert distinctions such as those between human and animal, man and woman, animate and inanimate, present and past, or living and dead. This course will analyze East Asian ghosts and monsters in their historical-cultural context, thinking about how they come to embody particular cultural fears and desires. We will use a range of East Asian materials in translation—including folktales, medieval bestiaries, short stories, and films, alongside a heavy dose of theory including works by feminist scholars such as Julia Kristeva, Ilka Quindeau, Susan Sontag and various others who attempt to understand the monstrous and the uncanny. Students will undertake an extended research project on a ghost or monster of their choice and locate it in its broader cultural context. Doing so should put us in a position to explore central themes, such as the connection between the grotesque and the erotic, the cultural performance of gender, the social construction of illness, the trauma of memory, the commodification of the supernatural, and the boundaries of the human.

**Class Format:** seminar

**Requirements/Evaluation:** attendance and participation, weekly responses, final 15- to 18-page research paper

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**Prerequisites:** none

**Enrollment Preferences:** REL, ASST, WGSS, and COMP majors will be given preference

**WGSS 306 Queer of Color Critique: Race, Sex and Urban Life (D)**

**Crosslistings:** WGSS 306/AMST 306/AFR 306/LATS 306/COMP 304

This seminar is an introduction to queer of color critique, a field of scholarship that seeks to intervene in the predominantly white canon of queer studies. We will examine the history of this line of critique, beginning with Black and Chicana feminisms and extending into present day issues and activism highlighting intersectionality, exploring how and why QOCC became a necessary intervention into the then still emerging field of queer studies. Our texts include scholarly works as well as science fiction novels, plays, films, diaries, and graphic novels. Methodologically, we draw on many fields of study, including anthropology, literary studies, feminist studies, and ethnic studies. We focus primarily but by no means exclusively on US contexts, paying particular attention to the role that urban environments have served for queer communities of color. Topics include: feminisms of color, inter-racial desire and fetishization, orientalism and colonial fantasy, black queer science fiction, transgender subjectivities, and the political economy of sexual desire. A key feature of this course will also be the inclusion of numerous and diverse authors to appear on Skype or in person to answer questions about their work as we read it in class.

**Class Format:** discussion/lecture

**Requirements/Evaluation:** mid-term essay, choice of final exam essay or 8-10 page research paper; responses to performance/special events

**Prerequisites:** none

**Enrollment Preferences:** Women's Gender & Sexuality Studies majors or prospective majors

**Enrollment Limit:** 15

**Expected Class Size:** 15

**Distribution Notes:** meets Division 2 requirement if registration is under WGSS, AMST, AFR or LATS; meets Division 1 requirement if registration is under COMP

**WGSS 307 Feminist Approaches to Religion (D) (W)**

Crosslistings: REL 306/WGSS 307

What does feminist theory have to offer the study of religion? How have participants in various religious traditions helped to produce and enact feminisms? Feminisms and religion have a long though often troubled history of interaction. In this course, we shall explore a range of feminist theoretical analyses that have either emerged out of particular religious contexts or have been applied to the study of religious traditions and practices. We shall consider how feminism—especially those pertaining to issues of sexuality, race, class, nationality, ethnicity, and religious affiliation—make a difference for the ways that religion is interpreted and practiced.

**Class Format:** seminar

**Requirements/Evaluation:** one “position paper” for class discussion (3 pages), one analytical essay (4 pages), participation in writing workshop on drafts of final paper, one 15-page final paper

**Prerequisites:** none; open to all

**Enrollment Preferences:** Religion and Women's, Gender and Sexuality Studies majors

**Enrollment Limit:** 19

**Expected Class Size:** 15

**Distributional Requirements:**
WGSS 308 Gender and Society in Modern Africa
Crosslistings: HIST 308/WGSS 308
This course explores the constructions of feminine and masculine categories in modern Africa. We will concentrate on the particular history of women's experiences during the colonial and postcolonial periods. In addition, we will examine how the study of history offers perspectives on contemporary women's issues such as female circumcision, teen pregnancy, wife-beating, and "AIDS."
Class Format: lecture/discussion

WGSS 309 Everyday Life in Literature and Film
Crosslistings: COMP 308/WGSS 309
To bring the all too familiar everyday to our attention, artists and writers have made it strange. What happens when we view everyday life from elsewhere? While everyday culture has often been experienced as repressive and alienating in modern Western societies, a new importance assigned to everyday life made it strange in contemporary China. The contours of the everyday are delightfully vague, and it always exceeds theorizing. For instance, is its privileged place the street or the home? Is it lived largely in institutions that regulate our daily lives, or is it lived between and outside them? Everyday objects and commodities like the potato, the postcard, the clothes, housing, etc., will be analyzed. Fiction by Leo Tolstoy, Franz Kafka, Georges Perec, Manil Suri, Ha Jin, and Banana Yoshimoto, Films by Chantal Akerman, Pedro Almodovar, Benoît Jacquot, and Pierre Jeanet. Art projects that transform the everyday will also be discussed, including those of Sophie Calle, Mary Kelley, Mierle Laderman Ukeles, and Pierre Jeunet. Art projects that transform the everyday will also be discussed; included will be "The State of New York," Sophie Calle (1978), "The Hotel New Hampshire," Mary Kelley and tuple (1990), "Public Service," Mierle Laderman Ukeles (1977), and "La Permanente," Pierre Jeunet (1972). Fiction and films will be discussed in relation to everyday objects and their history, two 3- to 5-page papers, and a 10- to 12-page final paper or creative project
Prerequisites: one 200-level literature course
Enrollment Preferences: Comparative Literature majors

WGSS 310 Womanist/Black Feminist Thought
Crosslistings: AFR 310/REL 310/WGSS 310/AMST 309
This course explores the genealogy and development of black feminist and womanist thought. We will investigate the expansion of womanist thought from a theologically dominated discourse to a broader category of critical reflection associated more commonly with black feminism, analyze the relationship between womanism and black feminism, and review the historical interventions of black feminism. As critical reflections upon western norms of patriarchy, heterosexism, and racism, womanism and black feminism begin with the assumption that the experiences of women of color—particularly black women—are significant standpoints in modern western society. Through the examination of interdisciplinary and methodological diversity within these fields, students will be introduced to key figures including Alice Walker, Zora Neale Hurston, and Katie Cannon, and will engage materials that draw from multiple fields, including, but not limited to, literature, history, anthropology, and religious studies. Fulfilling the EDI requirement, this course will explore how womanism and black feminism can be a bridge for empathetic understanding of diverse experiences, and will examine the varied social, political, and historical contexts that led to the formulation of womanism/black feminism as a tool to critique power and privilege.
Class Format: lecture/discussion
Requirements/Evaluation: evaluation will be based on class participation, three short response papers, and the completion of an original research paper or project
Prerequisites: none

WGSS 312 An American Family and "Reality" Television (W)
Crosslistings: ARTH 310/WGSS 312/AMST 333/COMP 316
An American Family was a popular documentary series that featured the Loud family from Santa Barbara, California, whose everyday lives were broadcast on national television. The series generated an enormous amount of media attention, commentary, and controversy when it premiered on PBS in 1973. Today, it is regarded as the origin of so-called "Reality TV." In addition to challenging "reality" rules for television programming, the show challenged social conventions and asked viewers to think seriously about family relations, sexuality, domesticity, and the "American dream." Documenting the family's life over the course of eight months, the series chronicled the dissolution of the Louds' marriage and broadcast the "coming out" of eldest son Lance Loud, the first star of reality television.
In this class, we will view the An American Family series in its entirety, research the program's historical reception, and analyze its influence on broadcast and film media, particularly on "reality" television. A final 16- to 20-page research paper will be prepared in stages, including a 6- to 8-page midterm essay that will be revised and expanded over the course of the semester.
Class Format: seminar
Requirements/Evaluation: class presentations, research assignments, and final 16- to 20-page research paper

WGSS 313(S) Gender, Race, and the Power of Personal Aesthetics (D)
Crosslistings: LATS 313/AMST 313/WGSS 313/AFR 326
This course focuses on the politics of personal style among women of color in an era of viral video clips, the 24-hour news cycle, and e-commerce sites dedicated to the dermatological concerns of "minority" females. With a comparative, transnational emphasis on the ways in which gender, sexuality, ethno-racial identity, and class inform standards of beauty, we will examine a variety of materials including commercial websites, histories, personal narratives, ethnographies, sociological case studies, and feminist theory. Departing from the assumption that personal aesthetics are intimately tied to issues of power and privilege, we will engage the following questions: What are the everyday functions of personal style among women of color? Is it feasible to claim that an easily identifiable "African American," "Latina," "Arab American," or "Asian American" female aesthetic exists? What role do transnational media play in the development and circulation of popular aesthetic forms? How might the belief in personal style as activist strategy challenge traditional understandings of feminist political activity?
Class Format: seminar
Requirements/Evaluation: participation, one student-led discussion period, two written essays of 5-7 pages, final take-home exam
Extra Info: may not be taken on a pass/fail basis
Prerequisites: LATS 105, AMST 201, WGSS 101 or permission of instructor; first year students are not permitted to take this course

WGSS 315 Paris on Fire: Incendiary Voices from the City of Light (1830-2005)

Crosslistings: RFLR 316/WGSS 315

During the 1830s, Balzac described Paris as a “surprising assemblage of movements, machines, and ideas, a city of one hundred thousand novels, the head of the world,” but also characterized the French capital as a “land of contrasts,” a “monstrous wonder,” a “moral sewer.” Similarly, writers from Hugo to Zola have simultaneously celebrated Parisian elegance and condemned the appalling misery of Paris’s urban poor. Since 1889, Paris has been felt as the “City of Light” for its Enlightenment legacy, its Eiffel Tower modernity, and its luminous urban energy, captured in countless paintings, photographs, and film. However, Paris is also the historical site of revolution, resistance, and riots. From revolutionary revolt (1830, 1848, 1871), to wartime resistance (1870, 1914-18, 1940-44), to reformist and race riots (1968 and 2005), Paris has repeatedly sparked with incendiary passion and political protest. As fires raged during the riots in 2005, many heard the echo of Hitler’s ominous 1944 question, “Is Paris burning?” and asked: why was Paris burning again at the dawn of the twenty-first century? To answer this question, we will examine the historical literature, films, and photography of the nineteenth and twentieth centuries, from urbanization and modernization, to occupation and liberation, to immigration and globalization. Readings to include poetry, short stories, and novels by Hugo, Balzac, Baudelaire, Maupassant, Verne, Zola, Apollinaire, Colette, Duras, Perez, Rochefort, and Charef. Films to include works by Clair, Truffaut, Godard, Minnelli, Clément, and Pabst, poems by Gottfried Benn, Else Lasker-Schüler, and Kurt Tucholsky, singers (Margo Lion and Claire Waldorf), and dancers (Anita Berber) to prostitutes, and suggest that the New Woman serves as the vessel of male anxieties and represents the contradictions of modernity. Taught in German.

Class Format: concurrent seminar/discussion

Requirements/Evaluation: active class participation, two short papers, an oral presentation, and a final paper

Prerequisites: RFLR 201, or 202, or 203; or another RFLR 200-level course; or permission of instructor

WGSS 317(F) The New Woman in Weimar Culture (W)

Crosslistings: GERM 317/WGSS 317

This course explores the figure of the New Woman, a professional, political, independent, and modern woman, that rises in Germany right at the end of World War I and thrives during the Weimar Republic. Acclaimed as the epitome of Weimar Modernity, the New Woman is nevertheless greeted with great ambivalence: whether a liberated and emancipated woman for some, or a dangerous and promiscuous woman loathed by others, she is perceived as threatening to the patriarchal order. A closer look at artworks by Otto Dix, Schad, Schiele, and Picasso, films by Fritz Lang and George Wulff, poems by Gottfried Benn and Else Lasker-Schüler, and Kurt Tucholsky, novelists by Erich Kästner, Vicky Baum, and Imgrund Keun, as well as plays by Frank Wedekind and Bertolt Brecht, will provide a more precise picture of the New Woman in various incarnations, ranging from actresses (Marlene Dietrich), singers (Margo Lion and Claire Waldorf), and dancers (Anita Berber) to prostitutes, and suggest that the New Woman serves as the vessel of male anxieties and represents the contradictions of modernity. Taught in German.

Class Format: taught seminar style in German for the German students and as a tutorial in English for non German speaking students

Requirements/Evaluation: papers and oral presentations

Prerequisites: for students taking it in German: GERM 201 or the equivalent; for students taking the course in English: one college-level literature course

WGSS 318 Gender Construction in Chinese Art (D) (W)

Crosslistings: ARTH 317/ASST 317/WGSS 318

"One is not born, but rather becomes a woman”—Simone de Beauvoir. This course will investigate how gender and sexuality are constructed and deconstructed in Chinese art. Issues of interest include how gendered space is visualized in Chinese art. Issues of interest include how gendered space is constructed in Chinese painting; how landscape paintings can be decoded as masculine or feminine; and ways in which images of women help construct ideas of both femininity and masculinity. This course will also discuss Confucian literati’s [ideals] of reclusion and homosociality; didactic art for women; images of concubines, courtesans; and lonely women’s isolation and abandonment. For example, while nature is often seen as feminine, Chinese landscape painting may be coded as masculine due to its association with the Confucian scholar’s ideals of eremitism, a means for the cultivation of the mind, and homosociality. On the other hand, the placement of a masculine landscape in feminine space may be seen as rhetorical strategy, accentuating the lonely woman’s isolation and abandonment, which are important tropes in Chinese erotic poetry as well.

This course fulfills the EDI requirement in that it is designed to enable students to study the logic of gender and sexuality in a context different from their own; to see how both genders are constructed in relation to each other, and how they interact in the context of class, ideology, politics, and ideals, as well as how they may complicate one another’s representation in China with those of other cultures, notably Japan and the West. Using both visual art and literature, this course also challenges the gender stereotyping that still exists in current scholarship.

Class Format: seminar/discussion

Requirements/Evaluation: a series of 2-3 page position papers; one 3-4 page 1st oral presentation write-up; one 4-5 page pre-focus/focus paper for exploring the final paper topics; 2 oral presentations; a 12-15 page final research paper; class discussions; active class participation, two short papers, an exploratory essay, and a 12-15 page final research paper

Expected Class Size: 10

WGSS 319 Gender and the Family in Chinese History (D)

Crosslistings: HIST 319/WGSS 319/ASST 319

Although sometimes described as part of a set of immutable "Asian values," the Chinese family has not remained fixed or stable over time. In this course, we will use the framework of “family” to gain insight into gender, generational, and sexual roles in different historical periods. Beginning in the late imperial period (16th-18th Centuries), we will examine the religious, marital, sexual, and childrearing practices associated with the "orthodox" Confucian family. We will then explore the wide variety of "heterodox" practices in imperial China, debates over and critiques of the family system in the twentieth century, and configurations of gender and family in contemporary China. As an EDI course, this course makes use of anthropological and gender studies methods to analyze both the specificities of Chinese ideas and practices regarding family, gender and sexuality as well as the considerable variety among these ideas and practices at different points in time.

Class Format: lecture/discussion

WGSS 320 Dangerous Bodies: Black Womanhood, Sexuality & Popular Culture

Crosslistings: AFR 320/AMST 320/WGSS 320

Whether presented as maternal saints, divas, video vixens, or bitches, black female celebrities navigate a tenuous terrain in popular culture. This course considers the ways that black female celebrities such as Oprah, Rihanna, Nicki Minaj, Beyoncé, Janet Jackson, and Michelle Obama negotiate womanhood and sexuality, and the popular landscapes through which we witness that negotiation. It also engages contemporary black feminist scholarship, which most frequently presents the presentation of black female bodies in popular media forms as exploitive. We will review historical stereotypes of black women in popular media forms, discuss the history of the "politics of respectability" within black culture, engage black feminist responses to these types, and examine theoretical approaches to assess social constructions of womanhood and sexuality. We will also consider provocatively "desire discourses" and their relation to constructions of contemporary black sexual politics: Should we view these women as feminists? Are they merely representatives of cultural commodification and control of black women's bodies? Do these women best exemplify the reiteration of problematic characterizations? Are they positive models for demonstrating female empowerment, agency, or "fierceness?" This course explores the histories of
representation of black female figures in popular culture, and in so doing, troubles contemporary considerations of black womanhood and sexuality.

Class Format: seminar

Requirements/Evaluation: evaluation will be based on attendance/participation, short response papers, and a midterm and final portfolio

WGSS 321 Recent Continental Feminist Theory: The Enlightenment and its Critics (D)

Crosslistings: PHIL 320/WGSS 321

This course explores developments in recent feminist thought influenced by philosophical currents in France and Germany (poststructuralism and critical theory.) Depending upon the year in which the course is offered, we explore topics such as self and society, sexual difference, embodiment, critiques of reason, the psyche, new materialist theories, queer feminisms, and transnational feminisms. We will read from works by authors such as the following; Sandra Bartky, Iris Young, Judith Butler, Elizabeth Grosz, Luce Irigaray, Jessica Benjamin, Gayle Rubin, Rosi Braidotti, Eve Sedgwick, Lynne Huffer, Sara Ahmed, Jasbir Puar, and Wendy Brown. Fiction and film may also be included.

Class Format: seminar

Requirements/Evaluation: some of the following: frequent short essays, two or three 4- to 5-page essays, class presentations, or a final project in lieu of one of the papers; students in the class will be consulted about alternatives to this plan

Prerequisites: WGSS 101, and a second course in WGSS, or permission of instructor

Enrollment Preferences: Women's, Gender and Sexuality Studies majors and Philosophy majors

Enrollment Limit: 19

WGSS 322T Critical Theory: The Enlightenment and its Citizens (D) (W)

Crosslistings: PHIL 321/WGSS 322

"Dare to know! Have courage to use your own reason—that is the motto of Enlightenment." Thus the 18th century German philosopher Immanuel Kant exhorts his contemporaries to mustering the courage to cultivate their capacity for reason. Modern faith in the prospects of universal human dignity, rational autonomy, and the rights of individuals to liberty, democracy, open scientific inquiry and social and political progress depend upon it. Yet in 19th and 20th centuries we find the promise of Enlightenment tempered by the rise of nationalism and the persistence of racism, sexism, genocide, terrorism, and religious extremism as well as the emergence of war, mass destruction, environmental degradation, and the potential for manipulation of populations by consumerist media. Can the promise of Enlightenment be rekindled?

In this tutorial we begin with short readings by Kant, Hegel and Marx, key sources for critical social theory in the 20th century. Possible other figures read may include: Max Horkheimer, Theodor Adorno, Herbert Marcuse, Walter Benjamin, Jurgen Habermas, Nancy Fraser, Amy Allen, Noelle McAfee, Judith Butler, Elizabeth Grosz, Michel Foucault, Jean Baudrillard, and Gilles Deleuze, Georgia Agamben, Frantz Fanon, Edward Said and Achille Mbembe, as well as current critiques of neoliberal capitalism.

Although we will not directly address diversity issues except insofar as cultural, racial, class, sexual and other differences are bound up within power or domination relations, insofar as the course examines social and political power, oppression and domination, and the possibility or viability of the idea of human emancipation it meets the EDI requirement. This tutorial will be adapted for WGSS students seeking to meet a theory requirement.

Class Format: tutorial, students will work in pairs and meet for 75 minutes each week with the professor

Requirements/Evaluation: each student will write and present a 5- to 6-page paper every other week and a commentary on his or her partner's essay on alternate weeks;

Extra Info: evaluations are based on written work as well as level of preparation and intellectual engagement in tutorial meetings may not be taken on a pass/fail basis

Prerequisites: demonstrated background in modern philosophy, critical theory, political theory, or continental philosophy

Enrollment Preferences: current and prospective Philosophy majors and students with a sufficient background in political or critical theory

WGSS 325 Television, Social Media, and Black Women "Unscripted"

Crosslistings: AFR 325/WGSS 325

Nene Leaks, Shonda Rhimes, Oprah Winfrey, Kerry Washington and now Lavern Cox and Melissa Harris-Perry have become common household names. Whether from the television shows they star in, the TV shows they have created, or the social media presence they have developed—these women have become influential and shape popular culture. In this course we will situate Black women as creators and contributors to popular culture as a whole, but specifically through television (scripted and "unscripted") and social media. We will begin by covering the history of Black women in television. This historical approach will then lead us to examine selected TV episodes, and investigate social media pages of Black actresses, television producers, and the fans of these shows. The aim of this course is to analyze the ways in which Black women continually shift the popular culture paradigm and how they serve as key players in determining what is indeed popular.

Class Format: seminar

Requirements/Evaluation: evaluation in this course will be based upon class participation, response papers, one 10 page paper, and a formal class presentation

Prerequisites: none

Enrollment Preferences: first, second, third, and fourth year students. If over enrolled, preference will be given to third and fourth year students

WGSS 326(T) Queer Temporalities (W)

Crosslistings: REL 326/LATS 426/WGSS 326/COMP 326

Birth, childhood, adolescence, college, adulthood, marriage, family, mid-life, old age, death, afterlife. How are all these facets of being human imagined as stages in time, as axes on certain progressive lines that delineate human social relations? How do we experience and represent time, and what factors might account for both our experiences and our representations? What are some of the ways that people experience and mark the passing of time? What are some of the different ways that people have made sense of time and themselves in time? How have our conceptions of time and our demarcations of lifecycles shifted historically? How do people whose experiences do not align with dominant cultural social stages negotiate ideas of lifecycle and timing? Especially for individuals and peoples who have been denied self-representation and narratives of place, how do competing notions of time, history, space, and location get negotiated? In this course, drawing from within the broad corpus of queer theory (including theorists such as Gloria Anzaldúa, Elizabeth Freeman, J. Halberstam, and José Esteban Muñoz) we will examine some non-linear, non-normative, and interruptive approaches to making sense of time, space-time, and self within time.

Class Format: tutorial

Requirements/Evaluation: evaluation will be based on class attendance, analyses of readings, revisions and presentations

Extra Info: Pairs will meet with the instructor for one hour each week. Almost every week, one student from the pair will write a 5-page analysis of the week's reading. The other student will respond orally with a 2-page response to their partner's paper.

Pairs will also prepare a midterm synthesis, students will revise two of their 5-page analytical papers: one from the first half of the semester, one from the second half due at the end of the semester.

WGSS 327T Foucault (D) (W)
Crosslistings: PHIL 327/WGSS 327
This course begins with a brief introduction to some of Foucault's early writings but focuses on a close reading of a selection of middle and late texts that have become central to debates about the significance of his work such as: Discipline and Punish, The History of Sexuality (vols. 1-3), and selected interviews and course lectures. We examine debates in the Foucault literature about freedom, power, and the nature of critical theory. This course has been designated EDI because it engages questions concerning power, social differences and social and political freedom.

Class Format: tutorial
Requirements/Evaluation: evaluation will be based on written work (six 5- to 6-page papers), oral presentations of that work, and on oral critiques
Extra Info: may not be taken on a pass/fail basis
Prerequisites: at least two courses in PHIL or WGSS, or permission of instructor
Enrollment Preferences: current or prospective Philosophy and Women's, Gender and Sexuality Studies majors
Enrollment Limit: 10
Expected Class Size: 8-10
Dept. Notes: meets History requirement only if registration is under PHIL

WGSS 328(S) Austen, Eliot, Woolf
Crosslistings: ENGL 328/WGSS 328
At roughly fifty-year intervals, Britain produced three brilliant female novelists — Jane Austen, George Eliot, and Virginia Woolf — who would each become renowned, in her own way, for her ability to combine minutely detailed social observation with a rich depiction of the inner lives of her characters. This course will examine some of their major fiction — with an emphasis on Austen and Eliot — with special attention to the nature and implications of their narrative methods for representing the consciousnesses of characters, and of the authorial narrative voices that mediate among them. Questions to be considered: how is it that understanding of novelistic characters and consciousness shaped by our real-life experience in interpreting the thoughts and character of others, and vice versa? Do "omniscient" narrators lay claim to a privileged kind of knowing presumed to be unavailable either to their character or to readers, or are they modelling humanly available interpretive stances toward a world of others? How do these authors' preoccupations with interior thought relate to their focus on women's experience? Possible texts include Austen's Emma and Persuasion, Eliot's Middlemarch, Daniel Deronda, and The Lifted Veil, and Woolf's The Waves.

Class Format: seminar
Requirements/Evaluation: one six-eight-page and one ten-twelve-page essay
Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam
Enrollment Preferences: English majors
Enrollment Limit: 25
Expected Class Size: 25
Distribution Notes: meets Division 1 requirement if registration is under ENGL, meets Division 2 requirement if registration is under WGSS

WGSS 330/COMP 339/AMST 332/LATS 335/THEA 322
How can contemporary performance expand ideas and practices of belonging in the United States, as figured through race, gender, and sexuality? This spring course will begin with readings of dramatic literature including Suzan-Lori Parks's Venus, David Henry Hwang's M. Butterfly, and Young Jean Lee's The Shipment to analyze literary and staged performance, then continue to discussions and readings on the performance of everyday life via the work of performance artists including Adrian Piper, Nao Bustamante, and Yoko Ono. We will develop shared vocabulary and methodologies of performance studies, including readings by scholars including J.L. Austin, Judith Butler, and José Esteban Muñoz. This course will engage foundational texts to performance studies and offer an interdisciplinary approach to scholarship in gender and sexuality studies, critical ethnic studies, and performance studies from the 1970s to the present. This course recognizes a suspicion for diversity discourses that universalize human experience and asks: how do we resist normativizing forces without reinforcing the regulating logics of those forces? This EDI course will critically engage with diversity from the heterogeneous and multiple perspectives of racial, sexual, and gender minorities, asking students not only to examine the diversity of human experience but to explore the political stakes of creative expression through interdisciplinary methods and forms.

Class Format: seminar
Requirements/Evaluation: in-class participation, partner presentation, weekly reading responses, performance analysis, final paper
Extra Info: not available for the fifth course option
Prerequisites: none
Enrollment Limit: 20
Expected Class Size: 15
Distribution Notes: meets Division 1 requirement if registration is under COMP or THEA; meets Division 2 requirement if registration is under AMST, LATS or WGSS

WGSS 331(S) Queer Europe: Sexualities and Politics since 1850 (D)
Crosslistings: HIST 332/WGSS 331
This course explores the construction, articulation, and politics of queer sexual desire in Europe from the later nineteenth century to the present. By placing queer sexualities in their broader social and political context the course examines the ways in which sexuality has become central to questions of identity, personal and national, in modern European society. Topics include: the role of the new science of sexology in specifying various "sexual perversions"; the rise of sexual undergrounds in the context of European urbanization; the birth of campaigns for "homosexual emancipation"; attempts to "normalize" and suppress "deviant" sexualities, especially under the fascist regimes in the 1930s; the effects of the postwar consumer revolution on the practices of sexual selfhood; the postwar "sex change" debates; the politics of 1950s homosexual organizing and the 1970s Gay Liberation Movement; and the recent politics of gay marriage. The course will focus primarily on Britain, France, and Germany, but also on Italy and Russia. Readings will be drawn from sexological texts, political tracts, memoirs, and the writings of recent historians. Several films will also be discussed. "Queer Europe" meets the requirements of the Exploring Diversity Initiative insofar as it explores how sexual difference has been constituted, contested, and experienced and how what we assume to be the "sexual norm" has a profoundly political history.

Class Format: seminar
Requirements/Evaluation: evaluation will be based on class discussion, the posting of four 500 word response papers, two 6- to 8-page interpretive essays, and a final research paper of approximately 12-15 pages
Extra Info: none
Enrollment Preferences: junior and senior History and Women's Gender & Sexuality majors

WGSS 332 Postwar Britain: Gender, Race, Sexuality, and Social Change, 1945-1990
Croslistings: HIST 333/WGSS 332
A major theme in British historiography is the enormous social change that has taken place in Britain since the end of the Second World War. In the 1950s, sociologists argued about the extent to which postwar affluence was leading to the "embourgeoisement" of the working class; in the 1960s, the advent of the so-called "Permissive Society" witnessed the flourishing of a new culture of sex, drugs, and rock 'n roll; in the 1970s, the feminist and gay movements challenged gender roles that earlier had seemed so secure; in the 1980s, Thatcherism sought to halt the nation's apparent terminal decline, repudiating much of the progressive legislation of earlier decades by turning the clock back; finally, throughout this period successive waves of immigration appeared to many to challenge the cultural homogeneity of white Britain. This course will explore these themes, addressing the question of what it meant to be "postwar" in Britain, charting the gradual emergence of a new politics of class, gender, race, and sexuality in Britain that made the nation in 1990, at the end of the postwar period, a radically different place from what it had been in 1945. In attempting to make sense of these complex changes, we will consider a variety of documents and works by recent historians, along with a dozen films, which students will be required to view outside of class.
Class Format: discussion
Requirements/Evaluation: class discussion, two 8-10 page interpretive essays, and a self-scheduled final examination
Prerequisites: none

WGSS 334 Islamic Feminism
Croslistings: REL 332/WGSS 334/ARAB 332
This course examines the relationship between feminism and Islam, focusing particularly on Islamic feminist scholarship. We will take a genealogical approach to our study of Islamic feminism tracing the different discourses that have informed and shaped the field. The first part of the course will begin with a critical examination of orientalist and colonial representations of Muslim women as oppressed and in need of liberation. We will then explore Muslim responses so such critiques that were entwined with nationalist and independence movements. This historical backdrop is critical to understanding why the question of women and their rights and roles become crucial to Muslim self-understanding and Islamic reform. The second part of the course will focus on major intellectuals and thinkers who have influenced Islamic feminism. Finally, the last part of our course will explore the breadth of Islamic feminist literature, covering the following themes: 1) feminist readings of scripture; 2) feminist critiques of Islamic law; and 3) feminist theology.
Class Format: seminar
Requirements/Evaluation: weekly responses, four 2- to 3-page essays

WGSS 338 Latina/o Musical Cultures: Sounding Out Gender, Race, and Sexuality (D) (W)
Croslistings: LATS 338/AMST 339/WGSS 338
In this class we will investigate a wide variety of Latina/o popular musical and dance forms, with particular emphasis on questions of gender, sexuality, and ethno-racial identity. Employing interdisciplinary materials and approaches, this course focuses on the sonic and visual analysis of contemporary Latina/o popular music and the iconography of Latina/o dance. We will focus on the following questions, among others: How are the various facets of Latina/o identities expressed through popular music and dance? In what ways do gender, sexuality, and ethno-racial identity inform the appearance and interpretation of particular Latina/o musical forms? What unique role does sound play in our understanding of popular music and identity?
Class Format: seminar
Requirements/Evaluation: class participation, one semester-long original research project conducted in stages
Extra Info: may not be taken on a pass/fail basis

WGSS 339 Stereotypes, Prejudice, and Discrimination (D) (W)
Croslistings: PSYC 341/WGSS 339
This course will examine social psychological theories and research that are relevant to the understanding of stereotypes, prejudice, and discrimination. We will take a variety of social psychological perspectives, emphasizing sociocultural, cognitive, personality, or motivational explanations. We will examine the impact that stereotypes and prejudice have on people's perceptions of and behaviors toward particular groups or group members and will explore a variety of factors that tend to exacerbate or weaken this impact. We will also consider some of the sources of stereotypes, prejudice, and discrimination and some of the processes through which they are maintained, strengthened, or revised. In addition, we will examine some of the effects that stereotypes, prejudice, and discrimination can have on members of stereotyped groups, as well as some implications of the social psychological research findings for issues such as education and business and government policies. A major component of this course will be the examination of classic and ongoing empirical research.
Class Format: empirical lab course

WGSS 341 Cinematic Representations of Work and Migration after the Wall
Croslistings: COMP 341/WGSS 341
The increased flow of migrants from East to West and from South to North into the center of Europe and the simultaneous tightening of restrictions against illegal migration have brought to the forefront issues of labour, gender, and precarity, citizenship and cultural belonging. We will analyze feature films and documentaries that trace the changing face of work and migration, with an emphasis on flows from countries the former east bloc and Africa to Europe. We will discuss negative effects of globalized capitalism, such as the monetization of feeling and personal relations (Harvey), the concept of intensification and the disembodied state (Nealon and Foucault), but also ask what new opportunities might arise, and for which groups. We will study the depiction of manual labour, illegal migration, women as caregivers, Internet marriage, sex work, and the migrant as a raced and othered body. Theory by Dina Iordanova and William Brown, Ewa Mazierska, Sandro Mezzadra and Brett Neilson, Jeffrey Nealon, Lara Águstin, Angela Mellitopoulos, Lauren Berlant and Mieke Bal. Films will likely include: Illegal, Working Man's Death, NordSud.com, Lichter (Lights), Code Unknown, The Flower Bridge, Occident, Since Olar Left, Losers and Winners, Whore’s Glory, Le Havre and Time Out.
Class Format: seminar
Requirements/Evaluation: active class participation, two short papers, an oral presentation, and a final paper

WGSS 342(S) American Genders, American Sexualities (D)
Crosslistings: ENGL/WGSS 342/AMST 341
This course investigates how sexual identities, desires, and acts are represented and reproduced in American literary and popular culture. Focusing on two culturally rich periods—roughly 1880-1940 (when the terms “homosexual” and “heterosexual” came to connote discrete sexual identities), and the contemporary context of the “postmodern” 21-century—we will explore what it means to read and theorize “queerly.” Among the questions we will ask: What counts as “sex” or “sexual identity” in a text? Are there definable lesbian, gay, bisexual, queer or transgender writing styles or cultural practices? What does sexuality have to do with gender? How are sexual subjectivities intertwined with race, ethnicity, class, and other identities and identifications? Why has “queerness” proven to be such a powerful and sometimes powerfully contested concept? We will also explore what it means to think about specific historical events, such as the rise of sexology, the Harlem Renaissance, and the emergence of a transgender movement have had on queer cultural production. Readings may include works by the following authors: Butler, Cather, Diaz, Ferguson, Fitzgerald, Foucault, Freud, Hammonds, Hughes, James, Larsen, Lorde, Muñoz, Rich, Rodriguez, Sedgwick, and Stein, and as well as screenings of contemporary videos and films. This course meets the requirements of the Exploring Diversity Initiative in that it focuses on empathetic understanding, power and privilege, and critical theorization, especially in relation to class, gender, sexuality, race and ethnicity within a U.S. context.
Class Format: discussion/seminar
Requirements/Evaluation: active class participation, several short writing assignments, two 5-page papers, and one 8- to 10-page paper
Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

WGSS 345T(S) Shakespeare’s Women (W)
Crosslistings: ENGL 345/WGSS 345
Shakespeare’s plays portray a remarkably wide range of female characters from serving women to queens, from innocent, subservient young women to powerful authoritative adults. His plays explore female friendships, parents and children, love affairs and marriages, male actors playing female roles and female characters playing male roles. Looking closely at five plays—Twelfth Night, Much Ado Nothing, Hamlet, Macbeth, Antony and Cleopatra—we will examine the ways in which attitudes toward female stereotypes, sexuality, gender, subjectivity, social norms and performance evolve as Shakespeare’s poetic style and dramatic technique mature, and the genre shifts from comedy to tragedy.
Class Format: tutorial
Requirements/Evaluation: active engagement in tutorial sessions, five 4- to 5-page papers, and 5-1 to 2-page responses
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam
Enrollment Preferences: English majors and prospective majors
Enrollment Limit: none
Expected Class Size: 10

WGSS 353(F) The Brontës
Crosslistings: ENGL 353/WGSS 353
Around 1845, three sisters in a remote town in Yorkshire effectively converted their father’s humble parsonage into a family writer’s colony. In 1847, each published her first novel—two of which would go on to become major classics. Within 8 years, all three sisters were dead, but by then they had produced seven of the most formally innovative, socially challenging, original and powerful works in English fiction. We will read them all, from Charlotte’s bestselling love story, Jane Eyre, to the underrated Anne’s brilliant and disturbing anatomy of an abusive marriage, The Tenant of Wildfell Hall; to Emily’s singular masterpiece Wuthering Heights, as well as their poetry and selections from the voluminous fantasy fiction they created together as children. We will also read Elizabeth Gaskell’s acclaimed 1857 Life of Charlotte Bronte, “the first full-length biography of a woman novelist by a woman novelist”, which began the process of making the Brontës the cult figures they remain today. Reading these works together in the bicentennial year of Charlotte’s birth, we will consider how their shared efforts helped all three sisters to push through boundaries few other women writers had dared to challenge. In a similar spirit of collaboration, we will mix critical and creative writing in our responses to these works.
Class Format: seminar
Requirements/Evaluation: discussion, two critical essays and two short creative pieces
Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam
Enrollment Preferences: English majors, WGSS majors, seniors
Enrollment Limit: none

WGSS 361T(F) Writing about Bodies (W)
Crosslistings: ARTH 361/INTR 361/WGSS 361/THEA 361
The goal is to think about describing bodies from a variety of disciplinary approaches and genres of writing. Its focus is on living bodies, or bodies that were once alive, with an emphasis on bodies that move i.e., performing bodies—actors, dancers, singers—and what makes them unique. We will also consider objects associated with bodies, and the ways they are animated, including how they are animated when the person who had them dies. The course is meant for juniors, seniors, and graduate students who wish to write about bodies from different disciplinary formations—art, theatre, literature, anthropology, philosophy—and who have a particular interest in writing. We will read scholarly writing, fiction, New Yorker profiles, as well as memoir autobiogtaphy, and take each as a model through which to write about a person or an object redolent of a person. Among possible readings: Roland Barthes on cultural theory and representation; Claudia Rankine and Robin Coste Lewis on black bodies; Targhees Garson’s portrayal of Marjorie, Elaine Scarry on the body in pain; Joan Acocella, Hilton Als, Judith Thurman and other writers on the arts; Judith Butler and Peggy Phelan on the performative body; Marvin Carlson and Terry Castle on haunting; and Bill Brown and Mark Doty on things. In addition to readings, assignments include performances at the 82 Center and works for view at WMCA, as well as selected tapes of live performances as well as films.
Class Format: tutorial
WGSS 370 Women Activists and Social Movements
Crosslistings: INTR 371/AFR 371/PSCL 371/WGSS 370
This seminar examines women's participation in "liberation movements," it focuses on their contributions to civil and human rights, democratic culture, and theories of political and social change. Students will examine multidisciplinary texts, such as academic historical narratives, memoirs, political analyses, in critical and comparative readings of mid-late 20th century struggles. Women studied include: Mamie Till Mobley, Anne Moody, Ella Baker, Gloria Steinem, Angela Davis, Bettina Aptheker, Assata Shakur, Yuri Kochiyama, Denise Oliver, Domitilla Chungara.
Class Format: seminar
Requirements/Evaluation: attendance and participation in discussions (10%); collective/group report (30%); 15-pg double spaced research paper (60%)
Enrollment Preferences: juniors and seniors, or sophomores with permission of instructor
Enrollment Limit: 19
Expected Class Size: 19
Materials/Lab Fee: none
Distributional Requirements: Division 2

WGSS 376(F) Sex, Gender, and the Law in U.S. History (D)
Crosslistings: HIST 376/WGSS 376/JLST 376
This course explores how the law in America has defined and regulated gender and sexuality. We will evaluate how the law has dictated different roles for men and women, how sexual acts have been designated as legal or illegal, and the ways that race, class, and nationality have complicated the definition and regulation of gender and sexuality. We will examine how assumptions about gender and sexuality have informed the creation and development of American law, contested interpretations of the Constitution, and the changing meanings of citizenship; We will consider how seemingly gender neutral laws have yielded varied effects for men and women across race and class divides, challenging some differences while naturalizing others. Finally, we will examine the power and shortcomings of appeals to formal legal equality waged by diverse groups and individuals. Throughout the course, we will consider the various methodologies and approaches of the interdisciplinary field of legal history. Topics to be covered will include the Constitution, slavery, marriage, contraception, divorce, immigration, sexual violence, reproduction, abortion, privacy, suffrage, jury duty, work, and military service.
Class Format: seminar
Requirements/Evaluation: evaluation will be based on two short (4-5 page) papers; one longer (10-12 page) paper; an in-class presentation, and participation in class discussion
Extra Info: may not be taken on a pass/fail basis
Prerequisites: none

WGSS 378 The History of Sexuality in America
Crosslistings: HIST 378/WGSS 378
Sex is often thought of as an unchanging need, behavior, or instinct—a form of experience without history. And yet even in the recent past, sexual desires, acts, identities, attitudes, and technologies have undergone profound transformations. This course explores those transformations, tracing the shifting and contested meanings and experiences of sex and sexuality from the pre-colonial period to the present, and examining how and why sexuality has become so central to identities, culture, politics, and history. To understand how sexuality has been regulated by the state and what sexuality has meant to ordinary Americans in the past, we will use a wide range of primary sources, including as private letters, law cases, photographs, films, and music. Many of the topics are relevant to contemporary public debates, including controversies over censorship, sexual violence, gay and lesbian sexualities, transgender identities and politics, abortion, and sexually transmitted diseases.
Class Format: lecture/discussion
Requirements/Evaluation: evaluation will be based on class participation, a midterm examination, several short papers, and a 10- to 12-page research paper
Prerequisites: none
Enrollment Preferences: History majors and Women's Gender & Sexuality majors

WGSS 382 Latina/o Politics (D)
Crosslistings: LATS 382/HIST 382/WGSS 382
This course explores Latina/o politics from World War II to the present. Defining politics broadly, we will examine everything from electoral politics to grassroots activism. We will explore the relationship between Latinas/os and the U.S. political system, as well as the ways in which dynamics internal to Latina/o communities shape political issues and political participation. Specific topics include Mexican Americans and Puerto Ricans struggles for political inclusion in the aftermath of World War II, Cuban exile politics and their impact, the political and social movements of the 1960s and 1970s, key electoral campaigns, the recent appointment in 2008 of the first Latina as a Supreme Court justice, and on-going debates over immigration. With an assessment of power relations at its core, this Exploring Diversity Initiative course explores the ways in which Latinos and Latinas have been excluded from or differentially included in the U.S. political system, as well as how the U.S. political system reflects dominant hierarchies of race, class, and gender. We will also interrogate how Latinas/os have sought to make U.S. politics more inclusive and at times have struggled to transform U.S. politics.
Class Format: discussion
Requirements/Evaluation: evaluation will be based on class participation including short assignments in preparation for discussion; three short essays based on course readings (3-5 pages each), and a final paper (7-10 pages)
Prerequisites: none
Enrollment Preferences: Latina/o Studies concentrators and History majors; open to first year students

WGSS 383 Whiteness and Race in the History of the United States (D)
Crosslistings: HIST 383/AFR 383/WGSS 383
As slaves and free women, activists, domestics, artists and writers, African Americans have played exciting and often unexpected roles in U.S. political, social, and cultural history. In this course we will examine black women's lives from the earliest importation of slaves from Africa and the Caribbean through to the expansion of slavery, the Civil War, freedom, Jim Crow, the Civil Rights movements, and up to the present day. Consistent themes we will explore are the significance of gender in African American history and the changing roles and public perceptions of black women both inside and outside the black community. We will read and discuss a combination of primary and secondary sources. We will also consider music, art and literature in the context of the “standard “historical” texts. This course meets the requirements of the Exploring Diversity Initiative in that it focuses on empathetic understanding, power and privilege, especially in relation to class, gender, and race within a U.S. context.
Class Format: discussion
Requirements/Evaluation: evaluation will be based on student participation, three papers, and a brief oral presentation
Prerequisites: none
Enrollment Preferences: History majors and Africana Studies concentrators
Enrollment Limit: 25

HIST Group F Electives - U.S. + Canada
WGSS Racial Sexual + Cultural Diversity Courses
Crosslistings: HIST 383/WGSS 383/AMST 383
If race is socially and historically constructed, then the study of race relations in the U.S. extends to the topic of whiteness. And if we are never without the past, then "whiteness" must be a part of current discussions about American political culture, citizenship, and social issues. This course uses the prism of race to explore social, political, and economic development in U.S. history, following the development of "whiteness" through a chronology that begins in colonial Virginia, travels through immigration in the nineteenth century, examines racial politics and popular culture in the twentieth century, and ends with a look at the current issues. This course is framed by several questions: What about other analytical categories, like gender and class (or region or ethnicity or sexuality)? how have these experiences shaped and been shaped by the racial category of whiteness? Because historically whiteness has carried overtones of power, privilege, and wealth in the United States, the course necessarily critiques the roots of racial disparities. This class is not for the faint-hearted. Informed participation is necessary to its success. The course fulfills the requirements for the Exploring Diversity Initiative because it examines the differences and similarities between white Americans and other American cultures, and because it explores whiteness as a prism for understanding the operation of power and privilege in American society.

Class Format: discussion

WGSS 386 Latinas in the Global Economy: Work, Migration, and Households (D)
Crosslistings: LATS 386/HIST 386/WGSS 386
An increasingly global economy, from 1945 to the present, has affected Latinas in their home countries and in the United States. The garment industry, one of the first industries to go global, has relied extensively on Latina workers in their home countries and in the United States. Domestic work, a traditional field of women's work, also crosses borders. Challenging the myth that labor migration is a male phenomenon and that women simply follow the men, this course explores how the global economy makes Latinas labor migrants. What impact has the global economy and economic development had on Latinas' work and their households in their home countries? How have economic changes and government policies shaped Latinas' migrations and their incorporation in the changing U.S. economy? How have Puerto Rican, Mexican, Cuban, Dominican, Salvadoran, and Guatemalan women confronted the challenges created by a globalizing economy and balanced demands to meet their households' needs? This EDI course explores the impact of U.S. hierarchies of race, ethnicity, gender and class on Latinas' labor migrations and economic incorporation in the United States, as well as the myriad ways in which they confront, negotiate, and at times challenge those dominant U.S. hierarchies.

Class Format: discussion

Requirements/Evaluation: evaluation based on class participation and group presentations, short writing assignments, two short essays, and a final paper that will be presented to the class

WGSS 389(F) Fiction of Virginia Woolf
Crosslistings: ENGL 389/WGSS 389

*Lets us record the atoms as they fall upon the mind in the order in which they fall, let us trace the pattern, however disconnected and incoherent in appearance, which each sight or incident scores upon the consciousness. Let us not take it for granted that life exists more fully in what is commonly thought big than in what is commonly thought small ("Modern Fiction"). Virginia Woolf's fiction represents a self-conscious and highly experimental challenge to the conventions of Victorian and Edwardian fiction, in an effort to re-center the novel on lived experience. This course will explore the evolution of the innovative fictional forms by which she tried to bridge the gap between the experience of consciousness and its representation in language. We will also consider the links between Woolf's concern with in the fluidity of consciousness and her interest in gender fluidity and androgyny. We will read most of the major novels, probably including The Voyage Out, Jacob's Room, Mrs. Dalloway, To the Lighthouse, Orlando, The Waves, and Between the Acts, together with selected short fiction and critical essays.

Class Format: seminar

Requirements/Evaluation: discussion, weekly journal, three 4- to 6-page essays

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

WGSS 396 Modern Pleasure (D)
This course investigates modernist imaginations of pleasure, both sensual and aesthetic, with a particular focus on the ways that modernism's formal strategies might facilitate queer representations of pleasure, intimacy, and desire. In tandem with our discussion of literary form, we will consider the crucial role that visual media, music, and community spaces, like Harlem's cabarets and Natalie Barney's sapphic salon, played in the collaborative production and transatlantic circulation of modernism. Authors likely to be studied include Oscar Wilde, Langston Hughes, Gertrude Stein, Djuna Barnes, Nella Larsen, Radclyffe Hall, and James Baldwin. We will read the work of sexologists and situate modernist literature in relation to early 20th-century scientific conversations about human sexuality and the nature of pleasure. Queer and feminist theory will accompany these texts and provide a framework for our analysis of modernism's queer pleasures. This course satisfies the requirements of the Exploring Diversity Initiative in that it explores modern pleasure and pleasure as historically and geographically specific categories, examines how these categories are socially constructed and contested, and considers the effects of power and privilege on individual sexual experiences.

Class Format: seminar

Requirements/Evaluation: engaged and thoughtful discussion; oral presentation, one 5- to 7-page paper and one 8- to 10-page paper

WGSS 409(F) Transnationalism and Difference: Comparative Perspectives (D) (W)

Crosslistings: LATS 409/AMST 411/WGSS 409

In the age of satellite television, e-mail, and mobile applications such as WhatsApp and Skype, transnational living has rapidly emerged as the norm as opposed to the exception. However, what does it really mean to "be transnational"? How are the lived experiences of transnational individuals and communities shaped by categories of difference such as gender, ethnico-racial identity, sexuality, and class? What impacts do the growing number of transnational citizens and residents in the U.S. have on our understanding of "American" identity in the local, national, and global contexts? In this interdisciplinary, comparative course we will analyze recent theories regarding the origins and impacts of transnationalism. Particular attention will be paid throughout the semester to the interplay of gender, ethnico-racial identity, sexuality, and class in connection with everyday transnational dynamics. The broad range of case studies examined includes China, Colombia, the Dominican Republic, Haiti, Mexico, the Philippines, Puerto Rico, and Middle East.

Class Format: seminar

Requirements/Evaluation: evaluation to be based on student participation, an original 12-15 page research paper conducted in stages, and peer editing

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

WGSS 451 Ideal Bodies: The Modern Nude and Its Dilemmas

Crosslistings: ARTH 451/WGSS 451

Since the nineteenth century, the female nude has been so dominant that the very term "nude" has come to stand for the female body. This course looks at both male and female nudes from the time of the French revolution to the present in order to order how and why this gendering occurred. We will explore the role this gendering has played in opposition to the white western ideal, and thereby exoticized and marginalized. Our prime focus is the work of David, Ingres, Courbet, Gericault, Manet and Renoir but more popular nineteenth-century images as well as selected works by artists working in the twentieth and twenty-first centuries will be discussed.

Class Format: seminar

Requirements/Evaluation: evaluation will be based on biweekly 1-page paper, short reports, an oral presentation and a 10- to 20-page paper

Prerequisites: two semesters of ARTH 101-102-103; permission of instructor required

Enrollment Preferences: junior and senior Art majors, Women's, Gender and Sexuality Studies majors, French majors, and History majors with a concentration in European studies.

Distribution Notes: meets Division 1 requirement if registration is under ARTH; meets Division 2 requirement if registration is under WGSS

WGSS 410(S) Jr/Sr Sem:Discipline and Dissent: The Institutionalization of Women's, Gender, and Sexuality Studies

In the 1970s, student protest movements helped to create the first academic programs in women's studies. Forty years later, what is the relationship of Women's, Gender, and Sexuality Studies to social justice movements and feminist activism? How have social and political changes now have WGSS programs or departments, major organizations like the National Women's Studies Association establish norms for the academic field, and scholars devote entire careers to research on gender and sexuality. In short, WGSS has become part of the institution of higher education. As WGSS has become a discipline, were its activist origins also "disciplined"? Is the academic study of gender and sexuality a fundamental form of political activism, or should it be? Is it possible for an institutionalized field of study to challenge the institutional forms of knowledge and power that subvert systems of oppression? The national resurgence of campus activism makes these questions all the more pressing. In exploring these issues, we will study the history of WGSS programs, the evolving relationship of feminist activism to scholarship, and politics in and of the contemporary university.

Class Format: seminar

Requirements/Evaluation: oral presentation, three reading responses, class participation, and a substantial final research project

WGSS 457 Gender, Law, and Politics in U.S. History

Crosslistings: HIST 457/WGSS 457

This course explores the legal history of the United States as a gendered system. It examines how women have shaped the meanings of American citizenship through pursuit of political rights and obligations such as suffrage, jury duty, and military service; how those political struggles have varied across race, religion, and class; and how the legal system has shaped gender relations for both women and men through regulation of such issues as marriage, divorce, work, reproduction, and the family. While we will read some court cases, the focus of the seminar is on the broader relationship between law and society. Readings will address not only the history of statutory law, and of the lawsuits and trials testing those laws, but also the social history of the impact of the law and the political history of efforts to change laws.

Class Format: seminar

Requirements/Evaluation: will be based on an extensive (20-25 pages) research paper that makes use of primary and secondary sources, brief papers on the weekly readings, and class participation

Prerequisites: none
Enrollment Limit: 15
Expected Class Size: 10-15

The following provides a sample outline of the sequence of courses and experiences that an interested student might take:

PSYC 101 Introductory Psychology (required for further psychology courses)
PSYC 232 Developmental Psychology and/or
PSYC 242 Social Psychology;
PSYC 272 Psychology of Education;
PSYC 327 Cognition and Education;
PSYC 332 Mathematical Development
PSYC 338 Inquiry, Invention and Ideas
PSYC 372 Advanced Seminar in Teaching and Learning
At least one Winter Study in an intensive teaching practicum. The major programs are in Berkshire County (under PSYC) or in New York City (under SPEC), although other opportunities may be listed elsewhere in the Winter Study section of the course catalogue.

No specific major is required to participate in the program—although some lend themselves easily to certification, such as Mathematics, English, Biology, American history, or French, almost all of our majors can provide the basis of teacher certification. Alternatively, students can major in Psychology, take a concentration of courses in a different field, and then pursue that content area more intensively in graduate work.

Other courses of interest include:
MATH 285 Mathematics Education
PHIL 331 Contemporary Epistemology
PHIL/AMST 379 American Pragmatism
PSCI 410 Senior Seminar in American Politics; Civic Education in America
PSYC 341/WGSS 339 Stereotypes, Prejudice, and Discrimination
PSYC 350 Child Psychopathology

WILLIAMS-EXETER PROGRAMME AT OXFORD UNIVERSITY
Director: Professor GRETCHE LONG

THE PROGRAMME

Williams College offers a year-long program of studies at Oxford University in co-operation with Exeter College (founded in 1314), one of the constituent colleges of the University. Williams students will be enrolled as Visiting Students at Exeter and as such will be undergraduate members of the University, eligible for access to virtually all of its facilities, libraries, and resources. As Visiting Students in Oxford, students admitted to the Programme will be fully integrated into the intellectual and social life of one of the world’s great universities.

Although students on the Programme will be members of Exeter College, entitled to make full use of Exeter facilities (including the College Library), dine regularly in Hall, and join all College clubs and organizations on the same terms as other undergraduates at Exeter, students will reside in Ephraim Williams House, a compound of four buildings owned by Williams College, roughly 1.4 miles north of the city centre. Up to six students from Exeter College will normally reside in Ephraim Williams House each year, responsible for helping to integrate Williams students into the life of the College and the University.

A resident director (and member of the Williams faculty) administers Ephraim Williams House, oversees the academic program, and serves as both the primary academic and personal advisor to Williams students in Oxford.

Students on the Williams-Exeter Programme are required to be in residence in Oxford from Thursday, 29 September 2016, until all academic work for Trinity term is complete (potentially as late as at least 24 June 2017) with two intervening vacations between the three terms. Students enroll for the full academic year, which consists of three eight-week terms of instruction: MICHAELMAS TERM (10 October to 2 December 2016), HILARY TERM (16 January to 10 March 2017), and TRINITY TERM (24 April to 16 June 2017). Students are expected to be in residence to write their first tutorial papers in the week before the eight weeks of instruction begin (0th Week) and to remain in residence during the week after the term ends (9th Week) in order to sit final examinations. Between the three terms there are two intervening five week vacations, during which students may be expected to continue reading as preparation for their upcoming tutorials. Students are required to arrive in Oxford by 29 September 2016 for the ten-day orientation.

THE TUTORIAL SYSTEM

Undergraduate instruction at Oxford University is largely carried out through individual or small-group tutorials, in which students meet weekly with their tutor to present and discuss an essay they have written, based on an extensive amount of reading undertaken from an assigned reading list they will receive at the beginning of each term. In addition to the weekly tutorial, students are usually expected to attend a course of lectures offered by the University that corresponds to the material being addressed in their tutorials.

Each student will plan a course of study for the three terms of the academic year in consultation with the director of the Programme. In his or her capacity as the Tutor for Visiting Students at Exeter College, the director, working closely with Exeter’s subject tutors, will arrange the teaching for the students, monitor student progress, be in regular contact with the student’s tutors, supervise the examinations that students sit at the end of each academic term, and report on each student’s academic progress to the Senior Tutor at Exeter College. There are no “add/drop” periods at Oxford; once a student has secured a tutor to teach that course, students cannot back out or change the University that corresponds to the material being addressed in their tutorials.

WILLIAMS PROGRAM IN TEACHING
Director: SUSAN ENGEL

The program in teaching is designed to enable Williams Undergraduates to study the ideas, questions, and practices involved in good teaching at all levels. The program seeks to promote and facilitate an exchange of ideas about teachers, learners and schools, within and beyond the Williams campus. The program offers a range of opportunities including courses on education, intensive supervised student teaching, workshops, advising, lecture series, and ongoing peer groups for those who teach. Students may participate in a variety of ways, ranging from taking one course to a sustained in-depth study of teaching and learning geared to those who want to become teachers, or educational psychologists. We seek to connect students with one another, to bring in expert teachers to provide mentoring, and to create links across the curriculum so that students can see the vital connections between what they study (French, Algebra or Biology for instance) and the process of teaching those topics to elementary and high school students. The program is open to any student interested in education and offers opportunities for all levels of interest, including those who want to find out about certification and graduate study.
Students are required to enroll in two tutorial courses during Michaemas term and two tutorials during Hilary Term (each consisting of eight individual tutorial meetings and generally requiring the preparation of eight essays). During Trinity Term, students may choose to enroll in either one or two tutorial courses. Although some students take the minimum five tutorial courses, most have enrolled in two tutorials per term for a total of six tutorials over their time at Oxford.

**GRADES AND CREDIT**

Grades for each tutorial course reflect the grade assigned to all eight tutorial sessions, including their related essays, considered together, as well as the grade summary or term examination. A tutorial grade is calculated based on the average of the marks for the term essay and the term examination. Full tutorial credit will be awarded for tutorial courses conducted at Oxford that meet the requirements for a tutorial at Oxford. However, it is strongly recommended that students live in the Williams-Mystic dormitories at Mystic Seaport, a maritime museum, and have full access to world-class maritime collections, a maritime library, a state-of-the-art Marine Sciences teaching and research center, and diverse coastal habitats (where field research can be undertaken in a wide variety of environments, ranging from tidepools and salt marshes to sandy beaches and estuaries). Students also participate in maritime skills under professional instruction, with choices such as celestial navigation, music of the sea, boat building, or small boat handling and sailing. Williams-Mystic seeks places that are willing to try new things in a compelling academic environment. No sailing experience necessary. Participation in Williams-Mystic can also be used in partial fulfillment of the Maritime Studies Concentration at Williams. Interested students should email admissions@williamsmystic.org, call (860–572–5359), visit the website (http://mystic.williams.edu/), or obtain a Williams-Mystic catalog from the Dean’s office. Applications are on the web and at the Dean’s office.

**MAST 104(S) Oceanography**

**Crosslistings:** GEOS 104/ENVI 104/MAST 104

The oceans cover about 72% of Earth’s surface, yet we know the surface of Venus better than our own oceans floors. Why is that? This integrated introduction to the study of the formation and history of the ocean basins; the composition and origin of seawater; currents, tides, and waves; ocean-atmosphere interactions; oceans and climate; deep-marine environments; coastal processes; productivity in the oceans; and human impacts. Coastal oceanography will be investigated on an all-day field trip, hosted by the Williams-Mystic program in Connecticut.

**Class Format:** lecture/discussion, three hours per week; laboratory, two hours per week in alternate weeks/one all-day field trip

**Requirements/Evaluation:** evaluation will be based on two hour exams, lab work, participation in the field trip, and a final exam

**Extra Info:** may not be taken on a pass/fail basis

**Prerequisites:** none

**Enrollment Preferences:** first-year and sophomore students

**Enrollment Limit:** 48

**Expected Class Size:** 48

**Distributional Requirements:**

**Division 3**

**MAST 211(F,S) Oceanographic Processes**

**Crosslistings:** MAST 211/GEOS 210

This course examines ocean and coastal environmental science issues including carbon dioxide and the ocean’s role in climate, El Niño and other ocean-atmosphere oscillations that influence our weather, coastal erosion and other hazards, and fisheries. The focus is on controlling processes with regional comparisons. Blue water oceanography is conducted in the Atlantic and comparative coastal oceanography includes trips to Southern New England shores, and the West and Gulf coasts of the US as part of the Williams-Mystic program.

**Class Format:** lecture/laboratory, including coastal and near-shore field trips, 11 days offshore, and a laboratory or field research project

**Requirements/Evaluation:** two tests, a research project, and a presentation

**Extra Info:** offered only at Mystic Seaport

**Distributional Requirements:**

**MAST 226(T) The Oceans and Climate (W)**

**Crosslistings:** GEOS 226/ENVI 226/MAST 226

The oceans are a fundamental part of Earth’s climate system. Ocean currents redistribute heat and water vapor around the globe, controlling temperature and precipitation patterns. Marine phytoplankton blooms and air-sea gas exchange modulate the atmospheric carbon dioxide concentration. The dynamic interaction of the atmosphere and the sea surface results in multi-year climate extremes such as the El Niño-Southern Oscillation. This course will examine gradual and abrupt climate shifts from Earth’s history and the ocean’s role in driving, amplifying or dampening the changes, the ocean’s response to anthropogenic greenhouse gas emissions, and the impacts of continued emissions and climate change on the ocean in the coming decades and millennia. We will analyze articles from the scientific literature that lay out the theory on the ocean’s influence on climate, reconstruct past climate and ocean changes, test the mechanisms responsible for those changes, and with that knowledge, project the consequences of continued anthropogenic greenhouse gas emissions. Topics may include the
climate effects of opening and closing seaways with plate tectonics, ocean feedbacks that amplify the intensity of ice ages, the instability of ocean circulation during ice-sheet retreat, the evolution of the El Niño-Southern Oscillation with changing carbon dioxide through the geologic past and the next century, ocean heat and carbon dioxide uptake during the last century and into the future, and the impact on sea level, seafloor methane reservoirs, ocean acidification, oxygenation and marine ecosystems.

Class Format: tutorial

Requirements/Evaluation: each student will write five 5-page position papers; evaluation based on the critical analysis of reading from the scientific literature through writing and discussion

Extra Info: may not be taken on a pass/fail basis, not available for the fifth course option

Prerequisites: GEOS 104, GEOS 210 or permission of instructor

Enrollment Preferences: sophomores and juniors

Enrollment Limit: 10

Expected Class Size: 10

Distributional Requirement: Division 3

Not Offered Academic Year 2017

TUT: Instructor: Mea Cook

MAST 231(F,S) Literature of the Sea (W)

Crosslistings: MAST 231/ENGL 231

Taking advantage of our maritime museum, coastal setting, and three field seminars, we study canonical and lesser-known novelists, short-story writers, dramatists, and poets who set their works in the watery world, often in the exact places where we travel as a class. We read, for example—depending on fall or spring semester—Ernest Hemingway when sailing on the Straits of Florida, John Steinbeck when exploring Cannery Row on Monterey Bay, and Mark Twain on a steamboat on the Mississippi. We read Kate Chopin on the sands of the Gulf of Mexico, Rudyard Kipling out on Georges Bank, and Herman Melville’s masterpiece Moby-Dick aboard Mystic Seaport’s historic whaleship, the Charles W. Morgan, a vessel nearly identical to the vessel he climbed aboard at age twenty-one. In the classroom we examine these works through a mixture of lecture, small-group discussion, and writing. To further appreciation and analysis, this interdisciplinary course uses students’ emerging knowledge of maritime history and marine science.

Class Format: small group tutorials with weekly lectures, including coastal and near-shore field trips and ten days at sea

Requirements/Evaluation: regular papers, class participation, journal-writing, and a final paper

Extra Info: offered only at Mystic Seaport

LEC Section: 01 TBA Instructor: Mary Becrow Edwards

MAST 258(S) Coastal Processes and Geomorphology

Crosslistings: GEOS 258/ENVI 258/MAST 258

Can people live safely along the coast? Recent events like Superstorm Sandy and the Tohoku Tsunami have shown us how the ocean can rise up suddenly and leave havoc on our lives and coastal infrastructure. Oceanographers and geoscientists can evaluate the risks and define informed strategies to prevent future coastal catastrophes. Currently almost half the global population lives within 100 km of the coast, with a large percent of those living in densely populated cities (e.g., New York, New Orleans, Los Angeles, Shanghai, Hong Kong, Cape Town, Sydney, Mumbai). Despite the growing risks and challenges associated with climate change and rising sea levels, the coastal population continues to grow rapidly. Helping these growing populations to live safely along the coast requires a detailed understanding of the processes that shape these zones. These processes act across a variety of scales, from decadal-scale processes that determine shoreline position and evolution, to weekly and daily processes such as storms and tides. This course will provide an in-depth look at the forces-wind, waves, storms, and people—that shape the coastal zone, as well as the geologic processes-sandy beaches, rocky cliffs, barrier islands, deltas, and coral reefs-that are acted upon and resist these forces. Coastal dynamics are strongly affected by human interventions, such as seawalls, dredged channels and sand dune removal, as well as by sea level rise and changes in storm frequency and magnitude associated with climate change. Finally, the course will provide students with a perspective on how the U.S. seeks to manage its coastal zone, focusing on sea level rise and coastal development. This class will include an all-expenses-paid Spring break field trip to the Outer Banks in North Carolina to collect oceanographic and geomorphologic data in conjunction with researchers at the U.S. Army Corps of Engineers Field Research Facility. Labs in the course will focus on analysis of the data collected during the field trip, and data collected previously at the Facility.

Class Format: lecture; will likely be a combination of lectures and discussions

Requirements/Evaluation: problem sets/lab reports, two short tests, and a research project

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: GEOS 104 or permission of instructor

Enrollment Limit: 10

Expected Class Size: 10

MAST 351(F,S) Marine Policy

Crosslistings: MAST 351/ENVI 351/PSCI 319

This seminar utilizes the interdisciplinary background of the other Williams-Mystic courses to examine national and international contemporary issues in our relationship with our ocean and marine environment. This seminar takes a topical approach to the study of ocean and coastal law and policy, examining climate change, fisheries, coastal zone management, admiralty law, marine biodiversity, ocean and coastal pollution, and ocean governance.

Class Format: lecture, discussions, guest lectures by active professionals, and includes coastal and near-shore field trips, and 10 days offshore

Requirements/Evaluation: an independent research paper, a presentation, and a final exam

Extra Info: offered only at Mystic Seaport

Dept. Notes: satisfies the Environmental Policy requirement for the Environmental Policy major and the Environmental studies concentration

Fall 2016

LEC Section: 01 TBA Instructor: Michael Nishizaki

Spring 2017

LEC Section: 01 TBA Instructor: Michael Nishizaki

MAST 352(F,S) Americans and the Maritime Environment (W)

Crosslistings: MAST 352/HIST 352

This course examines the impact of the maritime environment (both salt water and fresh) on human affairs from the age of European expansion to the opening decades of the 21st century. Taught using the collections of Mystic Seaport Museum and on several distant field seminars, Americans and the Maritime Environment examines en situ such things as race, gender, revolution, and humankind’s changing relationship with the world’s oceans. Readings in primary sources and secondary works on the social, economic, and technological implications of maritime activities culminate in an original research paper.

Class Format: lecture/discussion, including coastal and near-shore field trips, 10 days offshore, and an independent, primary source research project

Requirements/Evaluation: two papers, and short presentation, and final exam; Student paper will be a 5-page minimum and a 15-page minimum essay; the 15-page paper will be critiqued in three steps, as a proposal, a draft, and a final paper, with attention to reasoning and style

MAST 402(S) Senior Seminar: Perspectives on Environmental Studies

Crosslistings: ENVI 402/MAST 402
The Environmental Studies and Maritime Studies programs provide students with an opportunity to explore the myriad ways in which humans interact with diverse environments at scales ranging from local to global. As the capstone course for Environmental Studies and Maritime Studies, this seminar will bring together students who will have specialized in the humanities, social studies and/or the sciences and will provide an opportunity for exchange across these disciplinary streams. Readings and discussion will be organized around the common theme of climate change. Over the course of the seminar, students will develop a sustained independent research project on a topic of their choice.

Class Format: seminar

Requirements/Evaluation: evaluation is based on active participation, discussion leading, several smaller assignments and capstone project

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: ENVI 302 or MAST 351 Maritime Policy or permission of instructor

Enrollment Preferences: limited to senior Environmental Policy and Environmental Science majors and Environmental Studies and Maritime Studies concentrators

Enrollment Limit: 20

Expected Class Size: 19

Dept. Notes: required course for students wishing to complete the Environmental Policy & Environmental Science majors and the Environmental Studies or the Maritime Studies concentrations

Fall 2016
HON Section: 01  TBA  Instructor: Ronadh Cox
All students who will be on campus during the 2016-2017 academic year must register for WSP. Registration will take place in the early part of fall semester. If you are registered for a song of Winter Study to which you must be continued, through Winter Study by departmental rules, you will be registered for your Winter Study Project automatically. In every other case, you must complete registration. First-year students are required to participate in a Winter Study that will take place on campus; they are not allowed to do '99's.

Even if you plan to take a '99, or the instructor of your first choice accepts you during the registration period, there are many things that can happen between registration and the beginning of Winter Study to upset your first choice, so you must list five choices. You should try to make one of your choices a project with a larger enrollment, not that it will guarantee you a project, but it will increase your chances.

If you think your time may be restricted in any way (ski meets, interviews, etc.), clear these restrictions with the instructor before signing up for his/her project. Remember, for cross-listed projects, you should sign up for the subdepartment in which you want to do "99. For many beginning courses, you are required to take the WSP Sustaining Program in addition to your regular project. You will be automatically enrolled in this Sustaining Program, so no one should list this as a choice. The grade of honors is reserved for outstanding or exceptional work. Individual instructors may specify minimum standards for the grade, but normally, fewer than one out of ten students will qualify. A grade of pass means the student has performed satisfactorily. A grade of perfunctory pass signifies that a student's work has been satisfactorily completed but just adequate to deserve a grade of pass. Although if you have any questions about a project, see the instructor before you register. Finally, all work for WSP must be completed and submitted to the instructor no later than January 26, 2017. Only the Dean can grant an extension beyond this date.

### WINTER STUDY '99’s

Sophomores, juniors and seniors are eligible to propose "99’s," independent projects arranged with faculty sponsors, conducted in lieu of regular Winter Study courses. Perhaps you have encountered an interesting idea in one of your courses which you would like to study in more depth, or you may have an interest not covered in the regular curriculum. In recent years students have undertaken in-depth studies of particular literary works, interned in government offices, assisted in foreign and domestic medical clinics, conducted field work in economics in developing countries, and given performances illustrating the history of American dance. Although some of these projects involve travel away from campus, there are many opportunities to pursue intellectual or artistic goals here in Williamstown.

99 forms are available online: [http://www.williams.edu/Registrar/winterstudy/99direct.html](http://www.williams.edu/Registrar/winterstudy/99direct.html)

The deadline for submitting the proposals to faculty sponsors is September 29, 2016.

### AFRICANA STUDIES

**AFR 15 Ishmael Reed, Multiculturalist and Satirist (Same as ENGL 15)**

To be taken by students registered for American Studies 491 or 492.

**AFR 17 Writing in the Margins: Playwriting as Plagiarism (Same as THEA 17 and WGSS 17)**

To be taken by students registered for Anthropology 493-494.

**AFR 24 Touring Black Religion in the 'New' South (Same as ENVI 24 and REL 24)**

In February of 1927 anthropologist Franz Boas asked folklorist Zora Neale Hurston to identify an ideal location in which to study and collect data about "Negro culture in the South." Hurston’s reply, without hesitation, was the central and gulf coast of Florida because she believed there, “it was possible for [her] to get a cross section of the Negro South in one state.” Hurston traveled directly to Eatonville, the town she eventually claimed as her birth home, and for over a decade, utilized the information she collected as the backdrop to her fiction as well as her nonfiction explorations of Black religion. Taking Hurston’s lead, this course (the first team-taught winter travel study offered solely by Africana Studies faculty) will utilize Florida’s gulf coast as the backdrop to exploring the diverse manifestations of modern black religious expression. Because of its diverse geographical, political, social, and economic contexts, Florida has historically been characterized as a “new South” with distinctive cultural expressions. With this history in mind, this course will address four critical questions: (1) What is Black religion?; (2) What are the distinctive aspects of southern expressions of Black Protestant religion; (3) How do Black communities see themselves in relation to broader social concerns? and (4) How, if at all, is religious expression in Florida unique?

In addition to these questions, we will travel to Florida’s west coast and visit three different church communities to understand Black Protestant religion as currently expressed in the ‘New South.’ This includes Bryant Chapel Christian Methodist Episcopal Church in Okeechobee County; an ever-evolving Baptist church in Tallestee Florida; Old Landmark Cathedral Church of God in Christ (COGIC), a Pentecostal-Holiness church in St. Petersburg, Florida; and Revealing Truth Ministries, a mega-church in Tampa, Florida. As participant-observers we will take part in worship services, and when possible, interview local residents about the role each church plays in its respective community. In addition to learning about Black religion along the western coast of Florida through participant observation, students will visit and tour local historical sites significant to Black religious’ experiences, and will meet with local academics, archivists, and leaders. These will include: touring the Zora Neale Hurston National Museum of the Arts in Eatonville, visiting the Public Archaeology Lab at New College of Florida with Professor Uzi Baram; holding conversations about doing ethnographic work with author and scholar Robert Hayden; and touring the Family Heritage Museum at the State College of Florida with Freddie Brown and Kathie F. Marsh. Surveying Black history archives was especially important in the previous iteration of the course because they enlivened the historical and ethnographic literatures the students read.

In addition to their roles as participant observers, students will have access to an electronic reading packet that will ground them briefly, though comprehensively, on Florida’s history, ethnographic methods, and Black religious expressions. We will also use sources that contextualize church responses to current social concerns such as environmental racism, homelessness, and health care. A completed draft of the course reading packet is provided in the itinerary below.

**Method of evaluation:** An electronic field journal, participation in weekly colloquium discussions, and a 10-page reading response paper due by January 26, 2017.

**Enrollment limit:** 8

**Method of selection:** We will review application essays and hold interviews with the top 10 applicants; preference will be given to majors and concentrators in Africana Studies, Religion, and Environmental Studies; priority will also be given to students with a background in ethnographic methods.

**Cost per student:** $3400

**Instructors:** Jonathan L. Davis and Rhon Manigault-Bryant

### AMERICAN STUDIES

**AMT 10 North Adams, Massachusetts: Past, Present, and Future (Same as HIST 10)**

See under HIST 10 for full description.

**AMT 11 Feminist Perspectives on Latinas in Popular Media (Same as LATS 11 and WGSS 11)**

See under LATS 11 for full description.

**AMST 15 Contemporary Songwriting (Same as MUS 15)**

See under MUS 15 for full description.

**AMST 30 Senior Honors Project**

To be taken by students registered for American Studies 491 or 492.

### ANTHROPOLOGY/SOCIOLGY

**ANTHROPOLOGY**

**ANTH 31 Senior Thesis**

To be taken by students registered for Anthropology 493-494.

### SOCIOLOGY

**SOC 13 Humanity 2.0: Humans, Transhumans, Posthumans**

This course will invite the students to explore the so-called “transhumanist movement” and its overriding aim: the realization, through highly speculative technoscientific means, of an enhanced or even postbiological existence; the so-called “posthuman condition.” Humanity 2.0. Students will read primary transhumanist texts and critical scholarship on the movement, and will engage with related works of science-fiction film and literature. Considerable attention will be devoted to the figure of the cyborg, space exploration/colonization, the so-called “technological singularity,” artificial intelligence, mind-uploading, nanotechnology, and cryonic suspension, all of which, like transhumanism broadly, suggest that science and technology have come to operate as powerful channeling agents for the very sorts of (magical) beliefs, practices, and forms of (apocalyptic) expectation that theorists of secularization expected modernity to displace.

**Method of evaluation:** one of the following: 10-page paper; 5-page paper and presentation or performance; 2-3 short papers

**Prerequisites:** an interest in science fiction and/or science and technology studies

**Enrollment limit:** 20

**Meeting times:** 11am-1pm, TWR

**Cost per student:** $25

**Instructor:** Grant Shoafstall

**SOC 14 Epidemiology, Public Health, and Leadership in the Health Professions (Same as PHIL 14)**

After an introduction to the tools and research strategies of epidemiology — the study of disease and disability in human populations — in answering critical questions in etiology, prevention, public health and illness care/clinical medicine, the course will turn to a series of seminars on current epidemics to illustrate these activities in action. Some of the epidemics to be considered by analysis of current papers in the public health literature include C-section, Zika and microcephaly, sports injury, including concussion, toxic shock, and the spread of HIV. Interwoven into these classes will be aspects of leadership that...
differ from leadership in politics or business. The class will be exposed to a wide variety of leadership styles and effective primary prevention strategies. There will be assigned readings, active class discussions, unknown epidemic analyses and presentations, and background journal publications to read and present as part of the series of seminars at the end of the course.

**Method of evaluation:**
class participation, quality of assigned presentations, and a 5- to 10-page paper on a public health topic of interest

**Prerequisites:** a completed course in biostatistics will be advantageous

**Enrollment limit:** 12

**Meeting times:** all interested students will be interviewed by the instructor

**Cost per student:** $75

**Instructor:** Nicholas Wright

---

**SOC 15 Photographic Literacy and Practice**

When you look at a photograph, what is it really saying? How can you make a photograph that says what you mean? This course will educate students on the concepts of photographic seeing and visual literacy, while also training students to apply these concepts to their own photography. The class will meet three times per week — I propose Mondays and Fridays from 10am-12pm and Wednesdays from 1pm-5pm. Outside of class, students will be expected to photograph on their own in the Williamstown area and access to a car may be helpful. Outside of class readings will consist of one book, “How to See the World,” by Nicholas Mirzooff and many shorter writings and videos which are available online. In class we will review photobooks from my own collection and discuss how a well sequenced body of work can be greater than the sum of its parts. Students will learn to defend their work during in-class critiques, and at the end of the course the class will produce an exhibition of their photography. Students must own a digital camera. A DSLR with a 35mm lens is ideal, but compact cameras will also work.

**Method of evaluation:** final photographic essay

**Prerequisites:** none

**Enrollment limit:** 12

**Meeting times:** preference is given to seniors

**Cost per student:** $70

**Instructor:** Benjamin Brody

Ben Brody is a Massachusetts-based photojournalist and exhibiting artist who has focused primarily on the aftermath of the Sept. 11, 2001 attacks. For more than ten years he has photographed the American wars in Iraq and Afghanistan while pioneering a unique visual approach conveying the absurdity and unintended consequences of those wars.

---

**SOC 16 Humans of the Berkshires**

Staying in Williamstown but yearning to get outside the “Purple Bubble”? This course will involve students in constructing a website devoted to the “Humans of the Berkshires,” inspired by Brandon Stanton’s Humans of New York. The experience will be hands-on and student-driven as we venture beyond the Williams campus to conduct interviews, take photographs, and engage more deeply with the surrounding community. We’ll unfurl our efforts in accordance with common themes, beginning with “Williamstown Beyond the College,” “Deindustrialization in the Berkshires,” and “The Creative Economy,” and conclude with other issues that interest enrolled students. Along the way, we’ll reflect on the intellectual, emotional, and ethical dimensions of our work by examining existing digital storytelling projects and public responses to them. Why has Humans of New York had such resonance and inspired so many conversations? What critiques has it generated and why? What social and emotional connections does digital storytelling create (or fail to create)? What ethical considerations should inform digital storytelling? How does it differ from established academic approaches to social research (e.g., ethnography, in-depth interviewing, oral history) and from traditional journalism? Students should be prepared to participate vigorously in class discussions and to spend time outside of class engaging with existing digital storytelling projects and conducting interviews in the surrounding community.

**Method of evaluation:** public opening of the installation. The installation itself will continue to grow and change through the 2016-2017 academic year as the broader project unfolds on campus.

**Meeting times:** mornings

**Cost per student:** $15

**Instructor:** Christina Simko

---

**ARTH 14 Basquiat and Defacement: Conceptualism, Black Lives Matter and Black Identity**

This course capitalizes on the short-term presence of a painting by Jean-Michel Basquiat at the Williams College Museum of Art. Defacement (The Death of Michael Stewart) centralizes police brutality and state violence in a way that demands a rigorous examination of how a painter — in this case, Basquiat — internalizes the social politics of the time and the explicitness of violence to turn it into art. And this question is particularly important as Defacement is one of the rare treatises in Basquiat’s oeuvre of violence which cannot be metabolized into “nobility”, one of the artist’s favorite subjects. In an attempt to understand why Basquiat chose such a strong departure for Defacement, we will look at Goya’s Disasters of War and Picasso’s Guernica (Basquiat’s favorite painting). From there, we will use these to understand how Defacement not only reflects the national conversation about police brutality, but how the idea of Basquiat as a Conceptual artist informs contemporary and Millennial Black identity in the backdrop of high rates of police brutality and the Black Lives Matter movement. Class will meet 6-10 hours per week.

**Method of evaluation:** 5-page paper and final presentation

**Prerequisites:** none

**Enrollment limit:** 12

**Meeting times:** statement of intent

**Cost per student:** $100

**Instructor:** Chaedria LaBouvier

Chaedria LaBouvier is a 2007 graduate of Williams College and contributing writer for Elle, Medium and Glamour where she focuses on pop-culture, police brutality and politics. She is a co-founder of Mothers Against Police Brutality and is writing a narrative non-fiction about police brutality, social media and the Black Lives Matter movement.

---

**ARTH 15 Public Art and Climate Change: Ghana ThinkTank and the Making of a Museum Installation (Summer as ARTS 15)**

In this course students will work directly with members of the artist collective Ghana ThinkTank to design and implement an installation at the Williams College Museum of Art. Students will play an integral role at a key moment in a year-long project that brings Ghana ThinkTank and Williams College together to tackle climate change. Ghana ThinkTank is an international collective that “develops the first world” by flipping traditional power dynamics, allowing the “third world” to intervene in the lives of the people living in the so-called “developed” world. Ghana ThinkTank collects problems from communities throughout the USA and Europe, and sends them to think tanks they have created in “developing” communities. The think tanks — which include a group of bike mechanics in Ghana, people who run a rural radio station in El Salvador, and Sudanese refugees seeking asylum in Israel, among others — propose solutions that are then implemented in the “first world”. This innovative approach to public art reveals blind spots between otherwise disconnected cultures, challenges assumptions about who is “needy,” and turns the idea of expertise on its head. In this winter study, we’ll consider a range of exhibition making and interpretive approaches, and use a variety of sculptural skills and DIY strategies.

The resulting museum installation in WCMA’s Rotunda will function as both an active workspace and display to engage the public with Ghana ThinkTank’s project at Williams. It will serve to reveal the range of climate change-related problems submitted by members of our community, and invite visitors to submit their own problems, observe the think tanks in discussion, and sign up to be involved in implementing their solutions. The course will culminate with a public opening of the installation. The installation itself will continue to grow and change through the 2016-2017 academic year as the broader project unfolds on campus.

**Meeting times:** about 6 hours per week initially, more as we build physical components) to discuss readings, craft design approaches through ideation and iteration, and hold work sessions with Ghana ThinkTank artists and museum staff.

**Cost per student:** $100

**Instructor:** Sonnet Coggins

---

**ARTH 16 Intro to Fashion Studies (Same as COMP 16 and GERM 16)**

See under GERM 16 for full description.

---

**ARTH 31 Senior Thesis**

To be taken by students registered for ARTH 494.

**Method of evaluation:** participation, public exhibit and short 2- to 3-page page paper

**Enrollment limit:** 10

**Meeting times:** statement of intent

**Cost per student:** $30

**Instructor:** Chavoya

---

**ARTH 33 Honors Independent Study**

To be taken by candidates for honors by the independent study route.

---

**ART STUDIO**
This course is practical: artists and non-artists will be invited to test the boundaries between art and everyday life, between seeing and hearing, that emerged from twentieth-century avant-garde movements. The chief purpose of this course is practical: artists and non-artists will be invited to test 

The environment in which the figure exists tells as much about our intentions for a drawing as how we construct the figure itself (i.e. do we want the confrontation of a shallow space, or the greater narrative potential of a deeper space?). The course will stress individual critiquing by the instructor in a workshop environment. Different students may be working on different projects and at different skill levels. Although a model (we will use both male and female models) will be available most classes, we will also learn how to work with the figure without having to rely on an actual person being present in front of us. It is important as artists to have the ability and confidence to alter your work, to respond to your drawing's needs. This may require actions beyond just direct observation. Drawing is a dialogue between you and your "surface". You make a mark and then you respond. This "give and take" is essential to the creative process. Many graphic mediums will be introduced (i.e. charcoal, conte, wax, graphite, ink). There will be a demonstration the first day of class for students uncertain of telling a story with the drawn image.

Independent project to be taken by candidates for honors in Art Studio.

Instructor: Matthew Anderson

Matthew Anderson is a multimedia artist and has worked in sound, performance, and installation since 1993. He studied at the Studio for Interrelated Media at the Massachusetts College of Art and has exhibited and performed in venues including the Centre for Contemporary Arts, Glasgow, UK; TMuna Theatre, Tel Aviv, Israel; and Festival Ecuatoriano de Musica Contemporanea, Quito, Ecuador.

ARTS 12 Narrating the Figure through Drawing

This course is a hybrid of independent study and classroom work for students with some experience in painting. The goal of the course is to develop individual style and concept while improving technique. The class meetings will focus on technical improvement. The emphasis of the course, however, will be on the independent project, in which students are free to develop style and content and create a series of paintings to be exhibited in the Wilde Gallery. Experimentation and risk taking will be rewarded! We will meet three times a week, once in small tutorial groups to develop and critique individual projects and twice as a full class for 2 and a half hours of instruction in representational figure painting and abstraction. We will also visit our local museums to study paintings and drawings as an introduction to acrylic or oil paint for the term and are responsible for gathering paint, brushes, medium, thinner, gloves, palette and palette knives before the first class meeting. Paper, canvases, gesso and charcoal will be supplied and the cost will be added to the term bill.

Method of evaluation: weekly critiques, portfolio review, and exhibition in the Wilde Gallery

Prerequisites: ARTS 241; if you have not taken Arts 241, please send via email 5 images of paintings to the professor for review

Enrollment limit: 10

Method of selection: seniors and juniors will have priority

Meeting times: Monday, Tuesday, Wednesday, 1:00 to 3:30

Cost per student: $350

Instructor: Michael Glier

ARTS 18 Wood and Woodturning (Same as PHYS 18)

See under PHYS 18 for full description.

ARTS 31 Senior Studio: Independent Project Art Studio

Independent project to be taken by candidates for honors in Art Studio.

Instructor: Podmore

ASIAN STUDIES

ASST 12 The East is Red? — Socialism in Asia (Same as HIST 12 and PSCI 12)

This course provides a historical and political overview of socialism in Asia from the 1910s to the present. It examines the spread and influence of Marxism in Asia, the policies of socialist states and movements in relation to decolonization, the Cold War, and the Sino-Soviet split, and the marriage between market reforms and ostensibly socialist governments in the present day. In addition to looking at the socialist governments of China, Mongolia, North Korea, Vietnam, Laos, and Cambodia, we will examine cases of "unsuccessful" socialist movements in Japan, Indonesia, Nepal, and India. Class materials include memoirs of survival by non-state actors, the writings of socialist leaders (Mao Zedong, Ho Chi Minh, Kim Il Sung, etc.), and cultural constructions such as revolutionary theatre, songs, and contemporary films. We will also engage secondary scholarship that deals with Asian approaches to modernity, the use of revolutionary and state violence, and gender relations under socialism. Questions that will be addressed include: Why did Marxism, a Eurocentric theory of revolution intended for advanced capitalist societies, find such resonance in Asia? How was Marxism adapted for an Asian environment? Twenty-five years after the fall of communism, why have Asian socialist states remained in power? And in the scales of history, how should we account for the effects of socialism in Asia?
CHINESE
CHIN S.P. Sustaining Program for Chinese 101-102

CHIN 13 Tai Chi
Tai Chi is a popular form of physical exercise. This class will teach students the 24 movements of Yang style Tai Chi and the auxiliary qigong skills. It will also introduce students to the history of the development of Tai Chi and the Chinese cultural values embedded in it. Combining in-class practice, assigned readings, and multimedia medium, students are expected to be able to complete the movements learned in class and self-practice them out of class at their wish. The class will meet three times a week for two hours each time. Attendance will be taken in class. Students will write a 500-word essay that demonstrates their understanding of the cultural aspects of Tai Chi.

Course Materials: Students should come to class in work-out clothing. Reminder: If you have any medical conditions, be sure to consult your health professional that learning Tai Chi is appropriate for you, and let the instructor know about your conditions.

Method of Evaluation: Evaluation will be based on attendance, effort in class, a 5-page short paper discussing the cultural aspects of Tai Chi, and a final demonstration that shows students can complete all learned movements with precision and coherence.

Prerequisites: none
Enrollment limit: 20
Method of selection: seniors and Asian Studies students are selected before other students
Meeting times: afternoons
Cost per student: $0
Instructor: Younli Shi
Younli Shi has been teaching Tai Chi for twenty years. She is an adjunct faculty in the Department of Physical Education at MCLA and teaches Tai Chi classes in North Adams, Adams, and Williamstown.

CHIN 16 Active In and Out: Translation, Migration, and Transformation in Asian Theatres (Same as THEA 16)
It is intriguingly difficult to define the temporal and regional features of “Asian Theatres” in today’s world. Old legends come to life on the contemporary stage; avant-garde experiences from one era/area are transformed into established traditions; movements between nations are amplified by the media. The academic liminality of Asian Theatres is addressed in this course through the ventures of reading, watching, and play-making. Materials engaged will cross and challenge historical demarcations, geographical boundaries, and media specificities. We will first explore the metamorphoses of “Madam White Snake” from a Chinese oral legend, to a Korean-Japanese-Chinese meme in the late 1950s and early 1960s, to contemporary productions (a theatre by Mary Zimmerman and a Hong Kong film by Hark Tsui) and White Snake-themed tourist sites that reflect creative cultural entrepreneurship. Then, we will approach through close, deep, and cold readings contemporary plays about interculturality written by the established Asian American playwrights Young Jean Lee and Philip Kan Gotanda as well as the emerging Sinophone playwright Zhu Yi. The course will end with rehearsals and a public performance (short dramaturge practice/custom design paper); 3) one of the following individual/group “play-making” activities to prepare for the public performance (short dramaturge practice/custom design with limited budget/choreograph design/blocking practice), and 4) carrying out the final production.

Method of evaluation: 1) active class participation; 2) three short writing assignments (consisting of blurts for theatre/film promotion; one 1- to 2-page response to promotions published in another theatre or media arts related publication; one 2-page paper); 3) one of the following individual/group "play-making" activities to prepare for the public performance (short dramaturge practice/custom design with limited budget/choreograph design/blocking practice), and 4) carrying out the final production.

Prerequisites: none
Enrollment limit: 15
Method of selection: slight preference to students who are interested in play formation and/or Asian Studies; first-year and sophomore students are encouraged
Meeting times: mornings
Cost per student: $25
Instructor: Man He

CHIN 24 Taiwan Study Tour
Interested in learning firsthand about Taiwanese culture and becoming acquainted with the so-called Taiwan (economic and political) “miracle”? Want to learn or improve your knowledge of Mandarin, the language with the largest number of native speakers? Then join us on this 24-day study tour to Taiwan, Republic of China. We’ll spend the first two weeks in Taipei, the capital city, which has 3 hours of Mandarin language classes at levels from beginning to advanced will be scheduled each morning at the Mandarin Center of National Taiwan Normal University. After class each day, we’ll meet as a group for lunch at popular local restaurants. In between these classes, students will visit to cultural and economic sites of interest will be scheduled for some afternoons and Saturdays, with other afternoons, evenings, and Sundays free for self-study and individual exploration. During the last week, we’ll travel to central and southern Taiwan, staying at youth hostels or small hotels. Two orientation sessions will be conducted on campus in the fall to help participants prepare for their experience.

Method of evaluation: active participation in all scheduled activities, quality of work in the language course, 10-page paper
Prerequisites: none; not open to first-year students
Enrollment limit: 10
Method of selection: based on applicant’s statement of rationale and goals for wishing to participate; CHIN and ASST majors without previous experience in Taiwan will be given priority
Cost per student: $3,050
Instructor: Cornelius C. Kubler

CHIN 31 Senior Thesis
To be taken by all students who are candidates for honors in Chinese.

JAPANESE
JAPN S.P. Sustaining Program for Japanese 101-102

JAPN 11 The Japanese POW Camp in Film
During the Pacific War in the East, the pace of territorial conquest required the Japanese Imperial Army to overwhelm and overcome every colonial power in its wake, even the Americans in the Philippines under General Douglas MacArthur — all fell like dominoes. The Japanese seemed indomitable. Once conquered in these former colonies, the Japanese set up their infamous POW camps that housed tens of thousands of surrendered allied soldiers. But Japan was not a signatory to the Second Geneva Convention of 1929 protocols governing the Treatment of Prisoners of War. Consequently, POWs were not inovitated but stripped of any protective status as soldiers and treated as slaves, subject to the whims of brutality, incessant work in harrowing conditions and relentless, inhumane abuses. This was the conqueror’s hallmark.

As a film course we will focus on this unending existential ordeal of merciless mistreatment specific to the POW camps in each film, films that are rooted in eyewitness accounts of former POWs who were reduced to wretched skeletons in rags, emaciated beings, some, who because of their resilient spirit and stoicism bore the brunt of savagery by their captors.

The academic thrust of this class will be to address questions of moral conduct that the films’ sordid imagery evokes: How can one explain the scale of mistreatment so rampant and repellant in Japanese POW camps? Was it rational, or did it fit the behavior of Japanese soldiers as John Dower argues in his book, War Without Mercy? Or, can we attribute the flagrant violations of so-called Western “norms” and values of civilized behavior to the deeply ingrained authoritarian ideology of bushido, the code of the samurai, which defined Japan as a superior race? Was there a dehumanization that prevailed in the camps a matter of a perversion of bushido or, simply errant and renegade indiscipline, meant to degrade and demoralize any vestige of resistance? Then, was it something else, something more, ingrained, moral, deviant, and indelible, a Japaneseess, a cultural physiology that was both empirically and ideologically the essence of racial superiority, or even their belief in imperial divinity and destiny?

Method of evaluation: each film will require a 4- to 5-page reaction in addition to class participation; attendance is mandatory.

Prerequisites: none
Enrollment limit: 20
Method of selection: first come, first served
Meeting times: afternoons
Cost per student: $0
Instructor: Frank Stewart

I spent fourteen years in the Faculty of Law at Hiroshima Shudo University in Hiroshima, Japan. I lived within a fifteen-minute walking distance of Heiwa Koen, the peace park where the atomic bomb was detonated.

JAPN 25 Kyoto Artisans: Exploring 1200 years of Cultural History of Kyoto thorough Modern Craftsmanship
Kyoto, the former and innovative capital of Japan has 1200 years of history. It is called Japan’s cultural treasure house and thrives on its ancient heritage in architecture, gardens, religion, performing and culinary arts and craftsmanship. Yet Kyoto’s appearances can be deceiving. At a glance, its traditional architectures, sacred shrines and temples are absent as they are tucked away behind tall buildings and busy commercial storefronts. In Kyoto, you will find a monumental temple designated as a UNESCO World Heritage site under the shadow of ultramodern high-rising buildings. There is an immense tension between old and new. The city, with its culture, their character, the sense of racial superiority, or even their belief in imperial divinity and destiny?

The purpose of this travel course is to explore the cultural history of Kyoto and how traditional craftsmanship is perpetuated and transformed in a modern era as the city of Kyoto developed. Students will visit Kyoto artisans at their studio and through a discourse with thriving artists, they will arrive at their own conclusion about what it means to sustain tradition while pursuing modernization.

The first week of the course is conducted on campus. Students will intensively study the cultural history of Kyoto with readings, films and discussion. Also in pairs, they will conduct research on one selected area of Kyoto craftsmanship to which they will be responsible to educate the entire group for the onsite visit in Kyoto. Then, for the second and third week, the class will travel to Kyoto. We will first visit historic sites to learn the context of Kyoto’s development and through a discourse with thriving artists, they will arrive at their own conclusions. The class will travel to and through a discourse with thriving artists, and visit their studio and workshops. We will also visit the temples that have been designated as UNESCO World Heritage Sites.

Method of evaluation: active participation in all scheduled activities, quality of work in the language course, 10-page paper
Prerequisites: none
Enrollment limit: 30
Method of selection: first come, first served
Meeting times: afternoons
Cost per student: $0
Instructor: Frank Stewart

I spent fourteen years in the Faculty of Law at Hiroshima Shudo University in Hiroshima, Japan. I lived within a fifteen-minute walking distance of Heiwa Koen, the peace park where the atomic bomb was detonated.
Students are expected to participate in all the scheduled activities, keep a daily journal and share in daily reflections. At the end of the Kyoto visit, students will summarize their reflections and present their views on Japanese traditional and modern craftsmanship to the local community and the Kyoto artisans at a public forum. The class will return to campus on the fourth week and conduct a PowerPoint presentation in pairs on one area of craftsmanship to the campus community.

**Method of evaluation:**
- daily journal, a public presentation in Kyoto, and a PowerPoint presentation on campus

**Prerequisites:**
- none; not open to first-year students

**Instructor:** Kasumi Yamamoto

**JAPN 31 Senior Thesis**
To be taken by all students who are candidates for honors in Japanese.

**ASTRONOMY/ASTROPHYSICS**

**ASTR 12 A Passion for Planets: Exploring Mars and Pluto (Same as GEOS 12)**

This course, meant for non-majors, will deal with scientific, historical, and literary aspects of the planets Mars and Pluto. We will look at how the exploration of Mars and Pluto challenged the preconceptions of scientists and the public alike, and shattered paradigms.

It will be based on the content of the instructor’s book A Passion for Mars: Intrepid Explorers of the Red Planet (2008), and also, on his experiences participating in NASA’s New Horizons mission to Pluto in 2015.

Mars: Dreamers and space scientists, engineers and biologists, backyard astronomers and artists have devoted their lives—sometimes at the expense of their careers—to the quest for Mars. Over half a century, they have transformed the planets from a dark, barren planet to one of our wildest fantasies into an even more amazing real place of spectacular landscapes, beguiling mysteries, and fantastic possibilities—as an abode for life, and even as a second home for humanity. In A Passion for Mars, Andrew Chaikin, who covered Mars exploration as a science journalist and took part in the first Mars landing, chronicled this epic quest and the enduring dream of going there.

Pluto: In 2015, NASA’s New Horizons mission gave humans their first close-up look at the much maligned “ninth planet” Pluto. Andrew Chaikin participated in the mission and is the author of a book about the adventure. In this course we will discuss Pluto’s controversial demotion from planetary status by the International Astronomical Union, as well as the incredible scientific discoveries that have been made about this distant, icy world by the New Horizons mission. We will also consider the possibility that there may be thousands of planets in our solar system — many of them possibly like Pluto — instead of the 8 planets recognized by the International Astronomical Union.

**Method of evaluation:**
- quizzes on reading at the beginning of each class;
- level of class participation; final exam

**Prerequisites:**
- none

**Enrollment limit:** 12

**Method of selection:**
- if overenrolled, selection will be on the basis of emailed student description of experience or interest in the topic

**Meeting times:**
- afternoons, Tues/Thurs preferred; 2-5 hour classes per week, plus occasional sessions to view course-related videos

**Cost per student:**
- $0

**Instructor:** Andrew Chaikin

Andrew Chaikin is the author of numerous books and articles on space exploration. His book A Man on the Moon: The Voyages of the Apollo Astronauts (1994) has been called the definitive account of the Apollo missions. Chaikin is a science journalist who started The Sky and Telescope magazine and serves as the managing editor. His most recent book, Intrepid Explorers of the Red Planet, has been called the definitive account of the missions to Mars. He is a member of the American Astronomical Society and is an advisor to NASA on space policy and public communications. A former editor of Sky and Telescope magazine, he has written about astronomy and space exploration for three decades.

**ASTR 25 The Great American Eclipse of 2017**

For the first time in 99 years, the path of totality of a solar eclipse will sweep across the United States from coast to coast. We will study the science and sociology of total solar eclipses and explore both the eclipse aspects and the aspects of introducing hundreds of millions of Americans to eclipse observing. The whole United States will have a partial eclipse, with the 70-mile-wide path of totality going from Oregon to South Carolina.

We will begin the morning of August 21, 2017 with the American Astronomical Society’s meeting in Texas and then work with solar scientists (including an alumnus) at U. Colorado/Boulder and National Oceanic and Atmospheric Administration personnel at the eclipse site on the campus of Willamette University in Salem, Oregon. (See a map animation at GreatAmericanEclipse.com.) After overviewing the eventual expedition arrangements, we will visit major astronomical observatories in California, including the Palomar Observatory with its 200” telescope with which Williams College is joining a consortium for educational aspects of its Zwicky Transient Facility, with lodging in Pomona or Pasadena.

**Method of evaluation:**
- a day during the last week will be spent pondering what we have seen and discussing and writing 10-page reports about it; the possibility will be offered of participating in the eventual eclipse observation in August 2017

**Prerequisites:**
- none; not open to first-year students

**Enrollment limit:** 6

**Method of selection:**
- one paragraph description of interest

**Cost per student:**
- $2000 ($800 airfare/$1200 shared cost of hotel and food)

**Instructor:** Jay Pasachoff

**ASTR 31 Senior Research**
To be taken by students registered for Astronomy 493-494.

**ASTROPHYSICS**

**ASPH 31 Senior Research**
To be taken by students registered for Astrophysics 493-494.

**BIOLOGY**

**BIOL 11 BioEYES Teaching 4th Graders about Zebrafish**

BioEYES brings hands-on fish to 4th grade classrooms in Lanesborough and Williamstown Elementary Schools, in a science teaching workshop. Elementary school students will breed fish in the classroom, then study their development and pigmentation during one week. Williams students will adapt BioEYES lesson plans to the science curriculum for the schools we visit, with classroom teachers to introduce concepts in genetics and development, help the 4th grade students in the classroom, and assess elementary student learning. A final eight-page paper describing the goals and outcomes for each grade level is required. No zebrafish experience is necessary. During the first week, students will learn to set up fish matings, learn about embryonic development and the genetics of fish pigmentation as well as practice teaching the 4th grade BioEYES lesson plans with hands-on experiments using living animals. In the subsequent two weeks, we will work at the schools and in the final week, students will write up the assessment data.

**Method of evaluation:**
- create visual aids to coincide with BioEYES lessons and a final 8-page paper

**Prerequisites:**
- none

**Enrollment limit:** 14

**Method of selection:**
- preference to seniors

**Meeting times:**
- varies depending on needs of schools and laboratory requirements

**Cost per student:**
- $0

**Instructor:** Renee Schiek

Renee Schiek currently serves as the liaison between Lanesborough Elementary School and the BioEYES program, and helps the BioEYES program at the schools.

**BIOL 12 New Orleans Style Jazz**

This course has a focus on making music based on the principles of improvisation and street performance embodied by New Orleans-Style jazz. Typically composed of brass instruments, this course welcomes musicians and performers of all types, from the classically trained to those with no experience who are willing to play washboards, kazoos, and experiment with other forms of sound-making. For when you travel the world after Williams, this course will prepare you to “busk,” or make money playing music on the street, where some of the most dynamic forms of jazz and improvisation have been created. The course will include various street performances and culminate in a “gig” at a local music venue.

**Method of evaluation:**
- participation in final performance, at end of term, outside of class time; original written musical composition; short written research project; attendance and participation in class is required; rehearsal with classmates outside of class is required

**Prerequisites:**
- none

**Enrollment limit:** 20

**Method of selection:**
- selection will occur as follows: seniors, juniors, sophomores, first-years

**Meeting times:**
- afternoons

**Cost per student:**
- $5

**Instructor:** Andy Kelly

Andy Kelly, a local Jazz musician and former busker, Williams College Class of ’80, now travels the world bridging cultures with music, using American jazz to make peace in the world.

**BIOL 13 Intro to Animal Tracking (Same as ENVI 13)**

This course is an introduction to the ancient art and science of animal tracking, and its various applications in the modern world in the areas of animal research, environmental science, art and personal development. Participants will deepen their skills as naturalists, their awareness of the natural world, and discover that even the greens at Williams College are abundant with wildlife. Students will have field time in class at Hopkins Forest as well as through independent study at a convenient outdoor location of each student’s choosing.

Basic concepts of animal tracking, its history and use by indigenous people throughout the world will be discussed through video, slide show and field work. Students are required to create journals and site maps of their focus group study areas, including all major features of the landscape, flora and fauna activities.

**Method of evaluation:**
- evaluation will be based on attendance, class participation, a 2-page research paper, a field evaluation, and a power point presentation of their maps and journals, with attention to detail and content

**Prerequisites:**
- none

**Enrollment limit:** 18

**Method of selection:**
- seniors first

**Meeting times:**
- 10:00am to 2:30pm

**Cost per student:**
- $90

**Instructor:** Dan Yacobellis

A tracker for over 20 years, level 3 track and sign certified from Cyber Tracker International and teacher of tracking and primitive skills for 10 years.

**BIOL 31 Senior Thesis**
To be taken by students registered for Biology 493-494.
CHEM 10 Zymurgy
An introduction to the science, history, and practice of brewing beer. This course aims to supply the general chemical concepts and hands-on technical experience necessary to enable creative brewing and an appreciation of diverse beer styles. Lab topics include the biochemistry of yeast, sanitary practices, analytical methods, malt types and preparation, extract vs. all-grain brewing, hops, water chemistry, the chemistry of off-flavors, and beer judging. In the lab, students progress from brewing a commercially available extract kit to producing beer from scratch. The class will also meet professional brewers and microbiologists during a private tour of a local brewery.

Method of evaluation: evaluation is based on class/lab participation, a 10-page paper, and a final presentation
Prerequisites: no prerequisites; must be 21 years of age
Enrollment limit: 12
Meeting times: mornings 5 days a week (longer on lab days), several evenings, and an all-day field trip Cost per student: $500
Instructor: Thomas Smith

CHEM 11 Science for Kids (Same as PHYS 11)
Are you interested in teaching? Do you enjoy working with kids? Do you like to experiment with new things? Here is a chance for you to do all three! The aim of this Winter Study Project is to design a series of hands-on science workshops for elementary school children and their parents. Working in teams of 2-4, students spend the first two and a half weeks of Winter Study planning the workshops; this involves deciding on a focus for each workshop (based on the interests of the students involved) followed by choosing and designing experiments and presentations that will be suitable for fourth-grade children. On the third weekend of Winter Study (January 21, 22) we bring elementary school kids and their parents to Williams to participate in the workshops. You get a chance to see what goes into planning classroom demonstrations as well as a sense of what it’s like to actually give a presentation. You find that kids at this age are great fun to work with because they are interested in just about everything, and their enthusiasm is infectious. You also give the kids and their parents a chance to actually do some fun hands-on science experiments that they may not have seen before, and you are able to explain simple scientific concepts to them in a manner that won’t be intimidating. It is a rewarding experience for all involved.

Method of evaluation: evaluation is based on participation in planning and running the workshops; each group is expected to prepare a handout with descriptions of the experiments for the kids, parents, and teachers.
Prerequisites: no prerequisites; you need not be a science major; all that is needed is enthusiasm
Enrollment limit: 25
Method of selection: seniors, juniors, sophomores
Meeting times: classes meet three times a week for approximately three hours each session; the workshop is run on the third weekend of Winter Study (January 21, 22) and attendance from 9:00 a.m. to 3:00 p.m. is mandatory that weekend; there are also one or two brief meetings held in the fall term for preliminary planning.
Cost per student: $0
Instructors: Frederick Strauch and Laura Strauch
Laura Strauch is a lab instructor in the Chemistry Department at Williams.

CHEM 13 Ultimate Wellness: Concepts for a Happy Healthy Life
This course provides an opportunity to drastically improve your life by introducing concepts that can start making a difference in the way you feel today. We take a bio/psycho/social approach to nutrition, lifestyle, and happiness from a holistic perspective. Students will learn how to tune out mixed media messages and look within to find ultimate health and wellness. Topics include:

- Ayurveda
- Cleansing
- Preventative medicine
- Yoga and meditation
- Food intolerance & wellness
- Healthy eating and meal planning
- Deconstructing cravings and overcoming sugar addiction
- Healthy skin care with oils
- Finding your happy place

Evaluation will be based on completion of assignments, class participation, reflective 10-page paper or equivalent creative project, and final presentation that demonstrates a level of personal growth. After signing up for this course please email Nicole at nicole@zentreewellness.com with a brief statement describing your interest in the course and what you hope to achieve in it. In the event of over-subscription, these statements will be used in the selection process.

Method of evaluation: 5-page paper (or project equivalent) and final presentation
Prerequisites: none
Enrollment limit: 15
Method of selection: after signing up for this course please email Nicole at nicole@zentreewellness.com with a brief statement describing your interest in the course and what you hope to achieve in it; in the event of over-enrollment, these statements will be used in the selection process
Meeting times: mornings
Cost per student: $90
Instructor: Nicole Anagnos
Nicole Anagnos is Health Coach and Director at Zen Tree Wellness in Williamstown. She is co-founder of the organic skin care company, Klo Organic Beauty. She also holds a master’s degree in education.

CHEM 14 Beyond Hooking Up: Creating Meaningful Relationships (Same as PSYC 14 and SPEC 14)
Looking back on past loves and crushes, have you ever wondered “What on earth was I thinking?!” or “Why do I keep picking the wrong guys/girls for me?” While intense sexual attraction or urges may first call the shots, people who take the time to carefully choose and build caring, mutual relationships tend to be happier, healthier and more successful in their lives than those who don’t. So how do we get there from here and make sense of all this? Well, no matter where you are on the dating spectrum, this self-exploration and relationship-skill-building course is for you if you are ready to learn how to follow your heart AND your mind to co-create a fulfilling relationship within the vortex of the “hook up” culture. The Myers-Briggs Type Indicator, “How to Avoid Falling In Love with A Jerk,” and “Keeping the Love You Find” curricula will guide this introspective, interactive relationship mastery course through meaningful discussions and exercises that explore the common issues, dirty fighting tactics, subconscious directives and emotional allergies that often sabotage relationships. Experiential exercises, personal experiences and journaling will also give you the opportunity to practice effective communication and conflict resolution skills that honor the constructive use of differences and promote intimacy.

Method of evaluation: requirements: attendance, class participation, reading, journaling, 1:1 meetings with instructor, assignments, and a 10-page final paper/project
Prerequisites: statement of interest
Enrollment limit: 20
Method of selection: meaningful statement of interest
Meeting times: TBD
Cost per student: $100
Instructor: Rachelle Smith
Rachelle Smith, MSW, is a holistic, strengths-based clinical social worker, educator, and mentor bridging relationships, wellness and energy psychology.

CHEM 16 Glassblowing and Glassblasting (Same as ARTS 18)
This course provides an introduction to both a theoretical consideration of the glassy state of matter and the practical manipulation of glass. We do flameworking with hand torches for at least 12 hours per week. While no previous experience is required, students with patience, good hand-eye coordination, and a desire to find the glass will find this course most rewarding. The class is open to both artistically and scientifically oriented students.

Method of evaluation: evaluation is based on class participation, exhibition of glass projects, a 10-page paper, and a presentation to the class
Prerequisites: none
Enrollment limit: 10
Method of selection: preference is given to juniors, sophomores, and those who express the earliest interest and enthusiasm by email to Professor Thorpe.
Meeting times: 9:00 a.m. to noon, M-F
Cost per student: $75
Instructor: Jay Thoman

CHEM 18 Introduction to Research in Biochemistry
An independent experimental project in biochemistry is carried out in collaboration with a member of the Department with expertise in biochemistry. Biochemistry is a branch of chemistry that deals with the molecular details of living systems including the interaction of biologically important molecules. In the Chemistry Department, studies are underway to investigate the structure/function relationship of proteins, the interaction between proteins and RNA and DNA, and the molecular basis of bacterial gene regulation.

Method of evaluation: a 10-page written report is required
Prerequisites: variable, depending on the project (at least CHEM 151) and permission of the department; since projects involve work in faculty research labs, interested students must consult with one or more of the faculty instructors listed below and with the department chair before electing this course
Enrollment limit: enrollment limited to space in faculty research lab
Method of selection: expression of student interest
Meeting times: daily
Cost per student: $0
Instructor: Amy Gehring

CHEM 19 Introduction to Research in Physical Chemistry
An independent experimental project in physical chemistry is carried out in collaboration with a member of the Department with expertise in physical chemistry. Current research projects in the Department include computer modeling of non-linear, chaotic chemical and biochemical systems, molecular modeling of water clusters, laser spectroscopy of chlorofluorocarbon substitutes, and observing the virtuality of glassy glasses using single molecule spectroscopy and molecular dynamics simulations.

Method of evaluation: a 10-page written report is required
Prerequisites: variable, depending on the project (at least CHEM 151) and permission of the department; since projects involve work in faculty research labs, interested students must consult with one or more of the faculty
CHEM 20 Introduction to Research in Inorganic Chemistry

An independent experimental project in inorganic chemistry is carried out in collaboration with a member of the Department with expertise in inorganic chemistry. Opportunities for research in inorganic chemistry at Williams include (1) the design and development of sensors for environmental imaging of pollutants (Barber Lab), (2) luminescent lanthanide ion complexes incorporating gemini surfactants for highly penetrating and efficient cellular imaging (Barber Lab), (3) the storage of metal complexes in cells using polymeric materials transport (CGoh Lab), and (4) the synthesis of metal complexes as models of enzymes (CGoh Lab). Students will be guided through the fundamentals of project planning, record keeping, scientific writing, and presentation. The interdisciplinary nature of the research will expose students to a variety of areas including synthetic inorganic and organic chemistry, analytical chemistry and spectroscopy in the characterization of all new materials, physical chemistry in the rationalization of properties of new materials, and diverse applications of chemistry.

Method of evaluation: various writing exercises and a final technical report
Prerequisites: variable, depending on the project (at least CHEM 151) and permission of the department; since projects involve work in faculty research labs, interested students must consult with one or more of the faculty instructors listed below and with the department chair before electing this course; non-science majors are also invited to participate
Enrollment limit: enrollment limited to space in faculty research lab
Meeting times: expression of student interest
Meeting times: M-F 9 a.m. to 5 p.m.
Cost per student: $0
Instructors: Enrique Peacock-Lopez and Jay Thomas

CHEM 23 Introduction to Research in Organic Chemistry

Representative projects include: a) Study of the selective zinc-mediated deuteriation of iodohydrocarbons. Students involved in this work will learn techniques involved in organic synthesis, including analysis by NMR and GC-MS. b) Analysis of sediment and fish samples collected from the Hoosic River drainage basin for contamination with polychlorinated biphenyls (PCBs) and/or perfluorooctanoic acid (PFOA). This project will focus on techniques used in environmental analysis including trace-level determination of persistent organic pollutants by GC-MS and/or LC-MS. Method of evaluation: a 10-page written report is required
Prerequisites: variable, depending on the project (at least CHEM 151) and permission of the department; since projects involve work in faculty research labs, interested students must consult with one or more of the faculty instructors listed below and with the department chair before electing this course
Enrollment limit: enrollment limited to space in faculty research lab
Meeting times: expression of student interest
Meeting times: mornings
Cost per student: $0
Instructor: David Davidson

CHEM 31 Senior Research and Thesis

To be taken by students registered for Chemistry 493-494.

CLASSICS

CLAS 25 Where All Roads Go: Ancient Rome and Environns

For centuries, even for millennia, the proverb "All roads lead to Rome" was in an important sense literally true. For scholars and merchants, for people of faith, for artists of all kinds, for adventurers, migrants, and refugees, for the powerful and the curious the road to Rome was the city of all roads. The city of Rome was a prime destination. Today, Rome retains its importance as a center for diplomacy and international education and provides an unparalleled laboratory for architectural and art historical investigation. Rome also provides excellent lessons in sustainable urbanism and in nearly every sort of human interaction. This course will introduce students to the cultural and historical riches of Rome through an exploration of its first flourishing as the cultural and political capital of the ancient Mediterranean world. As we encounter the monuments and topography of the ancient city, serving the complex co-existence of antiquity and present day, we will investigate the creative interrelationship that the contemporary city continues to generate with the many layers of its past.

Method of evaluation: one semester presentation (prepared in advance), an entry in a group travel journal/blog, a two-part final paper with a reflective component and a write-up of the site report
Prerequisites: a previous CLAS or CLLA course at Williams, or instructor consent; not open to first-year students
Enrollment limit: 12
Method of selection: Classics majors or intending majors will be given preference; students who have not traveled to Rome before will be given preference within this group
Cost per student: $200-$600 for books, passport, and incidentals
Instructors: Amanda Wilcox and Edan Dekel

CLAS 31 Senior Thesis

May be taken by students registered for Classics 493-494.

COGS 31 Senior Thesis

May be taken by students registered for Classics 493-494.

COMPARATIVE LITERATURE

COMP 11 God in a Suffering World (Same as REL 11)

"Is God dead?" wonders the cover of the April 8, 1966 edition of Time magazine. Nietzsche, Hegel, and even Luther had already answered in the affirmative, though each meant something different when proclaiming that God is, indeed, dead. Death of God theology is still nascent, a mere half-century old, but it is increasing in popularity. Its premise is putting to rest focus on a transcendent, unreachable deity seen as irrelevant in a disenchanted world. Our primary author will be Jorgen Moltmann, whose 1972 "The Crucified God" responds to the horrors of Auschwitz and Hiroshima, offering a theology of the death of God. Our goal is to understand the mechanics, history, social promptings, and future of death of God theology. Additional readings will come from Miroslav Volf, Elie Wiesel, Richard Rubenstein, and Richard Bauckham.

Method of evaluation: 10-page paper
Prerequisites: none
Enrollment limit: 20
Method of selection: all
Meeting times: afternoons
Cost per student: $50
Instructor: Tasi Perkins

COMP 12 Grand Hotel in Film and Fiction (Same as GER 12 and RLFR 15)

See under GER 12 for full description.

COMP 13 The Literature and Cinema of Global Organized Crime (Same as GER 13)

See under GER 13 for full description.

COMP 14 Formidable French Film: New Cinema from France and the Francophone World (Same as RLFR 14)

See under RLFR 14 for full description.

COMP 15 The Spanish Civil War in English (Same as HIST 15 and RLSP 15)

See under RLSP 15 for full description.

COMP 16 Intro to Fashion Studies (Same as ARTH 16 and GER 16)

See under GER 16 for full description.

COMP 17 Writing in the Margins: Playwriting as Plagiarism (Same as AFR 17 and LATS 17 and THEA 17 and WGST 17)

See under THEA 17 for full description.

COMP 31 Senior Thesis

To be taken by students registered for Comparative Literature 493-494.

COMPUTER SCIENCE

CSCI 11 Developing Your Developer Toolbox

Becoming an effective developer takes knowledge, dedication, and the right set of tools. In this course, you will take control of your development environment and add some important tools to your development toolbox. Students will learn to customize and interact with their Linux environments; compile, install, and use common open source and command-line tools; and perhaps most importantly, learn how to navigate and produce useful documentation. From low-level systems researchers to aspiring App developers, these skills will help you be more efficient and more independent.

Method of evaluation: completion of labs and assignments, contributions to a collaborative wiki (5 pages of concise, formatted documentation)
Prerequisites: experience with Unix-like environments and the command line
Enrollment limit: 10
Method of selection: preference given to students with systems development interest and experience
Meeting times: mornings
Cost per student: $0
Instructor: Bill Jannen

CSCI 12 Stained Glass Tiling

In this course students learn geometric drawing, design, and the traditional craft skills needed to build a stained glass window. Each student will make a single panel of stained glass from a mosaic of transparent colored glass tiles. Students will learn how to cut glass; to paint and print on glass with Kiln-fired enamels; to assemble, solder, patinate and frame a stained glass window. Instructional sessions on the use of tools and safe handling of materials are included where necessary. Exhibition of work on the last day of Winter Study is mandatory. All students must participate in setting up a group exhibition of work, and tiding the lab at the end of Winter Study. This course is time-consuming. More information may be found at https://cogmbscriddle.wordpress.com/2016/03/28/stained-glass-tiling-the-process/ Class requires 15 hours per week. Students must be willing and able to put in an additional 5-10 hours per week outside of class.
CSCI 13 Building Valuable Software Products

We use software products every day to improve our lives, keep us entertained, or help us complete tasks efficiently. This course will explore how great software products actually get made by studying the tools that entrepreneurs at startup companies use and the processes they use to build them. Students will gain an overview of the techniques at the intersection of the market and business, customer empathy and design, and technology that are used in industry today. We will explore the following techniques among others: user interviews, agile methodologies, wire-framing and storyboarding, business model canvas, pitching, and roadmap prioritization.

Further, we will explore case-studies around real products in the market. Students will be introduced to prototyping tools (like Balsamiq or InVision) to complete design work.

Students will be evaluated based on attendance and participation, homework assignments, as well as a final project. The final project will involve students making a pitch for a software product using the techniques they’ve learned along the way (with the option of show-casing their work to the whole campus).

Method of evaluation: attendance, assignments, and a final project

Prerequisites: none

Enrollment limit: 16

Method of selection: preference to upperclassmen and students with a demonstrated interest in tech, software, or product design

Meeting times: mornings

Cost per student: $260

Instructor: Deborah Coombs
Deborah Coombs’ stained glass work is commissioned and exhibited internationally. She has an MFA from the Royal College of Art in London, England, and has taught at graduate and postgraduate levels for almost four decades.

CSCI 14 Creating a Roguelike Game

Before World of Warcraft, before Diablo, before the Legend of Zelda and the Nintendo Entertainment System, before fancy graphics cards and computer mice, there were text terminals and there was Rogue. Created around 1980 by Michael Toy, Ken Arnold, and Glenn Wichman at U.C. Santa Cruz, this wildly popular video game “wasted more CPU time than anything in history.” [Dennis Ritchie] and spawned an entire genre, known as ‘roguelikes’. Roguelikes in the original style are created and played to this day, and many of the game design concepts and principals that Rogue pioneered can be found in modern games outside the genre. In this course we’ll study (and play) some roguelikes, discuss what does and doesn’t work and why, and work in small teams to design, plan, and code our own. Creating the game will require a lot of time writing code, but we’ll also bring in game design, software design, user experience, project management, models and tools for collaboration, and various topics and realms related to game programming (AI, procedural content, complex data structures, persistence, help systems, etc.). In class students will do exercises, participate in discussions, give presentations, and provide feedback to each other as well as write code. Outside class students will meet with each other, do various writing assignments, and spend a lot more time coding. By the end each team will have a complete, working game that showcases their particular interests and goals.

Method of evaluation: class participation (attendance, discussion, presentations, feedback), and the large team project

Prerequisites: completion of CS 136 or equivalent programming experience

Enrollment limit: 16

Meeting times: mornings, afternoons

Cost per student: $40

Instructor: Thomas Kunjappu

Chris Warren (Williams ’96, Computer Science) is a programmer with extensive web development experience, and is also a serious amateur game designer. He’s worked for a couple of dot-coms, taught AP computer science in Hawaii, supported himself as an independent web developer, and has been working as a programmer in Williams OIT since 2003. He is a co-founder of a game design group that met weekly from 2002-2013, and has spent [far too] many hours over the years playing roguelike games.

appropriate documentation of its behavior and design. In addition, students will be expected to give a short presentation or demonstration of their work. Students must consult with the instructor before the beginning of the Winter Study registration period to determine details of projects that might be undertaken.

Method of evaluation: 10-page report or Software Developed with a formal public exhibit and short paper (2- to 3-page); creativity; quality of finished artwork; teamwork whilst mounting exhibition; patience, good hand skills, and want to spend at least 20-25 hours per week working on their project

Prerequisites: no previous experience in art, drawing or geometry is necessary; ideal applicants will have an interest in art or mathematics, patience, good hand skills, and want to spend at least 20-25 hours per week working on their project

Enrollment limit: 10

Method of selection: preference to seniors and those who have a specific interest in tiling patterns

Meeting times: mornings, 15 hours per week; students must be willing and able to put in an additional 5-10 hours per week outside of class

Cost per student: $260

Instructor: Debra Coombs

Debra Coombs’ stained glass work is commissioned and exhibited internationally. She has an MFA from the Royal College of Art in London, England, and has taught at graduate and postgraduate levels for almost four decades.

ECON 10 Introduction to Financial Reporting and Statement Analysis

This course covers the concepts and methods underlying financial statements and the tools to analyze financial statements effectively as part of the process of evaluating a company’s strategic and operating decisions in the context of its industry. This process is neither superficial nor one-dimensional, as it requires a thorough understanding of accounting principles and frameworks and the ability to identify the effects of management decisions on financial statements and ratios. Using topical exercises and problems based on current corporate annual reports, we will walk through the fundamentals of financial accounting and financial statements first and then examine the methods and disclosures requirements specific transactions that most companies undertake. For example, what are the consequences of Microsoft’s acquisition of LinkedIn? Or of AT&T’s decision to issue up $17.5 billion in bonds? In pairs, each student will complete a project analyzing the current financial statements and ratios of a publicly company and assess its profitability and risk, focusing on the connections between the company’s industry characteristics, strategic choices and its financial results. We will meet four times a week for three-hour sessions for the first two weeks with extra time allocated as needed to meetings with each team. Students will complete and submit their projects during the second part of Winter Study.

Method of evaluation: evaluation will be based on the two-person project culminating in a short class presentation and a 10-page paper, as well as submitted homework assignments (problem sets) and participation in class discussions

Prerequisites: none

Enrollment limit: 20

Method of selection: preference to seniors/juniors — otherwise by lottery

Meeting times: mornings 10 am - 1 pm

Cost per student: $150

Instructor: Ginny Soibel

Ginny Soibel teaches financial accounting and financial statement analysis in the graduate, undergraduate and executive education programs at Babson College. She earned her BA at Williams and her MBA and PhD at Columbia University, and before joining the Babson College faculty, she taught at the Amos Tuck School of Business at Dartmouth College.

ECON 11 Financial Accounting and Financial Modeling for Private Equity and Venture Capital

ECON 11 is an intensive winter study designed for students intending to pursue or explore professional opportunities in finance and investing, with a focus on private equity investment. Incorporating instruction by a dynamic mix of industry professionals—including investment managers and associates, accounting faculty, and financial training consultants—the course aims to...
equip students with the fundamental skills required in many entry-level finance positions, and prepare them for interviews, jobs and internships in the field. The training program will consist of three sections, over three weeks: (1) introduction to finance and private equity, (2) financial accounting; and (3) financial modeling. During the course of instruction, students will gain a better understanding of the private equity and investment banking industries, and fundamental concepts of investment and finance; learn basic principles of accounting, and how to prepare and analyze financial statements; and receive rigorous training in financial modeling and methods of capital valuation. In the fourth week, students will put to test the skills they’ve acquired, and build their own financial models to evaluate potential investments in the course. This is a unique opportunity to receive high-level, professional training in core competencies of finance and investing, and students are expected to approach it as such. Given the nature and depth of material to be covered, students should plan on committing 20+ hours per week between in-class sessions and assignments.

Method of evaluation: evaluation will be based on a final project (financial model and presentation), short homework assignments, and attendance (mandatory)

Prerequisites: none

Enrollment limit: 30

Method of selection: preference to first-year and sophomores; in the event of over-enrollment, selections will be based upon written statements of interest/cover letters

Meeting times: mornings and afternoons, Mon-Thurs

Cost per student: $0

Instructors: Steven Graham '82 and Alex Reeves '11
Steven C. Graham ’82 founded Graham Partners in 1988 and serves as Senior Managing Principal. He oversees all of the activities of the private investment firm, including investment sourcing, evaluating, monitoring and divesting. Steven serves on the boards of numerous portfolio companies of Graham Partners and on the firm’s Investment and Valuation Committees. Steve also serves on the Board of Advisors for the Center for Private Equity and Entrepreneurship at the Tuck School of Business at Dartmouth College, Williams College Endowment’s Non-Marketable Assets Advisory Committee. Alex Reeves graduated from Williams in 2011 and spent the next several years working as an Associate at Graham Partners, a private investment firm. At Graham, Alex sourced and evaluated new investment opportunities, and provided financial analysis and support to Graham’s portfolio companies. He also managed the firm’s intern and analyst training programs, and has significant experience training new hires and interns in financial modeling. More recently, Alex has independently consulted for several early-stage companies and venture capital investor groups.

ECON 13 Creating a Viable New Business Idea

Students working in teams develop an idea for a new business, using the Lean Launchpad methodology taught at major universities including Stanford, UC Berky, Michigan, and NYU, teams develop an initial business model for the idea and then proceed to use the methodology to evaluate and improve the business model. The goal is to learn a methodology which is transferable to a variety of business ideas. Class work consists of online lectures, in class discussions, group work, and presentations. Teams work together to develop and test business assumptions, revise their ideas, and develop presentations based on what they discover.

Method of evaluation: participation in class discussions of lectures and in-class assignments, team participation in research, and team participation in weekly 5-minute team class presentations, 10-minute final team presentations, and a final 2-minute video on lessons learned

Prerequisites: no prerequisites and the course is appropriate for students from any major

Enrollment limit: 20

Method of selection: selection will be based on taking upper classmen first

Meeting times: mornings

Cost per student: $25

Instructor: Steven Fogel
Mr. Fogel is an entrepreneurship educator who has worked with over 1,000 startups over the past 25 years. He is trained in Lean Launchpad which is recognized by major universities and business schools as a leading approach to creating successful startups.

ECON 14 Sports Economics

This course is an introduction to the use of economic concepts and empirical tools in addressing puzzles and policy issues in the world of sports. Through independent study and in-class discussions of academic and non-academic readings, films, and other materials (including one or more talks by outside speakers), students will explore topics such as competitive performance and strategic incentives of athletes, the organizational structure of professional sports, the use of statistical models for evaluating athletic performance, betting and gambling markets, professional athletes labor markets, the local economic impact of sporting events, and more. Students are expected to complete small research assignments outside of normal class hours, to present their findings, and to help lead discussions of readings and other materials assigned for class. In addition, students will be asked to write research paper and presentation on a topic in the economics of sports.

Method of evaluation: class participation, mini research projects, and a group-based 10-page paper and final presentation

Prerequisites: one Economics AND one Math or Stats course

Enrollment limit: 20

Method of selection: if over-enrolled, preference will be given to senior and junior Economics majors

Meeting times: mornings

Cost per student: $50

Instructors: Will Olney and Steve Nazfinger

ECON 15 Introduction to Indian Cinema

Though the Indian film industry is the world’s most prolific, American audiences have little exposure to it. This course provides an introduction, focusing on Hindi cinema, and showing how its themes have evolved in response to changes in Indian society. In particular, we will examine ways in which Hindi filmmaking reflects the threats perceived by the nation, and the resolutions attempted. We will also compare Hindi cinema’s norms and conventions to those used by Hollywood.

We will meet twice a week to watch the films (a total of seven) and once a week we will have a discussion of them. Students will write a 2-page response to each film.

Reading will consist of articles from film journals like Screen and Jump Cut.

Method of evaluation: seven 2-page papers

Prerequisites: none

Enrollment limit: 10

Method of selection: see instructor

Meeting times: evenings

Cost per student: $25

Instructor: Anand Swamy

ECON 16 Venture Capital Law

The course will examine the venture capital industry from both a theoretical and practical perspective and will focus on the interplay of the legal, business, economic and financial issues that need to be dealt with in the formation, organization, governance and financing of new enterprises. The course is designed to provide students with a fundamental knowledge of the corporate and other laws applicable to venture capital, as well as with an appreciation of the concerns of entrepreneurs and investors.

Class sessions will be devoted primarily to a discussion of business cases taken from the entrepreneurial curriculum of the Harvard Business School. In addition, students will be required to participate in small groups prior to class to prepare advice to clients in two scenarios — an early stage company negotiating with a key executive the company is seeking to hire and a company faced with two competing term sheets for venture financing. As a capstone to the course, all students will participate in an in-class business simulation game developed at Wharton that will require students to interact in assigned roles as entrepreneurs, investors or key employees.

In addition to reading and analyzing the assigned business cases prior to class, students will be asked to review various background materials including portions of the business planning textbook used at GW. Classes will meet for at least six hours per week, with additional sessions scheduled for meetings with outside industry experts that accept invitations to address the class.

Method of evaluation: participation in class, preparation of discussion outlines (each equivalent to a 3- to 4-page paper) in connection with the small group assignments, and participation in the business simulation game

Prerequisites: none

Enrollment limit: 30

Method of selection: by lot with preference for seniors

Meeting times: mornings

Cost per student: $200

Instructor: Robert Schwed
Mr. Schwed recently retired from the law firm of WilmerHale after a 40-year career focused on private equity and venture capital. For the past eight years, he has been an adjunct professor at George Washington University Law School teaching a course in venture capital law. Mr. Schwed graduated from Williams with a degree in Economics in 1971 and from Harvard Law School in 1974.

ECON 17 How to Start a Startup

Students of this course will learn about the mechanics and strategy to start a company or social enterprise. Corporations are the enabling vehicle of entrepreneurship and social innovation based in North Adams, Massachusetts. He has helped launch dozens of early stage companies, startups over the past 25 years. He is trained in Lean Launchpad which is recognized by major universities and business schools as a leading approach to creating successful startups.

Method of evaluation: evaluation will be based on class participation, project contributions, and the quality of final projects

Prerequisites: none

Enrollment limit: 16

Method of selection: statement of interest

Meeting times: mornings

Cost per student: $350

Instructor: Jeffery Thomas
Jeffery Thomas is the Executive Director of Lever, a center for entrepreneurship and social innovation based in North Adams, Massachusetts. He has helped launch dozens of early stage companies, including more than ten startups that have been funded through the Williams campus-wide Business Plan Challenge.

ECON 18 Sustainable Business Strategies (Same as ENVI 18)

See under ENVI 18 for full description.

ECON 19 Portrayal of Housing Markets and Community in Film

What more sacred, what more strongly guarded by every holy feeling, than a man’s own home? — Cicero
The dream of achieving prosperity through hard work often presents home ownership as a central feature. Beyond the private home that provides the domain within which hard-working persons ideally reign, the neighborhood and community provide a social and economic context for the home — both the structure itself and the lives of its occupants.

The private home and its neighborhood context are clearly linked, and economic studies suggest that between 25% and 50% of the market value of residential property depends on such factors as school quality, crime, and environmental quality that characterize the neighborhood and community. In this course we will explore — through film, discussion and economics — the importance of and linkages between houses and communities. We will watch films and discuss their implications for housing, communities, and ownership. In addition to developing an appreciation of the economic, social and psychological importance of these ideas we will discuss associated significance for the economy. Students will prepare response essays of 2-4 pages for each film that incorporate aspects of both the film and class discussion.

**Method of evaluation:** class discussion plus 18-30 pages of written essays

**Prerequisites:** none

**Enrollment limit:** 30

**Cost per student:** $0

**Meeting time:** preference given to Economics majors

**Meeting times:** afternoons

**Instrcutor:** Stephen Sheppard

---

**ECON 20 A Practitioner’s Overview of Securities Markets and Investment Banking**

A broad overview of various aspects of the Fixed Income and Equities Markets and the role of Investment Banks. Topics, amongst others, will include: The effect of Fiscal and Monetary policy on Markets, Securities Sales and Trading, Bonds and Bond Math, Public Equities and Asset Management, Credit Analysis, Derivative Equities, Mergers and Acquisitions and Risk Management. Course will focus on real life practices and may include guest speakers, role playing and trading simulations.

**Course Goal:** (1) to provide you with an understanding of how modern capital markets operate from a practical, real-life perspective (2) to help you think critically about issues affecting the stock and bond markets, and (3) to have fun and instil a passion in some of you for future study and/or work in the Securities Industry.

**Required Readings:** (1) Understanding Wall Street (Fifth Edition) by Jeffrey Little and Lucien Rhodes (2) Packet of Case Studies (3) Students will be asked to read the Wall Street Journal on the day that each class meets.

**Optional Reading:** Too Big to Fail by Andrew Ross Sorkin.

**Course Requirements:** Group Case Study (Oral Presentation); Term Paper (Minimum 10 pages); Class Participation

**Group Assignment (Case Study):** At the end of the first class, you will be asked to divide yourselves into 5 Groups with 5 people in each group. The group will be assigned a case study to be orally presented (slides are fine to use but NO written submission is necessary) to myself and the class for further discussion. The presentation and discussion will last No Longer than 25 minutes and each member of the team will be required to have at least some moderate speaking role. The specific case study and the date of the presentation will be given to you after teams are set. I will assign questions for each team to answer in advance. At the end of the course, the other members of your group will evaluate your participation. These peer evaluations will be factored in as part of your group participation grade.

**Class Participation:** I view student participation as the MOST critical part of this class. There is no such thing as a dumb question!! I hope to get interrupted frequently and to constantly prod you for your thoughts and ideas. There is no such thing as a dumb question!! I hope to get some moderate speaking role. The specific case study and the date of the conclusion of the course

**Method of evaluation:** 10-page paper

**Prerequisites:** successful completion of ECON 110

**Enrollment limit:** 25

**Method of selection:** Economics majors prioritized

**Cost per student:** $50

**Meeting times:** mornings, afternoons

**Instructor:** Michael Swenson

Michael Swenson '89 is a recently retired partner from Goldman Sachs and Co. He has spent his entire career in the fixed-income markets and was a member of a risk and commitment committees at Goldman Sachs.

---

**ECON 24 Introduction to the Economics, Geography and Appreciation of Wine**

This course provides an introduction to the economics, geography and appreciation of wine. We will be studying the economics and geography of wine production, and will also learn to identify, understand and appreciate the major wine types of the world. The course will involve lectures, out-of-class readings, and in-class wine tastings. We will focus primarily on the Old World wine styles and regions of France, Italy, Germany, Austria, Spain and Portugal. The course has been expanded to also cover some New World wine regions, including California, Oregon, Chile, Argentina, South Africa, New Zealand and Australia.

**Method of evaluation:** evaluations will be based on short quizzes, including blind tastings, and either an oral presentation or 10-page paper at the conclusion of the course

**Prerequisites:** students must be 21 years old or on before January 3, 2017

**Enrollment limit:** 10

---

**ECON 30 Honors Project: Specialization Route**

The “Specialization Route” to the degree with Honors in Economics requires that in each course take the Honors option. The January of their senior year. Students who wish to begin their honors work in January should submit a detailed proposal. Decisions on admission to the Honors WSP will be made in the fall. Information on the procedures will be mailed to senior majors in economics early in the fall semester.

Students who wish to apply for admission to the Honors WSP and thereby to the Honors Program should register for this WSP as their first choice. Some seniors will have begun honors work in the fall and wish to complete it in a WSP. They will be admitted to the WSP as long as they have made satisfactory progress. They should register for this WSP as their first choice.

---

**ECON 31 Honors Thesis**

To be taken by students participating in year-long thesis research (Economics 493-W31-494).

---

**ECON 50 Micro-Simulation Modeling for Ex Ante Policy Analysis**

Micro-simulation modeling provides one of the most powerful tools for ex ante evidence-based analysis of economic and social policy interventions. Rooted in representative household surveys of a country’s population, the models project a picture of poverty, employment, consumption and income levels throughout the country. A micro-simulation model enables researchers to investigate the impact of existing economic and social policy interventions (such as tax and public benefit interventions) on income levels, poverty, inequality and other outcomes. In addition, researchers are able to simulate the impact and estimate the cost of new policy interventions.

During this course, students will learn to apply these methods to analyze public policies and determine the findings. The course examines measurement issues, analytical tools and their application to household survey data for a range of developing countries. The course also links the outcomes of the analysis with the challenges of policy implementation, exploring how the political environment and/or institutional setting may result in the implementation of second-best options. This is a hands-on modeling course, and students will build a micro-simulation model for a country of their choice and use this model in completing the course requirements. The course will employ Excel, Stata and advanced micro-simulation packages. The final requirement for the course is a policy paper that provides students with an opportunity to write accessible prose that communicates the methodology adopted and the key lessons of the analysis.

**Method of evaluation:** exercises, presentation, policy papers

**Prerequisites:** none

**Enrollment limit:** 10

**Method of selection:** statement of interest emailed to instructor

**Meeting times:** mornings

**Cost per student:** $0

**Instructor:** Michael Samson

---

**ECON 54 Financial Crises**

Financial crises — currency, sovereign debt, and banking and other financial markets — have been with us for as long as modern banking has existed. Few countries have escaped direct experience with their own crises, and no country has entirely avoided the lessons of history. In this course we will study the three main forms of financial crises, looking first at analytical models of each and learning how the various types of crises interact. We will then turn to a variety of case studies to see why so many crises look different in their details but resemble each other greatly from a broader perspective. Cases covered will include Chile (early 1980s), Mexico (1994), East Asia (1997), and Brazil, among others. Although the focus is on emerging markets, we will also discuss the crisis of 2007-08, which was concentrated in the U.S. and spilled across the advanced countries but which had a global impact. These events are painfully similar to those in low- and middle income-countries and offer useful lessons for avoidance and policy response; in addition, they are likely to influence financial regulation for years — for better or for worse.

**Method of evaluation:** two 5- to 10-page papers and a presentation

**Prerequisites:** ECON 505 or 506

**Enrollment limit:** 10

**Method of selection:** instructor's discretion

**Meeting times:** scheduled by CDE

**Cost per student:** $0

**Instructor:** James Hanson

Jim Hanson has worked on financial policy, macroeconomic policy, and debt, and crisis issues at the World Bank over 25 years in East and South Asia, Latin America and Egypt, and earlier as an associate professor at Brown University.

---

**ECON 58 Growth Diagnostics**

Evidence suggests that the “binding constraints” to economic growth have been remarkably heterogeneous across countries and over time — i.e., the potential for economic growth can be unlocked in a large variety of ways. For instance, China’s rapid economic growth has been powered by pro-poor incentives in agriculture, whereas Brazil has been held back by an inadequate supply of credit, South Africa by poor employment incentives in manufacturing, El Salvador by insufficient production incentives in tradables, Zimbabwe by poor...
We'll examine humor in several genres and analyze what works in each. We'll discuss related topics, such as whether humor in advertising helps sell products and whether there is social utility in sexist, ethnic and religious humor.

Method of evaluation: class participation; oral presentation; there will be a short reading assignment and a writing assignment of three (3) to 750 words for every class; all assignments must be completed on time.

Prerequisites: none

Enrollment limit: 14

Method of selection: random selection

Meeting times: class will meet 1:30-3:30 pm Tuesdays and Fridays (except the last week, when the final class will be the last day of the term — Thursday, Jan 26)

Cost per student: $15

Instructor: Eric Randall

Journalist Eric D. Randall has previously taught courses in humor writing and actually gotten paid for it. His work has been published in USA Today, Time, Newsweek and the Washington Post, as well as some reputable publications.

ENGL 15 Ishmael Reed, Multiculturalist and Satirist (Same as AFR 15)

Ishmael Reed has been a unique figure on the American literary scene. His writing as a poet, novelist, essayist, playwright, and political gadfly has all conveyed a distinctive and rambunctious voice. Credited with coining the term ‘multiculturalism’, as we now commonly use it, Reed has always practiced what he preaches, embracing the deep and complex cultural traditions of African American people in his writing and politics while at the same time remaining open to the cultures of other ethnic groups. As a cultural activist in the San Francisco Bay area, Reed was founder and publisher of The Yardbird Reader, a seminal and profoundly influential journal of literary work by writers of various ethnic groups. At the same time, he was a prime mover in the creation of the Before Columbus Foundation, a cultural organization that unites artists from every cultural tradition in working cooperatively.

This course will examine Reed’s work in various genres, as well as his cultural and political activism and provocations. He has been original and outrageous, contentious and controversial. We will evaluate his work as a literary artist and his career as a cultural worker, with particular attention to how he uses the concept of warfare to characterize the long history of strife between cultural traditions and his own battles with black nationalists, feminists, and other political factions. All in all, he has been one of the most accomplished and influential cultural figures of the past half-century.

Method of evaluation: class presentations and a 10-page paper

Prerequisites: none

Enrollment limit: 20

Method of selection: by major, concentration, and judgment of the professor

Meeting times: mornings

Cost per student: $75

Instructor: DL Smith

ENGL 16 Adorno’s Aesthetic Theory

Theodor Adorno was one of the twentieth century’s most challenging thinkers — a German Jewish refugee who founded the United States but ended up in Los Angeles, where he would write his central works. His work has been published in USA Today, Time, Newsweek and the Washington Post, as well as some reputable publications.

This course will give students an in-depth view of the inner workings of journalism today. It will feature the perspectives of several Williams alumni who work in a broad spectrum of today’s media universe, including print, broadcast, and new media. Our guests will discuss specific reporting skills and experiences in their background (students should be aware that our precise meeting schedule week by week may vary, to accommodate the schedules and availability of our guests). In addition to readings of work by guest speakers, there will be a required text about reporting and writing. Students will be expected to complete several small reporting and writing exercises, as well as one feature-length news story on a topic to be assigned at the beginning of the course. There will be a week-long trip to New York for field work, and to present our findings there. In previous years, organizations visited have included CNN, the New York Times, the Columbia School of Journalism, ABC News, MSNBC, Conde Nast, Pro Publica, the Wall Street Journal and NPR.

Method of evaluation: participation in class discussions, and reporting and writing exercises, and the completion of one fully-reported, original, feature-length news story about a topic to be assigned at the beginning of the course.

Prerequisites: none

Enrollment limit: 20

Method of selection: priority given to juniors and seniors

Meeting times: afternoons

Cost per student: $50

Instructor: Christian Thorne
ENVI 16 Confronting Climate Change: Reducing Emissions at Williams

This course explores the practical realities of "sustainable business." We will develop our own definition of "sustainability" that encompasses the dual meanings of (1) financial success as well as (2) long run positive impact on climate and the environment. Topics include:

- What are the criteria for sustainability? E.g. Renewable energy; organic farming; waste composting; biodiversity; social equity.
- How does the concept of externalities relate to sustainability? Must all external costs be "internalized" in order for a business to be truly sustainable?
- Should "environmentalism" be a "rear guard" movement seeking to slow, conserve, protect and defend, or do we need to actively work against climate change?
- Can sustainable business models coexist with traditional shareholder value maximization models? We evaluate the role of "B" companies allowing directors to take into account the interest of all stakeholders including workers, consumers, the society at large, and the environment.
- How does sustainability reconcile with the priority of economic growth, particularly in the developing world? What is the relationship to fair labor standards and environmental regulation?
- What is the optimal role and purpose of governmental subsidies? When should subsidies sunset and leave industries to succeed (or fail) on their own?
- How — if at all — will the implementation of the Paris Accords help to stimulate private sector activity in support of sustainable business practices and renewable energy development and deployment?
- How can investors promote sustainable businesses proactively through their capital allocation strategies?
- Should large philanthropic organizations (foundations and endowments) consider proactive values aligned investing as an alternative to divestment from fossil fuels companies?

Method of evaluation: teams of 2-3 students will target a company or topic of their choice and present (during the last week of class) a critical evaluation of the household and community level to increase resiliency to storms and disasters. This includes household-level approaches such as rainwater collection, home solar electricity generation, and home food production from gardens, poultry and livestock. Students will work in small teams on these projects, and the work will be combined into a draft climate adaptation plan framework. Of course, our project will not be limited to the college, but it will develop a structure for One Eleuthera to build on. We will focus on developing collaborations and partnerships with other organizations that will continue this work. Our final product will be a report and a public presentation on the island and the preparation of educational materials. 

Method of evaluation: daily active and engaged participation, final written report, and presentation

Prerequisites: none; not open to first-year students

Enrollment limit: 9

Instructor: Sarah Gardner
Nicholas Whitman is a professional photographer and the former Curator of Photography at the New Bedfodl Whaling Museum. A 1977 graduate of the Rochester Institute of Technology, he has honed his craft to make landscape photographs of power and depth. See more at www.nwhphoto.com.

GEOS 31 Senior Thesis
To be taken by students registered for Geology 493-494.

GERMAN

GERM S.P. Sustaining Program for German 101-102
Something new and different for students enrolled in German 101-102. Practice in the use of German for everyday purposes; creation and performance of short dramatic sketches through group collaboration; games; songs; storytelling, reading. No homework.

Method of evaluation: active participation and regular attendance earn a “Pass” grade
Prerequisites: German 101 or equivalent. Limited to German 101-102 students
Cost per student: approximately $5 for photocopied materials
Meeting times: mornings, three a week 9-9:50 a.m.

GERM 11 DDR, The Life and Death of a Vanished Nation: East Germany, 1949-1990 (Same as HIST 11)
See under HIST 11 for full description.

GERM 12 Grand Hotel in Film and Fiction (Same as COMP 12 and RLFR 15)
The grand hotel with its dual promise of luxury and estrangement was considered a theater of social transformations in the age of travel. We will discuss novels, short stories and films that feature the hotel as a space of both class distinction and the possible class confusion of sexual taboo breaking, and gendered performance, and a transnational extension of colonialist oppression. Authors will include Edith Wharton, Thomas Mann, Vicki Baum, Ali Smith, Rick Moody. Films may include: The Last Laugh, Gran Hotel, Grand Hotel Budapest, Anomalisa, Screaming Man, Hotel Sahara, Hotel Rwanda, A Single Girl, Maid in Manhattan. We will also consider short theoretical readings on conspicuous consumption, branding, modernity and metropolitan spaces, and postcoloniality.

In the present, hotel dramas focus on issues of the invisible worker, neoliberalism (Anomalisa, Single Girl), or the trauma of civil war and the raced body (Hotel Rwanda, Screaming Man), or cultural alienation and the inability to feel joy (Lost in Translation, Hotels of North America). Comedies explore the fantasy of a dramatic social climb through identity confusion in a hotel setting (Maid in Manhattan), satires highlight the confidence man/trickster who profits from social pretensions (Felix Krull, Grand Hotel). Class lines are straddled and the boundaries between death and life blurred (Hotel World, Hotel Sahara) as the hotel space becomes a netherworld, mirroring precarious lives of illegal migrants and displaced workers.

Method of evaluation: 10-page final paper
Prerequisites: none
Enrollment limit: 15
Method of selection: email rationale to instructor Meeting times: mornings
Cost per student: $60
Instructors: Helga Druxes and Katarzyna Pieprzak

GERM 13 The Literature and Cinema of Global Organized Crime (Same as COMP 13 and RLFR 13)
In this course we will examine the demonized, self-consciously romanticized, and pointedly de-glamorized images of organized crime in literature and cinema across the contemporary global village. The subcultures of organized crime groups in the countries within Eastern Europe and Mexico, Italy, France, Japan and India manifest an unique sense, both social and political attitudes and folkways. We will examine the ways in which literary and cinematic texts portray the lives of organized crime workers within the international marketplace, and how the presence of such individuals reflect increasingly systematic economic relations across the globe. We will also study theories of confessional and postmodern narratology, in an effort to de-code representations of the criminal self that finds itself trapped in a world driven by the neoliberal economic policies of outsourcing and transnational mergers.

Method of evaluation: term paper (10-12 pages); in-class presentation of term paper project; participation in class discussions
Prerequisites: none
Enrollment limit: 20
Method of selection: through their position on a wait list Meeting times: mornings
Cost per student: $108
Instructor: Alexandar Mihailovic

GERM 16 Intro to Fashion Studies (Same as ARTH 16 and COMP 16)
Long frowned upon as a frivolous and superficial interest, fashion has since earned its credentials as a discipline worth researching about. Because Fashion is at the intersection of many disciplines (art history, anthropology, sociology, psychoanalysis, to name a few), its study gives a valuable insight into a society, a culture, and a time period.

This course is not limited to Fashion Studies and intends to teach students how to watch fashion shows and read designers' collections through the lens of various disciplines.

We will anchor our investigation of fashion within the 20th and 21st centuries and focus on couturiers from France (Poiret, Lanvin, Schiaparelli, Chanel, Balenciaga, Dior, Saint Laurent, Cardin, Lacroix), designers from the U.K. (Westwood, Galliano, McQueen), Italy (Gucci, Valentino, Armani, Prada, Moschino, Dolce and Gabbana), Japan (Kenzo, Yamamoto, Kawakubo), the U.S. (Klein, Karan, Lauren, Hilfiger). We will also look at the culture of fashion worldwide with a glimpse at specific groups such as Punks, Congolese Sapeurs, Harajuku fashionistas, etc… worldwide with a glimpse at specific groups such as Punks, Congolese Sapeurs, Harajuku fashionistas, etc…

We will watch fashion shows, feature films (Funny Face, Prêt à Porter, The Devil Wears Prada), biopics (Coco before Chanel, Yves Saint Laurent), documentaries (Valentino: The Last Emperor, Lagerfeld Confidential, Dior and I), read articles by fashion critics (Horyn, Menkes), fashion historians (Steele, Evans), and sociologists (Bourdieu).

In this course, we will explore how fashion is both the instrument of self-expression and political liberation as well as the instrument of global capitalism and the neoliberalism. We will also study the expression of freedom and political liberation in the era of the rise of the East and West. We will consider the fashion culture in the East and West, the socialist and the capitalist, the fashion culture in the East and West, the socialist and the capitalist, etc…

Method of evaluation: oral presentation, two 5-page papers, final project
Prerequisites: none
Enrollment limit: 25
Method of selection: genuine interest in fashion Meeting times: mornings
Cost per student: $170
Instructor: Christophe Koné

GERM 30 Honors Project
To be taken by honors candidates following other than the normal thesis route.

GERM 31 Senior Thesis
To be taken by students registered for German 493-494.

GLOBAL STUDIES

GBST 30 Senior Honors Project
To be taken by candidates for honors in International Studies.

HISTORY

HIST 10 North Adams, Massachusetts: Past, Present, and Future (Same as AMST 10)
This course gives students a chance to learn about Massachusetts’s smallest city, North Adams. Readings, films, field trips, and meetings with people who work with or lead nonprofits and civic organizations will introduce students to local history, current conditions in the city, and plans for future cultural and economic development. Students will be expected to complete assigned readings (one book and assorted articles) and to attend all class meetings. Final assessment will be based on students’ engagement in thoughtful discussions of class materials and in-person encounters and experiences. Students will complete a final research project (10-page written report or multimedia presentation) that they present to the class and that will be incorporated into an online resource. In addition, students will submit two short (3-4 page) reflection papers. Students must be available for class meetings, field trips, and that occasionaly occur outside of the regular class hours.

Method of evaluation: final research project (10-page paper); two reflection papers (3- to 4-pages)
Prerequisites: none
Enrollment limit: 12
Method of selection: priority to first- and second-year students Meeting times: TWR 10:00-1:00
Cost per student: $18
Instructor: Anne Valk

HIST 11 DDR, The Life and Death of a Vanished Nation: East Germany, 1949-1990 (Same as COMP 11 and RLFR 11)
In 1989, in the wake of the rapid crumbling of their power in the face of massive popular resistance, the authorities in the German Democratic Republic (Deutsche Demokratische Republik, or DDR) opened the Berlin Wall. Within a year the wall had been torn down and the East German state voted itself out of existence, abandonded wholly in the belly of its larger and more powerful neighbor to the West. Suddenly, the nation born of the promise to create a genuine people’s democracy and claiming the moral high ground as an anti-Fascist state had vanished, its political culture and social institutions suddenly erased. What were the promises of the regime and what happened to those promises? What were the contradictions in East German society and why and where did resistance slowly build to the point where the entire edifice could come tumbling down? This course will briefly chart the short history of the DDR, from the founding of the Socialist Unity Party in the Soviet occupation zone of a defeated Germany at the end of the Second World War to the total collapse of the regime in 1989/90. The course will explore key moments in the political history of the DDR, including the uprising of 1953 and the building of the Berlin Wall in 1961. It will also focus on the social and cultural practices of East German society, exploring the nature of everyday life under the Communist regime. The course will meet three times per week for the four weeks of Winter Study and part of the evidence for our discussions will come from the viewing and analysis of seven films, the majority of which were made in the DDR during its short existence and are essential viewing for the course. A textual history of the DDR will also be accompanied by a packet of additional reading materials that will be discussed in class.

Method of evaluation: final 10-page paper
Prerequisites: none
Enrollment limit: 20
Method of selection: preference given to History and German majors Meeting times: mornings
Cost per student: $30
Instructor: Chris Waters

HIST 12 The East is Red? — Socialism in Asia (Same as ASST 12 and PSCI 12)

554
HIST 13 Eyewitnesses to History: American Treasures in the Chapin Library

What did Christopher Columbus write in his 1493 letter to the Spanish court? How did John Smith describe the Virginia colony in the early 1600s? What would a pioneer find when following the Oregon Trail west in 1846? How much did a farmer pay for a gun in 1800? These and other questions are answered by rare books, manuscripts, and prints in the Chapin Library, primary sources which provide eyewitness accounts of important events in American history.

In this course students will explore the extraordinary collections available at Williams and learn methods for analyzing primary sources and researching their historical context. In the first two weeks, students will investigate items selected by the instructors in a tutorial-like format, with one student giving a presentation to the seminar and another student providing a critique. For the final project, students will choose an item from the full Chapin collection to research, write a 10-page paper, and present what they have learned to the class. In addition, students will write a short exhibit label for their item for public exhibition at the end of Winter Study.

Method of evaluation: evaluation based on seminar participation, oral presentations, and final paper

Prerequisites: none

Enrollment limit: 12

Method of selection: preference given to first-year students

Meeting times: mornings

Cost per student: $0

Instructors: Charles Dew, Lori DuBois, and Wayne Hammond

Lori DuBois is a Reference and Instruction Librarian at Sawyer Library. She received her M.S. in Library Science from the University of Illinois at Urbana-Champaign, the home of the Chapin Librarian, has been a rare books and manuscripts librarian at Williams since 1976. He received his M.A. in Library Science from the University of Michigan, Ann Arbor.

HIST 14 Game of Thrones, ca. 850 B.C.E.: Empire, Religion and Palace Intrigue in the Neo-Assyrian Reliefs at WCMA

Long before the palace intrigues of Jaime, Cersei and Tyrian Lannister, Mesopotamian monarchs established the world’s first empires and littered their landscapes with palaces, temples, fortresses and monumental art. The two Assyrian stone reliefs at WCMA are stunning examples of the “calculated frightfulness” with which the kings ruled, employing politics and religion in effective and deliberate combination.

In this course, we meet twice weekly to take an interdisciplinary, close-up look at the WCMA reliefs and other objects in the WCMA cuneiform collection to ask: What (and how) did the reliefs ‘mean?’ Why did they merit inclusion in the palace of one of the most powerful kings in the ancient world? What (and how) do they ‘mean’ in the Williamstown setting? Our ‘work’ includes readings in ancient texts, learning to write cuneiform signs on clay, the Epic of Gilgamesh (a classic tale of royal adventure), royal correspondence, ancient notions about the past, sexuality, religion and stories of kings, queens and courtiers in love and war. We finish with a royal feast, featuring ancient Mesopotamian fare, and, depending on student time and interest, an overnight field trip to Yale’s Babylonian Collection.

Final projects (5-page paper plus final presentation, or the equivalent) will be determined in conversation with the instructor and guided by the student's interests. All are welcome; we hope for a lively and engaging mix of backgrounds and interests.

Method of evaluation: final project or 5-page paper plus final presentation, or equivalent, to be determined in consultation with the instructor

Prerequisites: none

Enrollment limit: 10-12

Method of selection: by seniority

Meeting times: afternoons

Cost per student: $125

Instructor: Alison Gruseke

Alison Gruseke ’82 is a Ph.D. candidate at Yale who studies the Hebrew Bible in its ancient historical and physical contexts. The crossing of cultural boundaries, identity formation and the interrelationship of cultures in conflict form a strong thread that runs through her work.

HIST 15 The Spanish Civil War in English (Same as COMP 15 and RLS 15)

See under RLS 15 for full description.

HIST 17 Eyewitness to the Civil Rights Movement: Mississippi 1964-1965

During sixteen months in 1964-65, I worked as a civil rights organizer in rural Mississippi with the Student Nonviolent Coordinating Committee (SNCC). I witnessed and aided in the heroic struggle by black citizens to dismantle the pervasive structure of Jim Crow that had oppressed them for generations. I met relatively uneducated people with the stature of giants. What I encountered was an apartheid America — a vicious police state reinforced extra-legality and violence — beyond the understanding of most Americans and certainly beyond the knowledge of the students in this course. I will explore this transformational moment in recent American history largely through reading and discussion. Topics will include nonviolence, the role of the black church, black nationalism and the role of women, armed self-defense, the role of whites, the third party politics of the Mississippi Freedom Democratic Party and the actions of the federal government during this turbulent period. Students will read three books and present a final project of their choosing. Documentary film and music from the period will have a prominent role. It is the intent of the instructor to convey the immediacy that only first person experience can evoke.

Method of evaluation: evaluation will be based upon class participation and final project

Prerequisites: none

Enrollment limit: 20

Method of selection: random drawing

Meeting times: afternoons

Cost per student: $90

Instructor: Chris Williams

Chris Williams was the college architect at Williams for many years. In his younger days, he was a field organizer in the civil rights movement in rural Mississippi. Today he lives on the backroads of Vermont.

HIST 18 The Name of the Rose

Heresy, labyrinths, libraries, sex, death and laughter: All are central to The Name of the Rose, a murder mystery, historical satire, medievalist fantasy, philosophical meditation, and homage to Arthur Conan Doyle penned by the Italian medievalist Umberto Eco in 1980. The setting is an unnamed Italian monastery in 1327; the protagonist is Brother William of Baskerville, a Franciscan friar and detective in the tradition of Sherlock Holmes. He and his novice Adriano have just arrived when a mysterious death has put the entire monastery on edge. William agrees to investigate, but more murders follow, one each over the next seven days— all of them (as William and Adso discover) according to a strange and disturbing apocalyptic pattern. Eco’s innocent and textured novel has been widely acclaimed not only as a significant work of literature, but also as an unusually insightful and sophisticated piece of historical fiction. Few novels enjoy as much cred among the medieval historians. In this course we will experience Eco’s novel as entertaining detective fiction, as a work of literature, and as a port of entry into the later medieval world.

Method of evaluation: evaluation will depend upon attendance, participation, and six 1.5-page response papers

Prerequisites: none

Enrollment limit: 30

Method of selection: preference for prior coursework in medieval history

Meeting times: afternoons

Cost per student: $30

Instructor: Eric Knibbs

HIST 25 Jerusalem: One City, Two Cultures, Three Faiths, Many Narratives (Same as REL 25 and PSCI 25)

See under REL 25 for full description.

HIST 30 Workshop in Independent Research

This course is intended for both junior History majors and sophomores intending on majoring in history who think they might like to do a senior thesis, but who would like to gain more experience in independent research. Students who are interested in exploring a possible topic for a senior thesis are especially encouraged to sign up. This workshop will help familiarize students with methods for doing historical research, including how historians define good research questions; become familiar with the historiography; strategize doing primary research; and identify their sources. Students will also be introduced to doing archival work. Students will pursue their own research on any topic of their own choosing for a 10-page final paper, and we’ll use a workshop format to discuss the research and writing of that paper.

Method of evaluation: class participation and 10-page final paper

Prerequisites: none

Enrollment limit: 15

Method of selection: interest in course subject determined by questionnaire

Meeting times: afternoons

Cost per student: $0

Instructor: Sara Dubow

HIST 31 Senior Thesis

To be taken by all senior honors students who are registered for History 493 (Fall) and History 494 (Spring). History 31 allows thesis writers to complete their research and prepare a draft chapter, due at the end of Winter Study.

Instructor: Alexandra Garbarini

JEWISH STUDIES

JWST 31 Senior Thesis

To be taken by students registered for Jewish Studies 493 or 494.

JUSTICE AND LAW

JLST 11 So You Want to Be a Lawyer

This course is intended to familiarize both senior law school students and the practice of law. It will be taught by two law school (and Williams) graduates: one a retired former General Counsel of public and private companies continuing his career as an arbitrator for the Financial Industry Regulatory Association and the other a lawyer who spent her first career as chief real estate counsel for TIAA and, after retiring, went on to become the General Counsel of a well-known international non-profit. The instructors met in a Winter Study class in 1971 and have been friends since. They practiced at the same New York law firm after graduation, and then had very different careers in different cities.

The first class will consist primarily of a lecture by the two instructors describing the legal system and how law schools use cases and precedents as the basis for their teaching. Following the introductory class, the students will be asked to read and analyze copies of case decisions in a number of areas of substantive law — contracts, property, and Constitutional law for
example — and the next two classes will be devoted to experiencing the Socratic Method teaching that is used in law schools. The students will be asked to read materials about the practice of law — in firms, corporations, nonprofits and the public sector — and the next class will be devoted to talking about the readings as well as the instructors’ experiences in both those settings. The final group of classes will be devoted to a practical exercise in lawyering. The students will be given a memo from a client seeking help in drafting a contract with a third party. The class will be divided into groups and both groups will be asked to take the role of both sides to the potential contract and will be asked to negotiate and draft a contract based on the fact situation given. Once the two students have drafted the two contracts, they will be asked to advise their respective clients on how the client might free itself from the requirements of the contract.

**Method of evaluation:** evaluation is based on knowledge of the assigned cases and readings, participation in class discussions, and involvement and skills in the contract negotiating and drafting sessions; the two groups will have to prepare a written contract as well as a written memorandum describing to the client its obligations and its options should it not wish to proceed under the contract

**Prerequisites:** none

**Enrollment limit:** 16

**Method of selection:** start with seniors and work downward

**Meeting times:** 10-11 am and Tue

**Cost per student:** $150

**Instructors:** Gene Bauer and Betty Robbins

Gene Bauer ’71 and Betty Robbins ’72 are lawyers whose careers have taken different paths. After starting out working at the same large New York City law firm, Gene went on to become General Counsel of a number of public and private companies while Betty became head of Real Estate Law at a large insurance company. After retirement, Gene has continued to act as an arbitrator while Betty has been involved with a national non-profit organization.

**LJST 22 Learning Intervention for Teens (Same as PSCI 22)**

See under PSCI 22 for full description.

**LATINO STORIES**

**LATS 11 Feminist Perspectives on Latinas in Popular Media (Same as AMST 11 and WGS 11)**

Beginning with an overview of canonical and emerging works of Latina feminist thought, this interdisciplinary class will survey a range of case studies designed to deepen students’ understanding of the unique positionality of Latinas in contemporary popular media. These case studies will focus on questions of Latina representation and Latinx media audience dynamics, with an emphasis on women of color feminist agency, transnational media flows, and feminist methodologies.

**Method of evaluation:** two 5-page papers

**Prerequisites:** none

**Enrollment limit:** 12

**Method of selection:** preference to LATS concentrators, AMST/WGSS majors

**Meeting times:** mornings

**Cost per student:** $125

**Instructor:** Maria Elena Cepeda

**LATS 12 Death, Sex, and Money in Brazil (Same as WGS 12)**

See under WGS 12 for full description.

**LATS 17 Writing in the Margins: Playwriting as Plagiarism (Same as AFR 17 and COMP 17 and THEA 17 and WGS 17)**

See under THEA 17 for full description.

**LATS 31 Latina/o Honors Thesis Seminar**

Students must register for this course to complete an honors project begun in the fall or begin one to be finished in the spring.

**Prerequisites:** approval of program chair

**Enrollment limit:** limited to senior honors candidates

**LEADERSHIP STUDIES**

**LEAD 11 Our First Amendment**

“Congress shall make no law... abridging the freedom of speech, or of the press.” Those words are clear, and yet our interpretation of these essential rights has changed over the decades. In this seminar, we will study how free speech and freedom of the press are protected with other rights as well as with governmental responsibilities. How should we balance the free flow of information with national security? How should we balance free speech with speech we hate? Was the Nazi demonstration in Skokie, Illinois in 1977, flag burning, and trigger words; Among the cases we will examine are the Pentagon Papers, the decision of the New York Times in 1971 to publish classified information about the war in Vietnam; Supreme Court decisions in the 1964 libel case, the New York Times v. Sullivan, that set a high bar for libeling public officials and other public figures, and in the Citizens United case in 2010 that equated money and speech. We will look at more recent cases that raise issues of privacy, intellectual property rights, and national security, such as Apple’s refusal to unlock a cell phone. And we will discuss uncomfortable learning at Williams College. Along with current journalism and key texts written by Madison and Jefferson, we will discuss a chapter by Williams political scientist James MacGregor Burns, Anthony Lewis’s short history of the First Amendment in the 20th century, anecdotes by James Goodale, the Times’ lawyer in the Pentagon Papers case, and an account of that case by law professor David Rudenstein.

**Method of evaluation:** participation in class discussions, one 3-page paper, and one 7-page paper

**Prerequisites:** none

**Enrollment limit:** 12

**Method of selection:** preference to Political Science and History majors

**Meeting times:** afternoons

**Cost per student:** $25

**Instructor:** Marc Charney

Marc Charney, ’65, has been an editor at the New York Times for more than 30 years, and is now an editor of opinion articles. He previously was foreign editor of the Times’ Week in Review section and, earlier, a foreign correspondent for the Associated Press.

**LEAD 12 Principles of Effective Leadership**

This course will examine issues related to effective leadership in a variety of contexts. We will probe the role of the leader, as well as identifying key principles of leadership with reference to several great leaders in history, moving on to consider contemporary yet timeless topics such as personal responsibility, corruption and fraud in the private sector as well as the essential role good communications skills play in exercising leadership. The majority of class sessions will feature distinguished guest speakers, many of whom are Williams alumni, who have held leadership roles in government, business, philanthropy and healthcare. Probing our guests’ approaches to organizational leadership is the primary goal of this Winter Study. Each student will be asked to host a guest at dinner or breakfast before we meet, to introduce him or her to the class, and to stimulate discussion. After each lecture, we will spend time in the next class sharing impressions, surprises and lessons learned. There will be a 10-page final paper which may take a variety of forms and formats, but which should address the basic themes in our readings as well as what you have learned from our guests, both collectively and more specifically in the case of at least three individuals.

**Method of evaluation:** attendance, class participation, short paper (5-page), and final presentation

**Prerequisites:** none

**Enrollment limit:** 25

**Method of selection:** Leadership Studies concentrators, preference to seniors and juniors

**Meeting times:** mornings

**Cost per student:** $50

**Instructor:** William Simon

William E. Simon, Jr., ’73. Businessman, lawyer, and philanthropist, Mr. Simon is Co-Chairman of William E. Simon and Sons, a private equity firm, and the William E. Simon Foundation. Early in his career he was Assistant U.S. Attorney for the Southern District of New York and later was the 2002 Republican gubernatorial nominee in California. Mr. Simon is a Trustee Emeritus of Williams College.

**LEAD 14 The CIA and the Politics of Intelligence (Same as PSCI 14)**

See under PSCI 14 for full description.

**LEAD 18 Wilderness Leadership in Emergency Care**

This Winter Study course is for students who would like to participate in a 9 day, 72 hour comprehensive hands on in-depth look at the standards and skills of dealing with wilderness based medical emergencies. Topics that will be covered include, Response and Assessment, Musculoskeletal Injuries, Soft Tissue Injuries, Environmental Injuries, and Survival Skills. Additional topics, such as CPR, are also included. Students will be required to successfully complete the written & practical exams, and not miss any of the 9 classes to receive credit and WFR/CPR certification.

**Method of evaluation:** written and practical exam

**Prerequisites:** none

**Enrollment limit:** 22

**Method of selection:** submit a statement of purpose to the instructor explaining why they want to take the course and hope to gain from the experience

**Cost per student:** $465

**Meeting times:** the course runs nine consecutive days straight from 9AM - 5PM, with a possible one nighttime rescue exercise

**Instructor:** Scott Lewis

**MATHEMATICS/STATISTICS**

**MATHEMATICS**

**MATH 11 A Taste of Austria**

This course introduces students to elements of the Austrian culture around the turn of the 19th century up to today. Students will learn and prepare presentations about significant contributions to the arts and sciences from Austrians such as musician Gustav Mahler, artist Gustav Klimt, scientist Karl Landsteiner or poet Stefan Zweig. Other activities include learning how to dance the Viennese waltz composed by Johann Strauss (in case you want to attend Austria’s main annual society event, the Opernball in Vienna) or how to prepare Wiener schnitzel or bake Sachertorte (the delicious cake offered by the Hotel Sacher in Vienna). If time and weather permits, we will also pursue typical Austrian winter activities such as downhill or cross country skiing, sledding or skating. The course will be conducted mainly in English, with some German intermingled.

**Method of evaluation:** evaluation will be based on attendance, a 10-page paper (including presentation slides) and a corresponding presentation on a topic with an Austrian connection (possible topics will be suggested, but students can choose their own), and class discussions

**Prerequisites:** none necessary although some knowledge of German is welcomed

**Enrollment limit:** 24
Method of selection: random selection
Meeting times: mornings
Cost per student: $90
Instructor: Sylvia Logan
Sylvia Logan received her B.A. in Slavic Literature from Stanford University. She danced professionally with several dance companies including Jennifer Muller and the Works, a modern company based in New York City for five years.

MATH 14 Math Review
Taking a Math or Stat course in the Spring? Worried that your math is a little rusty? Improve your skills and make the Fall course go more smoothly by reviewing material over Winter Study. Students will meet with the instructor to discuss their background and design a study plan. Coursework will be done independently and working in small groups with the instructor.

Method of evaluation: evaluation will be based on participation and homework
Prerequisites: none; have to be enrolled in a MATH or STAT course in the spring
Enrollment limit: 15
Method of selection: preference will be given to QS students
Meeting times: afternoons
Cost per student: $25
Instructor: Stewart Johnson

MATH 15 Pilates: Physiology and Wellness (Same as SPEC 15)
During the first half of the twentieth century, Joseph Pilates developed a series of exercises he called Contrology designed to strengthen core muscles and improve overall health. Now known as Pilates, these exercises are meant to increase flexibility, strength, endurance, and spinal health. In this course, we will study the physiology and origins of the Pilates exercises as well as how Pilates can be incorporated into an overall wellness plan. Class time will include both Pilates routines, discussion, and guest lecture. There will be weekly quizzes, readings, and a final project. We will meet 3 mornings per week.

Method of evaluation: class participation, quizzes, and final project
Prerequisites: none
Enrollment limit: 10
Method of selection: selection will be based on student responses to a course survey
Meeting times: mornings
Cost per student: $125
Instructor: Allison Pacelli

MATH 16 The Science of Star Trek (Same as PHYS 16)
See under PHYS 16 for full description.

MATH 17 Modern Dance — Muller Technique
This dance class will be based on the modern dance technique developed by Jennifer Muller, with whom I danced professionally for 5 years in New York City and in Europe. Jennifer Muller was a soloist in the dance company of Jose Limon before she started her own company in 1974. She has added her own style of movement to the Limon technique, creating an expansive, free flowing dance that is wonderful to do and to watch. The class will be multi levelled and open to both men and women alike. Students will have the opportunity to choreograph a short piece either as a soloist or in small groups.

Method of evaluation: a 1/2-page journal entry is required after each class, a 1/2-page commentary on 10-12 dance videos, attendance, and a short project/concert at the end of winter study.
Prerequisites: none; no previous dance experience necessary
Enrollment limit: 20
Method of selection: selection will be based on the order that they sign up for the course, we air first choice for classes.
Meeting times: Monday, Wednesday, Friday from 11 am until 1 pm
Cost per student: $0
Instructor: Sylvia Logan
Sylvia Logan received her B.A. in Slavic Literature from Stanford University. She danced professionally with several dance companies including Jennifer Muller and the Works, a modern company based in New York City for five years.

MATH 12 The Mathematics of Lego Bricks
This course is a modification of three previous winter studies I have done on the Mathematics of LEGO bricks. Similar to those, we will use LEGO bricks as a motivator to talk about some good mathematics (combinatorics, algorithms, efficiency); however, instead of trying to build a SuperStar Destroyer in a world record time, we instead will build a large suspension bridge in Paresky and MLK Day, and partner with Williamstown Elementary and the Williamstown Youth Center on projects (probably Lego Mindstorm).

Method of evaluation: a mix of written assignments and public activities; a large project which the class will undertake over the course of the term.
Prerequisites: none
Enrollment limit: 30
Method of selection: conversations with instructor
Meeting times: mornings
Cost per student: $30
Instructor: Steven Miller

STAT 31 Senior Thesis
To be taken by candidates for honors in Mathematics other than by thesis route.

MUS 13 Introduction to Argentine Tango (Same as DANC 13)
Through reading, film viewings, and participating in musical exercises and dance workshops, students will explore the sounds and movements of Argentine tango, while also considering its broader social and historical context both in Argentina and abroad. No prior musical or dance experience necessary.

Grades will be based on course participation, regular journal entries (2 pages per week), an individual final project (including a 2- to 3-page written component), and their participation in a group-organized public tango event at the conclusion of the course (with 2-page write-up).

MUSIC
Method of evaluation: reading journal, final project, participation in group project, and full participation in class discussion and workshops
Prerequisites: none
Enrollment limit: 30
Method of selection: seniority, Music and Dance majors
Meeting times: mornings, afternoons
Cost per student: $40
Instructor: Corinna Campbell

MUS 14 Classic American and European Musical Theatre (Same as THEA 14)
This Winter Study will give participants an opportunity to study and perform numbers for one or more singers in great American musicals and European light operas. You have sung a solo, you have sung in chorus — now practice the exacting art of singing a solo or an ensemble on stage. The course will culminate with a performance of ensembles, solos, and duets, concentrating on connections between the music of Leonard Bernstein and Stephen Sondheim. Singers, actors, and pianists are all welcome to participate. The course is intended especially for singers who wish to have some stage time, and for actors whose work involves on their singing.
Method of evaluation: a student may fulfill the requirements of the course by performing in the final public concert
Prerequisites: none
Enrollment limit: 30
Method of selection: will communicate with those wishing to register either in person or via email
Meeting times: afternoons, MWF 1:00-3:00
Cost per student: $0
Instructor: Keith Kibler
Keith Kibler has performed under some of the finest directors including David Alden, Peter Sellars, and Galina Vishnevskaya. He sang a major role in Kurt Weill’s “Das kleine Mahagonny” at the American Repertory Theatre. He has appeared in numerous operas with companies in the United States and England.

MUS 15 Contemporary Songwriting (Same as AMST 15)
This course will focus on learning how to write and perform songs in contemporary styles (rock, folk, jazz, bluegrass, etc. Unfortunately, we will not be addressing rap or spoken word). Topics addressed will include song structure, songwriting, how to create chord progressions, and how to write and record songs. This course will culminate in a public performance of material written during the course. To successfully pass this course, students are required to create, edit, perform and possibly record two original songs. These songs must be conceived during the course period (previously written material is not usable). Students will be guided to create both music and lyrics. They may also be required to participate in a co-write session. At least one of these songs will be presented during the final performance, preferably by the student. Attendance at classes, feedback sessions, and all officially scheduled events is mandatory. A short writing assignment based on the assigned reading will be passed in on the last day of class.
Method of evaluation: attendance, final performance, and writing assignment
Prerequisites: none
Enrollment limit: 14
Method of selection: students with a musical background and the ability to play an instrument may be given preference, but anyone interested is encouraged to register
Meeting times: mornings
Cost per student: $65
Instructor: Bernice Lewis
Bernice is the Artist Associate in Songwriting. She also teaches at Colorado College and is an Artist in Residence for the National Park Service. With four decades of performing and seven acclaimed CDs, Lewis has built a solid national and international following. She studied vocalization with Bobby McFerrin, guitar with Alex DeGrassi and Van Guy Duser, and songwriting with Rosanne Cash and Cris Williamson. She has been a featured performer on NPR’s Mountain Stage, and the Kennedy Center.

MUS 16 Zimbabwean Music Collaboration
This course focuses on teaching Zimbabwean music performance. Besides introducing a selection of basic songs on mbira, marimba and voice, the course explores the orchestration of such music on other instruments such as brass, woodwinds, strings and additional percussion. The course content will trace both continuity and change in music from traditional song styles into African popular music. Besides the instrumental practice of the class, we will watch on YouTube and other videos the collaborative nature of the music. The class will conclude with an end-of-Winter Study performance by the participants.
Method of evaluation: end-of-Winter Study performance
Prerequisites: none; students who play other instruments are encouraged to bring them
Enrollment limit: 30
Method of selection: previous musical background, those who play other instruments may have an advantage
Meeting times: afternoons
Cost per student: $0
Instructor: Tendai Muparutsa

MUS 17 Chamber Orchestra of Williams
The Classical chamber orchestra will perform symphonies of Haydn and Mozart. Performing music of this period demands a high level of technical ability. Performance practice of this period will be a priority. The issues of intonation, articulation, balance, bowing, dynamics, tempo, and interpretation will be the backbone of the training.
Haydn, the first composer to define the classical symphonic style, will be represented by ‘Le Miti,’ the middle work of his symphonic triptych ‘Le Matin, Le Midi, and Le Soir.’ Mozart continued the development of the classical symphonic style. The orchestra grew in size on Mozart’s watch fueled by his need for more dramatic contrast and a richer harmonic language. Symphony no. 35, K385 will be the companion piece for COW 2017.
Two student conductors will be chosen to conduct the orchestra, one from the full orchestral conducting class, and one from Student Symphony. They will conduct the orchestra and act as personnel managers and librarians. They will be responsible for rehearsal priorities and strategies as they move forward from one rehearsal to another. There will be a final recorded and videotaped concert at the end of Winter Study. Berkshire Symphony and Student Symphony members will make up the bulk of the orchestra. Instrumentalists not selected in either ensemble are also welcome. Maximum enrollment: Strings: 12 violins, 5 violas, 4 cellos, 2 basses. Winds: 2 flutes, 2 oboes, 2 clarinets, 2 bassoons, 2 horns, 2 trumpets, timpani.
Method of evaluation: attendance and preparation
Prerequisites: none
Enrollment limit: 36
Method of selection: audition and need
Meeting times: evenings
Cost per student: $0
Instructor: Ronald Feldman

MUS 18 Singing and Temperament
Our musical system conceals a fundamental flaw — an inherent, mathematical incommensurability of its intervals: a finite collection of tones cannot be built from pure fifths and thirds and also be closed at the octave (i.e. twelve fifths from C returns not to another C, but to the distinct pitch B#). Equal temperament is our modern solution to this problem: we make the space between all tones exactly the same, spreading the discrepancy between C and B# evenly among all intervals, thereby making all intervals slightly impure. Historically, this was not always the case; in the seventeenth and eighteenth centuries, many and compelling methods arose to distribute the discrepancy in uneven but usable ways. As a result, different keys had different sounds — some were more harmonious, others less so; triads in those keys were not simply major or minor, but involved many shades of major and minor. Drawing on ancient legends, writers ascribed specific characters to particular keys, and such key characters undoubtedly shaped composers’ choices: Mozart, for instance, reserved g minor for particularly tragic topics; E-flat suggested particular paths for modulation by Bach. The class will explore the theory, mythology, and most importantly, the practice of diverse, microtonal tuning systems from the Baroque era: much of the class work will involve learning how to tune a harpsichord, realizing various historical temperaments on the instrument, and performing works thereupon in multiple keys, exploring the distinct sounds those temperaments create.
Method of evaluation: student’s singing project, and its accompanying presentation and paper
Prerequisites: none
Enrollment limit: 12
Method of selection: Music majors, performers, and students who have taken a music theory course
Meeting times: mornings
Cost per student: $0
Instructor: Ed Gollin

MUS 19 The World and Wes Anderson
Among commercially successful American filmmakers of the new millennium, Wes Anderson has cultivated one of the most strongly recognizable styles. While his films largely embrace traditional narrative structures, they take inspiration from (and allude to) movements far outside of traditional filmmaking. In this class, we will use his films as a lens into these diverse topics, including contemporary art, interior design, film history, music history, political history, national identity, celebrity, philosophy, typography, and the environment. Class meetings will consist of lecture, discussion, group viewing sessions, and student presentations. Outside of the classroom, students will read articles, watch video, and listen to music that relates closely to the course content.
Method of evaluation: participation, presentation, creative project and short paper (1- to 3-page), final paper (8- to 10-page)
Prerequisites: none
Enrollment limit: 20
Method of selection: preference to students who have taken courses about film in any department
Meeting times: mornings, afternoons
Cost per student: $0
Instructor: Zachary Wadsworth

MUS 25 Creative Art Projects inspired by Southern Florida Native American Indian History and Culture
This travel course will focus on creative art work inspired by the history and culture of Native American Indians of Southern Florida. We will discuss the history and culture of Native Americans in the area, focusing mostly on the Calusa, their society, politics, system of government, trading customs, and religion. We will also talk about their construction of a canal system, and their architecture and engineering. Students will arrive at their own conclusion about the impact of Native Americans in our culture. They will also use their experiences during field trips, workshops, lectures, and group discussions as a source of inspiration for their creative work in one or more of the following fields: music composition, visual arts (video, photography), and literature. They will create their projects individually or form teams to create
interdisciplinary works. If team work is selected for the creation of a project, there will be a limit of one student per discipline in each team.

Students will create their projects individually or could form teams to create interdisciplinary works. If team work is selected for the creation of a project, there will be a limit of one student per discipline in each team.

Field trips will be scheduled during the mornings. Some lectures will be scheduled during afternoons and evenings. Times not scheduled for lectures or field trips will be dedicated to study articles on The Calusa and the creation of individual or team creative work. Students will have a travel journal reflecting on their experiences and their artistic response as they occur. Students’ projects in progress will be shared with members of the Pine Island Community. Once the creative process is completed we will donate copies of the projects to the Randell Research Center. Creative projects will also be shared with the Williams College community after our return to Williams. Students will also write a four-page paper describing how they integrated the knowledge acquired about the Calusa Indians and their civilization into their creative projects.

Prior to our departure, students should have read the following book:

Method of evaluation: creative project and a 6-page paper

Prerequisites: none; not open to first-year students

Enrollment Limit: 7

Method of selection: priority to students with experience in music, the arts, archeology, and environmental studies

Cost per student: $1970

Instructor: Ileana Perez Velazquez

MUS 31 Senior Thesis
To be taken by students registered for Music 493-494.

NEUROSCIENCE

NSCI 31 Senior Thesis
To be taken by students registered for Neuroscience 493-494.

PHILOSOPHY

PHIL 12 Ethics in Public Health (Same as PHLH 12)
It is the beginning of Winter Study on the Williams campus. Students are just arriving after their semester break, and along with them, a novel and highly transmissible strain of avian flu. It is a fictional scenario, but not unimaginable. Over the course of the winter study period we will watch it unfold, and use it as a launch pad for investigating ethics in public health. In particular, the various stages of the epidemic will give us the opportunity to explore the ethics of disease surveillance, research, resource allocation, and compulsion within the public health context (e.g., mandated reporting of disease, isolation and quarantine, compulsory vaccination and treatment), among other topics. Students will be expected to complete background readings in public health ethics taken from the philosophical, bioethical, and professional public health literature, and to participate actively in class discussions. In addition, students are responsible to give in-class presentations in which they propose public health measures at various stages of the fictional epidemic, and defend the ethical dimensions of the measures they propose. (These may be team presentations, depending on class enrollment.) Each student will submit a brief (e.g., 2-3 page) written response to at least three other presentations.

Method of evaluation: one in-class presentation, three short (2-3 page) response papers, and participation

Prerequisites: none

Enrollment Limit: 12

Method of selection: Public Health concentrators and Philosophy majors will receive enrollment priority

Meeting Times: afternoons

Cost per student: $10

Instructor: Julia Pedroni

PHIL 14 Yoga and an Ethical Life
“Yoga and an Ethical Life” will explore how the practice of yoga can serve as a foundation and guide for ethical living, looking in particular at yoga as an inspiration for environmental and social justice work. Alongside the physical practice of yoga, the class will investigate the ethical teachings of yoga’s ancient text, the “Yoga Sutras of Patanjali.” Students will learn a number of basic yoga poses and breathing techniques in 1.5-hour classes that will meet 4 or 5 times a week. In addition, students will read and discuss excerpts from the Yoga Sutras and several different commentaries, including those of BKS Iyengar (Light on the Yoga Sutras) and Bernard Bouanchaud (The Essence of Yoga). The principal reading will be Michael Stone’s “Yoga for a World Out of Balance: Teachings on Ethics and Social Action.” Students will be expected to practice on their own the remaining days, to keep a log of their practice over the month-long course, and to participate in class discussions of the readings. For final credit, students must write a 5- to 10-page paper on a theme of their choice relating to their experience of the class and the ethical teachings of yoga.

No previous yoga experience is required. Students will purchase a copy of Michael Stone’s book and join a group order for a yoga mat.

Method of evaluation: class participation and final paper (5- to 10-pages); students are expected to attend all the classes; absences need to be cleared in advance with the instructor.

Prerequisites: no broken bones or acute physical injuries; previous yoga experience not required

Enrollment Limit: 12

Method of selection: priority to those who enroll first, with in-person follow-up to assess motivation and commitment to participate

Meeting Times: Monday-Thursday, 10:30-12, at Tasha Yoga Studio, 20 Spring St., Williamsport; first class Tuesday, January 3, last class Thursday, January 26.

Cost per student: $75, based on need of yoga mat and purchase of book

Instructor: Anne O’Connor

Yoga teacher Anne O’Connor is trained in the Iyengar yoga method, which she has been practicing for 20 years. O’Connor, a freelance editor, also serves on the Williamsport Select Board and is a member of the environmental group 350MA-Berkshires and the First Congregational Church of Williamsport.

PHIL 25 Eye Care and Culture in Nicaragua (Same as PSYC 25)
Among the works students will read, in part or as wholes, and then discuss, are the following:
- Dix and Fitzpatrick 2011, Nicaragua. Surviving the Legacy of U.S. Policy
- Hooker 2010, “The Mosquito Coast and the Place of Blackness and Indigeneity in Nicaragua”
- Hooker 2011, Inaugural Lecture for the 2011 Academic Term of the University of the Autonomous Regions of the Caribbean Coast of Nicaragua (URACCAN)
- Kinzer 2007, Blood of Brothers. Life and War in Nicaragua.

Method of evaluation: class participation and journals, along with on-site observation of the students’ participation in the eye clinics.

Prerequisites: none; although it is helpful to include three to six students who are fluent in Spanish; not open to first-year students

Enrollment Limit: 12

Method of selection: students will submit applications indicating why they want to take the course; in 2014, 2015, and 2016, we were able to include (1) all seniors who applied, and (2) all students who had applied for inclusion in the course in earlier years but were excluded; others were selected on the basis of their applications; those who were excluded were informed that if they reapplied in later years, we would attempt to accommodate them; we hope to be able to continue to do so; as indicated above, it is important to have some students who are fluent in Spanish, so that may be a factor in some cases.

Cost per student: $3800

Instructors: Alan White, Elise Harb, and Laura Smalarz

PHIL 26 Morocco
Students spend winter study in Morocco, a country at the intersection of the Middle East, Northern Africa, and Sub-Saharan Africa. It is a land of ancient and modern, of Berber life and Andalusian culture, and of the intersection of Islam and Christianity. The country’s history is marked by the imprint of European colonialism, and the legacy of the Spanish presence in the country and its culture is still felt today. Morocco is a country of great cultural diversity, with the local Berber population living in the mountains and the modern elements of the country’s culture reflected in the cities of Marrakech, Casablanca, and Rabat. The country’s history, literature, and philosophy offer a unique glimpse into the region’s past and present.

Over the course of the winter study period we will watch it unfold, and use it as a launch pad for investigating ethics in public health. In particular, the various stages of the epidemic will give us the opportunity to explore the ethics of disease surveillance, research, resource allocation, and compulsion within the public health context (e.g., mandated reporting of disease, isolation and quarantine, compulsory vaccination and treatment), among other topics. Students will be expected to complete background readings in public health ethics taken from the philosophical, bioethical, and professional public health literature, and to participate actively in class discussions. In addition, students are responsible to give in-class presentations in which they propose public health measures at various stages of the fictional epidemic, and defend the ethical dimensions of the measures they propose. (These may be team presentations, depending on class enrollment.) Each student will submit a brief (e.g., 2-3 page) written response to at least three other presentations.

Method of evaluation: one in-class presentation, three short (2-3 page) response papers, and participation

Prerequisites: none

Enrollment Limit: 12

Method of selection: students will submit applications indicating why they want to take the course; we have taken students whose majors are in closely allied fields (e.g. Middle Eastern history, Arabic language) as well as students from related disciplines in Divisions I and II (e.g. art history, French language, political science, philosophy, literature, and religion, to name a few); equally important, we have been delighted to take many Division III students whose academic experience not required

Meeting Times: afternoons

Cost per student: $3800

Instructors: Alan White, Elise Harb, and Laura Smalarz
Method of selection: we select students using a two-step process: (1) a required 1-page essay describing the student's interest in and background for the course; (2) interviews with individual students.

Cost per student: $3500

Instructors: Melissa Barry and Sherron Knopp

**PHIL 31 Senior Thesis**

To be taken by students registered for Philosophy 493-494.

**PHYS 11 Science for Kids (Same as CHEM 11)**

See under CHEM 11 for full description.

**PHYS 12 Drawing as a Learnable Skill**

Representational drawing is not merely a gift of birth, but a learnable skill. If you wanted to draw, but have never had the time to learn; or you enjoy drawing and wish to deepen your understanding and abilities, then this course is for you. This intensive course utilizes traditional drawing exercises to teach representational drawing skills. By using simple techniques and extensive exercises you will develop your ability to accurately see and realistically represent the physical world. You will learn to draw a convincing portrait, interior, and still life. This course is designed to develop your powers of observation and teach creative problem solving abilities. Students need no previous artistic experience, just the willingness and desire to learn. Students will be expected to attend and participate in all sessions. They will also be required to keep a sketchbook of homework assignments recording their progress and complete a final project.

Method of evaluation: the final evaluation will be based on class participation during the course, improvement made, and participation in a formal exhibition of drawings consisting of two drawings: one still life and one portrait; a short 2-page paper will be required of which the student is asked to describe what they have learned from the class and how their understanding of drawing has been affected by what they learned.

Prerequisites: none

Enrollment limit: 18

Method of selection: if overenrolled, selection will be based on seniority

Meeting times: mornings

Cost per student: $8

Instructor: Melissa Barry and Sherron Knopp

**PHYS 12 Loop d’ Loop d’ Loop d’ Loop d’ Loop d’ Loop... (Same as MUS 20)**

This class is about music, but you don’t have to be a musician to take it. It is about recursion, but you don’t have to be a computer scientist to get it. We will play with the subjective and social meanings of sound-art, but you don’t have to be an artist to play along. Imagine that you record yourself speaking in a room; You record the sound of that recording as it plays back in that same room; You record the recording of the recording; You sit back and let this loop repeat and repeat. Eventually your world will be smothered by the resonances of the room into a rich melody. In this class we will explore the world of sound-art. We will transmute audio samples by harnessing the resonances of architectural spaces in Williamstown, from dorm room to theater. Emphasizing hands-on projects, students will create, listen, read, and field trip their way to a new understanding of sound and recursion.

Method of evaluation: first project and final project — both require substantial work.

Prerequisites: none

Enrollment limit: 20

Meeting times: Monday-Thursday, 1-4 pm

Cost per student: $20

Instructor: Charles Doret

**PHYS 18 Wood and Woodturning (Same as ARTS 18)**

Woodturning — the use of a lathe to sculpt cylindrically symmetric objects from wood. This course is about the practice and art of turning wood, but it is also about the tools used in the process. The course will introduce digital circuits and the Arduino, a microcontroller. Class will meet mornings, labs in afternoon.

Instructor: Stella Ehrich

Stella Ehrich is a professional painter whose work includes portraits, landscapes and still life subjects. She studied for seven years at Studio Simi in Florence, she holds an MFA in painting from Bennington College and a BFA from the Memphis Academy of Art.

**PHYS 18 Electronics**

Electronic circuits and instruments are indispensable parts of modern laboratory work throughout the sciences. This course will cover the basics of analog circuits, including transistors and operational amplifiers, and will briefly introduce digital circuits and the Arduino, a microcontroller. Class will meet four afternoons a week for a mixture of lab and lecture, providing ample opportunity for hands-on experience. Students will build and test a variety of circuits chosen to illustrate the kinds of electronic devices and design problems a scientist is apt to encounter. In the last week, students will design and build a final project, or write a 10-page paper.

Method of evaluation: class participation, completion of laboratory work, and the quality of the final project or 10-page paper

Prerequisites: MATH 140 or equivalent calculus; no prior experience with electronic circuits is assumed

Enrollment limit: 18

Method of selection: priority given to seniors first, first-years last

Meeting times: afternoons

Cost per student: $25

Instructors: Jefferson Strait and Jason Mativi

**PHYS 14 Light and Holography**

This course will examine the art and science of holography. It will introduce modern optics at a level appropriate for a non-science major, giving the necessary theoretical background in lectures and discussion. Demonstrations will be presented and students will make several kinds of holograms in the lab. Thanks to a grant from the National Science Foundation, we have 7 well — equipped holography darkrooms available for student use. At the beginning of WSP, the class will meet for lecture and discussion three mornings a week and for lab 2 afternoons a week. The latter part of the month will be mainly open laboratory time during which students, working in small groups, will conduct an independent project in holography approved by the instructor.

Method of evaluation: students will be evaluated on the basis of regular attendance, completion of 4 laboratory exercises, and a holography laboratory project (approved by the instructor) with either a poster presentation to the class at the end of WSP; attendance at all classes and labs is required for a passing grade.

Prerequisites: none

Enrollment limit: 30

Meeting times: mornings, labs in afternoon

Cost per student: $50

Instructors: David Tucker-Smith and Kevin Forkey

**PHYS 16 The Science of Star Trek (Same as MATH 16)**

Comprising twelve motion pictures and five major television series, totaling over 500 hours of film, Star Trek has had a profound impact on pop culture and the scientific imagination. In this Winter Study course, we will board Star Trek as vehicle towards a critical discussion of science, technology, and their consequences to society. We will boldly question topics such as the nature of reality, the (uni/multi)verse according to quantum theory and general relativity, the origins of consciousness and the possibility and consequences of extraterrestrial and artificial intelligence. We will view select episodes and films from the franchise, discussing their basis in actual science and using them as a prism to understand issues facing us on Earth. For more details, see http://web.williams.edu/Mathematics/sjmiller/public_html/1701/

Method of evaluation: class participation, the completion of two short essays (3- to 4-pages) and a final project, and the Kobayashi Maru test

Prerequisites: none

Enrollment limit: 25

Meeting times: afternoons

Cost per student: $30

Instructors: Frederick Strauch and Steven Miller

**PHYS 20 Loop d’ Loop d’ Loop d’ Loop d’ Loop d’ Loop... (Same as MUS 20)**

This class is about music, but you don’t have to be a musician to take it. It is about recursion, but you don’t have to be a computer scientist to get it. We will play with the subjective and social meanings of sound-art, but you don’t have to be an artist to play along. Imagine that you record yourself speaking in a room; You record the sound of that recording as it plays back in that same room; You record the recording of the recording; You sit back and let this loop repeat and repeat. Eventually your world will be smothered by the resonances of the room into a rich melody. In this class we will explore the world of sound-art. We will transmute audio samples by harnessing the resonances of architectural spaces in Williamstown, from dorm room to theater. Emphasizing hands-on projects, students will create, listen, read, and field trip their way to a new understanding of sound and recursion.

Method of evaluation: first project and final project — both require substantial work.

Prerequisites: none

Enrollment limit: 20

Meeting times: Monday-Thursday, 1-4 pm

Cost per student: $20

Instructor: Daniel Fox

Daniel Fox is a composer and a mathematician who explores moments of the scientific imagination. In this Winter Study course, we will board Star Trek as vehicle towards a critical discussion of science, technology, and their consequences to society. We will boldly question topics such as the nature of reality, the (uni/multi)verse according to quantum theory and general relativity, the origins of consciousness and the possibility and consequences of extraterrestrial and artificial intelligence. We will view select episodes and films from the franchise, discussing their basis in actual science and using them as a prism to understand issues facing us on Earth. For more details, see http://web.williams.edu/Mathematics/sjmiller/public_html/1701/

Method of evaluation: class participation, the completion of two short essays (3- to 4-pages) and a final project, and the Kobayashi Maru test

Prerequisites: none

Enrollment limit: 25

Meeting times: afternoons

Cost per student: $30

Instructors: Frederick Strauch and Steven Miller

**PHYS 22 Research Participation**

Several members of the department will have student projects available dealing with their own research or that of current senior thesis students. Approximately 35 hours per week of study and actual research participation will be required of students. Those interested should consult with members of the department as early as possible in the registration period or before to determine details of projects then expected to be available.

Method of evaluation: students will be required to keep a notebook and write a 5-page paper summarizing their work

Prerequisites: permission of instructor

Meeting times: to be arranged with instructor

Cost per student: $0

Instructor: David Tucker-Smith and members of the Physics department

**PHYS 31 Senior Thesis**

To be taken by students registered for Physics 493-494.
POLITICAL ECONOMY

POEC 21 Fieldwork in Public Affairs and Private Non-Profits (Same as PSCI 21)
See under PSCI 21 for full description.

POEC 23 Endowment Investment Management
This class is designed to provide students with an overview of endowment and investment management and is taught by members of the Williams College Investment Office. The Investment Office is responsible for overseeing Williams’ $2 billion endowment. The class will cover investment strategies, asset classes, risk management, and project work. Winter Study students will gain a better understanding of the various components of an institutional investment portfolio, how it is managed, and how investment managers are selected and monitored.

Prerequisites: none
Enrollment limit: 7
Method of selection: to apply, please select POEC 23 as your first choice; additionally, please send an email with a resume and cover letter to investmentoffice@williams.edu by 11:59 PM ET on Sunday, October 9, 2016; students will be selected via phone interviews.

Meeting times: mornings
Cost per student: $0
Instructor: Abigail Wattley
Abigail has served as a Director in the Williams College Investment Office since 2010. From 2007 to 2008 Abigail worked in the Investment Office as an Investment Analyst. Prior to Williams, Abigail worked as a Senior Consulting Associate at Ambriidge Associates, an investment consulting that provides investment advice to endowed non-profits. Abigail received a B.A. in Economics from Williams College in 2005 and a Master of Business Administration from the Harvard Business School in 2010.

POEC 31 Honors Thesis
To be taken by students registered for Political Economy 493.

POLITICAL SCIENCE

PSCI 10 All Politics is Local — Or is it?
This course will focus on the changes that have taken place in American politics over the past thirty-five years. Students will compare the similarities and differences between the political culture of the eighties and now. They will learn how two strong-willed leaders were able to get things done despite their philosophical differences. The relationship between President Ronald Reagan and Speaker of the House Tip O'Neill is one that has been analyzed by many, yet understood by few. They were able to reach compromises in order to keep the government functioning, while at the same time being able to maintain the support of their base. Tip O’Neill was often quoted as saying that “all politics is local” and he saw himself as the voice of the working class. Reagan however, was able to win over many blue-collar workers despite his support of policies which were considered harmful to the working class. Students may also discover that maybe not much has changed in the past thirty-five years. The divide between American politics today is no greater than it was thirty years ago, yet something has changed. The class will hear from political leaders of both parties, some who began their political careers when Reagan and O’Neill were leaving Washington, who will give their thoughts on how the political discourse in America could be better. Political leaders who will be speaking with students during winter study will include both former and current Mayors, legislative leaders, and members of the executive branch of State government. Their participation will offer meaningful insight into the world of politics and government service.

Method of evaluation: two 5-page reports and a 15-minute presentation to class
Prerequisites: none
Enrollment limit: 15
Method of selection: lottery
Meeting times: mainly morning/some may have to be in the afternoon based on guest schedule
Cost per student: $0
Instructor: John Barrett
John Barrett has been involved in politics and government for nearly 45 years beginning in 1972 when he was elected to the Massachusetts Democratic State Committee from Berkshire County. He held elective office from 1975-2009; North- ern Berkshire Vocational School District 1976-1984; Berkshire County Commissioner from 1977-1981, 26 years as Mayor of North Adams, MA 1984-2010.

PSCI 12 The East is Red? — Socialism in Asia (Same as ASST 12 and HIST 12)
See under ASST 12 for full description.

PSCI 13 The Art of War
This course will examine the meaning and uses of the classical Chinese text, The Art of War, by Sun Tzu. Students will consider Sun Tzu’s insights both in the context of ancient Chinese philosophy and in terms of their contemporary relevance. The first half of the course will concentrate on placing Sun Tzu in historical and philosophical context; the second half will examine how The Art of War has been used in a variety of modern fields.

Method of evaluation: evaluation will include mandatory class attendance and participation, and a 10-page paper
Prerequisites: none
Enrollment limit: 20
Method of selection: seniors and juniors will have priority
Meeting times: mornings
Cost per student: $75
Instructor: Sam Crane

PSCI 14 The CIA and the Politics of Intelligence (Same as LEAD 14)
This course will trace the evolution of CIA from an organization largely focused, in its early days, on coups and regime change under the Dulles brothers, to its present role in the war on terror and beyond. Students will consider how intelligence works, the various political issues that emerge from those activities. Some of the Agency’s signal successes and failures will be examined, and some of its directors will be evaluated. The fluctuating relationship between CIA and the FBI will also be discussed. Stress will be placed on the personal experiences of those who have served in the Agency.

Method of evaluation: evaluation will include class attendance and participation, and a short, 3- to 4-page retrospective paper on the course and its historical context.
Prerequisites: none
Enrollment limit: 20
Method of selection: preference to PSCI and LEAD students
Meeting times: mornings
Cost per student: $50
Instructor: Donald Gregg
Donald Gregg served in CIA from 1951-82, worked in the White House from 1982-89, and has been a consultant since 1989-93. He is now chairman emeritus of The Korea Society. 1980-89, taught a second-year graduate level course at the Master of Science in Foreign Service Program of Georgetown University. He is now chairman of the Pacific Century Institute in Los Angeles.

PSCI 15 Heroic Enemies of World War II
What contributions to justice and peace do soldiers from among the Axis powers of World War II offer us today? Find out in this exploration into the inspirational lives of Japanese radiologist and atomic bomb survivor Takashi Nagai and German SS medic Gereon Goldmann. Together we will glean powerful lessons from their stories. After a month of lectures, movies, and student-led discussions, participants conclude the course with a book review and a 5-page policy paper applying their acquired knowledge to the contemporary social issue of their choice.

Method of evaluation: reading assignments, student-led discussions, class/online participation, and community service will culminate with two 5-page papers
Prerequisites: none
Enrollment limit: 35
Method of selection: seniority
Meeting times: Tues/Thurs 11am-2p (includes lunch meeting in small groups)
Cost per student: $50
Instructor: Fr. Michael Sheehan
In the span of three months, Father Michael F. Sheehan, FPO, went from a Spandex Epsuds speedsuit to a wool Franciscan tunic. A PSCI/IR major at Williams (2003), he is now a Catholic priest of Boston and a friar of the Franciscans of Primitive Order in Roxbury.

PSCI 16 The Art of Persuasion: Aikido as both a Physical and Political Art
Aikido is a Japanese martial tradition that combines the samurai arts of sword and grappling with the philosophical desire to forge a path of harmony in the midst of chaos. As such, it addresses situations of conflict that manifest themselves physically, but also offers insight into how to redirect the energies —social, psychological, or political — that might otherwise become conflict in order or another aspect of our lives. As a martial art, Aikido teaches more than simply how to survive; it also teaches us how to physically express our noblest intentions — our compassion — in movements that protect not only ourselves but our attacker as well. Put another way, Aikido is persuasion made physical. Political oratory seeks to inspire one’s dedicated allies, undercut one’s committed opponents, and persuade the undecided in a context where, typically, use of force is not an option. Compelling and strategic oratory is therefore the ammunition and battle plan occupying the nonviolent side of Clausewitz’s “infamous absurdity” (“war is a mere continuation of politics by other means”). The physical training (10-12 each morning in Currier Ballroom) will improve each student’s strength, balance, posture, and flexibility. Even more, students will learn how to throw their friends across the room. About 25% of training time will be devoted to sword, staff, and dagger techniques. The academic component of the course will engage with how the physical training resonates with the tactical practices of successful political rhetoric and the strategic thinking that it helps implement. Students will read and perform impromptu speeches (by Lincoln, Churchill, Roosevelt, Gandhi, King, Reagan, Obama, etc.) and analyze the linguistic (framing), acoustic (cadence, rhythm), narrative, and cultural elements that made them successful. Students in small groups will draft and polish a 2-3 minute speech text, a social media campaign, and a YouTube video which supports that policy position. This work will be inspired by the great speeches they’ve analyzed and their growing understanding of aikido principles, and will be suitable for inclusion in our new President’s Inauguration address on January 20th. By integrating physical and intellectual components, the course seeks to forge in each student a stronger and more coherent perspective on how the
pursuit and embodiment of harmony can resolve the conflicts that some falsely contend are endemic and inevitable. Additional relevant experiences, such as meditation practice, outdoor misogi, and clips from The West Wing will be woven into the course as schedules permit. Students should understand that this course, because of its dual physical and intellectual components, asks them to invest more of their time in class than some other Winter Study offerings.

Method of evaluation: students will be evaluated on the quality of their participation in both physical and intellectual course components (class discussions, reconciliation journal, final project); students are encouraged to correspond with the instructor (rkent-at-williams.edu) before registration begins if they have questions.

Prerequisites: same physician’s approval on file as the school requires to participate on sports teams; students do not have to be especially athletic, and in Aikido women train as equals with men.

Enrollment limit: 20

Method of selection: if overenrolled, selection will be based on a questionnaire.

Meeting times: mornings, afternoons; 10-12 for aikido in Currier Ballroom, 1-2:15 for academic class meetings, typically over lunch in Pareys

Cost per student: $175

Instructor: Robert Kent

Robert Kent ’84 spent 3 years in Kyushu, Japan earning his first dan directly after majoring in both Philosophy and Religion at Williams. He trained for 21 years at Aikido West under Frank Doran Shihan, earning his 4th dan. He is currently President of Aiki Extensions, Inc. and Founder of The PeaceCamp Initiative, for which he won Ben and Jerry’s 2008 Peace Pioneer Award. He earned an MA in Philosophy at Claremont Graduate School in 1993, writing his thesis on the Ethics of Authenticity.

The Deer Hunter

James McAllister

Prerequisites: none

Enrollment limit: 20

Method of selection: preference will be given to Political Science and History majors.

Cost per student: $50

Meeting time: afternoons

Instructor: James McAllister

PSCI 18 GUNS! The Politics and Law of the Second Amendment

There are few issues in American politics that generate quite so much passion and ideological conflict as gun control and gun ownership. The politics and science of gun control are well articulated in a reading by Mike Wynn, who has written extensively on the subject. Wynn’s work appeared in the American Political Science Review, 89(2):359-372 (2005) and 90(2):309-324 (2005). It offers a compelling explanation of the causes of and solutions to the incidence of juvenile crime and methamphetamine use, and more than once has featured those frogs that squirt blood from their eyes. The course ends with a presentation in which each Adolescent/Williams student pair formally presents their work via PowerPoint to an audience that includes the Berkshire County Juvenile Court judges and probation officers, town and city chiefs of police, County District Attorney and assistant DAs, the teens’ parents, teachers, family and community members. Williams students gain experience serving in an official capacity, learn to teach and motivate challenging teens, and gain insight into the causes of and solutions to the incidence of juvenile crime and underachievement. Williams students are expected to read relevant training materials, meet and work with the teens, give a final presentation, and keep a weekly journal detailing their meetings. In order to enroll in the course, all students must write a paragraph explaining why they want to take the course. Students should email their paragraphs to Paul Ashcroft, George W. Bush’s Attorney General (in a reading), that the Amendment establishes only a collective, statewide right, or an individual right to keep and bear Arms has grown in recent years, a view that has been fueled by a number of scholars in law, economics, and history. Some “middle-ground positions” have been awkwardly carved out recently in light of two important U.S. Supreme Court cases. The Court in the “Heller decision” appears to have settled the argument for once and for all. However, as we will discover, Heller advanced the argument, but it did not settle it. The argument was further extended by the Court in McDonald v. Chicago. Neither Heller nor McDonald settled the issue; each unleashed a maelstrom of political forces, with Heller in the majority. Williams students should understand that they are to ignore all references to Heller and McDonald in the courts and in the states’ legislatures.

Method of evaluation: two one- to two-page paper per week, on average, six or seven papers in all, to be written on any of the ten asterisked dates; papers are to be single-spaced, one-inch margins on topics drawn from the readings and that I give in class. Each paper is to be handed in at the beginning of the class period and will provide the framework for discussion.

Prerequisites: none

Enrollment limit: 16

Meeting time: by major and by class

Cost per student: $50

Instructor: Richard Winters

PSYCHOLOGY

PSCI 11 Designing your Life and Career after Williams

This course will help students determine which directions they would like to take in their lives and careers. We will take stock of your interests, talents, strengths and challenges, and figure out which careers play to your strengths. We will discuss the importance of understanding your own values (e.g., security, meaning in your work, money, fame, and freedom in your schedule) and how that fits with the choices ahead of you. We will identify how careers differ in meeting these needs and help you to find a healthy balance. The
class will try to help you identify which activities come so naturally to you, perhaps without you even fully realizing it, that they may point to a career path. We will talk about your life story up until now, and how that has shaped what you think you should do with your life. We will help you to imagine complete freedom in rewriting your life story and see what emerges. We will discuss how workplace and professional cultures differ and help you to figure out which cultures are good fits. We will look some at practical resources that are available to you to pursue dreams, once you have chosen an initial path. Students will consider how important choosing a fitting romantic partner is, and that excite you. Articles, books, lectures, and films will be used to help you discover and develop your plan. This course will also reference and make use of material from a formative class the instructor had with famed psychologist Elliot Aronson, PhD, when he was a senior at Williams.

Method of evaluation: 5-page paper describing your life and career plan, and formal presentation to the class of your plan

Prerequisites: none

Enrollment limit: 15

Method of selection: juniors and seniors will be given first priority

Meeting times: three mornings per week for two hours each (likely Monday, Tuesday, and Wednesday or Thursday)

Cost per student: $20

Instructor: Ben Johnson

Dr. Johnson is a clinical psychologist and founder and director of RICBT, a large cognitive-behavioral therapy and coaching practice in Rhode Island. He is board-certified in Cognitive and Behavioral Psychology and President of the Rhode Island Psychological Association. In his clinical practice, he helps people understand their life stories and find career directions that feel authentic and inspiring. Dr. Johnson received his B.A. from Williams College and his Ph.D. from Yale University.

PSYC 12 Alcohol 101: Examining and Navigating the College Drinking Scene

Seventy-two percent of college students report that they used alcohol at least once within the past 30 days. Where is the line between fun and danger? This course will examine the realities of the role of alcohol in the social lives of college students. Students will engage in active discussions of readings, videos, and myths vs. facts, as well as personal observations and opinions. Class structure will involve 3-hour classes that meet twice weekly. Participants will learn scientific facts about alcohol, including how it gets metabolized in the body, how it is perceived in men vs. women, and how to recognize and respond to the signs of alcohol poisoning. Films will include evocative footage and interviews, such as "College Binge Drinking and Sober Reflections." We will hear from an expert in trauma and sexual assault and explore the significant role of alcohol in sexual assault on campus. How do we do this. In any case, all students considering this course must consult with the instructor about the suitability of the internship being considered before the Winter Study registration period. Please prepare for a brief description of the proposed placement, noting its relevance to psychology, and the name and contact information of the agency supervisor. Before Thanksgiving break, the student will provide a letter from the agency supervisor which describes the agency, and the student's role and responsibilities during Winter Study. Enrolled students will meet the instructor before Winter Study to discuss matters relating to ethics and their goals for the course, and after Winter Study to discuss their experiences and reflections.

Method of evaluation: evaluation will be based on a 10-page minimum final paper summarizing the student's experiences and reflections, a journal kept throughout the experience, and the supervisor's evaluation

Prerequisites: approval by Betty Zimmerman is required

Enrollment limit: 20

Method of selection: Psychology majors will be given preference

Meeting times: afternoons

Cost per student: $0

Instructor: Betty Zimmerman

PSYC 22 Introduction to Research in Psychology

This course provides a research opportunity for students who want to understand how psychologists ask compelling questions and find answers about behavior. Several faculty members, whose subfields include behavioral neuroscience, cognitive psychology, social psychology, clinical psychology, developmental psychology, and the psychology of education, will have student projects available. Since projects involve faculty research, interested students must consult with members of the Psychology Department before electing this course.

Method of evaluation: evaluation will be based on the quality of research participation, student's lab journal, and either an oral presentation or a written 10-page report of the research project

Pre-requisite or corequisite: PSYC 11 Psychology Internships

Enrollment limit: limited to space available in faculty research labs

Method of selection: selection will be based on evaluation of departmental application and number of faculty available as mentors

Meeting times: determined by faculty

Cost per student: $0

Instructor: Noah Sandstrom

PSYC 25 Eye Care and Culture in Nicaragua (Same as PHIL 25)

See under PHIL 25 for full description.

PSYC 31 Senior Thesis

To be taken by students registered for Psychology 493-494.

Instructor: Laurie Heatherington
PHLH 12 Ethics in Public Health (Same as PHLH 12)
See under PHLH 12 for full description.

PHLH 13 Ethics in Clinical Medicine
This course will use a discussion format and case-based method to evaluate the ethical dilemmas involved in the practice of clinical medicine. Areas to be covered will include informed consent for elective and emergency procedures, parental consent, special situations, end-of-life decision-making, organ transplantation, conflict of interest, and scientific integrity. 

Method of evaluation: final project involving a 10-page paper
Prerequisites: none
Enrollment limit: 10
Method of selection: preference to pre-med students
Meeting times: mornings
Cost per student: $40
Instructor: Christopher Baker

PHLH 14 Epidemiology, Public Health, and Leadership in the Health Professions (Same as SOC 14)
See under ANSO 14 for full description.

PHLH 15 The Human Side of Medicine and Medical Practice
In today’s health care atmosphere of physician accountability, advanced medical technology, and evidence-based diagnosis, the “human side” of medicine is often minimized or even disregarded. Medical schools debate how to emphasize this more interpersonal aspect of medicine within their curricula. Increasingly research shows that the combination of BOTH perspectives — patient centered understanding and technical proficiency — leads to better diagnosis and treatment; improved patient satisfaction; and to increased physician professional satisfaction. These positive outcomes become a powerful case for future health care professionals being exposed to the philosophy, understanding and concrete tools of the more human side of medical practice.

Texts:
- Lisa Sanders, Every Patient Tells a Story
- Paul Kahanlith, When Breath Becomes Air
- Reading packet to be provided by instructor

Content may include:
- Definition of a “patient’s story”
- Communication, relationships and interpersonal skills within the medical interview
- Skills of self-reflection and self-care for the doctor, and why these are important for good medical practice
- How to talk to patients and the important role/skills of clinical empathy
- Complicated moments during an interview
- “Hot” topics within the profession; ethics and professionalism; recent public commentary about the medical profession; electronic records; technology, relationship and the “ill-patient”

Method of evaluation: class discussion and active student participation; practice interviewing and problem solving role plays; group presentations; 2 reaction papers (2- to 3-pages each), final project (approved required) or paper (5- to 6-pages); minimum 10-pages written work required
Prerequisites: none
Enrollment limit: 14
Method of selection: priority to pre-med juniors and seniors, Public Health concentrators and those with demonstrated interest in healthcare
Meeting times: Tues, Wed, Thurs, 10:00am-noon
Cost per student: $50
Instructor: Sandra Goodbody, MSW

The instructor maintained a long time psychotherapy practice in Washington DC, and currently serves on the clinical faculty at The George Washington University School of Medicine. She has held positions at The Catholic University School of Social Work and the Institute of Medicine.

PHLH 16 Addiction Studies and Diagnostics (Same as SPEC 16)
The goal of “Addiction Studies and Diagnostics” is to help students develop an effective understanding of the definition, impact, and treatment of addiction. Students will be familiarized with the DSM-5, the text used to diagnose mental illness in the US. Speakers will tell their stories in their journey from addiction to recovery. Students will be expected to accurately diagnose the speakers according to the criteria in the DSM-5. This course will benefit people intending to work in business, the medical arts, or be a member of a family or a friend.

Method of evaluation: oral presentation, essays, and attendance
Prerequisites: none
Enrollment limit: 14
Method of selection: by lecturer’s permission
Meeting times: TBD
Cost per student: $0
Instructor: Rick Berger

PHLH 23 Gaudino Fellowship: Immersive Engagement and Reflection
The Gaudino Fund is pleased to announce that students during Winter Study 2017, based upon a proposed domestic or foreign collaborative project. Student teams should organize their proposed projects around two main components: 1) direct encounter with otherseness, and 2) self-reflection Projects will be evaluated on whether they subject the students to “uncomfortable learning”, i.e. having an experience that challenges and perhaps alters one’s view of what it is to live a good life and the group’s commitment to incorporate separate home stays for each fellow as part of their project, either joint or separate work/engagement internships, and a structure to facilitate collaborative action and learning. The team selected will be guided and overseen by the Gaudino Scholar who will help assure successful arrangements and will conduct appropriate preparatory discussions and follow-up sessions to optimize and help students articulate lessons learned from the overall experience. The intent of the program is to open the student to an understanding (of both the familiar and unfamiliar), and to a development of empathy, that could not be achieved without the fellowship experience.

N.B. Although this course is housed in PHLH, projects are not limited to public health.

Each prospective team needs to meet with the Gaudino Scholar as early as possible, but no later than September, and submit their group application by October 15th. Application guidelines can be found at http://gaudino.williams.edu/gaudino-fellowship/.
Each student is expected to write a short (3-4 page) self-reflection before leaving for the WSP, keep a journal of their experience, as well as write an 8- to 10-page by the end of the Winter Study period reflecting on the experiences and what has changed in the student's perceptions and beliefs from the opening essay. They will also meet the other members of the team on a weekly basis during Winter Study and regularly update the Gaudino Scholar by email and/or Skype calls. The team that receives the Gaudino Fellowship will give a brief presentation to the Board about their experience at the Board’s spring meeting in April.

The team whose project is approved will receive the Gaudino Fellow designation. In addition, students on Financial Aid will receive Gaudino funding from a minimum of 50% to a maximum of 90% of the budget for the project up to $2,500, as determined by the Financial Aid office. No additional funding for students’ projects will be provided by the College.

Method of evaluation: final project involving a 10-page paper
Prerequisites: none; not open to first-year students
Enrollment limit: none
Method of selection: selection is made on basis of proposal
Meeting times: students are away
Cost per student: $0
Instructor: Lois Banta

REL 11 God in a Suffering World (Same as COMP 11)
See under COMP 11 for full description.

REL 12 Zen Buddhism Intensive
This course is designed to provide students with an intensive experience in the study and practice of Zen Buddhism. The explosive growth in communication technology is one of many factors that have people searching for ways to stay grounded and to live lives of purpose. This course will teach students how to find and keep their center ground as they go through the everyday activities of living. They will learn how to breathe properly, something neglected in Western cultures for the most part but well known in the East. The practice of abdominal breathing, in turn, makes it easier to get one’s attention into the area of the abdomen known as the tanden (J.) or tan t’ien (C.). Proficiency in doing this provides the centering or grounding that many people wish for without knowing clearly how to achieve it. Students will also encounter the fact that deep spiritual truth cannot be accessed through the intellect. The writings studied and the meditation methods practiced are designed to help students make contact with the foundation of life itself, something usually facilitated by seeing clearly without knowing what it is. Students will also learn the energy of koan study and the Sutra study will focus on The Diamond Sutra, one of the classic texts favored in the Zen tradition. Periods of zazen (meditation) and koan study will take place. Three koans a week will be examined carefully and discussed. Zen Comments on the Mumonkan by Zenkei Shibayama will be the main text. The students will be asked to write a paragraph or two expressing their sense of the koan. Students will meet on a weekly basis during Winter Study and periodically update the Gaudino Scholar by email. The team that receives the Gaudino Scholarship will have the opportunity to present their project to the Board of Trustees and perhaps alter one’s view of what it is to live a good life and the group’s commitment to incorporate separate home stays for each fellow as part of their project, either joint or separate work/engagement internships, and a structure to facilitate collaborative action and learning. The team selected will be guided and overseen by the Gaudino Scholar who will help assure successful arrangements and will conduct appropriate preparatory discussions and follow-up sessions to optimize and help students articulate lessons learned from the overall experience. The intent of the program is to open the student to an understanding (of both the familiar and unfamiliar), and to a development of empathy, that could not be achieved without the fellowship experience.

N.B. Although this course is housed in PHLH, projects are not limited to public health.

Each prospective team needs to meet with the Gaudino Scholar as early as possible, but no later than September, and submit their group application by October 15th. Application guidelines can be found at http://gaudino.williams.edu/gaudino-fellowship/.
Each student is expected to write a short (3-4 page) self-reflection before leaving for the WSP, keep a journal of their experience, as well as write an 8- to 10-page paper by the end of the Winter Study period reflecting on the experiences and what has changed in the student's perceptions and beliefs from the opening essay. They will also meet the other members of the team on a weekly basis during Winter Study and regularly update the Gaudino Scholar by email and/or Skype calls. No additional funding for students’ projects will be provided by the College.

Method of evaluation: final project involving a 10-page paper
Prerequisites: none; not open to first-year students
Enrollment limit: none
Method of selection: selection is made on basis of proposal
Meeting times: students are away
Cost per student: $0
Instructor: Lois Banta
REL 13 Hangin’ With Hakuin: A Zen Guide
This course will feature a close look at some of the writings of Hakuin Ekaku, the zen monk from whom all current practitioners of Rinzai zen in Japan are descended. The primary text will be The Essential Teachings of Zen Master Hakuin: A translation of the Sokko-roku Kaian-fusetsu, translated by Norman Waddell.
Students taking this course will also be doing zen practice, sitting zazen each day and wrestling with the koans so prominent in Hakuin’s writings. The students will keep a journal in which they will document their experiences and reflections as they practice zazen and contemplate the teachings of Hakuin. A major focus will be looking at how zen training can impact one’s efforts to live a satisfying life as a developed human being in the 21st century.
The class will meet every day from Monday through Friday from 1pm to 3pm. There will be a reading assignment for each class, and occasional short papers on various topics and/or koans will be required.
Method of evaluation: weekly journal evaluation, two or three 2-page papers, and a final “exam” on a koan
Prerequisites: 2016 WSP course in Zen Buddhism, or a course in Buddhism at a college level
Enrollment limit: 10
Method of selection: by submitting a paragraph on their motivation for taking the course
Meeting times: afternoons
Cost per student: $25
Instructor: James Gordon
Williams, ’62; retired physician; 47 years of Zen practice, 15 as a monk.

REL 14 Yoga at the Intersection of Practice and Theory
Yoga offers experiential access to ever deepening levels and layers of human experience, from outer actions to physical poses, breath, emotions, thoughts and more. In this course, we learn practices that increase our mindful awareness of increasingly subtle, yet gradually more palpable, dimensions of life. Without a theoretical framework, however, those experiences are unlikely to land. We are unable to fully identify and register what we are sensing. A theoretical framework makes us able to explain and sustain our practices with greater self-reliance. So we will study both classic, primary as well as both ancient and contemporary secondary texts for their applicable theoretical perspectives. In addition to class meetings you are offered the tools and invited on a daily basis to practice meditation, yoga asana, and contemplation of philosophical texts. In the process you gain a foothold for being present in your own life. This then is the basis upon which each of us can be of service to others and make our offerings in the world. A day-long field trip to Kripalu Center is required.
Method of evaluation: attendance at all class sessions, required day-long field trip, practice log and reflection, short final paper (5-page), and final project or performance
Prerequisites: email stating the nature of your interest in the course sent to njudson@williams.edu
Enrollment limit: 16
Method of selection: email explaining the nature of your interest in the course to njudson@williams.edu
Meeting times: afternoons
Cost per student: $250
Instructor: Natasha Judson
Natasha Judson M.Ed. has been practicing Hatha Yoga for over 25 years, and a final “exam” on a koan.

REL 14 Yoga at the Intersection of Practice and Theory
Yoga offers experiential access to ever deepening levels and layers of human experience, from outer actions to physical poses, breath, emotions, thoughts and more. In this course, we learn practices that increase our mindful awareness of increasingly subtle, yet gradually more palpable, dimensions of life. Without a theoretical framework, however, those experiences are unlikely to land. We are unable to fully identify and register what we are sensing. A theoretical framework makes us able to explain and sustain our practices with greater self-reliance. So we will study both classic, primary as well as both ancient and contemporary secondary texts for their applicable theoretical perspectives. In addition to class meetings you are offered the tools and invited on a daily basis to practice meditation, yoga asana, and contemplation of philosophical texts. In the process you gain a foothold for being present in your own life. This then is the basis upon which each of us can be of service to others and make our offerings in the world. A day-long field trip to Kripalu Center is required.
Method of evaluation: attendance at all class sessions, required day-long field trip, practice log and reflection, short final paper (5-page), and final project or performance
Prerequisites: email stating the nature of your interest in the course sent to njudson@williams.edu
Enrollment limit: 16
Method of selection: email explaining the nature of your interest in the course to njudson@williams.edu

REL 24 Touring Black Religion in the ‘New’ South (Same as AFR 24 and ENVI 24)
See under AFR 24 for full description.

REL 25 Jerusalem: One City, Two Cultures, Three Faiths, Many Narratives (Same as HIST 25 and PSCI 25)
We begin with about 8 sessions of classroom instruction and discussion during the first two weeks of WSP. Students will read Karen Armstrong’s JERUSALEM, and Amos Oz’s TALES OF LOVE AND DARKNESS. We begin by exposing the students to history, religion, and politics, from the Jebusites to the Israelites to the Romans to the Mamluks to the Crusaders to the Ottomans; the narrative is one both of empire, and citizenship in a changing landscape.
Method of evaluation: a final 10-page reflection paper is required
Prerequisites: good health (there is a LOT of walking), openheartedness and open-mindedness; not open to first-year students
Enrollment limit: 10
Method of selection: students will be required to interview with the instructor
Cost per student: $3700
Instructor: Bob Scherr

REL 30 Senior Projects

An advanced course for Senior Religion majors (who are not writing theses) to further develop their senior seminar paper into a polished 25-page research paper (which will also be the focus of a brown-bag presentation during the Spring semester). The course will help the students with general research methods, workshop, paper writing, and presentation practice.
Instructor: Jason Josephson

FRENCH

RLFR S.P. Sustaining Program for French 101-102
Students registered for 101-102 are required to attend and pass the sustaining program during the Winter Study Period. There are five 50-minute meetings per week.
Meeting times: mornings; 9:50 am
Instructor: TBA (Teaching Associates)

RLFR 11 Audible Imagination: Exploring Sound Across the Arts (Same as ARTS 11)
See under ARTS 11 for full description.

RLFR 12 Introduction to Translation
A practical introduction to translation designed for non-native speakers of French with a level equivalent to French 205 or above. After a brief theoretical introduction in week one, class time in weeks two and three is dedicated to reviewing and correcting your translations (English to French and French to English). You will work from a range of literary, commercial, journalistic texts, culminating with a French-to-English translation project of your choice in week four.
Method of evaluation: five 1-page assignments and final 5-page project
Prerequisites: French 205 or equivalent
Enrollment limit: 15
Method of selection: preference given to French majors
Meeting times: afternoons
Cost per student: $50
Instructor: Annelle Curulla

RLFR 13 Creative Portraiture in the Darkroom (Same as ARTS 13)
See under ARTS 13 for full description.

RLFR 14 Formidable French Film: New Cinema from France and the Francophone World (Same as COMP 14)
In English, formidable can mean impressive, challenging, or alarming. In French, formidable signifies something marvelous, amazing, and extraordinary. In this course, we will explore recent films from France and the French-speaking world that are formidables in every sense of the word. From the cafés of Paris and beaches of Brittany, to the streets of Belgium, deserts of Morocco, and snows of Quebec, Francophone cinema has produced a wide variety of both culturally and politically formidable films during the past twenty years, that focus on such diverse issues as globalization and immigration, race and ethnicity, gender and sexuality, faith and family, climate and the environment, terrorism and violence, colonialism and war. Whether you’re a student of French language and Francophone cultures or simply interested in French-speaking cinema, you are welcome to explore and debate recent French film in this seminar: all films are in French with English subtitles, and discussions will be in English. Readings to include texts (in English) on French film history and criticism. Films to include works by Assayas, Arcard, Audiard, Berliner, Berri, Bouchareb, Cantet, Carion, the Dardenne(s), Delpy, Denis, Ducastel, Emond, Falardreau, Jacquod, Jaou, Jeunet, Lifezht, Liovet, Martinaye, Ozon, Pilon, Provost, Roby, Tavernier, Téchiné, Vallée, Villeneuve.
Method of evaluation: active class participation and 10-page paper in English
Prerequisites: none; films in French with English subtitles; discussions in English
Enrollment limit: 12
Method of selection: if overenrolled, preference given to majors in French and Comparative Literature
Meeting times: 2-3 mornings per week
Cost per student: $45
Instructor: Brian Martin

RLFR 15 Grand Hotel in Film and Fiction (Same as COMP 12 and GERM 12)
See under GERM 12 for full description.

RLFR 30 Honors Essay
To be taken by candidates for honors other than by thesis route.

RLFR 31 Senior Thesis
To be taken by students registered for French 493-494.

ITALIAN

RLIT S.P. Sustaining Program for Italian 101-102
Students registered for 101-102 are required to attend and pass the sustaining program during the Winter Study Period. Three 50-minute meetings per week.
Meeting times: mornings; 9:50 am
Instructor: Nicastro

SPANISH

RLSP S.P. Sustaining Program for Spanish 101-102
This course will offer an intensive introduction to the fascinating subject of the Spanish Civil War (1936-1939), often described as "the dress rehearsal for World War II". We will explore the complex political situation in late 1930s Spain as seen by Spaniards, and by the international community. A special focus will be the American and British participation in the war, and the stories of individuals who volunteered to go to Spain as reporters (i.e. Hemingway), medical aid workers, and soldiers (including a Williams student). Materials will include historical studies, literary works, newspaper articles, personal letters, films, and song, and each student will research a particular aspect of the war, and will give a final presentation based on their independent work. This is the first time in many years that such a course will be offered in English, making the subject available to non-Spanish speaking students. Spanish speakers are also welcome, and may choose to do some of their research in Spanish, but daily class work, discussions, and all final presentations will be conducted in English.

Method of evaluation: final project and presentation
Prerequisites: a literature and/or European history class at Williams
Enrollment limit: 18
Method of selection: relevance of course to their major, or potential major
Meeting times: mornings
Cost per student: $33
Instructor: Soledad Fox

RLSP 30 Honors Essay
To be taken by candidates for honors other than by thesis route.

RLSP 31 Senior Thesis
To be taken by students registered for Spanish 483-494.

RUSSIAN

RUSS S.P. Sustaining Program for Russian 101-102
Required of all students enrolled in Russian 101-102. Three meetings per week, 50 minutes per session. Practice in speaking and comprehension based on material already covered as well as some new vocabulary and constructions. Designed to maintain and enhance what was acquired during fall semester, using new approaches in a relaxed atmosphere. No homework. Regular attendance and active participation required to earn a "Pass." Open to all.
Meeting times: mornings; 9-9:50 a.m.
Cost per student: $2500
Instructor: Baktygul Aliev

RUSS 25 Williams in Georgia (Same as SPEC 25)
Williams has a unique program in the Republic of Georgia, which offers students the opportunity to engage in three-week-long internships in any field. Our students have worked in the Georgian Parliament, helped in humanitarian relief organizations like Save the Children, interned in journalism at The Georgian Times, taught unemployed women computer skills at The Rustavi Times, worked with Georgian students, and excursions. Visit the sacred eleventh-century Cathedral of Sveti-Tskhoveli and the twentieth-century Stalin Museum, take the ancient Georgian Military Highway to ski in the Caucasus Range, see the birthplace of the wine grape in Kakheti and the region where Jason sought the Golden Fleece. Participants are housed in pairs with English-speaking families in Tbilisi, Georgia's capital city. At the end of the course students will write a 10-page paper assessing their internship experience.
Method of evaluation: 10-page paper
Prerequisites: none; open to first-year students
Enrollment limit: 8
Method of selection: written statements of interest
Meeting times: Sun. evenings; 9-9:50 a.m.
Cost per student: $2500
Instructor: Baktygul Aliev

RUSS 30 Honors Project
May be taken by candidates for honors other than by thesis route.

RUSS 31 Senior Thesis
To be taken by students registered for Russian 493-494.

THEATRE

THEA 13 Anton Chekhov's Uncle Vanya
This Winter Study course will center on the Theatre Department's production of Chekhov's drama Uncle Vanya, planned as a site-specific performance at a campus location yet to be determined. The production will be cast in the fall semester, rehearse during Winter Study and the first few weeks of the Spring Semester, and perform in mid-February. Students wishing to enroll in the Winter Study may do so as actors if they have been cast in the production through the audition process, or in technical and design positions with permission of the instructor. (Students may also participate in any of these various functions, including acting, if they do not choose to enroll in the Winter Study course.) In addition to the normal activities associated with rehearsal and production research, students in the Winter Study course will produce a written paper or design portfolio in the last week of January documenting their work to date on the project. As always, auditions will be open to all members of the community, with no experience required.

Method of evaluation: 10-page paper, or dramaturgical or design portfolio accompanied by 2-3 page paper
Prerequisites: none
Enrollment limit: 20
Method of selection: auditions, instructor permission
Meeting times: afternoons
Cost per student: $0
Instructor: Robert Baker-White

THEA 14 Classic American and European Musical Theatre (Same as MUS 14)
See under MUS 14 for full description.

THEA 15 Spanish Method of Actor Training (Same as DANC 15)
The Spanish Method of Actor Training: This course offers an intense, three-week period of practice in the Suzuki Method of Actor Training, targeting actors, dancers, and anyone interested in using their body, voice and imagination in time and space in a more effective way for their audience. Created by celebrated Japanese director Tadashi Suzuki, the Suzuki Method (not to be confused with the violin method for children) expands the performer’s technical and creative use of breath, balance and energy through a series of dynamic physical and vocal disciplines. Devised through a fusion of traditional techniques focused on the body's core, the training strives to deepen concentration and imaginative commitment to each moment on stage. The course will also feature related readings on the theory and philosophy behind the development and proliferation of the method as articulated in Professor Steele’s recent translation of Suzuki’s writings Culture is the Body (TCG 2015) as well as screenings of works by SCOT (the Suzuki Method of Yoga) and other related material.
Method of evaluation: presentation
Prerequisites: none
Enrollment limit: 30
Method of selection: physical training history
Meeting times: mornings, M-Sa 10am-morning
Cost per student: $50
Instructor: Kameron Steele

THEA 16 Acting Out: Translation, Migration, and Transformation in Asian Theatres (Same as CHIN 16)
See under CHIN 16 for full description.

THEA 17 Writing in the Margins: Playwriting as Plagiarism (Same as AFR 17 and COMP 17 and LATS 17 and WGS 17)
"There are no new ideas waiting in the wings to save us...only old and forgotten ones." — Audre Lorde
There is no such thing as an original play. So says playwright Chuck Mee. Someone else, certainly, said it before him. This course proceeds from an understanding that writing and performance are, and have always been, practices of plagiarism. What does it mean to possess an idea? What, conversely, might it mean to be possessed? In this Winter Study, pick a story that swallows you up, and write a short play inspired by that source material. Take José Muñoz’ notion of “disidentification” as a framework, we will read queer playwrights and writers of color who have radically regurgitated canonical texts: Branden Jacobs-Jenkins’ AN OCTOROON; Cherrie Moraga’s THE HUNGRY WOMAN: A MEXICAN MEDEA. What does it look like to write in the margins — to productively disrespect a text? We will engage in the nitty-gritty craft of playwriting — event, tactic, arc, intention — while asking ourselves how live performance troubles the supremacy of private property in the modern era. The class will culminate in a public presentation of student works.

NOTE: This course is open to experienced writers and theater artists as well as to students who have never darkened the doorway of a theater. In an effort to understand “writing” as broadly as possible, students from various cultural landscapes and disciplines — musicians, dancers, filmmakers, visual artists, historians, philosophers, scientists, etc. — are encouraged to help us scribble beyond the margin of the page and into empty space.
Method of evaluation: written performance piece (10-page minimum), participation in final presentation, and critical contributions to class discussions
Prerequisites: none
Enrollment limit: 15
Method of selection: if the course is over-enrolled, students will be screened through a letter of interest
Meeting times: afternoons
Cost per student: $0
Instructor: Soledad Fox

THEA 32 Senior Honors Thesis
See description of Degree with Honors in Theatre.

WOMEN’S, GENDER AND SEXUALITY STUDIES

WGSS 11 Feminist Perspectives on Latinas in Popular Media (Same as AMST 11 and LATS 11)
See under LATS 11 for full description.
WGSS 12 Death, Sex, and Money in Brazil (Same as LATS 12)

This seminar uses contemporary Brazilian cinema and social science scholarship to investigate the political economy of gender and sexuality in Brazil, principally in Rio de Janeiro. Key topics will include: the economics of motherhood, domestic labor, and sexual violence in favelas; masculinity and gang life; policing and police violence; and sexual tourism. We have weekly film screenings focusing on contemporary Brazilian cinema immediately followed by discussion as well as a trip to the city one day following our screenings to analyze closely paired scholarly readings. We will also follow current political and economic events and news coming out of Brazil from week to week. There MAY also be a field trip to Northampton to attend the 5 Colleges Latin American/Brazilian consortium lecture series or other relevant events.

Method of evaluation: evaluation is based on participation and a 10-page paper about an additional pairing of cinema/reading(s) chosen by the student in consultation with the instructor; a list of suggested films and readings will be provided.

Prerequisites: none
Enrollment limit: 10
Method of selection: if overenrolled, students will be asked to submit a brief statement of interest.
Meeting times: Mondays 1:00-4:00 pm (screening and discussion) and Tuesdays 10:00 am-1:00 pm (seminar)
Cost per student: $20
Instructor: Gregory Mitchell

WGSS 17 Writing in the Margins: Playwriting as Plagiarism (Same as AFR 17 and COMP 17 and LATS 17 and THEA 17)

See under THEA 17 for full description.

WGSS 31 Honors Project

See description of Degree with Honors in Women's, Gender and Sexuality Studies.

SPECIALS

SPEC 12 Career Exploration and Developing a Career Narrative

This course is designed to help students learn how to navigate the questions of “Who am I?”, “What do I want to do?” and “How do I get there?” from an empowered place. Students will learn about the career exploration process and how to determine their interests, skills, and values. Additionally, students will explore their career narrative and learn how to effectively tell their authentic story in a resume, cover letter, interview, graduate school essay, and networking situations. This course will cover both the emotional and practical pieces of career exploration. Outside of the classroom, students will be required to complete informational interviews with professionals working in fields they may be interested in. Other assignments may include readings, personal reflection papers, building a social media presence, completing assessments, and creating job search documents.

Method of evaluation: Career Portfolio which includes a resume, cover letter or graduate school essay, networking document, and several reflection papers; students will also complete an in class presentation

Prerequisites: none
Enrollment limit: 25
Method of selection: preference given to seniors
Meeting times: afternoons, would ideally meet for 3 classes a week for 2 hours each class
Cost per student: $0
Instructor: Neal Sardana
Neal Sardana is currently a Fellow for Psychological Counseling Services. He has a background in mental health and career counseling.

SPEC 14 Beyond Hooking Up: Creating Meaningful Relationships (Same as CHEM 14 and PSYC 14)

See under CHEM 14 for full description.

SPEC 15 Pilates: Physiology and Wellness (Same as MATH 15)

See under MATH 15 for full description.

SPEC 16 Addiction Studies and Diagnostics (Same as PHLH 16)

See under PHLH 16 for full description.

SPEC 18 Call In Walk In Training for Peer Health (Same as PSYC 18)

This course is the full training for students who would like to cover Call In Walk In shifts in the Peer Health Office (Paresky 212). Students should either already be a member of Peer Health, or have an interest in joining Peer Health, as those students will get priority acceptance. Topics that we will cover include alcohol and other drug use; sex, STIs and contraception; rape, sexual assault and IPV; XIX complaint; mental health; stress and sleep; healthy and unhealthy relationships etc. Students will meet various on- and off-campus resources for referral. Outside of class work will include readings, video viewings, information gathering, and a possible field trip to local agencies.

Method of evaluation: students will create and submit (implementation not necessary) a Health Promotion event or campaign of their choosing, based on the topics covered in the training, or related subjects; event/campaign should be geared toward the Williams student population and will include a rationale, feasibility plan/budget, target audience and intended goals of the program

Prerequisites: none
Enrollment limit: 24
Method of selection: current active members of Peer Health will be chosen first; other students will be enrolled based on stated commitment to Peer Health; beyond that, class is open to any student interested in promoting the health and wellness of the student body and/or providing a helping role on campus (RASAN, SAPA, MHC, JA, Big Ephs/Little Ephs, athletic captainship, etc.)

Meeting times: mornings
Cost per student: $0
Instructor: Laini Sporbert
Laini is a Health Educator at Williams College, focusing on substance abuse education and counseling, mental health awareness, sexuality education, and simulations. She has been with the Health Center since 1997, and been the Peer Health Staff Advisor since 2006. She has an M.Ed. in Counseling Psychology with a specialty in addictions.

SPEC 19 Medical Apprenticeship

Firsthand experience is a critical component of the decision to enter the health professions. Through this apprenticeship, students can clarify their understanding of the rewards and challenges that accompany the practice of all types of medicine. Apprenticeships are arranged in two distinct ways: some students live on campus and are matched with a local practitioner, while others make independent arrangements to shadow a distant professional. The expectation is that each student will observe some aspect of medicine for the better part of the day, five days per week. In recent years, students have shadowed physicians, veterinarians, dentists, nurses, and public health experts.

Method of evaluation: a 5-page reflective paper is required, as is attendance (for those shadowing near campus) at three Monday evening programs; students will meet from 6:00-8:00 pm over dinner to hear from invited speakers from the medical community as a stimulus to discussion about their apprenticeship experiences

Prerequisites: interested students must attend an information meeting in late September; local enrollment is limited by the number of available practitioners; preference for placements will be given on the basis of seniority and demonstrated interest in the health professions

Enrollment limit: limited by the number of available practitioners
Method of selection: preference for placements will be given on the basis of seniority and demonstrated interest in the health professions

Meeting times: Mondays, 6:00-8:00 pm
Cost per student: $0
Instructor: Barbara Fuller

SPEC 20 Convicting Kafka

In the age of Suits, How to Get Away With Murder, and Better Call Saul, everyone is a lawyer. For one month you will represent Josef K. or the government as we immerse ourselves in Franz Kafka’s dizzying The Trial. A portion of the class will focus on defending and prosecuting K. in the present-day American legal system. Your zealous representation will be informed by everything from the role of social media in legal proceedings to how far you can push the envelope without being disbarred. The class will culminate in oral arguments from you, the attorneys. Court materials likely will include The Trial, sample court documents, background materials on Kafka, articles on legal ethics and the role of social media in legal proceedings, and a screening of Orson Welles’ movie adaptation of The Trial.

Method of evaluation: class participation, short paper (5-page), and final project (oral argument)

Prerequisites: none
Enrollment limit: 14
Method of selection: by seniority
Meeting times: mornings, afternoons
Cost per student: $13
Instructor: Sara Echenique
Sara E. Echenique '07 is an attorney at Hughes Hubbard & Reed LLP in New York City. She has been a complex commercial litigator for over six years and tries to keep up with her ever-growing list of books to read in her free time.

SPEC 21 Experience the Workplace; an Internship with Williams Alumni/Parents

Field experience is a critical component of the decision to enter a profession. Through these field placements, students can clarify their understanding of the rewards and challenges that accompany the practice of many different aspects within a profession, and understand the psychology of the workplace. The expectation is that each student will observe and participate in some aspect of the profession for the better part of the day, five days per week, but at least 8 hours per week. It is also expected that the instructor will assign a specific project to be completed within the 3- to 4-week duration of the course depending upon appropriateness.

Participation in this winter study will require the student to quickly assess the work environment, make inferences about corporate culture, performance norms and expectations, and to take initiative not only to learn from this experience, but also to contribute where and when appropriate. Understanding the dynamics within a work environment is critical to success in any organization and hands-on experience will illuminate lessons learned in the classroom. Upon completion of the winter study, it is expected that the student writes a thorough report evaluating and interpreting the experience.

Students creating Independent Winter Study Internships (winter study internships not listed in this SPEC 21 syllabus) must submit a 99 Internship Proposal to the Winter Study Committee by Thursday, September 29, 2016. For more details about the application instructions, application deadline and winter study internship descriptions, please go to: http://careers.williams.edu/winter-study-internships/

Method of evaluation: it is expected that students will complete assigned readings, keep a daily journal, and write a 5- to 10-page expository and evaluation that will become public record as a resource for other students.
Prerequisites: interested students must attend an information meeting in early October, and meet individually with Career Center staff to go over the details of their placements

Enrollment limit: enrollment is limited by the number of available teaching associates (instructors)

Method of selection: placements will be determined by the individual alum or parent sponsor based on application and possible telephone interview

Meeting times: each student will be in the field to observe some aspect of the profession five days per week, at least six hours per day

Cost per student: local apprenticeships: local transportation; distant apprenticeships: costs will vary based upon location, but are the environmental and energy issue of your lifetimes.

Instructor: Dawn Dellea. Williams College alumni and parents of current Williams students will be recruited to become instructors for this course. A broad range of professions will be represented as the course develops. Alumni and parents will receive individual orientations with the course director in person or via telephone conference.

SPEC 24 Community Development Health Service Work Project in Liberia, W. Africa

Interested in a great opportunity to immerse yourself in the culture of West Africa and participate in service work at the same time? This course will focus on health care and education as we work at the Ganta Rehab hospital grounds participating in daily life, helping out at the health care clinic, working on the village farm and in the local school. We will explore the close historical ties that exist between Liberia and the US. We will also examine the positive and negative effects of NGO’s and USAID on community development.

Method of evaluation: student journals and community presentation in early February at the start of 3rd quarter 2017

Prerequisites: informational and training meetings with the instructor and some reading of current books on Liberia, e.g. “The House at Sugar Beach” by Helene Cooper; not open to first-year students

Enrollment limit: 8

Method of selection: any student interested in this offering will be required to attend an informational meeting and be required to submit a written statement of purpose as to why they want to participate and what they hope to gain from this experience; I will also conduct student interviews

Cost per student: $3000

Instructor: Scott Lewis

SPEC 25 Williams in Georgia (Same as RUS 25)

See under RUS 25 for full description.

SPEC 26 Climate Policy in the New Presidency (Same as ENVI 26)

Climate change and climate change policy will affect every facet of life on earth. From fossil fuels, to livestock production, to agricultural and forestry practices — human activities generate greenhouse gases. Climate change will be the environmental and energy issue of your lifetimes.

This winter study course will travel to Washington, D.C. for a week to examine four critical aspects of climate policy: (1) domestic mitigation policy; (2) U.S. policy in an international context; (3) energy policy — renewables and conservation; and (4) the integration of climate science into climate policy.

In the week prior to the field component there will be three class sessions on the Williams campus to study the necessary background to engage with the Washington experts on climate policy. These will include: (1) U.S. domestic policy — Kyoto to the Clean Power Plan; (2) the U.S. and the UNFCCC process; and (3) energy economics.

Upon returning to campus, we will meet to debrief our Washington experience. The timing of our trip to Washington also allows us to participate in nationally significant events including: Dr. Martin Luther King Jr. Day in D.C and the inauguration of the next president.

Meetings with Williams alumni who work in the climate field will form the core of our Washington experience. These include:

- Domestic mitigation policy:
  - Nadine Block ’93, Senior Director of Government Outreach, Sustainable Forestry Initiative
  - Robert Bendick ’88, Director of Golf of Mexico Program (previously Director of U.S. Government Relations), The Nature Conservancy
  - Chris Murphy ’96, Junior United States Senator from Connecticut

- U.S. policy in an international context:
  - John Coeuyt ’92, Director of International Climate Program, The Sierra Club
  - Jennifer Potvin ’11, Project Coordinator, Foreign Policy Program, Brookings Institution
  - Necoia Shanks ’10, Special Events Senior Associate, United Nations Foundation

Energy policy:

- Douglas Hollet ’76, Deputy Assistant Secretary, Renewable Energy, Department of Energy
- Scott Fenn ’78, Director of Research, Solar Energy Industries Foundation

Instructor: Douglas Hollet ’76, Deputy Assistant Secretary, Renewable Energy, Department of Energy

Prerequisites:

- Environmental Initiatives, and Mark Smith, Professor at Colorado College.

Cost per student: $323

Instructors: Postyn Smith, Sustainability Coordinator at the Zilka Center for Environmental Initiatives, and Mark Smith, Professor at Colorado College.

SPEC 35 Making Pottery on the Potter’s Wheel

Each class will begin with a lecture-demonstration, followed by student practice on the potter’s wheel. Each student will have exclusive use of a potter’s wheel for each class. Pottery making classes will be held in the mornings, 9 AM to 12:00 PM, at Oak Bluffs Cottage Pottery in Pownal, Vermont. We will use both stoneware and porcelain clay bodies, and will work on mugs, bowls, pitchers, jars, lids, vases, and bottles, and will finish these shapes by trimming and adding handles, lugs, lids, spouts, and knobs.

We will also work on hand-building projects. Early in the Winter Study Session there will be a 1.5-hour slide presentation held one afternoon at a location on campus. After the tenth pottery making class meeting, all completed work will be kiln-fired to biscuit, approximately 1750F. The evening meeting will be devoted to glazing your biscuited pieces. Glazing techniques will include pouring, dipping, layering, brushing, and stamping, and using wax resist and other masking techniques to develop pattern and design. The completed work will then be glaze-fired to cone 5, approximately 2150F. The last meeting, held at Oak Bluffs Cottage Pottery early in the new semester, will be devoted to a "final project (positive-orientation) critique" in the studio of your finished work.

Woven into lecture-demonstrations will be presentations on various topics relating to the science and history of pottery making.

Method of evaluation: final project critique session

Prerequisites: none; no pottery making experience necessary

Enrollment limit: 9

Method of selection: level of enthusiasm for learning the craft of pottery making

Meet at: mornings, 9am-12pm

Cost per student: $355

Instructor: Ray Bub

Ray Bub is a ceramic artist and teacher at Oak Bluffs Cottage Pottery in Pownal, Vermont, ten minutes north of the Williams College campus. All class meetings except the slide show take place at Oak Bluffs Cottage Pottery. Learn more about Ray Bub at www.raybub.com

Energy policy:
PRESIDENTS OF WILLIAMS
Ebenezer Fitch, D.D., 1793-1815
Zephaniah Swift Moore, D.D., 1815-1821
Edward Dorr Griffin, D.D., 1821-1836
Mark Hopkins, M.D., D.D., LL.D., 1836-1872

Franklin Carter, Ph.D., LL.D., 1881-1901
John Haskell Hewitt, LL.D., Acting President, 1901-1902
Henry Hopkins, D.D., LL.D., 1902-1908
Harry Augustus Garfield, L.H.D., LL.D., 1908-1934
Tyler Dennett, Ph.D., Litt.D., LL.D., 1934-1937
Francis Christopher Oakley, Ph.D., L.H.D., Litt.D., LL.D., 1985-1993
William Gilson Wagner, B.Phil., D.Phil., Interim President, 2009-2010
Adam F. Falk, Ph.D., 2010-

TRUSTEES 2016-2017
Adam F. Falk, Ph.D., L.L.D., President
Michael R. Eisenson ’77, M.B.A., J.D., Boston, Massachusetts, Chairman of the Board of Trustees
Yvonne Hao ’95, M.A., Boston, Massachusetts
Kate L. Queeney ’92, Ph.D., Northampton, Massachusetts
Joey Shaista Horn ’87, M.B.A., Oslo, NORWAY
O. Andreas Halvorsen ’86, M.B.A., Greenwich, Connecticut
Liz Robinson ’90, M.B.A., New York, New York
Caron Garcia Martinez ’81, S.M., M.F.A., Washington, D.C.
Clarence Otis, Jr., ’77, J.D., Windermere, Florida
Martha Williamson ’77, B.A., San Marino, California
Elizabeth A. Andersen ’87, J.D., Washington, D.C.
William C. Foote ’73, M.B.A., Whitefish Bay, WI
Richard R. Pickard ’75, J.D., Santa Cruz, California
Sarah Mollman Underhill ’80, M.A., Bronxville, New York
Timothy A. Barrows ’79, M.B.A., Cambridge, Massachusetts
Valerie A. DiFebo ’84, B.A., New York, New York
Jeffrey S. Harleston ’82, J.D., Santa Monica, California
Gregory H. Woods ’81, J.D., New York, New York
Thomas M. Belk ’77, M.B.A., Charlotte, NC
Noriko Honda Chen ’89, B.A., San Francisco, CA
Cooper Campbell Jackson ’89, J.D., Los Angeles, CA
Jonathan D. Sokoloff ’79, B.A., Los Angeles, CA
Mark R. Tercek ’79, M.B.A., Arlington, VA
FACULTY EMERITI

Marsha I. Altschuler
4 Woodlawn Drive

Professor of Biology, Emerita

Donald DeB. Beaver

Professor of History of Science, Emeritus
100 Southworth Street

Roger E. Bolton

William Brough Professor of Economics, Emeritus
30 Grandview Drive

David A. Booth
Vice Provost and Lecturer in Political Science, Emeritus
44 Willshire Drive

James R. Briggs
Assistant Professor of Physical Education, Emeritus
350 Stratton Road

Fielding Brown
Charles L. MacMillan Professor of Physics, Emeritus
Westwood, Massachusetts

Michael F. Brown
James N. Lambert '39 Professor of Anthropology and Latin American Studies, Emeritus
Sante Fe, New Mexico

Kim B. Bruce
Frederick Latimer Wells Professor of Computer Science, Emeritus
Claremont, California

Jean-Bernard Bucky
William Dwight Whitney Professor of Arts and Theatre, Emeritus
85 Longview Terrace

Lynda K. Bundtzen
Herbert H. Lehman Professor of English, Emeritus
582 Henderson Road

James T. Carlton
Professor of Marine Sciences, Emeritus
Stonington, Connecticut

John W. Chandler
President of the College, Emeritus
1611 Cols Spring Road, Apt. 310

Raymond Chang
Halford R. Clark Professor of Natural Sciences, Emeritus
Bainbridge Island, Washington

Phoebe Cramer
Professor of Psychology, Emerita
20 Forest Road

Stuart J. B. Crampton
Barclay Jermain Professor of Natural Philosophy, Emeritus
Chagrin Falls, Ohio

Andrew B. Crider
Mary A. & William Wirt Warren Professor of Psychology, Emeritus
18 Windflower Way

Phyllis L. Cutler
College Librarian, Emerita
Milton, Massachusetts

Robert F. Dalzell Jr.
Fred Rudolph Professor of American Culture, Emeritus
189 Stratton Road Apt. B4

William R. Darrow
Cluett Professor of Religion, Emeritus
Portland, Oregon

Samuel Y. Edgerton Jr.
Amos Lawrence Professor of Art, Emeritus
940 Hancock Road

Richard J. Farley
Assistant Professor of Physical Education, Emeritus
117 Candlewood Drive

Robert L. Fisher
Assistant Professor of Physical Education, Emeritus
Brooksville, Maine

William T. Fox
Edward Brust Professor of Geology and Mineralogy, Emeritus
51 Moorland Street

Peter K. Frost
Friedrich L. Schuman Professor of International Relations, Emeritus
1539 Green River Road

Charles Fuqua
Garfield Professor of Ancient Languages, Emeritus
96 Grandview Drive

Antonio Gimenez
Professor of Romance Languages, Emeritus
Madrid, Spain

George R. Goethals II
Dennis A. Meenan ’54 Professor of Leadership Studies, Emeritus
Richmond, Virginia

William C. Grant Jr.
Samuel Fessenden Clarke Professor of Biology, Emeritus
155 Sweetbrook Road

Suzanne L. Graver
John Hawley Roberts Professor of English, Emeritus
117 Forest Road

Fred Greene
A. Barton Hepburn Professor of Government, Emeritus
135 South Street

Edward S. Greens
Assistant Professor of Physical Education, Emeritus
Eastham, Massachusetts

Evah G. Grudin
Senior Lecturer in Art, Emerita
30 Hamel Avenue

Charles Haithausen
Robert Sterling Clark Professor of Art History, Emeritus
441 Hopper Road

John M. Hyde
Brown Professor of History, Emeritus
33 Jerome Drive

Markes E. Johnson
Charles L. MacMillan Professor of Natural Science, Emeritus
9 Lynde Lane

Saul M. Kassim
Massachusetts Professor of Psychology, Emeritus
38 Colonial Avenue

Robert D. Kavanaught
Hales Professor of Psychology, Emeritus
400 Pine Cobble Road

David S. Kechnel
Professor of Music, Emeritus
350 Hopper Road

Bruce Kieffer
Professor of German, Emeritus
Memphis, Tennessee

Sherron E. Knopp
John Hawley Roberts Professor of English, Emeritus
Amesbury, Massachusetts

Benjamin W. Labaree
Professor of History and Environmental Studies, Emeritus
200 Water Street

Aida Laleian
Professor of Art, Emerita
34 Jerome Drive

Renzie W. Lamb
Assistant Professor of Physical Education, Emeritus
Piedmont, California

Kal N. Lee
Rosenburg Professor of Environmental Studies, Emeritus
Charlottesville, Virginia

H. Gansse Little Jr.
Cluett Professor of Religion, Emeritus
Springhill, Florida

William E. McCormick
Assistant Professor of Physical Education, Emeritus
Tiverton, Rhode Island

Thomas E. McGill
Hales Professor of Psychology, Emeritus
Loveland, Colorado

Douglas B. Moore
Mary A. and William Wirt Warren Professor of Music, Emeritus
61 Moorland Street

Frank Morgan
Chair and Webster Atwell Class of 1921 Professor of Mathematics, Emeritus
Portland, Oregon

Glyn P. Norton
Wilcox B. and Harriet M. Adsit Professor of International Studies, Emeritus

Francis Oakley
Edward Dorr Griffin Professor of the History of Ideas, Emeritus; President, Emeritus; and Senior Oakley Fellow
54 Scott Hill Road

Daniel D. O’Connor
Mark Hopkins Professor of Intellectual and Moral Philosophy, Emeritus
36 Hawthorne Road

Robert Peck
Director of Athletics, Emeritus
Pownal, Vermont

Robert R. Peck
Washington Gladden 1859 Professor of Religion, Emeritus
Bristol, Rhode Island

Norman R. Petersen Jr.
Professor of Physics, Emeritus
Los Alamos, New Mexico

C. Ballard Pierce
Kenneth C. Roberts Jr.
A. Barton Hepburn Professor of Music, Emeritus
Bennington, Vermont

Richard O. Rouse
Mary A. & William Wirt Warren Professor of Psychology, Emeritus
85 Harmon Pond Road

Michael T. Russo
Assistant Professor of Physical Education, Emeritus
135 The Knolls

Carl R. Samuelson
Assistant Professor of Physical Education, Emeritus
575 Water Street

John B. Sheahan
William Brough Professor of Economics, Emeritus
320 Sydneyc Road

Harry C. Sheehy III
Director of Athletics and Assistant Professor of Physical Education, Emeritus
Hanover, New Hampshire

Anne R. Skinner
Senior Lecturer in Chemistry, Emerita
714 Stratton Road

Guilford L. Spencer II
Frederic Latimer Wells Professor of Mathematics, Emeritus
Wayland, Massachusetts

Richard H. Stamelman
Professor of Comparative Literature, Emeritus
Norwich, Vermont

Kurt P. Tauber
Class of 1924 Professor of Political Science, Emeritus
1611 Cold Spring Road

Mark C. Taylor
Cluett Professor of Humanities, Emeritus
235 Stone Hill Road

Alex W. Willingham
Professor of Political Science, Emeritus
25 Lee Terrace

James B. Wood
Charles R. Keller Professor of History, Emeritus
234 Gale Road

Reiko Yamada
Professor of Japanese, Emerita
189 Stratton Road, H5

Steven J. Zottoli
Howard B. Schow ’50 Professor of Biology, Emeritus
98 Buxton Hill Road
Baktygul A. Aliev, Assistant Professor of Russian--2000, B.A., American University of Central Asia; 2007, M.A., McGill University; 2014, Ph.D., McGill University

Denise K. Buell, Cluett Professor of Religion--1987, B.A., Princeton University; 1990, M.Div., Harvard University; 1995, Ph.D., Harvard University

Colin C. Adams, Thomas T. Read Professor of Mathematics--1978, B.S., Massachusetts Institute of Technology; 1983, Ph.D., University of Wisconsin, Madison

Deborah A. Brothers, Costume Director and Lecturer in Theatre--1976, B.F.A., University of New Orleans; 1979, M.F.A., California Inst of the Arts

Daniel P. Aalberts, Professor of Physics--1989, B.S., Massachusetts Institute of Technology; 1994, Ph.D., Massachusetts Inst of Technology

Kevin M. App, Assistant Professor of Physical Education and Head Men's Basketball Coach--2007, B.A., Cornell University

Alison A. Case, Professor of English--1984, B.A., Oberlin College; 1988, Ph.D., University of Chicago, Amherst

Cecilia Chang, Professor of Chinese--1981, B.A., Fu-Jen University; 1987, M.A., University of California, Louisiana; 2004, Ph.D., University of Massachusetts, Amherst

Jennifer E. Chuks, Assistant Professor of Physical Education and Assistant Athletic Director/Student Athlete Services--2006, B.A., Grinnell College; 2009, M.B.A., University of New Haven

Matthew C. Chao, Assistant Professor of Economics--2006, B.A., Dartmouth College; 2015, Ph.D., California Inst of Technology

Jessica M. Chapman, Associate Professor of History--1999, B.A., Valparaiso University; 2001, M.A., University of California, Santa Barbara; 2006, Ph.D., University of California, Santa Barbara

 себестройка

Daniel P. Aalberts, Professor of Physics--1989, B.S., Massachusetts Institute of Technology; 1994, Ph.D., Massachusetts Inst of Technology

DEGREES CONFERRED JUNE, 2016
Confering of the Degree of Master of Arts

Danielle Marie Amodeo
Maxwell Howell Boeensma
Christopher Thomas Borschel

Danielle Rebecca Ezor
Jacobé Isha Huet
Annemarie Iker
James H. Miller
Julia Silverman
Nina Rose Wexelblatt
Kate Trudi Cowan Wiener

Confering of the Degree of Master of Arts or Certificate in Policy Economics

Farah Al Shami
Kader Amadou
Fabrizio Ardiles
Than Linn Aung
John Awan
Tanvir Bashar
Ibrahimna Camara
Tatiana Dasy
Ibrahimna Diallo
Eric Dongmo Tejogni

Navy Hort
Mohammad Monir Hossen
Ruzniya Jainul Abdeen
Joy Omar Karim
Ivan Patrick Kaytllare
Konan Couassi Fernand
Manuel Muhabe
Michael Mwondha
Stella Namuleme Senteza
Cam-Nhung Nguyen
Pelagie Nyanwidi
Nyanzi Sulaiman
Abdulraoof Saif
Sibah Shahana
Mr Ahmad Sheikib
Quay Ta
Chimvano Jacquiline Thawani
Ei Ei Theint

* Phi Beta Kappa
+ Sigma Xi

Bachelor of Arts, Summa Cum Laude

*Brian Kapel Astrachan
+Eva Rose Fournakis
*Feixue Gong, with highest honors in Economics
*+Tong Liu, with highest honors in Computer Science
+Bake Rowe Mackall
+Kathryn Anne McNaughton, with highest honors in Psychology
+Lucy Elizabeth Page
*Jillian Rhiana Hindes Stallman, with honors in Economics
*Jeffrey C. Wang, with highest honors in Economics
*+Chanel Wang Zhan, with highest honors in Psychology

Bachelor of Arts, Magna Cum Laude

*Emily Alexandra Barnett Berg
+Lucy Jiretzh Bergwall
Joseph Anthony Bianco
Christopher Henry Bravo
+John Kyungjun Chae, with honors in Chemistry
+Peter Thomas Wylie Cihon, with highest honors in Sociology
Theodore Samuel Cohan

Conrad Andrew Damstra, with honors in Philosophy
John Russell Damstra, with honors in Economics
+Ranabha Leigh Dine, with highest honors in Religion
+Samuel Aaron Donow, with highest honors in Computer Science
*Ellen Frances Finch
+Jace Seton Forbos-Cockell
+Dylan Joshua Freas, with honors in Chemistry

*Paul Thomas Friedrich, with honors in Economics
+Ell Spencer Goldstein
+Todd Madison Hall, with highest honors in Political Economy
+Patricia Ho, with highest honors in Biology

Phoebe Kae House
+Tony Pan Huang, with highest honors in Chemistry
+Taylor Nicole Jackvony, with highest honors in Chemistry
+Welting Rachel Ji
*Gabriella Clemente Kallas, with honors in American Studies
*Benjamin Matthew Kaufman
+Gregory Judson Haverkamp Kehne, with highest honors in Mathematics
+Demie Nayeon Kim
+Soomin Kim, with highest honors in Biology

Abraham Joshua Kirby-Galen
+Noah Isaac Klag
*Alexander Simon Kling, with honors in Political Science
+Rachel Lilly Krcmar
*Molly Reed Leonard, with honors in English
*Brian Joseph Levine, with highest honors in Biology
*Rebecca McKinnon Streak Lewis, with highest honors in Economics

Claire Catherine Leyden, with highest honors in Music

+Kristian Viggo Hoff Lunke
+Alyssa Lauren Maddalone
*+Bijan Henrik Mazatheri, with highest honors in Physics
*+Peter Morton McDonald Jr., with highest honors in Mathematics
*+Matthew James McNaughton, with highest honors in Computer Science
*Olivia Shira Meyerson
*Gillian Sydney Miller-Lewis
*Pamela Fine Mishkin, with honors in Computer Science
*Vincent Bonvicino Molinari
*+Conor Lloyd Mook, with highest honors in Biology
*+Ashwin Narayan, with highest honors in Physics

Christine Ryann Wee, with honors in Biology
+Alex Samuel Paseltiner, with highest honors in English
*+Austin Joseph Paul
+Daniel Russell Jerome Potter, with highest honors in Music
*Katherine Eileen Preston, with highest honors in English
+Reid Allen Pryztan
+Luxi Qiao, with highest honors in Chemistry
+Jose Raventos
+Allison Anne Rowe

*Lacey Michelle Serletti, with highest honors in Biology
*Emily Kate Shea, with highest honors in Biology
+Mia Catherine Smith, with highest honors in Mathematics
+Penny Sun, with honors in Biology
+Jacob Benjamin Tamposi
+Helen Tang, with highest honors in Music

Madelynn Sandra Taylor
Diwas Timilisina, with honors in Computer Science
*Andrew Kenneth Udell, with highest honors in Economics
*Kai Wang, with honors in Computer Science
+Douglas Ryan Wasserman, with highest honors in Chemistry
+Saraar Tewksbury Wieman, with highest honors in Psychology
*Paige Laura Wilkinson, with honors in Economics
*Francis William Worthington Jr.
+Cooer Belzberg Zeinlick
Bachelor of Arts, Cum Laude

Sarah Katherine Austin
Helena Frances Barber
Sofia Paterno Benares
Jessica Bernheim

PRIZES AND AWARDS—2015-2016

OLMSTED PRIZES—Awarded for excellence in teaching to four secondary
Newtown, PA; Ms. Mary I. Rascón-Corral, Sanger High School, Sanger, CA.
Great Neck, NY; Ms. Celeste R. Mahabar, Detroit Country Day School,
Roger Vargas ‘16, Olga R. Beaver Memorial Prize in Mathematics
Benjamin M. Kaufman ‘16, Robert G. Barrow Memorial Prize for Music
Ahmad T. Greene-Hayes ‘16, Charles R. Alberti, Class of 1919, Award
Penny Sun ‘16, The Erastus C. Benedict, Class of 1921, Prize in Biology
Alexander R. Kilman ‘16, The Erastus C. Benedict, Class of 1921, Prize in Classics (Greek/First)
Jensen J. Pak ‘16, The Erastus C. Benedict, Class of 1921, Prize in Classics (Latin/First)
Liam J. Abbrattain ‘19, The Erastus C. Benedict, Class of 1921, Prize in German (First)
Katherine T. Hrach ‘16, The Erastus C. Benedict, Class of 1921, Prize in German (Second)
Kristian Viggio Hoff Lunke ‘16, The Erastus C. Benedict, Class of 1921, Prize in History (First)
Nicholas E. Dyja ‘16, The Erastus C. Benedict, Class of 1921, Prize in History (Second)
Anna C. Neufeld ‘18, The Erastus C. Benedict, Class of 1921, Prize in Mathematics (First Prize)
Yiheng Zhang ‘18, The Erastus C. Benedict, Class of 1921, Prize in Mathematics (First Prize)
Sumun S. Iyer ‘16, The Erastus C. Benedict, Class of 1921, Prize in Mathematics (Second Prize)
Andrew L. Scharf ‘18, The Erastus C. Benedict, Class of 1921, Prize in Mathematics (Second Prize)
Wei Chao ‘18, The Erastus C. Benedict, Class of 1921, Prize in Mathematics (Second Prize)
Logan D. Lawson ‘16, Gauis C. Bolin, 1889, Prize in African Studies
Annalise Ch. ‘16, Russell H. Bostert Thesis Prize in History
Gabriella C. Kallas ‘16, Kenneth L. Brown, Class of 1947, Prize in American Studies
Ahmad T. Greene-Hayes ‘16, Sterling A. Brown, Class of 1922, Citizenship Prize
Tyler S. Tsay ‘19, The Bullock Poetry Prize of the American Academy of Poets
Kathryn A. McNaughton ’16, W. Marriott Canby, Class of 1891, Athletic Scholarship Prize
